Mr. LENROOT. Mr. Chairman, I am not opposed to river and harbor improvements. I am not opposed to all of the items in this bill. On the contrary, I stand ready to support every item in it that can be found to come within the rule laid down by the Secretary of War himself. That rule is found on page 2 of the majority report of the committee. I read from that report:

> In his letter of transmittal he [the Secretary of War] stated that the schedule was based upon a direction by him to the Chief of Engineers that he should prepare recommendations "designed to provide for the continuance of river and harbor improvements already in process and the maintenance of existing works wherever in either event substantial loss would be entailed by a suspension of work, and that he should include such new projects as are intimately associated with the question of national defense in a military way.

I repeat again, I am willing to support every item in this bill which can be justified upon that letter of the Secretary of War; but, Mr. Chairman, it is also true that as you read the hearings taken by the Committee on Rivers and Harbors there are very few, if any, of the new projects that are contained in this bill—there are two or three—that can be justified upon that ground. I shall go further than that. I will go further than the direction of the Secretary of War and say that I am willing to vote for any item in the bill that provides for the maintenance of our present rivers and harbors wherever there is any substantial commerce carried upon them, because I realize that it is necessary for the successful prosecution of this war that the means of transportation that we now have shall be continued. But when you go beyond that, when we provide for new projects that Col. Newcomer himself frankly says have no relation whatever to war or to military necessity, but solely because of possible commerce in the future, they can not be defended, and those include such items as the million-dollar appropriation for the Missouri River, the $1,200,000 appropriation for the upper Mississippi River, and other items of that character that it will be found, if you read the hearings, are not defended either from the standpoint of military necessity or of being necessary to accommodate the present commerce that is now carried upon the rivers.

More than that, Mr. Chairman, in the last river and harbor appropriation bill there were four new projects included as emergency projects, and one of them was a project in my own harbor—the Superior-Duluth Harbor, at the head of Lake Superior, a harbor that is second only to New York in the amount of commerce that is carried, it being last year over 40,000,000 tons, of a valuation of about $400,000,000. That emergency project, urgently recommended by the War Department, was appropriated for to the amount of $360,000. Bids were advertised for within the last few months. The estimates for dredging for the completion of that project were at the rate of 10 cents per yard. The bids were opened a short time ago, and it was found that the bids were for 12½ cents per yard, or an increase of 25 per cent, an increase that is not greater than the increased cost in every other line of industry during the past two years. The War Department rejected all of those bids, and in a letter of June 1, 1917, from Gen. Black I received the following information:

JUNE 1, 1917.

Hon. IRVINE L. LENROOT,
House of Representatives.

SIR: In compliance with your oral request, I have the honor to state that the district officer at Duluth was recently authorized to reject as excessive the proposals received for dredging the basin at Duluth-Superior Harbor adjacent to the Superior entrance, and to postpone for the present any further attempt to have this work done by contract, since the bids received on the two occasions when the work was advertised have been higher than the estimates, and would not permit the completion of the work as contemplated by the appropriation made for this purpose. If a Government dredge should become available for the work, it may be undertaken in that manner, but otherwise it is proposed to delay operations until circumstances are such as to permit an advantageous contract to be made.

Very respectfully,

W. M. BLACK,
Brigadier General, Chief of Engineers.

Now, I want to recall to this committee that if there is any port the maintenance and improvement of which is necessary in the prosecution of this war, it is the Superior-Duluth Harbor, the gateway for the hundreds of millions of bushels of grain of the Northwest, of the copper from the Rocky Mountain States, of the iron ore from the ranges in Minnesota; and here is not an authorization but a direction on the part of Congress in the last river and harbor bill to prosecute this necessary work, and the money has actually been provided; and yet the War Department in the exercise of a discretion which it really does not have, but has assumed, undertakes to delay indefinitely the prosecution of the work. Neither I nor my people complain; if this money is necessary for the carrying on of this war at this time, if the Treasury needs the money, we will not complain.

But, Mr. Chairman, I want to ask the chairman of this committee, in the face of what I have stated, how he can justify the 34 new projects in this bill and make appropriations for them—this money must be set aside in the Treasury and can not be used for any other purpose—when the War Department now refuses, on account of higher prices, to let contracts and do work which Congress has now ordered.

Now, Mr. Chairman, that is a very pertinent suggestion, because the estimates upon which this work in the Superior-Duluth Harbor was based are the same estimates actually made on which you are acting on these 34 new projects. That is all I care to say at this time on that. I shall have something further to say as we come to the five-minute rule.

While I occupy this time in general debate I do want to take this opportunity to refer to another collateral matter, but one that I think the House should consider in connection with the further consideration of this bill under the five-minute rule. We all have great affection for the distinguished chairman of the Committee on Rivers and Harbors, and in what I have to say now I do not propose in the slightest degree to reflect upon him, but I do call attention to the fact that his judgment sometimes is not of the best, and that this House and this committee ought not blindly to follow his leadership: On the 17th day of last month the gentleman from North Carolina, the chairman of this committee, introduced a bill in this House with respect to water powers and had it referred to his committee, a bill that would have given the water powers of the United States, subject only to the will of the Secretary of War, whoever he might be, to the water-power interests of this country for all time to come, in perpetuity, and with practically no limit, and no compensation to the Government for the untold wealth that it proposed to bestow on those great water-power companies.

Mr. SMALL. Will the gentleman yield?

Mr. LENROOT. In just a moment, when I conclude this. This House on three separate occasions has voted down overwhelmingly bills less vicious than the one introduced by the gentleman from North Carolina, and I say that it is to the credit of this House, and without any reflection on the Committee on

Rivers and Harbors, that yesterday, upon a motion to re-refer that bill from that committee to the Committee on Interstate and Foreign Commerce, where it belongs, that motion prevailed by a vote of 222 to 47.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SMALL. I will yield the gentleman two minutes for the purpose of submitting a question.

Mr. LENROOT. I shall be very glad to yield.

Mr. SMALL. Only to say that the chairman of the committee who introduced the bill for the development of the water power on navigable streams disagrees entirely with the opinion of the gentleman who has just spoken.

Mr. LENROOT. The gentleman who has just spoken did not give an opinion, but gave a fact, which anyone can see from a reading of the bill.

Mr. SMALL. Now, the gentleman can not state a fact; the gentleman was expressing an opinion about the merits of a particular bill which I introduced and which was referred to the Committee on Rivers and Harbors. I am expressing the opinion it was a good bill, and let me say further that there are a few gentlemen in the House, in this body here, who think that in them reside all knowledge and all wisdom in respect to water power, who stand against reconciling the differences upon that question, and who year after year prevent us from utilizing this magnificent water power which emanates from our streams.

Mr. LENROOT. The gentleman, of course, is entitled to an opinion. I supposed that it was a question of a statement of facts. The fact is that the gentleman's bill proposes to give to the water-power interests of this country the water powers for all time to come. Does the gentleman deny that?

Mr. SMALL. I do.

Mr. LENROOT. The gentleman had better read his bill, and he would come to a different conclusion.

Mr. SMALL. I take issue with the gentleman upon that question. Does the gentleman wish more time?

Mr. LENROOT. I would be glad to get more time if the gentleman questions my construction of the bill; I would like to have about five minutes.

Mr. SMALL. I thought the gentleman wanted to discuss the river and harbor bill.

Mr. LENROOT. No; I am through with that.

Mr. SMALL. I will be glad when the question of water power is up to discuss it.

Mr. LENROOT. The following is the bill to which I have referred:

A bill (H. R. 4504) to amend an act entitled "An act making an appropriation for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved March 3, 1899.

Be it enacted, etc., That section 9 of an act entitled "An act making an appropriation for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved March 3, 1899, is hereby amended by adding at the end thereof the following:

"*And provided further*, That whenever the construction of any navigation improvement or the alteration or enlargement of an existing improvement upon, in, along, or across any river, harbor, or other water of the United States can thereby be secured, in whole or in part, without expense to the United States, the Secretary of War is hereby authorized to enter into a contract therefor with any person or corporation who has acquired from the State or States in which the improvements are to be located the rights necessary therefor and who will undertake to construct such improvement in return for the rights and privileges granted herein: *Provided, however*, That the Secretary of War shall first determine that the navigation improvement is necessary or desirable in the public interest for the purpose of improving or developing a waterway or waterways for the uses of interstate or foreign commerce.

"Every contract made hereunder shall contain or make reference to detailed plans and specifications, which must be approved by the Chief of Engineers, for the navigation, improvement, and accessory works authorized thereby, showing the location thereof and the land necessary therefor, and shall contain such provisions and regulations with respect to the construction, maintenance, use, and operation of the navigation, improvement, and accessory works as the Secretary of War may deem necessary for the protection of the interests of interstate and foreign commerce, and no structure or works shall be begun until such plans and specifications have been approved as aforesaid. Every contractor shall have the right to construct, maintain, use, and operate the navigation improvement and such accessory works as may be authorized by the contract for the development of water power and other purposes, in accordance with and subject to the provisions of the contract and of this act and subject to such reasonable regulation of rates, charges, and service as may be prescribed under authority of the State or States in which the service is rendered, and in case the service is interstate and the authorities of the State directly affected can not agree, then subject to such regulation of rates, charges, and service as the Interstate Commerce Commission shall prescribe; the right to use such public or other land of the United States as may be described in the contract and necessary therefor upon paying to the United States such compensation or charges based upon the fair and reasonable value of the land as may be fixed in the contract; and the right to acquire such other land as may be necessary therefor by the exercise of the power of eminent domain.

"The United States shall have the right at any time after the expiration of 50 years from the date of any contract made hereunder to terminate the rights and privileges of the contractor by taking over the navigation improvements and accessory works authorized by the contract, and all the property of the contractor dependent in whole or in part upon such improvements or works for its usefulness or value, upon paying to the contractor just compensation therefor, which shall not include any payment for the value of any of the rights herein granted, and upon assuming all contracts for power entered into by the contractor which are dependent in whole or in part upon the properties taken over.

"The district court of the United States shall have jurisdiction to hear, try, and determine any suit or proceeding brought under this act, including any condemnation suit or proceeding brought by any contractor hereunder, regardless of the sum or value of the matter in controversy. The provisions of this act and of any contract made hereunder shall be enforceable by and against the personal representatives, successors, and assigns of the contractor."

"SEC. 2. That an act entitled "An act making an appropriation for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved March 3, 1899, is hereby further amended by adding thereto a new section, to be known as section 21a, as follows:

"SEC. 21a. That the Secretary of War be, and he is hereby, authorized to enter into agreements for the use of surplus water and water power generated at dams or diversion structures and works constructed wholly or in part by the United States in the interests of navigation at rates securing to the Government reasonable compensation for the opportunity for the generation of power created at its expense on such terms and conditions and for such periods of time not to exceed 50 years as may seem to him just, equitable, and expedient, subject, however, to the provisions of this act governing the authorization, maintenance, and operation of power plants in connection with navigation improvements and to all regulations governing the use and disposition of the power, so far as the same may be applicable; and all such agreements, the parties thereto, and the terms and conditions thereof shall be reported annually to Congress: *Provided*, That the said Secretary of War in making such agreements, other conditions being equal, shall give preference to the bid solely for municipal use of any municipal corporation or other public corporation not operated for profit."

Mr. SMALL. Mr. Chairman, I move that the committee do now rise in order that the gentleman from New York [Mr. FITZGERALD] may present a conference report.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HARRISON of Mississippi, Chairman of the Committee of the Whole House on the state of the Union reported that that committee had had under consideration the bill H. R. 4285, and had come to no resolution thereon.

URGENT DEFICIENCIES FOR MILITARY AND NAVAL ESTABLISHMENTS.

Mr. FITZGERALD. Mr. Speaker, I present a conference report on the urgent deficiency appropriation bill for printing under the rules.

The SPEAKER. The gentleman from New York presents a conference report on the bill H. R. 3971, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 3971), making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 13, 1917, and for other purposes.

The SPEAKER. It is ordered to be printed under the rule.

Mr. FITZGERALD. Mr. Speaker, this is a complete report, with the exception of the so-called Jamestown Exposition site item, and I wish to give notice to the House that the matter will be called up some time to-morrow afternoon to be disposed of.

RIVERS AND HARBORS.

Mr. SMALL. Mr. Chairman, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the river and harbor appropriation bill, with Mr. HARRISON of Mississippi in the chair.

The CHAIRMAN. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 4285) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. SMALL. Mr. Chairman, I yield five minutes to the gentleman from Kansas [Mr. LITTLE].

Mr. LITTLE. Mr. Chairman, I wish to ask the attention of the committee for a moment to a particular item in the bill. I shall at the proper time move a very slight amendment. It is a matter of equity and common sense, and I think probably will meet with no opposition from the committee. On page 23 it says:

Missouri River: For maintenance and continuing improvement with a view to securing a permanent 6-foot channel between Kansas City and the mouth of the river, $1,000,000; for snagging and maintenance between Kansas City and Sioux City, $35,000.

Kansas City has a water front of 5 or 6 miles. There are two cities of that name. They lie along the Missouri River side by side, only the imaginary State line between, the Kaw River entirely on our side, running into the Missouri River. The intention of this bill has been for a number of years to help them both. It has secured help and assistance upon that theory. In-

stead of that the young gentlemen, or old gentlemen, who speak for the War Department have made a report in which they say that this item refers to Kansas City, Mo., only, not including Kansas City, Kans. I think this is unjust and inequitable, and I do not think the committee thinks that was what was really intended. This bill, as I have just called to your attention, appropriates $35,000 for snagging the river above Kansas City, Kans., which shows we mean to keep on up the river. There are also appropriations for as far up as between Sioux City and Fort Benton. Now, I want to insert after the words "Kansas City" "waterworks intake," which will carry the 6-foot channel upstream to above Kansas City, Kans., and Kansas City, Mo., and will do what the bill was originally intended to do. It will then read "a 6-foot channel from Kansas City waterworks intake to the mouth of the river," and both Kansas Cities will be treated alike, as was intended.

There are peculiar local reasons for this. The city which I represent, in Kansas, has used $1,900,000 in fixing the Kaw River right at this place, and for 4 miles up the Kaw there are dikes on both sides. This does as much for Kansas City, Mo., as for us, protecting them too. They have spent nothing upon these rivers. We have spent nearly $2,000,000, seventy thousand more being now arranged for. On its right bank coming down, the Missouri drops behind our dikes whenever there is an overflow, and we are always in danger of losing half a million dollars' worth of dikes which we have built. Your people ought to assist us in protecting them. When we have spent $1,900,000 on a waterway we ought to get a little consideration here, but instead of that we find it all goes to the town below us. Perhaps nobody intends to slight us. Possibly we are lost sight of in favor of a town of 250,000 people, where all the big hotels and newspapers are. Our city has only 100,000 people and they do not give us any attention. A channel "from Kansas City" is too indefinite. The War Department sends a new man every little while. Everyone has his own opinion of where to begin. We should fix the point definitely.

Our city is the fifteenth manufacturing city in the United States. Kansas City, Mo., is the forty-second. As one of their wholesalers said to me, "Our business is a peanut business as compared with that done in the bottoms." You can not establish a channel upstream unless the Kaw Channel is maintained. We are prepared to do this if you will keep the Missouri out of the Kaw.

If you do not take this position that I suggest you will lose that dike, and you will have to go at it again and spend a lot more money to protect the Kaw approach, which is and always will be the main artery of the Missouri River as far as trade is concerned. Most of the big factories and packing houses are on the Kaw or close to it. From them all the big shipments must eventually come. The trade that will come down the Kaw will lead the whole river. There is a little bend above the Kaw that needs this protection. It will have to be attended to to reach a channel above Kansas City. When you go above that bend there is a good channel. You could not do a more sensible thing, if you want to make the Missouri River of any importance, than to protect it to the mouth of the Kaw and protect it above in a practical, common-sense manner. If you examine it you will find it absolutely essential. Heretofore in all the bills there has been a small appropriation to attend to this up above and down to the Kaw. They give us $10,000 occasionally if we spend $70,000. We do not object. This time they left that out. I do not know why we are so overlooked. All Kansas City, Kans., asks is an even break and a place on the map. Why should this $1,000,000 come to the State line and stop?

I do not want to seem to be raising objections to small things, but this is an immense thing to our city. Why should Congress spend $1,000,000 on the Missouri if you are to come to within a stone's throw of the greatest manufacturing center west of of the Mississippi and stop? We have a great manufacturing community, and I hope the gentlemen of the House when the amendment comes up will give it the kindly thought and attention it really merits. [Applause.]

EXTENSION OF REMARKS.

Mr. LENROOT. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

Mr. LITTLE. Mr. Chairman, I ask leave to revise and extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. TREADWAY. Mr. Chairman, I make the same request.

The CHAIRMAN. The gentleman from Massachusetts makes the same request. Is there objection? [After a pause.] The Chair hears none.

RIVERS AND HARBORS.

Mr. SMALL. Mr. Chairman, I yield to the gentleman from Texas [Mr. HARDY] 15 minutes.

The CHAIRMAN. The gentleman from Texas is recognized for 15 minutes.

Mr. HARDY. Mr. Chairman, I wish to begin what I have to say by stating a fact which is that my district, which heretofore has been interested to some extent in the river and harbor bill by reason of two rivers bordering it being cared for, is not interested to the extent of one dollar in this particular bill. The Brazos River and Trinity River improvements are both eliminated from it.

I have listened with more patience to the discussion of this bill than to any previous presentation of a river and harbor bill. I have spent whole days here listening. I heard the challenge of the chairman of the committee [Mr. SMALL] when he first presented the bill to the opponents of it, to point out, if they could, any undeserving item, and I have listened during all these hours of discussion for some gentleman to point out such items, and this is what it comes to. The only item that, according to anybody's claim, ought to be eliminated from the bill as being without merit is the item for cleaning out the water lilies or water hyacinths from some of the southern streams. I therefore looked through the bill in order to find the facts and to make comment on them, but that has been done by the gentleman who preceded me [Mr. DIES] so well that I am ashamed now to discuss it. Still I will tell the House what I found. I discovered that that item, which has been dwelt upon by every opponent of this bill, as I have particularly noted, covers the stupendous sum of $30,000 to be expended in five States. Here is a bill calling for over $30,000,000, denounced as a pork-barrel bill by a number of gentlemen who, when challenged to point out the items of pork, the items without merit, all find one and only one item, and that an item of $30,000. And all of them show that they do not know what the water hyacinth is. It is both a petty and a pitiful criticism. Others have shown that in certain streams even 40 feet deep the water hyacinth clogs and prevents navigation, but I will not go into that. Gentlemen do strenuously deny that the improvements provided for in this bill are needed war improvements. One gentleman finally said that there were four or six items in the bill out of all the various items in it that might be termed "war measures," but none other. On what ground do they claim that the bill is not a war measure? Simply and almost solely this: Every one of them denies that it is a war measure, because, he says, most of its items were embraced in the measure that passed the House at its last session, before war was declared; that is, in peace times; and afterwards was defeated or died in the Senate with a great many other measures passed by the House.

Has it come to the point that the necessary measures for operations of the Government are not proper and needed war measures simply because they were deemed proper peace measures or because they have been heretofore passed by the House and have been with a number of other important measures allowd to die or defeated by the Senate? Gentlemen ought to know that measures proper and useful in peace may become of the highest importance and necessity in war. There is an illustration of this in another measure now pending in this House, the bill for the acquisition of a naval base and naval-stores base at old Jamestown. It was an important and worthy measure in peace, but now that we are at war and have no adequate naval base it is a war measure of the highest importance. I have listened to the gentleman from Illinois [Mr. MADDEN] and the gentleman from Massachusetts [Mr. TREADWAY] and the other gentleman from Illinois [Mr. GALLAGHER], every one of whom based his argument against the bill upon that one ground. They object to the bill because it is in many items the same that had been passed heretofore, and they profess their inability to see how it is possible for improvement of our inland waterway system to be of value to us in time of war. One gentleman—I think it was the gentleman from Illinois [Mr. MADDEN]—said that if it was for harbor improvement only he would concede that it was a war measure and would not oppose it. The real trouble is the railroads are all in favor of the improvement of harbors which serve them, but the railroads are equally opposed to the improvement of the inland waterways that compete with them. [Applause.]

I do not mean to insinuate that that is the motive of the gentlemen opposing this bill, who favor harbors, but oppose inland-waterway navigation, but I do say it is a strange blindness that

can see benefit to the country in improved harbors and can see no benefit in increased inland transportation facilities other than by the railways.

One gentleman says that during war times we ought not to improve rivers. Is he willing to say that during war times we ought to build no more railroads, that during war times we ought to have no more cars built? Oh, no. Then why the distinction? If a boat upon a river's surface carries freight and you are willing to build cars to carry freight, why are you not willing to provide transportation by water? Why not clean out the rivers and put boats on them?

The truth is that this great country, as has been well said, is facing the most tremendous war in its history, and it has also been well said that it must marshal all its resources, especially all of its resources of transportation and production. Without either our labors will be fruitless in many respects. What then? Will it do any good to fill our inland towns, our interior States, with the products of the labor of our farms and of our mines and of our forests, and fail to transport those products to points where they are needed to sustain our people at home or to points on the seacoast where they shall be needed for export to our allies and to our own boys when they are fighting in a foreign land? And yet every man that says this is not a war measure knows that congestion has taken hold of our transportation all over the inland, the interior, and that every particle of relief that may be afforded by opening up our waterways, yes, even by cleaning the water lilies out of the St. Johns River and the other rivers that reach into the interior, is a relief against a congestion that to-day is threatening the life of our commerce and is proving fatal to many enterprises and industries, and that this measure is an essential war measure because it will help relieve that congestion.

I take it that any broad-minded statesman, any man with clear vision, will say that to-day more than ever before, when railroad building has largely stopped, when there is an enormous shortage in box cars, when transportation is in confusion and congestion, if you can take even the St. Johns River, and by clearing the water hyacinths out of it, enable commerce to reach the seacoast through it, or if you can take the Missouri River and go into its upper reaches and make 6-foot transportation good to and beyond Kansas City, filling the place of half a dozen or more railroads in transportation; if you can open up the great interior of the Middle West; if you can so deepen the channel of the Ohio River as to carry the freight which the railroads along its banks can not carry, and if by doing these things you can relieve the congestion from which commerce is suffering all over our country, it is a good thing to do as a war measure. That is the broad fact that can not be clouded by the pettifogging quibbles of men who oppose this measure in peace or war. If ever there was a time when the aiding of transportation became a war measure, it is now, when production is bursting its bounds and transportation has broken down. I have just wished to say these few words of special application.

I wish now to make some broader observations. There is a strange fact with reference to our enlightened country. We believe we are the equal of any other nation in industrial intelligence. We believe we are the equals of other nations in the enterprise of our people, and yet there is this fact: France, Germany, Italy, all the nations of the Old World use their waterways as an aid and a complement for their railways in the transportation of freight; in the carrying of their commerce. We scarcely use our inland waterways at all! To my mind that statement is an amazing confession of a disgraceful and hurtful truth.

Mr. Chairman, I am persuaded that men who make the statement here on this floor that our rates are so wonderfully cheap, and that they are below the freight rates of Europe, make the comparison without comprehending the facts. It may be true that if we bear in mind that our roads carry all of the cheapest kind of nonperishable commodities, and that we do more carload and more long-distance hauling than any other country, and carry less package freight and less short-distance freight, and the fact that all the coarser, cruder material in those European countries is carried by water at a very cheap rate, it may be, I say, that by making the comparison in that way the ton-mile rate in this country on the railroads is cheaper than it is in Europe; but no candid man who knows the facts will dare make the comparison on that basis or in that way. The truth is, our freight rates are among the highest in the world. I can illustrate it by the rates on one commodity—cotton—which ought to be carried very cheaply, because it is indestructible, and it is shipped for long distances in carload lots; yet from my town, an inland and off the river town, instead of paying seven-tenths of a cent per ton-mile, our boasted average low per-ton per-mile rate, we pay on carload cotton 4½ cents per ton-mile. It is not true that we have cheap transportation. The boasted low rate is arrived at by adding all the tonnage of the lowest class freight, which in other countries is carried by water, and all the tonnage carried by the roads for nothing for themselves, and dividing that tonnage into the aggregate amount of freights collected.

Those who attack this bill here even contend that our railroads carry freight cheaper than it can be carried by boats on the rivers when the rivers are improved. The railroads are not fooled by such talk, nor are they fooled by such statements as we have heard here to-day, to the effect that the rivers will not be used if given a fair chance. The railroads know better, and wherever there is a city on a river bank that might avail itself of water transportation they lower the rail rates at that point, and then recoup themselves by making it up at the interior points. They give that city cheaper rates than its neighbor towns off the river get in order to prevent the city from trying to have the river used, and they actually tax the cities not on the river in order to give the river cities a preference over them, and thereby tear themselves down. These nonriver towns are heavily taxed by excessive freight rates in order to grant special low rates to their business competitors.

Mr. PLATT. Will the gentleman yield?

Mr. HARDY. I have but little time, but I will yield to the gentleman.

Mr. PLATT. Then does the gentleman think the railroads should raise their rates from Memphis to New Orleans so that the boats on the river can compete with the railroads?

Mr. HARDY. We ought to make it so that when they lower their rates at the water-competing point, they must lower their rates likewise at all intermediate points, and we should never allow them to charge a greater amount for a half haul than they charge for the full haul; that is, charge more for a short haul than for a long haul of the same commodity in the same quantity over the same trackage.

Mr. PLATT. Then there would be no railroad business or water business either.

Mr. HARDY. On the contrary, the railroads would charge what was necessary to pay them for the service they render, and cities along the river banks would get the advantage of their cheaper actual water transportation. No other country has been so blindly foolish as to permit the railways to throttle their river transportation.

Mr. PLATT. They do it by keeping the railway rates up along the water lines so that there will be boats to carry the business.

Mr. HARDY. It might be necessary to prohibit charging less than actual cost at water-competing points, but that will regulate itself if roads are prohibited from recouping themselves by excessive charges against interior points. I have never found it necessary to tell a man he must charge more than he was willing to. But every legislative enactment has been found to be necessary to prevent the railroads from raising their rates at interior points. You should say to them that they must have equal and just rates; that if they charge 50 cents a bale on cotton from Memphis to New Orleans, as they did years ago, until they drove the ships off the Mississippi River, then they must not charge over 50 cents from any point between Memphis and New Orleans. If you do that, all the rail rates will be equitable or at least not discriminative, and you will make it possible for the rivers to carry the business. Then the country will gladly put millions into improving and putting boats on the Mississippi, just as Beaumont has put millions into the Sabine Lake.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HARDY. I would like five minutes more.

Mr. SMALL. I yield five minutes more to the gentleman from Texas.

Mr. HARDY. I want to say that the intercoastal canal, which has been criticized here, has shown its great value, so that you can not denounce it out of existence. A gentleman—a leading business representative—from my State was in my office the other day, and he said that up above Beaumont they were arranging to have a steel ship plant built, that they had already spent a great deal of money, and that they could assemble the iron ore from counties just above it, bring it down the river or by rail, preferably by river, and, by intercoastal canal extending from New Orleans, they could bring the necessary coal from the great coal regions via the river and canal at $1 per ton. But if your legislation permits the cut-throat practices engaged in by railroads heretofore to continue to throttle canal transportation by lowering the rates at water-competitive points while recouping themselves by high rates in the interior they may kill the canal.

Mr. Chairman, even at the risk of repetition, I wish to make myself clear. Every man of ordinary intelligence and information knows that, given an unobstructed 6-foot-deep river way or canal of, say, 100 miles in length between terminals, boats can carry tonnage at far less than the actual cost of railway carriage. How does it happen, then, that in the United States, which has more navigable rivers than any nation in Europe, our rivers carry no commerce while theirs, big and little, carry almost untold tonnage? How does it happen that France is spending many millions even now to further improve her canals, which are covered with miles upon miles of freight barges, while reputable Members of Congress here tell us that even our great rivers are not worthy to be improved and navigation of them ought to be abandoned? That, sir, is the practical position of the opponents of this bill, and presents a curious question, worthy of serious examination. I admit a very large measure of truth in their statements of fact, as to lack of actual transportation to-day on many of our rivers and streams of all kinds; and if that condition is normal and natural it ought to continue and all expenditure of money on rivers and canals ought to cease. If I thought that condition other than highly artificial I would vote against every improvement of every river. Having asserted a truth, that transportation by boat on rivers and canals is very much cheaper in actual cost than transportation by rail, and a second truth, that Europe advantageously uses her cheap water transportation while we have almost abandoned ours and use only the more costly transportation by rail, we are entitled to ask why the latter statement is true. I propose to show three things: First, why it is true; second, that it ought not to be true; and, third, how it may be remedied.

Mr. Chairman, our rivers and canals have not always been unused highways as they have been these last 40 years. Fifty years ago the Mississippi and the Ohio Rivers and the Great Erie Canal were great, busy, useful highways of commerce, upon whose waters great ships and small moved with ceaseless and prosperous industry and enterprise. About that time the great railroad building era in this country began. It was the beginning of the land-grant and Government-aided railroad building. Our great war between the States ended, leaving many men possessed of great capital. Our country was full of enterprise and ambitious promoters. There was no plausible way for these promoters to put their hands into the public's pocket in navigating the waterways. They might urge improvement of them, but that would leave the capitalists all equally entitled to their use under free competition, and give no vast promoters profits or monopolistic advantages. Up to that time great cities only built on the seacoast at the mouth of navigable streams and on the banks of such streams. Great wharves at the water's edge marked the size and growth of the cities. The Pacific slope was fast waking to the knowledge of its riches and resources, though sparsely settled. Between the Pacific and the well-settled Eastern States lay the undeveloped prairies of the Middle West, the vision of promoters like Huntington, saw the coming tide of population, and the wealth that could be garnered by those who could lay hold of vast areas of the public domain. They came to our Governments, State and National, with their schemes for promotion and developments and for the building of new railroads across the continent. From east to west or from north to south they projected their roads, and came with their schemes to Congress, to State legislatures, to county boards, and city councils and private citizens, asking for and obtaining princely bounties in land grants, in loans never to be repaid, and in bonuses of money and bonds, given by all these branches of our governing and lawmaking bodies under golden and glowing promises of development and enrichment of cities, counties, States, and Nation. There was scarcely a city, county, or State in the Union which did not give to these promoters princely gifts in lands, money, or bonds. Texas alone gave them lands covering more territory than many States of the Union. More than all the rest, the Federal Government gave of its cash millions and of its public domain an empire. Much of the giving of private citizens was for stocks and bonds, but these promoters knew how to cancel all outsiders' interests by receiverships and reorganizations, and high financing. Was it any wonder that great capital turned to railroads and abandoned river navigation? Having turned to and built railroads, they made a discovery. The discovery was easy, but possibly not thought of when they began to build. It was that a railroad had a monopoly of transportation as to most, if not all, of the territory traversed by it, and that the only limitation upon its power to charge was the fear of killing the traffic or the industry involved, and thence originated the famous and boldly avowed policy of the railroad magnates of taxing the traffic all it would bear, without regard to the cost or reasonable worth of the service rendered. Straight competition in boat operation on our rivers was too tame for these freebooters and highbinders in railroad promotion and building and wrecking and financing. But when a road came into contact and competition with a transportation service by water on a river they faced a problem. This problem and the way the roads solved it is what I hope to make clear. They knew that, given full tonnage, a boat on the water could underbid them so far that competition was out of the question. A boat carrying 10,000 tons of cargo from Memphis to New Orleans could perform the service, though it took much longer to do so, for less than one-half the actual cost to the road, and if the boat should tie on a barge or two the comparison of cost makes competition by the railroad simply impossible. The case might seem hopeless for the railroads; the boats would seem to have it all their way, but not so.

As I have said, the road on most of the territory it traversed had a monopoly and no laws had been passed putting any restrictions, limitations, or regulations on their charges or practices. They could fix any charge they saw fit for carrying any commodity from any point to any other point, and hence might charge whatever they wished for bringing products from interior points to river points and from one interior point to another. Unrestrained by law, they were permitted simply to do as they pleased and to form whatever combinations they desired. Since they had local and limited monopolies as soon as the first roads were built they soon after conceived the idea of combining their local monopolies into more extensive monopolies, and then they conceived that having the power to tax the traffic all it would bear where they had no competition they would destroy all means of transportation which they could not control. A strong road could buy up or wreck and take over smaller roads. Sometimes it would take over a canal by leasing it and abandoning its use, but it could not buy or lease a river. What the roads naturally wanted was to absorb all the transportation service, and that could only be by destroying inland water transportation. They resorted to every device to accomplish their purpose. They refused any kind of cooperation with water carriers. They charged unreasonable rates in freight from interior points to river points whence that freight might be carried to other points by water, and the practice grew to be universal of making the rail rates between two connected river points far below the cost of the service, and thus taking the freight from the boats. They carried cotton, for example, from Memphis to New Orleans, over 400 miles, for 50 cents a bale, while they never charged less than $2.50 for that service where they had no water competition. And yet they lost nothing by their 50-cent rate from Memphis to New Orleans, since they recouped themselves by exorbitant charges after they got away from the water-competing points. They simply charged their losses up to helpless interior towns. They frequently charged twice as much for a haul of 100 miles as they did for 500. They denied that the public had any say-so in the matter. They did what they deemed necessary to throttle all river and canal service and to secure our entire inland transportation to themselves and then to collect such charges as would in the aggregate pay them such profit as they determined upon. The story is an old one, well understood by all who have much cared to understand it, but it is one to which the public and our Government until recently have been strangely insensible and indifferent.

The railroads have accomplished their purpose. They destroyed river navigation. They have taken over the whole of our interior transportation, and now they confess they are unable to carry it. Their system has broken down, and they have neither the trackage or the cars to meet public demand, and we find ourselves at the beginning of a great war almost as helpless in the matter of transportation as was Russia some years ago, when her vast wheat crop of Siberia rotted in her fields while European Russian peasants starved for bread.

We are to-day the victims of a vicious system of railway promotion and practices and rate fixing and destruction of our waterways. We have spent a good deal of public money on our waterways, but we have not legislated or administered our laws in a way to give us the benefit of our expenditure, and now we have members here who counsel us to abandon the struggle. Abandon our rivers and canals and all the cheap service they are capable of giving us and surrender to the domination of the railroads forever. Our Government at least is in part at last awakening to the need and the benefit of using our rivers.

In 1907 when I first came to Congress business men were largely aroused to the necessity of improving our rivers. Unfortunately many of them from great riverside cities only viewed the question from the standpoint of local interest; were only interested in securing for their cities special law rates, not

caring whether the aggregate freight charges by the roads against the commerce of the country at large was reduced.

A phrase was coined to express their desires. It was "paper navigation" as a basis for lower rates to their cities. The railroads catered to the short-sighted selfishness of these cities and gave them cheaper rates, and these cities became reconciled to the stillness and silence on their river fronts and the nonuse and decay of their wharves and warehouses. Interior towns writhed under their burdens without understanding fully why they were compelled to bear them, but as I said, in 1907 they were partly aroused. Great waterway conventions were held. One at Memphis, I recall, was attended by President Roosevelt. It was a vast assembly of business men. It was not a political gathering. Addresses were made by men familiar with the history of river navigation and particularly with that of the Mississippi and Ohio. Its decay was confessed and accounted for as I have accounted for it, and it was highly resolved to restore its former glories and benefits. In Congress men like Theodore Burton and MADDEN of Illinois and NEWLANDS of Nevada were working with zeal to restore it. Year after year great national and nonpolitical conventions were held to urge river improvements. But the railroads were not defeated or asleep. They held on to their power of discrimination, their leases on canals, their ownership of boat lines, and somehow began to enlist the talents of the shrewdest critics in political life and of the shrewdest writers in the columns of the great metropolitan press and pages of our great magazines. These critics and writers began to pick to pieces every measure of legislation for river improvement; to cover it with ridicule and false calumniation, and to shout pork barrel against every item with whose merits a critically disposed public might be unfamiliar. The cry of pork barrel became a popular howl, and political ambitions began to build on it. Theodore Burton reversed his lifetime position and took up the howl and lesser political lights have followed him. They howl and howl, and even at the cost of prolonging Congress, impeding and preventing other legislation, needed and needed at once to help us win this war, they haggle and quibble and fillibuster and consciously or unconsciously give comfort to our enemies.

If we shall improve our rivers and our canals and then pass simple laws preventing discriminations in railway rates intended and calculated to deprive waterways of their just participation in our inland transportation we will restore the glory of the rivers and streams, and reduce by a vast sum the aggregate amount of freight which must be paid by our commerce. The whole matter simmers down to this: In this great war period our country must be upheld. Production and transportation must be had. Are we willing to avail ourself of the streams that God gave us in order at this time of stress and necessity to help ourselves and the whole country. [Applause.]

Mr. SWITZER. Mr. Chairman, I yield to myself 12 minutes.

Mr. Chairman, we have been advised by the opponents of this bill that we are in war, in the midst of a great crisis, that labor costs are high, and that for these reasons no appropriations should be made other than those that are directly involved and are necessary for the prosecution of this great war.

Let us see for a moment just how consistent the proponents of this platform are. To illustrate: Within the last three months there has been appropriated $10,500,000 to continue the construction of railways in Alaska; $7,500,000 of that has been appropriated and passed by both Houses of this Congress. Conceding that the work is meritorious—while I myself opposed it, but conceding that—I ask gentlemen how many soldiers are going to be transported over that railway to get them into this war? How many tons of food products are to be moved by that railway to aid in the prosecution of this war? And yet in Alaska where labor cost is as high as in any place on earth you keep thousands of men out of the Army and take millions of dollars out of the United States Treasury for railway construction, and yet you say that you are not willing for a dollar to go to the Ohio River, in counties on the banks of which there are three and a half million population. You say that the upper Mississippi and the Missouri Rivers ought not to have a dollar. Millions for the railways of Alaska, but not one dollar for the rivers and harbors. The committee recommends $150,000 for the harbor of Nome and at the mouth of the Yukon. And gentlemen who are claiming that they are so patriotic that they do not want any money to go for anything but for the prosecution of the war ask us whether we expect to assemble a war fleet up in the Arctic regions. Do we expect to send soldiers by the way of Nome? I admit that these two projects have nothing to do with the prosecution of the war, but it does seem to me that if it is proper and right to build a railway from the coast into the interior of Alaska, we can justify $150,000 for the harbor of Nome and the mouth of the Yukon. [Applause.] If this bill goes through and this Congress makes an appropriation for any harbors whatever, I think it ought to carry these two projects.

Gentlemen will recall reading in the newspapers not long since of the closing of the grain exchange in Chicago. What was the chief of the four reasons assigned why that was done? It was that at a time when the country was demanding the most of the railways, the whole railway transportation system of the country had broken down. That is what they said.

Mr. GRAHAM of Illinois. Mr. Chairman, will the gentleman yield?

Mr. SWITZER. Yes.

Mr. GRAHAM of Illinois. This is something that I would like personally to hear the gentleman discuss. What is the particular necessity for this legislation at this present session of Congress? Is there any reason why it can not wait until the regular session?

Mr. SWITZER. Mr. Chairman, there is as much necessity for an appropriation for rivers and harbors on the Atlantic and Pacific coasts and upon our inland rivers as there is for appropriating money to build railroads in Alaska, and I did not hear the gentleman rise up and object when that appropriation went through the House. There has also been another appropriation put through this Congress, $6,000,000, for the lower Mississippi flood control, and the Sacramento River—meritorious projects, but they have but little to do with the prosecution of the war. No one objected to these appropriations.

Mr. GRAHAM of Illinois. Conceding that to be true, is there any particular reason why this legislation can not wait?

Mr. SWITZER. The reason is that many of the channels going into the harbors will close up at the mouth. Many of these harbors are under improvement for the purpose of obtaining a greater depth, and they will be allowed to silt up, and you will lose all of the work that you have done in the two or three years preceding. There are many reasons. We have had an annual appropriation for rivers and harbors ever since 1900.

Mr. GRAHAM of Illinois. If the gentleman will yield long enough to permit me to ask him another question, and that is this: Are there funds sufficient to carry on this work until Congress meets in its regular session?

Mr. SWITZER. The answer is that there are not funds sufficient to carry this work on profitably without loss to the country.

Mr. SMALL. Mr. Chairman, will the gentleman yield?

Mr. SWITZER. Yes.

Mr. SMALL. To enable me to supplement his answer to the gentleman?

Mr. SWITZER. Yes.

Mr. SMALL. Not only will there be deterioration of channels, but the necessary engineer force engaged in river and harbor work has a large number of tugboats, dredges, snag boats, and these boats will be idle after June 30, or most of them will, unless this annual appropriation bill is passed. Since 1910 we have had annual appropriation bills carrying appropriations for the ensuing fiscal year. For instance, this bill carries appropriations for the fiscal year ending June 30, 1918. Not only will there be deterioration of channels, and idle boats, but there will be disorganization of trained crews. In addition to that I may say that many of these improvements already in progress, which have heretofore been authorized, will suffer great loss unless we have an appropriation to continue the improvement for another year. Not all of the improvements which have been heretofore authorized are carried in this bill, but only those where it was considered the loss would be very large unless the work was continued. And if my colleague will yield further—and I shall be glad to yield him any time that he has now for this interruption—with regard to these available balances, in the first place they are for other work than for that carried in this bill. There is no appropriation in this bill which covers any work which would be done by these available balances. It is true that the Chief of Engineers estimates that on July 1 of this year there will be about $19,000,000 on hand. Much of that has not been expended, and will not be expended before that time, awaiting local cooperation or the happening of some condition which according to the original appropriation must happen before the money can be expended. Some of it has not been expended for other reasons, but the great bulk, as I say, is held up awaiting the happening of some event such as local cooperation, because under the law that event must happen before the money can be legally used.

Mr. SWITZER. Mr. Chairman, I believe that this talk that we should not appropriate anything except what shall go to carry on the war is simply a species of demagogy, and if the

gentleman from Illinois will listen to me I think I can give a reason for the urgency of these appropriations.

I spoke about the closing down of the great grain exchange in the city of Chicago, which, they claim, was due chiefly to the breaking down of the railway transportation facilities of this country, and I desire to read a few excerpts from the letter from the president of the Lake Carriers' Association:

We are receiving here urgent requests from the Government substantially to make extraordinary efforts to get through the very last bushel of grain from the upper Lakes that it is possible for us to carry, and the very last ton of ore, and to strain every nerve in the way of rushing through foodstuff and material for manufacture which the Government and nations require. And it would seem, to put it mildly, indeed, that it is the most inopportune time in the world to throw any obstruction in the way of cutting off improvements or aids to navigation that would facilitate our so doing.

And, again, in this letter he states:

We haul a ton of coal a thousand miles for less money than is paid by city residents for having a ton of hard coal carried from the city walk to the cellar.

Again, I read another excerpt:

In 15 years the freight tons moved on the Great Lakes have increased from 44,000,000 to over 100,000,000 tons. It is only the appropriations and improvements made by the Government which have made this enormous increase and the great reduction in rates possible, and for which the country at large has received the benefits.

Further, I desire to say that in the vicinity of Pittsburgh, near my own State, at the harbor of Pittsburgh the Monongahela River, which has not been mentioned by any of these gentlemen who say there is no commerce upon the rivers, in 1915—and, I presume, more in 1916—carried a commerce of 14,000,000 tons. Think of it, 14,000,000 tons; and this stream is probably improved only 60 or 70 miles; and think of the great expansion of industries upon the Monongahela River and the Allegheny River and for 25 or 30 miles down the Ohio. Why, I say to you that if you in any way break down this water transportation service for the city of Pittsburgh you will paralyze every industry, nearly, of that city.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SWITZER. May I ask for about three minutes?

Mr. SMALL. I yield five minutes to my colleague.

Mr. FESS. Will my colleague yield for a question?

Mr. SWITZER. I will.

Mr. FESS. My colleague knows I have a great admiration for his courage and independence. Does my colleague place this legislation on the ground of its being a war measure.

Mr. SWITZER. I do not, but I say that nearly every appropriation in here is essential to assist in mobilizing the products of this country and the movement of troops and ships in prosecuting this great war.

Mr. FESS. Then again——

Mr. SWITZER. Why, just to illustrate. At Freeport, Tex., we appropriate $150,000 for that harbor. Think of the great sulphur industry that has been developed there, a product much needed, especially since imports of Chilean nitrate have practically ceased.

Mr. FESS. If my colleague will yield to another interruption?

Mr. SWITZER. I will.

Mr. FESS. I wondered why it would be necessary to make this appropriation at the special session, because we did not expect to have a special session until the war compelled us.

Mr. SWITZER. There is as much necessity for making this appropriation as there was to make appropriations for the three or four other bills that failed to be passed at the last session of the last Congress, and we did not expect to have any special session when Congress adjourned, and we did not expect those appropriations would have to be put through, the sundry civil bill, for instance, carrying $6,000,000 for the lower Mississippi River and the Sacramento River. Did you expect all these bills to be passed?

Mr. FESS. No; I did not.

Mr. SWITZER. But they have been put through. I do not base this necessity entirely upon the war. I think we are entitled to annual river and harbor bills; that is, that the amount appropriated heretofore has been so low that unless you pass an annual bill you will lose a great deal of the work on account of deterioration of the work in progress.

Mr. FESS. I want to say that I think it is to the credit of my colleague he does not base it upon a war measure, but because he believes in annual river and harbor bills.

Mr. SWITZER. I do say this, nearly every new project of the 35, and nine-tenths of the old projects provided for here are essential, are urgent appropriations, and can be based as a matter of war necessity. Why, you may not think so, but take Lake Ponchartrain, where they are building some of these wooden ships. They will have to have some appropriation in order to make the water deep enough to take these ships out to the ocean.

It is the same way out upon the Pacific coast—for instance, at Los Angeles, where they are building some submarines—and you will find that when we commence the reading of this bill and reach the Pacific items it is absolutely necessary to have some of these appropriations. Of course the gentleman from Wisconsin [Mr. LENROOT] says you can not get the labor to do a certain piece of work upon the Lakes. That occurs every year. The same is true at Grays Harbor on the Pacific. We have deferred an appropriation there because it is impossible, they say, to obtain labor and material to construct a dredge at a reasonable price at this time. But in two or three months from now at many places they can obtain the labor, and, so far as the Ohio River is concerned, we are able to spend $5,000,000 annually there. We have been asking more. We could have spent seven or eight million dollars annually.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SMALL. Mr. Chairman, I yield five minutes more to the gentleman.

Mr. LENROOT. I would like to ask what the gentleman thinks of the policy of the Shipping Board letting contracts for wooden ships where they can not be gotton out without dredging?

Mr. SWITZER. I do not know whether they are subject to any more criticism than the Naval Board for letting contracts for submarines. We are so anxious to have the vessels built that they are willing to let contracts at any place where they will construct them, and they expect Congress will do its part in providing the money for necessary harbor improvements. As to the Ohio River proposition, the gentleman from Wisconsin [Mr. FREAR] says he has saved the country in the last few years a great deal of money. He has not saved anything on the lower Mississippi. He has merely delayed the matter two or three months. And what has been the result of the delay and his obstructions to the appropriations of 1913, 1914, and 1915? It has simply held back the work on the Ohio River, has it not? And here you have this great Government locating the armor plate plant at the city of Charleston, W. Va., with 100 miles of the Kanawha River canalized to the Ohio, and yet it is not canalized from the mouth of the Kanawha to the Ironton (Ohio) iron district or the great iron district at Wheeling and Pittsburgh. But if we had been allowed to proceed as rapidly as we desired, the armor-plate factory would have access by canalized rivers 125 miles to the Ironton iron district of southeastern Ohio, and 290 miles to the Wheeling and Pittsburgh iron district, and the work done at a time when cost prices were low.

Mr. ROSE. Will the gentleman yield?

Mr. SWITZER. Yes.

Mr. ROSE. I would like to know the answer of the gentleman to the part of the minority report wherein they make this statement:

An indefinite amount for Los Angeles and Richmond, Cal., both of which last-named harbors show very decided appearances of reclamation schemes.

Mr. SWITZER. The gentleman who wrote the report is a little vague. He does not mean we have made an indefinite cash appropriation. He means the ultimate appropriation; that the estimate for the ultimate completion is indefinite. You can say that about everything.

Mr. ROSE. Will the gentleman say it is true or not true?

Mr. SWITZER. It is not true that we have appropriated an indefinite amount.

Mr. ROSE. For reclamation schemes?

Mr. SWITZER. There certainly can not be any sort of a reclamation scheme found by anybody at Los Angeles. There is some contention that it will aid in the reclamation of a little land at Richmond, but recollect Richmond is the terminus of the Santa Fe Railroad, one of the great transcontinental railways.

Mr. CURRY of California. Will the gentleman yield?

Mr. SWITZER. I will.

Mr. CURRY of California. I have been trying to get time from both sides of the House to talk on the Richmond Inner Harbor project ever since this general debate started. I have not been able to get the time, and I shall talk about the proposition under the five-minute rule. There is not a single, solitary square foot of reclamation connected with the Richmond Inner Harbor. The reclamation there is the same as in any harbor where there is tide land. The city has done the reclamation itself, and the reclamation is completed, and the money to be appropriated by the Government is $428,000 for the dredging of a channel, and the city of Richmond is to appropriate $428,000, an equal amount, and that is for the physical dredging of a channel 3½ miles long, 600 feet wide, and 24 feet deep and a turning basin 1,800 feet. It is on San Francisco Bay and surrounded by hills. The city of Richmond itself owns the

water front. There is not a private interest connected with it. The land is all owned by the city of Richmond, two blocks back from the water front and clear out to low tidewater. The initial appropriation carried in this bill is $100,000.

Mr. SWITZER. Mr. Chairman, I want to say to the gentleman that I personally inspected the Richmond project, and I believe that it is a meritorious one.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. SWITZER. May I have three minutes more?

Mr. SMALL. I yield to the gentleman three minutes.

The CHAIRMAN. The gentleman from Ohio is recognized for three minutes more.

Mr. HULBERT. Mr. Chairman, will the gentleman yield?

Mr. SWITZER. Yes.

Mr. HULBERT. Does the gentleman believe the statement that I made during the general debates, that the car shortage is very largely due to the congestion in the large harbors along the Atlantic coast, where the freights are delayed awaiting shipment abroad during the pendency of the war in Europe? And is it going to aid matters any if they build more cars and more vessels if they do not also at the same time construct more channels, so that it would be possible to build more docks?

Mr. SWITZER. Certainly; I believe the gentleman is absolutely correct. The harbor of New York can not live within itself, nor can the harbor of Duluth live within itself, nor the harbor of Superior. You must improve all the harbors along the Lakes in order to make this 100,000,000 tons of transportation on the Great Lakes; and so with New York Harbor. She must have Mobile and Galveston and Freeport and the harbors of New England as well as the ports across the Atlantic in order to take care of this great tonnage.

There is another point I want to mention before I close. The gentleman from Wisconsin [Mr. FREAR] criticized this group proposition. He said it would cover in bad projects, and he said that there was no way of getting rid of those bad projects under this system. The gentleman is certainly in error. His statement at least is misleading. If there is any bad project in any one of these groups, it can be cut out. Recollect this grouping only goes to the maintenance of projects. If there is an improvement to be made, there is a statement of the amount of money that is to be appropriated for it. But whenever there are a number of places mentioned in a group, as on Lake Erie in Ohio, such as Cleveland and Ashtabula and Sandusky and Toledo and Conneaut, they are for maintenance, and if there is anything for improvement it is stated in a separate item.

The gentleman from Wisconsin said you could not get rid of any of them. The Committee on Rivers and Harbors could have gotten rid of any one of them by cutting it out, or this House can cut them out. If a certain amount is needed for a specific project, this House could provide for it. The gentleman's statement is misleading.

The CHAIRMAN. The time of the gentleman from Ohio has again expired. The Clerk will read the bill for amendment.

Mr. HULBERT. Mr. Chairman, will the gentleman yield for one question?

Mr. SWITZER. If I had the time I would.

Mr. HULBERT. The gentleman, as a member of the Committee on Rivers and Harbors, made the trip to New York last August and visited a pier at Forty-fifth Street on the Hudson River?

Mr. SWITZER. Yes. You had something like 105 piers.

Mr. HULBERT. I wanted to call attention to one pier which the city has constructed at the foot of West Forty-fifth Street, and in the slips on the outside of it the city, at its own expense, has dredged out the channel to a depth of 40 feet, but there is only 18 feet of water at the front of that pier.

Mr. SWITZER. Yes; and the full 40 feet should be provided to the main channel. Mr. Chairman, I ask unanimous consent to extend my remarks.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. CURRY of California. Mr. Chairman——

Mr. SWITZER. Mr. Chairman, could the gentleman from North Carolina [Mr. SMALL] give the gentleman from California a few minutes?

Mr. SMALL. I suggest that he wait until we take up the consideration of the bill under the five-minute rule.

Mr. CURRY of California. If I can get time then, all right.

Mr. SMALL. Very well.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That the following sums of money be, and are hereby, appropriated, out of any money in the Treasury not otherwise appropriated, to be immediately available, and to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers, for the construction, completion, repair, and preservation of the public works hereinafter named.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word.

Mr. SMALL. I am going to move that the committee rise.

Mr. STAFFORD. I wish to have it understood that a gentleman who is not in the Chamber at this moment wishes to offer a very important amendment to this section.

Mr. SMALL. I have no intention of going any further to-night. I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HARRISON of Mississippi, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 4285) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, and had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. CLARK of Florida, for 10 days, on account of sickness in his family.

To Mr. HOLLINGSWORTH, indefinitely, on account of sickness in his family.

CALENDAR WEDNESDAY.

Mr. SMALL. Mr. Speaker, in order that members may be advised, I ask unanimous consent that Calendar Wednesday be dispensed with.

Mr. ADAMSON. Mr. Speaker, I have several very important emergency bills that I want to get considered in some way. I have been submitting to requests to make other bills privileged, and I think I will have to object to this for a while.

The SPEAKER. The gentleman from North Carolina [Mr. SMALL] asks unanimous consent to dispense with Calendar Wednesday business on next Wednesday. Is there objection?

Mr. ADAMSON. I object.

The SPEAKER. Objection is made.

Mr. SMALL. Will the gentleman reserve the right to object for a moment?

Mr. ADAMSON. I will reserve the right to object. I want some arrangement to get our bills through.

Mr. SMALL. Did the House give unanimous consent to the gentleman's request——

Mr. ADAMSON. No; there was objection. If I can get unanimous consent to consider my bills, I will not object to dispensing with Calendar Wednesday. That is my only object now.

The SPEAKER. Is there objection?

Mr. MADDEN. To Calendar Wednesday being transferred?

The SPEAKER. Yes.

Mr. MADDEN. I object.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 995. An act to authorize the issue to States and Territories and the District of Columbia of rifles and other property for the equipment of organizations of home guards.

ADJOURNMENT.

The SPEAKER. If some gentleman will make a motion to adjourn, the Chair will entertain it.

Mr. SMALL. I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 27 minutes p. m.) the House, under its previous order, adjourned until to-morrow, Tuesday, June 12, 1917, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Muskegon River, Mich., from the head of Muskegon Lake to Newaygo or to the Grand Rapids-Muskegon power dam (H. Doc. No. 178); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

2. A letter from the Secretary of the Navy, transmitting tentative draft of legislation to establish certain new ratings in the

United States Navy, and for other purposes (H. Doc. No. 179); to the Committee on Naval Affairs and ordered to be printed.

3. A letter from the Secretary of the Navy, transmitting tentative draft of bill to amend an act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes," approved August 24, 1916 (H. Doc. No. 180); to the Committee on Naval Affairs and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. BRAND: A bill (H. R. 4950) to punish fraudulent dealers in foodstuffs and fuel, to make the acts herein set forth criminal, and for other purposes; to the Committee on the Judiciary.

By Mr. FULLER of Illinois: A bill (H. R. 4951) providing for a tax on sales, or contracts for sale, of grain, provisions, and other food products for future delivery; to the Committee on Agriculture.

By Mr. OSBORNE: A bill (H. R. 4952) to amend section 80 of the act of June 3, 1916, for making further and more effectual provision for the national defense, and for other purposes; to the Committee on Military Affairs.

Also, a bill (H. R. 4953) authorizing certain papers to be executed outside the Visalia, Independence, and Imperial (Cal.) land districts; to the Committee on the Public Lands.

By Mr. RAKER: A bill (H. R. 4954) to provide for the application of the reclamation law to irrigation districts; to the Committee on Irrigation of Arid Lands.

Also, a bill (H. R. 4955) to remove during the war certain restrictions as to residence area of lands upon reclamation projects, and for other purposes; to the Committee on Irrigation of Arid Lands.

By Mr. SNYDER: A bill (H. R. 4956) fixing the compensation of rural free delivery carriers; to the Committee on the Post Office and Post Roads.

By Mr. DENT: A bill (H. R. 4957) providing for military highways between Foley and Fort Morgan, in Baldwin County, Ala.; to the Committee on Military Affairs.

By Mr. TAYLOR of Colorado: A bill (H. R. 4958) to amend section 3 of an act entitled "An act providing for patents on reclamation entries, and for other purposes," approved August 9, 1912; to the Committee on Irrigation of Arid Lands.

Also, a bill (H. R. 4959) to compel the registration of aliens; to the Committee on Military Affairs.

By Mr. ADAMSON: A bill (H. R. 4960) to define, regulate, and punish trading with the enemy, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. LEVER: A bill (H. R. 4961) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel; to the Committee on Agriculture.

By Mr. DENT: Resolution (H. Res. 99) providing for the consideration of H. J. Res. 100; to the Committee on Rules.

By Mr. KALANIANAOLE: Memorial from the Legislature of the Territory of Hawaii requesting appropriate legislation favoring increase in compensation of the governor, the secretary of the Territory, the chief justice and associate justices of the supreme court of the Territory, the judges of the circuit courts, and the secretary to the governor; to the Committee on the Territories.

Also, memorial of the Legislature of the Territory of Hawaii, requesting legislation for military highways, improvements, and certain internal improvements in the Territory of Hawaii; to the Committee on the Territories.

Also, memorial of the Legislature of the Territory of Hawaii, favoring legislation permitting the admission of a limited number of Chinese laborers into the Territory of Hawaii under proper restrictions; to the Committee on Immigration and Naturalization.

By Mr. GARNER: Memorial of the Legislature of the State of Texas, relating to a military highway along the Texas border; to the Committee on Military Affairs.

Also, memorial of the Legislature of the State of Texas, relating to food-control legislation; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CLAYPOOL: A bill (H. R. 4962) granting an increase of pension to Laura P. Walter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4963) granting an increase of pension to William J. Barnett; to the Committee on Invalid Pensions.

By Mr. FAIRFIELD: A bill (H. R. 4964) granting a pension to Mrs. Nannie A. Smith; to the Committee on Invalid Pensions.

By Mr. KETTNER: A bill (H. R. 4965) for the relief of William B. Stanford; to the Committee on Military Affairs.

By Mr. LANGLEY: A bill (H. R. 4966) granting an increase of pension to William Flint; to the Committee on Invalid Pensions.

By Mr. LONGWORTH: A bill (H. R. 4967) granting an increase of pension to Simeon C. Shields; to the Committee on Invalid Pensions.

By Mr. McCLINTIC: A bill (H. R. 4968) granting a pension to Lester Longmire; to the Committee on Pensions.

By Mr. MAHER: A bill (H. R. 4969) granting an increase of pension to Concetta Chieffo; to the Committee on Pensions.

By Mr. OSBORNE: A bill (H. R. 4970) granting a pension to Lou M. Young; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4971) granting a pension to Hattie M. Dunsmore; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4972) granting a pension to Hannah E. Browning; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4973) granting a pension to William Barrett; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4974) granting an increase of pension to Frederick J. Cressey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4975) granting an increase of pension to Philip Gavin; to the Committee on Pensions.

Also, a bill (H. R. 4976) granting an increase of pension to Thomas Haran; to the Committee on Pensions.

Also, a bill (H. R. 4977) granting an increase of pension to Laura Kohlhase; to the Committee on Pensions.

Also, a bill (H. R. 4978) granting an increase of pension to Charles D. Monroe; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4979) granting an increase of pension to Charles H. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 4980) for the relief of Robert Abernethy; to the Committee on Military Affairs.

Also, a bill (H. R. 4981) for the relief of David Love; to the Committee on Military Affairs.

Also, a bill (H. R. 4982) for the relief of M. H. Meranda; to the Committee on Military Affairs.

Also, a bill (H. R. 4983) for the relief of Peter Neubuhr; to the Committee on Military Affairs.

Also, a bill (H. R. 4984) to correct the military record of Joseph P. Widney; to the Committee on Military Affairs.

By Mr. POWERS: A bill (H. R. 4985) granting an increase of pension to Washington M. Brown; to the Committee on Invalid Pensions.

By Mr. RAKER: A bill (H. R. 4986) authorizing the promotion of an officer on the retired list of the Army who served in the Civil War; to the Committee on Military Affairs.

By Mr. WALTON: A bill (H. R. 4987) granting a pension to Owen H. O'Neil; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of the Central Missouri Branch of the Association of Collegiate Alumni, urging the creation of zones around all camps, for the prevention of prostitution, for the removal of all vicious resorts, and for a strong policy of moral sanitation about all military camps; to the Committee on Military Affairs.

Also (by request), petition of the Wolfe Tone Society, of Pittsburgh, Pa., relative to the freedom of Ireland; to the Committee on Foreign Affairs.

Also (by request), memorial of the National Association of Fisheries Commissioners, relative to great water food industries; to the Committee on the Merchant Marine and Fisheries.

By Mr. COPLEY: Petition of citizens of Crystal Lake, Ill., praying for the immediate enactment of legislation prohibiting the manufacture of alcoholic liquors as a measure of food conservation; to the Committee on the Judiciary.

Also, petition of citizens of Elburn, Ill., praying for the immediate enactment of legislation prohibiting the manufacture of alcoholic liquors as a measure of food conservation; to the Committee on the Judiciary.

By Mr. DALE of New York: Memorial of Chamber of Commerce of the State of New York, against the House war-revenue bill; to the Committee on Ways and Means.

Also, petition of sundry citizens of New York against any kind of prohibition; to the Committee on the Judiciary.

Also, memorial of the Chamber of Commerce of the State of New York favoring passage of the daylight saving bill; to the Committee on Interstate and Foreign Commerce.

By Mr. ESCH: Petition of sundry citizens of Sparta, Wis., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. FITZGERALD: Petition of citizens of the Borough of Brooklyn, N. Y., against national prohibition; to the Committee on the Judiciary.

By Mr. FULLER of Illinois: Petition of 20 citizens of Genoa, Ill., favoring prohibition as a war measure; to the Committee on the judiciary.

Also, petition of Haddorff Piano Co., of Rockford, Ill., opposing tax on musical instruments; to the Committee on Ways and Means.

By Mr. GALLIVAN: Memorial of Merchants Association of New York relative to control of food supply; to Committee on Agriculture.

Also, petition of Massachusetts Real Estate Exchange relative to congestion of railroads, piers, and shipping at port of New York, etc.; to the Committee on Interstate and Foreign Commerce.

By Mr. HAMILTON of New York: Petition of sundry citizens of Jamestown, N. Y., favoring national prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of sundry citizens of Belfast, N. Y., favoring national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. HASTINGS: Petition of E. L. Stevens and others, of Hitchita, Okla., for peace under all circumstances; to the Committee on Military Affairs.

By Mr. HOLLINGSWORTH: Memorial of Bellaire Bottle Co., against amendment to discontinue manufacturing of alcohol; to the Committee on the Judiciary.

By Mr. HULBERT: Petition of 71 citizens of New York City, in favor of the daylight-saving bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Chamber of Commerce of the State of New York, commending the Finance Committee of the United States Senate for its action in amending the House war-revenue measure and urging the exemption of gifts to educational, philanthropic, and religious organizations from taxation; to the Committee on Ways and Means.

Also, petition of the Chamber of Commerce of the State of New York, favoring the daylight-saving bill; to the Committee on Interstate and Foreign Commerce.

By Mr. KELLEY of Michigan: Petition of Mrs. F. G. Pool and 35 members of the Ladies' Aid Society of Central Methodist Episcopal Church of Pontiac, Mich., favoring national prohibition; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Petition of Rev. Edward R. Evans, pastor Pawtucket (R. I.) Congregational Church, favoring national prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of Morris Espo, of Pawtucket, R. I., favoring daylight-saving plan; to the Committee on Interstate and Foreign Commerce.

Also, petition of Edward J. Hackett, of Pawtucket, R. I., favoring daylight-saving plan; to the Committee on Interstate and Foreign Commerce.

Also, petition of Manufacturing Jewelers' Board of Trade, of Providence, R. I., protesting against the passage of the Hardwick amendment, so called; to the Committee on Banking and Currency.

By Mr. KETTNER: Petition of Minnie W. Smith and sundry other citizens of San Bernardino County, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of John B. Toomany, pastor Congregational Church, Chula Vista, and sundry others, favoring prohibition; to the Committee on the Judiciary .

Also, petition of Benjamin S. Haywood, pastor First Methodist Episcopal Church, Riverside, Cal., and many others, for immediate enactment of prohibition of the manufacture of alcoholic liquors; to the Committee on the Judiciary.

Also, petition of Mrs. W. W. Carr and others, favoring immediate enactment of prohibition of the manufacture of alcoholic liquors; to the Committee on the Judiciary.

Also, petition of Maynard W. Beckwith and sundry other citizens of Arlington, Cal., favoring immediate enactment of prohibition of the manufacture of alcoholic liquors; to the Committee on the Judiciary.

Also, petition of G. O. Barnett and others, of Imperial, Cal., and vicinity, favoring immediate enactment of prohibition; to the Committee on the Judiciary.

Also, petition of D. W. Wilt, pastor Methodist Episcopal Church, National City, favoring producing and conserving foodstuffs; to the Committee on Agriculture.

Also, petition of Augusta J. Sturges and sundry other citizens of Encanto, asking conservation of foodstuffs; to the Committee on Agriculture.

By Mr. KING: Petition of J. W. Connelly and others, of Farmington, and J. E. Lohr and others, of Paloma, Ill., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. KINKAID: Petition of citizens of the vicinity of Aurelia, Holt County, Nebr., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. McCLINTIC: Memorial of Oklahoma State Board of Agriculture, favoring food-control bill; to the Committee on Agriculture.

By Mr. MAHER: Petition of the Technical Press Chapel, against increased postal rates; to the Committee on Ways and Means.

By Mr. MEEKER: Petition of Oak Hill Presbyterian Church, Cabanne M. E. Church, Third Baptist Church, and Young Men's Bible Class, Third Baptist Church, and Women's Christian Temperance Union, all of St. Louis, Mo., praying for prohibition of the liquor business as a war measure; to the Committee on the Judiciary.

Also, memorial of the International Association of Machinists, Lodge No. 41, of St. Louis, Mo., against any kind of prohibition; to the Committee on the Judiciary.

Also, memorial of the Amalgamated Lithographers of America, Local No. 5, against the zone system and increase of postage on second-class mail matter; to the Committee on Ways and Means.

Also, petition of Progressive Lodge, No. 41, International Association of Machinists, and Department Store Drivers' Local No. 709, all of St. Louis, Mo., asking investigation by Congress into controversy between the Chamber of Commerce of San Francisco, Cal., and organized labor; to the Committee on the Judiciary.

Also, memorial of Central Trades and Labor Union of St. Louis. Mo., against the repeal of the child-labor law; to the Committee on Labor.

By Mr. MORIN: Memorial of Division No. 2 of the Ancient Order of Hibernians, of Pittsburgh, Pa., reaffirming the readiness of its members to render to the Government the loyal service which the Irish race has ever given to the country and urging that the Government give a great example to the world by insisting that England shall remove her forces from Ireland and renounce all claim to rule over an unwilling people; to the Committee on Foreign Affairs.

By Mr. O'SHAUNESSY: Memorial of R. S. Hazard, of Peace Dale, R. I., and Colored Women of Rhode Island, and Allied Temperance Committee, of Rhode Island, favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of the Women's Universalist Missionary Association of Rhode Island, favoring woman suffrage; to the Committee on the Judiciary.

By Mr. PARKER of New York: Memorial of Woman's Christian Temperance Union of Hartford, N. Y., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. ROGERS: Petition of sundry citizens of Massachusetts, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. ROWE: Petition of C. B. Cottrell & Sons Co.; James Conley; G. Frederick Kalkhoff, president Employing Printers' Association; Leon H. Rouse, president Typographical Union No. 6; Philip Umstadter, president Printing Pressmen's Union No. 51; E. W. Edwards, president Web Pressmen's Union No. 25; J. J. Bagley, president Franklin Union No. 23; James J. Hayes, president Bookbinders' Union No. 3; M. J. Murphy, president Bindery Woman's Union No. 43; George Stein, president New Yory City Allied Printing Trades Council; and Peter J. Brady, president New York State Allied Printing Trades Council, opposing the zone system as applied to second-class postage; to the Committee on Ways and Means.

Also, petition of James Buchanan, favoring prohibition during the war; to the Committee on the Judiciary.

Also, petition of Charles L. Auer, of Brooklyn, N. Y., protesting against war prohibition; to the Committee on the Judiciary.

Also, petition of Gaston, Williams & Wigmore (Inc.), of New York City, protesting against the proposed increase in revenue on the tobacco trade; to the Committee on Ways and Means.

By Mr. SNYDER: Petition of sundry citizens of Utica, N. Y., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. STRONG: Memorial of residents of Corsica, Strattonville, and vicinity; letter from Rev. Samuel L. Maxwell, Parkers Landing; letter from A. W. Wilson, jr., president of the Kiskiminetas Springs School, Saltsburg, all of Pennsylvania, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. TEMPLE: Memorial of residents of Aliquippa, Pa., favoring the enactment of a national prohibition law in view of the present war situation; to the Committee on the Judiciary.

By Mr. TILSON: Petition of citizens of New Haven, Conn., and vicinity, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. TREADWAY: Petition of sundry citizens of Shelbourne Falls, Mass., and vicinity, favoring national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. VARE: Memorial of 12 churches in the northeast section of Philadelphia, Pa., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, Memorial of the first, second, and third congressional districts of Pennsylvania branch of the Woman's Suffrage Association, favoring the passage of the woman-suffrage resolution; to the Committee on the Judiciary.

By Mr. WALTON: Memorial of New Mexico Cattle and Horse Growers' Association, favoring legislation for food control; to the Committee on Agriculture.

Also, memorial of New Mexico Cattle and Horse Growers' Association, protesting against the bill prohibiting shipments of cows and calves for slaughter; to the Committee on Agriculture.

Also, petitions of citizens of Santa Rosa and Silver City, N. Mex., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. WASON: Resolutions of Members of the First Baptist Parish, of Lyme, N. H., favoring national prohibition as a war measure; to the Committee on Military Affairs.

SENATE.

TUESDAY, *June 12, 1917.*

Rev. Charles T. Warner, of the city of Washington, offered the following prayer:

Most gracious God, we humbly beseech Thee, as for the people of these United States, so especially for the Senate in session assembled, that Thou wouldst be pleased to direct and prosper all their consultations to the advancement, safety, honor, and welfare of Thy people. Grant to them at this time Thy special gift of wisdom and understanding, counsel, and strength, that upholding what is right and following what is true, they may obey Thy holy will and fulfill Thy divine purposes.

And O Lord of Hosts, stretch forth, we pray Thee, Thine almighty arm to strengthen and protect the soldiers and sailors of our country; support them in the day of battle, endue them with courage and loyalty, and grant that in all things they may serve without reproach.

Hasten, we beseech Thee, the day when the armaments of war shall be beaten into the implements of peace; scatter the peoples that delight in war; bring us out of our present confusion into the order and righteousness of Thy kingdom; all of which we ask, through Jesus Christ our Lord. Amen.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented petitions of the trustees of the Groton School (Inc.), of the Society for the Preservation of New England Antiquities, and of the congregation of Christ Church, of Boston, all in the State of Massachusetts, praying that all bequests, legacies, devises, gifts to the United States, or to any State, or to any political division thereof for use of a religious, literary, scientific, charitable, or educational character or for the encouragement of art be exempt from Federal taxation, which were referred to the Committee on Finance.

He also presented a telegram in the nature of a petition from the congregation of the Methodist Episcopal Church, of Fordham, N. Y., praying for national prohibition during the war, which was referred to the Committee on the Judiciary.

He also presented a petition of the National Association of Fisheries Commissioners, praying for the enactment of legislation to regulate the food supply of the country, which was referred to the Committee on Agriculture and Forestry.

He also presented a telegram in the nature of a petition from sundry citizens of Lansdowne, Pa., praying for the enactment of legislation to conserve the food products used in the manufacture of intoxicating beverages and for the passage of all war prohibition measures, which was referred to the Committee on Agriculture and Forestry.

He also presented a petition of sundry citizens of Rochester, N. Y., praying for prohibition of the manufacture of alcoholic liquors as a measure of food conservation, which was referred to the Committee on Agriculture and Forestry.

Mr. WARREN. I present a telegram from the Bankers' Association of Wyoming, which I ask may be printed in the RECORD and referred to the Committee on Finance.

There being no objection, the telegram was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

CHEYENNE, WYO., *June 8, 1917.*

Hon. F. E. WARREN,
Washington, D. C.:

Reports are to effect that war-revenue bill provides for 2-cent stamp to be affixed to checks of $5 or over. Banks now pay State and county tax, corporation tax, income tax, excess-profits tax. Proposed stamp tax places burden on bank and offers opportunity for dissatisfaction of customer where check is refused on account of stamp not being attached. If we must have a stamp tax, suggest uniform tax not exceeding 1 cent. Can then be lithographed in check and bank can charge for check book. Wyoming banks protest any further tax than already imposed.

S. CONANT PARKS, *Vice President,*
HARRY B. HENDERSON, *Secretary,*
American Bankers' Association of Wyoming.

Mr. WARREN. I present quite a large number of resolutions from labor unions in various parts of the State of Wyoming. They are very short, and I ask that one of them be printed in the RECORD and the others be noted.

There being no objection, one of the resolutions was ordered to be printed in the RECORD, as follows:

FEED OUR COUNTRY FIRST.

Resolution.

Whereas the food supply of our country is in the possession of private individuals who are arbitrarily fixing prices which places food far beyond the reach of many of our people, and are constantly and insidiously increasing prices without warrant or justification; and

Whereas the greed for profit on the part of those who control and fix the prices of our country's food has led them into wild speculation whereby vast fortunes have been won on gambling devices popularly known as "boards of trade," "stock exchanges," and the like, all of which fortunes are wrung from the toiling masses of our country through increased prices of food, and as a result of such manipulations our country is facing one of the gravest problems in its history—starvation in midst of plenty; and

Whereas starvation is already stalking abroad in our country, food riots are occurring in our larger cities and the condition of many of the working class is gradually becoming more precarious, while cold-storage plants are filled with food products, packing plants are producing an abundance of meat, grain elevators are filled to overflowing, fruit and vegetables are rotting in cars and warehouses, and fish is being thrown back into the waters by those who control our country's food in order to maintain and further advance the already exorbitant prices; and

Whereas past experience, coupled with the action of all belligerent and most neutral countries of Europe, justify the belief that it is a dangerous proposition to allow the food supply of our country to remain in private hands, even in time of peace and doubly dangerous in time of war: Therefore be it

Resolved, That the food supply should command the first consideration of the President and Congress of our country; that starvation is not conducive to patriotic enthusiasm; that our flag can not command the reverence and respect which is due it, either at home or abroad, so long as it stands for starvation or enforced underfeeding of the great mass of our people by a few profiteers and food gamblers; neither can our people rally to the defense of their country with the physical stamina and whole-heartedness which is necessary to victory after having been underfed previous to entering the Army, and while knowing that their wives and children at home are at the mercy of unscrupulous patriots for profits and are suffering the pangs of hunger and privation; and be it further

Resolved, That we urge upon Congress and the President of the United States to immediately take such measures as may be necessary to eliminate all sources of profit in the production, transportation, and distribution of the food supply of our country, to the end that every man, woman, and child shall be supplied with sufficient good and wholesome food to keep them in perfect physical condition.

Adopted this, the 13th day of May, 1917, by Lincoln County Central Trades and Labor Council, Kemmerer, Wyo.

Mr. WARREN presented resolutions of Local Union No. 2335, United Mine Workers of America, of Hanna; of Local Union No. 837, of Kemmerer; of Local Union No. 668, American Federation of Musicians, of Kemmerer; of Local Union No. 2318, United Mine Workers of America, of Cumberland; of Local Union No. 68, Retail Clerks' International Protective Association, of Kemmerer; and of Local Union No. 488, United Mine Workers of America, of Sublet, all in the State of Wyoming, relative to the production, transportation, and distribution of the United States food supply, which were referred to the Committee on Agriculture and Forestry.

He also presented a memorial of sundry citizens of Wyoming, remonstrating against the proposed tax on musical instruments, which was referred to the Committee on Finance.

He also presented resolutions adopted by the Laramie Chapter, Wyoming Branch, Association of Collegiate Alumnae, favor-

ing prohibition of the sale of liquor, etc., in the vicinity of military camps, which were referred to the Committee on Military Affairs.

He also presented resolutions adopted by Pleasant Valley Grange, Patrons of Husbandry, of Stewart, Wyo., remonstrating against Federal control of food prices, which were referred to the Committee on Agriculture and Forestry.

He also presented a memorial of sundry citizens of Niobrara County, Wyo., remonstrating against the use of food products in the manufacture of intoxicating liquors, which was referred to the Committee on Agriculture and Forestry.

Mr. NELSON presented petitions of sundry citizens of Minnesota, praying for national prohibition as a war measure, which were referred to the Committee on the Judiciary.

Mr. CUMMINS. I present resolutions of the City Council of the City of Davenport, Iowa, respecting the fuel situation, which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

IN THE CHAMBER OF THE CITY COUNCIL,
CITY OF DAVENPORT, IOWA,
June 1, 1917.

Whereas on the 16th day of May, 1917, the attention of the city council was, by a vast and complaining population of the city, drawn to the fact of the high and exorbitant prices being charged by the coal dealers; and

Whereas in response to this complaint the mayor did call an open meeting of the people of the city of Davenport, to be held on the 25th day of May, 1917, inviting not only the general public, but the coal dealers, the coal operators, and the railroads, or the representatives of these bodies, for the purpose of having a discussion in order to determine if possible what relief could be had, if any; and

Whereas the speakers representing the different factions at this meeting each denied that the source of this present exigency was to be found in that particular branch of the coal handling or business in which he was himself interested; and

Whereas the city council, together with the people and the representatives as above mentioned are now, on this 1st day of June, 1917, again in session on the same subject matter; and

Whereas it appears that the city council is powerless to open a municipal coal yard and thereby relieve the situation; and

Whereas the Government of the United States of America, through its Congress, is now actively working on the matter of the high prices of coal and other products of consumption: Now, therefore, be it

Resolved by this meeting assembled, That Congress be, and it is hereby, earnestly requested to do all in its power to determine the cause, place the blame, and contrive a remedy to relieve the people of this and all communities of our present burdensome high cost of fuel; and be it further

Resolved, That a copy of these resolutions be at once forwarded to our Senators, Hon. A. B. CUMMINS and Hon. W. S. KENYON, and to our Congressman, Hon. HARRY HULL; and be it further

Resolved, That said Senators and Congressman be, and they are hereby, implored to use and exert their power and strength as representative of the people to relieve this serious situation.

By order of the city council.

JOHN BUWALD, *Mayor.*

Attest:

HUGO MOELLER, *City Clerk.*

Mr. JOHNSON of South Dakota presented petitions of sundry citizens of Dell Rapids, Elk Point, Britton, Faith, Mitchell, Garden City, and Grosse, all in the State of South Dakota, praying for national prohibition as a war measure; which were referred to the Committee on the Judiciary.

Mr. KNOX presented petitions of sundry citizens of Pennsylvania, praying for national prohibition as a war measure; which were referred to the Committee on the Judiciary.

Mr. MYERS presented a petition of sundry citizens of Montana, praying for the enactment of legislation to prohibit the introduction of Chinese and other coolie labor into the United States; which was referred to the Committee on Immigration.

Mr. PAGE presented a petition of the congregation of the First Congregational Church, of Burlington, Vt., praying for the enactment of legislation to prohibit the manufacture and sale of intoxicating liquors, including malt and fermented as well as distilled liquors, during the period of the war; which was referred to the Committee on Agriculture and Forestry.

Mr. ROBINSON presented a petition of sundry citizens of conscription age, of Siloam Springs, Ark., praying for national prohibition as a war measure; which was referred to the Committee on the Judiciary.

Mr. KENYON presented a petition of sundry citizens of Iowa, praying for a tax on all net incomes, etc., which was referred to the Committee on Finance.

Mr. PHELAN presented a memorial of Local Branch California Federation of Women's Clubs, of San Francisco, Cal., remonstrating against the use of grain in the production of alcoholic beverages during the war, which was referred to the Committee on Agriculture and Forestry.

Mr. GRONNA. I present a memorial signed by sundry citizens of Bathgate, N. Dak., who state that "We, the mothers of North Dakota, have been called upon to make the supreme sacrifice of giving our boys to the country," and praying for national prohibition as a war measure. I ask that the memorial be printed in the RECORD without the signatures and referred to the Committee on the Judiciary.

There being no objection, the memorial was referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

BATHGATE, N. DAK., *June 5, 1917.*

Senator A. J. GRONNA,
Washington, D. C.:

We, the mothers of North Dakota, have been called upon to make the supreme sacrifice of giving our boys to our country. Going from a prohibition State, they are now compelled to meet the temptations incident to Army life, where the sale of alcoholic liquors is permitted within reach of their camps.

As loyal mothers we have met the call, but we wish to protest most emphatically against saloon conditions being imposed upon our boys and against the unnecessary strain of anxiety thus placed upon us. We believe saloon regulation to be inadequate, and ask for national prohibition as an emergency war measure.

Mrs. FRANK A. WILLSON
(And others).

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. NELSON:

A bill (S. 2435) authorizing the counties of Itasca and Cass, Minn., to construct a bridge across the Mississippi River in said counties; to the Committee on Commerce.

By Mr. SHAFROTH:

A bill (S. 2436) granting to the States in which national forests are situate public lands to aid in the construction of public roads in such national forests; to the Committee on Public Lands.

By Mr. FRELINGHUYSEN:

A bill (S. 2437) to provide for the acquisition of an air station site for the United States Navy; to the Committee on Naval Affairs.

By Mr. CALDER:

A bill (S. 2438) for the relief of sundry railroad companies; to the Committee on Claims.

A bill (S. 2439) granting an increase of pension to Edward A. Dubey; and

A bill (S. 2440) granting a pension to David E. Austen; to the Committee on Pensions.

By Mr. JOHNSON of South Dakota:

A bill (S. 2441) granting an incease of pension to Frank D. Brown; to the Committee on Pensions.

By Mr. KENYON:

A bill (S. 2442) to increase pensions of certain Union soldiers and sailors of the Civil War of 1861 to 1865; to the Committee on Pensions.

A bill (S. 2443) to create a bureau for the deaf and dumb in the Department of Labor, and prescribing the duties thereof; to the Committee on Education and Labor.

A bill (S. 2444) for the relief of Jonathan D. Long; to the Committee on Military Affairs.

By Mr. FLETCHER:

A bill (S. 2445) to define, regulate, and punish trading with the enemy, and for other purposes; to the Committee on Commerce.

By Mr. BRADY:

A bill (S. 2446) granting an increase of pension to David I. Hain (with accompanying papers); to the Committee on Pensions.

WAR REVENUE.

Mr. MYERS submitted an amendment intended to be proposed by him to the bill (H. R. 4280) to provide revenue to defray war expenses, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

Mr. SHERMAN submitted an amendment intended to be proposed by him to the bill (H. R. 4280) to provide revenue to defray war expenses, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

NATIONAL DEFENSE.

Mr. OWEN submitted two amendments intended to be proposed by him to the bill (S. 1786) to amend certain sections of the act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916, and for other purposes, which were referred to the Committee on Military Affairs and ordered to be printed.

SELECTIVE-DRAFT REGISTRATION.

Mr. CALDER. Mr. President, if I may have the attention of the Senate for a few moments, and particularly that of the chairman of the Committee on Military Affairs, I would like to discuss the effect of the registration for the draft on certain sections of the country.

I find that in New York City the registration was taken by assembly districts, and in some of these districts where the alien population largely predominates the returns indicate that three times as many men registered as there are male voters of all ages.

The effect of this will be—and the Senate should have it in mind thus early, before we get into the draft—that in some sections where the foreign population is so excessive practically all those subject to the draft will be taken.

I have been advised that the Committee on Military Affairs has had under consideration some legislation on this subject, and I know they have found it very hard to grapple with. The selective-draft law provides that men shall be taken in proportion to population.

Mr. President, this measure was passed with the idea that the draft would fall equally on all sections of the country. It was founded on the theory of universal service, but the figures before me indicate that six times the proportion of citizens will be taken in certain parts of New York City as will be taken in other sections of the country. If this is allowed to stand certainly the law will not operate equitably. It seems to me most important that the law should be changed so that the draft may be based on citizen registration.

Mr. LA FOLLETTE. Mr. President——

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Wisconsin?

Mr. CALDER. I do.

Mr. LA FOLLETTE. I rise just to make a request that the Senator print the tables that he has showing the registration in connection with his remarks.

Mr. CALDER. I shall be glad to do so.

Mr. President, take, for instance, the city of San Francisco. There the Japanese and Chinese of military age have registered, and they will be included in estimating the number of men to be taken from that section of the country. So in the manufacturing and mining communities all over the country, where the alien population is large in every case.

So it is very important, Mr. President, and when the country realizes it there will be serious objection, unless in the meantime the law is changed to the end that it may operate justly and equitably upon all the people. I call this to the attention of the Senate that all may realize the importance of this question.

Mr. WARREN. May I ask the Senator is he quite sure that that fact will not be taken into consideration in levying the draft?

Mr. CALDER. The Judge Advocate General told me this morning that the draft would be based on the total population. The law provides that it shall.

Mr. WARREN. May I ask one further question? Under the law the President arranges for the elimination of certain persons, and I presume in that work of elimination the matter you speak of will be taken into consideration. I ask whether the Senator is quite sure it will not be duly considered?

Mr. CALDER. I have talked with officials of the War Department, and they expect to base the draft on the total population in the several communities.

Mr. NORRIS. Has the Senator any figures to show the nationalities of those people?

Mr. CALDER. No; I have not.

Mr. NORRIS. I presume a large number of them will be found to be citizens of the countries of our allies in this war.

Mr. CALDER. Unquestionably.

Mr. NORRIS. It seems to me it might be worthy of consideration to consider whether the law can not be amended so that those citizens could be included, or at least permitted to join the Army.

Mr. CALDER. There is nothing to prevent them from enlisting. Men of foreign nationalities may enlist.

Mr. NORRIS. They could not enlist in making up the quota of the draft.

Mr. CALDER. No; but they could enlist in the Regular Army or Navy or in the National Guard.

Mr. NORRIS. They could do that, but the Senator knows a great many prefer to go into other branches of the service.

Mr. CALDER. The War Department, I understand, took into consideration the question whether or not they should include aliens in the draft, particularly the aliens from countries allied with us in the present emergency, and they find some difficulty because of our treaty obligations, and they have come to the conclusion that it would be wise to exclude all aliens from the draft.

Mr. NORRIS. Has the Senator made inquiry whether, even though there be some objection on account of treaties, efforts have been made to ascertain if those countries would waive any such right and would not object to citizens of their country enlisting in a war in which they themselves were engaged?

Mr. CALDER. I will state to the Senator from Nebraska that the officials of the War Department, after a careful examination of the subject, have come to the conclusion that they must limit the draft to our citizen population, but under the law must base it upon the total number of men registered, aliens included.

Mr. McCUMBER. May I ask the Senator what objection there would be to allowing our allies to recruit from their own citizens in this country for their own armies? That, I understand, is proposed by Great Britain now. What objection is there to it if they desire to do it? I do not mean any enforced service, but why should not Italy recruit from among the Italians in New York, not our own citizens, to join their armies?

Mr. CALDER. I know of no reason whatever why that can not be done. In fact, I know that a great many Italians in New York are already enlisting in our Regular Army.

Mr. NELSON. Mr. President, I will state to the Senator that we have already passed a law at this session allowing them to enlist in this country, and they are now recruiting them in New York.

Further, I wish to state to the Senator that in the registration we put everybody on the list who is of military age. Under the law there are three classes of aliens. There are alien enemies, there are aliens who have taken out their first papers, and there are aliens who have taken out no papers. Under our law we have a right to enlist and we can enlist them in the Army, and they are liable to military duty where they have taken out their first papers. Those men should manifestly be on the list. They never can include in the census in the allotment of troops men who are not competent for the service who are not qualified.

Alien enemies and aliens who have not taken out their first papers can not be liable to military service, and for that reason, in the nature of things, they are not a part of the basis on which the selection is made.

Mr. CALDER. I will state to the Senator from Minnesota and the Senator from Nebraska that the War Department advises me they do not intend to include aliens who have taken out their first papers. If it were possible to include all aliens except enemy aliens, I would be very glad to have it done.

Mr. CHAMBERLAIN. May I interrupt the Senator for a moment?

Mr. CALDER. Certainly.

Mr. CHAMBERLAIN. The law with reference to exemptions in the selective-draft bill, section 4, provides, after naming those who are exempt from military service:

> That, notwithstanding the exemptions enumerated herein, each State, Territory, and the District of Columbia shall be required to supply its quota in the proportion that its population bears to the total population of the United States.

That, of course, includes the alien population of which the Senator speaks in some of the assembly districts of New York. There are in those districts many aliens who have taken out their first citizenship papers who are subject to the selective draft if the law in respect to them is constitutional, but they are not permitted to vote. Does the Senator propose in his suggestion to eliminate from the military service those in those districts who are aliens but not alien enemies who are capable of military duty simply because they can not vote?

Mr. CALDER. I do not; and I am very much in favor of compelling them to take their share of responsibility in this contest, but I understand that the War Department intends to exclude them. If the Senator can assure me to the contrary, then I am satisfied.

Mr. President, I hold in my hand a list of 21 assembly districts out of 63 in the city of New York, where the draft registration exceeds the total vote of all ages.

Mr. CHAMBERLAIN. Section 2 of the act provides:

> Such draft as herein provided shall be based upon liability to military service of all male citizens or male persons not alien enemies who have declared their intention to become citizens, between the ages of 21 and 30 years, both inclusive, and shall take place and be maintained under such regulations as the President may prescribe not inconsistent with the terms of this act.

Mr. LODGE. Mr. President——

Mr. CHAMBERLAIN. Pardon me just a moment. What does the Senator from New York propose to do?

Mr. CALDER. My idea is this, Mr. President: If it is the fact that the War Department expects to exclude all men who have not completed their citizenship, then we ought to have here at a very early day a bill from the Committee on Military Affairs covering that particular point. I am glad the Senator from

Oregon [Mr. CHAMBERLAIN] is here, and I will be pleased if he will take up this matter with the War Department to the end that the men who are not alien enemies may be included in the draft if that can be done without violating our treaty arrangements.

Mr. CHAMBERLAIN. I do not know how the United States could get military jurisdiction of these aliens who are not citizens of the United States.

Mr. CALDER. Then, if it can not do that, we should base this draft upon our registration of citizens. I am glad that the junior Senator from California [Mr. JOHNSON] is here. I will say to him that in estimating the number of men to be taken from his State, as I understand it, they will count all the Japanese and Chinese and other aliens, and then take the quota California is to furnish entirely from its citizen population of military age.

Mr. NELSON. The Senator is mistaken about that. The law read by the Senator from Oregon [Mr. CHAMBERLAIN] is just what I stated, that aliens who have taken out their first papers and declared their intention, but are not voters or citizens, are liable to service, and it is proposed under the law to take them as soldiers.

Mr. CALDER. Mr. President, I heard what the Senator from Oregon said, but I am informed that it is not the purpose of the War Department so to do; and I should like the Senator from Oregon to inform me as to that.

Mr. CHAMBERLAIN. It ought to be the purpose of the War Department to attempt to obey this law. I do not see how they can evade it. If there are aliens in this country who have declared their intention to become citizens and who are of military capacity, it is sought by the law to compel them to serve. It is questionable from a constitutional standpoint if this can be done.

In this connection, as the Senator from New York has evidently paid a good deal of attention to the matter, I hope he will formulate an amendment, to be submitted to the Military Commitee, which will embody his suggestions for the improvement of the statute.

Mr. CALDER. The Judge Advocate General's office informed me that they had suggested an amendment to the Senator's committee which covers the question; but even if the Senator is right—and the law seems to be very plain that the men who have made application for citizenship are included in the draft—there is a very large element of our population in the crowded centers of the Nation who have not even filed their applications for first papers.

Mr. SMITH of Michigan. If the Senator will allow me, do I understand that for the purposes of enumeration they count all residents, whether they have filed their first papers or otherwise?

Mr. CALDER. They count all residents of every character—citizens or those who have indicated their intention to become citizens or aliens who have been in this country but a few years.

Mr. SMITH of Michigan. For purposes of enumeration?

Mr. CALDER. Yes; Chinese, Japanese, and people of every description.

Mr. SMITH of Michigan. Then for the purposes of draft they eliminate all of those classes, which puts an additional burden upon the States where the alien population is of a numerous character.

Mr. CALDER. The Senator is correct. They base it upon the locality, I will say to the Senator.

Mr. SMITH of Michigan. That is so unfair to such communities that I can not understand how we can fail to remedy such a situation as that. Those people are protected by our laws; they get just as much of our police protection and of property protection, and they are protected in their constitutional rights as much as is the citizen who is a full citizen; and yet is it to be said that they owe no duty to this Government and are not to be considered in our national defense? That seems to be a very strange situation. If they are to be counted as residents and to be enumerated as the basis of military strength, and then are all to be eliminated as a class, it is a very serious situation.

Mr. CALDER. If the Senator will permit me, I will state that I live in a district in New York City where the voting registration is approximately 14,000 and the registration for the draft is 5,000, there being very few aliens in that community, while in another neighborhood, within 2 miles of where I reside, there is a district exactly the reverse, there being but 5,000 voters and 13,000 registered for military purposes.

The number of citizens to be taken for military purposes from the district where I live will be about 2 per cent of the male voting population, while in the other district referred to it will be 13 per cent. In other words, a man living in a section where the alien largely predominates has six times as great an obligation to the Nation. This is manifestly unjust.

Mr. CHAMBERLAIN. Let me call the Senator's attention to the fact that the State is allowed credit for those who may go into the service in estimating the number of those who have to serve. For instance, section 2 provides:

> Quotas for the several States, Territories, and the District of Columbia, or subdivisions thereof, shall be determined in proportion to the population thereof, and credit shall be given to any State, Territory, District, or subdivision thereof, for the number of men who were in the military service of the United States as members of the National Guard on April 1, 1917, or who have since said date entered the military service of the United States from any such State, Territory, District, or subdivision, either as members of the Regular Army or the National Guard.

All of those are deducted from the quota which the State furnishes.

Mr. LODGE. Mr. President, will the Senator allow me to interrupt him?

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Massachusetts?

Mr. CALDER. I do.

Mr. LODGE. I desire to ask a question of the Senator from Oregon. I want to say, as a preliminary, that we have a law in reference to the Navy which requires citizenship or the declaration of an intention to become citizens and otherwise excludes them. Of course, we can not draft the subject of another country, but we can draft, as the law which the Senator from Oregon has read provides, men who have declared their intention to become citizens but who are not voters. I understand, however—and this is the point, and I think the Senator from New York [Mr. CALDER] has already made it—that it is the intention of the War Department to take no alien residents, whether they have declared their intention to become citizens or whether they have not. Of course, I except alien enemies.

Mr. CHAMBERLAIN. I am not sure whether the War Department has authority to exempt that class, and the Senator's statement about it is the first intimation I have had of it. The question is a constitutional one, however, and in the last analysis must be settled by the courts.

Mr. LODGE. I got that information from the War Department, and I think other Senator's have received the same information. I believe they think they have the power to exclude all alien residents, whether they have taken out papers and declared their intention to become citizens or not, but it does not seem to me, under the law, that they have that power. The department, however, occasionally interprets the law differently from the manner intended by Congress.

Mr. SMITH of Michigan. What about the enumeration? That is unfair?

Mr. LODGE. I was not going into the question of unfairness, but of what the department has done. The Senator from New York does not pretend to say that actual alien residents who are subjects of other countries can be drafted or counted for the draft? What they are counting for the draft are resident aliens who have declared their intention to become citizens.

Mr. CALDER. If the Senator will permit me, we have enumerated every man of military age, whether he has taken out his first papers or not, whether he is eligible for citizenship or not, and whether he is a German subject or not.

Mr. LODGE. That goes to the question of the fairness of the apportionment, but it will make it less unfair if they take all the drafted alien residents who have taken out their first papers.

Mr. SMITH of South Carolina. I desire to ask the Senator from New York this question: Has the Senator any data as to the proportion of the alien population that have taken out their first papers and those who have not done so, so as to show what relation those who have taken out their first papers will bear to the actual citizen population?

Mr. CALDER. I regret that I can not give the Senator from South Carolina that information, but I think, Mr. President, those who have taken out their first papers constitute a very small proportion of the total number of aliens.

Mr. SMITH of South Carolina. That was my information, but the reason I asked the question——

Mr. CALDER. It is not the intention of the War Department to base the draft on the total population of a State but on each particular community, as of a ward, a village, a town, or assembly district. Almost every Senator in this Chamber has in some part of his State a community where the foreign population largely predominates, and he will find, when this draft is worked out, that they will take practically all the men of military age in these respective communities.

Mr. LODGE. Mr. President, I wish to ask the Senator another question, as he has been looking into this subject. There

is nothing to prevent our taking an alien resident as a volunteer in the Regular Army, and I suppose alien residents may be now taken, though I was told that they were not welcomed.

Mr. CALDER. There is nothing to prevent an alien volunteering in the Regular Army, and I believe many are being taken.

Mr. BRADY. Mr. President——

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Idaho?

Mr. CALDER. With pleasure.

Mr. BRADY. Mr. President, may I say to the Senator from Oregon [Mr. CHAMBERLAIN] that during his enforced absence from the Senate in attendance upon the funeral of his late colleague, we had this very subject under consideration before the committee, and the point now raised by the Senator from New York was there raised? We called Gen. Crowder before the committee, and asked him for a statement of the views of the department relative to persons who had declared their intention to become citizens. He was of the opinion that the unfairness complained of could be remedied by an amendment, and agreed to prepare an amendment and present it to the committee on the following day. On the following day he did appear before the committee, and made the statement that it would be impossible to change the law at this time, for the reason that the department had already sent out the different notices and papers for the registration for the draft; but I understood Gen. Crowder to take the position that has now been taken by the Senator from New York [Mr. CALDER], that the men who had declared their intention to become citizens could not be drafted. That was not his decision, but it was his understanding that that was going to be the decision of the War Department. The reason——

Mr. CHAMBERLAIN. Mr. President, this question may be involved in it—that is, a man is not a citizen of the United States who takes out his first papers—and we have treaty obligations with many nations which prevent us from enforcing the draft and compelling subjects of another power to do military duty. It may be that that consideration has induced the War Department to exempt such men from military service without waiting for the determination of the courts, but rather acting on the advice of the legal advisers of the department.

Mr. BRADY. I was just going to say that on his second appearance before the committee Gen. Crowder made the statement that there were subsisting treaties with various nations which prevented us drafting their subjects until they had ceased to be their subjects by becoming full citizens of the United States.

The amendment which it was desired to have adopted, and which was prepared and presented to the committee by Gen. Crowder, was the very amendment for which the Senator from New York asks. The proposition he makes is a fair one, and it covers a condition that will have to be met. The registration in his district he states, if I understand him correctly, will be many more than the actual voters in the district.

Mr. CALDER. In some districts three times as many men have been registered for the draft as there are voters of all ages.

Mr. BRADY. The unfairness of the proceeding is that every one of the citizens of the United States who registered would have to serve in order to fill the quota from such districts.

Mr. CALDER. Yes; every man of military age. This will work a great hardship, and I am fearful may cause much dissatisfaction.

Following is a list of the assembly districts in the city of New York where the draft registration exceeds the voting registration, and others where it very nearly equals it:

Assembly district.	Election registration 1916.	Registration for draft.
BOROUGH OF MANHATTAN.		
1	5,363	7,491
2	6,600	10,221
3	6,840	9,766
4	6,190	8,657
6	7,021	10,494
7	6,940	6,218
8	6,484	11,273

21	5,845	13,387
23	19,831	21,933

Mr. HOLLIS. Mr. President, I rise to a parliamentary inquiry.

The VICE PRESIDENT. The Senator from New Hampshire will state his parliamentary inquiry.

Mr. HOLLIS. Has morning business closed?

The VICE PRESIDENT. It has not.

Mr. HOLLIS. Then I call for the regular order.

The VICE PRESIDENT. There being objection, the discussion is wholly out of order. Concurrent and other resolutions are in order.

RIFLES, MACHINE GUNS, AND FIELD ARTILLERY.

Mr. SMOOT. I offer a resolution and ask for its immediate consideration. I desire to make a brief statement after the resolution has been read.

The VICE PRESIDENT. The Secretary will read the resolution.

The Secretary read the resolution (S. Res. 82), as follows:

Resolved, That the Secretary of War be requested, if not incompatible with the public interest, to furnish to the Senate as soon as possible the following information:

First. Has the British Enfield rifle been adopted for the American Army, and if so, are such rifles being chambered so as to fit the American type of rifle cartridge?

Second. Are machine guns for the use of the American Army using the same type of rifle cartridge as the Army rifle to be used by the American Army?

Third. Do the American cartridges for use in rifles and machine guns differ in size or otherwise so as to prevent their being used in the rifles and machine guns of the English or French? If so, what is the character of the difference, and what advantage is gained thereby?

Fourth. To what extent does the field artillery of the American Army differ in caliber and character of ammunition used from that of the English and French armies.

Fifth. Can the ammunition of the English or French armies be used in the field artillery of the American Army?

Sixth. If the American ammunition for rifles, machine guns, and field artillery is not interchangeable for like British or French guns, what advantage is gained by having it differ from that of the English Army or the French Army?

Mr. SMOOT. Mr. President, I offer this resolution, believing that this is the proper time for the Senate and the country to know the facts in relation to the statement that is so universally circulated throughout the United States with relation to the Government of the United States adopting officially the Enfield rifle. I notice in a number of publications a statement that that rifle has been officially adopted, and in a statement issued, or supposed to be issued, by Mr. Frank A. Scott, chairman of the general munitions board of the Council of National Defense, I find this statement:

Manufacturing facilities for the Springfield rifle are not adequate to supply the number required for the larger forces which the United States may desire to send abroad and to replace the wastage of such a force. Fortunately, the existing small-arms factories which have been turning out quantities of rifles for the British Army are equipped to manufacture the Enfield rifle in more than sufficient number. Therefore it has been decided to adopt the Enfield rifle, but manufactured to use American ammunition, and to issue these rifles to our troops to such extent as may be necessary.

Mr. President, I have heard it stated time and again that an 8-inch shell used by the Army could not be used in an 8-inch gun in the Navy, or, in other words, if one of our battleships should run out of ammunition and should come to a port of our country to replenish its ammunition supply, although there might be at hand for the Coast Artillery shells for the same size guns as those used upon a battleship, the ammunition is not interchangeable, and the battleship could not avail itself of such ammunition. I do not know whether that is true or not, and I ask in the resolution for information.

It is also stated that the factories in our country that are manufacturing the Enfield rifle for the French Government, and

for the English Government particularly, are manufacturing the same rifle for the American Government, but chambered or bored to a different size in order that they may use American ammunition. I am going to take just a few moments' time to direct attention to certain points that have been brought to my notice along this line, so that the matter will be in the RECORD, and so that when the answer comes from the War Department—and I have no doubt that they have good reasons for following the practice which they are following—a great deal of the talk in relation to this matter will be set at rest. For instance, statements have been made to me that—

The German Government has developed high efficiency in the standardization and use of ammunition for small arms and artillery. The German soldier, running out of ammunition for rifle or machine gun, can at once gather up from disabled men and machine guns the cartridges that will enable him to continue fighting either for aggression or protection. He does not have the constant dread of being left at the mercy of the enemy.

The ammunition used by the standard German batteries is the same everywhere for a given caliber, which is a tremendous advantage on account of transportation, supply, and effectiveness.

The British developed standards for their small-arms, machine-gun, and artillery ammunition, and the factories of England, the United States, and English colonies supplying England have their machinery and standards adjusted to manufacture the sizes required.

The French before the war had their machinery and standards and reserve stock worked out on a large scale, and have been able to keep their troops and armies supplied without serious complications resulting from the difference in the British standards, as they have been in very large units and close to supply bases.

It is reported that the British Enfield rifle has been adopted for the American Army and that they are now being bored out by American rifle manufacturers to fit the American type of rifle cartridge, and that the cartridges for the machine guns and field artillery also differ slightly from the British and French cartridges, so that it will be impossible to interchange in the event of such necessity arising at the front. This appears to inject a serious complication in munition supplies at the front by using another standard for small arms, machine guns, and artillery ammunition.

In other words, the tremendous efficiency of the German system, which has proven of such immense advantage during the war, is ignored, and the effective service of the American Army in Europe seriously imperiled, and under certain conditions destroyed, as the result of the desire to cling to the American system on the plea of a slight increase in the efficiency of the American ammunition—an increase that apparently will be of little value in the present system of warfare.

The destruction of half a dozen transports carrying ammunition from America might at any time cripple the ammunition supply of the American Army. Individual units at the front out of ammunition could not receive an American supply, and the men would be helpless, although British ammunition might be at their command.

A difference in ammunition standards also means distinct storage depots, transportation facilities, and many complications at the front, including the disheartening influence of such a policy.

Mr. President, the resolution simply asks to have the Secretary of War furnish the information as to these particular points. I do not think the Senator from Oregon, the chairman of the Committee on Military Affairs, has any objection whatever to the adoption of the resolution, and therefore I ask unanimous consent for its present consideration.

Mr. CHAMBERLAIN. Mr. President, I think the resolution ought to be adopted. If the ammunition and the guns that we are to use have not been standardized, it ought to be done, it seems to me, at the earliest possible date, or some steps ought to be taken in that direction. Not only ought they to be standardized for our own Army and Navy, but they ought to be standardized to meet the requirements of our allies, so that the ammunition and guns of one might be used indiscriminately by all. I do not know how far the department has gone along that line, but I think it is attempting to standardize this material.

I hope the resolution will be adopted.

Mr. SMITH of Michigan. Mr. President, let me ask the Senator a question. At present there is no standard that is fixed and definite in this regard, is there?

Mr. CHAMBERLAIN. I think not.

Mr. SMITH of Michigan. Therefore it is difficult for our enemies to copy our plans.

Mr. SMOOT. They have their own plans.

Mr. SMITH of Michigan. All right; but I am talking about having such a standard that they only have to change once to duplicate it. I think it is a very serious question as to whether we are doing the wise thing to expose ourselves to a single limitation which would run through our entire defensive armament.

Mr. SMOOT. Mr. President, I do not think there is any Senator or anyone else who doubts the wisdom of our Government having a standardization of munitions. If it were otherwise, we would have to have a separate store for every size of cartridge or shell, and they could not be interchanged by the Army and Navy or even different companies of our own Army. France has a standardization, England has a standardization, Germany also, and I might say every civilized country. If the Englishman is fighting next to the Frenchman, they can exchange ammunition to-day. They are one and the same kind. As far as I am concerned, I think that ought to be the policy of our Government; and that is the reason I ask to find out how far we have standardized our ammunition.

Mr. SMITH of Georgia. Mr. President, I should like to ask the Senator a question. Does not our Springfield rifle use a different size ammunition from the English Enfield rifle?

Mr. SMOOT. Yes; it does use a different size, and we are boring out the Enfield rifle as made for England and France to make it conform to the ammunition of the Springfield rifle.

Mr. SMITH of Georgia. That is now being done?

Mr. SMOOT. That is now being done, so I am told. I want to know whether it is so or not.

Mr. SMITH of Georgia. It is also reported that the Edison people and the Winchester people are changing their entire plants to bore Enfield rifles to suit our Springfield ammunition.

Mr. SMOOT. That is exactly the point.

Mr. SMITH of Georgia. That is the subject about which the Senator is inquiring?

Mr. SMOOT. Yes. Another thing: I have been told, Mr. President, that the reason why there is a difference in the size of the Springfield ammunition as compared with the Enfield ammunition is that it is more effective in hitting an object a long way off. But in modern warfare the army lines are not far apart, and the Enfield rifle used by France and England to-day would kill any living object it might hit, even if it were a thousand yards away.

The VICE PRESIDENT. Is there any objection to the present consideration of the resolution?

Mr. HARDWICK. Mr. President, I should like to make an inquiry of the Senator from Utah as to whether or not the resolution embraces artillery?

Mr. SMOOT. It does embrace artillery.

Mr. HARDWICK. I was not in the Chamber at the time it was read. I am very much in favor of its passage.

The VICE PRESIDENT. Is there any objection to the present consideration of the resolution?

Mr. REED. Mr. President, I have been obliged to be out of the Chamber. May I ask if the resolution is long or short? If it is short, I should like to have it read.

Mr. SMOOT. It is not very long.

Mr. REED. If it is long, I do not want to ask it, because I have not been here.

The VICE PRESIDENT. The Chair would not want to settle the question whether it is long or short. Is there any objection to the reading of the resolution? The Chair hears none, and the Secretary will read it.

The Secretary again read the resolution.

The VICE PRESIDENT. Is there any objection to the present consideration of the resolution?

Mr. POINDEXTER. Mr. President, I should like to ask the Senator from Utah if he does not think it would be advisable to take up those matters individually with the War Department, get the available information, and then determine for himself, on the information he obtains, whether there is anything in the situation that calls for public discussion?

Mr. SMOOT. I will say to the Senator that it is discussed now in publications all over the United States. I had in mind securing information from the Secretary of War, so that there would be no question as to the policy of our Government and as to whether or not there was truth in the statements. I think it is the very best policy to follow to let Congress and to let the country know just exactly what the policy is.

Mr. POINDEXTER. I think it is good policy to let Congress and the country know anything that is wrong and that needs the force of public opinion to remedy it.

Mr. SMOOT. I do not say that there is anything wrong.

Mr. POINDEXTER. But whether it is desirable to have a public discussion and publication everywhere of the details of the ammunition we are using, the caliber of our guns, and what preparation we are making, I think is extremely doubtful.

Mr. STONE. Mr. President, I have a thought very much like that of the Senator from Washington—whether a matter of this kind, which is largely administrative, would not be better left to the Executive Department of the Government? That department is interested in accomplishing the same end that the Senator has in view by his resolution. No doubt already the attention of the Department of War and the Department of the Navy has been attracted to this matter. It is inconceivable that that be not so. I am not sure that any great harm would result from a discussion of it in public, but still it seems to me, as it does to the Senator from Washington, that it is one of those questions that can very well be left in its adjustment to the executive arm of the Government.

Mr. SMOOT. Mr. President, I want to say to the Senator that it will be left to the executive arm. All I want is to know

the facts in the case; and I should think that our Government would be only too glad to give them, so that there will be no question about them in the minds of the people.

Mr. STONE. The Senator does not care to tell our enemies in the field just what our ammunition is and what the caliber of our guns is, does he?

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator? The resolution provides for that. If the department think it inadvisable to give this information to the Senate, they can decline to give it.

Mr. SMOOT. Why, certainly.

Mr. STONE. To be sure. I know that.

Mr. CHAMBERLAIN. It seems to me the Senate ought to have that information if it is advisable to make it public at all.

Mr. STONE. I know that, but I rather agree with the Senator from Washington that this is a matter that might very well be left to the administrative department of the Government. At all events, I doubt the wisdom of advertising the fact, if it be a fact, that we are at a disadvantage because of the character of the arms we are using.

Mr. SMOOT. Mr. President, the only object that I had in introducing the resolution was to get the information from the department itself, and get it right, so that when the question comes up in the way of letters and inquiries, I can simply say: "This is the report of the department, and this is what our Government is doing." I can not see any harm whatever in it, but I think a great deal of good will come from it, just as the Senator from Oregon has stated.

Mr. OWEN. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Oklahoma?

Mr. SMOOT. Yes; I yield to the Senator.

Mr. OWEN. The need for interchangeability of this ammunition is perfectly apparent. It is absolutely necessary that it should be interchangeable, as a matter of common sense.

Mr. SMOOT. Certainly.

Mr. OWEN. This inquiry to develop the fact would only emphasize the matter upon the attention of the department. It can not do any possible harm.

Mr. SMOOT. No; it can not possibly do any harm.

Mr. WALSH. Mr. President, I assume that the Senator from Utah does not call for this information as a mere matter of idle curiosity. The resolution necessarily carries the suggestion that there is something wrong, that there is something open to criticism, that there is something that should be corrected by legislative action with respect to the guns that are being used and the ammunition that is being furnished. That necessarily implies as well that the men to whom we entrust these important and delicate duties are either unfit for the places they occupy or that they do not know as much as the Congress of the United States knows concerning these matters.

It does seem to me that if there is any reason to believe that any condition exists that ought to be corrected, it would be eminently more advisable to have the matter investigated by the appropriate committee of the Senate than to call for information that will provoke a discussion which necessarily implies that the ordnance officers of the Government are not exercising good judgment in reference to the choice of the arms and ammunition which they are supplying to the troops. It occurs to me that if the information is to come at all, it ought to go to the Committee on Military Affairs. I do not myself, however, see any occasion for calling for information of this character, and I can not vote for the resolution upon the representations that have been made.

Mr. REED. Mr. President, I might say to the Senator from Montana that most of the information asked for in this resolution was given to the Military Affairs Committee by the Secretary of War some two or three weeks ago. He stated at the time that he thought the information ought to be regarded as confidential. The Senator can get that information himself from the Secretary of War, I am sure, or from any member of the committee. The disclosures made to the committee, however, did not apply to the ordnance.

Mr. POINDEXTER. Mr. President, it is perfectly obvious to everybody that whatever the fact may be, it is very desirable, at least, that the enemy, at a time when we are engaged in war, should have as little information as possible about the cartridges and guns that we use. They may know all about it; I do not know whether they do or not, but they ought not to know all about it. There ought to be a few of the details of our equipment about which we could at least maintain as much privacy as our enemies maintain about theirs; and whether they know it or not, it seems to me that the Senate of the United States would make a sort of spectacle of itself to indulge in a public discussion of all the details of the plans of the Army as to the kind of guns, the caliber, and the ammunition that they expect to use. Whether it affords any additional information to the enemy or not, out of some decent respect for our own sense of the fitness of things, I think we ought to refrain from that sort of an exposure and discussion of our military equipment.

I do not sympathize with the idea that these things should be left entirely to the executive department and that the legislative branch of the Government ought not to have anything to do with it. I believe that it is the business of the legislative branch of the Government—and in our form of government the legislative branch is paramount and supreme; it furnishes the money and makes the laws under which war is conducted—to supervise the executive department. But there are ways and proprieties to be observed in the performanec of that duty.

If the Senator from Utah comes to the conclusion, upon an investigation of the conditions, that there is a situation that ought to be exposed, that the country ought to know about, that public opinion ought to be directed to for the purpose of influencing a change, I will agree with him and aid and cooperate in promoting publicity; but he has not stated that any such condition exists. He simply proposes a sort of fishing excursion, apparently—to call on men in the War Department to make a written report, which will afterwards be printed, which can not be complete, which can not be intelligent, unless it gives details as to the equipment of our Army and Navy, rifles and machine guns and artillery, not only at the present time but also what we propose for the future.

I do not think we ought to call for the putting upon the recoord of that information, and I object to the consideration of the resolution this morning.

The VICE PRESIDENT. The resolution will go over under the rule.

PUNISHMENT OF ESPIONAGE—CONFERENCE REPORT.

The VICE PRESIDENT. Is there further morning business? It is closed.

Mr. OVERMAN. I move that the Senate proceed to the consideration of the conference report on the disagreeing votes of the two Houses upon the bill (H. R. 291) to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes.

The motion was agreed to, and the Senate proceeded to consider the report, which is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 291) to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"TITLE I.

"ESPIONAGE.

"SECTION 1. That (a) whoever, for the purpose of obtaining information respecting the national defense with intent or reason to believe that the information to be obtained is to be used to the injury of the United States, or to the advantage of any foreign nation, goes upon, enters, flies over, or otherwise obtains information concerning any vessel, aircraft, work of defense, navy yard, naval station, submarine base, coaling station, fort, battery, torpedo station, dockyard, canal, railroad, arsenal, camp, factory, mine, telegraph, telephone, wireless, or signal station, building, office, or other place connected with the national defense, owned or constructed, or in progress of construction by the United States or under the control of the United States, or of any of its officers or agents, or within the exclusive jurisdiction of the United States, or any place in which any vessel, aircraft, arms, munitions, or other materials or instruments for use in time of war are being made, prepared, repaired, or stored, under any contract or agreement with the United States, or with any person on behalf of the United States, or otherwise on behalf of the United States, or any prohibited place within the meaning of section 6 of this title; or (b) whoever for the purpose aforesaid, and with like intent or reason to believe, copies, takes, makes, or obtains, or attempts, or induces or aids another to copy, take, make, or obtain, any sketch, photograph, photographic negative, blue print, plan, map, model, instrument, appliance, document, writing, or note of anything connected with the

national defense; or (c) whoever, for the purpose aforesaid, receives or obtains or agrees or attempts or induces or aids another to receive or obtain from any person, or from any source whatever any document, writing, code book, signal book, sketch, photograph, photographic negative, blue print, plan, map, model, instrument, appliance, or note, of anything connected with the national defense, knowing or having reason to believe, at the time he receives or obtains, or agrees or attempts or induces or aids another to receive or obtain it, that it has been or will be obtained, taken, made or disposed of by any person contrary to the provisions of this title; or (d) whoever, lawfully or unlawfully having possession of, access to, control over, or being intrusted with any document, writing, code book, signal book, sketch, photograph, photographic negative, blue print, plan, map, model, instrument, appliance, or note relating to the national defense, willfully communicates or transmits or attempts to communicate or transmit the same to any person not entitled to receive it, or willfully retains the same and fails to deliver it on demand to the officer or employee of the United States entitled to receive it; or (e) whoever, being instrusted with or having lawful possession or control of any document, writing, code book, signal book, sketch, photograph, photographic negative, blue print, plan, map, model, note, or information, relating to the national defense, through gross negligence permits the same to be removed from its proper place of custody or delivered to anyone in violation of his trust, or to be lost, stolen, abstracted, or destroyed, shall be punished by a fine of not more than $10,000, or by imprisonment for not more than two years, or both.

"SEC. 2. (a) Whoever, with intent or reason to believe that it is to be used to the injury of the United States or to the advantage of a foreign nation, communicates, delivers, or transmits, or attempts to, or aids or induces another to, communicate, deliver, or transmit, to any foreign government, or to any faction or party or military or naval force within a foreign country, whether recognized or unrecognized by the United States, or to any representative, officer, agent, employee, subject, or citizen thereof, either directly or indirectly, any document, writing, code book, signal book, sketch, photograph, photographic negative, blue print, plan, map, model, note, instrument, appliance, or information relating to the national defense, shall be punished by imprisonment for not more than 20 years: *Provided*, That whoever shall violate the provisions of subsection (a) of this section in time of war shall be punished by death or by imprisonment for not more than 30 years; and (b) whoever, in time of war, with intent that the same shall be communicated to the enemy, shall collect, record, publish, or communicate, or attempt to elicit any information with respect to the movement, numbers, description, condition, or disposition of any of the armed forces, ships, aircraft, or war materials of the United States, or with respect to the plans or conduct, or supposed plans or conduct of any naval or military operations, or with respect to any works or measures undertaken for or connected with, or intended for the fortification or defense of any place, or any other information relating to the public defense, which might be useful to the enemy, shall be punished by death or by imprisonment for not more than 30 years.

"SEC. 3. Whoever, when the United States is at war, shall willfully make or convey false reports or false statements with intent to interfere with the operation or success of the military or naval forces of the United States or to promote the success of its enemies and whoever, when the United States is at war, shall willfully cause or attempt to cause insubordination, disloyalty, mutiny, or refusal of duty, in the military or naval forces of the United States, or shall willfully obstruct the recruiting or enlistment service of the United States, to the injury of the service or of the United States, shall be punished by a fine of not more than $10,000 or imprisonment for not more than 20 years, or both.

"SEC. 4. If two or more persons conspire to violate the provisions of sections 2 or 3 of this title, and one or more of such persons does any act to effect the object of the conspiracy, each of the parties to such conspiracy shall be punished as in said sections provided in the case of the doing of the act the accomplishment of which is the object of such conspiracy. Except as above provided conspiracies to commit offenses under this title shall be punished as provided by section 37 of the act to codify, revise, and amend the penal laws of the United States approved March 4, 1909.

"SEC. 5. Whoever harbors or conceals any person who he knows, or has reasonable grounds to believe or suspect, has committed, or is about to commit, an offense under this title shall be punished by a fine of not more than $10,000 or by imprisonment for not more than two years, or both.

"SEC. 6. The President in time of war or in case of national emergency may by proclamation designate any place other than those set forth in subsection (a) of section 1 hereof in which anything for the use of the Army or Navy is being prepared or constructed or stored as a prohibited place for the purposes of this title: *Provided*, That he shall determine that information with respect thereto would be prejudicial to the national defense.

"SEC. 7. Nothing contained in this title shall be deemed to limit the jurisdiction of the general courts-martial, military commissions, or naval courts-martial under sections 1342, 1343, and 1624 of the Revised Statutes as amended.

"SEC. 8. The provisions of this title shall extend to all territories, possessions, and places subject to the jurisdiction of the United States whether or not contiguous thereto, and offenses under this title when committed upon the high seas or elsewhere within the admiralty and maritime jurisdiction of the United States and outside the territorial limits thereof shall be punishable hereunder.

"SEC. 9. The act entitled 'An act to prevent the disclosure of national-defense secrets,' approved March 3, 1911, is hereby repealed.

"TITLE II.

"VESSELS IN PORTS OF THE UNITED STATES.

"SECTION 1. Whenever the President by proclamation or Executive order declares a national emergency to exist by reason of actual or threatened war, insurrection, or invasion, or disturbance or threatened disturbance of the international relations of the United States, the Secretary of the Treasury may make, subject to the approval of the President, rules and regulations governing the anchorage and movement of any vessel, foreign or domestic, in the territorial waters of the United States, may inspect such vessel at any time, place guards thereon, and, if necessary in his opinion in order to secure such vessels from damage or injury, or to prevent damage or injury to any harbor or waters of the United States, or to secure the observance of the rights and obligations of the United States, may take, by and with the consent of the President, for such purposes, full possession and control of such vessel and remove therefrom the officers and crew thereof and all other persons not specially authorized by him to go or remain on board thereof.

"Within the territory and waters of the Canal Zone the Governor of the Panama Canal, with the approval of the President, shall exercise all the powers conferred by this section on the Secretary of the Treasury.

"SEC. 2. If any owner, agent, master, officer, or person in charge, or any member of the crew of any such vessel fails to comply with any regulation or rule issued or order given by the Secretary of the Treasury or the Governor of the Panama Canal under the provisions of this title, or obstructs or interferes with the exercise of any power conferred by this title, the vessel, together with her tackle, apparel, furniture, and equipment, shall be subject to seizure and forfeiture to the United States in the same manner as merchandise is forfeited for violation of the customs revenue laws; and the person guilty of such failure, obstruction, or interference shall be fined not more than $10,000, or imprisoned not more than two years, or both.

"SEC. 3. It shall be unlawful for the owner or master or any other person in charge or command of any private vessel, foreign or domestic, or for any member of the crew or other person, within the territorial waters of the United States, willfully to cause or permit the destruction or injury of such vessel or knowingly to permit said vessel to be used as a place of resort for any person conspiring with another or preparing to commit any offense against the United States, or in violation of the treaties of the United States or of the obligations of the United States under the law of nations, or to defraud the United States, or knowingly to permit such vessels to be used in violation of the rights and obligations of the United States under the law of nations; and in case such vessel shall be so used, with the knowledge of the owner or master or other person in charge or command thereof, the vessel, together with her tackle, apparel, furniture, and equipment, shall be subject to seizure and forfeiture to the United States in the same manner as merchandise is forfeited for violation of the customs revenue laws; and whoever violates this section shall be fined not more than $10,000 or imprisoned not more than two years, or both.

"SEC. 4. The President may employ such part of the land or naval forces of the United States as he may deem necessary to carry out the purpose of this title.

"TITLE III.

"INJURING VESSELS ENGAGED IN FOREIGN COMMERCE.

"SECTION 1. Whoever shall set fire to any vessel of foreign registry, or any vessel of American registry entitled to engage in commerce with foreign nations, or to any vessel of the United States as defined in section 310 of the act of March 4,

1909, entitled 'An act to codify, revise, and amend the penal laws of the United States,' or to the cargo of the same, or shall tamper with the motive power or instrumentalities of navigation of such vessel, or shall place bombs or explosives in or upon such vessel, or shall do any other act to or upon such vessel while within the jurisdiction of the United States, or, if such vessel is of American registry, while she is on the high sea, with intent to injure or endanger the safety of the vessel or of her cargo, or of persons on board, whether the injury or danger is so intended to take place within the jurisdiction of the United States, or after the vessel shall have departed therefrom; or whoever shall attempt or conspire to do any such acts with such intent, shall be fined not more than $10,000 or imprisoned not more than 20 years, or both.

"TITLE IV.

"INTERFERENCE WITH FOREIGN COMMERCE BY VIOLENT MEANS.

"SECTION 1. Whoever, with intent to prevent, interfere with, or obstruct or attempt to prevent, interfere with, or obstruct the exportation to foreign countries of articles from the United States shall injure or destroy, by fire or explosives, such articles or the places where they may be while in such foreign commerce, shall be fined not more than $10,000, or imprisoned not more than 10 years, or both.

"TITLE V.

"ENFORCEMENT OF NEUTRALITY.

"SECTION 1. During a war in which the United States is a neutral Nation, the President, or any person thereunto authorized by him, may withhold clearance from or to any vessel, domestic or foreign, which is required by law to secure clearance before departing from port or from the jurisdiction of the United States, or, by service of formal notice upon the owner, master, or person in command or having charge of any domestic vessel not required by law to secure clearances before so departing, to forbid its departure from port or from the jurisdiction of the United States, whenever there is reasonable cause to believe that any such vessel, domestic or foreign, whether requiring clearance or not, is about to carry fuel, arms, ammunition, men, supplies, dispatches, or information to any warship, tender, or supply ship of a foreign belligerent nation in violation of the laws, treaties, or obligations of the United States under the law of nations; and it shall thereupon be unlawful for such vessel to depart.

"SEC. 2. During a war in which the United States is a neutral Nation, the President, or any person thereunto authorized by him, may detain any armed vessel owned wholly or in part by American citizens, or any vessel, domestic or foreign (other than one which has entered the ports of the United States as a public vessel), which is manifestly built for warlike purposes or has been converted or adapted from a private vessel to one suitable for warlike use, until the owner or master, or person having charge of such vessel, shall furnish proof satisfactory to the President, or to the person duly authorized by him, that the vessel will not be employed by the said owners, or master, or person having charge thereof, to cruise against or commit or attempt to commit hostilities upon the subjects, citizens, or property of any foreign prince or state, or of any colony, district, or people with which the United States is at peace, and that the said vessel will not be sold or delivered to any belligerent nation, or to an agent, officer, or citizen of such nation, by them or any of them, within the jurisdiction of the United States, or, having left that jurisdiction, upon the high seas.

"SEC. 3. During a war in which the United States is a neutral Nation, it shall be unlawful to send out of the jurisdiction of the United States any vessel built, armed, or equipped as a vessel of war, or converted from a private vessel into a vessel of war, with any intent or under any agreement or contract, written or oral, that such vessel shall be delivered to a belligerent nation, or to an agent, officer, or citizen of such nation, or with reasonable cause to believe that the said vessel shall or will be employed in the service of any such belligerent nation after its departure from the jurisdiction of the United States.

"SEC. 4. During a war in which the United States is a neutral Nation, in addition to the facts required by sections 4197, 4198, and 4200 of the Revised Statutes to be set out in the masters' and shippers' manifests before clearance will be issued to vessels bound to foreign ports, each of which sections of the Revised Statutes is hereby declared to be and is continued in full force and effect, every master or person having charge or command of any vessel, domestic or foreign, whether requiring clearance or not, before departure of such vessel from port shall deliver to the collector of customs for the district wherein such vessel is then located a statement, duly verified by oath, that the cargo or any part of the cargo is or is not to be delivered to other vessels in port or to be transshipped on the high seas and, if it is to be so delivered or transshipped, stating the kind and quantities and the value of the total quantity of each kind of article so to be delivered or transshipped, and the name of the person, corporation, vessel, or government to whom the delivery or transshipment is to be made; and the owners, shippers, or consignors of the cargo of such vessel shall in the same manner and under the same conditions deliver to the collector like statements under oath as to the cargo or the parts thereof laden or shipped by them, respectively.

"SEC. 5. Whenever it appears that the vessel is not entitled to clearance or whenever there is reasonable cause to believe that the additional statements under oath required in the foregoing section are false, the collector of customs for the district in which the vessel is located may, subject to review by the Secretary of Commerce, refuse clearance to any vessel, domestic or foreign, and by formal notice served upon the owners, master, or person or persons in command or charge of any domestic vessel for which clearance is not required by law, forbid the departure of the vessel from the port or from the jurisdiction of the United States; and it shall thereupon be unlawful for the vessel to depart.

"SEC. 6. Whoever, in violation of any of the provisions of this title, shall take, or attempt or conspire to take, or authorize the taking of any such vessel, out of port or from the jurisdiction of the United States, shall be fined not more than $10,000 or imprisoned not more than five years, or both; and, in addition, such vessel, her tackle, apparel, furniture, equipment, and her cargo shall be forfeited to the United States.

"SEC. 7. Whoever, being a person belonging to the armed land or naval forces of a belligerent nation or belligerent faction of any nation and being interned in the United States, in accordance with the law of nations, shall leave or attempt to leave said jurisdiction, or shall leave or attempt to leave the limits of internment in which freedom of movement has been allowed, without permission from the proper official of the United States in charge, or shall willfully overstay a leave of absence granted by such official, shall be subject to arrest by any marshal or deputy marshal of the United States, or by the military or naval authorities thereof, and shall be returned to the place of internment and there confined and safely kept for such period of time as the official of the United States in charge shall direct; and whoever, within the jurisdiction of the United States and subject thereto, shall aid or entice any interned person to escape or attempt to escape from the jurisdiction of the United States, or from the limits of internment prescribed, shall be fined not more than $1,000 or imprisoned not more than one year, or both.

"SEC. 8. Section 13 of the act entitled 'An act to codify, revise, and amend the penal laws of the United States,' approved March 4, 1909, is hereby amended so as to read as follows:

"'SEC. 13. Whoever, within the territory or jurisdiction of the United States or of any of its possessions, knowingly begins or sets on foot or provides or prepares a means for or furnishes the money for, or who takes part in, any military or naval expedition or enterprise to be carried on from thence against the territory or dominion of any foreign prince or State, or of any colony, district, or people with whom the United States is at peace, shall be fined not more than $3,000 or imprisoned not more than three years, or both.'

"SEC. 9. That the President may employ such part of the land or naval forces of the United States as he may deem necessary to carry out the purposes of this title.

"SEC. 10. Section 15 of the act entitled 'An act to codify, revise, and amend the penal laws of the United States,' approved March 4, 1909, is hereby amended so as to read as follows:

"'SEC. 15. It shall be lawful for the President to employ such part of the land or naval forces of the United States, or of the militia thereof, as he may deem necessary to compel any foreign vessel to depart from the United States or any of its possessions in all cases in which, by the law of nations or the treaties of the United States, it ought not to remain, and to detain or prevent any foreign vessel from so departing in all cases in which, by the law of nations or the treaties of the United States, it is not entitled to depart.'

"SEC. 11. The joint resolution approved March 4, 1915, 'To empower the President to better enforce and maintain the neutrality of the United States,' and any act or parts of acts in conflict with the provisions of this title are hereby repealed.

"TITLE VI.

"SEIZURE OF ARMS AND OTHER ARTICLES INTENDED FOR EXPORT.

"SECTION 1. Whenever an attempt is made to export or ship from or take out of the United States, any arms or munitions of war or other articles, in violation of law, or whenever there

shall be known or probable cause to believe that any such arms or munitions of war, or other articles, are being or are intended to be exported, or shipped from, or taken out of the United States, in violation of law, the several collectors, naval officers, surveyors, inspectors of customs, and marshals, and deputy marshals of the United States, and every other person duly authorized for the purpose by the President, may seize and detain any articles or munitions of war about to be exported or shipped from, or taken out of the United States, in violation of law, and the vessels or vehicles containing the same, and retain possession thereof until released or disposed of as hereinafter directed. If upon due inquiry as hereinafter provided, the property seized shall appear to have been about to be so unlawfully exported, shipped from, or taken out of the United States, the same shall be forfeited to the United States.

"SEC. 2. It shall be the duty of the person making any seizure under this title to apply, with due diligence, to the judge of the district court of the United States, or to the judge of the United States district court of the Canal Zone, or to the judge of a court of first instance in the Philippine Islands, having jurisdiction over the place within which the seizure is made, for a warrant to justify the further detention of the property so seized, which warrant shall be granted only on oath or affirmation showing that there is known or probable cause to believe that the property seized is being or is intended to be exported or shipped from or taken out of the United States in violation of law; and if the judge refuses to issue the warrant, or application therefor is not made by the person making the seizure within a reasonable time, not exceeding 10 days after the seizure, the property shall forthwith be restored to the owner or person from whom seized. If the judge is satisfied that the seizure was justified under the provisions of this title and issues his warrant accordingly, then the property shall be detained by the person seizing it until the President, who is hereby expressly authorized so to do, orders it to be restored to the owner or claimant, or until it is discharged in due course of law on petition of the claimant, or on trial of condemnation proceedings, as hereinafter provided.

"SEC. 3. The owner or claimant of any property seized under this title may, at any time before condemnation proceedings have been instituted, as hereinafter provided, file his petition for its restoration in the district court of the United States, or the district court of the Canal Zone, or the court of first instance in the Philippine Islands, having jurisdiction over the place in which the seizure was made, whereupon the court shall advance the cause for hearing and determination with all possible dispatch, and, after causing notice to be given to the United States attorney for the district and to the person making the seizure, shall proceed to hear and decide whether the property seized shall be restored to the petitioner or forfeited to the United States.

"SEC. 4. Whenever the person making any seizure under this title applies for and obtains a warrant for the detention of the property, and (a) upon the hearing and determination of the petition of the owner or claimant restoration is denied, or (b) the owner or claimant fails to file a petition for restoration within 30 days after the seizure, the United States attorney for the district wherein it was seized, upon direction of the Attorney General, shall institute libel proceedings in the United States district court or the district court of the Canal Zone or the court of first instance of the Philippine Islands having jurisdiction over the place wherein the seizure was made, against the property for condemnation; and if, after trial and hearing of the issues involved, the property is condemned, it shall be disposed of by sale, and the proceeds thereof, less the legal costs and charges, paid into the Treasury.

"SEC. 5. The proceedings in such summary trials upon the petition of the owner or claimant of the property seized, as well as in the libel cases herein provided for, shall conform, as near as may be, to the proceedings in admiralty, except that either party may demand trial by jury of any issue of fact joined in such libel cases, and all such proceedings shall be at the suit of and in the name of the United States: *Provided*, That upon the payment of the costs and legal expenses of both the summary trials and the libel proceedings herein provided for, and the execution and delivery of a good and sufficient bond in an amount double the value of the property seized, conditioned that it will not be exported or used or employed contrary to the provisions of this title, the court, in its discretion, may direct that it be delivered to the owners thereof or to the claimants thereof.

"SEC. 6. Except in those cases in which the exportation of arms and munitions of war or other articles is forbidden by proclamation or otherwise by the President, as provided in section 1 of this title, nothing herein contained shall be construed to extend to, or interfere with any trade in such commodities, conducted with any foreign port or place wheresoever, or with any other trade which might have been lawfully carried on before the passage of this title, under the law of nations, or under the treaties or conventions entered into by the United States, or under the laws thereof.

"SEC. 7. Upon payment of the costs and legal expenses incurred in any such summary trial for possession or libel proceedings, the President is hereby authorized, in his discretion, to order the release and restoration to the owner or claimant, as the case may be, of any property seized or condemned under the provisions of this title.

"SEC. 8. The President may employ such part of the land or naval forces of the United States as he may deem necessary to carry out the purposes of this title.

"TITLE VII.

"CERTAIN EXPORTS IN TIME OF WAR UNLAWFUL.

"SECTION 1. Whenever during the present war the President shall find that the public safety shall so require, and shall make proclamation thereof, it shall be unlawful to export from or ship from or take out of the United States to any country named in such proclamation any article or articles mentioned in such proclamation, except at such time or times, and under such regulations and orders, and subject to such limitations and exceptions as the President shall prescribe, until otherwise ordered by the President or by Congress: *Provided, however*, That no preference shall be given to the ports of one State over those of another.

"SEC. 2. Any person who shall export, ship, or take out, or deliver or attempt to deliver for export, shipment, or taking out, any article in violation of this title, or of any regulation or order made hereunder, shall be fined not more than $10,000, or, if a natural person, imprisoned for not more than 2 years, or both; and any article so delivered or exported, shipped, or taken out, or so attempted to be delivered or exported, shipped, or taken out, shall be seized and forfeited to the United States; and any officer, director, or agent of a corporation who participates in any such violation shall be liable to like fine or imprisonment, or both.

"SEC. 3. Whenever there is reasonable cause to believe that any vessel, domestic or foreign, is about to carry out of the United States any article or articles in violation of the provisions of this title, the collector of customs for the district in which such vessel is located is hereby authorized and empowered, subject to review by the Secretary of Commerce, to refuse clearance to any such vessel, domestic or foreign, for which clearance is required by law, and by formal notice served upon the owners, master, or person or persons in command or charge of any domestic vessel for which clearance is not required by law, to forbid the departure of such vessel from the port, and it shall thereupon be unlawful for such vessel to depart. Whoever, in violation of any of the provisions of this section shall take, or attempt to take, or authorize the taking of any such vessel, out of port or from the jurisdiction of the United States, shall be fined not more than $10,000 or imprisoned not more than two years, or both; and, in addition, such vessel, her tackle, apparel, furniture, equipment, and her forbidden cargo shall be forfeited to the United States.

"TITLE VIII.

"DISTURBANCE OF FOREIGN RELATIONS.

"SECTION 1. Whoever, in relation to any dispute or controversy between a foreign Government and the United States, shall willfully and knowingly make any untrue statement, either orally or in writing, under oath before any person authorized and empowered to administer oaths, which the affiant has knowledge or reason to believe will, or may be used to influence the measures or conduct of any foreign Government, or of any officer or agent of any foreign Government, to the injury of the United States, or with a view or intent to influence any measure of or action by the Government of United States, or any branch thereof, to the injury of the United States, shall be fined not more than $5,000 or imprisoned not more than five years, or both.

"SEC. 2. Whoever within the jurisdiction of the United States shall falsely assume or pretend to be a diplomatic or consular, or other official of a foreign Government duly accredited as such to the Government of the United States with intent to defraud such foreign Government or any person, and shall take upon himself to act as such, or in such pretended character shall demand or obtain, or attempt to obtain from any person or from said foreign Government, or from any officer thereof, any money, paper, document, or other thing of value, shall be fined not more than $5,000, or imprisoned not more than five years, or both.

"SEC. 3. Whoever, other than a diplomatic or consular officer or attaché, shall act in the United States as an agent of a for-

eign Government without prior notification to the Secretary of State shall be fined not more than $5,000, or imprisoned not more than five years, or both.

"SEC. 4. The words 'foreign Government,' as used in this act and in sections 156, 157, 161, 170, 171, 172, 173, and 220 of the act of March 4, 1909, entitled 'An act to codify, revise, and amend the penal laws of the United States,' shall be deemed to include any government, faction, or body of insurgents within a country with which the United States is at peace, which government, faction, or body of insurgents may or may not have been recognized by the United States as a government.

"SEC. 5. If two or more persons within the jurisdiction of the United States conspire to injure or destroy specific property situated within a foreign country and belonging to a foreign government or to any political subdivision thereof, with which the United States is at peace, or any railroad, canal, bridge, or other public utility so situated, and if one or more of such persons commits an act within the jurisdiction of the United States to effect the object of the conspiracy, each of the parties to the conspiracy shall be fined not more than $5,000, or imprisoned not more than three years, or both. Any indictment or information under this section shall describe the specific property which it was the object of the conspiracy to injure or destroy.

"TITLE IX.

"PASSPORTS.

"SECTION 1. Before a passport is issued to any person by or under authority of the United States such person shall subscribe to and submit a written application duly verified by his oath before a person authorized and empowered to administer oaths, which said application shall contain a true recital of each and every matter of fact which may be required by law or by any rules authorized by law to be stated as a prerequisite to the issuance of any such passport. Clerks of United States courts, agents of the Department of State, or other Federal officials authorized, or who may be authorized, to take passport applications and administer oaths thereon, shall collect, for all services in connection therewith, a fee of $1, and no more, in lieu of all fees prescribed by any statute of the United States, whether the application is executed singly, in duplicate, or in triplicate.

"SEC. 2. Whoever shall willfully and knowingly make any false statement in an application for passport with intent to induce or secure the issuance of a passport under the authority of the United States, either for his own use or the use of another, contrary to the laws regulating the issuance of passports or the rules prescribed, pursuant to such laws, or whoever shall willfully and knowingly use or attempt to use, or furnish to another for use, any passport the issue of which was secured in any way by reason of any false statement, shall be fined not more than $2,000 or imprisoned not more than five years, or both.

"SEC. 3. Whoever shall willfully and knowingly use, or attempt to use, any passport issued or designed for the use of another than himself, or whoever shall willfully and knowingly use or attempt to use any passport in violation of the conditions or restrictions therein contained, or of the rules prescribed pursuant to the laws regulating the issuance of passports, which said rules shall be printed on the passport; or whoever shall willfully and knowingly furnish, dispose of, or deliver a passport to any person, for use by another than the person for whose use it was originally issued and designed, shall be fined not more than $2,000 or imprisoned not more than five years, or both.

"SEC. 4. Whoever shall falsely make, forge, counterfeit, mutilate, or alter, or cause or procure to be falsely made, forged, counterfeited, mutilated, or altered any passport or instrument purporting to be a passport, with intent to use the same, or with intent that the same may be used by another; or whoever shall willfully and knowingly use, or attempt to use, or furnish to another for use any such false, forged, counterfeited, mutilated, or altered passport or instrument purporting to be a passport, or any passport validly issued which has become void by the occurrence of any condition therein prescribed invalidating the same, shall be fined not more than $2,000 or imprisoned not more than five years, or both.

"TITLE X.

"COUNTERFEITING GOVERNMENT SEAL.

"SECTION 1. Whoever shall fraudulently or wrongfully affix or impress the seal of any executive department, or of any bureau, commission, or office of the United States, to or upon any certificate, instrument, commission, document, or paper of any description; or whoever, with knowledge of its fraudulent character, shall with wrongful or fraudulent intent use, buy, procure, sell, or transfer to another any such certificate, instrument, commission, document, or paper, to which or upon which said seal has been so fraudulently affixed or impressed, shall be fined not more than $5,000 or imprisoned not more than five years, or both.

"SEC. 2. Whoever shall falsely make, forge, counterfeit, mutilate, or alter, or cause or procure to be made, forged, counterfeited, mutilated, or altered, or shall willingly assist in falsely making, forging, counterfeiting, mutilating, or altering, the seal of any executive department, or any bureau, commission, or office of the United States, or whoever shall knowingly use, affix, or impress any such fraudulently made, forged, counterfeited, mutilated, or altered seal to or upon any certificate, instrument, commission, document, or paper, of any description, or whoever with wrongful or fraudulent intent shall have possession of any such falsely made, forged, counterfeited, mutilated, or altered seal, knowing the same to have been so falsely made, forged, counterfeited, mutilated, or altered, shall be fined not more than $5,000 or imprisoned not more than 10 years, or both.

"SEC. 3. Whoever shall falsely make, forge, counterfeit, alter, or tamper with any naval, military, or official pass or permit, issued by or under the authority of the United States, or with wrongful or fraudulent intent shall use or have in his possession any such pass or permit, or shall personate or falsely represent himself to be or not to be a person to whom such pass or permit has been duly issued, or shall willfully allow any other person to have or use any such pass or permit, issued for his use alone, shall be fined not more than $2,000 or imprisoned not more than five years, or both.

"TITLE XI.

"SEARCH WARRANTS.

"SECTION 1. A search warrant authorized by this title may be issued by a judge of a United States district court, or by a judge of a State or Territorial court of record, or by a United States commissioner for the district wherein the property sought is located.

"SEC. 2. A search warrant may be issued under this title upon either of the following grounds:

"1. When the property was stolen or embezzled in violation of a law of the United States; in which case it may be taken on the warrant from any house or other place in which it is concealed, or from the posession of the person by whom it was stolen or embezzled, or from any person in whose possession it may be.

"2. When the property was used as the means of committing a felony; in which case it may be taken on the warrant from any house or other place in which it is concealed, or from the possession of the person by whom it was used in the commission of the offense, or from any person in whose possession it may be.

"3. When the property, or any paper, is possessed, controlled, or used in violation of section 22 of this title; in which case it may be taken on the warrant from the person violating said section, or from any person in whose possession it may be, or from any house or other place in which it is concealed.

"SEC. 3. A search warrant can not be issued but upon probable cause, supported by affidavit, naming or describing the person and particularly describing the property and the place to be searched.

"SEC. 4. The judge or commissioner must, before issuing the warrant, examine on oath the complainant and any witness he may produce, and require their affidavits or take their depositions in writing and cause them to be subscribed by the parties making them.

"SEC. 5. The affidavits or depositions must set forth the facts tending to establish the grounds of the application or probable cause for believing that they exist.

"SEC. 6. If the judge or commissioner is thereupon satisfied of the existence of the grounds of the application or that there is probable cause to believe their existence, he must issue a search warrant, signed by him with his name of office, to a civil officer of the United States duly authorized to enforce or assist in enforcing any law thereof, or to a person so duly authorized by the President of the United States, stating the particular grounds or probable cause for its issue and the names of the persons whose affidavits have been taken in support thereof, and commanding him forthwith to search the person or place named, for the property specified, and to bring it before the judge or commissioner.

"SEC. 7. A search warrant may in all cases be served by any of the officers mentioned in its direction, but by no other person, except in aid of the officer on his requiring it, he being present and acting in its execution.

"SEC. 8. The officer may break open any outer or inner door or window of a house, or any part of a house, or anything therein,

to execute the warrant, if, after notice of his authority and purpose, he is refused admittance.

"SEC. 9. He may break open any outer or inner door or window of a house, for the purpose of liberating a person who, having entered to aid him in the execution of the warrant, is detained therein, or when necessary for his own liberation.

"SEC. 10. The judge or commissioner must insert a direction in the warrant that it be served in the daytime, unless the affidavits are positive that the property is on the person or in the place to be searched, in which case he may insert a direction that it be served at any time of the day or night.

"SEC. 11. A search warrant must be executed and returned to the judge or commissioner who issued it within 10 days after its date; after the expiration of this time the warrant, unless executed, is void.

"SEC. 12. When the officer takes property under the warrant, he must give a copy of the warrant together with a receipt for the property taken (specifying it in detail) to the person from whom it was taken by him, or in whose possession it was found; or, in the absence of any person, he must leave it in the place where he found the property.

"SEC. 13. The officer must forthwith return the warrant to the judge or commissioner and deliver to him a written inventory of the property taken, made publicly or in the presence of the person from whose possession it was taken, and of the applicant for the warrant, if they are present, verified by the affidavit of the officer at the foot of the inventory and taken before the judge or commissioner at the time, to the following effect: 'I, R. S., the officer by whom this warrant was executed, do swear that the above inventory contains a true and detailed account of all the property taken by me on the warrant.'

"SEC. 14. The judge or commissioner must thereupon, if required, deliver a copy of the inventory to the person from whose possession the property was taken and to the applicant for the warrant.

"SEC. 15. If the grounds on which the warrant was issued be controverted, the judge or commissioner must proceed to take testimony in relation thereto, and the testimony of each witness must be reduced to writing and subscribed by each witness.

"SEC. 16. If it appears that the property or paper taken is not the same as that described in the warrant or that there is no probable cause for believing the existence of the grounds on which the warrant was issued, the judge or commissioner must cause it to be restored to the person from whom it was taken; but if it appears that the property or paper taken is the same as that described in the warrant and that there is probable cause for believing the existence of the grounds on which the warrant was issued, then the judge or commissioner shall order the same retained in the custody of the person seizing it or to be otherwise disposed of according to law.

"SEC. 17. The judge or commissioner must annex the affidavits, search warrant, return, inventory, and evidence, and if he has not power to inquire into the offense in respect to which the warrant was issued he must at once file the same, together with a copy of the record of his proceedings, with the clerk of the court having power to so inquire.

"SEC. 18. Whoever shall knowingly and willfully obstruct, resist, or oppose any such officer or person in serving or attempting to serve or execute any such search warrant, or shall assault, beat, or wound any such officer or person, knowing him to be an officer or person so authorized, shall be fined not more than $1,000 or imprisoned not more than two years.

"SEC. 19. Sections 125 and 126 of the Criminal Code of the United States shall apply to and embrace all persons making oath or affirmation or procuring the same under the provisions of this title, and such persons shall be subject to all the pains and penalties of said sections.

"SEC. 20. A person who maliciously and without probable cause procures a search warrant to be issued and executed shall be fined not more than $1,000 or imprisoned not more than one year.

"SEC. 21. An officer who in executing a search warrant willfully exceeds his authority, or exceeds it with unnecessary severity, shall be fined not more than $1,000 or imprisoned not more than one year.

"SEC. 22. Whoever, in aid of any foreign government, shall knowingly and willfully have possession of or control over any property or papers designed or intended for use or which is used as the means of violating any penal statute, or any of the rights or obligations of the United States under any treaty or the law of nations, shall be fined not more than $1,000 or imprisoned not more than two years, or both.

"SEC. 23. Nothing contained in this title shall be held to repeal or impair any existing provisions of law regulating search and the issue of search warrants.

"TITLE XII.

"USE OF MAILS.

"SECTION 1. Every letter, writing, circular, postal card, picture, print, engraving, photograph, newspaper, pamphlet, book, or other publication, matter, or thing, of any kind, in violation of any of the provisions of this act, is hereby declared to be nonmailable matter and shall not be conveyed in the mails or delivered from any post office or by any letter carrier: *Provided*, That nothing in this act shall be so construed as to authorize any person other than an employee of the Dead Letter Office, duly authorized thereto, or other person upon a search warrant authorized by law, to open any letter not addressed to himself.

"SEC. 2. Every letter, writing, circular, postal card, picture, print, engraving, photograph, newspaper, pamphlet, book, or other publication, matter or thing, of any kind, containing any matter advocating or urging treason, insurrection, or forcible resistance to any law of the United States, is hereby declared to be nonmailable.

"SEC. 3. Whoever shall use or attempt to use the mails or Postal Service of the United States for the transmission of any matter declared by this title to be nonmailable, shall be fined not more than $5,000 or imprisoned not more than five years, or both. Any person violating any provision of this title may be tried and punished either in the district in which the unlawful matter or publication was mailed, or to which it was carried by mail for delivery according to the direction thereon, or in which it was caused to be delivered by mail to the person to whom it was addressed.

"TITLE XIII.

"GENERAL PROVISIONS.

"SECTION 1. The term 'United States' as used in this act includes the Canal Zone and all territory and waters, continental or insular, subject to the jurisdiction of the United States.

"SEC. 2. The several courts of first instance in the Philippine Islands and the district court of the Canal Zone shall have jurisdiction of offenses under this act committed within their respective districts, and concurrent jurisdiction with the district courts of the United States of offenses under this act committed upon the high seas, and of conspiracies to commit such offenses, as defined by section 37 of the act entitled 'An act to codify, revise, and amend the penal laws of the United States,' approved March 4, 1909, and the provisions of said section, for the purpose of this act, are hereby extended to the Philippine Islands, and to the Canal Zone. In such cases the district attorneys of the Philippine Islands and of the Canal Zone shall have the powers and perform the duties provided in this act for United States attorneys.

"SEC. 3. Offenses committed and penalties, forfeitures, or liabilities incurred prior to the taking effect hereof under any law embraced in or changed, modified, or repealed by any chapters of this act may be prosecuted and punished, and suits and proceedings for causes arising or acts done or committed prior to the taking effect hereof may be commenced and prosecuted, in the same manner and with the same effect as if this act had not been passed.

"SEC. 4. If any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder thereof but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered."

And the Senate agree to the same.

LEE S. OVERMAN,
DUNCAN U. FLETCHER,
KNUTE NELSON,
Managers on the part of the Senate.

E. Y. WEBB,
C. C. CARLIN,
A. J. VOLSTEAD,
Managers on the part of the House.

The VICE PRESIDENT. Is it the desire that the report shall be read to the Senate? It has been printed in parallel columns and is on the desks of Senators and also printed in document form. Is there any request for reading the report? The Chair hears none, and the reading is dispensed with.

Mr. BORAH. Mr. President, I wish to ask the Senator from North Carolina who has charge of the report a question. I understand there were no changes made in section 1 of Chapter XII.

Mr. OVERMAN. As the Senator will remember, I think the objection he and others made to that section and the battle in

the Senate raged around the words in lines 4, 5, and 6; and they were adopted by a small majority, I think. Those words have been stricken out, as the Senator will see if he will turn to page 43 of the comparative print:

or intended or calculated to induce, promote, or further any of the acts or things by any provision of this act declared unlawful.

Mr. BORAH. I understand the words "or intended or calculated to induce, promote, or further any of the acts or things by any provision of this act declared unlawful" have been stricken out.

Mr. OVERMAN. They were stricken out. That seemed to be the principal objection to the section, and we struck it out.

The VICE PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

Mr. OVERMAN. I ask that the bill (S. 2) to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes, being Order of Business 14 on the calendar, be taken therefrom and postponed indefinitely.

The VICE PRESIDENT. The bill will be postponed indefinitely.

REGISTRATION REGULATIONS.

Mr. SMITH of Arizona. I report back favorably with three amendments from the Committee on Printing the House concurrent resolution (No. 9) to print the act to increase temporarily the Military Establishment, approved May 18, 1917, registration regulations prescribed by the President under authority of said act approved May 18, 1917, and the proclamation of the President of the same date, fixing June 5, 1917, as the date of registration. I shall ask, as soon as I make a brief explanation of it, unanimous consent for the present consideration of the resolution.

The House of Representatives passed a concurrent resolution in which they provided that there be printed 1,250,000 copies of the document. The estimated cost was something over $8,000. The Committee on Printing of the Senate, not feeling that there was any such demand on the part of the Senate for the document for circulation among the people affecting the new Army regulations, and so forth, amended the resolution by substituting 500,000 copies, 450,000 copies of which would go to the House document room and 50,000 copies to the Senate document room. This was done on the insistence of the House that they require a great number, and the Senate committee agreed to this irregular distribution in order to satisfy the House.

I am free to say the Senate committee were not particularly favorable to the resolution, but directed me to report it favorably with these amendments, at the request and desire of the House for the document. It was insisted on by the House. I have interviewed Members of the House who are interested in the resolution. I ask unanimous consent for its present consideration.

Mr. SHAFROTH. I should like to ask the Senator what is the estimated cost of 500,000 copies.

Mr. SMITH of Arizona. Three thousand five hundred dollars, I think. I merely report the concurrent resolution favorably with the amendments and ask for its consideration.

Mr. GALLINGER. Let the resolution be read.

The VICE PRESIDENT. The Secretary will read the concurrent resolution.

The Secretary read the resolution.

The amendments of the Committee on Printing were, in line 3 to strike out "1,250,000" and insert "500,000"; in line 11 to strike out "875,000" and insert "450,000"; and in line 1, page 2, to strike out "375,000" and insert "50,000," so as to make the concurrent resolution read:

Resolved by the House of Representatives (the Senate concurring), That there be printed as a House document 500,000 copies, in one document, of the act to increase temporarily the Military Establishment, approved May 18, 1917; registration regulations prescribed by the President under authority of said act, approved May 18, 1917; and the proclamation of the President of same date fixing June 5, 1917, as the date of registration, 450,000 for the use of the House and 50,000 for the use of the Senate, the same to be distributed through the folding room of the House and Senate, respectively.

Mr. GALLINGER. Mr. President, I will ask the Senator from Arizona, the chairman of the Committee on Printing, if he thinks there is a demand for this document to the extent that is proposed even in the amended form? Everybody knows the law regarding the reorganization of the Army. Registration has became an accomplished fact. Surely the country does not need any information on that point. The proclamation of the President has been printed in every newspaper almost in the world. It strikes me that this is an unnecessary expenditure of money, even though it may be but a few thousand dollars.

Mr. SMITH of Arizona. I do not claim that I have any lack of sympathy with the statement of the Senator, but if my memory serves me the Senator also was present in the committee at the time when we had the matter under consideration.

Mr. GALLINGER. "The Senator from New Hampshire" was present at one meeting and quite strenuously objected to this expenditure of money. There was a subsequent meeting that I was unable to attend, when I presume the committee acted upon the resolution, but I will bow to the decision of the committee, of course, if the Senator from Arizona thinks it is a wise thing to do. However, our document room is flooded to-day to an extent that is appalling with documents that are never called for, and we are piling them up there by the tens of thousands. I suppose they will bring something as old paper; I believe there is a market for old paper now, but I think we ought, even in the matter of printing, to try to be a little less profligate than we have been in the past.

Mr. SMITH of Arizona. I thank the Senator for his suggestion, and I sincerely hope the Printing Committee and the Senate will be guided by the very wise suggestion the Senator has made.

As I said, I myself interviewed the chairman of the Committee on Military Affairs of the House of Representatives and other Members. They claimed that this resolution had passed the House unanimously and there was an enormous demand upon the Members of the House for the document. I expressed some surprise at that statement, because several Senators had had no call for it at all and did not think the Senate needed the document particularly.

As I said in the opening, I was largely guided by the persistent demand of the House that the Senate ought at least to give some consideration to a measure of this kind which they had sent to us and that they themselves needed, and it was through that feeling of courtesy rather than anything else which induced the committee to act. As for myself, I am not particularly solicitous whether the resolution passes or not.

Mr. SMOOT. Mr. President, I wish to say to the Senator reporting the resolution that it has reference to the registration day that has already passed. That was June 5. When the resolution passed the House there were a number of House Members who came and asked me if I would approve of the resolution and have it acted upon immediately, as it would be of no use whatever after the 5th day of June, stating that it must pass before the 5th of June or it would be absolutely useless. I took the position then that there was not a newspaper in the United States that had not printed in full all the regulations, and that all the people of the United States were in full possession of all the requirements of the law, and therefore there was no necessity to print 1,250,000 copies of this document. I was one of the Senators who said to the Senator from Arizona that I had not had a single call for a copy of the document.

Mr. OVERMAN. Nor have I had a call for it.

Mr. SMOOT. The Senator from Arizona, I think, also stated that he had not had a single call for a copy. Then I also called attention to the fact that we could hardly get a million copies of the document in this room, that we have not the paper on hand to print it, and we should not go to the expense.

I have due regard to the wishes of the House. I should like to meet any wish within reason that they may have, particularly with reference to printing, but I think, Mr. President, that this is an absolute waste of money pure and simple. If we do print it the result will be that there will not be a thousand copies distributed. They would be of no use whatever to-day and we would have to sell them as old paper.

Mr. SMITH of Arizona. Mr. President, there is a great deal in what the Senator from Utah says, as there is usually in all he says on business matters. As I stated, the resolution did not meet entirely the judgment of the committee of the Senate, but it was done through the importunities of the House committee, who demanded that the number named should be printed. We cut down the number to much less than half and propose to give nearly all of them to the House. It was a courtesy to that body rather than any feeling on our part that it was a wise expenditure of money. On that ground alone I present the matter to the Senate for its consideration.

Mr. SMOOT. May I ask the Senator if he will not let the resolution go over for a day, and I will see Members of the House in reference to it?

Mr. SMITH of Arizona. I shall be very glad to do it, because I have seen them two or three times and have tried to prevent the printing of this document.

Mr. FLETCHER. Mr. President, in this connection I will state that the committee concluded, as the Senator from New Hampshire and the Senator from Utah have said, that it was too late to get the document distributed, and for that reason

the Printing Committee acted adversely on it, asking the chairman to take it up with the chairman of the House committee and see if we were not right in our supposition that the document could not be printed and distributed by the 5th of June, and therefore there was no need for its publication. But subsequent to that Members of the House appeared before the committee and stated that, no matter whether the document could be sent out or not by the 5th of June, they wanted it, that there was great demand there for copies, and they were very much disappointed that the Senate Committee on Printing was not taking favorable action on the resolution. I could not state exactly the various reasons they gave, but, at any rate, they felt that there was material here which ought to go to their constituents; that, irrespective of whether the document was distributed in time for the registration on the 5th of June or not, there would be questions of exemptions arise and other questions under the law about which they wanted to have their constituents furnished information, and it would be contained in this document.

So after our committee had thought it wise not to publish it because it was thought to be unnecessary, and would be a waste, they insisted upon it, and the committee finally modified the resolution so as to reduce the number and provide that the proportion for the Senate instead of being 375,000 copies should be 50,000 copies, feeling that, as far as the Senate was concerned, the demand would be very limited indeed.

I think the suggestion is all right to have the resolution go over for a day so that further inquiry may be made about it. If we can save the amount it is advisable to do it, but I say even after the time has passed, when it was deemed necessary to distribute the document, our information from the House is that they desire to have the document printed.

Mr. SHAFROTH. Mr. President, I hold in my hand the document which it is proposed to print. It consists first of the law which was passed by the Congress of the United States on the 18th day of May, an act to authorize the President to increase temporarily the Military Establishment of the United States. I have no doubt that has been published in nearly every newspaper in the entire United States. The next is a proclamation by the President of the United States concerning the manner in which registrations shall be made. These constitute the first third of the document. The last two thirds of the document relate to registration regulations. That is the total of it. It consists of rules that are prescribed for the manner of administering the law with relation to registration. The first part is the administrative system. Then it is divided into subheads—duties of registration officers, and so forth. The necessity for all that passed on the 5th day of June.

Then, here are the oaths that are to be prescribed, the various questions that are to be asked, the number of precincts that are to be established, the duties of the registrars, and various questions that are to be propounded to the persons who offer to register. Then there are various statements in the document in regard to the affidavits of exemption, rules for the information of persons to be registered, a special case of registration, and so forth.

Mr. President, it seems to me that ninety-nine one-hundredths of this document are now of no use whatever to the people. I myself have never received an application for a single document of this kind. It does seem to me to be an absolute waste of money to print this document, which relates to registration which took place on the 5th of June, when the time has expired; and it contains simply rules and regulations as to the manner of conducting that registration. For that reason I hope the proposition will be defeated.

Mr. GALLINGER. It could only be useful to libraries, antiquarian societies, and such institutions as those.

The VICE PRESIDENT. The resolution goes to the calendar.

AMENDMENT OF INTERSTATE-COMMERCE LAW.

Mr. NEWLANDS. I move that the Senate proceed to the consideration of the unfinished business.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

Mr. NEWLANDS. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. KING in the chair). The absence of a quorum is suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Brady	Dillingahm	France
Beckham	Chamberlain	Fernald	Frelinghuysen
Borah	Curtis	Fletcher	Gallinger
Gore	La Follette	Penrose	Smith, S. C.
Harding	McKellar	Phelan	Smoot
Hardwick	McLean	Pittman	Sterling
Hollis	McNary	Poindexter	Swanson
Husting	Martin	Pomerene	Thomas
James	Myers	Reed	Trammell
Johnson, S. Dak.	Nelson	Saulsbury	Vardaman
Jones, N. Mex.	New	Shafroth	Warren
Jones, Wash.	Newlands	Sheppard	Weeks
Kendrick	Norris	Smith, Ariz.	Williams
Kenyon	Overman	Smith, Ga.	Wolcott
King	Owen	Smith, Md.	
Kirby	Page	Smith, Mich.	

Mr. ASHURST. I desire to announce that the Senator from Arkansas [Mr. ROBINSON] and the Senator from Rhode Island [Mr. GERRY] are detained on official business.

Mr. FRELINGHUYSEN. I desire to announce the unavoidable absence of my colleague [Mr. HUGHES] on account of illness. I ask that this announcement stand for the day.

Mr. McKELLAR. I desire to announce the absence on business of the senior Senator from Tennessee [Mr. SHIELDS]. I ask that this announcement stand for the day.

Mr. SMITH of Michigan. My colleague [Mr. TOWNSEND] is unavoidably absent on account of sickness in his family. I desire this announcement to stand for the day.

Mr. HOLLIS. I have been requested to announce that the Senator from Arkansas [Mr. ROBINSON] is necessarily absent and is paired with the Senator from Michigan [Mr. TOWNSEND].

The PRESIDING OFFICER. Sixty-two Senators having answered to their names, a quoroum is present.

Mr. HARDWICK obtained the floor.

Mr. REED. Mr. President——

The PRESIDING OFFICER. The Senator from Georgia has been recognized.

Mr. HARDWICK. I yield to the Senator from Missouri.

The PRESIDING OFFICER. The Senator from Georgia yields to the Senator from Missouri.

Mr. REED. Mr. President, the roll has just been called and there has been disclosed the presence of a quorum by the roll call, but an actual inspection of the Senate Chamber at this moment will convince any person that we are very far short of a quorum. Senators come in, answer to their names, and immediately leave the Senate Chamber.

The bill under consideration applies to the national defense, which we understand to be the great overmastering question of the hour. The purpose of the bill is practically to give a committee or an individual, to be appointed by the President, the right of a dictatorship over all the lines of transportation of the United States; and yet it is not receiving the attention of any considerable number of Senators. I feel, under those circumstances, Mr. President, that it is my duty to say that I intend to continue to demand the call of the roll of the Senate often enough to compel, if possible, the attendance of the Senate upon the consideration of this bill, and that, if necessary, I shall move adjournments of the Senate when a quorum is not maintained.

Mr. NEWLANDS. Mr. President——

Mr. HARDWICK. I yield to the Senator from Nevada.

Mr. NEWLANDS. I will ask the Senator from Missouri whether he has any remedy to suggest for the condition to which he has referred? It is not simply a condition of to-day; it has been the condition for a long time. Does not the Senator think if we could agree now upon a time for a vote and limit the debate, after the Senator from Georgia [Mr. HARDWICK] concludes his speech, to 10 minutes for each Senator, that we would secure a better attendance and more intelligent consideration of the bill itself?

Mr. REED. Mr. President, in reply to the Senator's question, if I may have the courtesy of the Senator from Georgia——

Mr. HARDWICK. I yield to the Senator.

Mr. REED. I think that is the very way to empty the Chamber, namely, to agree on a time for a vote. The remedy that I have proposed to try to employ is the one I have already suggested; that is, simply let it be understood that this bill will not be considered by five or six Senators in the Chamber so long as I can continue to demand a roll call. I say that not because I am antagonizing the bill, although I think the bill ought to be radically changed, but I have witnessed the discussion and I have witnessed the performance of Senators, who have given no attention to a bill, coming in and voting upon a measure; and this is too important a measure upon which to allow that kind of thing to go on.

I heard the Senator from Georgia [Mr. SMITH] deliver a very able analysis of this bill the other day, and he did it to a comparatively few Members of the Senate. I have had a similar experience; but I am not complaining because Senators did not listen to me. What I had to say was perhaps not worth listening to, but what the Senator from Georgia said was. It might

just as well be understood now that if we are to proceed with this business Senators will have to attend the Senate.

Mr. HARDWICK. Mr. President, I do not believe that any Senator in this Chamber, on either side, would hesitate to give to the President of the United States any appropriate or necessary power to conduct the war to which this country is committed. At the same time, it is inconceivable to my mind that any considerable number of Senators should really be willing, using the war as a pretext, to confer upon the Chief Executive of this country powers that are hardly even remotely connected with the prosecution of this war, powers that are utterly incompatible with the liberties of a free people and with the institutions of a free Republic.

When we are engaged in war, and while we are engaged in war, everyone of us should, without regard to party or faction or political creed, uphold and support the Executive arm of this Government so far as that arm is being lifted to wage war against a common enemy of the Nation; but because of that desire to render loyal support we ought never to be asked, and we ought never to consent, if asked, to confer unusual, arbitrary, and despotic powers where the necessity for the exercise of those powers is neither real nor apparent, nor really connected with the prosecution of the war.

Before I conclude my remarks I hope to be able to demonstrate to the Senate that most of the powers sought to be conferred by this bill are for the present at least not needed for the prosecution of this war and not necessary for the promotion of the success of this country's cause, and that all of it is utterly undemocratic, unrepublican, and un-American.

I come first, specifically, to the proposal of the Senator from Nebraska [Mr. NORRIS]. The Senator from Nebraska proposes that the shipper shall be treated just as the carrier is. He is right about that, in my judgment, although I think that neither the shipper nor the carrier ought to be compensated for the indirect damage resulting from the use of the proper power that ought to be conferred by this bill, as I think I can demonstrate.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Nebraska?

Mr. HARDWICK. I yield to the Senator from Nebraska.

Mr. NORRIS. Mr. President, so that my position may not be misunderstood, I desire to say to the Senator that I agree with the last statement he has made.

Mr. HARDWICK. I am glad to hear the Senator say that.

Mr. NORRIS. My object in offering that amendment was to call attention to the fact, as I look at it, that where the shipper and the carrier are both damaged in the same way by the same act they ought both to be treated in the same way; but I will be in favor of striking all that provision out of the bill, and if the motion that is now pending, which I have offered, is defeated, I intend to make the motion, if some other Senator does not do so, to strike out that part of the bill that proposes compensation.

Mr. HARDWICK. I am glad to hear the Senator say that, and I think he has taken the correct position; but whether his motion prevails or is defeated, I propose to move to strike out all that part of the bill and to submit that to the Senate, because even if they are treated alike, neither of them ought to be paid. I agree that if we are going to pay the railroads of this country any incidental damage that they incur from the use of this power we ought also to treat the shipper exactly in the same way and put him on exactly the same plane; and my judgment is you will find it hard to justify any contrary position to the people of this country. My belief is that if we are merely conferring a power to insure the prompt and effectual movement of the military and naval forces of the United States and of the arms, equipment, and supplies therefor, and even of raw materials to be used in the manufacture of such supplies—if that is the power, and the sole power, that we are really going to confer when we pass this bill, then I think that anybody who is injured by the exercise of that power falls under the legal classification of damnum absque injuria, so that both classes and all classes, very much like the sufferings that people incur necessarily in the wake of war and incident to the prosecution of war and the march of armies and to the fighting of campaigns, must suffer this loss without compensation therefor.

Mr. NEWLANDS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Nevada?

Mr. HARDWICK. I yield to the Senator.

Mr. NEWLANDS. May I ask the Senator whether his attention has been called to this distinction: That under this bill the Government is indulging in a qualified taking over of the railroads, and that it will not in any way or in any sense take over the property of the shippers?

The Senator will recall that in England they went to the extreme, and took over the railroads. Of course if we should do that we would be obliged to provide compensation. Is it not that when we, in a partial way, take over the railroads for public use, we are bound to make compensation to them; and is not that a different thing from the suggestion that compensation should be given to the shipper whose property is not taken?

Mr. HARDWICK. I am very glad to have the Senator put that question in that precise form and just at this juncture. I say no; and the reason is that we do not take over the property of the railroads. The reason is that we propose to compensate them for whatever service they render. We propose to pay them for whatever trains we require them to furnish us, and for whatever service they render us.

Mr. NEWLANDS. Does not the Senator feel that we are taking over the railroads to the extent that we give the President the power to direct and control their use——

Mr. HARDWICK. I do not.

Mr. NEWLANDS. And in certain particulars, in determining these priorities, the bill makes the railroad committee provided by this act the President's agent for the accomplishment of the Government's directions with reference to property which it has, in a qualified sense, taken over and appropriated to its own use.

Mr. HARDWICK. Well, now, let us see where we are on that point. Of course, if you are going to pass legislation like this bill proposes conferring powers broad enough to enable the President of the United States to run the entire transportation business of this country whether it relates to the war and its prosecution or not, there may be some merit in the Senator's suggestion. But if you are going only to confer on the Chief Executive power necessarily connected with the war, power necessary only to wage the war, then I take it, of course, as has always been done in this country and in every other country, that the Government of the United States will pay to these people for services exactly what those services are worth and even more than it costs the railroads to render them.

Mr. REED. Mr. President——

Mr. HARDWICK. I yield to the Senator.

Mr. REED. May I suggest that if the Government is to enlarge the business beyond the carrying on of the war proper, so that it will absorb or interfere with the general transportation of the country, then these claims for damages, direct and incidental, will mount to the very heavens?

Mr. HARDWICK. Yes; and, in my opinion, we will need another "liberty loan" to finance them alone. That is just about what will happen. If the Government is going to go to the extent that some people have in mind—to take over the transportation business of this country, and indirectly control the great engines of production and industrial activity throughout this Republic—I say to the distinguished Senator from Nevada that he will need a Treasury a good deal fuller than ours is to pay those claims, if you pay them at all, to say nothing of prosecuting the war.

But are we going to do that? Are we prepared to do that? If we are, the straightforward, manly, frank, honest way would be just to take over the railroads and pay for them and operate them, and have Government ownership and operation pure, direct, and simple. There is no need to cloak it. There is no need to indulge in subterfuge about it. There is no need to invoke the war power, that has no logical and legitimate relation to this matter, in order to carry it to that extent. If you intend to carry it to that extent, if what this bill means is Government ownership and operation of the railroads of this country, then I tell you that we had just as well say so frankly, and provide some system of acquiring them and some method of operating them by statute, rather than leave it to Executive discretion.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Missouri?

Mr. HARDWICK. I yield to the Senator.

Mr. REED. There are now in the Senate exactly nine Democrats and six Republicans. I suggest the absence of a quorum.

Mr. HOLLIS. Mr. President, I make the point of order that no business has been transacted since the last quorum was called.

The PRESIDING OFFICER. The Senator from Missouri makes the point of no quorum, and the Senator from New Hampshire raises the point of order that no business has been transacted since the former roll call.

Mr. REED. I call attention to the rule of the Senate which states that at any time the question of a quorum can be raised.

Mr. HOLLIS. Mr. President, in Gilfry's Decisions on Points of Order, page 496, a ruling is given by Vice President Sher-

man, and in the second volume of Gilfry, page 217, the same ruling by Vice President MARSHALL.

Mr. REED. Mr. President, I do not know whether the Chair desires to hear argument on this question or not; but I am going to say that I have been in the Senate now about long enough to arrive at the conclusion that the precedents to be found in the decisions either of the Senate itself or of the Vice Presidents amount to nothing more than an indication of the particular exigency of the particular moment when the particular decision was made. If discussion of a question upon the floor of the Senate by a Senator does not constitute a part of the business of the Senate, then the Senate is not engaged in business most of its time. There is nothing in the decision that can obviate this rule. The purpose of the rule is entirely plain. The rulings that have been called to the attention of the Chair are not sound in reason and can have no weight as authority, and I think I can demonstrate that.

If we are to consider as business of the Senate only the votes upon measures, then the vote upon the measure itself would disclose the absence of a quorum, and there would be no necessity for the rule unless we had a viva voce vote; but every record vote would disclose the absence of a quorum, if one were absent. The very purpose of this rule is to keep in the Senate Chamber enough men to constitute a quorum at all times when the Senate is transacting the business of the Senate; and the Senate is certainly transacting the business of the Senate when questions are being discussed.

What is the purpose of our rule permitting discussion? Is it not that the attention of Senators shall be challenged to the arguments and facts bearing upon a bill under consideration? And if that discussion can go on in the absence of Senators in the cloakrooms and in their offices and in their homes, with only four or five people here, then the purpose and object of the rule is entirely destroyed.

I know how these rulings came to be made. We had what appeared to be a filibuster on, and it was the habit to call the roll in order to give the gentleman who was filibustering a chance to rest; and so these rulings were made under those conditions and to meet them. I am demanding a call of the roll at this time because a most important bill is before the Senate, a bill that relates to the defense of the Nation. It is being discussed by a distinguished Senator and it is being discussed in the absence of the Senate.

If a rule were made that the point of no quorum could not be raised, then it would be entirely possible for this absurd condition to arise, namely, that a Senator should take the floor and begin his remarks and not a single man remain to listen to him except the presiding officer for the moment.

Mr. President, I insist that I have a right to have the roll called. I am not doing this to delay. I am doing it to force attention.

Mr. HOLLIS. Mr. President, I have every sympathy with the remarks that have been offered by my distinguished friend from Missouri; but it is very evident that if we should call for a quorum we would have the same experience that we have had in the last 20 minutes. Before the Senator from Georgia had had a chance to begin his speech the Senator from Missouri called attention to the fact that there was not actually a quorum present. If we should call for a quorum now we would have precisely the same experience, and before the roll was through being called we would have only 15 or 20 Senators here.

We can not do business if every few minutes we are to go through that operation. With all respect to the Senator's views on the subject, I must ask to have the rules of the Senate applied and ask the Chair to rule in accordance with the decisions.

Mr. SHAFROTH. Mr. President, I should like to call the attention of the Chair to the compilation of precedents by Mr. Gilfry, at page 494, where it seems to me this question is clearly determined. It is under paragraph 17:

> May not call for a quorum, no business having intervened, discussion not being business.

This is 1911. Mr. Sherman, the Vice President, was in the chair, and the following occurred:

> Mr. OWEN. I suggest the absence of a quorum.
> The VICE PRESIDENT (Mr. Sherman). The Senator from Oklahoma suggests the absence of a quorum. The Secretary will call the roll.
> * * * * * * * *
> The VICE PRESIDENT (Mr. Sherman). Seventy-two Senators have answered to the roll call. A quorum of the Senate is present. The Senator from South Dakota will proceed.
> [Mr. Crawford resumed his speech. After having spoken about half an hour he yielded to Mr. OWEN.]
> Mr. OWEN. I raise the point of order that there is no quorum.
> Mr. BAILEY. Mr. President——
> The VICE PRESIDENT (Mr. Sherman). The Chair overrules the point of order.
> Mr. BAILEY. I was just going to suggest that no business has intervened since the roll call.
> Mr. OWEN. I call attention to the precedents in this case. In a similar case the Senate has heretofore held, as will be found in Gilfry's Precedents, that discussion comprises business.
> The VICE PRESIDENT (Mr. Sherman). The Senate has repeatedly held that discussion is not business, but the present occupant of the chair, regardless of that rule, at any time when a reasonable length of time has been consumed in discussion and it was reasonably apparent that a quorum was not present, should entertain the demand for a roll call. But where, as in the present case, a roll call has twice been demanded within the last 40 minutes and each time upward of 70 Senators have answered to their names, there having been no intermediate business save discussion, the Chair sustains the point of order made, that a Senator can not raise the point that there is no quorum present.

Mr. President, that having been clearly determined, it seems to me the point of order made by the Senator from New Hampshire must be sustained.

Mr. REED. Mr. President, it was clearly determined by the decision of Vice President Sherman. That decision was afterwards followed by Vice President MARSHALL. Both of those matters were fully disclosed and discussed during the absence of my friend from Colorado, who himself was not here listening to the discussion.

The PRESIDING OFFICER. The Chair will say, if the Senator will pardon the Chair, that the Chair is ready to rule, but the Chair will be very glad to hear the Senator from Missouri.

Mr. REED. No; if the Chair is ready to rule, I desire to offer no further observations.

The PRESIDING OFFICER. The Chair will be very glad to hear the Senator.

Mr. REED. Whenever a judge has his mind made up I am willing to take the decision, whether it is my way or the other way.

The PRESIDING OFFICER. The decisions, so far as the Chair is advised, are both ways upon this question. It seems to the present occupant of the chair that the decision of Vice President Sherman, referred to by the Senator from Colorado [Mr. SHAFROTH], is not only tenable but is consistent with the object of legislative business and parliamentary procedure. Perhaps, technically, discussion is not "business"; but it does seem to the Chair that if there is any prolonged debate a time must arrive when discussion and debate beyond that period would be and ought to be denominated "business." Perhaps this view may be considered illogical, but it seems to the occupant of the chair to be the only fair and feasible view to take consistent with proper legislative action. Therefore the Chair sustains the point of order, but will add that if the present occupant of the chair should be occupying this position, and after reasonable debate, the point of no quorum should then be made, a different ruling would be made.

Mr. REED. Mr. President, I now move that the Senate adjourn. Let us see if we can not have some business intervene.

The PRESIDING OFFICER. The Senator from Missouri moves that the Senate adjourn. [Putting the question.] The noes have it, and the Senate declines to adjourn.

Mr. REED. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Hollis	McNary	Smith, Ga.
Borah	James	Nelson	Smith, Md.
Broussard	Johnson, Cal.	New	Smith, Mich.
Chamberlain	Johnson, S. Dak.	Newlands	Smoot
Culberson	Jones, N. Mex.	Norris	Sterling
Cummins	Jones, Wash.	Overman	Thomas
Curtis	Kellogg	Owen	Thompson
Dillingham	Kendrick	Page	Trammell
Fletcher	Kenyon	Pittman	Underwood
France	King	Poindexter	Vardaman
Frelinghuysen	Knox	Pomerene	Wadsworth
Gore	La Follette	Reed	Weeks
Gronna	McCumber	Saulsbury	Williams
Hardwick	McKellar	Shafroth	Wolcott
Hitchcock	McLean	Sheppard	

Mr. THOMPSON. I desire to announce the absence of the Senator from Arkansas [Mr. ROBINSON], the Senator from Rhode Island [Mr. GERRY], the Senator from Montana [Mr. WALSH], and the Senator from California [Mr. PHELAN] on official business.

The PRESIDING OFFICER. Fifty-nine Senators having answered to their names, a quorum is present.

Mr. HARDWICK. Mr. President, before I resume the main thread of my argument I wish to advert once more to the contention made by the Senator from Nevada [Mr. NEWLANDS] with reference to the amendment of the Senator from Nebraska [Mr. NORRIS]. Of course, if no provision were made in this measure for just and adequate compensation to the railroads

for whatever service they are required to perform, then I would feel some sympathy for the Senator's argument, but I find that the measure reported by the Senator from Nevada contains this provision on that point. I now quote:

For the transportation of persons or property in carrying out the orders and directions of the President the lawfully established tariffs shall apply unless otherwise fixed by law; for the transportation of troops in carrying out the orders and directions of the President reasonable rates shall be fixed by the Interstate Commerce Commission; and if the transportation be for the Government of the United States, it shall be paid for currently or monthly by the Secretary of the Treasury out of any funds not otherwise appropriated.

Then follows the proviso, which the Senator from Nebraska moves to amend:

Provided, That if by reason of giving preference or priority in transportation under an order or direction authorized hereunder, or by reason of disarrangement of traffic caused by giving such preference or priority—

Then such carrier is to receive additional compensation therefor. The principle is precisely the same whether you apply it to a shipper or to a railroad. The railroad is required for the good of the country, in order to promote its defense, to render certain service to the Government under the terms of the bill, or to render certain service; I eliminate for the moment the idea that the service is to be confined exclusively to that rendered for the Government. It is to be paid for that service what that service is reasonably worth under tariffs already fixed by law, except in one case, for the transportation of troops, which the Interstate Commerce Commission, the same tribunal, shall fix. So we have already provided reasonable and adequate and just compensation for the railroads for whatever service they are called upon to perform under this bill.

Mr. NEWLANDS. But does not the Senator draw a distinction between the mere case of service and the practical control of its operation within a limited area by the President of the United States? Does not the Senator realize that perhaps these priorities of shipments might involve the condemnation of one railroad to the carriage of bulky products, carrying a very low rate, and turn over to another system of railroads costly and condensed traffic paying a high rate? Each character of traffic would pay the established rate fixed by the Interstate Commerce Commission, and those rates would be the value of the service, and yet by reason of the dedication of one road to the cheap traffic and the dedication of the other to the costly and remunerative traffic one railroad would be very much injured and the other would be very much benefited.

Now, is not that a taking of the property just to the extent that the use of this instrumentality owned by a quasi public corporation is taken by the Government? Is it not just as much a taking of property in a qualified use of the property as would be the taking over of the entire property, as is done in the case of the English railroads? As I understand it, in our case we have taken over the partial use and control of the railroads. In England the Government takes over the entire use. The Senator must contend, it seems to me, that the partial use can not be paid for, even though he admits that the entire use must be paid for, in order to support his contention.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Colorado?

Mr. HARDWICK. I yield.

Mr. THOMAS. I have been informed by high authority and the best authority that this compensation in the pending bill was neither asked nor desired by the railroad companies themselves. Upon the assumption that that information is correct why should not the clause which provides for compensation be stricken from the bill?

Mr. HARDWICK. Of course I will answer that a little later. I can not undertake to answer it now. I think it ought to be stricken out.

In reply to the Senator from Nevada, it may be true that if you force a railroad to carry a class of freight which pays a very low rate it will lose something in the operation, but it is also equally just as true that if you go to a great factory with an output or any producer, whether he is a farmer or a millman, a factory owner or a miner, and say to him "We deny to you all transportation, you can not ship your products, you can not get the cars for it," you also damage him a great deal, and you may just as well take his property as to do that. You do take his property if you deny him access to the markets. You do confiscate his values if you do not give him any means of getting his property to market. It is just as much confiscation in one case as it is in the other. It is just as wrong in one case as it is in the other. If that is to be done and compensation is to be given in any case it ought to be given in all cases.

But if this bill is based on the theory of public defense and public necessity it simply sacrifices in both cases the demand of both classes to the public interest, in the common defense of our country.

Mr. REED. Mr. President——

Mr. HARDWICK. I yield to the Senator from Missouri.

Mr. REED. The Senator from Nevada suggested that a railroad might be ordered to haul a very low class of freight for which the compensation is low and to continue to do that, and to exclude high-class freight, which does damage it, and therefore it ought to be compensated. The Senator has not, however, suggested to us what would happen if the railroads received high-class freight and were relieved from carrying any low-class freight. Does he propose, then, to require the railroad to make some sort of compensation to the Government? Would it not be in the illustration the Senator has used the proper thing for this all-powerful board to equalize the matter between the two companies?

Mr. HARDWICK. Yes; to make up to the railroads that have not the best of it.

Mr. NEWLANDS. There is a provision in the bill providing that—

The President is authorized, whenever in his judgment such action is necessary to the public security and defense, to direct that certain kinds of traffic or particular shipments, as may be determined by him, shall have preference or priority in transportation by any common carriers by railroad or water, under such arrangements, rules, and regulations as he may prescribe.

I think under that power the inequalities in traffic prescribed by the Government could be adjusted, and the object of that clause is to secure that adjustment. I think the contention of the Senator might be better directed to the amendment of the clause than to the denial of a just compensation for an enforced use by the Government of a particular railway.

Mr. HARDWICK. Of course, if you equalize it among the railroads there will be no injustice done. If that power means what you suggest, as you say, if it is not broad enough and adequate enough, it ought to be made so, and then there is no excuse whatever for your last proviso, because the first proviso ought to equalize it all. If there is any small loss which can not be equalized, I say to the Senator in all fairness to the shippers of this country and to the masses of the people, it is no more sacrifice than thousands of business men will be called upon to make upon the altar of the country, and there is no reason on earth that I can think of that you should feed one with one spoon and the other with another spoon.

Mr. NEWLANDS. I am very free to say that I am not willing that the railroads should be called upon to make any sacrifice that is going to impair their efficiency as instrumentalities in the conduct of the war. The only source of their strength is the money they receive from the public for the use of their property. The only money upon which you can rely for the proper equipment of the roads and the proper development of the roads and the proper maintenance of the roads is the money that comes from the public, and that can be secured only under rates established by law.

Now, we propose, not in the interest of the railroads, but in the interest of the Government, to practically, in a qualified degree at least, seize and take over these railroads, and it is of higher importance to the Government that the funds secured by the railroads for their maintenance and development should be maintained than it is for the railroads themselves.

So I speak for the highest interest of the country, engaged in war, relying upon efficient transportation as the chief instrumentality for the conduct of the war, to see to it that that instrumentality is perfectly administered and is put to no concern regarding the funds that are necessary for the increase of its equipment and the maintenance of its efficiency. It is not a time for a niggardly policy with reference to a great public use which has become a war use itself.

Mr. HARDWICK. The Senator from Nevada is not stronger in that faith than I am. His record in this body will not establish it; and no man's record in this body has been fairer and juster to the railroads than mine. I have tried to do justice to them, and I have never undertaken to arouse feeling against them or to treat them unjustly. But I am not willing to give them an undue favoritism about this matter, and that is exactly what this means, in my judgment. In the first place, you say you are going to distribute it between the railroads, and if some of them get a higher compensation than they otherwise would, then we will equalize it between the roads themselves. You say you are going to pay them a just and adequate compensation for the service rendered the Government, and, lastly, you propose to pay them for consequential, remote, and indirect damages which may occur to their business generally. I do not agree with the last proposition. It is damnum absque injuria—they ought to

make that much sacrifice, indirect and remote as it is, an infinitesimal sacrifice, according to the Senator's own contention about this distribution and equalizing process, just as you take away from business men whose facilities you absolutely take away from them, whose property values you absolutely destroy, whose mines and whose factories you may absolutely close. I say it is no more right or just to ask them to undergo those sort of damages as a result of the measure than it is to ask it of the railroads when they are already paid what their service is worth and provision is made that the loss shall be equalized among them.

Mr. PAGE. Mr. President——

Mr. HARDWICK. I yield to the Senator.

Mr. PAGE. I have recently received a letter from a man in southwestern Oregon who is interested in fruit. He said that the whole fruit industry, and that is a large industry in southwestern Oregon, is likely to be imperiled and that they all face bankruptcy in case of such legislation; that the railroads can not and will not furnish cars in which to ship their fruit when the fruit is ready for market. It occurs to me that the damages, if paid to the owners of the fruit because they can not ship their fruit, would almost bankrupt the Government.

Mr. HARDWICK. It would; and I say that we can not pay any such damages as these.

Mr. PAGE. In what way do you suggest that they be given protection?

Mr. HARDWICK. There is no way. This is one of the losses that is incident to war, and I can not see why we should confer any such power on the President, except for absolute war purposes.

Mr. PAGE. I can see in my own State where there might be some discrimination which would be injurious, but it would be of minor importance compared with the injury to an industry like the fruit industry, which is almost the sole industry in southwestern Oregon, where I had the pleasure to spend a couple of weeks two years ago. Everything there is in fruit. I think it is a great mistake on their part; I think they ought to have diversified industries; but they have gone into fruit to such an extent that I fear they will actually face bankruptcy if they are not taken care of at the proper time.

Mr. HARDWICK. I quite agree with the Senator, and that is one of the unfortunate things; and when citizens are required to give up their all, by hundreds of thousands and by millions, there is no excuse for taking money out of the Public Treasury for remote, indirect, inconsequential, and necessarily very small damages to the carriers themselves. That is exactly what I have been trying to say. Now, let us see. I come next, Mr. President, to what I regard as the most important question in this bill. Section 2 provides:

> That during the continuance of the war in which the United States is now engaged the President is authorized, whenever in his judgment such action is necessary to the public security and defense, to direct that certain kinds of traffic or particular shipments, as may be determined by him, shall have preference or priority in transportation by any common carriers by railroad or water, under such arrangements, rules, and regulations as he may prescribe.

I propose, and I send to the desk to be read for information, the following amendment on this subject, and to that amendment, when the Secretary shall have read it, I propose to address myself.

The PRESIDING OFFICER. The Secretary will read the amendment proposed.

The SECRETARY. On page 2, line 17, strike out the words "to the public security and defense" and in lieu thereof insert "to prompt movement of the military and naval forces of the United States and all supplies therefor, and all material necessary to be used in the manufacture of arms, munitions, and equipment therefor."

Mr. HARDWICK. Mr. President, as was pointed out here yesterday almost all the provisions of this amendment are already existing law. I would not offer it at all but for the last clause it contains. The law as it stands to-day, beginning with the Hepburn bill of 1906, has been amended twice since, I think very recently, once on the occasion of the Mexican emergency, when we were engaged in transporting troops and supplies to the Mexican border——

Mr. CUMMINS. The last amendment only had reference to a case where an embargo had been laid upon shipments.

Mr. HARDWICK. That may be. I presume the Senator is right about that, but in substance the existing law provides that the President shall have all the power specified in this bill, and even more, the power to seize and operate railroads themselves, any part of them or all of them, to move the military and naval forces of the United States, and also, I think, the language is "all war material." Am I right?

Mr. CUMMINS. Yes.

Mr. HARDWICK. That is the substance of it, "and all war material." Certainly that means the same thing as all munitions and all supplies and all material therefor. But I have added to that these words, "and all material necessary to be used in the manufacture of arms, munitions, or equipment therefor," because we might have to have various forms and various kinds of raw material promptly sent to manufacturing points or assembled there to make arms and equipment before they became military supplies or war equipment. I am perfectly willing to include that if it is not already included in the law, and that is the reason why I shall offer the amendment in that form.

Mr. CUMMINS. Mr. President——

Mr. HARDWICK. I yield to the Senator.

Mr. CUMMINS. Will the Senator from Georgia turn his attention to a particular instance I will now give him and give the Senate his opinion as to the effect of his amendment upon the instance? I will say in the beginning that if there is any way of limiting the power so that it will accomplish the purpose that we all have in view I shall not be found opposing the limitation. But here is one situation. I do not know whether this has been suggested before or not, but it comes to my mind. Take the western coast of Oregon and Washington. There are certain seasons of the year there in which it is necessary to take care of the fish that are caught during the open season. It is desirable certainly that all foods of that kind which we can possibly preserve shall be preserved. It must be preserved at a certain time or the opportunity is gone for that year.

Suppose that in order to can all the fish that may be caught in those waters it shall be found necessary that the tin for the cans or the cans themselves after being manufactured shall be sent to the Pacific coast, and that they can not be sent there without giving shipments of that character priority over other shipments of ordinary merchandise. Does the Senator from Georgia believe that his amendment would clothe the President with the power to give priority in shipments to the tin cans for the purpose of carrying cars for the fish in that quarter of the country?

Mr. HARDWICK. Not unless they are part of the supplies for military purposes.

Mr. CUMMINS. I assume that a part of them will be necessary for supplies for the military forces.

Mr. HARDWICK. I think to that extent the President would have the power, under the amendment I suggest.

Mr. CUMMINS. A part of them would not be. It is assumed that we will be short of food, and the Governments with which we are in a sense allied, and that public necessity requires that all that is available shall be gathered and preserved for use. I have been afraid that the language employed by the Senator from Georgia would not embrace an instance of that kind, and there are many other instances of a somewhat similar character that might be given. For the successful defense of the country—assuming that this war is one of defense, and I am bound to assume that under the present conditions—I am afraid that the amendment proposed by the Senator from Georgia would not enable the Government to care for that contingency.

Mr. HARDWICK. Mr. President, the Senator from Iowa is quite right in that assumption, except in so far as it is related to the military defense of this country. I want to say to the Senator that I think this continual assumption in high places, in the departments, and in Congress of food famine is one of the reasons that prices have soared. I do not assume any such thing. Why should we assume it? The more we assume it the higher prices will rise; the oftener we state it the more they will soar.

Mr. CUMMINS. This is not a question of prices so much as it is a question of supply.

Mr. HARDWICK. I understand. The Senator assumes that there is going to be all sorts of famine in this country. I do not believe it; I do not assume it; I have no reason to assume it or to believe it.

Mr. CUMMINS. Mr. President, I do not think the Senator from Georgia yet quite catches my point. If we were looking only for a supply of food for our own country, I think I would agree with the Senator from Georgia that there is no imminent danger of scarcity; but apparently we have undertaken to feed not only our own country but to feed other countries, whose maintenance is necessary to our own maintenance. It is hard for me to discuss it, and I shall not during the course of the argument of the Senator from Georgia, but I think we must take some things for granted. We must assume that this is a war of defense; we must assume that we intend to prosecute it vigorously; and we must assume that the continued strength of Great Britain and France and Italy and other countries with which we are in a sense allied is necessary to the defense

that we are making. That being true, the Senator from Georgia must see that, if we are to pursue the lines which have been laid down for this great struggle, we must conserve all the foodstuffs which we are able to collect.

Mr. HARDWICK.—Mr. President, the theoretical question of the Senator from Iowa, which is put with his usual ingenuity and strength, brings me right to the point that I am gald to arrive at.

We are constantly asked to be granting all sorts of powers, because a whole lot of people are assuming a whole lot of things. I tell you right now, so far as I am concerned, I hesitate, I halt at granting these unusual and arbitrary powers because of some fancied danger, because of some assumption. The liberties of this country, the freedom of its people, the perpetuity of its institutions are just about as important as some of these assumptions and some of these fancied necessities.

Mr. CUMMINS. May I ask the Senator another question?

Mr. HARDWICK. I yield to the Senator.

Mr. CUMMINS. The Senator from Georgia recognizes, of course, that the railway companies can not promptly transport everything that is offered for transportation.

Mr. HARDWICK. I do not know whether that is true or not.

Mr. CUMMINS. If there is any one thing which is well established in this country now, it is that the transportation facilities of the United States are inadequate for the transaction of the business of the United States.

Mr. HARDWICK. Let me ask the Senator a question right there. The Senator spoke of the fish industry. Have they not been getting the cars that were necessary without our conferring this power on anybody?

Mr. CUMMINS. Mr. President, it was purely a matter of private concern.

Mr. HARDWICK. I understand; but they got the cars, did they not, which the Senator thinks they needed?

Mr. CUMMINS. Not to take care of the quantity of food which it is now thought necessary shall be prepared. I assume that that is true; and that assumption I am willing to make, because I have carried on rather a careful investigation upon that subject, and I have heard a great deal of testimony upon it before the various committees of which I am a member. I know it is true that the railway carriers of the country are not provided to promptly move all the freight tendered for transportation. Some part of it must be delayed; some part of it must remain with the manufacturers or with the producers until, in the course of affairs, the railway companies are able to take it. What part of it shall remain untransported? Who shall determine what freight shall first be moved? As it is now, the railway companies, within certain limits, determine that matter. This bill is to transfer that authority from the railway companies or carriers to the Government. I should like to see the power limited to those cases which are fairly related to the war now in progress; but I believe that, upon the assumption which I have made, that the cans in which they preserve the fish that is caught upon the western border ought to have preference over other kinds of commodities which are not so essential to the public welfare.

Mr. HARDWICK. What about cans for Georgia peaches?

Mr. CUMMINS. But I want to see a bill that is broad enough, at least, to embrace just such things as I have indicated, and the Senator from Georgia very frankly says that his amendment would not reach the instance. Therefore I can not, with my view of the matter, accept an amendment of that kind. I do not pretend to say that there may not be language better fitted and better adapted to convey the power than the language we have employed.

Mr. HARDWICK. Let me interrupt the Senator for a minute now.

Mr. CUMMINS. But it must be broad and it must give some discretion.

Mr. HARDWICK. I want to get the benefit of the Senator's views, and I can get it better by addressing him a question while he is speaking in my time. Does the Senator believe that under the words "necessary to the public security and defense" you can do all those things which he has described?

Mr. CUMMINS. Undoubtedly the President could do the things I have suggested.

Mr. HARDWICK. Could he do all the things? The Senator has suggested a good many different things.

Mr. CUMMINS. I have suggested but one instance.

Mr. HARDWICK. I think when the Senator reads the RECORD he will see that he has suggested almost half a dozen.

Mr. CUMMINS. What are they? It may be I have forgotten them.

Mr. HARDWICK. Well, the President was to have the power to decide exactly what shipments should have precedence and priority all over the country in every line of business and industry.

Mr. CUMMINS. Only so far as they are connected with the war in which we are engaged.

Mr. HARDWICK. But the Senator——

Mr. CUMMINS. But it may be that that war for its successful prosecution will demand something more than the mere feeding of our troops or the mere manufacture of munitions of war.

Mr. HARDWICK. Of course, the Senator understands that there are some people in this country who believe——

Mr. VARDAMAN. Will the Senator from Georgia permit me to ask the Senator from Iowa a question?

Mr. HARDWICK. Not now; but I will yield in just a moment.

Mr. VARDAMAN. I merely wanted to ask——

Mr. HARDWICK. Very well; I will yield.

Mr. VARDAMAN. Mr. President, I realize the necessity for transporting with dispatch the things which are needful for the men in the Army. Take the example given by the Senator from Iowa. If the railroads over which these cans are to be carried should be compelled to carry them, or rather if they should be compelled to take them in the place of freight which would pay a larger rate to the railroads, then, under the terms of the bill, which the Senator from Iowa is defending, the Government would be required to pay the railroad the difference. In other words, the railroad must be allowed to make a profit regardless of the character of the service rendered or what other people may lose.

Mr. CUMMINS. I do not put that interpretation upon the language of the bill.

Mr. VARDAMAN. But I understood the Senator from Georgia to point out that as one of the objections. It is proposed to protect the interest of the railroads where they suffer a loss, but in the case of a private individual who has suffered loss from the same cause his interest is not to be protected at all. I do not see any justice in that policy.

Mr. CUMMINS. That relates to an entirely different subject.

Mr. VARDAMAN. But it is one of the questions which the Senator from Georgia is now discussing, and one of the objections he is making to this bill.

Mr. CUMMINS. The Senator from Georgia is now discussing the breadth of the power which we propose to give to the President with respect to priority in transportation. There is no connection whatever between that point and the further inquiry respecting the propriety of compensating railway companies for any injury they may suffer.

Personally I believe that there ought to be compensation just to this extent, namely, so that the carriers shall be able to maintain their property and to transact the public business with which they are charged. It would be a sad thing for the country if, on account of the Government intervention, the railways should stop running, and neither Government business or any other business should be transacted upon them. The only purpose of the clause to which the Senator from Mississippi now refers is to make it reasonably sure that the railways will continue to run. That being sure, I have no concern about any other compensation.

Mr. HARDWICK. Mr. President, of course under the latitude of power laid down by the Senator from Iowa this bill means anything and everything. We shall have conferred a power that has no limits whatever. It depends entirely on how it is exercised, on how it is administered.

I would be perfectly willing, if this country were invaded, if the necessities of the hour required it, to do that or anything else that was necessary to save it or to serve it; but there is no such necessity as that, in my opinion, resting on this country, except in the judgment of a few enthusiasts, people who have been carried away by the excitement of the moment.

I hesitate to vote to confer any such vague, indefinite, limitless powers over the business and industries of this country, without any present excuse or justification. There are men in this country who will tell you that although we are 3,000 miles away from the scene of this war, we are to constitute and set up a despotism in this Republic in order to prosecute the war more vigorously and more successfully. I deny it, and I repudiate it. A free people, who love liberty, would be a great deal more apt to fight the despot than they would to fight the foreign foe. We can never lead a great, free-born, liberty-loving people like the American people into a great contest unless we pay some regard to their liberties and rights at home, and to their feelings and sentiments on these great questions. They will fight with more spirit, with more courage, with more love for the flag, for the country, and for the Government if we treat them like free-born, liberty-inheriting people, and if we do

not substitute, in a moment of excitement, in the rush of events, what amounts to a despotism for the fairest and freest Government that ever existed on this earth.

When it comes to the prosecution of the war itself, to the conduct of campaigns, to the management of military and naval affairs, and everything directly and immediately connected with those great subjects, I am content that the powers of the President shall be as despotic as any one of these men wish them to be; but when it comes to the civic affairs of this country, to the fundamental rights of its people, to their everyday lives, I say that instead of making for efficiency in this war which we have undertaken we are ruining it if we undertake carelessly to grant away the rights and liberties of our people, as they have been taught to believe they inherited them and possessed them.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER (Mr. WOLCOTT in the chair). Does the Senator from Georgia yield to the Senator from Iowa?

Mr. HARDWICK. I do.

Mr. CUMMINS. Whenever I trespass too often upon the time of the Senator from Georgia, I know that he will find a correction for my temerity; but I should like to have Senators remember that he is assuming a false basis for the distribution of property through the country by way of the common-carrier service. He has a vague notion about some right of the people that is being invaded. I doubt whether that is so.

Now, allow me to give this illustration: Suppose we had no war; that we were living in absolutely normal times and under ordinary conditions. Two carloads of freight are tendered to a railway company. One car is full of pianos and another is full of coal destined to a community that is freezing to death for want of fuel, which carload shall go first, assuming that the railway company is not in a position to transport both of them promptly? The Senator from Georgia assumes that the owner or shipper of the carload of pianos is entitled to equality, so far as time of transportation is concerned, with the owner or the shipper of the carload of coal.

Mr. HARDWICK. That is the law at present.

Mr. CUMMINS. I thought that was the view of the Senator from Georgia, and I beg that he will consider another view. In my judgment, it is not so. In my judgment, the carload of coal is entitled to priority, and the railway company that would refuse to give priority under those circumstances to the carload of coal would be guilty of undue discrimination and would forfeit its obligation to the public. The railway company is performing a public duty always; and that duty must be measured by the circumstances of each individual transaction, and in the case I have instanced the railway company that would allow a community to suffer for fuel in order that it might transport first a carload of pianos to the same community would disregard not only the law but its highest moral obligations.

Now, what we are doing in this bill is simply to declare what a public duty is. We are trying to establish the proposition that it is the public duty of a common carrier to transport first those things which are essential to the life of the country; and the only thing that we are changing really is to take away from the common carrier the right to determine what its public duty is and to transfer that determination to some function of the Government.

Mr. NORRIS. Mr. President, may I ask the Senator from Iowa a question?

Mr. HARDWICK. I yield to the Senator from Nebraska for that purpose.

Mr. NORRIS. Are we not in this bill giving to the President the power to say to the railroads, "You shall ship the pianos first and the coal next"?

Mr. CUMMINS. We are.

Mr. NORRIS. Under the law as it stands now the railroad company would not have a right to do that, and the President would have no authority to order that done.

Mr. CUMMINS. Precisely; but if the railway company should choose to transport the pianos first there is no remedy and the people would freeze.

Mr. NORRIS. But I understand the Senator to say that it is to-day, in his judgment, the duty of the railroad company under the law to send the coal first.

Mr. CUMMINS. I said it would be its highest moral duty to transport the coal first; and I believe it would be its duty under the interstate commerce law, as well.

Mr. NORRIS. I agree with the Senator.

Mr. CUMMINS. But if the Senator from Nebraska would rather trust the railways to exercise that discretion and determine what is the public duty, than to trust some officer of the Government to do it, that is a mere matter of judgment.

Mr. NORRIS. No; the Senator——

Mr. CUMMINS. I would rather trust an officer of the Government, because I believe that the officer would have no other motive except to serve the public.

Mr. NORRIS. The Senator must not put me in that attitude. He states that under the law now, in the case he puts, it is the duty of the railroad company to carry the coal first; and I have simply asked him the question whether we were not changing that law and giving the President power to instruct the railroads to carry the pianos first?

Mr. CUMMINS. We are not changing the law at all in that respect; but we are making it sure that the judgment of the Government, instead of the judgment of the carrier, shall prevail. The only matter that has troubled me on that score for a moment has been that I feel great sympathy with the reluctance of Senators—and I have the same reluctance—to extend this power so that it will embrace all the transactions of commerce and all the industries of the Nation. I should like to find some way in which it could be limited, and at the same time make sure that whatever is necessary for the public defense will come within the power which we grant. I have already pointed out that the amendment offered by the Senator from Georgia, upon his own frank, candid, statement would not include one instance which I think ought to be within the power that we grant to the Government.

Mr. REED. Mr. President——

Mr. HARDWICK. I yield to the Senator from Missouri.

Mr. REED. The particular instance to which the Senator is now referring, as I understand, is the case of the fish that are to be caught and the cans that are to be hauled to the western coast to preserve those fish; and the Senator thinks there ought to be a preference in favor of those cans.

Mr. CUMMINS. A preference over some other things.

Mr. REED. Now, let me call attention to the fact that the Senator has employed the term that "we must either take the judgment of the Government or the judgment of the railroads"; but let us state that a little more accurately: We must under this bill take the mandate of some one man probably, or the decision of the railway company, which is always made up in view of shippers' protests and demands, and is also regulated by competitive conditions and a thousand other things. But I want to say to the Senator—and I beg pardon for being so long about it—that we would have here substituted the judgment of one man for the right of the shipper, under the law of the land, to have his day in court; for the right of the shipper, for the trial of the very question as to whether the carrier had violated its obligation to him and had been guilty of an unreasonable act, and that one man will be empowered to prefer the cans for the fish; but in doing that it is very likely, indeed, that he will disrupt business more than all the fish that he will save will be worth, and that has already happened under the system we now have.

Mr. HARDWICK. Now, Mr. President, I am going to resume and try to conclude in a very few minutes.

The trouble about the last observation of the Senator from Iowa [Mr. CUMMINS] is that, unless the greatest railroad men in this country are wrong about it, the Senator has not stated the law correctly on this question. Mr. Willard says—and I quote him with absolute certainty that I am not mistaken as to what he contends; and I think he is right—that whenever shipments are tendered to the railway company now, they must be accepted in the order in which they are tendered, in the order of time—first come first served. I think that is the law of the land; he thinks so; and he has run one of the great railroad systems of this country for a number of years. The fact that that is the law of the land is one of his arguments for this bill. If he believed the law of the land was as the Senator from Iowa contends, I apprehend, from the statements he made to me, he would not be so anxious about this bill. But the trouble is that Mr. Willard's idea of a cure and mine differ radically. I agree with the Senator from Iowa that the man with the coal to go to people who are freezing, with the bread to go to people who are starving, ought to have preference over all unnecessary shipments, or shipments that could be made to wait, like pianos or organs; but I would want to fix that by law. If that is to be the policy of this Republic, I would want to have it established by statutes that Congress shall write; I would want to have rights fixed and penalties provided that can be vindicated in the courts of the country, and I would not want a discretion either to do right or not to do right lodged with any man or any set of men in all the limits of this country.

The policy we first adopted—and I think the Senator from Iowa advocated it; I know I did, because I did not apprehend any such situation as we have now, and the Senator doubtless

advocated it for the same reason—was that it ought to be, "first come first served." That is what we fixed in the days of the Hepburn bill, when these questions were debated by great men in both Houses of what was then the American Congress. If that situation has changed, I am sorry, and if it is necessary to give preference to bread, to coal, and to other necessary things, over pianos and luxuries of all sorts, I am willing to do it; but when we do it we ought to do it by law, not by Executive order. I want to establish the forms of procedure, the precise and definite rights of the people, and not leave it locked in the breast of any one man, subject to his whims and ideas, or to his mistake, if he should happen to make a mistake—and we can not always count on having good men in office——

Mr. POMERENE. Mr. President——

Mr. HARDWICK. I yield to the Senator from Ohio.

Mr. POMERENE. Does the Senator feel that that should be done now, during a period of war? In other words, when it comes to a question of declaring preferential shipments for the purpose of successfully prosecuting the war, does the Senator think that the Congress could be wise enough to declare what shippers should be preferred at all periods of the war and under all circumstances; or are we not required to leave that to an executive because we are not able to anticipate what may be the exigencies of the situation as it may arise from time to time?

Mr. HARDWICK. If the Senator has finished his question, it will afford me great pleasure to answer it.

If the Senator advocates this proposition as a war measure, I am with him; but if he advocates all this readjustment for reasons utterly disconnected with this war, in the interest of people who are suffering for reasons a thousand miles away from this war, then I say it is no war measure, and Congress ought to work it out in the manner and terms I have suggested.

Mr. POMERENE. But, Mr. President, under this bill, if it should become a law, the President is only authorized to declare these preferential shipments when it is necessary for the public safety or the public defense.

Mr. HARDWICK. Oh, yes, Mr. President. I do not care to yield any further on that line, because I have been over that fully, and the Senator did not honor me with his presence.

Mr. POMERENE. I heard it in part.

Mr. HARDWICK. But the terms you have employed are so elastic that they can be stretched a thousand miles and include the most arbitrary and despotic powers that any sovereign ever exercised over his subjects. If you want to confer power of this character define it, lay it down precisely, lay it down exactly. You can do it. Do not give him any general despotic control over business, however benevolent that despotism may be.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER (Mr. KING in the chair). Does the Senator from Georgia further yield to the Senator from Ohio?

Mr. HARDWICK. I do.

Mr. POMERENE. The Senator says I can do it. I can not do it, but I should be glad to have the Senator do it if it can be done.

Mr. HARDWICK. I have proposed to the Senator the remedy. Of course, if he can not accept it, that is not my fault, and I would not dare say it was his. Define it; let it be for the war, for the military and naval forces of the United States, for supplies, equipment, munitions, and for all materials that are to be used in the manufacture or creation of those supplies or munitions; but do not leave the terms of precision, of definition, of exactness.

Mr. BRADY. Will not the Senator include foodstuffs?

Mr. HARDWICK. Yes, sir; they are included, but I would not include a general control over the problem of transporting foodstuffs where it was wholly unrelated to the prosecution of the war.

Now, let us see. Yesterday I witnessed the most remarkable spectacle that I have witnessed recently in the Senate, and the most remarkable thing about it is that the chief actor in it was a distinguished gentleman for whom I have the warmest personal regard, whose reputation as a lawyer and as a statesman is second to that of hardly anyone in all this land. The distinguished junior Senator from Pennsylvania [Mr. KNOX] made this observation:

> Mr. President, I can not imagine how one can read this bill and fail to observe that that is the standard; for is it not perfectly evident that shipments of materials which are necessary for the public security and defense are war supplies?

Now, he was precise and definite. He said this bill meant war supplies and nothing but war supplies, and he supported it and advocated it in a speech of some vigor, although remarkable inconsistency, because it meant nothing but war supplies. When it was pointed out to him that the people who had framed this bill, or some of their assistants, thought it meant just what the Senator from Iowa has said, and that it ought to mean something more than war supplies, the Senator then took this turn. I pointed out to him, for instance, that the words of the bill were very elastic words; that "the public defense and security" could readily be construed to mean more than war supplies.

Mr. BRADY. The Senator is quoting now from the junior Senator from Pennsylvania [Mr. KNOX]?

Mr. HARDWICK. From the junior Senator from Pennsylvania. The Senator said this:

> Yes, Mr. President, the words are elastic, and necessarily so. War is a status whose breadth the human imagination can scarcely measure, and filled with infinite possibilities; and the discretion and the authority and the power to meet those infinite possibilities must be lodged in the Commander in Chief of the Army and Navy, else we fight to no purpose.

In other words, he first advocated this measure because he said it meant nothing on God's earth but war supplies, and then, when it was pointed out to him that it might mean a thousand things more than war supplies, he said: "Well, after all, no matter what it means, I am for this bill."

The Senator is one of the ablest Members of this body, a lawyer whose learning and ability do credit to the Senate, and association with him is a source of personal pleasure always to me; but I regret to see one of our great lawyers take so inconsistent a position. He ought to advocate this thing one way or the other, but certainly not both ways. He ought to support it, if he is going to support it at all, with his eyes open. He ought not to support it in one breath because it means nothing on earth, he says, but war supplies, and in the next breath say that no matter what it means, he is for it anyhow, because it is necessary to make it broad.

The Senator from Missouri [Mr. REED] suggests in an aside—which I am glad to have him do—that the only possible explanation of that is that in the mind of the Senator from Pennsylvania "war supplies" mean everything. Possibly that is the real explanation, and that is the trouble about all this business. "War supplies" mean everything with some of these people. They think that because we are in war, the time has come to overturn the established customs and the established thoughts and the established principles of our people and build up a government along different lines, fundamentally and radically different, to a point of benevolent despotism, to preside over business and to regulate, with kindly and fostering hand, the productive and industrial activities of this country on farm, in factory, in mine, everywhere throughout the Republic.

I dissent. I dispute it. It is not the American idea. We will accomplish nothing by such a course as that, and our people tire of us, as they ought to, if we keep it up. They will finally say to us, when our labors are concluded and we go home to the bosoms of our constituencies: "We sent you there our representatives, the representatives of a Republic. You come back the satellites of an empire. We sent you there to aid and assist, and to correct and differ with, whenever necessary, a President of the United States, who is the servant of the American people. You come back to us the underlings of a President who has become the master of the American people."

Ah, Mr. President, you can do it if you like. The issue is being rapidly drawn. Every Senator is just as responsible to his constituency as I am to mine. But if you do it, at every step of the journey, at every stage of the progress, in the name of American liberty—and surely we ought to preserve that, even while we are crushing Prussian autocracy—I intend to protest. At every step of the proceedings, where such powers as these are unnecessarily lodged in the hands of autocratic, despotic, executive officers, I intend to protest, both by word and by vote. Then the responsibility, when the record is made up, can rest with the people who make that record, and the constituency of everyone of us can weigh us and judge us according to the deeds we have done in the body.

Mr. CUMMINS. Mr. President, three objections, as I understand the argument, have been urged to the bill under consideration.

First, it is asserted—and this is the burden of the argument made by the junior Senator from Georgia [Mr. HARDWICK]—that the words "public safety and national defense" are too broad and will confer upon the President power to disturb and to disarrange the general business of the country. I think I suggested yesterday that it is possible that the President could abuse the authority proposed to be granted to him in this bill. I recognize that, Mr. President, and I have sought diligently, although up to this time in vain, to discover some word or some phrase that would give the President the power which I believe

he ought to have that would be less susceptible of abuse or that would be less discretionary than the words employed in the bill.

It is very plain to me that the substitute offered by the Senator from Georgia would not accomplish the purpose which those who have considered this bill in committee had in view. The words proposed by the Senator from Georgia are not broader, essentially, than the authority already in the statute.

The Senator from Georgia asked me yesterday whether I thought the language in the statute of 1906—that is, the amendment to the interstate-commerce law of that year—was narrower or broader than the language of his proposed amendment. I was unable at the moment to answer him with any assurance that I could stand upon the opinion then expressed. Reflection, however, has convinced me that there is no substantial difference between the words "war material" and the words used by the Senator from Georgia.

Mr. HARDWICK. Mr. President, will the Senator yield to me for a moment?

Mr. CUMMINS. I yield to the Senator from Georgia.

Mr. HARDWICK. I had this in mind: If there is a difference at all, it is in the concluding sentence of the amendment, which includes the raw materials which are to be made into war material also. I should like to invite the Senator's attention to that, and see what he thinks of that.

Mr. CUMMINS. I think the words "war material" are broad enough to include the raw products that are manufactured into arms and munitions of war, and broad enough, of course, to include the food which may be necessary for the Army and the Navy.

I can not, therefore, agree to the view so persuasively presented by my distinguished friend across the aisle. I do not want the President to use the power for any other purposes than the prosecution of the war. I think that he would be violating in spirit the statute which we propose to pass if he did order preference or priority in transportation of any commodity that was not so directly and so closely connected with the prosecution or defense which we are maintaining that the success of our efforts depended in a measure upon the priority or preference which he might establish. I do not know any way in which we can give the authority which I think is necessary without vesting in him or in some other tribunal a discretion that may be abused. We have already given to various functionaries of the Government powers that may be abused. We have already given to them authority that may be so exercised that in its exercise free institutions disappear; and this is less flagrant, at any rate, than many things that we have already done.

If we had ample facilities for the transportation of all the products of the people, not only those which relate to the war but those which relate to peace as well, this legislation would be entirely unnecessary.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Missouri?

Mr. CUMMINS. I do.

Mr. REED. I am wondering why a little attention is not being given to securing those facilities. I am wondering why the railroads are not required to get the freight cars and I am wondering, if the railroads have not the funds with which to get the freight cars, why it is not proposed to supply the money to them in some way. It seems to me a singular thing that we should sit here declaring that there are not enough facilities to carry the freight of the people of the country, so that a tremendous disadvantage, if not disaster, rests upon the country, and that the only way in which we are trying to remedy that is to provide that some board or some tribunal or some man shall say who shall suffer, instead of going to the root of the evil and providing that there shall be enough freight cars to carry everybody's freight.

Mr. CUMMINS. Mr. President, the Senator from Missouri will understand that in giving a moment to the subject of his question, I am not speaking for the railways. I have no authority, and no desire, to speak for the railways.

Mr. REED. Oh, the Senator knows that I did not mean that.

Mr. CUMMINS. But I think I can tell the Senator and the Senate why the situation has been forced upon us.

In 1914, throughout the entire year, the railway companies of this country had more facilities than they could possibly use. I have seen it recorded, I have heard it stated, that during that year practically one-third of the equipment of the railway companies was not in use. It was not in use simply because the business of the country was at a low ebb and the transportation was not required. It would be utterly unreasonable to demand that the railway companies should provide themselves with an equipment to meet a particular emergency, or the peak, if you please, of the load of transportation, knowing that during a large part of the time the equipment would lie idle upon the sidetracks or the engines would stand unused in the roundhouses.

We passed into 1915, and business began to develop. It grew with leaps and bounds, and the railway companies since that time have added to their equipment in every way in which they could; but the manufactories of the country have been so active in other directions, there have been such overwhelming and apparently imperious demands upon their facilities, that they have been unable to furnish the railway companies of the country either with cars or with engines. I say to the Senator from Missouri now that, as I understand, the railway companies have an abundance of money with which to buy equipment; they desire to add to their equipment; but under the abnormal conditions which have prevailed in the last two years they have been unable to meet the situation as it has developed.

Mr. KELLOGG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Minnesota?

Mr. CUMMINS. I yield to the Senator from Minnesota.

Mr. KELLOGG. To emphasize what the Senator from Iowa said, I should like to call his attention to figures with which he is familiar—that on April 1 there were under order for construction 2,209 engines and 104,917 cars.

Mr. REED. When were they ordered?

Mr. KELLOGG. They were ordered since November 1 last; and between November 1 and next November 1 it is estimated that there will be constructed 150,000 cars. I will further state that I am informed on the best of authority, as the Senator from Iowa says, that they are constructing every car and every engine that they can get shops to construct them in.

Mr. REED. Mr. President, will the Senator yield to me a moment further?

The PRESIDING OFFICER. Does the Senator from Iowa further yield to the Senator from Missouri?

Mr. CUMMINS. I do.

Mr. REED. Those figures demonstrate two things: First, that the railroads did not begin ordering their cars as soon as they should, for we all know there has been a shortage of cars far back of the date when these orders were made. They demonstrate another thing, however; and that is that in all probability this tremendous shortage is about to be greatly relieved in the near future. Just in proportion as that is true, the necessity for this character of legislation disappears.

Mr. CUMMINS. The latter remark of the Senator from Missouri is entirely accurate. If the business of this country falls off during the next year, there will be no need either of the additional equipment or of the exercise of this authority, because when everything that may be tendered to the carrier can be transported with promptitude, preference need be given to no particular shipments or no class of traffic. The Senator from Missouri, however, possibly does the railway companies some injustice in assuming that November, 1916, was the beginning of their attempt to secure additional equipment. I have been informed that they have been endeavoring to secure it ever since the business of 1915 developed to the point where existing facilities were inadequate to handle it.

Mr. REED. Mr. President, if the Senator will pardon me, I only followed the statement made by the Senator from Minnesota [Mr. KELLOGG] that that was when the orders were given. Now, let me remark that I happen to know in some instances that the railroads did not attempt to secure equipment when the shortage first appeared; but to how many roads that applies, I am not able to say.

I happen to know, however, that it applies to two great western systems. No real attempt was made until within very recent months. However, that is a condition that exists. I have no desire to say it for the purpose of reflecting on the railroad managements. I do not want to discourage anybody or attack anybody; but I do say that the real way to solve this difficulty is to get the cars, and that I would rather vote for a bill that would commandeer plants and build freight cars and get at the bottom of this evil than I would to vote for a bill that proposed to allow the evil to exist and then undertook to distribute its consequences through the mandate of some individual.

Mr. CUMMINS. Mr. President, I think no just complaint can be made of the railway companies, because they did not immediately after the revival of business in the first part of the year 1915 begin to add substantially to their facilities, for they could not say with any confidence that the revival would be lasting or the volume of business would attain the growth we have seen. However that may be, the present situation is as

I have stated. If the Government were to commandeer the plants that are fitted to produce these additional facilities they must at the same time forbid those plants from doing the other things which are just as essential to the conduct of the war as the additional facilities in transportation; and, moreover, if it were done it would be months and months before any considerable number of cars or any considerable number of engines could be manufactured and ready for use.

Mr. HARDWICK. Mr. President——

Mr. CUMMINS. I yield to the Senator.

Mr. HARDWICK. If the Senator will allow me, I ask unanimous consent that the amendment I have offered be printed and considered as pending, so that copies will be available for Senators.

The PRESIDING OFFICER. Without objection it will be so ordered.

Mr. CUMMINS. Returning to the point from which I was diverted, and it is a point made by the junior Senator from Georgia [Mr. HARDWICK], and practically the only one, I think that an honest, faithful man could not and would not construe the words "public safety and national defense" so that there would be embraced to any considerable degree the general commerce of the United States. There are certain things that we all know must be accomplished in order that the war may be carried on vigorously and successfully. There may be a difference of opinion with regard to the necessity of some things, but within fair bounds we know the things that we must have and we know the things that we must do in order to maintain our armed forces in the strength which they must have in order to fight successfully, and we know what we must do for the Government and the people of the Governments which are at war with Germany in order that they may stand with us successfully in the great fight now in progress.

Any honest man, any patriot, any intelligent citizen of the country will be able, as instance after instance occurs, to draw the line that can not be drawn abstractly in definition or debate. I am willing, and I believe the Senate ought to be willing, to intrust the power to the President to direct preference of shipments in those things which in his judgment are essential to the public safety and the national defense.

The second objection made to the bill is the one which was dwelt upon more emphatically than any other by the senior Senator from Georgia [Mr. SMITH]. He is opposed to granting the power to the President because he understands and knows the President can not personally investigate and decide in each particular case in which priority is thought to be necessary, and that he must therefore delegate the power in substance to some other person. I agree with the view of the Senator from Georgia to this extent, that this power must be and will be exercised in substance by some one other than the President. There may be rare instances in which he will undertake to become familiar enough with the subject to enter the order, but they will be rare, and, generally speaking, it must be done through some board or by some person whom he commissions for that purpose.

Here again I say that if my own individual judgment were consulted, instead of giving this power to the President alone, I would authorize the President to appoint a board of transportation, to be composed of not more than three persons, to be appointed by the Chief Executive, upon the advice and consent of the Senate. Such arrangement would be more compatible with my views of the best conduct of the affair than the investment of the power in the hands of a single man; and if such a proposal is made, so far as I am concerned, I shall not oppose it. But that was not the view of the committee, and in order to reach some result I agreed with the committee that the power should be given the President, and I have faith enough in him and in his patriotism to be willing to incur the hazard of the exercise of that power.

The third objection is the one that has been urged mainly by the Senator from Missouri [Mr. REED] and it is involved in the amendment proposed by the Senator from Nebraska [Mr. NORRIS], namely, that persons who are injured by giving priority or preference in shipments should have compensation. I say frankly that if an amendment of that character is added to the bill I would be opposed to its passage. It is not possible, Senators, to contemplate with composure at least the avalanche of claims that would overcome the Government if every person who believes that he might be injured by the preference or priority order of the President should have the opportunity or the right to recover the damages which he may suffer. There is a very great difference between giving the railroads compensation for the service they render and giving the right to the people generally to recover damages, because the railways must serve the Government first and individuals second.

Mr. NORRIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Nebraska?

Mr. CUMMINS. I yield.

Mr. NORRIS. The statement the Senator has made I think is hardly fair when he speaks of giving the railroads compensation. There is not any contention on the part of anybody that they should not have compensation, but the contention is that they should not have damages. They do get compensation if they carry out the order of the President, but on the question of getting damages by reason of the order they are on a parallel I think with anyone else damaged by the same identical order.

Mr. CUMMINS. I think the reason is very different. The railways must exist. They must have money enough to pay their employees and to operate their property. Without them the Government would be absolutely helpless in the conduct of the war.

Mr. NORRIS. Does not the Senator think that the compensation they will get for the service they perform under the order of the President would be ample for the service performed?

Mr. CUMMINS. If so they could recover no damages whatsoever.

Mr. NORRIS. They might even be damaged and collect under this bill.

Mr. CUMMINS. I must differ from the Senator from Nebraska in that construction. I do not think they could recover any damages whatever if the compensation was adequate for the service rendered.

Mr. NORRIS. If the Senator will permit me, I do not want to interrupt him unnecessarily, but if they were performing a service under the order of the President by which they were carrying freight and were paid the regular rate established for that kind of freight, but it was not as great as carrying some other kind of freight which under the order they might be deprived of doing, would they not suffer some loss in that case? I understand that that is the damage which they would recover under the bill.

Mr. CUMMINS. It would be because the rate was not adequate. If the Government, for instance, orders the railway company to transport nothing but stone and the established rate upon stone is so low that in and of itself it does not furnish sufficient compensation, under the bill the railway company would be entitled, I think, to recover damages which might be occasioned through the order of priority. But it would be entirely because the compensation for the service was not adequate. If the railway company, as an original proposition, were to transport nothing but stone, and if the Interstate Commerce Commission had been fixing a rate for that service, it would have fixed an adequate rate, but the rates that have been established by the Interstate Commerce Commission have not been established upon that basis, nor have the rates filed by the railway company been filed upon that basis. They have been established and they have been filed upon the hypothesis that there would be a general average of compensation. I regard the provision in the bill as the substantial equivalent of authorizing the Interstate Commerce Commission in advance or at any time to fix an adequate rate for the service rendered by the carrier.

I may say here that in view of the difference of opinion that has developed in regard to the meaning of this part of the bill—and I know the Senator from Nebraska is absolutely sincere about it—I intend before we have finished the consideration of the bill to make that clear. I intend to offer an amendment, if I adhere to my present view, that will make the compensation purely a matter of rate, purely a compensation for the service rendered. I suppose that is what the bill means as it is; but if that is not the interpretation to be put upon it, then, so far as I am concerned, I think the bill ought to be amended so that the Interstate Commerce Commission shall be authorized to fix a reasonable rate or a reasonable charge for the service rendered by the carrier in view of the order made by the Government establishing priority or preference.

Mr. NORRIS. Does it not have that power now, I ask the Senator?

Mr. CUMMINS. I think it might have that power, although I am not sure whether the Interstate Commerce Commission could now take into account the circumstances of a railway company having been ordered by a superior power to transact its business in a particular way.

Mr. FLETCHER. Mr. President——

Mr. CUMMINS. I yield to the Senator from Florida.

Mr. FLETCHER. I should like to get the Senator's view upon a situation which is directly in line with what he is discussing. I present a concrete case, because that seems to me to be the plainest way of setting it forth. Suppose a shipper having perishable products like tomatoes, cucumbers, lettuce,

or celery offers those products at the station for shipment. I believe the rule of damage is quite well established now that it is the duty of the carrier to take that fruit and transport it promptly. If he fails to do it the shipper has the right of action against him for the value of the product that perishes on the platform at the station.

Suppose such a shipper tenders freight of that character to the carrier and the carrier does not take it and it is lost, will the carrier present a claim to the Government in case the carrier should contend that the reason why he did not take it was because it did not have the cars and the reason why it did not have the cars was because the cars had been ordered somewhere else by the President? Would the carrier be able to carry that damage to the Government and have the Government reimburse it for the amount of damage? Would it be liable to the shipper or would the loss fall entirely upon the shipper? In other words, would it be a complete defense to an action by the shipper that the Government had ordered the cars away, and therefore the loss followed and nobody was liable and the shipper must lose, or would the shipper be able to hold the carrier and the carrier then be able to hold the Government in an instance of that kind?

Mr. CUMMINS. Mr. President, to the first suggestion, there is nothing in the bill which gives the President the right to order empty cars from one part of the country to another, as I understand it. I reply further in this way. If the railway company was carrying freight under the order of the President less remunerative than the perishable article to which the Senator has referred, and if under the order of the President the less-remunerative commodities carried by the Government order were unduly large as compared with the ordinary traffic of the company, I believe the railroad company would be entitled to compensation or damages under the bill as it is. It would be entitled to compensation or damages solely because the Government had required it to do a certain kind of business, and the rates which had been established for that business done under those circumstances were not remunerative rates and the damages would be measured by the inadequacy of the charges for the service which had been ordered by the Government. To that extent under the bill I have no doubt the railway company could recover damages. That is the reason why the whole subject is referred in the first instance to the Interstate Commerce Commission rather than to the judgment of a court.

I say further that under the bill I have no doubt the shipper would have no remedy whatever against either the carrier or the Government. But I do not think he ought to have any remedy. I hope I will not be thought heartless about it, but it is one of the injuries or inconveniences of the war which all must suffer to a degree. The railway company, as I said at a time when the Senator from Florida was not here, is a public instrumentality. It is a public highway. The carrier is discharging a public function. In normal times it has certain public duties to perform and it is given certain compensation for the performance of that duty. War intervenes and there is another standard of public duty. It is still a highway; it is still a public instrumentality; but instead of being a public duty to transport such articles that may be brought to it for transportation in the order, generally speaking although not always, in which they are brought—instead of being compelled by public duty to give perishable articles the preference, as I know they are given the preference and should be—another standard of duty is imposed. It must carry those things that are necessary to the life of the country. It must carry the things that will enable our Army and Navy to accomplish successfully their purpose, and for so doing no citizen has a right to complain. No matter how much the citizen may be injured in the performance of this higher and greater duty he must bear it just as he must bear a thousand other impositions and burdens that have grown out of the war and that will grow out of the struggle in the future.

Mr. FLETCHER. I quite agree with the Senator, and my questions are not intended to indicate opposition to this measure at all. I think his position is entirely sound. I understood the Senator to say, though, in the case I used that the bill would not permit the ordering of the cars from one place to another or withdrawing cars. I should like to ask the Senator if he does not think the power given in section 2 to give preference or priority of transportation in certain instances is not equivalent to the power to order cars hither and yon as may be desired? Is not that the effect of that power?

Mr. CUMMINS. It may be that it ought to give the President that power. I do not think, however, the language we have employed does give the President the right or authority to require a given carrier to send its cars to a given point for the purpose of receiving freight. It does not seem to me that that is quite within the phrase "shall have authority to direct preference or priority in any kind of traffic or in any particular shipment." I think it means this, that a railroad with certain facilities of transportation, with certain freight that comes to it for transportation, is bound to transport first, if so ordered, the commodities which the President may regard as essential to the public safety and defense.

Mr. REED. Mr. President, I suggest to the Senator that if the language of the bill is not sufficient to give the power to order a railroad company to get its cars to a place necessary to move particular freight, then the bill would have very little potency, because it would be defeated by a railroad company simply not carrying cars to that point, or it might be defeated in that way. However, I would suggest to the Senator that under the common law it is the duty of a railway company when freight is tendered to get its cars there if they can be gotten there by reasonable exertion, so that if a railroad company had cars at a given point and if the Government acting within its constitutional right should order it to carry a certain class of freight it would be incumbent upon the road to use all reasonable diligence in order to move those cars to the necessary point to load the freight.

Mr. CUMMINS. I think the Senator from Missouri has analyzed it correctly. I believe it would be the duty of the railroad company under general law to so handle its transportation equipment as to be able to render the service which it is required to render, and we do not need any authority of that kind given in this bill directly to the President. I still maintain, however, that the bill really confers upon the President only the authority to direct the order in which shipments shall occur and the kinds of traffic that shall be first transported.

Mr. President, in the very nature of things the carriers have some discretion in the transportation of freight. The junior Senator from Georgia [Mr. HARDWICK] I think is in error when he asserts that the interstate-commerce law specifically provides that freight shall be carried in the order in which it is tendered to or received by the carrier. I do not remember any such provision in the law, and it would be utterly unworkable and impracticable if it is found in the law. The provision of the law which governs that particular phase of the subject is the command that the railway company shall not discriminate between persons, between localities, between kinds of traffic; that is to say, that it shall not unduly discriminate. The word "unduly" runs through the entire interstate-commerce act when the word "discrimination" is used. As I suggested in my interruption of the Senator from Georgia, the word "unduly" gives to the carrier a certain latitude. There is an opportunity for a certain discretion, and the carriers always have exercised a discretion in the transportation of commodities.

As I said a few moments ago, that was the standard in time of peace under normal conditions. We have passed into war and we are about to establish another standard and declare that the transportation which is essential to the public defense shall have priority. That is all there is to it. The railroad company must obey it. It is one of the regulations of commerce, even if it were not a war power which we may properly establish.

Mr. NORRIS. Mr. President, it seems to me, if the Senator is right in his statement that all this bill does is to establish the priority of freight for the national defense, it is nothing more than what is already in the statutes, as I understand. Does not the Senator, however, think the bill goes further than that?

Mr. CUMMINS. If the Senator from Nebraska is referring to the act of 1906, giving the President power to order priority of war material, I think the bill goes further. I think there are some things that are necessary to be moved for the public safety and for the national defense that can not be classified as war material. That is the respect in which I think the bill is broader than the statute.

Mr. NORRIS. I thought the Senator ought to modify his prior statement, and I think he really does so now.

Mr. CUMMINS. Possibly I was not exactly accurate.

Mr. NORRIS. If the bill did not mean anything more than what the Senator stated, I am not sure that I would be opposed to it.

Mr. CUMMINS. But I have attempted to say that the railway companies in time of peace have a certain discretion in regard to the movement of freight. They must not unduly discriminate; but they perform their public duty when they comply with the law. Now, however, there is another duty upon them; a duty that rises higher, that is more imperative, more essential than any that has ever been put upon them in the tranquillity of commerce. They will be required, if this bill becomes a law, to give priority to things not that commerce

requires, not that profit making requires, but to things that the life of the Nation, the successful conduct of the war, require shall have priority.

Mr. President, I am heartily in favor of the measure. I shall be quite willing, as I said a few moments ago, to see the provision with regard to the ascertainment of damages suffered by the railroad companies so modified that it shall be simply a requirement that the Interstate Commerce Commission shall fix an adequate charge for the service which the Government requires; but when that is done it seems to me that there ought not to be any apprehension with respect to the abuse of this power.

The railway companies are now public property, and we are simply regulating them. The Interstate Commerce Commission regulates them now; it regulates them under the law, it is true; but what is the law? That they must not charge more than a reasonable rate. What is more vague or indefinite than the standard that we have set up for application by the Interstate Commerce Commission? That commission declares what a "reasonable rate" is. We have said that the railroads must serve all alike—communities and persons; that is, that they must not unduly discriminate; but in the last resort who is to determine what "undue discrimination" is? The Interstate Commerce Commission determines that.

We shall now give to another body of the Government, as we have a right to do, the authority to declare what shall be first carried over the railroads, if there are inadequate facilities for the prompt carriage of everything tendered to the carriers. To whom will you give the power? I am willing to give it to a board under a statement or rule just as definite as we have now prescribed for the Interstate Commerce Commission. I am willing to declare that it shall be the duty of common carriers to give preference or priority to those shipments which involve the public safety or the national defense. I am willing to create a board, the members of which shall be confirmed by the Senate, to prescribe what commodities shall receive preference in order to insure the public safety and the national defense. When it is so done—I do not think it is necessary. If it were a permanent law I would insist upon it, but this proposed law is limited to the war now in progress——

Mr. HARDWICK. Mr. President——

The PRESIDING OFFICER (Mr. NEW in the chair). Does the Senator from Iowa yield to the Senator from Georgia?

Mr. CUMMINS. I yield.

Mr. HARDWICK. I have listened with a great deal of interest to the Senator's observations; but, of course, what he has just stated is not the bill that we have now before the Senate. Is the Senator proposing to offer modifications to this bill that will accomplish the purposes of which he speaks?

Mr. CUMMINS. I am not; but I am simply saying, in substance, that those who are opposing the bill upon some of these grounds are hypercritical, and that I do not regard what is suggested as essential. I am not now speaking about the difference between the Senator's amendment and the words "public safety and defense." I am speaking about the difference between the administration of this law, if the power be given to the President to be exercised through persons to be designated by him, and its administration through a board to be appointed by the President and confirmed by the Senate.

Mr. HARDWICK. The Senator thinks that would be an improvement, does he not, because the power to regulate commerce resides in the Congress, and we ought to have something to do with the creation and control of the agency that exercises our power?

Mr. CUMMINS. The Senator from Georgia very well knows that every bill when it comes from a committee is the result of some struggle——

Mr. HARDWICK. And some compromise.

Mr. CUMMINS. And some compromise. I think, though, that I can say without lessening in the least my support of the measure that as an original proposition I would have preferred a board appointed by the President and confirmed by the Senate.

Mr. HARDWICK. If the Senator from Iowa has worked out some amendment along that line, is he not at liberty to offer it to the Senate and to take the sense of the Senate upon it?

Mr. CUMMINS. I do not regard that as very material. That is simply one of the preferences which a Senator may have, but it does not reach down to the heart of the matter.

Mr. HARDWICK. I agree with the Senator about that.

Mr. CUMMINS. The Senator from Georgia has the heart of the thing in hand, namely, whether the President's power or the Government's power shall be limited to the supply of our armed forces, or whether it shall be broad enough to take in anything that is involved in the public safety and the national defense. I regard that as the only real objection made to the bill, and that depends entirely on one's view of the subject matter.

Mr. HARDWICK. Mr. President, if the Senator will pardon me again, of course a somewhat different mental attitude must be taken toward this measure when Senators are apprised in advance that the very people who intend to administer it have such a conception of it that they virtually include the words "public welfare" in the language employed, and therefore mean to do just whatever they please.

Mr. CUMMINS. The Senator from Georgia, I believe, is mistaken with regard to that phase of it.

Mr. HARDWICK. I do not think so.

Mr. CUMMINS. He is thinking about a committee of the railways; he is thinking also probably of one member of the commission advisory to the Council of National Defense.

Mr. HARDWICK. But, if the Senator will pardon me, I am thinking of the very man who will be charged, in all human probability, with the administration of this law.

Mr. CUMMINS. This bill does not contemplate that any of those gentlemen shall determine anything that is provided for in the bill. I do not know—for I am not in the confidence of the President; and, of course, even if I were, I should not disclose in advance—whom he intends to appoint; but, if I were the President, after this bill had passed, I should select one or more of the wisest and strongest men in the United States who were wholly dissociated from financial or pecuniary interests in the business of transportation. It would be to such a body of men that I would commit the authority to declare what shipments should have priority over other shipments. I hope that the Chief Executive will pursue that course. In this great emergency, when it is necessary to mobilize and to gather together all the forces of American life, when he is touching one of the most important and vital things that is embraced in the activities of our great people, why should he not select an entirely impartial, independent, wise, and strong man to administer this power? I think he will.

Mr. HARDWICK. Mr. President, will the Senator from Iowa yield to me?

Mr. CUMMINS. I yield.

Mr. HARDWICK. I want to say to the Senator that I am not saying that the President will not do so or that he has not done so; but if we may credit what the press of the country generally reports and what I believe to be true, the gentleman who will administer these powers is already virtually selected. He is Mr. Willard—I am going to call names—of the Baltimore & Ohio Railroad Co. I want to say as to Mr. Willard—and I think I ought to say it in view of some things I have said about him—that I have only a very short personal acquaintance with him; I do not think I ever had but one interview with him in my life, and that was of his own seeking, and not mine; but by reputation I have known him for a long time. I think he is a strong, clean, able man; honest, fair, and just, according to his standard. He is a railroad man. I do not know whether that would fit him, according to the Senator's definition, to exercise these powers or not. Of course, he has been at the head of one of the great railroad systems of the country; and, unless I utterly misapprehend Mr. Willard's attitude toward this question, Mr. Willard thinks if we pass this bill as the Senator's committee has reported it, that omnipotent power over all American transportation will be lodged in the President and his associates, and that body—the President and his associates—proposes to exercise it, I think, pretty fully and completely. That is my belief; and I try to be fair.

Mr. CUMMINS. Mr. President, I must not be understood as suggesting that Mr. Willard is not the proper person to administer this law. Though I have a slight acquaintance with him I esteem him very highly. I believe he is a high-minded, patriotic citizen, who, in this emergency, wants to do all that he can do for the public welfare.

Mr. HARDWICK. The Senator, of course, understands me as fully agreeing with him about that. I am not criticizing anyone. I am merely discussing questions and policies.

Mr. CUMMINS. Yes. I do not agree, however, that Mr. Willard's view of this statute is of any considerable importance.

Mr. HARDWICK. But the Senator must understand, Mr. President, that, if it is a matter of construction, the President and the people who administer this law for him are going to administer it according to his ideas; and if we have put in words here so broad, as the Senator has admitted many times during this debate, as to authorize almost anything, they will be pretty apt to do almost anything, will they not?

Mr. CUMMINS. I ought not to discuss the question of whom the President will appoint. It is not right; it is not fair to him.

I must assume that he will select the man who is best qualified for the task, and I ought not to inject my description of the man who is best qualified for it.

Mr. HARDWICK. If the Senator will permit me, I utterly dissent from that statement, because it involves a reflection on the propriety of my own suggestion. I made the suggestion because it is a matter of common knowledge that this gentleman is already, by the President's selection indirectly, at the head of the transportation committee of the advisory board of the Council of National Defense, and furthermore the newspapers of the country have generally hailed him, without any contradiction from any source, as the unofficial minister of transportation, even at the present moment. I do not think the Senate ought to be restricted by any hidebound rules of propriety in the discussion of what may happen when we see that already it has almost happened. Why should we shut our eyes and hesitate to speak frankly about matters of common knowledge?

Mr. CUMMINS. I think there is a very great difference between the position that Mr. Willard now occupies and the position the one who is selected under this bill to administer it will occupy.

Mr. HARDWICK. Oh, yes; as to power.

Mr. CUMMINS. At the present moment Mr. Willard is a member of a purely advisory commission, and is even once removed from that; he is adviser to an advisory commission, and I have no doubt that he is doing all he can do to bring order out of chaos; but when the President comes to select a representative who will for him determine the very grave and vital questions which are committed to him by this bill, whether he will think it wise to select one to exercise the power who is directly interested in the execution of the power I do not know, and I would not venture to predict. However, we are in a sad state if we can not give to the President a necessary power, fearing that he may not select the best instrument to carry that power into effect. The argument against the bestowal of the power is entirely legitimate, but if it be a legitimate power we must assume that it will be wisely exercised.

Mr. HARDWICK. Yes, Mr. President, I agree with the Senator about that. I am not at all finding fault with Mr. Willard; he may be the very best railroad man in this country, so far as I know; he may be, and I think he is, a high-minded patriot, but I know he has a certain view of this question from a conference that I had with him. I do not think it is doing violence to anybody to assume that the probability is that he is likely to be intrusted with this power when he has already been hailed, without any contradiction from official circles, as the railroad man of the administration, called from the administration of a great property by the Government to advise and cooperate with it in respect to railroad matters; in fact, it looks to me like we are just recognizing the common sense of the situation when we look a fact in the face instead of hedging proprieties around it.

I am not objecting at all to Mr. Willard. I do know that his conceptions of these powers and how they will be exercised, unless I woefully misunderstood him, are entirely and radically different from those of the Senator from Iowa, and the Senator from Iowa, I think, will make a sad mistake if he votes for this bill and supports it on the theory that, after it is enacted into law, it will be administered according to his argument here to-day.

Mr. CUMMINS. Mr. President, I have had a struggle more than once with my own conscience about voting for a law which would authorize the President to appoint officers of the Government; that is, a struggle between my consciousness that such a law was needed and my fear that the proper men would not be appointed to administer it. I have given that subject a good deal of reflection and I finally came to the conclusion—and I acted upon the conclusion—that if the law were needed my suspicion that the proper person would not or might not be selected to carry the law into effect ought not to prevail. The one is permanent, the other is temporary. I do not know—I have had no reason to believe—that the President would or would not appoint Mr. Willard. I would not care if he did. I think Mr. Willard would probably discharge the duties of this office so impartially that he would lean backward.

Mr. HARDWICK. I am inclined to think that, too, except that we know—does the Senator mind my interrupting him?

Mr. CUMMINS. Oh, no; but I have not quite finished the statement.

Mr. HARDWICK. I beg the Senator's pardon.

Mr. CUMMINS. The Senator from Georgia is afraid of such an appointment, I take it, because he thinks that the person he has in mind has already given a construction to the words "public security and national defense."

Mr. HARDWICK. Yes, sir; that is the idea.

Mr. CUMMINS. I have had some very slight conferences with the gentleman in question, and I did not find, although it did not come up directly, the conflict between his view of the meaning of those words and my view of their meaning that the Senator from Georgia believes to exist. However, Mr. President, it is probably vain and futile to discuss the bill from that standpoint.

Mr. HARDWICK. Mr. President, just one suggestion, and I want to make it just now, if the Senator has concluded his statement.

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Georgia?

Mr. CUMMINS. The Senator desires to ask me a question?

Mr. HARDWICK. Yes.

Mr. CUMMINS. Very well.

Mr. HARDWICK. The rule which the Senator has just announced, that a man ought not to vote against a good law because he fears it may be badly administered, is a sound one; but when the law itself is nearly all left to administrative discretion, and when the lawmakers employ such language that what the law means depends almost entirely as to how the administrators look at it when they come to construe and administer it, the rule is a little different, I submit.

Mr. CUMMINS. It would be if I were to grant the premise. I do not think this language, however, is so susceptible of misconstruction as does the Senator from Georgia. I agree that there is discretion enough left with the President to be capable of abuse. I agree that some things could be brought within its terms that are not properly within its terms; but I fear that it will be impossible to employ language that will cover the instances that ought to be covered that will not leave the opportunity which the Senator from Georgia so much fears.

Mr. NORRIS. Mr. President, before the Senator takes his seat may I ask him a question?

Mr. CUMMINS. Certainly.

Mr. NORRIS. The Senator stated in his address that the pending amendment, if agreed to, would result in such a vast and bewildering number of claims, direct and indirect, for damages that we would be overwhelmed. In making that statement I presume the Senator assumes—and I want to ask him if he does not so assume—that to bring about that condition it would be necessary that the President, in carrying out the power conferred upon him under the bill, should practically exercise the authority of control over all the railroads of the country—an assumption that, while it is possible to indulge, I think the Senator would concede that no President would ever exercise the power unless it were absolutely necessary, and then only to the degree that it was necessary; so that it could in all probability never happen that all the railroads of the country, or any large percentage of the railroads of the country, would be involved in the orders that might, under the law, be made by the President?

Mr. CUMMINS. I think that one instance on each railroad would bring about the avalanche of claims to which I have referred. As it is now, the shippers feel that they have suffered very great injury because the railroad companies have not been able to furnish them with the facilities for transportation.

Mr. NORRIS. That would be no ground for damages.

Mr. CUMMINS. Just a moment. The very moment that the President should interfere with any railroad and order priority for any kind of traffic or any shipment every delay after that time would be imputed by the commercial public to the priority ordered by the President.

Mr. NORRIS. Does the Senator believe that——

Mr. CUMMINS. I do.

Mr. NORRIS. I had not quite finished my question. Does the Senator believe that that imputation would be well founded?

Mr. CUMMINS. No; not in every case.

Mr. NORRIS. Not in many cases, would it?

Mr. CUMMINS. It would depend entirely upon the amount of traffic that was embraced in the President's order.

Mr. NORRIS. Oh, yes; but does not the Senator concede that, while the thing is possible just as he states, as a matter of fact there would be comparatively few claims that would be valid, and that it would soon be ascertained, even if it were not to begin with, that the filing of these useless claims in multitudinous numbers would only make an expense which the men who filed them would have to pay?

Mr. CUMMINS. I would hope so; but I think the Senator from Nebraska must agree with me that if we open that door——

Mr. NORRIS. I do agree with the Senator that it is a very wide door.

Mr. CUMMINS. That we would be compelled to meet claims from every quarter, and claims that are essentially just; that is to say, where the shipper or the consignee, whoever may have

an interest in the shipment, has really suffered an injury or damage. They are suffering that every day now. Vast injuries are being suffered all over the United States on account of the insufficiency of our railway facilities.

Mr. NORRIS. But the fact that a great many are suffering damages now, and that a large number of them are entitled to the damages now, would not increase the damages for which the Government would be liable in any sense in case the amendment were agreed to.

Mr. CUMMINS. Of course it would; that is the very basis of it. If the railway companies had ample and adequate facilities, no injury would occur. The fact that there is an inadequacy or a shortage of facilities is the beginning. Now, when the Government steps in and directs the order of shipment, every delay after that time will be imputed to the order of the President in establishing priority or preference in other traffic.

Mr. NORRIS. Every person would know that every delay that occurred after that time would not follow as a result of the President's order; and if people thought it did, they would soon find out, when they commenced to file claims, that it did not. The ordinary individual would know better.

Mr. CUMMINS. Well, some of the injuries would follow——

Mr. NORRIS. Some injuries would follow.

Mr. CUMMINS. Would follow the preference, while others would not; but the work of sifting out the true claims from the false ones to me seems enormous.

Mr. NORRIS. It would be difficult in a good many instances.

Mr. VARDAMAN. Mr. President——

Mr. NORRIS. I want to ask the Senator from Iowa a further question, if I may be permitted. Would not the same theory that it would bring about a great many claims if this order were exercised, a great many of them fictitious, apply only in a less degree, I admit, if the law were enacted just as the bill stands? Is it not true that all claims of this kind would arise and would be presented to the various railway companies of the country, and that if the order were in any wise general they would be multitudinous in number?

Mr. CUMMINS. I think there would be a great many.

Mr. NORRIS. As a matter of fact, is it not true that there is only a difference in number?

Mr. CUMMINS. The Senator from Nebraska does not agree with me about that, but there is a difference in principle.

Mr. NORRIS. I understand the Senator, of course.

Mr. CUMMINS. But there would also be a great difference in number. The railway companies would not have as many claims——

Mr. NORRIS. Not as many; no.

Mr. CUMMINS. Because, in the first place, they would consolidate all their claims; that is, each railroad would consolidate its claims.

Mr. NORRIS. The Senator's objection to the amendment is not made up in any degree, is it, because it would increase the number of claims? In other words, we ought not to vote down an amendment simply because it is going to be difficult to enforce.

Mr. CUMMINS. No; that is not my objection. My objection to it is that practically every shipper in the United States would have a claim against the United States, and that, generally speaking, it would be an unjust claim and ought not to be paid. That is my chief objection to it.

Mr. NORRIS. The Senator assumes, when he says that every shipper in the United States would have a claim, that the President's order would cover every railroad in the United States.

Mr. CUMMINS. Why, certainly it would cover every railroad; there is not any doubt about that—none whatever.

Mr. NORRIS. Does the Senator believe that if we passed this bill the President would make an order that would practically take control of every railroad in the United States?

Mr. CUMMINS. No, not at all; but if the President should make an order of preference for potatoes, it would probably apply to every railroad in the country; if he should make an order for preference for tin cans, it would be on every railroad that leads to a certain point, but it would embrace a very small part of the traffic.

Mr. NORRIS. It would not be on any railroad that did not have any tin cans, and that was not located where it was going to use any tin cans.

Mr. CUMMINS. Is the Senator trying to prove that this bill requires possession of all the railroads of the country by the President, and all the traffic of the country?

Mr. NORRIS. No, indeed. I was trying to see whether the Senator meant what he said.

Mr. CUMMINS. I did mean it.

Mr. NORRIS. Then it must follow, it seems to me, that the passage of the bill as it is now would mean a claim upon the part of every railroad in the United States for every commodity that was ever included in any order of the President. Would not that be logical?

Mr. CUMMINS. Mr. President, I can not assert that; but I think that before this war is over an order of priority for some commodity will be made upon practically every railroad in the United States; but that commodity might be a small proportion of the entire business of the railway, and it might not result in any delay whatsoever.

Mr. NORRIS. Now let me ask the Senator this question: If the adoption of the amendment means that there would be a claim for damages from every shipper in the United States against the Government, then if the bill is passed permitting the railroad to make its claim, under the same logic does it not follow that there would be a claim upon the part of every railroad in the United States for damages for every article that was ever placed on a preferred list?

Mr. CUMMINS. If the railroad is damaged by the order, there would be.

Mr. NORRIS. But why does not the Senator make the same application to the shipper?

Mr. CUMMINS. Simply because the same rule would not apply at all. The shipper would make his claim because the shipment was delayed, was not delivered promptly, or was not carried promptly.

Mr. NORRIS. His claim would not be allowed if it was not valid.

Mr. CUMMINS. Just a moment; wait until I answer the Senator. The railway company, if it made its claim, would have to make it upon the basis that the compensation for the service rendered was not sufficient, and therefore it had been damaged.

Mr. NORRIS. But that is not the way the railroad company would make its claim.

Mr. VARDAMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Husting	McNary	Sheppard
Brady	James	Martin	Smith, Ga.
Broussard	Johnson, Cal.	Myers	Smith, Md.
Chamberlain	Johnson, S. Dak.	New	Smith, Mich.
Culberson	Jones, Wash.	Newlands	Smith, S. C.
Cummins	Kellogg	Norris	Sterling
Curtis	Kendrick	Overman	Swanson
Fletcher	Kenyon	Page	Thompson
France	King	Pittman	Trammell
Frelinghuysen	Kirby	Poindexter	Vardaman
Gerry	Knox	Pomerene	Wadsworth
Gore	Lewis	Reed	Walsh
Hardwick	McKellar	Saulsbury	Warren
Hollis	McLean	Shafroth	

Mr. HUSTING. I desire to announce that the Senator from California [Mr. PHELAN] is detained on official business.

Mr. LEWIS. Mr. President, announcing my own presence, I wish to announce the absence of the senior Senator from Arkansas [Mr. ROBINSON], who is detained on official business.

The PRESIDING OFFICER. Fifty-five Senators have answered to their names. There is a quorum present.

Mr. NEWLANDS. Mr. President, I wish to ask unanimous consent that when the session closes to-day the Senate take a recess until 12 o'clock to-morrow, and that we come to a vote on the bill and its amendments at 4 o'clock to-morrow.

Mr. REED. I object to the latter part of the request. I do not object to a recess.

Mr. NEWLANDS. Then, I move that when the session closes to-day we take a recess until 12 o'clock to-morrow.

Mr. SHAFROTH. Mr. President, let me suggest to the Senator from Nevada, instead of fixing a time when a vote can be had, that after to-morrow, say, at 1 or 2 o'clock, we have a 10-minute rule for the discussion, without any limit as to the time when the vote shall be taken. I believe probably that would be satisfactory, when it would not be satisfactory to fix an absolute time for taking the vote.

Mr. NEWLANDS. Mr. President, I will ask unanimous consent for that.

Mr. REED. I object, Mr. President. I will say to the Senator that I am not trying to be obstructive. At the proper time I am going to make a motion to recommit this bill, and I do not think we have yet reached a time in the discussion when it is necessary to limit debate. Here is a bill, as I understand it—and I will say this to the Senator so that he may know my viewpoint—which is one of the most radical and far-reaching meas-

ures that has been before Congress within the present generation. I think it is deserving of the most serious consideration, and I do not think it has received it up to this time. It has been considered largely in the absence of the Senate.

Mr. NEWLANDS. I should like to ask the Senator if, without fixing a time for a vote, he would be willing to assent to a proposal that the speeches be limited to 10 minutes after 2 o'clock to-morrow?

Mr. REED. Not at the present time. I have seen the 10-minute rule tried out, and I think it is considerable of a failure.

The PRESIDING OFFICER. Objection is made.

Mr. NEWLANDS. Then, Mr. President, I move that when the session closes to-day the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to.

Mr. KELLOGG. Mr. President, I will ask the chairman of the committee if he desires to take a recess at 5 o'clock?

Mr. NEWLANDS. I think we will proceed until then, or later.

Mr. KELLOGG. I so understand.

Mr. TRAMMELL. Will the Senator yield to me for a moment?

Mr. KELLOGG. I yield to the Senator.

Mr. TRAMMELL. I submit an amendment, which I ask may be printed and lie on the table.

The PRESIDING OFFICER. The amendment intended to be proposed by the Senator from Florida will be printed and lie on the table.

Mr. NEWLANDS. Mr. President——

The PRESIDING OFFICER. The Chair is under the impression that the Senator from Minnesota has yielded the floor for the day.

Mr. KELLOGG. I simply yielded the floor as the chairman of the committee desires to move a recess until to-morrow.

Mr. NEWLANDS. I suggest to the Senator from Minnesota that he continue his remarks to-morrow morning. Meanwhile the Senator from Texas [Mr. SHEPPARD] has a matter on which he would like to address the Senate, and I will make no motion for a close of the session until he is through.

Mr. KELLOGG. I did not desire to yield for another speech upon the bill. I simply understood the chairman wished to move a recess, as 5 o'clock, the usual hour, had gone by. If the chairman desires to continue the session, I will continue my remarks for a while.

Mr. SHEPPARD. I will state to the Senator that I desire to address the Senate briefly on another subject, and the Senator can go on to-morrow morning.

Mr. KELLOGG. I have no objection.

LAND SETTLEMENT AND HOME OWNERSHIP.

Mr. SHEPPARD. Mr. President, inasmuch as debate can not be closed on the present measure to-day, I desire to address the Senate briefly on a subject about which I have intended to speak for several days. At a time when the utilization of the soil and its products is one of the urgent questions before Congress I think it will not be amiss to discuss briefly the general problem of land settlement and home ownership.

Mr. President, in the last analysis the food problem is a land problem, and the land problem is fundamentally related to the question of home ownership.

The best form of preparedness which any nation may possess is maintenance of access to the land. Military preparation is but one phase of national defense. The foundations of a nation's strength are in the homes of the people. However effective and complete the national equipment for war, that soldier will be most efficient, whether he fights in the sky, the trench, on the ocean's surface or in its depths who feels that in defending his country he defends a home of his own.

Let me say here that almost every country of importance in the world has taken definite legislative steps to enable the people to acquire and maintain homes. Nearly all the leading nations have constructive land purchase and land settlement policies by which the government aids the masses in securing homes. These nations have come to understand that speculative land holding is one of the chief menaces of the home; that the home is the basis of prosperity, liberty, order, yea, of the very existence of free government; that at all times it ought to be possible for the honest and industrious citizen to obtain and develop a home from the current surplus proceeds of his own labor; that private profit-making enterprise can not and will not successfully and permanently accomplish such an end.

At this point it may be instructive to review what other nations are doing to aid the people in acquiring homes.

ENGLAND.

In England every county council is empowered to provide land for persons who will cultivate it themselves. The council may purchase the land by agreement or by compulsion, either within or without the county. No person may secure more than 50 acres in this way, and no one with only 50 acres or less may be compelled to sell. In case of compulsion the price is fixed by arbitration, and only that part of an estate is taken which may most conveniently be severed. The council will sell or lease the holdings thus secured to landless applicants as they may elect, and must fix the price or rent so as to guard against loss on its own part. Within not less than a month at least one-fifth of the purchase money must be delivered, and the purchaser may have 50 years in which to pay for the remainder, at a low rate of interest, in half-yearly installments, unless he desires to pay all sooner.

The council may postpone payments for not more than five years in the event of expenditures by purchasers which increase the value of the holdings. But this is not all. The county council may, if it sees fit, before sale or letting, adapt the land for small holdings by dividing, fencing, making roads, draining, providing water supply, or doing anything else it thinks may be more economically and efficiently done for the land as a whole. Furthermore, the council may, in its discretion, erect such buildings or make such alterations in existing ones as are necessary in the event of financial inability of purchaser or tenant. For a period of 20 years, or so long as any part of the purchase money remains due, the following rules apply. Periodical payments must be duly made. There shall be no subdividing, devising, assignment, letting, or subletting without the consent of the council. The holding must be cultivated by the purchaser or lessee and not used for any other purpose than agriculture. There shall be no more than one dwelling house on a single tract. The dwelling house must comply with standard requirements for healthiness and freedom from overcrowding. No house on any holding shall be used for the sale of intoxicating liquor. The English law goes still further. It provides garden homes for wageworkers in towns and cities. It authorizes councils of boroughs, cities, or parishes, and in case of their default the county councils, to acquire by agreement or compulsion lands to be leased to resident laborers in tracts of 1 to 5 acres. The councils may improve and adapt these lands for such allotments by draining, fencing, dividing, acquiring approaches, making roads, erecting buildings, altering existing ones, and doing such other things as may be deemed advisable. Tenure is indefinite, depending on the good faith and conduct of the lessee. In order to finance the acquisition of lands for small holdings and allotments a "small holdings account" is opened at the Bank of England comprising moneys provided by Parliament for expense of administration, sums borrowed by the council under authority of law, advances from the public works loan commissioners, and funds secured by the council from rents and sales. Parliament has authorized the public works loan commissioners to advance to local councils three and one-half million dollars annually for the creation of small holdings and allotments, on the security of the taxing power, at 3½ per cent, repayable in 50 to 80 years. So we observe that access to the land is preserved by the people of England for the people of England. I do not hesitate to say that this is the most priceless heritage they possess. It means that a man of honesty and industry may always have a home. It means that whatever reverses may beset him, a port and refuge are at hand. Best of all, he knows that his children and the children of his children will enjoy the same privilege and need never become homeless in the land they will be taught to call their own.

The interest of the English people in home building did not stop with the acts relating to small buildings and allotments. Under the improvement of land acts a landowner who wishes to erect cottages may obtain an order from the board creating a first charge on his property, and on this security he may obtain loans for building purposes from certain incorporated land-improvement companies. Under the settled-land act certain moneys may be used for the erection of cottages for laborers. Under the small dwellings acquisition act loans may be made by local authorities to householders or prospective householders in any amount not exceeding 80 per cent of the value of the dwelling in order to aid in its purchase. Under the act relating to the housing of the working classes unhealthful areas in cities have been purified, unhealthful dwellings in city and rural districts have been either demolished or made fit for habitation, and modern sanitary dwelling houses constructed for the laboring classes. About $58,000,000 have been expended by the central and local authorities in long-time low-interest loans under this act.

THE GARDEN CITY.

Out of the desire of the English people to provide better homes rose the garden-city movement. The garden city contains sections for trade, manufacture, residence, and agriculture, and each section must be restricted to the purpose for which it was originally designed. Every home must have a garden, and is rented or sold at astonishingly small figures. A wide belt of agricultural and park lands comprising two-thirds of the whole area surrounds the other sections. The number of houses to each acre is so limited that every dwelling has ample light and air, while public recreation grounds and open spaces are generally provided. The entire area is planned with a view to natural beauty, architectural excellence, popular convenience, sanitary environment, and is dedicated to the idea that a city should comprise rural as well as industrial and commercial districts. Thus the garden city abolishes the sharp line of division that has so long kept town and country apart, leading to mutual jealousy, estrangement, and suspicion, and seriously handicapping all progress. Already about 60 of these garden cities have been established since the first—Letchworth—was laid out in 1903. Towns and cities in existence when the movement began are planning extensions embodying the same principles, and notable among these are Liverpool and Birmingham. The garden suburb of Hampstead is famous the world over as one of the most beautiful examples of town planning and architectural perfection on the globe. The garden city is established and conducted by a stock company, usually limiting its returns to 5 per cent. The British Government advances funds to companies of this kind at a very low interest.

SCOTLAND.

Scotland authorizes loans by various governmental subdivisions to the people for the acquisition of land and the creation of homes. The rate of interest is 2¾ per cent and the maximum time of repayment 50 years. Loans are also authorized for the rebuilding of homes on land already acquired. As in England, housing legislation in Scotland has led to town planning on an extensive scale, with a view to healthful and comfortable living conditions. Edinburgh, for instance, has expended $500,000 in buying its slum areas, and has replaced habitations of misery and filth with new and commodious quarters, to be sold on terms within the reach of all. Glasgow has expended $12,000,000 in the erection of modern dwellings for workmen, to be distributed on the most liberal conditions.

IRELAND.

Let us now turn to Ireland, where the struggle of the people for the soil furnishes some of the most tragic chapters of human history. For 700 years the soil of Ireland was gradually gathered into the hands of the few, while the masses sank into the depths of poverty and distress. Shortly before the middle of the last century conditions became intolerable. Thousands of men, women, and children died along the roadside, where they had been driven by the rent collectors, the gombeen men, and the eviction bailiffs. Many of the people rose in neighborhood revolutions, and there was considerable destruction of life and property. The situation touched the heart of Gladstone, the British premier, who gave it careful and sympathetic study. The result was the passage, in 1881, of the Gladstone fair-rents act, which marked the beginning of a land policy for Ireland that has brought about just relations between landlord and tenant and is rapidly restoring the people to the long-lost ownership of the soil. By that act a land court or commission was created for Ireland, having power to go further than the mere contract between proprietor and renter, to examine the earning power of the soil, the living conditions surrounding the tenant, and all other matters relating to an equitable decision, not only for the parties immediately concerned but also from the standpoint of the common good. There resulted a fixed tenure for the tenant of 15 years, a salable interest to the extent of his improvements, the landlord having the first right to buy, if he should offer a proper price, and a fair rental.

The land commission was authorized to make loans to tenants for the purpose of acquiring lands, and by agreement or compulsion to purchase lands for resale to the landless. Under careful regulations the entire amount of the purchase money may be advanced. Loans are repayable by annual installments in 49 years. Subsequent legislation perfected the Gladstone Act of 1881 and the results have been magical. In 1876 over half of Ireland was owned by about 700 men, and there were half a million tenants. In 1915 450,000 Irish farmers owned their homes, and their holdings comprised two-thirds of all Ireland. By means of these land loan and purchase acts holdings valued at a billion dollars have been placed in the hands of small owners and the repayments, with the rarest of exceptions, are being promptly made. In addition, hundreds of millions have been expended and loaned for the construction of cottages with garden plots attached for laborers, both in towns and the rural districts. These measures have produced the most remarkable transformation any people have ever experienced. The sunlight of hope again floods the stone of destiny on the hill of Tara. The melancholy notes of Tom Moore, voicing his own and his country's grief for the glories of the past—

So sleeps the pride of former days;
So glory's thrill is o'er;
And hearts that once beat high for praise
Now feel that pulse no more—

Might well be changed to pæans of exultation for the day of Celtic homes on Celtic sod.

GERMANY.

Let us next consider Germany. We find that the German Government advances funds to various associations whose object is to aid the people in building homes. We find that over a hundred million dollars of the Government's old-age and insurance-pension reserves have been invested in the construction of houses for workers. We find the German cities building homes for workers or taking shares in cooperative building associations, and sometimes guaranteeing their mortgages. We find a number of cities acquiring tracts of land to be used for workmen's homes or establishing funds for the acquisition of such tracts. Notable among these are Frankfort, which, in July, 1909, had $28,000,000 in land and land funds; Munich, $14,500,000; Cologne, nearly $6,000,000; Posen, $3,500,000; Freiburg, $16,000,000; Dusseldorf, nearly $6,000,000. Berlin had at that time 46,000 acres of municipally owned land within and without the city limits; Breslau, 17,000; Strassburg, 12,000; Brandenburg, 16,000; Gorlitz, 18,000; Darmstadt, 5,000; Liegnitz, 5,000; Rostock, 45,000. Many German cities maintain municipal mortgage banks for the purpose of carrying first and second mortgages on workmen's dwellings. In the farming districts Germany has buttressed the home owner with the most efficient rural-credit system on earth.

The leading land-credit institution is the landschaft, by which the land is made the basis of loans without the intervention of a bank. Other land-credit institutions are supported or encouraged by the government, and altogether about $2,000,000,000 are advanced to German landowners on terms enabling them to improve, protect, and keep their homes. Personal rural credit is afforded by 17,000 cooperative agricultural societies of the Raiffeisen type, and their annual turnover represents over a billion and a quarter of dollars. These cooperative credit establishments, making money available to German farmers at 3 and 4 per cent, are mainly responsible for the fact that in Germany 81 per cent of the farmers own and cultivate their farms. Whenever a large sale of land is about to be made the seller must give the refusal first to a cooperative society which will subdivide the property for resale to small proprietors. In town and city planning for the purpose of improving housing conditions Germany leads all other nations.

AUSTRIA.

Austria provides governmental aid for the housing of working people on an extensive scale. The houses must be constructed in accordance with carefully framed plans in order that sanitation, permanence, and decent appearance may be assured. These homes are exempted from taxation for a long period.

BELGIUM.

In Belgium the national savings bank is authorized to lend money through certain local societies to any citizen for the construction of a home, for the purchase of one already built, for repayment of a mortgage on a home, or for reconstruction and improvement of a home already erected. The maximum loan is 90 per cent of the value of the home, including land, and the limit is $1,000. The rate of interest is from 3½ to 4 per cent, and the time of repaying is 10, 15, 20, or 25 years, as the borrower may prefer. By 1911 the national savings bank had loaned nearly $20,000,000 for the construction or acquirement of homes for workers. Certain tax exemptions are allowed. The principal cities of Belgium construct homes and sell them to workingmen on the most convenient terms, make direct loans for such construction or for purchase to individuals and societies.

DENMARK.

In Denmark Government loans are made to landless persons of good character for the purpose of acquiring small farms. The loan may equal 90 per cent of the purchase price and the value of the building may not exceed $2,000. By 1911 loans of this character had amounted to nearly $7,000,000. Loans are also granted to home owners and to workers for the purpose of acquiring machinery. By 1912 Denmark had loaned nearly $10,000,000 on homesteads. Loans are also authorized to cities

and other political divisions for the reconstruction of overbuilt and unsanitary sections and for the creation of workers' dwellings.

FRANCE.

In France the Government advances money at 2 per cent to real estate credit companies which in turn lend it on long-time mortgages to persons desiring to acquire a home or a small field or garden. It also grants advances to cooperative societies that build low-cost dwellings or that make loans for such purposes. It encourages the building of homes for workers by giving certain exemptions from taxation. It fosters a rural credit system by which funds are available for agricultural operations at the lowest rates, thereby perpetuating a prosperous and permanent farm population.

HOLLAND.

In Holland the Government makes loans to municipalities and through them to societies that build workmen's homes. These loans to municipalities have a maximum length of 50 years and may be made with or without interest.

HUNGARY.

In Hungary, where municipalities, communities, or local societies sell land for workers' homes in town or country, or guarantee building loans, or sell or rent homes, the minister of agriculture may, first, make all necessary surveys, plans, and contracts at the cost of the State; second, make loans to agricultural laborers, repayable in 50 semiannual installments or 30 yearly payments. Exemption from all taxation is granted for 20 years and construction materials are carried at cost by the Government railways. Municipalities and communities are aided by the Government in making loans for laborers' cottages and farmhouses. During the five years ending in 1912, 12,000 farm homes were built in this way at a cost of over $4,000,000. The Hungarian Government has established agricultural settlements in Transylvania, one of its richest Provinces, where lands are sold to settlers on 50 years' time at 2 to 4 per cent. Settlers must be of good character, of desirable age, and in possession of at least $400. Government instruction in agricultural cooperation and modern methods of farming is given. In Budapest the Government has provided for the construction of garden homes for rent to workmen at low figures.

ITALY.

The Italian Government gives extensive aid to the construction of homes for toilers by the remission of certain taxes, provision of easy credit for associations that build inexpensive but sanitary homes for workers, the assumption in certain cases of partial payment of interest on loans made to such associations, and by the sale of lands from the public domain for homes below the market price. The cities of Italy are joining with the general government in making loans to building associations. An effective rural-credit system brings funds to farmers for building homes and cultivating the soil at low interest rates.

NORWAY.

Norway has established a workman's dwelling and homestead bank to make loans for the acquirement of small parcels of land and small homes. The capital of the bank is furnished by the State and amounted to $2,700,000 in 1912. It has loaned over $7,000,000 for the construction of homes since its establishment in 1903. Norwegian cities have followed the example of the State and have created dwelling banks to lend funds to home-builders and persons ambitious to own small farms.

RUSSIA.

The Russian Government granted credits for farm improvements of over $1,500,000 during 1913, the total amount of such loans since 1904 being nearly four and one-half millions. About two million agricultural holdings have been allotted in European Russia during the last five years, with a total area of about 46,000,000 acres, while allotments totalling nearly 49,000,000 acres have been made to farmers in Asiatic Russia.

SPAIN.

In Spain State and municipal aid is given in the erection of low-priced dwellings for the working masses and exemptions from taxation for a certain period are allowed.

SWEDEN.

In Sweden liberal provisions are made by State and city governments for financial aid in acquiring small farms, farm dwellings, workmen's homes, and for loans to small proprietors. In 1907 the Riksdag, the national legislature, created a fund for the purchase of large estates and their subdivision into small farms.

BRAZIL.

Brazil exempts materials used in the construction of workmen's homes from all tariff charges; exempts these homes from federal taxation for not less than 15 years, provided the municipality in which they are located agrees to do the same as to city taxes; grants unoccupied Government land for homes without charge; authorizes the loan of deposits in Government savings banks to building companies; and provides that Government aided homes shall be built according to Government plans and conditions, insuring health, comfort, and convenience.

CHILE.

Chile provides funds through a bond issue for the building of dwellings to be sold or rented to workingmen. It exempts these dwellings from certain national and municipal taxes, and where they can be arranged in groups provides parks and public schools for their particular benefit.

CANADA.

In Canada the western Provinces are exempting homes and other improvements from taxation and increased building activity is resulting. The cities of Victoria, Vancouver, Edmonton, Calgary, and Leithbridge adopted this policy as to municipal taxes, and a tremendous advance in the number and value of improvements has occurred. Nova Scotia, New Brunswick, and Ontario have laws for the betterment of housing conditions among working people.

CUBA.

In Cuba the executive is authorized to construct 2,000 small cottages, to be assigned by lot to native-born and naturalized heads of families of good character, and without any other resources than their labor. The houses must be of brick and tile, at least 13 feet high, covering 56 square feet, and containing a living room, dining room, two bed rooms, kitchen, bath, and toilet. Each house must be built on a lot at least 65 by 19½ feet. The occupier must pay $2.65 within the first 10 days of each month, and this continues until the debt is discharged.

NEW ZEALAND.

I now come to the country that has accomplished probably more for the prosperity and happiness of its people than all others, a country located in a distant corner of the globe, 6,000 miles southwest of San Francisco in the South Pacific, the country of New Zealand! Well may we pause to note the physical configuration of the Dominion that has taken the lead in legislation for humanity. It is composed of three islands, each a little northeast of the other. They are generally long and narrow, having a combined length of about 1,000 miles. The northernmost is a little larger than Ohio, the middle island about the size of Michigan or Georgia, while the southernmost island is very small, about three-fifths the size of Rhode Island. Mountain ranges traverse the two principal islands, marked at intervals by peaks that glisten with perpetual snow. Rivers, waterfalls, glaciers, gorges, lakes, volcanoes, geysers, boiling springs famous for healing qualities, and fertile plains combine to present one of the most varied and enchanting nature pictures the world contains. Is there not an unusual significance in the fact that the laws of this wonderful country are as beneficent as the natural environment among which they have been enacted is sublime?

The people of New Zealand grasped the fact that the most vital source of civilization is the home; that the preservation of the home is the first duty of civilization; that a certain amount of land should always be available for homes. They realized that if the people are the Government, as, indeed, they ought to be, Government help is self-help, provided always that it preserves the principle of individual self-help, and does not degenerate into mere charity. They saw more clearly than any other people have as yet seen how much the people may do collectively with more effectiveness than may private enterprise. They caught the spirit of Browning's memorable definition:

A people is but the attempt of many
To rise to the complete life of one.

The land laws of New Zealand are intended to break up immense estates and absentee landlordism, to secure homes on the soil for those who cultivate it with their own hands. All improvements, live stock, and personalty are exempted from taxation. In fixing the value of the land for taxation mortgages are deducted. The mortgagee must pay a land tax on his mortgage as if it were land, and is prohibited from charging the tax to the mortgagor. When the value of the land does not exceed $2,500, after deducting improvements and mortgages, the owner is exempt from any land tax whatever. The result is that about six-sevenths of the farm-home owners of New Zealand pay no land tax at all. When the unimproved value reaches $25,000 a graduated tax begins, which is intended to make unprofitable the holding of large estates and the concentration of ownership in a few. The graduated tax is levied in addition to the ordinary level rate land tax, and in case the owner has been out of the country a year this graded tax is increased 20 per cent. Corporations holding lands must pay a higher rate than indi-

viduals. Earnings derived from land are exempted from the graduated income tax, as are all incomes over $1,500.

The Government of New Zealand is authorized to expend not more than $5,000,000 annually in the purchase of large estates by agreement or compulsion, for subdivision or lease to small settlers, a reasonable amount being left the original owner, should he so desire. The lease runs for 33 years at 4½ per cent per annum with a perpetual right of renewal. In other words, occupancy and use are made the true muniments of title. Ownership remains in the Government or the people, and the land is prevented from gravitating back into the hands of monopolists and speculators. The people become their own tenants and their own landlords, so far as these purchased estates are concerned. A large element in New Zealand favors the ultimate nationalization of all the soil, in order to make it sacred to actual use and keep it in the people's control. By 1912 the Government had acquired 223 estates at a purchase cost of nearly $30,000,000 and had expended thereon two and one-fourth millions for improvement. It is practically all leased to small home owners, who are promptly meeting all payments. About 18,000,000 acres of the public crownlands have been sold or leased to actual settlers. Here the option of purchase of the title or lease with right of purchase or of lease with perpetual right of renewal is offered the buyer, the amount anyone may obtain being carefully limited. After placing settlers on the land the New Zealand Government makes them loans on easy terms to enable them properly to occupy and develop their holdings, including the erection of homes. The Government also erects homes with garden plots attached for lease to laborers in both the towns and rural districts.

Let us now take up our own country, the United States. What is the situation? Although millions of acres have been given and sold to prospective owners by Federal and State Governments, the results speak their own condemnation. Of the 20,000,000 families in the United States nearly 11,000,000 own no homes at all, while less than 6,000,000 own homes free from incumbrance. In 1870 more than 90 per cent of the people resided in the rural districts. To-day, more than 50 per cent are crowded in cities. The percentage of tenants in the farming sections as well as in the cities is growing with an appalling rapidity. One of the results of present land policies and conditions is that of the arable area of the United States hardly one half is occupied, and hardly half of the half occupied is under actual cultivation. Is it surprising that we are confronted with a food problem? Even before the present war began our surplus amount of food was rapidly decreasing. Unless something is done to make farm life inherently more attractive, this Republic, although it contains enormous reaches of remarkably productive soil, will face a food shortage of increasingly serious proportions.

I directed attention to this situation in the Senate in April, 1915, and proposed an amendment to the Federal Constitution giving Congress the power to inaugurate a constructive land policy. A constitutional amendment giving the Legislature of Massachusetts similar powers was adopted in that State in November of 1914 by a popular vote of three to one. In the State of California a commission authorized by the legislature has made a careful study of the land question, in so far as it affected California, and has reported that Government supervision and aid are necessary to an effective solution. The State of Oklahoma has provided by law for aid to home builders, and in the State of Wyoming a plan of land settlement along progressive and constructive lines has been proposed. The Fourth National Conference on Marketing and Farm Credits, which was held at Chicago in December, 1916, at which delegates were present representing 120 farmers' organizations composed altogether of about 3,000,000 farmers, passed a number of resolutions, among which was the following in reference to what is called the "Wyoming plan":

We indorse plans similar to those formulated under the report on land settlement in Wyoming, which provides for cooperation between the Federal and State authorities for the creation of settlements in which community as well as individual needs are cared for. This policy includes provision for town schools, roads, and the determination of the size of farms needed to furnish employment and give a living income to the settler. The Wyoming plan also provides homes for laborers, which will give them economic independence through the ownership of sufficient land to enable the laborer's family to grow its own fruits and vegetables and keep a cow, pigs, and poultry. The object of this is to enable settlers to earn a living income from the soil in less time and with smaller expenditure of money than is possible where each one works unaided and alone. Such expenditures, or loans, should be repaid by the settler with interest, under such conditions and in such time as will permit the money to be earned out of the soil.

That conference also adopted a resolution for a Federal commission to study the land question, in the following language:

This conference again urges its recommendation of 1915 for the appointment of a Federal commission having authority to employ a body of expert assistants to carry on inquiry in all parts of the country, which will show—

First. Methods and results of unregulated private settlement;

Second. The need for more favorable financial terms of purchase by tenants and would-be farmers of small capital; and

Third. The feasibility and value of adopting in this country some of the policies of other countries which have done so much to improve agricultural and social conditions in these countries.

The Federal farm-loan act will undoubtedly give material aid to many who seek farm homes and who are able to obtain half the value of the desired land from private sources, but it is questionable whether a large proportion of the nearly 5,000,000 farm laborers and farm tenants will be in position to take advantage of the act for the purpose of acquiring homes.

Mr. President, the entry of the United States into the world war has brought about the keenest analysis of internal conditions, to the end that faults may be remedied and weaknesses repaired. The problem of home ownership lies at the base of all other problems relating to an efficient nation in both war and peace. The settlement of the land and home question will be a long step toward a lasting solution of the food question. With the land occupied and cultivated by owners, with a system of credit adapted to farm processes, with ar adequate marketing system for farm products, the American Republic will never suffer for lack of food.

Let the increasing millions of homeless Americans understand that Congress is seeking to solve this most vital of all questions, and it will do more to solidify and strengthen the Republic, to win the confidence of the masses, than all other measures of preparedness combined. Accordingly, I have introduced a bill for an investigation by experts of land settlement and home ownership in the United States, and a report as to what steps, legislative or otherwise, may be practicable and desirable. I do not claim that measures which have proved successful in other countries are necessarily workable here. I urge, however, that the entire subject be thoroughly and carefully investigated.

I submit a copy of the bill and ask that it be published in the RECORD as a part of these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill referred to is as follows:

Whereas the last census shows that of the 20,000,000 families in the United States less than 6,000,000 owned their homes free from incumbrance, while nearly 11,000,000 families, representing over half our population, owned no homes at all; and

Whereas the passing of the home owner in the United States is being accompanied by a general desertion of the rural districts, a rapid decline in the number of our citizens engaged in agriculture, and the concentration of the people in the cities, where more than half of the inhabitants of the Republic are already gathered; and

Whereas such conditions are a steadily increasing menace to the existence, the happiness, and the efficiency of the Nation; and

Whereas the highest form of preparedness for war or peace lies in universal home ownership; and

Whereas nearly all the other leading governments have adopted constructive land-purchase and land-settlement policies in order to aid the people in acquiring and maintaining homes: Therefore

Be it enacted, etc., That the Secretary of Agriculture, the Secretary of the Interior, and the Secretary of Labor are hereby constituted a commission to study the question of land settlement in the United States, to be known as the Federal land settlement and homestead commission.

SEC. 2. That the said commission shall complete its labors and make final report to Congress within one year from date hereof.

SEC. 3. That the commission shall employ such expert and clerical assistance as it may deem necessary, utilizing present employees of the departments of the Government as far as practicable, the total amount expended by them for such assistance and for such incidental expenditures as it may consider essential not to exceed $50,000, which amount is hereby appropriated out of any money in the Treasury not otherwise appropriated.

SEC. 4. That the members of the commission and its appointees, when traveling on the business of the commission, shall be paid from the funds herein appropriated actual living and transportation expense, to be certified to the Secretary of the Treasury on vouchers authorized and signed by the members of the commission.

SEC. 5. That the commission shall carry on an inquiry covering all parts of the country as to—

First. Methods and results of unregulated private settlement.

Second. Need for more favorable financial terms of purchase by tenants and others desiring to become home owners.

Third. Feasibility and value of adopting in this country some of the land-settlement and home-loan policies of other countries.

Fourth. Feasibility and value of cooperation between State and Federal authorities in aiding the people to acquire homes, and for the creation of settlements in which community as well as individual needs are cared for.

Fifth. Methods of not only aiding an individual to acquire a home, but also to establish himself permanently on the soil.

Sixth. Methods of regulating land speculation, absentee landlordism, of preventing concentration of land ownership in the few and kindred evils.

Seventh. Such other methods as the commission may find advisable to arrest the alarming growth of tenantry in the United States, the spread of landlordism, and the disappearance of the home-owning American, all of which threatens to reduce the American people to the condition of a people without lands and without homes.

Mr. SHEPPARD. I now reintroduce by permission of the Senate, the joint resolution for an amendment to the Constitution giving Congress power to inaugurate a land policy.

The joint resolution (S. J. Res. 76) proposing an amendment to the Constitution of the United States giving Congress the power to purchase, hold, improve, subdivide, and sell land and to make loans for the purpose of promoting farm-home ownership, was read the first time by its title, and the second time at length, and referred to the Committee on the Judiciary, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of the House concurring therein), That the following amendment of the Constitution be, and hereby is, proposed to the States, to become valid as a part of the Constitution when ratified by the legislatures of the several States, as provided by the Constitution:

"The Congress shall have power to purchase land anywhere in the United States, hold, improve, subdivide, and sell the same, and also to make loans for the purpose of encouraging and promoting farm ownership in the United States: *Provided, however*, That the amendment shall not be deemed to authorize the sale of such land at less than the cost thereof."

RECESS.

Mr. NEWLANDS. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 5 o'clock and 43 minutes p. m.) the Senate took a recess until to-morrow, Wednesday, June 13, 1917, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

TUESDAY, *June 12, 1917.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Incline Thine ear, O God our Heavenly Father, and hear our prayer. Give to us great thoughts, noble aspirations, and high ideals; that we may do things and add somewhat to the achievements of the faithful souls who have lived and wrought for the betterment of mankind and thus satisfy the yearnings of our own hearts and receive the approbation of the Living God and pass serenely on at the appointed time into the realms of the Great Beyond. In His name. Amen.

The Journal of the proceedings of yesterday was read and approved.

EXTENSION OF REMARKS.

Mr. WOOD of Indiana. Mr. Speaker, I ask unanimous consent to have printed in the RECORD a copy of a letter written by Senator SHERMAN to the editor of the Chicago Tribune on what this Congress has done and what the press and others try to do to Congress.

The SPEAKER. The gentleman from Indiana asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had passed joint resolution of the following title, in which the concurrence of the House of Representatives was requested.

S. J. Res. 73. Joint resolution authorizing the Secretary of the Interior to invest Indian funds in Government bonds.

MAKING IMMEDIATELY AVAILABLE ARMY APPROPRIATIONS.

Mr. DENT. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution 100, to make immediately available the appropriations provided for under an act making appropriations for the support of the Army for the fiscal year ending June 30, 1918, and for other purpses, approved May 12, 1917.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

Mr. LENROOT. Mr. Speaker, reserving the right to object, I have no objection to this matter being disposed of during the day, but before the day is passed the House will be called upon to vote upon the large deficiency bill, and until that is disposed of I shall object.

Mr. KAHN. Will the gentleman withhold his objection a moment?

Mr. LENROOT. Yes.

Mr. KAHN. Mr. Speaker, this is a very important matter. I should be sorry to hear an objection made. This money is really necessary at the present time. The War Department has obligated itself for many millions of dollars, and millions of dollars are now owing to various merchants throughout the country who have supplied the Government with material that the Government needed in this emergency. There is no money with which to pay it. These men are being carried by the banks of the country and have to pay interest on the money that they are borrowing from the banks in order to supply the Government. It is not fair to the merchants, and I sincerely hope that the gentleman from Wisconsin will let this matter be disposed of, without objection.

Mr. LENROOT. Mr. Speaker, my friend from California is probably not aware that this matter has been up for the two preceding days, and I have stated that I will not object to its being disposed of during the day. We will vote on the urgent deficiency bill this afternoon that carries the very appropriation the gentleman now speaks of, and I shall object until that matter is disposed of during the day.

The SPEAKER. The gentleman from Wisconsin objects.

AMENDING THE FEDERAL RESERVE ACT.

Mr. GLASS. Mr. Speaker, I call up the conference report on the bill H. R. 3673, amending the Federal reserve act.

Mr. HARRISON of Mississippi. I want to reserve a point of order, Mr. Speaker, on the conference report.

The SPEAKER. The Clerk will report the bill by title.

The Clerk read as follows:

H. R. 3673. To amend the act approved December 23, 1913, known as the Federal reserve act, as amended by the acts of August 4, 1914, August 15, 1914, March 3, 1915, and September 7, 1916.

Mr. McFADDEN. Mr. Speaker, I desire to make a point of order.

The SPEAKER. The gentleman from Mississippi was making a point or order. Has the gentleman from Virginia any request to make?

Mr. GLASS. I ask unanimous consent that the statement be read in lieu of the report.

Mr. HARRISON of Mississippi. It is understood that my point or order is reserved?

The SPEAKER. Yes. Is there objection to the request that the statement be read in lieu of the report? [After a pause.] The Chair hears none.

The Clerk read the statement.

CONFERENCE REPORT (NO. 73).

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 3673) to amend the act approved December 23, 1913, known as the Federal reserve act, as amended by the acts of August 4, 1914, August 15, 1914, March 3, 1915, and September 7, 1916, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment as follows: In lieu of the amendment proposed by the Senate insert the following:

"That section 3 of the act known as the Federal reserve act be amended and reenacted so as to read as follows:

"'SEC. 3. The Federal Reserve Board may permit or require any Federal reserve bank to establish branch banks within the Federal reserve district in which it is located or within the district of any Federal reserve bank which may have been suspended. Such branches, subject to such rules and regulations as the Federal Reserve Board may prescribe, shall be operated under the supervision of a board of directors to consist of not more than seven nor less than three directors, of whom a majority of one shall be appointed by the Federal reserve bank of the district, and the remaining directors by the Federal Reserve Board. Directors of branch banks shall hold office during the pleasure of the Federal Reserve Board.'

"SEC. 2. That section 4 in the paragraph relating to the appointment of class C directors and prescribing their duties be amended and reenacted so as to read as follows:

"'Class C directors shall be appointed by the Federal Reserve Board. They shall have been for at least two years residents of the district for which they are appointed, one of whom shall be designated by said board as chairman of the board of directors of the Federal reserve bank and as "Federal reserve agent." He shall be a person of tested banking experience, and in addition to his duties as chairman of the board of directors of the Federal reserve bank he shall be required to maintain, under regulations to be established by the Federal Reserve Board, a local office of said board on the premises of the Federal reserve bank. He shall make regular reports to the Federal Reserve Board and shall act as its official representative for the performance of the functions conferred upon it by this act. He shall receive an annual compensation to be fixed by the Federal Reserve Board and paid monthly by

the Federal reserve bank to which he is designated. One of the directors of class C shall be appointed by the Federal Reserve Board as deputy chairman to exercise the powers of the chairman of the board when necessary. In case of the absence of the chairman and deputy chairman, the third class C director shall preside at meetings of the board.

"'Subject to the approval of the Federal Reserve Board, the Federal reserve agent shall appoint one or more assistants. Such assistants, who shall be persons of tested banking experience, shall assist the Federal reserve agent in the performance of his duties and shall also have power to act in his name and stead during his absence or disability. The Federal Reserve Board shall require such bonds of the assistant Federal reserve agents as it may deem necessary for the protection of the United States. Assistants to the Federal reserve agent shall receive an annual compensation, to be fixed and paid in the same manner as that of the Federal reserve agent.'

"SEC. 3. That section 9 be amended and reenacted so as to read as follows:

"'SEC. 9. Any bank incorporated by special law of any State, or organized under the general laws of any State or of the United States, desiring to become a member of the Federal Reserve System, may make application to the Federal Reserve Board, under such rules and regulations as it may prescribe, for the right to subscribe to the stock of the Federal reserve bank organized within the district in which the applying bank is located. Such application shall be for the same amount of stock that the applying bank would be required to subscribe to as a national bank. The Federal Reserve Board, subject to such conditions as it may prescribe, may permit the applying bank to become a stockholder of such Federal reserve bank.

"'In acting upon such applications the Federal Reserve Board shall consider the financial condition of the applying bank, the general character of its management, and whether or not the corporate powers exercised are consistent with the purposes of this act.

"'Whenever the Federal Reserve Board shall permit the applying bank to become a stockholder in the Federal reserve bank of the district its stock subscription shall be payable on call of the Federal Reserve Board, and stock issued to it shall be held subject to the provisions of this act.

"'All banks admitted to membership under authority of this section shall be required to comply with the reserve and capital requirements of this act and to conform to those provisions of law imposed on national banks which prohibit such banks from lending on or purchasing their own stock, which relate to the withdrawal or impairment of their capital stock, and which relate to the payment of unearned dividends. Such banks and the officers, agents, and employees thereof shall also be subject to the provisions of and to the penalties prescribed by section 5209 of the Revised Statutes, and shall be required to make reports of condition and of the payment of dividends to the Federal reserve bank of which they become a member. Not less than three of such reports shall be made annually on call of the Federal reserve bank on dates to be fixed by the Federal Reserve Board. Failure to make such reports within 10 days after the date they are called for shall subject the offending bank to a penalty of $100 a day for each day that it fails to transmit such report; such penalty to be collected by the Federal reserve bank by suit or otherwise.

"'As a condition of membership such banks shall likewise be subject to examinations made by direction of the Federal Reserve Board or of the Federal reserve bank by examiners selected or approved by the Federal Reserve Board.

"'Whenever the directors of the Federal reserve bank shall approve the examinations made by the State authorities, such examinations and the reports thereof may be accepted in lieu of examinations made by examiners selected or approved by the Federal Reserve Board: *Provided, however*, That when it deems it necessary the board may order special examinations by examiners of its own selection and shall in all cases approve the form of the report. The expenses of all examinations, other than those made by State authorities, shall be assessed against and paid by the banks examined.

"'If at any time it shall appear to the Federal Reserve Board that a member bank has failed to comply with the provisions of this section or the regulations of the Federal Reserve Board made pursuant thereto, it shall be within the power of the board after hearing to require such bank to surrender its stock in the Federal reserve bank and to forfeit all rights and privileges of membership. The Federal Reserve Board may restore membership upon due proof of compliance with the conditions imposed by this section.

"'Any State bank or trust company desiring to withdraw from membership in a Federal reserve bank may do so, after six months' written notice shall have been filed with the Federal Reserve Board, upon the surrender and cancellation of all of its holdings of capital stock in the Federal reserve bank: *Provided, however*, That no Federal reserve bank shall, except under express authority of the Federal Reserve Board, cancel within the same calendar year more than 25 per cent of its capital stock for the purpose of effecting voluntary withdrawals during that year. All such applications shall be dealt with in the order in which they are filed with the board. Whenever a member bank shall surrender its stock holdings in a Federal reserve bank, or shall be ordered to do so by the Federal Reserve Board, under authority of law, all of its rights and privileges as a member bank shall thereupon cease and determine, and after due provision has been made for any indebtedness due or to become due to the Federal reserve bank it shall be entitled to a refund of its cash paid subscription with interest at the rate of one-half of 1 per cent per month from date of last dividend, if earned, the amount refunded in no event to exceed the book value of the stock at that time, and shall likewise be entitled to repayment of deposits and of any other balance due from the Federal reserve bank.

"'No applying bank shall be admitted to membership in a Federal reserve bank unless it possesses a paid-up, unimpaired capital sufficient to entitle it to become a national banking association in the place where it is situated under the provisions of the national-bank act.

"'Banks becoming members of the Federal Reserve System under authority of this section shall be subject to the provisions of this section and to those of this act which relate specifically to member banks, but shall not be subject to examination under the provisions of the first two paragraphs of section 5240 of the Revised Statutes as amended by section 21 of this act. Subject to the provisions of this act and to the regulations of the board made pursuant thereto, any bank becoming a member of the Federal Reserve System shall retain its full charter and statutory rights as a State bank or trust company, and may continue to exercise all corporate powers granted it by the State in which it was created, and shall be entitled to all privileges of member banks: *Provided, however*, That no Federal reserve bank shall be permitted to discount for any State bank or trust company notes, drafts, or bills of exchange of any one borrower who is liable for borrowed money to such State bank or trust company in an amount greater than 10 per cent of the capital and surplus of such State bank or trust company, but the discount of bills of exchange drawn against actually existing value and the discount of commercial or business paper actually owned by the person negotiating the same shall not be considered as borrowed money within the meaning of this section. The Federal reserve bank, as a condition of the discount of notes, drafts, and bills of exchange for such State bank or trust company, shall require a certificate or guaranty to the effect that the borrower is not liable to such bank in excess of the amount provided by this section, and will not be permitted to become liable in excess of this amount while such notes, drafts, or bills of exchange are under discount with the Federal reserve bank.

"'It shall be unlawful for any officer, clerk, or agent of any bank admitted to membership under authority of this section to certify any check drawn upon such bank unless the person or company drawing the check has on deposit therewith at the time such check is certified an amount of money equal to the amount specified in such check. Any check so certified by duly authorized officers shall be a good and valid obligation against such bank, but the act of any such officer, clerk, or agent in violation of this section may subject such bank to a forfeiture of its membership in the Federal Reserve System upon hearing by the Federal Reserve Board.'

"SEC. 4. That the first paragraph of section 13 be further amended and reenacted so as to read as follows:

"'Any Federal reserve bank may receive from any of its member banks, and from the United States, deposits of current funds in lawful money, national-bank notes, Federal reserve notes, or checks, and drafts, payable upon presentation, and also, for collection, maturing notes and bills; or, solely for purposes of exchange or of collection, may receive from other Federal reserve banks deposits of current funds in lawful money, national-bank notes, or checks upon other Federal reserve banks, and checks and drafts, payable upon presentation within its district, and maturing notes and bills payable within its district; or, solely for the purposes of exchange or of collection, may receive from any nonmember bank or trust company deposits of current funds in lawful money, national-bank notes, Federal reserve notes, checks and drafts payable upon presentation, or maturing notes and bills: *Provided*, Such nonmember bank or trust company maintains with the Federal reserve bank of its district a balance sufficient to offset the items in transit held for its ac-

count by the Federal reserve bank: *Provided further*, That nothing in this or any other section of this act shall be construed as prohibiting a member or nonmember bank from making reasonable charges, to be determined and regulated by the Federal Reserve Board, but in no case to exceed 10 cents per $100 or fraction thereof, based on the total of checks and drafts presented at any one time, for collection or payment of checks and drafts and remission therefor by exchange or otherwise; but no such charges shall be made against the Federal reserve banks.'

"SEC. 5. That the fifth paragraph of section 13 be further amended and reenacted so as to read as follows:

"'Any member bank may accept drafts or bills of exchange drawn upon it having not more than six months sight to run, exclusive of days of grace, which grow out of transactions involving the importation or exportation of goods; or which grow out of transactions involving the domestic shipment of goods provided shipping documents conveying or securing title are attached at the time of acceptance; or which are secured at the time of acceptance by a warehouse receipt or other such document conveying or securing title covering readily marketable staples. No member bank shall accept, whether in a foreign or domestic transaction, for any one person, company, firm, or corporation to an amount equal at any time in the aggregate to more than 10 per cent of its paid-up and unimpaired capital stock and surplus, unless the bank is secured either by attached documents or by some other actual security growing out of the same transaction as the acceptance; and no bank shall accept such bills to an amount equal at any time in the aggregate to more than one-half of its paid-up and unimpaired capital stock and surplus: *Provided, however*, That the Federal Reserve Board, under such general regulations as it may prescribe, which shall apply to all banks alike regardless of the amount of capital stock and surplus, may authorize any member bank to accept such bills to an amount not exceeding at any time in the aggregate 100 per cent of its paid-up and unimpaired capital stock and surplus: *Provided further*, That the aggregate of acceptances growing out of domestic transactions shall in no event exceed 50 per cent of such capital stock and surplus.'

"SEC. 6. That section 14, subsection (e), be amended and reenacted so as to read as follows:

"'(e) To establish accounts with other Federal reserve banks for exchange purposes and, with the consent or upon the order and direction of the Federal Reserve Board and under regulations to be prescribed by said board, to open and maintain account in foreign countries; appoint correspondents, and establish agencies in such countries wheresoever it may be deemed best for the purpose of purchasing, selling, and collecting bills of exchange, and to buy and sell, with or without its indorsement, through such correspondents or agencies, bills of exchange (or acceptances) arising out of actual commercial transactions which have not more than 90 days to run, exclusive of days of grace, and which bear the signature of two or more responsible parties, and, with the consent of the Federal Reserve Board, to open and maintain banking accounts for such foreign correspondents or agencies. Whenever any such account has been opened or agency or correspondent has been appointed by a Federal reserve bank, with the consent of or under the order and direction of the Federal Reserve Board, any other Federal reserve bank may, with the consent and approval of the Federal Reserve Board, be permitted to carry on or conduct, through the Federal reserve bank opening such account or appointing such agency or correspondent, any transaction authorized by this section under rules and regulations to be prescribed by the board.'

"SEC. 7. That section 16, paragraphs 2, 3, 4, 5, 6, and 7, be further amended and reenacted so as to read as follows:

"'Any Federal reserve bank may make application to the local Federal reserve agent for such amount of the Federal reserve notes hereinbefore provided for as it may require. Such application shall be accompanied with a tender to the local Federal reserve agent of collateral in amount equal to the sum of the Federal reserve notes thus applied for and issued pursuant to such application. The collateral security thus offered shall be notes, drafts, bills of exchange, or acceptances acquired under the provisions of section 13 of this act, or bills of exchange indorsed by a member bank of any Federal reserve district and purchased under the provisions of section 14 of this act, or bankers' acceptances purchased under the provisions of said section 14, or gold or gold certificates; but in no event shall such collateral security, whether gold, gold certificates, or eligible paper, be less than the amount of Federal reserve notes applied for. The Federal reserve agent shall each day notify the Federal Reserve Board of all issues and withdrawals of Federal reserve notes to and by the Federal reserve bank to which he is accredited. The said Federal Reserve Board may at any time call upon a Federal reserve bank for additional security to protect the Federal reserve notes issued to it.

"'Every Federal reserve bank shall maintain reserves in gold or lawful money of not less than 35 per cent against its deposits and reserves in gold of not less than 40 per cent against its Federal reserve notes in actual circulation: *Provided, however*, That when the Federal reserve agent holds gold or gold certificates as collateral for Federal reserve notes issued to that bank such gold or gold certificates shall be counted as part of the gold reserve which such bank is required to maintain against its Federal reserve notes in actual circulation. Notes so paid out shall bear upon their faces a distinctive letter and serial number which shall be assigned by the Federal Reserve Board to each Federal reserve bank. Whenever Federal reserve notes issued through one Federal reserve bank shall be received by another Federal reserve bank, they shall be promptly returned for credit or redemption to the Federal reserve bank through which they were originally issued or, upon direction of such Federal reserve bank, they shall be forwarded direct to the Treasurer of the United States to be retired. No Federal reserve bank shall pay out notes issued through another under penalty of a tax of 10 per cent upon the face value of notes so paid out. Notes presented for redemption at the Treasury of the United States shall be paid out of the redemption fund and returned to the Federal reserve banks through which they were originally issued, and thereupon such Federal reserve bank shall, upon demand of the Secretary of the Treasury, reimburse such redemption fund in lawful money or, if such Federal reserve notes have been redeemed by the Treasurer in gold or gold certificates, then such funds shall be reimbursed to the extent deemed necessary by the Secretary of the Treasury in gold or gold certificates, and such Federal reserve bank shall, so long as any of its Federal reserve notes remain outstanding, maintain with the Treasurer in gold an amount sufficient in the judgment of the Secretary to provide for all redemptions to be made by the Treasurer. Federal reserve notes received by the Treasurer otherwise than for redemption may be exchanged for gold out of the redemption fund hereinafter provided and returned to the reserve bank through which they were originally issued, or they may be returned to such bank for the credit of the United States. Federal reserve notes unfit for circulation shall be returned by the Federal reserve agents to the Comptroller of the Currency for cancellation and destruction.

"'The Federal Reserve Board shall require each Federal reserve bank to maintain on deposit in the Treasury of the United States a sum in gold sufficient in the judgment of the Secretary of the Treasury for the redemption of the Federal reserve notes issued to such bank, but in no event less than 5 per cent of the total amount of notes issued less the amount of gold or gold certificates held by the Federal reserve agent as collateral security; but such deposit of gold shall be counted and included as part of the 40 per cent reserve hereinbefore required. The board shall have the right, acting through the Federal reserve agent, to grant, in whole or in part, or to reject entirely the application of any Federal reserve bank for Federal reserve notes; but to the extent that such application may be granted the Federal Reserve Board shall, through its local Federal reserve agent, supply Federal reserve notes to the banks so applying, and such bank shall be charged with the amount of notes issued to it and shall pay such rate of interest as may be established by the Federal Reserve Board on only that amount of such notes which equals the total amount of its outstanding Federal reserve notes less the amount of gold or gold certificates held by the Federal reserve agent as collateral security. Federal reserve notes issued to any such bank shall, upon delivery, together with such notes of such Federal reserve bank as may be issued under section 18 of this act upon security of United States 2 per cent Government bonds, become a first and paramount lien on all the assets of such bank.

"'Any Federal reserve bank may at any time reduce its liability for outstanding Federal reserve notes by depositing with the Federal reserve agent its Federal reserve notes, gold, gold certificates, or lawful money of the United States. Federal reserve notes so deposited shall not be reissued, except upon compliance with the conditions of an original issue.

"'The Federal reserve agent shall hold such gold, gold certificates, or lawful money available exclusively for exchange for the outstanding Federal reserve notes when offered by the reserve bank of which he is a director. Upon the request of the Secretary of the Treasury the Federal Reserve Board shall require the Federal reserve agent to transmit to the Treasurer of the United States so much of the gold held by him as collateral security for Federal reserve notes as may be required for the exclusive purpose of the redemption of such Federal

reserve notes, but such gold when deposited with the Treasurer shall be counted and considered as if collateral security on deposit with the Federal reserve agent.

"'Any Federal reserve bank may at its discretion withdraw collateral deposited with the local Federal reserve agent for the protection of its Federal reserve notes issued to it and shall at the same time substitute therefor other collateral of equal amount with the approval of the Federal reserve agent under regulations to be prescribed by the Federal Reserve Board. Any Federal reserve bank may retire any of its Federal reserve notes by depositing them with the Federal reserve agent or with the Treasurer of the United States, and such Federal reserve bank shall thereupon be entitled to receive back the collateral deposited with the Federal reserve agent for the security of such notes. Federal reserve banks shall not be required to maintain the reserve or the redemption fund heretofore provided for against Federal reserve notes which have been retired. Federal reserve notes so deposited shall not be reissued except upon compliance with the conditions of an original issue.'

"All Federal reserve notes and all gold, gold certificates, and lawful money issued to or deposited with any Federal reserve agent under the provisions of the Federal reserve act shall hereafter be held for such agent, under such rules and regulations as the Federal Reserve Board may prescribe, in the joint custody of himself and the Federal reserve bank to which he is accredited. Such agent and such Federal reserve bank shall be jointly liable for the safe-keeping of such Federal reserve notes, gold, gold certificates, and lawful money. Nothing herein contained, however, shall be construed to prohibit a Federal reserve agent from depositing gold or gold certificates with the Federal Reserve Board, to be held by such board subject to his order, or with the Treasurer of the United States for the purposes authorized by law.

"SEC. 8. That section 16 be further amended by adding at the end of the section the following:

"'That the Secretary of the Treasury is hereby authorized and directed to receive deposits of gold coin or of gold certificates with the Treasurer or any assistant treasurer of the United States when tendered by any Federal reserve bank or Federal reserve agent for credit to its or his account with the Federal Reserve Board. The Secretary shall prescribe by regulation the form of receipt to be issued by the Treasurer or Assistant Treasurer to the Federal reserve bank or Federal reserve agent making the deposit, and a duplicate of such receipt shall be delivered to the Federal Reserve Board by the Treasurer at Washington upon proper advices from any assistant treasurer that such deposit has been made. Deposits so made shall be held subject to the orders of the Federal Reserve Board and shall be payable in gold coin or gold certificates on the order of the Federal Reserve Board to any Federal reserve bank or Federal reserve agent at the Treasury or at the Subtreasury of the United States nearest the place of business of such Federal reserve bank or such Federal reserve agent: *Provided, however*, That any expense incurred in shipping gold to or from the Treasury or Subtreasuries in order to make such payments, or as a result of making such payments, shall be paid by the Federal Reserve Board and assessed against the Federal reserve banks. The order used by the Federal Reserve Board in making such payments shall be signed by the governor or vice governor, or such other officers or members as the board may by regulation prescribe. The form of such order shall be approved by the Secretary of the Treasury.

"'The expenses necessarily incurred in carrying out these provisions, including the cost of the certificates or receipts issued for deposits received, and all expenses incident to the handling of such deposits shall be paid by the Federal Reserve Board and included in its assessments against the several Federal reserve banks.

"'Gold deposits standing to the credit of any Federal reserve bank with the Federal Reserve Board shall, at the option of said bank, be counted as part of the lawful reserve which it is required to maintain against outstanding Federal reserve notes, or as a part of the reserve it is required to maintain against deposits.

"'Nothing in this section shall be construed as amending section 6 of the act of March 14, 1900, as amended by the acts of March 4, 1907, March 2, 1911, and June 12, 1916, nor shall the provisions of this section be construed to apply to the deposits made or to the receipts or certificates issued under those acts.'

"SEC. 9. That section 17 be amended and reenacted so as to read as follows:

"'SEC. 17. So much of the provisions of section 5159 of the Revised Statutes of the United States, and section 4 of the act of June 20, 1874, and section 8 of the act of July 12, 1882, and of any other provisions of existing statutes as require that before any national banking association shall be authorized to commence banking business it shall transfer and deliver to the Treasurer of the United States a stated amount of United States registered bonds, and so much of those provisions or of any other provisions of existing statutes as require any national banking association now or hereafter organized to maintain a minimum deposit of such bonds with the treasurer is hereby repealed.'

"SEC. 10. That section 19 be further amended and reenacted so as to read as follows:

"'SEC. 19. Demand deposits within the meaning of this act shall comprise all deposits payable within 30 days, and time deposits shall comprise all deposits payable after 30 days, all savings accounts and certificates of deposit which are subject to not less than 30 days' notice before payment, and all postal savings deposits.

"'Every bank, banking association, or trust company which is or which becomes a member of any Federal reserve bank shall establish and maintain reserve balances with its Federal reserve bank as follows:

"'(a) If not a reserve or central reserve city, as now or hereafter defined, it shall hold and maintain with the Federal reserve bank of its district an actual net balance equal to not less than 7 per cent of the aggregate amount of its demand deposits and 3 per cent of its time deposits.

"'(b) If in a reserve city, as now or hereafter defined, it shall hold and maintain with the Federal reserve bank of its district an actual net balance equal to not less than 10 per cent of the aggregate amount of its demand deposits and 3 per cent of its time deposits.

"'(c) If a central reserve city, as now or hereafter defined, it shall hold and maintain with the Federal reserve bank of its district an actual net balance equal to not less than 13 per cent of the aggregate amount of its demand deposits and 3 per cent of its time deposits.

"'No member bank shall keep on deposit with any States bank or trust company which is not a member bank a sum in excess of 10 per cent of its own paid-up capital and surplus. No member bank shall act as the medium or agent of a nonmember bank in applying for or receiving discounts from a Federal reserve bank under the provisions of this act, except by permission of the Federal Reserve Board.

"'The required balance carried by a member bank with a Federal reserve bank may, under the regulations and subject to such penalties as may be prescribed by the Federal Reserve Board, be checked against and withdrawn by such member bank for the purpose of meeting existing liabilities: *Provided, however*, That no bank shall at any time make new loans or shall pay any dividends unless and until the total balance required by law is fully restored.

"'In estimating the balances required by this act, the net difference of amounts due to and from other banks shall be taken as the basis for ascertaining the deposits against which required balances with Federal reserve banks shall be determined.

"'National banks, or banks organized under local laws, located in Alaska or in a dependency or insular possession or any part of the United States outside the continental United States may remain nonmember banks, and shall in that event maintain reserves and comply with all the conditions now provided by law regulating them; or said banks may, with the consent of the Reserve Board, become member banks of any one of the reserve districts, and shall in that event take stock, maintain reserves, and be subject to all the other provisions of this act.'

"SEC. 11. That that part of section 22 which reads as follows: 'Other than the usual salary or director's fees paid to any officer, director, or employee of a member bank and other than a reasonable fee paid by said bank to such officer, director, or employee for service rendered to such bank, no officer, director, employee, or attorney of a member bank shall be a beneficiary of or receive, directly or indirectly, any fee, commission, gift, or other consideration for or in connection with any transaction or business of the bank,' be amended and reenacted so as to read as follows:

"'Other than the usual salary or director's fee paid to any officer, director, employee, or attorney of a member bank, and other than a reasonable fee paid by said bank to such officer, director, employee, or attorney for services rendered to such bank, no officer, director, employee, or attorney of a member bank shall be a beneficiary of or receive, directly or indirectly, any fee, commission, gift, or other consideration for or in connection with any transaction or business of the bank: *Provided, however*, That nothing in this act contained shall be construed to prohibit a director, officer, employee, or attorney from re-

ceiving the same rate of interest paid to other depositors for similar deposits made with such bank: *And provided further*, That notes, drafts, bills of exchange, or other evidences of debt executed or indorsed by directors or attorneys of a member bank may be discounted with such member bank on the same terms and conditions as other notes, drafts, bills of exchange, or evidences of debt upon the affirmative vote or written assent of at least a majority of the members of the board of directors of such member bank.'"

And the Senate agree to the same.

CARTER GLASS,
MICHAEL F. PHELAN,
EDMUND PLATT,
Managers on the part of the House.
ROBT. L. OWEN,
G. M. HITCHCOCK,
GEO. P. MCLEAN,
Managers on the part of the Senate.

STATEMENT.

Section 1 of the bill as reported by the conferees is identical with section 7 of the bill as passed by the House.

Section 2 is substantially the same as section 1 of the House bill.

Section 3 of the bill is substantially the same as section 9 of the House bill.

Section 4 of the bill as reported by the conferees is identical with section 2 of the House bill down to the proviso. The proviso is amended to conform, in substance, to the Senate bill, including the so-called Hardwick amendment permitting collection charges for exchange, so as to read as follows:

"*Provided*, Such nonmember bank or trust company maintains with the Federal reserve bank of its district a balance sufficient to offset the items in transit held for its account by the Federal reserve bank: *Provided further*, That nothing in this or any other section of this act shall be construed as prohibiting a member or nonmember bank from making reasonable charges, to be determined and regulated by the Federal Reserve Board, but in no case to exceed 10 cents per $100 or fraction thereof, based on the total of checks and drafts presented at any one time, for collection or payment of checks and drafts and remission therefor by exchange or otherwise; but no such charges shall be made against the Federal reserve banks."

Section 5 is identical with section 3 of the House bill.

Section 6 is identical with section 8 of the House bill.

Section 7 was contained in the Senate bill as section 5 but was not in the House bill. This section is intended to permit the Federal reserve banks to exchange Federal reserve notes for gold and gold certificates and in this way drift into the banks the idle floating gold which in the hands of the Federal banks would have great potential value.

Section 8 is identical with section 6 of the Senate bill, but was not contained in the bill as it passed the House. This amendment is merely for the convenience of the Federal Reserve Board in handling the daily exchanges between the 12 reserve banks which now must be done by physical transfer of the gold certificates from one bank to another. It is proposed to put these certificates in a common vault and arrange the distribution by bookkeeping instead of by transfer.

Section 9 corresponds to and is identical with section 4 of the House bill.

Section 10 corresponds to and is identical with section 5 of the House bill.

Section 11 is substantially the same as section 6 of the House bill.

CARTER GLASS,
MICHAEL F. PHELAN,
EDMUND PLATT,
Managers on the part of the House.

Mr. McFADDEN. Mr. Speaker, I make the point that there is no quorum present.

The SPEAKER. The gentleman from Pennsylvania makes the point of no quorum, and evidently there is no quorum present.

Mr. GLASS. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The doors were closed, the Sergeant at Arms was directed to notify absentees.

The Clerk called the roll, and the following Members failed to answer to their names:

Anthony	Britten	Carew	Coady
Bell	Bruckner	Carter, Okla.	Cooper, Ohio
Bland	Brumbaugh	Clark, Fla.	Copley
Borland	Capstick	Clark, Pa.	Costello
Cox	Gallivan	McCulloch	Scully
Crago	Graham, Pa.	McKenzie	Sells
Crosser	Gray, N. J.	McKinley	Shallenberger
Currie, Mich.	Griest	McLaughlin, Mich.	Sherley
Dale, N. Y.	Griffin	Magee	Siegel
Davis	Hamill	Maher	Sisson
Decker	Hamilton, N. Y.	Mann	Sloan
Denton	Haskell	Martin, Ill.	Smith, C. B.
Dewalt	Hayes	Mays	Smith, T. F.
Dickinson	Heaton	Miller, Wash.	Snyder
Dill	Hill	Morin	Steele
Dixon	Hollingsworth	Neely	Sterling, Ill.
Dooling	Hood	Nelson	Stevenson
Drukker	Hulbert	Nichols, Mich.	Sullivan
Dunn	Hull, Iowa	Nolan	Swift
Dupré	Husted	Norton	Tague
Dyer	Ireland	Olney	Talbott
Eagan	Jones, Va.	O'Shaunessy	Taylor, Colo.
Eagle	Kearns	Paige	Templeton
Ellsworth	Kennedy, Iowa	Peters	Tilson
Estopinal	Kennedy, R. I.	Powers	Voigt
Fairchild, B. L.	Kettner	Quin	Ward
Fairchild, G. W.	Key, Ohio	Rainey	Watson, Pa.
Fields	Kiess, Pa.	Ramsey	Webb
Flynn	Kreider	Riordan	Wheeler
Focht	LaGuardia	Rowland	Williams
Fordney	Littlepage	Rucker	Winslow
Foss	McAndrews	Sabath	Zihlman
Fuller, Mass.	McCormick	Scott, Pa.	

The SPEAKER. Two hundred and ninety-nine Members have answered to their names, a quorum.

Mr. GLASS. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

DISTRIBUTION OF AGRICULTURAL PRODUCTS.

Mr. LEVER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 4188) to provide further for the national security and defense by stimulating agriculture and facilitating the distribution of agricultural products, disagree to all of the Senate amendments, and agree to the conference asked for by the Senate.

The SPEAKER. The gentleman from South Carolina asks unanimous consent to take from the Speaker's table the bill H. R. 4188, disagree to all of the Senate amendments, and agree to the conference asked by the Senate. Is there objection?

Mr. GILLETT. Mr. Speaker, reserving the right to object, I should like to ask the gentleman if this bill is not so directly related to the food-control bill, which I understand the gentleman is going to bring up next, that final action ought not to be taken by the conferees on this until we have some idea of what the action of the House will be on the other bill?

Mr. LEVER. I think not. While the bills are related, they are not at all antagonistic to each other.

Mr. GILLETT. I thought the Senate added some provisions to this bill which would probably be covered by the bill which the gentleman is going to bring up next.

Mr. LEVER. The Senate has inserted one or two provisions which we are undertaking to cover in the other bill, but I have an idea that we will not have very much difficulty in conference upon those propositions.

Mr. GILLETT. Does the gentleman expect to bring up the conference report upon that if the other bill is taken up?

Mr. LEVER. I shall try to do so. I hope to go immediately into conference if I may have unanimous consent.

Mr. GILLETT. I see no objection to it.

Mr. MONDELL. Mr. Speaker, reserving the right to object, it seems to me that the matters treated of in this bill and in the bill which is soon to be considered by the House are so closely related that it is doubtful if the bill which the gentleman now asks to have go to conference should go to conference until the other bill has been considered.

Mr. LEVER. Let me reply to that suggestion by saying that there are many provisions in this bill providing for county agent work and various and sundry other lines of work which the department now is doing, and these appropriations only increase that work, and I feel we ought to expedite this conference in order that those lines of work may be carried on.

Mr. MONDELL. Is the gentleman quite certain that the work would be expedited in a satisfactory way, and that we would get the desired legislation?

Mr. LEVER. I think so.

Mr. MONDELL. I have had very serious doubt in regard to that matter, but I would be inclined to take the view of the chairman of the committee and the gentleman from Minnesota [Mr. ANDERSON] who is a member of the committee.

Mr. ANDERSON. Will the gentleman yield to me? I would like to make this suggestion to the gentleman from Wyoming: As the gentleman knows the bill carries a provision for the survey of food supplies. That survey is absolutely basic in the operation and enforcement of the bill on which the committee has made a report. It is very essential that the survey should

be done at once so that the food administrator, if one is provided, may have the facts upon which to begin the operation and enforcement of sections of the bill and for that reason it is imperative, I think, that this bill should go to conference and pass in order that the work of the survey may be begun immediately.

Mr. MONDELL. Is it the belief of the gentleman and the committee, who are so well informed as to the legislative situation, that if this bill went to conference that an agreement should be procured prior to the passage of the other bill?

Mr. ANDERSON. It is my belief, I will say to the gentleman from Wyoming, that we can get an agreement certainly within two or three days.

Mr. MONDELL. I am in the main in agreement with the view on these matters of the chairman of the committee and I am willing to acceed largely to his judgment in the matter if they feel very confident that the sending of this bill to conference will not only expedite the enactment of this legislation in proper form but will aid in furthering of the purposes of the legislation which is proposed to follow it.

Mr. ANDERSON. I think it will do both of those things, and I hope the gentleman will let the bill go to conference.

Mr. MONDELL. Mr. Speaker, in deference to the judgment of the two gentlemen, the gentleman from Minnesota and the gentleman from South Carolina, I shall not object.

Mr. CANNON. Mr. Speaker, I can not find the Senate amendments. I am informed they have not been printed, and in view of the fact that it is alleged that the present stock of corn and wheat, and so forth, is substantially exhausted and will be fully before the incoming crop comes, it seems to me now, as it did when the bill was being considered, that this census, so called, is a useless work, and for the present, until I can see the Senate amendments in print, I am not willing to give unanimous consent that the House disagree to the Senate amendments and ask for a conference.

The SPEAKER. The gentleman from Illinois objects.

LEAVE OF ABSENCE.

By unanimous consent, Mr. BRAND was granted leave of absence for one week, on account of the illness of his daughter.

AMENDING THE FEDERAL RESERVE ACT.

Mr. HARRISON of Mississippi. Mr. Speaker, I have raised the point of order on the conference report filed by the managers on the part of the House on the banking and currency bill because they have exceeded their authority.

The SPEAKER. What is the point of order?

Mr. HARRISON of Mississippi. Mr. Speaker, on May 10 the bill came back from the Senate and the House instructed the managers on the part of the House to agree in substance to what was known as the Hardwick amendment which had been previously adopted by the Senate. I want to read the instructions given to the managers and which were passed by the House by a vote of about 246 to 117.

Motion by Mr. MCFADDEN:

"I move that the managers on the part of the House be instructed to agree in conference to the substance of the following provision in the Senate amendment, being the last five lines on page 8 and the first five lines on page 9, which read as follows:

"'*Provided*, Such nonmember bank or trust company maintains with the Federal reserve bank of its district a balance sufficient to offset the items in transit held for its account by the Federal reserve bank: *Provided further*, That nothing in this or any other section of this act shall be construed as prohibiting a member or nonmember bank from making reasonable charges, in no case to exceed 10 cents per $100 or fraction thereof, based on the total of checks and drafts presented at any one time, for collection or payment of checks and drafts and remission therefor by exchange or otherwise.'"

The Speaker will see from the reading of that amendment that member banks might make certain exchange charges, for collecting and remitting drafts and checks, in no case to exceed, however, one-tenth of 1 per cent per $100, and the reasonableness of the charge up to one-tenth of 1 per cent per hundred was left to the member banks making the charges. Now we tested the sentiment of the House, and overwhelmingly instructed the conferees virtually to concur in that Senate amendment and we expected that they would bring it in in substantially the same form as it had passed the Senate, but there have been two changes made in the amendment, two very vital changes. They alter the substance of the Hardwick amendment. The first change is in that these words are inserted:

That nothing in this or any other section of this act shall be construed as prohibiting a member or nonmember bank from making reasonable charges—

And they add these words—

to be determined and regulated by the Federal Reserve Board.

In other words, they change the Federal Reserve Board from its administrative capacity to one of judicial functions and give them the power to determine what shall be the reasonableness of the rates, giving them the power to say, for instance, whether or not the charges made by the member banks may be one-thousandth of 1 per cent, or any other amount. In other words, the House said to the conferees, bring in substantially the Hardwick amendment allowing the country banks to make a reasonable charge, and they change it to say that the Federal reserve bank shall have the right to fix the charge that member banks may make; but they did not stop there, they went further and exceeded their authority. They also have this apparently innocent proviso to the Hardwick amendment which would destroy the purpose of the amendment and defeat the very intention of the House in giving to the member banks the right to make a reasonable charge, not to exceed one-tenth of 1 per cent. Here is that innocent amendment:

but no such charges shall be made against the Federal reserve bank.

Under that provision the Federal Reserve Board—I do not think my friend from Virginia [Mr. GLASS] would deny it—could undo everything we proposed to do by the amendment. They might say that these banks that clear through the Federal Reserve Board, when notified to remit, shall remit the checks in payment to the Federal reserve bank, and no charges can be made therefor.

There can be no doubt that the Federal Reserve Board wants the power to destroy the right of member banks to make these exchange charges, and it is wrong to give the Federal Reserve Board authority so broad that it may defeat the intention and will of the House. [Applause.] And that is what the managers on the part of the House have done.

Now, it may be contended that a point of order is not the proper way to get at this question. I submit that it is the proper way. I know there are some very distinguished parliamentarians in this House who say it is not; that you ought to vote the proposition either up or down. That view is probably shared by my distinguished friend from New York [Mr. FITZGERALD], but the rules of the House and the precedents do not uphold that opinion.

I am reading now from the Manual of the House, on page 279, the remedy where the managers exceed their authority or duty, and it is fortunate that points of order can be interposed when managers disregard the instructions of the House. It says:

In the House of Representatives, in the later practice, the Speaker may rule out a conference report if it be shown that the managers have exceeded their authority.

There are four cases cited under that ruling. You will find them in Hinds' Precedents, volume 5, pages 6409, 6410, 6414. I read from 6414:

It is only in later years that the Speakers have assumed authority to determine whether or not the managers of a conference have transcended their powers.

So I submit that time and time again where the managers have exceeded their authority points of order have been interposed and points of order have been sustained. Why, if that were not the proper way to get at it, what would be the effect? You have changed the rule of the House that says that any person who votes affirmatively on any proposition can move during one day to reconsider the vote. But beyond that they can not get a reconsideration of the vote. What would be proposed if a point of order should not lie here would be that those who fought this provision before in the House and who now oppose it after the House instructed them to bring in this provision could get a reconsideration of it, a new vote on the proposition. But the House rules prohibit that. And there is no provision in the House rules which gives a minority Member on any question the right to get up the question for reconsideration, but one who votes affirmatively may for only one day ask for reconsideration.

Now, they rely upon a case—I am quite sure they rely upon that—that is cited in Hinds' Precedents, volume 5, page 6395, against the point of order.

That is a case relied upon by those who believe that the proper way to get at this question is to vote the report up or down. I want to analyze the case to the Speaker, because I know when it is argued on the other side that case will be cited, and that is practically the only case that can be cited. The facts about this case were as follows:

The river and harbor bill came back from the Senate amended, and a motion to instruct the managers upon the part of the House to insist on the disagreement to certain Senate amendments was adopted. When the managers came back into the House with a conference report the point of order was made that the conferees had exceeded their authority, had disregarded the instructions of the House, and had agreed to the Senate amendment, when the House had formerly instructed them to insist on a disagreement. And during that whole discussion the question was present that if the instructions had said, "We instruct you to agree to the Senate amendment," it would have presented

quite a different case to instructing them to insist on a disagreement to the Senate amendment. When the conferees came back and replied to the argument that they had exceeded their authority they said, "Why, we did insist on the disagreement. We sat there day in and day out, constantly insisting on the disagreement to the Senate amendment. But our insistence amounted to nothing. Finally we had to surrender to the views of the Senate and had to agree to them."

Mr. MONDELL. Will the gentleman yield right there?

Mr. HARRISON of Mississippi. I yield.

Mr. MONDELL. Is it not a fact that in that particular case the House conferees did not fully yield to the Senate? There was a compromise.

Mr. HARRISON of Mississippi. I think that is true, but the point I wanted to emphasize was that there was a case of instructions to insist on the disagreement to the Senate amendment. Here were instructions to the managers to agree to a Senate amendment, and it was the only way we could tell the managers what to do. It was the only way this question could be presented. The House bill went over to the Senate, and they struck out everything after the enacting clause and inserted one amendment. We could not move to concur in this proposition, because we had to move to concur in the whole. We could not move to agree to a part without moving to concur in the whole. The only way to get at it was to instruct the managers on the part of the House to agree to this amendment. Now, the only object of sending a proposition to conference is for the two Houses to get together, and I submit that when the Senate passed the Hardwick amendment, and it came back, and by a vote of 246 to 117 we said that we would agree to it and instructed the conferees to agree to it, in substance, there was nothing else left to do. And they certainly exceeded their authority when they read into it a proposition giving the Federal Reserve Board jurisdiction to say what should be a reasonable charge and to say that the Federal reserve bank would not be charged for any of these remittances.

Here is what Mr. Blanchard said in arguing this case, which they will rely on. I will quote just a part of it. He was one of the conferees:

> It was debated by some of the ablest and most experienced Members of the Senate, and the view was taken that what the House had done did not amount to an instruction to its conferees to adhere to a disagreement to those amendments, and the distinction was there pointed out, which the gentleman from Missouri, with all his astuteness, seems to have overlooked, that there is a difference in parliamentary law—

I want to convince the gentleman from New York [Mr. FITZGERALD], if he will listen to this. I repeat:

> And the distinction was there pointed out, which the gentleman from Missouri, with all his astuteness seems to have overlooked, that there is a difference in parliamentary law between the House insisting on its disagreement to certain amendments and the House instructing its conferees to adhere.

That was the argument that Mr. Blanchard made at that time. He was one of the conferees and he did not follow the instruction. "The House," he said, "did not instruct its conferees to adhere to the Senate amendments. It instucted its conferees that it was the sense of the House that they should insist upon the disagreement."

Certainly there was no such instruction here. If there ever was a plain instruction given to any set of managers it was done by the McFadden instructions, which said, "We instruct you to agree in substance to the so-called Hardwick amendment." And here is what the Speaker said at that time; Mr. Carlisle was Speaker. He closes by saying:

> In the case supposed the House instructs its committee what it shall report to the House. In this case the House has not instructed its conferees what they shall report, but has expressed its judgment on the question and directed them to insist upon striking out certain clauses.

But we did it the other day. We did instruct them the other day what they should report. But Mr. Carlisle says in this case, that they rely on, that "the House did not instruct them what they should report, but has expressed its judgment on the question and directed them to insist upon striking out certain clauses."

So I submit, Mr. Speaker, that unless you want to change all these precedents and allow the managers to thwart the will of the House constantly, this point of order should be sustained, because otherwise the House can never rely in the future, when it has expressed its will and instructed its conferees as to what they shall do, on their following out those instructions; and the proper way to get at it is to sustain the point of order and let it go back to conference in order that the will of the House may be carried out. [Applause.]

Mr. HOWARD. Mr. Speaker, will the gentleman yield for a question?

Mr. HARRISON of Mississippi. Yes.

Mr. HOWARD. I want to ask the gentleman this question: The House instructed the House conferees to agree to the Hardwick amendment in substance. As a matter of fact, is not this the only difference between the instruction given by the House and the report of the conferees—the specific amount was stipulated in the instruction by the House to the conferees, and they have changed that in this respect, that they have permitted the Federal Reserve Board to fix the charge that may be made by the banks?

Mr. HARRISON of Mississippi. That is one of the changes. That is not the only change.

Mr. HOWARD. Is not that in substance agreeing to the proposition that the House instructed its conferees on?

Mr. HARRISON of Mississippi. Indeed, it is not at all.

Mr. HOWARD. What does the gentleman construe——

Mr. HARRISON of Mississippi. The other proposition was that this proviso that was brought in prevents the Federal Reserve Board banks from paying anything on their checks or remittances. It gives them power to defeat absolutely the intension of the House.

Mr. BURNETT. Mr. Speaker, will the gentleman yield?

Mr. HARRISON of Mississippi. Yes.

Mr. BURNETT. Would not the effect of this bill be to substitute, in the first place, the decision of the Federal Reserve Board for the member banks which was intended to fix the rates not exceeding 1 per cent?

Mr. HARRISON of Mississippi. Absolutely.

Mr. BURNETT. And next, would not that empower the Federal Reserve Board to fix that, if they desired to do so, at 1 per cent on the hundred, or anything else, so as to absolutely destroy the will of the House and the purpose of the amendment?

Mr. HARRISON of Mississippi. Absolutely.

Mr. MONDELL. Mr. Speaker, my understanding is that two points of order have been made: First, that the conferees have exceeded their authority; next, that the conferees have disregarded the instructions of the House.

I think in the practice of the House the former point of order has ordinarily been raised only where the conferees injected new matter into the legislation, or where the conferees sought to change matter that had been agreed upon by both Houses. I am frank to say that I think that that particular point of order is under the usual practice of the House not clearly applicable to this case because this is not in the sense in which we ordinarily use that term in the House a question of exceeding authority, although it may be held, and logically, that if the conferees go contrary to instructions they do exceed authority. But ordinarily we have raised that point of order, as I said before, when new matter was placed in the legislation by the conferees or when the conferees attempted to change provisions agreed upon by both Houses.

That, Mr. Speaker, leaves the other point of order as the one that in my opinion clearly applies to this case, and I want to admit at the outset that in arguing that point of order we seem to be arguing squarely against the established precedents of the House. I think there is no use in dodging that, and because of that, if the Speaker will allow me, I want to attempt to prove this proposition, that notwithstanding statements made in the Manual, and in Hinds' Precedents, the point has not been clearly settled as to whether the disregard by conferees of instructions afford the basis on which a point of order may be successfully predicated. Let me repeat, Mr. Speaker, in order to make myself clear, that in arguing that a point of order may be raised against a conference report in which the conferees disregard instructions we seem to be arguing for something that has been adversely settled in former decisions but my contention is that the matter has never been settled and that there is not in the books a case where the Speaker—any Speaker—has squarely ruled that failure of conferees to regard and carry out their instructions does not present a situation against which a point of order may be invoked. It is true that in the House Manual, page 231, near the bottom of the page, there is this language:

> Although managers may disregard instructions, their report may not for that reason be ruled out of order.

The reference is to Hinds' Parliamentary Precedents, volume 5, paragraph 6395, and Speaker CLARK, December 22, 1913.

Now, Mr. Speaker, I contend that neither Speaker Carlisle nor the present incumbent of the chair ever held—and I hope that no Speaker ever will hold—that the contemptuous disregard by conferees of the instructions given by a majority of this House does not constitute a practice against which a point of order may be laid. The Speaker has no doubt read the case to which reference is made in the fifth volume of Hinds' Precedents, to which the gentleman from Mississippi [Mr. HARRISON] has referred. Let me emphasize some of the statements made by the gentleman from Mississippi on this matter.

Speaker Carlisle did not hold in that case that a disregard of instructions by the conferees did not constitute action against which a point of order could be made, although at the top of the page, in large letters, page 705, volume 5, paragraph 6395, are the words:

Although a conference report may be in disregard of instructions given the managers, yet it may not be ruled out on a point of order.

If the Chair has read that ruling—and I have no doubt that he has—he has discovered that in that case Speaker Carlisle simply held "that the point of order was not well taken." That is his language in the second paragraph of his decision, as presented in volume 5 of Hinds' Precedents, "that the point of order was not well taken." What was the point of order? The point of order was that the conferees had disregarded their instructions. He did not rule that in a case where the conferees had clearly disregarded their instructions a point of order could not be made against their action. He ruled nothing of the kind. The principal argument on the floor in that case was made by the gentleman from Louisiana, Mr. Blanchard; reference to it has been made by the gentleman from Mississippi. The argument in that case was not that the situation did not present a proposition against which a point of order would lie, but that as a matter of fact the conferees had not disregarded their instructions. If the Chair will pardon me—I do not want to take the time of the House at length——

The SPEAKER. What is the gentleman going to read?

Mr. MONDELL. I am going to read just the latter part of this paragraph, which was read by the gentleman from Mississippi [Mr. HARRISON], of the statement made by the gentleman from Louisiana, Mr. Blanchard, on page 7824 of the CONGRESSIONAL RECORD of July 31, 1886.

Mr. WINGO. Will the gentleman yield right there?

Mr. MONDELL. Yes.

Mr. WINGO. I want to see if I catch the gentleman's point before he reads that. I understand the gentleman's point is that that decision did not undertake to determine the question whether or not a point of order would lie, but the question whether the conferees have in fact disregarded their instructions.

Mr. MONDELL. That is my contention. My contention is that the question as to whether a point of order lies against disregard of instructions has never been decided in the House, although the Manual would seem to indicate that such was the case. Now, what was the argument made in defense of the action of the conferees in that case in which Speaker Carlisle ruled? Was the argument made by anyone that a point of order did not lie against a disregard of instructions? No one presented that proposition. No one suggested it. It never has been presented or suggested, except in the language which I have just quoted, written into the Manual by the gentleman who compiled it as it had been written into Hinds' Precedents by the distinguished gentleman who wrote that great work. While we all have a very high regard for Mr. Hinds and for his judgment and opinion, and while I would not assume for a moment to be in his class as a parliamentarian, still Mr. Hinds is mortal, like the rest of us, and he might put a caption on a decision which was not justified by the decision, and that is exactly what he did in that case. Then in compiling the Manual the language he used on page 705, volume 5, of his Precedents is quoted verbatim. I repeat that no one in the case decided by Speaker Carlisle raised the question or argued for a moment the proposition that a point of order did not lie against conferees who disregarded their instructions. Coming now to the language of Mr. Blanchard, who made the principal argument, let me read just the last portion of the paragraph:

The House did not instruct its conferees to adhere to the disagreement to the Senate amendment. It instructed its conferees that it was the sense of the House that they should insist upon the disagreement.

And much more along the same line, all to the effect that the conferees had not ignored their instructions; that the conferees had made every effort to comply with their instructions; and that they had, as a matter of fact, in substance complied with their instructions.

Speaker Carlisle in his decision goes on to call attention to the purpose of conferences. The purpose of a conference is to bring the Houses together. In that particular case the House conferees were instructed to disagree to certain amendments of the Senate. They endeavored to carry out their instructions. As a matter of fact, they secured a compromise, it was argued, which in the main did carry out the purpose of the instructions of the House, and Speaker Carlisle, in passing upon the matter, emphasized the necessity of bringing the Houses together. The House had instructed its conferees to stand against a certain proposition. The purpose of a conference is to bring the Houses together. The conferees carried out their instructions manfully, faithfully, in their effort to carry out the will of the House and to have it written into law. They succeeded to a large extent. They secured more than they surrendered, and Speaker Carlisle said that the point of order that they had not carried out their instructions was not well taken. He did not hold, and no Speaker has ever held, that if conferees flagrantly, contemptuously disregard the mandate of the House there may not be a point of order raised to check their action. As I have said, the Manual seems to indicate that the present occupant of the chair had once passed on this question, but I realize that the Speaker would not suggest that he had ever passed upon it, except in a very casual and offhand way.

Mr. MEEKER. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. MEEKER. I make the point of order that the other Members of the House should converse in whispers.

The SPEAKER. The Chair can not make them whisper, but he can keep them from talking—temporarily.

Mr. MONDELL. December 22, 1913, Mr. GLASS, of Virginia, presented a conference report on a currency bill, against which the gentleman from Oklahoma [Mr. MURRAY] made the point of order that the conferees had not obeyed the instructions of the House. Before the Speaker could make a statement in regard to the matter the gentleman from Illinois [Mr. MANN] said:

Mr. Speaker—

And I take it that the gentleman from Illinois [Mr. MANN], who is a very good parliamentarian, one of the best, had never gone into this matter thoroughly. He had read the captions that we have all read, but possibly had not gone into the cases. He said:

Mr. Speaker, I submit that is a matter that might affect the acceptance or rejection of the report, but not a point of order.

Whereupon the present occupant of the chair said:

The Chair thinks that is correct. Of course, when the conference report is read, when it comes up for consideration, the gentleman from Oklahoma will have his rights. The Chair does not know what is in the report, and does not think that anyone else does, except the conferees.

In that case the Chair did not decide that the point of order did not lie. The Chair said he did not know what was in the conference report.

I call the attention of the Chair to this fact, that if he sustains the point of order or holds that the point of order lies against a report of conferees where they exceed their authority, the Chair must still decide whether in this particular case the conferees did exceed their authority. There are really two questions here—the question as to whether the point of order may be made in such a case; and, second, as to whether this is a case in which the point of order was well taken. Speaker Carlisle said the point of order was not well taken in that particular case on which he ruled.

In this particular case it is known of all, and I think it is proper to say here that the House conferees have from the beginning been opposed to the provision of the Senate on which the House instructed them. They have from the beginning used every device known to the astute parliamentarians on that committee to prevent the House from voting on this question, and it was only when the gentleman from Pennsylvania [Mr. MCFADDEN] made the motion to recommit that the House had an opportunity to express its opinion. That opportunity had theretofore been denied by the action of the chairman and other members of the committee. The House conferees went into the conference opposed to this provision, as they had been from the beginning. They flagrantly and contemptuously disregarded the instructions that the House had given them, and having done so they come back into the House and endeavor to hide behind the proposition that the House has not the right to challenge their action in disregard of the instructions that the House gave them.

Mr. Speaker, it is all very well to say that there is a remedy. We have heard that many times on conference reports. Let us imagine a conference report on an important bill coming in here the day before the close of Congress containing a provision in regard to which the House is very earnest and very insistent and on which, by an overwhelming majority, practically unanimously, the House had instructed its conferees. Imagine in such a case that the conferees in contemptuous disregard of the will of the House, as thus expressed, had brought in a conference report ignoring their instructions with the idea that, as the time for the close of the session was about to strike, the House was not likely to vote down a conference report under such circumstances. Is the House in such a case without a remedy, except the heroic one of voting down an entire conference report? If that is the only remedy we have, Mr. Speaker, then we may

as well admit that the House has no control over its conferees, that they may do as they please, that they may be instructed time and again and may disregard those instructions as they see fit and insist that we comply with their will, yield to their view against our better judgment, because the only remedy we have is to vote down an entire conference report, as to the principal features of which we may be in entire agreement.

Now, Mr. Speaker, in conclusion I contend that the question is to whether a point of order lies against disregard by conferees of instructions never has been settled. I should like to see the present occupant of the chair settle it. Speaker Carlisle never ruled that a disregard of instructions did not present a matter against which a point of order could be made. He ruled that in a given case there was no disregard of instructions. There was a general acquiescence in the instructions and an effort to carry them out. The present occupant of the chair never held that a point of order would not lie against the disregard of instructions. He held that he did not know what was in the report, and if the gentleman from Oklahoma [Mr. MURRAY] had later presented his point of order and it had been clear—I do not know whether that was the case or not—that instructions had been disregarded, I am satisfied the Speaker would have said that this House must have its way. No committee of this House, no two or three men on a conference, should be allowed to disregard the instructions of the House expressed in an aye-and-no vote and get away with it. When they do, as they have done in this case, they should be met with a point of order that challenges their disregard of the judgment of the majority as expressed in instructions. [Applause.]

Mr. CRISP. Mr. Speaker, I do not intend to take up much of the time of the House, for I do not think I can add anything to the splendid presentation of this point of order made by the gentleman from Mississippi [Mr. HARRISON] and the gentleman from Wyoming [Mr. MONDELL]. I thoroughly agree with the position taken by both of them. It seems to me that this decision is more important to the House than the bill before the House. It is that which induces me to arise and present to the Speaker briefly the thought I have in regard to it.

Now, what is the situation? It is a legal one of principal and agent. The House is the principal and selects its agents to transact certain business for it, the principal. The House instructs its agents, the conferees, to do a certain thing. Surely, Mr. Speaker, the principal has authority to bind its agents. This House has instructed these agents to do a certain thing. It seems to me that if these agents go contrary to those instructions and bring in a report in opposition or contrary to the instructions, that the principal will not consider the report at all but will disregard it entirely.

The SPEAKER. The Chair would like to ask the gentleman a question.

Mr. CRISP. I will answer it, Mr. Speaker, if I can.

The SPEAKER. It seems to the Chair that the gentleman has laid down the rule in his last sentence, if they do not obey the instructions that the report ought to go for naught. Is not that the duty of the House instead of the Speaker?

Mr. CRISP. Mr. Speaker, I think not. I believe it is better for the conferees if the Speaker should pass upon the point, for the reason that I was proceeding to lead up to and present it to the Chair. If a Member in charge of a bill on this floor is turned down by the House, he loses control of the measure; the House takes it away from him and gives it to the man leading the opposition. Now, it is apparent to this House, and the Speaker must take cognizance of it, that the conferees appointed to represent the House in this matter were opposed to the views of the House. They fought the proposition before the House and the House decided against them. What did the House do? The House did not say, "Gentlemen, we will not appoint you as our agents." It said, "We know you are against the views of the House; but we feel, gentlemen, that when we appoint you as agents and give you instructions you will carry out the instructions of the House."

Therefore, instead of the ones who won out in the House asking the Speaker to appoint conferees in accord with the views of the majority, the House simply instructed the conferees to agree in substance to the Hardwick amendment, the matter at issue. It seems to me the only question for the Speaker to decide is whether or not the report contravenes the substance of the Hardwick amendment. If it does, it seems to me the House is entitled not to have its time taken up considering a report that is brought in contrary to the instructions of the House, but that the point of order should be sustained. As suggested to me by the gentleman from Wyoming [Mr. MONDELL], if the instructions of the House had been carried out, the two Houses would have been brought together at once. In conclusion I desire to present this thought to the Speaker, and to propound an inquiry to him. If conferees disregard the instructions of the House and a point of order is overruled to their report and the House refuses to adopt the conference report, will the Speaker then appoint conferees who are in favor of the action of the House, or will the Speaker reappoint the same conferees?

Mr. MASON. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. MASON. Just a moment. As amicus curiæ—a friend of the court—I desire to make a suggestion upon the point of order.

The SPEAKER. The Chair will be glad to hear the gentleman.

Mr. MASON. Mr. Speaker, I can quite agree with the statements made by my colleague. The elementary principle, however, of a presiding officer is that he is the mere servant of the body that appoints him. By this point of order gentlemen are asking the Speaker to determine a question of fact—first, whether or not the conferees have disobeyed the instructions, and, second, if they have disobeyed the instructions, whether the conference report should go out upon a point of order. Upon the question of fact whether they have disobeyed instructions it seems clear they have, but is it a fair parliamentary proceeding to ask the Speaker to determine whether the servants of the House upon a committee have disobeyed the House and then rule out their action upon the point of order, leaving a parliamentary situation demanding further action upon the part of the House? In other words, they ask the presiding officer of the House to find as a matter of fact that the conferees have disobeyed instructions, and then, as a matter of parliamentary law, that it is subject to a point of order. I think it is calling upon the presiding officer to exercise too much power, away beyond the legitimate functions for which he is appointed as Speaker of the House.

Mr. PARKER of New Jersey. Mr. Speaker, may I make one remark about the arguments in this matter, which so far have disregarded the word "substance" in the House instructions? The substance of the Hardwick amendment was a reasonable charge not to exceed one-tenth of 1 per cent. There is no change made in that substance in saying how the reasonableness shall be determined, because the party interested is obviously not the proper judge of what is reasonable; and this amendment, therefore, has been perfected so as to afford an incidental means of determining what is reasonable. As to the second amendment, which excepts the Federal reserve banks, it seems to me, although I do not know, that the Hardwick amendment was never intended to apply to the Federal reserve banks.

The SPEAKER. The Chair is ready to rule.

Mr. GLASS rose.

The SPEAKER. The gentleman from Virginia.

Mr. GLASS. Mr. Speaker, I feel pretty confident of what the ruling of the Chair will be, but I desire to present the position of myself and my colleagues to the House. A question of fact, as well as a question of parliamentary practice, is involved in this discussion. It is all very well for gentlemen to say that the conferees on the part of the House have "contemptuously" disregarded the action of the House in instructing the managers, but it is quite a different thing to plausibly explain that proposition to the House. I am not disturbed by the accusation, because it comes from the gentleman from Wyoming [Mr. MONDELL], who is too much addicted to extreme adjectives to be seriously regarded when he undertakes to characterize a proposition. The conferees on the part of the House would be incapable of disregarding the plain instructions of this House, "contemptuously" or otherwise, and I would confidently appeal to the Speaker if that were the only point involved in this question of order, and abide by his decision upon that point alone.

Let us see what happened. The House, without a word of debate or of explanation, without understanding the question—and I make that assertion advisedly because a score of Members who voted for these instructions have told me that they had a misconception of the proposition—adopted the motion of the gentleman from Pennsylvania [Mr. MCFADDEN] to instruct the managers on the part of the House to "agree to the substance" of the so-called Hardwick amendment. If the House had desired to approve the Hardwick amendment as written into the bill, it was very easy for the House to have said so explicitly. Had the motion read that "the managers on the part of the House are instructed to agree to the Hardwick amendment," the managers would not have hesitated one moment to carry into effect the action of the House; but the very fact that we were not directed to accept the Hardwick amendment in toto, but were instructed to agree only to "the substance" of it, instantly and inevitably suggested to the managers that the House itself was not satisfied with this crude and utterly un-

just exaction upon the commerce of the country, but relied upon the managers on the part of the House and Senate to alter the phraseology of the bill and, in substance, make it workable.

Mr. CANNON. Mr. Speaker, will the gentleman yield?

Mr. GLASS. Yes.

Mr. CANNON. The amendment known as the Hardwick amendment reads:

Provided further, That nothing in this or any other section of this act shall be construed as prohibiting a member or nonmember bank from making reasonable charges—

And so forth. Then there is added by the amendment agreed to by the House conferees the following language:

to be determined and regulated by the Federal Reserve Board.

Another amendment at the close is inserted and agreed to by the House conferees that did not appear in the Hardwick amendment:

but no such charges shall be made against the Federal reserve banks.

That "the member bank" is entirely new and the other is new.

Mr. GLASS. The Federal reserve banks, I will say to the distinguished gentleman from Illinois, are not "member banks."

Mr. CANNON. Are not member banks?

Mr. GLASS. Why, no.

Mr. CANNON. Very well.

Mr. GLASS. The reference is to the 12 regional reserve banks.

Mr. CANNON. I put this question to the gentleman, even if that be correct. Why is it put in except for this reason, that Federal reserve banks would become a clearing house for all the member banks at once, and a great majority of banks, the State banks scattered throughout the length and breadth of the country, would be cut off from this business, and the object of the amendment would be, which appeared for the first time in this bill, that you would seek to drive the State banks into the Federal Reserve System, and if they do not come a penalty would be that clearances would be through the member bank and through the Federal reserve bank.

Mr. GLASS. Mr. Speaker, I will in a moment reach that phase of the proposition and explain that amendment to the House fully. The managers on the part of the House have no concealments to make about the matter. They want to deal in the utmost frankness with the House. If the House thinks, after the matter has been presented, that the managers on the part of the House have exceeded instructions in any particular, it is within the power of the House to instruct the managers more specifically, and the managers will agree to any instruction that the House shall give.

But I repeat, Mr. Speaker, the very fact that the managers on the part of the House were not specifically directed to accept the so-called Hardwick "rider" inevitably prompted the suggestion that the House wanted, or in any event was willing, that the managers on the part of the House might rewrite the Hardwick amendment so long as they should adhere to the substance of it. Now, what is the substance of the Hardwick amendment? The substance of the amendment is that banks—not merely country banks but all banks—may charge for collecting and paying checks for remission. Let us no longer be swayed by the tyranny of a phrase, for that amounts in the end to demagogy. Gentlemen speak fervently and unctiously about "struggling country banks" without letting it be known that all banks in the United States outside of the 52 reserve and central reserve cities are embraced in the classification of "country banks." When people talk to you about these "struggling little country banks" they mean, in some instances, banks with $3,000,000 of capital. One of the men behind this agitation, who has helped to lobby this rider onto this bill, to which it is not germane, is the president of a "country bank" with $3,000,000 capital and one of his first lieutenants is the president of a bank with $1,000,000 capital and $1,000,000 surplus and $24,000,000 assets. So when they talk about the "little country banks" they mean practically the entire banking community of the United States outside a few large money centers. What is the substance of the Hardwick amendment? It is that all banks may make a "reasonable charge," not only for collecting but, mark you, for paying their own checks across the counter for remission.

Mr. MONDELL. Mr. Speaker, will the gentleman yield?

Mr. GLASS. Mr. Speaker, I hope I will not be interrupted. I have no reputation as a parliamentarian to lose, and, therefore, I may speak with more freedom than some gentlemen who have earned a great reputation as parliamentarians, but who are utterly wrong on this proposition. [Applause.]

Mr. MONDELL. Mr. Speaker——

The SPEAKER. Does the gentleman from Virginia yield?

Mr. GLASS. No; I do not.

Mr. MONDELL. Mr. Speaker, I make the point of order that the gentleman is not discussing the point of order. He is discussing the merits of the question. He is discussing the question as to whether or no the conferees did exceed their authority and on that he is discussing the merits of the proposition.

The SPEAKER. Well, the point of order is overruled. [Applause.]

Mr. GLASS. Mr. Speaker, the point of order——

The SPEAKER. The gentleman from Virginia seems to be laying a foundation and expressing an opinion about the point of order raised by the gentleman from Mississippi [Mr. HARRISON] and the gentleman from Wyoming [Mr. MONDELL].

Mr. GLASS. Precisely. The substance of the Hardwick amendment was that all banks should make a reasonable charge on collecting—and, one of the most extraordinary things that was ever suggested in national lesiglation—paying their own checks for remission. The rider did not say who should determine the reasonableness of the charge. It fixed a maximum charge which, in thousands of cases, all must know would be utterly excessive and unreasonable. My distinguished friend from Mississippi [Mr. HARRISON] expressed amazement that the House managers should have presumed to write into the bill the suggestion that the Federal Reserve Board shall determine the reasonableness of the charge. He urged that we were conferring "judicial powers upon an administrative board," but he is perfectly willing that the banks may determine the reasonableness of this tax which they are to exact from the industry and commerce of the country. He is not willing to delegate to the Federal Reserve Board—an altruistic and distinterested body, that derives no benefits from the operations of the system, some members of which have given up large incomes to serve the public—he is not willing to confer judicial authority upon this distinterested board to determine what is a fair and reasonable charge by these banks, but serenely expresses a willingness to delegate to the banks themselves, the party largely in interest, the right to determine the charges which they may exact from commerce. The managers on the part of the House think that in that particular they have adhered——

Mr. CANNON. Will the gentleman yield at that point?

Mr. GLASS. In a moment—that they have adhered to the substance of the Hardwick amendment, because the amendment itself left open the question as to what, in thousands of cases, would be a reasonable charge, and left undetermined the question as to who should determine the reasonableness of the charge. Now I yield to the gentleman.

Mr. CANNON. At that point the Hardwick amendment reads as follows, fixing the amount of charges that may be made:

but in no case to exceed 10 cents per $100 or fraction thereof.

And that applies not only to the State banks but applies to member banks.

Now, then, that is nullified by the last amendment.

Mr. GLASS. The gentleman from Illinois [Mr. CANNON] would, I am sure, upon a moment's reflection, agree with me that there never was a greater absurdity on earth than the insertion of those words "nonmember banks" in this Hardwick amendment. The Congress has no control whatsoever over nonmember banks. It can not regulate their charges and will not regulate them if this Hardwick amendment should prevail. Many of them will continue to charge one-quarter of 1 per cent; many of them will continue to charge 1 per cent; many of them will continue to do what I can show you banks have done—charge $5 for cashing a $75 draft. This House has no control over the nonmember bank in this matter. Even the Federal Reserve Board has no control over their operations unless they voluntarily join the voluntary collection system established by the Federal Reserve Board.

Mr. CANNON. Will the gentleman yield further?

Mr. GLASS. Yes.

Mr. CANNON. Under the Hardwick amendment a member bank could charge not to exceed one-tenth of 1 per cent.

Mr. GLASS. Precisely so; but I was pointing out the fact——

Mr. CANNON. Under the last clause practically a member bank could not charge anything.

Mr. GLASS. I am coming to that. The gentleman is entirely mistaken about it. What I was pointing out was that in thousands of cases the charge of one-tenth of 1 per cent is extortionate. I can present letters of trustworthy merchants, and even of bankers themselves, showing, particularly in the State of Minnesota, that the charge of one-tenth of 1 per cent is 100 per cent greater than the express charge for the actual shipment of funds from various points. So that I say in a thousand cases the charge of one-tenth of 1 per cent is excessive and in some cases it is extortionate.

Now, then, who is to determine what the charge shall be? The managers on the part of the House thought it was up to them to say. Accepting the text of the Hardwick amendment without the crossing of a "t" or dotting of an "i" we felt, from the wording of the motion under which we operated, that we had the right to say who should determine that charge. And who could better determine it than a disinterested party, rather than the banks themselves?

Now, as to the other alteration made by the managers. I will tell the House frankly what prompted that modification. It was suggested by the managers on the part of the Senate, and the managers for the House having no desire, "contemptuously" or otherwise, to disregard in any respect the instructions of this House, accepted it. The thing that immediately prompted this modification of the Hardwick amendment was the fact that the governor of the Federal Reserve Board addressed a letter to the chairman of the House Committee on Banking and Currency directing attention to the fact that, under the terms of the Hardwick amendment, should one-half of the banks only charge exchange, it would cost the Government of the United States $1,000,000 to float the liberty loan. Therefore the managers on the part of the Senate added these words to the proviso:

but no such charges shall be made against the Federal reserve banks.

That, of course, has reference to 9 of the 12 regional reserve banks.

There was another reason for putting that modification in the bill. The existing law explicitly provides that Federal reserve banks shall receive at par checks and drafts of member banks. How much justice, how much equity, is there involved in requiring the reserve banks to par checks of member banks and then permitting, as the Hardwick amendment would permit, member banks to make charges against Federal reserve banks—to use the Federal reserve banks to clear their own checks and to charge the Federal reserve banks on bank checks cleared through them?

Mr. REAVIS. Will the gentleman yield to me?

Mr. GLASS. Yes.

Mr. REAVIS. Does the gentleman consider the Hardwick amendment as granting authority to make the charge against Federal reserve banks?

Mr. GLASS. I undoubtedly do.

Mr. REAVIS. Do you think——

Mr. GLASS. I construe the Hardwick amendment as granting authority to your bank to exact a charge on your checks, on your deposits, taken in person, and collected across the counter.

Mr. REAVIS. If the Hardwick amendment grants authority to make the charge through the Federal reserve bank, is it a substantial compliance with the amendment to say that the charge shall not be made against the Federal reserve bank?

Mr. GLASS. We think so, or we should not have put it in there.

Mr. WINGO. Will the gentleman yield to a question right there?

Mr. GLASS. I will.

Mr. WINGO. Is it true that under the present existing law, and in a way together with other provisions that are in the pending bill, the Federal Reserve Board has authority to establish a compulsory clearing system?

Mr. GLASS. Yes; but it never has exercised the authority.

Mr. WINGO. What I want to get at is whether they have authority to say that the compulsory clearing system can use the banks as a clearing house?

Mr. GLASS. That is a disputed legal question; and, not being a lawyer, I do not undertake to decide it. The board has not established a compulsory system, but has established a voluntary system. No bank, whether a member bank or nonmember bank, is compelled to join.

Mr. WINGO. But the provisions of this bill will accomplish that purpose, will they not?

Mr. GLASS. I hope so.

Mr. WINGO. It is intended by the provisions of this bill to do what Congress thought it had done before, to establish a clearing-house system, using the 12 regional reserve banks as a clearing house.

Mr. GLASS. I do not agree to that proposition.

Mr. WINGO. The gentleman does not think that has been done by this measure?

Mr. GLASS. No; I do not.

Mr. PLATT. Mr. Speaker, will the gentleman yield?

Mr. GLASS. Yes.

Mr PLATT. I wanted to bring out again the fact that the Hardwick amendment is a Senate amendment, and the managers on the part of the Senate have put in this phrase:

but no charges shall be made against the Federal reserve banks.

Mr. GLASS. They did.

Mr. PLATT. And that is acceptable to the Senate?

Mr. GLASS. Yes.

Mr. HARRISON of Mississippi. Mr. Speaker, will the gentleman yield?

Mr. GLASS. Yes.

Mr. HARRISON of Mississippi. Referring to the letter of May 10 addressed to the chairman of the committee by Mr. William P. G. Harding, governor of the Federal Reserve Board, I notice that at the bottom of the letter is this language:

This, I think, would give you the opportunity that you desire to handle the matter in conference.

The letter in full is as follows:

FEDERAL RESERVE BOARD,
OFFICE OF THE GOVERNOR,
Washington, May 10, 1917.

Hon. CARTER GLASS,
House of Representatives, Washington, D. C.

DEAR MR. GLASS: Since you were in my office this afternoon, Mr. Delano tells me that he just had a talk over the telephone with Gov. Strong, of the Federal Reserve Bank of New York, who calls attention to the possibility, if not strong probability, of the Government having to pay bankers a million dollars exchange charges in connection with subscriptions to the liberty loan, assuming that the Hardwick amendment, which the House has instructed its conferees to agree to, becomes a law.

This estimate is based upon the assumption that one-half of the total issue of bonds will be placed outside of New York. Subscribers are permitted to make payment by their checks upon local banks properly certified, and, under authority given by Congress, many of these banks would undoubtedly avail themselves of the opportunity to charge one-tenth of 1 per cent. Should this exchange charge apply to one-half of the subscriptions, the expense to the Government would be $1,000,000.

I would suggest, therefore, that you call the attention of Senator OWEN to this, and suggest that he ask the Senate to reconsider the Hardwick amendment, with a view of changing it so as to prevent it from applying to transactions connected with Government bonds. This, I think, would give you the opportunity that you desire to handle the matter in conference.

Very truly, yours, W. P. G. HARDING, *Governor.*

Now, when he said in that letter—

This, I think, would give you the opportunity you desire to handle the matter in conference—

Is that the question you wanted to get into conference on, that was spoken of by Mr. Harding?

Mr. GLASS. What question?

Mr. HARRISON of Mississippi. The one that the gentleman from New York [Mr. PLATT] refers to?

Mr. GLASS. No. As a matter of fact, the conferees had met twice before the Senate conferees suggested this proposition that no charge should rest against the Federal reserve bank.

Mr. TOWNER. Mr. Speaker, will the gentleman yield?

Mr. GLASS. Yes.

Mr. TOWNER. If the House voted down the conference report, how would the conferees feel about again taking up the matter in conference? What would be their action in regard to the Hardwick amendment?

Mr. GLASS. Why, the conferees on the part of the House would ask for further instructions, and would literally obey them, as they think they have done in this case.

Mr. TOWNER. Would the conferees not feel, the House in view of the present situation not agreeing to the conference report, that the conference agreement as to the Hardwick amendment was not a compliance with their instructions?

Mr. GLASS. The House managers would not feel that they had exceeded their instructions. No vote of this House would make me believe that we have exceeded instructions. But, in case the House should reject the conference report, the managers would feel that the House was not in agreement with the alterations that the managers had made.

Mr. TOWNER. That is what I had in mind.

Mr. GLASS. And would ask the House to give more explicit instructions. Whatever those instructions might be, the managers would obey them.

Mr. TOWNER. I am not trying to probe the gentleman on the matter, but now I would like to know—and I think the House would like to know—if voting down the conference report would be considered by the conferees as an indication that the changes made by the conferees were not satisfactory?

Mr. GLASS. Were not satisfactory? Undoubtedly. But the conferees would want to know whether both alterations were objectionable, or merely one. The conferees would want to know whether the House would be willing to leave the determination of the "reasonableness" of the charges to the Federal Reserve Board or to the banks. The conferees would want to know which one of the two, if either, of the alterations appeals to the House.

Mr. McFADDEN. Mr. Speaker, will the gentleman yield?

Mr. GLASS. Yes.

Mr. McFADDEN. I would like to ask my colleague whether or not as a matter of fact all the members of the conference committee are opposed to the Hardwick amendment?

Mr. GLASS. Yes; opposed to the Hardwick amendment, but not opposed to a reasonable charge.

Now, if I may proceed. I want to apologize to the House for having detained it so long; but——

Mr. FESS. Mr. Speaker, will the gentleman yield?

Mr. GLASS. Yes.

Mr. FESS. I was interested in the statement of the chairman of the committee that nonmember banks would not be in any way affected, even though the language "nonmember banks" were used in the bill. I do not understand the force of that statement.

Mr. GLASS. I did not say they would not be affected in any way. I said Congress has no authority whatever over charges made by nonmember banks, so that the use of those words there is inept.

Mr. FESS. I want to ask whether the chairman is speaking advisedly when he says that the Congress has no control over the charges of the nonmember banks?

Mr. GLASS. Absolutely none on earth; and yet most of this furore has arisen from nonmember banks. Would the gentleman like to know why? It is because they could not stand the competition of banks that would not make the charge.

Mr. FESS. I should like to know whether the chairman would state if we would write in the bill that no charge shall be made on the Federal reserve banks that that does not apply to nonmember banks?

Mr. GLASS. Absolutely not. No nonmember bank that does not voluntarily join the collection system established by the Federal Reserve Board will be specifically affected. No law that we pass here can directly affect them. The only way they can be affected is incidental. They find that patrons, the merchants and depositors generally, will not stand for this charge and patronize in preference banks that agree not to make the charge. Two-thirds of the commercial banks in the United States have voluntarily joined a clearing system representing 85 per cent of the banking business. Banks doing 15 per cent of the banking business have organized this propaganda. [Applause.]

Mr. FESS. It is a new view to me.

Mr. GLASS. It is a correct view, though——

Mr. FESS. It is a new view to me, if we write in the bill that no member bank shall charge, that nonmember banks will not be controlled.

Mr. GLASS. The nonmember banks are the State banks. They derive their charters from the States.

Mr. FESS. I will accept the gentleman's statement.

Mr. GLASS. My opinion may not be good, because I am not a lawyer, but I have heard good lawyers state that. [Laughter.] One reason why the House managers readily agreed to the suggestion of the Senate managers to exclude the 12 regional reserve banks from this charge was that the Secretary of the Treasury is authorized to constitute the 12 regional banks the fiscal agents of the United States Government.

The thing had in view was that ultimately we might abolish some of the subtreasuries, carry the funds of the Government in the regional reserve banks, and transact all the business of the Government by checks on Federal reserve banks. That was an additional reason for embodying that modification in the bill and in the report.

Mr. Speaker, I think I have covered, as well as I can in a brief statement, the question of fact as to whether or not the managers on the part of the House have either "contemptuously" or otherwise disregarded the instructions of the House On that point I want to conclude by saying that your managers, whatever may be their preconceptions and their individual judgment, are incapable of deliberately violating the instructions of this House. I would be distressed to have any Member of this House think otherwise. We are willing to obey the instructions of the House if the House will give its instructions deliberately and unmistakably; but when a "rider" is put on a bill here that threatens to gravely impair the usefulness of the voluntary-collection system established by the Federal Reserve Board, without one word of explanation or debate, the House managers had a right to assume that there was no deliberation, but only misconception. With a score of Members telling me personally that they did not know what they were voting for; that they were misled by Members standing at the doors and telling them that "our vote is yea," as if there was some party division in the House, the managers, taking the peculiar wording of the instruction into account, had the right to understand that the House wanted some modification of the so-called Hardwick amendment, which is an atrocity as well as a monstrosity in its original form. [Applause.]

Mr. Speaker, upon the question of parliamentary procedure it is frank temerity on my part that leads me to have a word to say upon that; because, although I have been a Member of this House for 16 years, I know as little about parliamentary processes as a cat. [Laughter.] It is a misfortune which I realize every time I have a bill to present, but I have not had time from other duties to get a knowledge of parliamentary law. On the point of order I need not call the attention of the Speaker to pertinent cases in Hinds' Precedents. That has already been done by the gentleman from Mississippi [Mr. HARRISON] and the gentleman from Wyoming [Mr. MONDELL], where it is stated that—

Although a conference report may be in disregard of instructions given the managers, yet it may not be ruled out on a point of order.

And I want to emphasize, as my colleague from Mississippi [Mr. HARRISON] emphasized for a different purpose, what Mr. Speaker Carlisle said on the subject. He said:

They have now brought it back to the House in order that the House may have an opportunity to recede from its action if it desires to do so, or further insist upon it if it desires to do so.

Is not that precisely what your managers have done? You framed your instruction in a way to suggest that the Hardwick amendment should be altered, its phraseology modified, and that we have done, not interfering with its substance. We have brought it back here for you to determine whether or not you approve the change of terms, whether you want to adopt it with the modifications that we have made. So I emphasize what Mr. Speaker Carlisle said upon the subject. We are willing to obey the instruction of the House, if the House will state its instruction, so that men of ordinary average intelligence may understand. What do you mean? Do you mean that my bank shall confiscate a part of my deposits by exacting a fee for paying my checks? That can be done under the Hardwick amendment. Any one of you may have one-tenth of 1 per cent of your deposits confiscated under the Hardwick amendment. Does the House want that? I do not believe that the House wants it, and therefore we are back here to have that very question determined. [Applause.]

Mr. LENROOT. Will the gentleman yield for one question?

Mr. GLASS. Yes.

Mr. LENROOT. I should like to ask the gentleman, if he thinks the House did not understand the situation when it gave its instructions, could not the conferees have reported to the House a disagreement and then have asked for such modification of the instructions as the gentleman thought ought to be given?

Mr. GLASS. We were instructed not to disagree but to agree to "the substance" We not only agreed to the substance, we agreed to the text. We have not crossed a "t" nor dotted an "i." We have brought the Hardwick amendment back with just such a modification as the text of the instruction would seem to sanction.

Mr. LENROOT. My question was prompted by the statement of the gentleman that they had brought the matter back to the House, where the House could have full opportunity to act upon this specific matter, while now it can not do so without rejecting the report.

Mr. GLASS. The House could, in the first instance, have moved—I do not know whether I am right, but it seems to be good sense—the House could, in the first instance, have agreed to the Hardwick amendment without reference to the conference.

Mr. LENROOT. No; it could not.

Mr. GLASS. Why not?

Mr. LENROOT. Because it was a part of the Senate substitute.

Mr. GLASS. I do not know as to that; but one thing the House could have done. One thing the proposer of this motion could have done. He could have moved that the managers on the part of the House be instructed to agree to the Hardwick amendment. He could have done that. He did not do it.

Mr. McFADDEN. I should like to point out to the gentleman right there that when that word "substance" was introduced and the House voted on it, it was not voting on the word "substance." It was the intention of the House at that time that the conferees should maintain the Hardwick amendment.

Mr. GLASS. How could we tell that? Not voting on the word "substance"! Why, the gentleman himself proposed that very thing when he put in the word "substance." I am not a mind reader. I could not tell what the gentleman wanted

except by the words he used. Now, Mr. Speaker, one other quotation from Hinds' Precedents——

Mr. McFADDEN. Will the gentleman yield again?

Mr. GLASS. Yes; although I am sure the House is impatient.

Mr. McFADDEN. I want to point out to the gentleman that the words which the conferees have added to the Hardwick amendment nullify that amendment entirely. The very purposes of it are defeated.

Mr. GLASS. Oh, we do not agree to that at all.

Mr. PLATT. Will the gentleman yield?

Mr. GLASS. Yes.

Mr. PLATT. As a matter of fact the American Bankers' Association suggested that first amendment themselves, that the charges should be regulated by the Federal Reserve Board.

Mr. GLASS. Absolutely. And not only that, but the only two bankers' associations that have met since this Hardwick amendment was proposed have voted, one of them unanimously and the other overwhelmingly, against the Hardwick amendment. One of those associations was the Bankers' Association of the State of Pennsylvania. [Applause.]

Mr. McFADDEN. Will the gentleman yield?

Mr. GLASS. Yes.

Mr. McFADDEN. We might say, in explanation of that——

Mr. GLASS. I do not wish the gentleman to explain that now. He can explain that when we come to discuss the merits of the proposition. I want to get through with this point of order.

Now, let me call the attention of the House to the fact that Hinds' Precedents says:

Where one House strikes out all of the bill of the other House after the enacting clause and inserts a new text and the differences over this substitute are referred to a conference the managers have a wide discretion in incorporating germane matters, and may even report a new bill on the subject.

Now, I deny, in the first place, that the conferees have disregarded the instructions of the House. I am perfectly willing that the Speaker may determine that point and may make his ruling exclusively upon that, but when we come to parliamentary processes it is clearly set forth that where one House strikes out all after the enacting clause of a bill and substitutes a new bill the conferees have almost unlimited discretion and may report an entirely new bill.

We have not reported an entirely new bill. We have simply reported two reasonable modifications of a crude and barbarous amendment put on in the Senate as a "rider" to a bill dealing with quite different problems. This "rider" was thrown out of the House as not germane. It was put on as a "rider" in the other body and sought to be thrust through here without a word of debate or a moment's intelligent consideration.

So, Mr. Speaker, I contend that the facts have not been correctly stated by our adversaries, and, further, that their point as to the form of procedure should be overruled.

Mr. MONDELL rose.

The SPEAKER. The Chair will hear the gentleman from Wyoming for two minutes.

Mr. MONDELL. Mr. Speaker, while the gentleman from Virginia [Mr. GLASS] has modestly claimed that he is not a parliamentarian, he has, as a matter of fact, wonderfully clarified the situation, first, by declining during his long argument to discuss the question as to whether or not a point of order lies against the refusal of the conferees to follow instructions. He has not argued that proposition at all. He virtually admits by his failure to do it that a point of order does lie in such a case. Second, his entire argument is a confession that the conferees did not carry out their instructions. Whether or not I was justified in saying that they were contemptuous in their disregard of instructions I leave it to the House to judge. The gentleman from Virginia referred to the instructions of the House as instructions to agree to a contemptuous form of graft. His entire discussion indicates contempt of the attitude and instructions of a majority of the House.

Mr. GLASS. Will the gentleman yield?

Mr. MONDELL. Yes; I will yield to the gentleman although he would not yield to me.

Mr. GLASS. I did not characterize the instructions of the House as graft; I interpreted the instructions to the managers of the House as instructions to eliminate the graft feature of the amendment.

Mr. MONDELL. He so interpreted the instructions of the House as to nullify them.

Mr. GLASS. No; to eliminate and regulate the graft.

Mr. MONDELL. The gentleman says the instructions of the House constituted and provided for a contemptible form of graft and he so interpreted them as to entirely modify them with a view of removing what he believed to be a form of graft. In other words, Mr. Speaker, he admits by his failure to discuss it that a point of order does lie in a case like this, and, second, his entire argument is an admission that the conferees did disregard their instructions.

The SPEAKER. The Chair is ready to rule. The situation is this: The Senate struck out everything after the enacting clause of the House bill. It has been decided so many times that it is hardly necessary to repeat it, that where that is done a very wide discretion is given to the conferees, even to the bringing in of an entirely new bill. Of course such new bill would have to be on the same subject.

The transactions in regard to conference reports are divided into two parts—what the House can do and what the Speaker can do. On the 23d day of June, 1812, 105 years ago, Mr. Speaker Henry Clay laid down the limits of what conferees can do so clearly that his ruling has been followed ever since. The conferees can not go outside of what is submitted to them and lug in entirely new matter and new questions. They are always trying to do it. As the gentleman from Wyoming [Mr. MONDELL] suggests, it is a very serious proposition for the Speaker to refuse to knock out a conference report in the last days of the session, and it is a very serious question for him to knock it out. The Chair did so twice in the last days of a session on very important bills, but both were clear cases. The Chair did it with a great deal of reluctance, but it had to be done under the universal practice.

The Speaker has not a thing to do in passing upon the question of whether the conferees did or did not comply with the instructions of the House. That question is for the House to decide. That has been decided, I do not know how many times, but several times, and the Chair decided it once himself. That was the reason my opinion in that case was so short. The Chair did not elaborate it, for the House was busy, and it had been decided that way several times, and he simply followed the old ruling.

The leading case, the one that has been referred to, is found in section 6395 of Hinds' Precedents. The opinion was written by Mr. Speaker Carlisle. He was a great man and a great Speaker. The headline of Mr. Speaker Carlisle's decision was written by Asher C. Hinds, construing Mr. Speaker Carlisle's opinion. It is not any secret with people who have been around here any considerable length of time that Mr. Hinds probably knew more about parliamentary law than any other man that ever lived. He knew more than the Speakers whom he advised, and they were great Speakers. He had made it the study of his life. Here is what Mr. Hinds said, and then I will read what Mr. Speaker Carlisle said:

Although a conference report may be in disregard of instructions given to managers, yet it may not be ruled out on a point of order.

On July 31, 1886, the House proceeded to the consideration of the conference report on the river and harbor appropriation bill. The report having been read, Mr. William H. Hatch, of Missouri, had read a series of instructions to the conferees which had been voted by the House, and then made the point of order that the report was in direct violation of every single resolution of the instructions.

After debate, the Speaker ruled:

The proceedings when there has been a disagreement between the two branches of a legislative body are different in many respects from the proceedings in other cases. The paramount object of all such proceedings is to bring the two branches to an agreement. Therefore either may, without reconsidering previous votes, take action in a directly opposite direction. For instance, the House may refuse to concur in an amendment and may afterwards insist again and again upon its disagreement to the amendment, and yet it may ultimately, without reconsidering any of these votes, recede absolutely from its disagreement or recede from it with an amendment, as its judgment may dictate. And while it is competent under the recent practice of the House to instruct conference committees, still the House in that case, as in the other, may ultimately recede from its disagreement to the very amendment in regard to which it had instructed its conferees to insist on a disagreement; and that may be done with or without a conference report upon the subject.

The whole effect of the conference report in such a case is to bring the matter again directly before the body for its consideration and action. That is the whole effect of this conference report. It does not bind the House at all. The House may refuse to agree to it, in which case the whole subject is again open; and the House may absolutely recede from its disagreement to the Senate amendment, or recede with an amendment, which is the course recommended by the present managers of the conference on the part of the House. So the Chair thinks the point of order is not well taken.

In a case where the House instructs one of its ordinary committees to report back a proposition with an amendment, it would be a very serious question whether it could report back without that amendment or with that amendment and others. But that is not in this case.

In the case supposed the House instructs its committee what it shall report to the House. In this case the House has not instructed its conferees what they shall report, but has expressed its judgment on the question and directed them to insist upon striking out certain

clauses. They have now brought it back to the House in order that it may have an opportunity to recede from that action if it desires to do so, or further to insist upon it if it desires to do so.

It seems to the Chair that that opinion is as clear as crystal.

Mr. HARRISON of Mississippi. Mr. Speaker, before the Speaker finally announces his decision, does not the Speaker think there is some difference where there are instructions to conferees to insist upon a disagreement, which would naturally cause a widening of the breach between the Senate and the House, and a motion which instructs the conferees to agree to what the Senate has already done? One brings the two Houses together and the other has a tendency to widen the breach between them.

The SPEAKER. The Chair does not believe there is any difference between instructions of that sort. You can instruct the conferees to do something, or you can instruct them not to do something. This is a matter for the House to decide. The point of order is overruled, and the House has the conference report before it. If the House does not like the conference report, it can vote it down. That is its remedy.

Mr. McFADDEN. Mr. Speaker, I offer the following motion, which I send to the desk and ask to have read.

The Clerk read as follows:

Mr. McFADDEN moves that the bill be recommitted to the conference committee with instructions that the managers on the part of the House obey the instructions given them by the House on May 10, 1917, to agree in conference to the following provisions in the Senate amendment, being the last five lines on page 8 and the first five lines on page 9, which reads as follows:

"*Provided*, Such nonmember bank or trust company maintains with the Federal reserve bank of its district a balance sufficient to offset the items in transit held for its account by the Federal reserve bank: *Provided further*, That nothing in this or any other section of this act shall be construed as prohibiting a member or nonmember bank from making reasonable charges, in no case to exceed 10 cents per $100 or fraction thereof, based on the total of checks and drafts presented at any one time, for collection or payment of checks and drafts and remission therefor by exchange or otherwise."

And that the managers on the part of the House do not agree to or sign any report which does not embody the above provision without any qualification.

Mr. McFADDEN. Mr. Speaker, upon that I move the previous question.

Mr. GLASS. Mr. Speaker, I make the point of order that the motion presented by the gentleman from Pennsylvania is out of order.

Mr. HARRISON of Virginia. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HARRISON of Virginia. Mr. Speaker, the report having been read, and the gentleman from Virginia [Mr. GLASS] keeping his seat and not asking for recognition, the gentleman from Pennsylvania, having obtained recognition of the Chair, offering his motion to recommit, has he not the right to control debate upon it?

The SPEAKER. No. The motion of the gentleman from Pennsylvania is really made prematurely. That motion comes up just like a motion to recommit after the third reading of a House bill, and the gentleman from Virginia [Mr. GLASS] undoubtedly has the right to his hour.

Mr. GLASS. And the motion is on agreeing to the conference report, is it not, and have I not the right to an hour?

The SPEAKER. That is exactly what the Chair was going to state. The gentleman has a right to his hour, and the motion of the gentleman from Pennsylvania [Mr. McFADDEN] will be considered as pending and will be voted on before the conference report is voted on.

Mr. HARRISON of Mississippi. Mr. Speaker, may I ask if there can not be an agreement as to time? Will the gentleman consent to debating this question so the House can understand it?

Mr. GLASS. I will be very glad to reach some agreement with the gentleman for a reasonable time for debate. How much time does the gentleman desire?

Mr. McFADDEN. An hour and thirty minutes on this side.

Mr. GLASS. One hour and thirty minutes on that side; that would be three hours. It seems to me that is too much.

Mr. PLATT. Mr. Speaker, reserving the right to object, this particular matter is by no means the most important thing in this conference report. The most important thing has been overlooked entirely, and we ought not to spend all the time in considering this one matter.

Mr. GLASS. Mr. Speaker, I think an hour on a side would be sufficient.

Mr. CANNON. The gentleman has made an exceedingly able speech of 40 or 50 minutes on the merits of the bill.

Mr. GLASS. I am obliged to the gentleman for his compliment, which I very highly value, but I call his attention to the fact that four gentlemen on that side have made exceedingly able speeches on the merits of the case.

Mr. MONDELL. But the gentlemen on this side who spoke addressed themselves to the point of order.

Mr. GLASS. Oh, that is a question of judgment. I do not think so, and it developed the point of order was not well taken.

Mr. WINGO. Mr. Speaker, these gentlemen who ask to speak are interested in the Hardwick amendment, and while I am interested in that there is another item more important than the Hardwick amendment which the Senate has attached as a vicious rider, and which has never been considered on its merits in the Senate, and never has been considered in a committee of the House—never has been considered by this House. I have not found any two men who agree as to its effects. I propose for one to debate that and see that this House understands what it means.

Mr. CANNON. What is that?

Mr. WINGO. Section 7, which involves the issuance of Federal reserve notes against gold and gold certificates. It involves an exemption from the requirement to maintain in the Treasury a redemption fund against a possible $2,000,000,000 of Federal reserve notes. It involves the issuance of Federal reserve notes against foreign bills and acceptances, and I do not propose that the Hardwick amendment shall exclude the consideration of a question which has never been considered by this House. It is a vicious amendment, which would have been ruled out on a point of order in this House, and yet the Senate has attached it as a rider on this bill and is trying to run it over this House.

The SPEAKER. What is the point the gentleman raises?

Mr. WINGO. I want some division of time by which we can consider that as well as the Hardwick amendment.

Mr. FITZGERALD. Mr. Speaker, I call attention to the fact that the whole debate is on the adoption or rejection of the conference report.

Mr. WINGO. You can not suggest a more important proposal than is proposed in section 7. Were it to come before this House you could not pass it through this House in two days. I think we want a reasonable time to discuss that.

The SPEAKER. Has the gentleman from Virginia any suggestion to make as to time?

Mr. GLASS. I suggested an hour on each side.

Mr. McFADDEN. Mr. Speaker, there are so many gentlemen on this side who want to speak on the various merits of this measure I do not see how we can get along with one hour. I think if the gentleman will make it an hour and a half we will get along.

Mr. FITZGERALD. I wish to state to the gentleman there is another more important measure than this bill to be disposed of to-day, and that is the conference report upon the urgent deficiency bill, and unless arrangement can be made by which that can be taken up I shall object to three hours debate.

Mr. MONDELL. I suggest to the gentleman from New York, who thinks this is a very important matter, and the gentlemen who want to discuss the merits of this important matter, that if he desires to pass the bill referred to that can be taken up after this is disposed of at the end of the three hours' debate.

Mr. FITZGERALD. I am not so sure about it. If the House will permit that bill to be taken up, say, about half past 3 o'clock and dispose of it and then go on with this bill, I shall not object.

Mr. CANNON. Are there any contests in reference to the conference report on the deficiency bill?

Mr. FITZGERALD. I expected to call it up, but I agreed not to call it up before 3 o'clock if consent is given.

Mr. CANNON. Is there any contest that the gentleman knows about? Will it be agreed to, in the opinion of the gentleman, by unanimous consent?

Mr. FITZGERALD. I do not know. The Committee on Naval Affairs is attempting to reach an agreement upon the Jamestown Exposition grounds provision so there will be no controversy.

Mr. GLASS. Mr. Speaker, we are losing time now, and so far as I am individually concerned I would be willing to agree to an hour and a quarter to a side. I suggest to the gentleman from Pennsylvania we agree to an hour and a quarter on a side. The gentleman from New York wants to get up his bill.

Mr. McFADDEN. That is acceptable.

Mr. GLASS. Mr. Speaker, I ask unanimous consent that we agree to two hours and a half debate on the conference report, one-half the time to be controlled by the gentleman from Pennsylvania and one-half——

Mr. STAFFORD. I think the gentleman from New York [Mr. PLATT] ought to control the time.

Mr. GLASS. By the gentleman from New York [Mr. PLATT].

The SPEAKER. The gentleman from Virginia asks unanimous consent that the time on this conference report be limited to an hour and a quarter to a side; he to control one hour and a quarter, and the gentleman from New York [Mr. PLATT] to control an hour and a quarter. Is there objection?

Mr. HARRISON of Mississippi. Mr. Speaker, reserving the right to object——

Mr. GLASS. And at the end of that time the previous question on the conference report be ordered.

The SPEAKER. And at the end of that time the previous question on the conference report be considered as ordered.

Mr. GARRETT of Tennessee. Mr. Speaker, a parliamentary inquiry.

Mr. WINGO. Mr. Speaker, reserving the right to object, I would like to ask what provision we shall have with reference to the arrangement of time.

The gentleman from Virginia and the gentleman from New York are both opposed to the Hardwick amendment, and both of them are in favor of section 7, which I wish to discuss. I do not want to agree to a division.

Mr. GLASS. I do not know about the gentleman's statement as to my position.

Mr. WINGO. I inferred that the gentleman was opposed to it. They have signed this report. I do not think that the time ought to be so handled that those who are really interested and have really studied it and want to present some facts to the House should be shut out.

Mr. MONDELL. Mr. Speaker, reserving the right to object, the motion to recommit is made by the gentleman from Pennsylvania [Mr. MCFADDEN], a member of the committee. It occurs to me that the time on this side ought to be controlled by the gentleman from Pennsylvania. The gentleman from Virginia [Mr. GLASS] is on the other side of the question, and very properly controls time on that side.

Mr. SCOTT of Michigan. Mr. Speaker, reserving the right to object, I desire to call the attention of the Speaker to the fact that the gentleman from New York [Mr. PLATT] is not the ranking member on the committee. The gentleman from Iowa [Mr. WOOD] is the ranking member, and I do not see how the gentleman from New York [Mr. PLATT] can insist on time.

The SPEAKER. The gentleman from Virginia [Mr. GLASS] asks unanimous consent——

Mr. SCOTT of Michigan. I object to that.

Mr. FOCHT. I object.

The SPEAKER. The gentleman from Pennsylvania objects, and the gentleman from Virginia is recognized for an hour.

Mr. MONDELL. If the gentleman from Virginia will modify his request, I think there will be no trouble in agreeing to the time.

Mr. FOCHT. If you will give us fair discussion, we will be with you.

Mr. GLASS. Nobody on this side objects to fair discussion. I made the usual request.

Mr. MCFADDEN. I make the point that this arrangement is very unfair and unreasonable and deprives our side of any right to debate this question. The gentleman from New York [Mr. PLATT] will consume all the time in debating other portions of this measure and give this special proposition no time whatever.

The SPEAKER. The Chair can not help the gentleman out of that difficulty.

Mr. BORLAND. I make the suggestion that the gentleman from Pennsylvania [Mr. MCFADDEN] move the previous question on his own motion. Evidently he did not want to have any vote at that time.

Mr. GLASS. Mr. Speaker, my colleague from New York consents to the request that I now make, and that is that the gentleman from Pennsylvania [Mr. MCFADDEN] control the time on that side.

Mr. FOCHT. And I withdraw my objection.

The SPEAKER. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that debate on this report be limited to two hours and a half, one half of the time to be controlled by himself and the other half by the gentleman from Pennsylvania [Mr. MCFADDEN], and that at the end of that time the previous question shall be considered as ordered.

Mr. GARRETT of Tennessee. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GARRETT of Tennessee. If the agreement is made that the previous question shall be asked at the end of that time, it will not interfere with the motion to recommit?

The SPEAKER. Really, that is not a motion to recommit, because the matter goes back automatically to the conferees if it is defeated. It is really an instruction, and that is the way it ought to be drawn. They ought to vote on the conference report and then vote on the instruction.

Mr. WINGO. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WINGO. The previous question then would go to nothing except the report?

The SPEAKER. There is nothing before the House except the report.

Mr. WINGO. If the House would vote the report down, then it would be in order to instruct the conferees?

The SPEAKER. Then the Chair would recognize the gentleman from Pennsylvania [Mr. MCFADDEN] to make his motion to instruct the conferees, because that is what his motion is.

Mr. WINGO. What chance will there be for the members of the majority of the committee who differ with the conference report to have some time?

Mr. CRISP. Mr. Speaker, a parliamentary inquiry?

The SPEAKER. The gentleman will state it.

Mr. CRISP. I would like to call the Chair's attention to his rulings. The Chair himself has ruled twice on the Army bill that a motion to recommit a conference report, on the Roosevelt amendment and on increasing the salary, was in order.

The SPEAKER. That is true, but the Chair is stating his opinion of what this resolution of the gentleman from Pennsylvania is; that it is simply instructions to the conferees.

Mr. GLASS. Mr. Speaker, has there been a unanimous assent?

The SPEAKER. No. The gentleman from Arkansas [Mr. WINGO] reserved the right to object.

Mr. WINGO. I addressed an inquiry to the gentleman from Pennsylvania and to the gentleman from Virginia, and I was awaiting an answer to that.

Mr. RAGSDALE. Mr. Speaker, what difference is there in the parliamentary status of a motion to recommit and a motion to instruct? Has not the motion to instruct absolutely a right to be debated in the House?

The SPEAKER. Yes. Unless somebody moves the previous question on that, any gentleman at any time, without taking a man off the floor for the purpose, can move the previous question on anything. If that is done, you can discuss the instructions as well as you can the conference report. By the time this debate is over the Chair will straighten that all out.

Mr. WINGO. If the gentleman is through with his parliamentary inquiry, I would like to propound my inquiry to the gentleman from Pennsylvania [Mr. MCFADDEN] and the gentleman from Virginia [Mr. GLASS].

The SPEAKER. The gentleman from Pennsylvania and the gentleman from Virginia will give heed to the interrogatory of the gentleman from Arkansas. He wants to know how he is going to get some time.

Mr. MCFADDEN. How much time does the gentleman want?

Mr. WINGO. About 30 minutes.

Mr. MCFADDEN. Is the gentleman for or against the amendment?

Mr. WINGO. I am against the conference report.

The SPEAKER. What do the gentleman from Virginia and the gentleman from Pennsylvania say?

Mr. GLASS. The gentleman from Pennsylvania [Mr. MCFADDEN] should yield the gentleman his time.

Mr. CANNON. You are against all or part of the report?

Mr. WINGO. I am against section 7 and against the modification of the Hardwick amendment. Those are the two propositions.

Mr. CANNON. That is against section 7.

Mr. GLASS. And the Hardwick amendment.

Mr. CANNON. Oh, well, there will be other objections. I have no objection to the gentleman having all the time he desires, but I do not see how he can have time on section 7.

Mr. FITZGERALD. He is not asking that. He is asking time to speak on his amendment.

Mr. WINGO. On this one proposition; that is, the conference report.

Mr. CANNON. Well, I know.

The SPEAKER. What does the gentleman from Pennsylvania [Mr. MCFADDEN] say?

Mr. MCFADDEN. I yield to the gentleman 15 minutes.

The SPEAKER. What does the gentleman from Virginia [Mr. GLASS] say?

Mr. GLASS. I will yield the gentleman 10 minutes.

The SPEAKER. That is 25. Is that satisfactory to the gentleman from Arkansas?

Mr. WINGO. That is satisfactory.

The SPEAKER. Is there objection?

There was no objection.

ORDER OF BUSINESS.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent that it may be in order to present a conference report on the war deficiency bill at half past 3.

The SPEAKER. The gentleman from New York asks unanimous consent that it may be in order to call up the conference report on the war deficiency bill at half past 3. Is there objection?

Mr. GLASS. Reserving the right to object, we ought to conclude this present conference report without interruption.

Mr. FITZGERALD. I would like to make a statement about the matter. I must leave Washington to-night because of illness in my family, and this conference report on the deficiency bill must be agreed upon before I leave. There is only one matter in dispute. I hope that the Committee on Naval Affairs will be able to make an arrangement that will be satisfactory to everybody. If not, that is the one question that will have to be disposed of.

Mr. GLASS. We will be through with this by 4 o'clock.

Mr. FITZGERALD. The gentleman will have two hours and a half of discussion and two roll calls, as is very apparent now. For a number of reasons the deficiency bill ought to be disposed of to-day because of the very serious situation. I must go home to-night, no matter what is done.

The SPEAKER. The Chair would state to the gentleman from Virginia, if he will permit, that if he will let the gentleman from New York in with the deficiency conference report and get through with it, then the gentleman from Virginia can continue the debate, and that he will accommodate the gentleman from New York under peculiar circumstances.

Mr. GLASS. I have no objection; and, in view of the statement of the gentleman from New York, I could not object.

Mr. MONDELL. Mr. Speaker, reserving the right to object, I will ask the gentleman from New York if he has had any discussion with the gentleman from Massachusetts [Mr. GILLETT] with regard to the time when the conference report on the deficiency bill will be called up?

Mr. FITZGERALD. I agreed—and the gentleman from Massachusetts fully understood it—I agreed that it would not be called up before 3 o'clock to-day.

Mr. MONDELL. He understood it would be called up at that time?

Mr. FITZGERALD. He expected that it would be called up at 3 o'clock or half past 3.

Mr. MONDELL. If that conference report is taken up this afternoon, it will not be possible to secure a final vote on the report of which the gentleman from Virginia has charge this afternoon.

Mr. FITZGERALD. I hope it will. If this matter is so delayed, of course the deficiency bill could not be considered at all. However, I must leave the city to-night, no matter what happens to this bill.

Mr. MOORE of Pennsylvania. Is the Jamestown item in the conference report?

Mr. FITZGERALD. It is not agreed upon. The Committee on Naval Affairs has been holding hearings to-day and yesterday, and it is now at work endeavoring to prepare a provision that will be acceptable to those favoring the acquisition of the Jamestown site and those opposed to it.

Mr. MOORE of Pennsylvania. Would the question arise if the conference report is called up?

Mr. FITZGERALD. That is the only question that would arise. I hope an agreement will be made that will enable the House to agree to the Senate amendment, clearing the matter up.

Mr. MONDELL. Mr. Speaker, reserving the right to object, I shall not object to the request of the gentleman from New York, providing that the gentleman from Virginia is willing to have a vote taken in the morning on the motion to recommit with instructions the conference report on the currency bill.

Mr. GLASS. Well, Mr. Speaker, if we are going to consider the matter in that sort of fragmentary way——

Mr. FITZGERALD. I do not think the gentleman from Wyoming should impose that condition on me.

Mr. MONDELL. It is not a condition on the gentleman from New York. It is a request of the gentleman from Virginia.

Mr. FITZGERALD. I have remained in Washington when members of my family were seriously ill before. I can not do it now.

Mr. MONDELL. I think the gentleman from Virginia ought to be willing to allow the vote to go over until to-morrow morning. The debate will last until 6 o'clock.

Mr. GLASS. Mr. Speaker, a moment ago I made the suggestion that if we were to consider this pending proposition in that fragmentary way I would rather the gentleman from New York would begin the right of way now and let the whole question go over until to-morrow.

Mr. MONDELL. I think we might reach an agreement under which the gentleman from New York—if the gentleman will yield to me—will take up his bill or conference report at this time and dispose of it.

Mr. GLASS. I shall insist for the present on going on with this proposition, but I shall not object to the request of the gentleman from New York.

The SPEAKER. Two requests are pending at once. One of them is for two hours and a half of debate. Is there objection?

Mr. FITZGERALD. Mr. Speaker, I made a request.

The SPEAKER. The Chair knows. The Chair is going to put the gentleman's request now. Is there objection to the first request? [After a pause.] The Chair hears no objection to that. Now, the request of the gentleman from New York is that at half past 3 the House take an interlude from discussing this conference report presented by the gentleman from Virginia and that the gentleman from New York be permitted at that time to call up House bill 3971, the deficiency bill.

Mr. FITZGERALD. Mr. Speaker, I wish to couple with that a request that the debate on the conference report and all matters connected with it be limited to one hour.

The SPEAKER. And that the debate on the conference report on the bill H. R. 3971 and all matters connected with it be limited to one hour. That is the Fitzgerald bill.

Mr. MONDELL. I do not know as to that last request.

Mr. FITZGERALD. I will withdraw that.

Mr. McFADDEN. Reserving the right to object, Mr. Speaker——

The SPEAKER. Is there objection?

Mr. SAUNDERS of Virginia. I reserve the right to object.

Mr. LENROOT. That is withdrawn.

Mr. SAUNDERS of Virginia. Then I will withdraw my reservation.

The SPEAKER. Is there objection to the request of the gentleman from New York that at 3.30 o'clock he be permitted to bring up his conference report on the bill H. R. 3971 and the debate be limited to one hour?

Mr. SAUNDERS of Virginia. That latter part has been withdrawn.

The SPEAKER. Yes; that latter part of the request has been withdrawn. Is there objection to taking up the conference report on the bill H. R. 3971 at 3.30?

There was no objection.

AMENDING THE FEDERAL RESERVE ACT.

The SPEAKER. The gentleman from Virginia [Mr. GLASS] is recognized for an hour and a quarter.

Mr. GLASS. Mr. Speaker, the statement filed by the managers on the part of the House is a brief and distinct presentation of the report of the conferees. The chief points of difference are familiar to the House. The real points of difference were, first, as to the reserve section. The Senate accepts the House provision in toto on the reserve section. Secondly, on the question of the so-called Hardwick amendment, relating to charges on the collection and payment of checks, the House fully understands what has been done with respect to that. The Senate accepted practically all of the other provisions of the House bill, including those provisions relating to empowering the Federal Reserve Board to compel Federal reserve banks to establish branches abroad, and also empowering the Federal Reserve Board to compel Federal reserve banks to establish branches of the reserve banks in this country where needed. Then one other provision is comprised in the conference report, to which my colleague, the gentleman from Arkansas [Mr. WINGO], has once or twice alluded.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. GLASS. I do.

Mr. MOORE of Pennsylvania. On the subject of branch banks I wanted to inquire whether the sentiment of the committee generally was in favor of the establishment of branch banks. This has been a disputed question in my community.

Mr. GLASS. The gentleman has a misconception as to that. It is not the establishment of branches of member banks, but branches of the Federal reserve banks. Nobody objects at all to that.

Mr. MOORE of Pennsylvania. That is to say, the individual bank can not establish branch banks under this act?

Mr. GLASS. Not at all. That is a bitterly controverted proposition, entirely distinct from this one, and to this one nobody objects. This provides for the establishment of branches of the Federal reserve bank.

Mr. MOORE of Pennsylvania. That answers my question.

Mr. GLASS. The other controverted provision of the bill, as I have stated, is that alluded to by my colleague, the gentleman from Arkansas [Mr. WINGO], and it relates to the exchange of notes for gold by the Federal reserve banks. The conference report was unanimous. I shall be glad to answer any question that anybody wants to ask concerning any provision.

Mr. STAFFORD. If the gentleman will permit, there are two provisions in this conference report that have never been considered by the House, as I understand.

Mr. GLASS. There is but one, as I understand.

Mr. STAFFORD. The statement says that there are two sections—section 7 and section 8—which were not embodied in the original House bill.

Mr. GLASS. Yes; that is true. Section 8 simply relates to a bookkeeping arrangement to facilitate the operations of the Federal reserve banks. It does not relate to member banks at all, and is to facilitate the operations of the Federal reserve banks, to make the transferences of the gold clearing fund a matter of bookkeeping rather than a matter of the shipment of the gold.

Mr. STAFFORD. I did not regard that section as being of primary importance, but as I read the report last night a doubt arose in my mind as to the expediency of authorizing Federal reserve banks to have the privilege of receiving Federal reserve notes against the gold that is deposited as a reserve.

Mr. GLASS. That is not section 8. That is section 7.

Mr. STAFFORD. That is what I say.

Mr. GLASS. That is the provision that the gentleman from Arkansas [Mr. WINGO] wants to discuss at some length.

Mr. STAFFORD. The gentleman invited inquiries, and it was the expediency of that provision about which I had some doubt, as to whether it was in consonance with sound banking.

Mr. GLASS. A great many people think it involves a double use of the gold as a reserve, and I apprehend that that will be the objection urged by my colleague from Arkansas [Mr. WINGO].

Mr. STAFFORD. Then the gentleman admits that it eliminates the reserve feature when it allows that gold reserve to be utilized for the issuance of Federal reserve notes?

Mr. GLASS. That is a contested point. The advocates of the proposition say not. The opponents of it say that it is a double use of the reserve.

Mr. WINGO. Will the gentleman yield to a question right there?

Mr. GLASS. Yes.

Mr. WINGO. The gentleman at first made the statement that the advocates of this proposition contend that it is not a duplication of use of the reserves. How do they answer the proposition that the statute——

Mr. GLASS. I will say to my colleague, meaning to be entirely courteous to him, that that feature of the bill will be discussed by another of the conferees, and I do not want to occupy my time with it; and the gentleman from Arkansas himself is going to discuss it——

Mr. WINGO. I know it, but I wanted to get the benefit of the gentleman's opinion, in view of the statement he just made, and in view of the plain, specific language that he, as chairman of the managers on the part of the House, agreed to.

Mr. GLASS. If the gentleman wants to know my opinion as to whether or not it is a duplication of use, I will state that in my judgment it is, to some extent.

Mr. WINGO. That is what I wanted to get. The language is plain, and I did not see how they could get around it.

Mr. GLASS. That is my judgment.

Mr. WINGO. There is one other proposition I want to ask about, because it may save time. That is as to the class of paper that could be used as a basis for the issuance of Federal reserve notes, authorized by the first paragraph of section 7. What was the necessity for it, and what was the justification that the Senate offered for that provision?

Mr. GLASS. To make readily available the 15-day paper authorized by a previous amendment to the Federal reserve act. The gentleman means based upon actual transactions?

Mr. WINGO. Yes. But there is more than 15-day paper involved.

Mr. GLASS. The real intent was to facilitate the use of 15-day paper on the notes of the bankers themselves.

Mr. WINGO. This goes further, does it not?

Mr. GLASS. It does authorize more than that. It authorizes the issuance of notes on eligible collateral acquired in the open market.

Mr. WINGO. And not indorsed by the member banks; does the gentleman think that is wise?

Mr. GLASS. I yielded my judgment upon that point.

Mr. WINGO. If that is the gentleman's position, I will not press the inquiry further.

Mr. GLASS. Will the gentleman from Pennsylvania use some of his time?

Mr. McFADDEN. I will yield 15 minutes to the gentleman from Arkansas [Mr. WINGO].

Mr. WINGO. Let some other gentleman go ahead. I want to get some of the ideas of these conferees. I should like to come later, and I might not use any of my time if I become satisfied.

Mr. McFADDEN. Mr. Speaker, I make the point of order that no quorum is present.

Mr. GLASS. I move a call of the House.

The motion was agreed to.

The doors were closed, and the Sergeant at Arms was directed to notify the absentees.

The Clerk called the roll, and the following Members failed to answer to their names:

Anthony	Eagan	Key, Ohio	Riordan
Bell	Estopinal	Kiess, Pa.	Roberts
Bland	Fairchild, G. W.	Kraus	Robinson
Bowers	Fields	LaGuardia	Rowland
Brand	Flynn	Lever	Rucker
Britten	Fordney	Littlepage	Sanders, La.
Bruckner	Foss	Lobeck	Scott, Mich.
Brumbaugh	Frear	McAndrews	Scully
Burroughs	Gallagher	McCormick	Sells
Cannon	Gallivan	McKenzie	Shallenberger
Capstick	Graham, Pa.	McKinley	Sherley
Carew	Gray, N. J.	Madden	Siegel
Clark, Fla.	Griffin	Maher	Sisson
Clark, Pa.	Hamill	Mann	Sloan
Cooper, Ohio.	Hamilton, N. Y.	Martin, Ill.	Smith, C. B.
Cooper, W. Va.	Hamlin	Martin, La.	Smith, T. F.
Copley	Haskell	Mason	Snyder
Crago	Hayes	Mays	Steele
Crosser	Heaton.	Moores, Ind.	Sterling, Ill.
Currie, Mich.	Hill	Morin	Stevenson
Dale, N. Y.	Hollingsworth	Mott	Sullivan
Davis	Hull, Iowa	Neely	Swift
Denton	Husted	Nicholls, S. C.	Tague
Dewalt	Ireland	O'Shaunessy	Talbott
Dickinson	James	Padgett	Templeton
Dill	Johnson, Wash.	Paige	Tilson
Dixon	Jones, Va.	Peters	Ward
Dooling	Kahn	Polk	Watson, Va.
Doremus	Kearns	Powers	Winslow
Drukker	Kennedy, Iowa	Pratt	Wood, Ind.
Dyer	Kennedy, R. I.	Ramsey	Zihlman

The SPEAKER pro tempore. Three hundred and six Members have answered to their names, a quorum.

Mr. HOWARD. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

Mr. McFADDEN. Mr. Speaker, I yield five minutes to the gentleman from Iowa [Mr. TOWNER].

Mr. TOWNER. Mr. Speaker, I think most of the Members of the House have regarded the McFadden amendment as a protection to those who dealt with the banks, as a limitation on the power of the banks to charge exorbitant rates for exchange. It provided that banks should under no circumstances charge unreasonable rates of exchange, and that in no case should a charge be exacted of more than 10 cents per $100. A charge of one-tenth of 1 per cent certainly can not be considered as unreasonable.

The chairman of the Banking Committee tells us of instances of unreasonable charges. This provision would prevent such unjust exactions. It is surely as efficacious to bring the individual banks under such restrictions by direct enactment as it would be to allow the Federal Reserve Board to fix rates of exchange at its discretion.

The chairman of the Banking Committee characterizes the McFadden amendment as an atrocity which the House conferees seek to remedy, and yet at the same time he tells the House the conferees have endeavored to carefully follow the instructions given them by the House.

The McFadden amendment, which was given as an instruction to the conferees, provided the banks which were members of the Federal Reserve System should not be prevented from charging reasonable exchange, but fixed a maximum charge of one-tenth of 1 per cent. The conferees have changed this by providing that the rates of exchange shall "be determined and regulated by the Federal Reserve Board." This constitutes a vital and material change in the instructions given. It takes from the banks the right, in the first instance, to make exchange rates and confers such right upon the Federal Reserve Board.

Besides this, the conferees have inserted a further provision that no charges for exchange shall be made against the Federal reserve banks. This is a further and important change and violation of the instructions given by the House to the conferees. It exempts the Federal reserve banks from any exchange as

against their paper, but permits the Federal Reserve Board to fix the rates which shall be charged against the member banks.

It must be clear that the conferees have not followed the instructions given them by the House.

It is claimed by the chairman that because the instructions given directed the conferees to agree "to the substance" of the McFadden amendment that they were thereby authorized to depart from it with large discretion and wide latitude. I do not so understand the instructions. To agree "in substance" means to the same effect; not changing materially the substance and meaning. It means with reasonable construction that the words may be different, the verbiage changed, but the sense must be preserved, the real meaning unchanged. Such interpretation would exclude the inserting of new matter entirely. It would without doubt exclude new matter which would vary or contradict the language of the original. The changes which I have referred to would not be an agreement "in substance" with the McFadden amendment.

Mr. GLASS. Mr. Speaker, will the gentleman yield?

Mr. TOWNER. Yes.

Mr. GLASS. Will the gentleman be kind enough to point out in the McFadden amendment the language which commits to the banks the right to determine the reasonableness of the charge?

Mr. TOWNER. I think I can. The language of the McFadden amendment is that nothing in the act shall be construed to prohibit a bank from "making reasonable charges," in no case to exceed one-tenth of 1 per cent. There is committed to no other person or bank the power to determine what is a reasonable charge except the bank. As to whether or not it is reasonable is a matter between the person interested in the transaction and the bank. The bank is restrained by law from making unreasonable charges, and, besides, there is the limit fixed by the restriction that it shall not be more than one-tenth of 1 per cent.

Mr. GLASS. Why may it not be just as reasonably inferred that the proponents of the proposition intended that the man who pays the charge might fix it by agreement with the bank?

Mr. TOWNER. I think the gentleman must see that that is an unreasonable interpretation.

Mr. GLASS. Not at all. It is not any more unreasonable than the suggestion of the gentleman that the bank may have the right to solely judge. The bank is the one in the first instance to fix the charge. The gentleman must know that. The power is in the banks now without any legislation to fix the rate of exchange.

Mr. TOWNER. There is no legislation on the subject now.

The chairman is right in saying that in the first instance the bank fixes the charge. The customer does not do it. The customer may pay or not, as he chooses, the charge made. It is true also that the rate may be agreed upon between the customer and the bank. The McFadden amendment was intended to prevent two things: First, that the charges for exchange should not be fixed for the member banks by the Federal Reserve Board; and, second, that only reasonable charges within safe limits should in any case be made. The conferees' report changes that materially. It gives the power to fix the rates of exchange to the Federal Reserve Board, and it exempts the Federal reserve banks altogether from exchange charges as against them. That, in my judgment, is both unwise and unfair.

Mr. GLASS. Mr. Speaker, I ask that the gentleman from Pennsylvania [Mr. MCFADDEN] yield some of his time.

Mr. McFADDEN. I prefer that you use more of your time now.

Mr. GLASS. I yield 10 minutes to the gentleman from New York [Mr. PLATT].

Mr. PLATT. Mr. Speaker, it seems to me that gentlemen who voted to instruct the conferees of the House to agree to the Hardwick amendment, many of them, voted under misapprehension and misunderstanding of just what that amendment is.

I have not always been opposed to part of the amendment. That is to say, it has generally seemed to me that some charge for check collecting was reasonable, and many times I have argued in the committee along those lines. But I do not believe the people have understood that this amendment is a matter not only of check collecting, but of paying checks, of making a charge for paying checks drawn on a bank's own deposits. It is the country banks that are advocating this thing though claiming that the charge was for collecting the checks or for exchange. If I come down here to Washington with a check on my home bank, and I go in a bank in Washington to get that cashed, it may look like a reasonable thing for a bank here to make a moderate charge for collecting that check. It has got to send it to another city several hundred miles away. But what reason is there why my bank up home, that has my deposit and has enjoyed that deposit all the while that the check was out, and has no way of knowing it was drawn until the check gets back to it—what earthly excuse has that bank for making a charge for paying the check?

Mr. WINGO. The gentleman knows that under the laws of his State they can not charge you for paying the check. If they did, any creditor could put it in the hands of a receiver.

Mr. PLATT. I know they have done it, and that it is exactly what some of them are claiming a right to do.

Mr. WINGO. I beg the gentleman's pardon.

Mr. PLATT. As a matter of fact, the banks of my town have not generally done it, but there are some banks in my district that have.

Mr. WINGO. Is not this what they do? Do not they charge an exchange charge for remitting proceeds after it is paid?

Mr. PLATT. That is, of course, a subterfuge.

Mr. WINGO. It is not a subterfuge, because under the law of your State, if they charge for your check or charge less than par, that is the ground for asking for a receivership.

Mr. PLATT. How much more service does that bank render for paying a check that is not cashed, merely by drawing a draft, than if somebody presents a check over a counter, when it has to pay cash for it?

Mr. WINGO. Does the gentleman wish me to tell him?

Mr. PLATT. Yes.

Mr. WINGO. When the check is paid across the counter, when the paying teller pays it—in other words, if you were to give me a check on your bank and I walk into that bank and get it through the paying teller's window, he stamps it "Paid" and sticks it on the file. At the close of the day the individual bookkeeper comes along and gets the batch of checks and charges them up. When it comes in by mail from a correspondent, either the collection or discount or exchange clerk, as we sometimes call him, takes all these checks and lists them in a separate book kept for that purpose. Then he turns to the exchange register and he figures up the total amount that comes from one correspondent. He then writes a piece of exchange. He credits that particular correspondent with that item. Then he fills out a remittance slip that is perforated and double-sided. He puts a piece of carbon paper on top of it, turns it over, fills it in——

Mr. GLASS. I would suggest that if you are going into the process of the banking business the gentleman will not have any time remaining.

Mr. WINGO. The gentleman asked for it, and I will give it to him.

Then he fills that out, tears off the slip, puts it in an envelope that has a 2-cent stamp, and there is the cost of that envelope. Then he takes those checks and turns them over to the individual bookkeeper. That is the difference in the two transactions.

Mr. PLATT. He pays all the checks that come by mail with one draft and a 2-cent stamp. It is a simpler proposition than paying over the counter. It costs him less money, because that draft is balanced up with other drafts, and remittances of actual cash are seldom made.

Mr. WINGO. They have all got to go through the same process.

Mr. PLATT. He makes a charge for doing something that costs him not much of anything.

Mr. WINGO. Does the gentleman think that a 2-cent stamp is not anything or the cost of this registry book is not anything?

Mr. PLATT. The 2-cent stamp is rather trifling, considering the fact that the bank has had the benefit of the deposits while all those checks were out.

Mr. HAUGEN. You might add express—for expressing money to the bank.

Mr. PLATT. Occasionally, yes. The gentlemen who are interested in banks can not find much in the way of defense of this practice, and they have themselves shown that the question is not of charging for collecting checks on distant places, but the question is whether you are going to allow a certain number of banks to take out something for paying checks on their own deposits. I do not think that is a thing that will appeal to very many Members of this House when they fully understand it.

Mr. HARRISON of Mississippi. Mr. Speaker, will the gentleman yield?

Mr. PLATT. Yes.

Mr. HARRISON of Mississippi. I want to ask the gentleman this question: Does the Federal Reserve Board now charge anything to the member banks for clearing their checks to them?

Mr. PLATT. In some cases they have charged, I understand, a cent and a half an item.

Mr. HARRISON of Mississippi. Is it not the rule that the Federal Reserve Board charges from 1½ cents to 2 cents on each check they clear?

Mr. GLASS. Mr. Speaker, if the gentleman will permit, as a matter of fact, the cost has been found to be from one-half to a fiftieth of 1 per cent. It is so infinitesimal that they have to hire an actuary to figure it out.

Mr. WINGO. Mr. Speaker, will the gentleman yield?

Mr. PLATT. Yes.

Mr. WINGO. Does the gentleman think that 2 cents is infinitesimal?

Mr. PLATT. The Federal Reserve Board are performing this service practically for nothing. So why should the banks make this fuss over something that is not costing them anything? This is a charge not for collecting the checks at a distance, but a charge for the payment of the checks when they get back home, and I do not believe that one man in ten has exactly understood what it meant.

Now, I want to pass from that part of the amendment and say that the most important thing in this series of amendments to the Federal reserve act is not this matter of the Hardwick amendment, but the proviso on the middle of page 6 of the conference report, the proviso to section 7, which reads:

Provided however, That when the Federal reserve agent holds gold or gold certificates as collateral for Federal reserve notes issued to the bank such gold or gold certificates shall be counted as part of the gold reserve which such bank is required to maintain against its Federal reserve notes in actual circulation.

That is a tremendous departure from the present policy, and it is something that the House really ought to understand. At present the Federal reserve banks, when they get gold and gold certificates in the course of business, are putting those up with the Federal reserve agents, and instead of paying them out in the course of business they are paying out Federal reserve notes received for them from the Federal reserve agents. Now, they want to take that gold which they have impounded, dollar for dollar, against the Federal reserve notes and turn it into their general reserves. For a long time I have been opposed to it. This identical amendment has been passed before by the Senate and has been thrown out by the House conferees. But I have been brought to favor it as a war measure, and I agree to it now. It gives the banks an opportunity to impound a whole lot of gold, and if the country should get into such condition as the result of the war, or when the war is over, that the banks and business of the country would need assistance to prevent a panic, this added power gives a much larger reserve of gold to the Federal reserve banks than they otherwise would be able to obtain, and they can consequently extend more help to the member banks than they would be able to give otherwise. It gives them a new means whereby they can obtain gold for their reserves. The argument is that there is no reason why you or I should carry gold or gold certificates around in our pockets. If you go to the office of the Sergeant at Arms now, you will get gold certificates, yellow backs. They do not serve us any better, do not purchase any more, than the Federal reserve notes. Now, the Federal Reserve Board proposes to issue Federal reserve notes in their place when they come into possession of the Federal reserve banks, and to use the gold or gold certificates as a part of their gold reserve. You can readily see that this will strengthen the Federal Reserve System against any emergency.

That, I think, is by far the most important item in all of these amendments. The Hardwick amendment is a minor matter. The Hardwick amendment, let me say, too, is a matter about which many banks have changed their minds. In my district most of the banks were greatly in favor of the Kitchin bill until recently. I heard the cashier of one of those banks denounce the Federal Reserve Board for enforcing the law less than a year ago. Now he writes me that he thinks it a small matter to be making a fuss over. The law now, by the way, absolutely prohibits any charge being made for collection or any charge for the payment of checks, so that what we have agreed to in this conference report greatly liberalizes it. Charges are no longer prohibited, but may be made under such regulations as the Federal Reserve Board may approve, though not against a Federal reserve bank.

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

The hour of 3.30 o'clock having arrived, under the agreement this matter will be suspended.

URGENT DEFICIENCY BILL.

Mr. FITZGERALD. Mr. Speaker, I call up the conference report on the bill H. R. 3971, the urgent deficiency bill for the Military and Naval Establishments, and ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman from New York calls up the conference report on the urgent deficiency bill and asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was not objection.

The Clerk read the statement.

CONFERENCE REPORT (NO. 74).

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 4, 9, 43, 51, 80, 82, and 85.

That the House recede from its disagreement to the amendments of the Senate numbered 5, 6, and 83, and agree to the same.

Amendment numbered 2: That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the matter inserted by the amendment of the House to the amendment of the Senate insert the following:

"EMERGENCY SHIPPING FUND.

"The President is hereby authorized and empowered, within the limits of the amounts herein authorized—

"(a) To place an order with any person for such ships or material as the necessities of the Government, to be determined by the President, may require during the period of the war and which are of the nature, kind, and quantity usually produced or capable of being produced by such person.

"(b) To modify, suspend, cancel, or requisition any existing or future contract for the building, production, or purchase of ships or material.

"(c) To require the owner or occupier of any plant in which ships or materials are built or produced to place at the disposal of the United States the whole or any part of the output of such plant, to deliver such output or part thereof in such quantities and at such times as may be specified in the order.

"(d) To requisition and take over for use or operation by the United States any plant, or any part thereof without taking possession of the entire plant, whether the United States has or has not any control or agreement with the owner or occupier of such plant.

"(e) To purchase, requisition, or take over the title to, or the possession of, for use or operation by the United States any ship now constructed or in the process of construction or hereafter constructed, or any part thereof, or charter of such ship.

"Compliance with all orders issued hereunder shall be obligatory on any person to whom such order is given, and such order shall take precedence over all other orders and contracts placed with such person. If any person owning any ship, charter or material, or owning, leasing, or operating any plant equipped for the building or production of ships or material shall refuse or fail to comply therewith or to give to the United States such preference in the execution of such order, or shall refuse to build, supply, furnish, or manufacture the kind, quantities or qualities of the ships or material so ordered, at such reasonable price as shall be determined by the President, the President may take immediate possession of any ship, charter, material or plant of such person, or any part thereof without taking possession of the entire plant, and may use the same at such times and in such manner as he may consider necessary or expedient.

"Whenever the United States shall cancel, modify, suspend or requisition any contract, make use of, assume, occupy, requisition, acquire, or take over any plant or part thereof, or any ship, charter, or material, in accordance with the provisions hereof, it shall make just compensation therefor, to be determined by the President; and if the amount thereof, so determined by the President, is unsatisfactory to the person entitled to receive the same, such person shall be paid 75 per cent of the amount so determined by the President and shall be entitled to sue the United States to recover such further sum as, added to said 75 per cent, will make up such amount as will be just compensation therefor, in the manner provided for by section 24, paragraph 20, and section 145 of the Judicial Code.

"The President may exercise the power and authority hereby vested in him, and expend the money herein and hereafter appropriated through such agency or agencies as he shall determine from time to time: *Provided*, That all money turned over to the United States Shipping Board Emergency Fleet Corporation may be expended as other moneys of said corporation are now expended. All ships constructed, purchased, or requisitioned under authority herein, or heretofore or hereafter ac-

quired by the United States, shall be managed, operated, and disposed of as the President may direct.

"The word 'person' as used herein, shall include any individual, trustee, firm, association, company, corporation, or contractor.

"The word 'ship' shall include any boat, vessel, or submarine and the parts thereof.

"The word 'material' shall include stores, supplies, and equipment for ships, and everything required for or in connection with the production thereof.

"The word 'plant' shall include any factory, workshop, warehouse, engine works; buildings used for manufacture, assembling, construction, or any process; any shipyard or dockyard and discharging terminal or other facilities connected therewith.

"The words 'United States' shall include all lands and waters subject to the jurisdiction of the United States of America.

"All authority granted to the President herein, or by him delegated, shall cease six months after a final treaty of peace is proclaimed between this Government and the German Empire.

"The cost of purchasing, requisitioning, or otherwise acquiring plants, material, charters, or ships now constructed or in the course of construction and the expediting of construction of ships thus under construction shall not exceed the sum of $250,000,000, exclusive of the cost of ships turned over to the Army and Navy, the expenditure of which is hereby authorized, and in executing the authority granted by this act for such purpose the President shall not expend or obligate the United States to expend more than the said sum; and there is hereby appropriated for said purpose, $150,000,000: *Provided*, That this appropriation shall be reimbursed from available funds under the War and Navy Departments for vessels turned over for the exclusive use of those departments, or either of them.

"The cost of construction of ships authorized herein shall not exceed the sum of $500,000,000, the expenditure of which is hereby authorized, and in executing the authority granted herein for such purpose the President shall not expend or obligate the United States to expend more than said sum; and there is hereby appropriated for said purpose $250,000,000.

"For the operation of the ships herein authorized or in any way acquired by the United States, except those acquired for the Army or Navy, and for every expenditure incident thereto, $5,000,000."

And the House agree to the same.

Amendment numbered 86: That the House recede from its disagreement to the amendment of the Senate numbered 86, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"SEC. 4. That the service of all persons selected by draft and all enlistments under the provisions of the act entitled 'An act to authorize the President to increase temporarily the Military Establishment of the United States,' approved May 18, 1917, shall be for the period of the war, unless sooner terminated by discharge or otherwise. Whenever said war shall cease by the conclusion of peace between the United States and its enemies in the present war, the President shall so declare by a public proclamation to that effect, and within four months after the date of said proclamation or as soon thereafter as it may be practicable to transport the forces then serving without the United States to their home station, the provisions of said act, in so far as they authorize compulsory service by selective draft or otherwise, shall cease to be of force and effect."

And the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"SEC. 5. That, in addition to the reports now required by law, the Secretaries of the Treasury, War, and Navy shall each on the first Monday in December, 1917, and annually thereafter, transmit to the Congress a detailed statement of all expenditures under this act."

And the Senate agree to the same.

The committee of conference have been unable to agree on the amendment of the Senate numbered 68.

JOHN J. FITZGERALD,
FREDK. H. GILLETT,
Managers on the part of the House.
THOMAS S. MARTIN,
O. W. UNDERWOOD,
F. E. WARREN,
Managers on the part of the Senate.

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishment on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes, submit the following written statement in explanation of the effect of the action agreed upon by the conference committee and submitted in the accompanying conference report as to each of said amendments, namely:

On No. 2, relating to the emergency shipping fund: Inserts a substitute for the amendment of the House to the amendment of the Senate, printed in full elsewhere in this report.

On No. 3: Restores the appropriation of $5,000, stricken out by the Senate, for rent of quarters for the Bureau of Efficiency.

On No. 4: Restores the appropriation of $20,000, stricken out by the Senate, for additional employees and expenses of the Civil Service Commission.

On No. 5: Appropriates $136,140, as proposed by the Senate, for additional employees in the Office of the Auditor for the War Department.

On No. 6: Strikes out, as proposed by the Senate, the appropriations for the mints at Philadelphia and New Orleans and the assay office at New York.

On No. 9: Strikes out the paragraph, inserted by the Senate, authorizing the Secretary of War to transfer 10 per cent of the sums under the Military Establishment from one appropriation account to another.

On No. 43: Strikes out the paragraph, inserted by the Senate, authorizing the Secretary of War to expend not exceeding $10,000,000 of the appropriations for the Military Establishment for such military purposes as he may deem proper.

On No. 51: Authorizes the use of $150,000, as proposed by the House, instead of $325,000, as proposed by the Senate, for the purchase of land for aviation purposes for the Navy.

On No. 80: Restores the appropriation of $13,940, stricken out by the Senate, for employees to care for the new Interior Department Building.

On No. 82: Restores the appropriations for the Bureau of Standards, stricken out by the Senate.

On No. 83: Strikes out, as proposed by the Senate, the appropriation of $1,200 to enable the Commissioner of Lighthouses to increase the compensation of draftsmen employed on marine engineering.

On No. 85: Restores the appropriation, stricken out by the Senate, of $7,500 to pay the widow of Henry T. Helgesen, late a Representative from the State of North Dakota, and $1,000 for stationery for committees and officers of the House of Representatives.

On No. 86: Inserts the paragraph, proposed by the Senate, relative to the termination of the military service of persons selected by draft or otherwise, modified so as to terminate such services within four months after the proclamation of peace, or as soon thereafter as it may be possible to transport the forces then serving without the United States to their home station.

On No. 87: Inserts the paragraph, proposed by the Senate, relative to the submission of statements of expenditures from appropriations made for the Treasury, War, and Navy Departments modified to eliminate therefrom the part thereof pertaining to the taking of vouchers.

The committee of conference have been unable to agree upon the amendment of the Senate numbered 68, appropriating $1,400,000 for the purchase of land and $1,600,000 for the improvement thereof as a naval operating base on Hampton Roads, Va.

JOHN J. FITZGERALD,
FREDK. H. GILLETT,
Managers on the part of the House.

Mr. CALDWELL. Mr. Speaker, reserving the right to object, I make the point of order against section 4 as printed in the report; I think it is amendment 86. It is subject to a point of order for the reason that this is an appropriation bill and the amendment is new legislation tacked onto an appropriation bill. I do not see how that is in order here. The Army bill creating a new army in the United States provided that that army should be raised and maintained by the United States during the continuance of the existing emergency, and the matter was discussed here on the floor of the House, was discussed in the Senate, referred back to the committee, and afterwards the law was passed authorizing the army during the existing emergency. This proposition is to amend the Army bill that we took all the

trouble and pains to pass, with the approval of the department, so as to make the enlistment for the war and four months.

Now, the situation is that we do not know what wars we are going to have. We do not know whether Russia is going to be our enemy, we do not know whether we are to fight somebody else or not, and therefore we ought not to take these men out as long as we in America may need them more at the end of the war than she does now. This proposes to take from America these men when we may need them, and I contend that such legislation is not in order on an appropriation bill. I insist on the point of order.

Mr. FITZGERALD. There is no point of order that lies to this.

The SPEAKER. The gentleman's point of order comes too late.

Mr. FITZGERALD. It is too late if there was a point of order. I will make a statement about the matter. In order to calm my colleague, who is unduly excited, I will make a statement in reference to this amendment. The Senate incorporated in this bill a provision requiring all of the men taken into the Army by conscription to be discharged four months after the termination of the present war. The managers on the part of the House declined to agree to that amendment. I took the position that no one could tell whether or not these troops would be necessary four months after the war was concluded. The differences between the two Houses were all adjusted with the exception of this particular amendment. Then the managers on the part of the Senate took the matter up with the Secretary of War, and he stated that if modified in a certain way the War Department would not object to its being incorporated in the bill at this time, and that if in the future legislation was necessary it would appeal to the Congress. The Secretary of War informed me of that fact by telephone, and I stated that when he sent that information to me in writing over his own signature it would be possible to have the conferees agree upon the provision. Under date of June 2, 1917, he sent this letter:

MY DEAR MR FITZGERALD: I have been told that the conference on the urgent deficiency bill is finding great difficulty with the Senate amendment requiring the discharge of all men enlisted in the military service during the present war within four months after the termination of the war. I wrote to you and Senator MARTIN on the subject of that amendment, and pointed out the very grave inconvenience which might result should any large force of American troops be abroad at the termination of the war and an impossibility exist as to their finding transportation facilities back to America within the four months. In a conversation with Senator MARTIN this morning it was suggested that this difficulty might be overcome by adding a clause about as follows:

"Or as soon thereafter as the said forces can be transported to their home stations."

Such an amendment would obviate the embarrassment I had in mind, and undertook to state to you in my previous correspondence, and will be acceptable to the War Department. Should further embarrassment arise or threaten, as we progress in the war, I will call them to the attention of Congress and ask amendatory legislation.

Mr. Speaker, in view of that statement of the Secretary of War the managers on the part of the House agreed to the Senate amendment with an amendment, so that it reads as follows:

SEC. 4. That the service of all persons selected by draft and all enlistments under the provisions of the act entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States," approved May 18, 1917, shall be for the period of the war, unless sooner terminated by discharge or otherwise. Whenever said war shall cease by the conclusion of peace between the United States and its enemies in the present war, the President shall so declare by a public proclamation to that effect, and within four months after the date of said proclamation or as soon thereafter as it may be practicable to transport the forces then serving without the United States to their home station, the provisions of said act, in so far as they authorize compulsory service by selective draft or otherwise, shall cease to be of force and effect.

That agreement was reached after the War Department stated it would be acceptable to it. It was in the agreement presented to the House on this bill last week. No one questioned it. It was not discussed. The conference report was rejected by this body because of the agreement upon the item regarding the acquisition of the Jamestown site. Under the circumstances, it seems to me, it should be satisfactory to the House. This statement was made in connection with the matter, that when the conference report upon the bill to raise an army of a million men was before the Senate, because such a provision was not included in that bill, the Senate declined to consider the conference report until the deficiency appropriation bill was completed and this particular amendment included in it, and that agreement could not have been made upon the bill to raise the army unless this provision was included either in that bill or in some other. Personally I should not have consented to agree to that provision under any circumstances if it were not that the Secretary of War assured me that, so far as the department was concerned, the provision in its present shape would be acceptable to the department, and it provides for discharge, after the proclamation of the President that the war is ended, of men serving without the United States within four months or as soon thereafter as it is practicable to transport them to their home stations. That means not only to bring them to the United States from abroad but to transport them to the locality from which they were taken. Those are the facts. I do not think there is any necessity for any alarm about it.

Mr. MADDEN. It must be apparent by every one that it would be impossible to discharge these men the next moment after the war ceased.

Mr. FITZGERALD. That was very apparent, and there was no intention that that should be done; but the War Department is satisfied with the provisions. If the necessity arises that these men should be retained in the service longer, Congress undoubtedly will be able to enact the necessary legislation to continue their service. I have no more sympathy with the attempt to curtail the time of service than has the gentleman from New York [Mr. CALDWELL] himself.

Mr. CALDWELL. Does the gentleman understand that the War Department feels that this is a wise thing to do, or does the War Department feel this is the best thing because they are in a hurry to get this money?

Mr. FITZGERALD. They do not believe that it is wise; but the Secretary of War stated that with this modification it would obviate one of the embarrassments that he had in mind, and that if in the future, as matters develop, it should appear that other embarrassments would be occasioned, he would appeal to Congress for additional legislation. My own opinion is that this insistence upon this legislation grew out of opposition that existed to the method in which the Army is to be raised. After the Army is raised, then I think there will be no difficulty in Congress in obtaining legislation to meet whatever situation may arise regarding the necessity for the service of these men.

Mr. CALDWELL. Does the gentleman think that expediency should justify the crippling of a piece of Army legislation that we have just passed to meet this war?

Mr. FITZGERALD. I do not believe it cripples the Army legislation. The bill provided for the service of these men during the emergency. The Senate insisted upon the discharge of the men enlisted for the emergency within four months after the termination of war with our present enemy. Personally, I think it is too brief a time. The Secretary of War after consultation stated that the provision in its present form would be acceptable. I do not intend to convey the impression that he recommended it, for he did not.

Mr. CALDWELL. Has the gentleman there the copy of the amendment No. 86 as passed by the Senate?

Mr. FITZGERALD. As passed by the Senate it is as follows:

SEC. 4. That the service of all persons selected by draft and all enlistments under the provisions of the act entitled "An act to authorize the President to increase temporarily the Military Establishment of the United States" shall be for the period of the war, unless sooner terminated by discharge or otherwise. Whenever said war shall cease by the conclusion of peace between the United States and its enemies in the present war, the President shall so declare by a public proclamation to that effect, and within four months after the date of said proclamation the provisions of said act, in so far as they authorize compulsory service by selective draft or otherwise, shall cease to be of force and effect.

It was made absolutely mandatory that at the end of four months all authority under that act should cease. Now, the modification is "or as soon thereafter as it may be possible to transport the forces then serving without the United States to their home station." So the gentleman will notice that until it is practical to transport all troops serving without the United States to their home station the effect of the provisions of that act do not cease.

Mr. CALDWELL. The gentleman is aware that the Army bill as it passed the House was carried to the Senate, and in the Senate an effort was made——

Mr. LONGWORTH. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LONGWORTH. What is pending before the House?

The SPEAKER. A conference report.

Mr. LONGWORTH. I thought a point of order was made.

Mr. FITZGERALD. No; that has been disposed of. The gentleman is occupying my time and he is entitled to the information.

Mr. CALDWELL. I want to ask the gentleman if he is aware of the fact that when the bill passed the House that an effort was made in the Senate to amend by changing it from the period of the emergency to the length of the war, and that the Senate conferees agreed to the House provision, and that an effort was made then to have the Senate disagree to the House provision and it failed by a vote in the Senate?

Mr. FITZGERALD. I think the gentleman is mistaken as to what took place. The statement was made—I did not follow the record—that when the conference report was brought into the Senate—the conferees on the part of the Senate had agreed

to the House provision—the sentiment of the Senate was very overwhelmingly against that provision, that it was apparent that the report could not be agreed to, and that a consideration of the report was deferred until this appropriation bill was considered and a provision was inserted here by an overwhelming vote. When the matter first came up in the conference the managers upon the part of the House stated that they would in no instance agree to such a provision, unless it met with the approval of the administration. The President was consulted as to the effect of it. The matter was taken up by the Secretary of War, and while not recommended, the Secretary of War stated it would be satisfactory or acceptable if agreed upon. It was for that reason that after the War Department had made that statement that the managers upon the part of the House acquiesced. If he had not, there would have been no agreement upon that provision.

The SPEAKER. The question is on the conference report.

The question was taken, and the conference report was agreed to.

Mr. FITZGERALD. Mr. Speaker, I ask that the Clerk report amendment No. 68, the Jamestown amendment.

The Clerk read as follows:

Naval operating base, Hampton Roads, Va.: For the acquisition, by purchase or condemnation, including all easements, riparian and other rights appurtenant thereto, of the tract of land known as the Jamestown Exposition site, on Hampton Roads, Va., and of such lands adjacent thereto as lie north of Ninety-ninth Street and Algonquin Street and bounded on the northwest by Hampton Roads and Willoughby Bay and on the east by Boush Creek, $1,400,000; and toward the equipment of this property as a naval operating base, including piers, storehouses, oil-fuel storage, training station, recreation grounds for the fleet, aviation, and other purposes, $1,600,000; in all, $3,000,000.

Mr. PADGETT. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Tennessee rise?

Mr. PADGETT. I rise to make a motion that the House recede from its disagreement to Senate amendment No. 68 and agree to the same with an amendment.

The SPEAKER. The gentleman will send up his amendment.

Mr. PADGETT. I move to strike out all of the Senate amendment and substitute in lieu thereof the following:

The Clerk read as follows:

Mr. PADGETT offers the following amendment: Strike out all of amendment No. 68 and insert in lieu thereof the following:

"Naval operating base, Hampton Roads, Va.: The President is hereby authorized and empowered to take over for the United States the immediate possession and title, including all easements, rights of way, riparian, and other rights appurtenant thereto, and including all the rights and properties of railway, electric light, power, telephone, telegraph, water, and sewer companies, of the tract of land known as the Jamestown Exposition site, on Hampton Roads, Va., and of such lands adjacent thereto as lie north of Ninety-ninth Street and Algonquin Street, the entire property being bounded on the north and west by Hampton Roads and Willoughby Bay, on the east by Boush Creek, and on the south by Ninety-ninth and Algonquin Streets.

"That if said lands and appurtenances and improvements thereof shall be taken over as aforesaid, the United States shall make just compensation therefor, to be determined by the President, and if the amount thereof so determined by the President is unsatisfactory to the person entitled to receive the same, such person shall be paid 75 per cent of the amount so determined by the President and shall be entitled to sue the United States to recover such further sum, as added to said 75 per cent will make up such amount as will be just compensation therefor, in the manner provided for by section 24, paragraph 20, and section 145 of the Judicial Code.

"Upon the taking over of said property by the President as aforesaid, the title to all property so taken over shall immediately vest in the United States.

"For the payment of compensation for said property so taken over, $1,200,000, or so much thereof as may be necessary, is hereby appropriated; and toward the equipment of the same as a naval operating base, including piers, storehouses, oil-fuel storage, training station, and recreation grounds for the fleet, and other purposes, $1,600,000 is hereby appropriated; in all, $2,800,000: *Provided*, That the appropriation herein shall be available only for the acquisition of the entire property, bounded on the north and west by Hampton Roads and Willoughby Bay, on the east by Boush Creek, and on the south by Ninety-ninth and Algonquin Streets, together with all easements, rights of way, riparian and other rights appurtenant thereto, and all the rights and properties of railway, electric light, power, telephone, telegraph, cable, water, and sewer companies: *Provided further*, That the Secretary of the Navy is authorized to expend public money in the development of said tract of land without reference to the requirements of section 355 of the Revised Statutes."

Mr. MADDEN. Mr. Speaker, I wish to ask the gentleman from Tennessee a question.

Mr. FITZGERALD. I yield 10 minutes to the gentleman from Tennessee.

Mr. MADDEN. I wish to ask the gentleman a question. I notice that the proviso at the end of the amendment authorizes the Secretary of the Navy to expend money notwithstanding the provisions of section 355 of the Revised Statutes. That section provides that the United States Government shall not take title to land until the State in which the land is located shall have enacted a law releasing the United States from obligation to pay taxes. There ought to be some provision, it seems to me, in this amendment——

Mr. FITZGERALD. If the gentleman will permit, the provision of the Revised Statutes provides that no public funds shall be expended upon any property until the State within which it is located shall have ceded jurisdiction over the property and until the attorney general shall have certified to the title.

Mr. MADDEN. That includes the question of taxes, too.

Mr. FITZGERALD. No; the State can not tax the property.

Mr. MADDEN. The question is whether it can or not, if it has not enacted the law, and whether the United States would be obligated for taxes during the period between now and the next session of the Legislature of Virginia.

Mr. FITZGERALD. The State can not tax the property of the United States. My recollection is that the State of Virginia has passed a law ceding jurisdiction over what is called the Jamestown Exposition property to the United States whenever it should be acquired.

This amendment includes, in addition to the old Jamestown site, the Pine Beach property, which is the property adjacent to the deep water.

Mr. MADDEN. The only thing I am interested in is to know there will not be any taxes accumulating against the Government of the United States between now and the meeting of the Legislature of Virginia.

Mr. FITZGERALD. There will not be any taxes paid unless Congress appropriates to pay them, and I do not believe it will.

Mr. LENROOT. The amendment expressly provides the title shall vest in the Government immediately upon their taking possession, and therefore there could be no taxes levied except to that time.

Mr. PADGETT. Mr. Speaker, the situation in reference to the acquiring of additional ground on account of the enlargement of the Navy is so imperative and so critical that I can hardly adequately describe the necessity. This matter came up, and I have had meetings of the Naval Committee, and we have had before us the officers of the Navy, the Secretary of the Navy, the Surgeon General, the Chief of the Bureau of Navigation, who deals with personnel, and a representative of the Bureau of Supplies and Accounts, that deals with the supplies of the Navy, and I am glad to say that this amendment that is offered is the unanimous report from the Committee on Naval Affairs. Every member present, without regard to politics or party, agreed to it, and has recommended this amendment.

Mr. COX. Will the gentleman yield for a question?

Mr. PADGETT. Yes, sir.

Mr. COX. Does this cover the same amount of land that was covered by the original provision?

Mr. PADGETT. Identically.

Mr. COX. How much reduction is in the proposed amendment as compared with the price the other day?

Mr. PADGETT. Two hundred thousand dollars.

Mr. COX. As I recollect from hearing the amendment read, it provides the President shall purchase and pay 75 per cent of its value, and if that is not sufficient, then they have a right to go into court and sue to recover the remainder of it?

Mr. PADGETT. That is correct. There is no way to take over property entirely. They can not take over your home without giving you a day in court. We have followed the language and the policy of the legislation that has been adopted several times at the present session of Congress and at the last session of Congress, in the naval appropriation bill.

Mr. COX. There is precedent, then, for this kind of legislation?

Mr. PADGETT. We have copied the language almost verbatim.

Mr. WALSH. Mr. Speaker, will the gentleman yield?

Mr. PADGETT. Yes, sir.

Mr. WALSH. I understood the gentleman to say there has been a reduction of $200,000 in the price?

Mr. PADGETT. In the appropriation for the payment.

Mr. WALSH. But the amendment which the gentleman has offered would not preclude the President from paying $1,800,000 if he deemed it the proper price, would it?

Mr. PADGETT. I do not think the President would do so; but it would not prohibit the courts in a condemnation proceeding from fixing the price.

Mr. WALSH. Nor would it prohibit the President from determining that to be a proper price—$1,800,000 or $1,600,000.

Mr. PADGETT. I do not think there will be any trouble on that score. The trouble would be on the question of condemnation. There are a number of minors interested in this property.

Mr. WALSH. The gentleman does not answer my question. What I am trying to ascertain is whether or not under the amendment which you have offered the President could determine that $1,800,000 would be a proper compensation for this property.

Mr. FITZGERALD. There is a statute which prohibits any officer of the Government obligating the Government for an amount in excess of an appropriation.

Mr. WALSH. This is only a percentage of the price.

Mr. PADGETT. The President could not himself obligate the Government for an amount above the $1,200,000; but if they go into the court and condemn, as they will have to do in some of these cases, because there are minors and incompetents interested in the property, and unknown owners, the courts will have to fix the price, and there is no authority in the Congress to fix the price that must be determined by the court when the man has his day in court.

Mr. WALSH. My question was prompted, if the gentleman will permit me, by the phraseology with reference to the 75 per cent, and then in addition that there should be the 25 per cent and such further amount as might be required to make up an adequate compensation.

Mr. PADGETT. Yes. That was put in on account of the necessity of having to condemn a portion of the property. The President under this general law can not obligate the Government for an amount beyond the appropriation of Congress or the authority that Congress grants, and he would be limited by the $1,200,000. But if it goes into the court to determine the value of any specific piece of property under condemnation that is with the court.

Mr. LENROOT. Will the gentleman yield?

Mr. PADGETT. Yes, sir.

Mr. LENROOT. The gentleman speaks of its being necessary to condemn a part of this property. Is not this amendment in itself a condemnation full and complete, and the only thing that will remain will be to ascertain the amount of the price?

Mr. PADGETT. Yes; that is correct.

Now, Mr. Speaker, I wish to have read in my time a letter that I received to-day from the President as to the urgency of this matter.

The SPEAKER. Without objection, the Clerk will read.

The Clerk read as follows:

THE WHITE HOUSE,
Washington, June 12, 1917.

MY DEAR MR. PADGETT: I understand that the House will to-day be considering the proposition for the establishment of a naval base, and I take the liberty of availing myself of this opportunity to ask you to say to the House how essential it seems to me that a naval base and training station should be established, and established at the earliest possible day, at Hampton Roads.

I have considered this matter from a great many points of view, and am more and more impressed with the immediate necessity for such a training station. If it can not be had, and had promptly, the most serious embarrassments will ensue. I sincerely hope that it will be the wish of the House to take the necessary steps for its establishment.

Cordially and sincerely, yours,

WOODROW WILSON.

Hon. LEMUEL P. PADGETT,
House of Representatives.

Mr. PADGETT. Mr. Speaker, as a matter of phraseology in the last paragraph on the first page of the bill the words at the end of the second line, "is hereby appropriated," are unnecessary, and I ask that those words be stricken out. Then two lines below that, following the amount, "$1,600,000," the words "is hereby appropriated" occur again, and I ask that they be stricken out.

The SPEAKER. The Clerk will report the amendment offered by the gentleman from Tennessee.

The Clerk read as follows:

Modify the amendment offered by Mr. PADGETT by striking out in the last paragraph on the first page, following the word "necessary," the words "is hereby appropriated," and on the sixth line, following the figures "$1,600,000," strike out the words "is hereby appropriated."

The SPEAKER. Without objection, the modification will be made.

There was no objection.

Mr. PADGETT. Mr. Speaker, I ask that a vote be had.

Mr. FESS. Mr. Speaker, will the gentleman yield for a question?

Mr. PADGETT. Yes.

Mr. FESS. Yesterday in the Senate, in the discussion of this item, it was urged against condemnation that it would take at least a year before it could be adjusted.

Mr. PADGETT. Yes; but this avoids all that. The President takes it over, and this act vests the title upon taking it over, and the only question remaining is to settle the question of the purchase price.

Mr. FESS. In other words, the Government can begin at once to get ready?

Mr. PADGETT. Yes; it can immediately take possesion.

Mr. FESS. One of the Members said that there were about 250 separtate items that belonged to individual members and that a number of them were infants. This procedure enables them to go ahead?

Mr. PADGETT. This procedure vests the title taken and leaves it to be settled in the courts, and unless the President is able to settle it, the purchase price.

Mr. FESS. Does the chairman contemplate that the courts will be necessary, or will the matter be adjusted by contract?

Mr. PADGETT. The great bulk of it will be settled within the limitations provided by the appropriation. There are some minors whose cases will be adjusted by the courts.

Mr. FITZGERALD. Mr. Speaker, I just wish to say a word. I think it is due to the managers of this bill on the part of the House to point out just the difference between this provision and the one that was recommended in the conference report which was so unceremoniously rejected the other day. That provision took in the entire property, with all the rights and properties of the various companies, at a maximum cost of $1,400,000, and it would have been impossible either in purchasing or by condemning to have involved the Government in any expense in excess of the $1,400,000. Because of the very strenuous opposition of gentlemen on the Committee on Naval Affairs, urging that the appropriation was excessive and the prices proposed to be paid extravagant, the report was rejected. After two days' careful inquiry the members of the Committee on Naval Affairs have unanimously agreed to the amendment just offered. It provides that the President of the United States shall immediately take possession of all of this property. He shall ascertain what he believes to be just compensation. If the persons entitled to receive the money decline to accept it, they are to be paid a portion of the money, and then relegated to their rights in the courts. If the courts determine in the procedure that the value of this property and all of the rights taken over is very much in excess of the $1,200,000, the Government will be required to pay, because it will have taken the property under the exercise of this war power under the Constitution, and it must make just compensation.

I am not convinced myself that the Government is to get a better bargain under this new arrangement, but so long as all these gentlemen have been persuaded as to the imperative necessity of taking over this property, I believe that some proper, orderly manner should be established to ascertain the just compensation to which the owners are entitled under the Constitution, so that it may be awarded. It seemed to me that in view of the great storm of opposition that swept the House concerning condemnation, the managers on the part of the House agreed to the provision which was reported, and it is just to them to point out that no very great advantage has accrued to the Government by the recommendation of this particular provision.

Mr. CALDWELL. Mr. Speaker, will the gentleman yield?

Mr. FITZGERALD. Yes.

Mr. CALDWELL. Suppose that under the provision of the bill the President found that the property owned by the Jamestown Exposition Co. was worth $1,200,000, and that there was additional property there. How would the thing be worked out then?

Mr. FITZGERALD. Under this provision the appropriation is available only to acquire the entire tract and all the rights and privileges thereon. I have conferred with the gentleman from Tennessee and his colleagues, and they incorporated in this provision certain language which it seemed to me was essential to make it clear that all of the rights and property were to be acquired and to make impossible the acquisition of a portion of the property within the appropriation and the acquisition of the balance. The form in which this appropriation is now presented, however, changes the situation completely. It proposes that the Government, under the power that it undoubtedly has, shall take this property over, and when it takes it over it must make just compensation. An attempt will be made to convince all of those interested that $1,200,000 will be just compensation. If the owners do not believe it is just compensation, they are entitled to have that question determined in the courts, and if the courts should determine that some sum in excess of $1,200,000 is required to make full compensation, we are under obligations to pay it. My opinion is that what the Congress wants to do is to pay just compensation for this property and nothing else, and when it has arranged the proper and orderly manner to ascertain what that shall be it is willing to pay.

Mr. MADDEN. Will the gentleman yield now?

Mr. FITZGERALD. Yes.

Mr. MADDEN. This amendment proposed by the Committee on Naval Affairs is much more advantageous to the owners

of the property than the amendment proposed by the Appropriations Committee in the former conference report, because this amendment turns the money over to the owners of the property to-morrow, if the President says so, whereas under the proposition of the Appropriations Committee they would have had to wait until the titles were adjudicated.

Mr. FITZGERALD. But then there is another phase to that, that under this provision the Government takes immediate possession of the property, while if it took it in the ordinary way it could not obtain possession until it had paid for it; so that perhaps the advantage is balanced by the disadvantage. I yield five minutes to the gentleman from Massachusetts [Mr. GILLETT].

Mr. GILLETT. Mr. Speaker, I wish to impose upon the House very briefly, just to state, as one of the managers upon the part of the House, the attitude I have taken on this conference report. What the gentleman from New York [Mr. CALDWELL] brought up illustrates the fact that when I go into conference with the Senate I appreciate that I am not going to have all my own way. I am going to run against stubborn and determined men who have opinions of their own, to which they have a right; and if their body is behind them, as I believe it was in the case the gentleman suggests, the House can not expect to run over them, and we can not expect to have our own way always. I sympathize entirely with the views expressed by the gentleman from New York [Mr. CALDWELL] on that proposition; but not only were the Senate conferees determined, but they assured us that the Senate was determinedly behind them; and when the Secretary of War, representing the administration, took the same ground it was obvious that we would have to yield, and we made the best terms we could. I much preferred the law as it was before, but with the administration changing front we could not expect to successfully withstand the Senate.

Now, as to this Jamestown matter, when it first came before the Appropriations Committee the Navy Department strongly urged upon us the purchase of the Jamestown land. We knew that this proposition had for a long time been considered by the Naval Committee and had been opposed by them, and therefore the first thing we did was to inquire the attitude of the Naval Committee, and we ascertained that they had discussed and investigated it and were opposed to it. Therefore, without going into the merits of it ourselves, not wishing to intrude upon their jurisdiction, we determined to follow their opinion. Personally I have had the suspicion that during this war, with the enormous appropriations it brings, a great many defunct propositions from the different departments which Congress has rejected will be brought forward anew in the hope that under the pressure and hurry of the war Congress will reverse itself and allow what it has previously condemned. I did not know whether this was one of those or not, but I understood from the Naval Committee that it had been repeatedly refused, and therefore I determined just on that account to oppose it. I must admit I was somewhat prejudiced against it, as I suspect was everyone who was here at the time of the Jamestown Exposition, because of the unsavory flavor that has always hung around the prosecution of that exposition. So, without going into the merits of it, I—and I think that is true of the whole committee, though I will speak only for myself—refused to put in our bill this Jamestown proposition. But the Senate put it in, and when we went over to the conference we sat down and had to trade and bargain with the Senate on about a hundred different amendments. I made up my mind pretty soon that this Jamestown Exposition proposition was one that the Senate was determined upon. We held out and we haggled and bargained and traded, and finally we came to a complete agreement, the House yielding some items and the Senate yielding some. I held out against this Jamestown proposition as long as I could, but we finally yielded. Therefore when we came back to the House, although it was not in accord with my judgment, I felt, as one of the conferees, as one who had made the final agreement with the Senate, who had got as much as I could of what the House wanted, that I was bound by the bargain, and I voted in favor of the conference report.

Now, I will say further that I have come to the conclusion that Chesapeake Bay is obviously going to be a great naval station. I understand naval experts say there are two places on our coast specially adapted to that by nature, one Narragansett Bay and the other Chesapeake Bay; but obviously Chesapeake Bay, with its navy yard, is going to be for the present our great naval base, and there is no question that we need land there. Whether this was the best land and whether we were paying an exorbitant price I had my suspicions, but guided by the opinion of the Naval Committee, which agreed with my own judgment, I stood out against it as long as I could; but finally having yielded in a bargain, as I say, I thought I must stand by the bargain, and I voted in favor of the conference report. I am very glad now of this agreement which the Naval Committee has unanimously come to. I accept it with gratification, although still with much doubt, but I am willing to leave the determination and the responsibility with the President. [Applause.]

Mr. FITZGERALD. I yield five minutes to the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. Chairman, it was naturally to be expected that the distinguished chairman of the Committee on Appropriations [Mr. FITZGERALD] should seek to show that the original proposition for the purchase of this property was more advantageous to the Government than is the pending amendment.

Mr. FITZGERALD. I did not say the original proposition.

Mr. LENROOT. I meant the previous conference proposition; and the gentleman referred to the fact that under that previous conference proposition the Government did not need to take the property, even under the right of eminent domain, unless the price was entirely satisfactory. But I want to call the gentleman's attention and the attention of the House to the fact that if the Government was to make any use of this property for the ostensible purpose for which it was desired, and there was litigation under condemnation proceedings, the Government would be compelled to take possession of it long before those condemnation proceedings were concluded, as the Government would have the right to do under certain conditions; and if the Government did take possession of it, and if the jury should award a sum very much larger than the $1,400,000 appropriated in the conference report, the Government would be bound to pay that larger amount, because it would have expended upon the ground by that time the $1,600,000 that the gentleman himself appropriated for in the conference report; and could it be supposed that after the Government had expended $1,600,000 upon this property it would refuse to pay $200,000 or $300,000 more for it if the jury should award a sum greater than the $1,400,000? Of course not. The difference is this: In the proposition the gentleman had they asked Congress to pass upon this question of paying $1,400,000, a matter that Congress knew nothing about, and which the gentleman very frankly stated that he did not know whether it was just or otherwise.

In this proposition the responsibility is put upon the President of the United States, and the responsibility will be his if he pays an excessive sum for this property, and not the responsibility of Congress.

Mr. FESS. Will the gentleman yield?

Mr. LENROOT. Yes.

Mr. FESS. There may be an unearned increment that will make this property more valuable after the Government of the United States makes improvements upon it. Is that cared for?

Mr. LENROOT. The title passes immediately upon the Government taking possession, and that will be the time that the value of the property is to be assessed. I am not satisfied from anything that has been said that this is necessary, but if it is necessary there is no Member of this House that wants to prevent the Government from having it, and under the proposition that is now pending the President must take the responsibility of determining not only the necessity but the price to be paid. With all the powers we are granting him from day to day, involving billions and billions of dollars, I am willing that he should have this responsibility, too, and if there should be any reflections upon anyone growing out of it in the future it will attach not to the House of Representatives but to the President of the United States.

The SPEAKER. The question is on the motion offered by the gentleman from Tennessee [Mr. PADGETT] that the House recede from its disagreement to Senate amendment No. 68 and agree with an amendment.

The question was taken, and the motion was agreed to.

On motion of Mr. PADGETT, a motion to reconsider the vote whereby the motion was agreed to was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 291) to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes.

AMENDING THE FEDERAL RESERVE ACT.

Mr. GLASS. Mr. Speaker, may I inquire how much time has been used by each side?

The SPEAKER. The gentleman from Virginia has 53 minutes remaining and the gentleman from Pennsylvania 48 minutes.

Mr. GLASS. I yield five minutes to the gentleman from Missouri [Mr. BORLAND].

Mr. BORLAND. Mr. Speaker, I want to speak for a few minutes in favor of the conference report as now drawn, and especially as presenting the view of the business men and the merchants toward this so-called Hardwick amendment.

I am going to support this conference report because I feel that the conferees have in a difficult situation done the very best thing under the circumstances; that is, they have committed this subject to the order of the Federal Reserve Board, a flexible method of controlling the subject which can be changed and modified as business conditions warrant. I regard that as a very much better amendment than the Hardwick amendment standing alone.

Mr. DUPRÉ. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. DUPRÉ. Is the gentleman aware that the membership of the Federal Reserve Board is absolutely opposed to the Hardwick amendment?

Mr. BORLAND. I do not think the membership of the Federal Reserve Board in the event of a duty being imposed upon them by law would be governed by their own private wishes. If it appears that the banks ought to have this charge in certain cases or at a certain time I feel disposed to think that they would authorize it. But I have never been convinced in my own mind that the banks are entitled to it. I feel that the banks are losing a source of revenue they formerly had, and in some banks it was a considerable source. In some small banks it paid or helped to pay the clerk hire of the bank. But the banks must remember that the Federal Reserve System as a whole has been the most beneficial measure to the banks that has ever been passed. We all saw here in the House that there was a continued opposition on the part of the banks, who are now acknowledging the benefits of the system, to almost every essential feature of the system. Yet to-day I think there is scarcely any bank in the country that would be willing to abolish the system as a whole. They have objections to particular provisions of the system as it affects their particular profits and particular line of business. They overlook the fact that at the time and before this Federal banking system went into force banks were under the moral and commercial necessity of keeping on hand in their vaults or keeping a credit with some city bank of a sufficient sum to tide them over a run. This was a great restriction on their earning power. Not only has their legal reserve been reduced, but the necessity for keeping an extra reserve on hand in critical times is avoided.

Before the passage of the law they had no other source or reservoir of supply than the money in their vaults or the accommodation of other banks. I have seen the case frequently where banks retained an extraordinary amount of deposits in their own vaults to avoid the danger of a run, or tied themselves up with some city bank by rediscount or large deposit or otherwise so that they could have accommodation in case of need. We must not overlook the fact that the banks in being relieved of that constant fear of a run have a very much larger amount of depositors' money available for lending out and thus making profit by the bank. It is true that some of the profits of the bank have been curtailed, and I think properly so, because the business public is entitled to its share of the benefits and advantages of the cheapening of commerce through the instrumentality of this law. One of the purposes of the law was to take the toll gate off commerce. It was to make checks of member banks par all over the United States. We can not affect the business of nonmember banks, except so far as they desire to submit themselves to the control of this system because of the advantages they hope to gain, but as far as member banks are concerned, we ought to make their checks par everywhere in the United States. While this controversy has been going on I have been flooded with letters and telegrams from the most responsible business men in my district insisting upon the one point that they wanted these checks to be par, and that they had a right to ask that at the hands of the Federal Reserve System.

Mr. HARRISON of Mississippi. Mr. Speaker, will the gentleman yield?

Mr. BORLAND. In a moment. They point out the immense advantages the banks are enjoying, which the banks freely confess, and the great profits which the banks are getting from this system in the freedom from panics which the banks freely admit, and they say the business men of this country are entitled to their advantage, which is freedom of exchange and removal of these artificial restrictions on commerce. I yield now to the gentleman from Mississippi.

Mr. HARRISON of Mississippi. The gentleman says that he has received a great many letters and telegrams about this matter protesting against exchange charges. Does the gentleman know that the Simmons Hardware Co., big wholesale people, sent out telegrams to their various customers telling them that they would pay the expenses of telegrams to Congressmen?

Mr. BORLAND. I do not know that, but I do know that the banks have carried on an active campaign through their organization, as brilliant business men can do. One of the greatest influences in this country is organized public opinion. I do not think Members of Congress will be influenced by anything but the truth. I never refuse to allow any man to communicate with me by letter, telegram, or in person in behalf of himself or of a client. I assume that I have the right and the ability to weigh what he says in the light of his interest in the matter.

Mr. WINGO. Mr. Speaker, will the gentleman yield?

Mr. BORLAND. Yes.

Mr. WINGO. The gentleman, in opening his statement, said that he was going to speak for the business men. The gentleman has seen the circular which has been handed to us, in which circular these business men say that the small bank is entitled to this, but that they think the country merchants, the patrons, ought to pay, and not the wholesaler.

Mr. BORLAND. I am not sure that I have seen that circular.

Mr. WINGO. That is the reason I am calling it to the gentleman's attention.

Mr. BORLAND. How is this going to affect the village bank if it does not in some way connect itself with the reserve system, either as a member or a nonmember depositing a credit with a member bank?

Mr. WINGO. I presume the gentleman is familiar with the clearing system established by the board?

Mr. BORLAND. Yes.

Mr. WINGO. Which is a voluntary system. The gentleman knows that nonmember banks are in that?

Mr. BORLAND. Yes.

Mr. WINGO. The gentleman understands how nonmember banks are compelled to join these clearing-house systems. The gentleman from Virginia [Mr. GLASS] says that it is by competition. It makes no difference what you call it, they have to go into it.

Mr. BORLAND. That is my understanding. The nonmember banks can not be forced into this system nor into the voluntary clearing houses except by the pressure of competition to provide their patrons with facilities equal to those of other banks.

Mr. HOWARD. Mr. Speaker, will the gentleman yield?

Mr. BORLAND. Yes.

Mr. HOWARD. There is one great benefit that accrues to these small banks by virtue of the establishment of the Federal reserve system. Every country bank in my section of the country has a Federal reserve bank correspondent in some large city, through which they refinance their loans. They take their paper. Here is the advantage the country banks of the United States, and especially in the South, to-day are getting. They are getting their money at a lower rate of interest from their correspondent banks than they ever got it, and yet they have not changed their rate of interest to borrowers from them.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. WINGO. If the gentleman from Missouri will permit, he does not want that statement to go in the RECORD. That is not permitted under this law.

Mr. HOWARD. But they are doing it.

Mr. WINGO. This act prohibits it. They can not handle the business of a nonmember bank.

Mr. BORLAND. Mr. Speaker, my judgment about the position of the village bank is and my experience has taught me that every small bank keeps a deposit in a city bank for its own convenience, and it must necessarily do so. Under the old law every country national bank did that as a part of its reserve. Now it does it for its own convenience. If a check comes into that city bank, let us say Kansas City or Omaha, drawn on some country correspondent, that check is charged to that country bank's account. That is all that happens and there is no reason on earth why those checks should not circulate at par. The checks do eventually go back to the bank on

which they are drawn, but they are charged in the first instance on the books of the member banks in the big city. That is where they first light. I have never been able to discover anything more than bookkeeping connected with the payment by a bank of its own checks, whether paid by a correspondent or over its own counter. The banks, as I say, undoubtedly lose a source of profit which they have made, but, as the gentleman from Georgia pointed out and as I have endeavored to point out, this is simply compensating the business men, who are entitled to it. The little business men, the retail merchants—the big business man, the wholesaler, the jobber, already have—are entitled to have as easily as possible the collection of funds throughout the country, to have the tollgates removed from commerce and let commerce be as free as transportation ought to be in this country. Let every avenue be open to commerce and let a man's check be good with the merchant he buys goods from in the cities or wherever he desires to send it. That is what this system does; that is what this whole system of Federal banking does, reducing to the minimum the bookkeeping and clerical part of banking.

The SPEAKER pro tempore. The time of the gentleman has again expired.

Mr. GLASS. Mr. Speaker, I hope the gentleman from Pennsylvania will use some of his time.

Mr. McFADDEN. Mr. Speaker, I yield 15 minutes to the gentleman from Mississippi [Mr. HARRISON].

Mr. HARRISON of Mississippi. Mr. Speaker, I yield back my time.

Mr. GLASS. How would the gentleman from Pennsylvania consider having a vote upon this proposition now?

Mr. CANNON. Mr. Speaker, I am, of course, not in the management of the bill, but I am a Member of the House. It has been an exceedingly trying, hot day. It is almost 5 o'clock; the bill can not be completed to-night. It seems to me if we take an adjournment until 11 o'clock——

Mr. HOWARD. It is hotter outside than it is here, I will say to the gentleman from Illinois.

Mr. CANNON. Oh, my friend would not be hot anywhere.

Mr. HOWARD. Oh, I do not know; I am mighty cool.

Mr. McFADDEN. I will say to my colleague the time is allotted on this side, and I think gentlemen are expecting to speak on this subject. There has been no opportunity afforded for the discussion at any great length of the merits on this side of the question. I quite agree with the suggestion of the gentleman from Illinois [Mr. CANNON] that we can not finish to-night, and I think it might go over until to-morrow, adjourning, say, at 5 o'clock. I think that would be a good plan.

Mr. GLASS. There are many men who have expressed the desire to act on the bill to-night, and some of them have to leave town to-morrow.

Mr. FOSTER. To-morrow is Calendar Wednesday.

Mr. McFADDEN. That applies to some gentlemen on this side, except that we want to go over to-morrow.

Mr. GLASS. We can get through to-day if the gentleman will agree to let us vote on the bill now.

Mr. ROSE. Allow me to suggest that I know quite a number of people who left the House under the belief that this bill would not be voted upon to-day.

Mr. HOWARD. The baseball game will be over in a few minutes.

Mr. ADAMSON. If the gentleman will permit me to say——

The SPEAKER pro tempore. Does the gentleman yield?

Mr. ADAMSON. Some of us here whose committees are not privileged are dependent entirely on Calendar Wednesday to receive recognition, and I hope gentlemen in their desire for further consideration of this bill will leave Calendar Wednesday out of consideration.

Mr. GLASS. We can not do that.

Mr. PLATT. I think we ought to finish this thing to-night.

Mr. GLASS. So do I. There is nobody longer listening to the debate. Without unanimous consent we can not do anything.

Mr. FOSTER. Let the gentleman remember that to-morrow will be Calendar Wednesday, and you can not go on with the bill to-morrow, if you determine to do so, without unanimous consent.

Mr. GLASS. You see the point is made that we can not go on except by unanimous consent.

Mr. STAFFORD. If the gentleman will permit, I think that two-thirds of the House would vote to take it up at 11 o'clock to-morrow, Calendar Wednesday. It would be to the convenience of the Members.

Mr. GLASS. I want to consult the convenience of the Members. I am willing to vote now if they want to vote now, or let it go over.

Mr. McFADDEN. A number of gentlemen have left the House expecting that it would not come up to-night, and it would not be fair to them to come to an agreement.

Mr. PLATT. How could they do that if there was a unanimous agreement to have debate and take a vote?

Mr. SCOTT of Michigan. There was not any agreement to take a vote.

Mr. GLASS. You can go on as you please.

The SPEAKER pro tempore (Mr. COX). The gentleman from Virginia [Mr. GLASS] is recognized.

Mr. GLASS. I ask the gentleman from Pennsylvania to use some of his time.

Mr. McFADDEN. I would rather the gentleman from Virginia would proceed, if he will.

Mr. GLASS. I have not anybody here at this moment. I have used more of my time than the gentleman has of his.

Mr. CANNON. I presume that we might have a quorum if the point is made.

Mr. GLASS. I hope the point will be made. We would like to have a quorum here.

Mr. McFADDEN. I suggest to the gentleman from Virginia that the gentleman from Massachusetts [Mr. PHELAN] is to speak on this subject, and he is not present in the Hall at this time.

Mr. GLASS. I yield five minutes to the gentleman from Georgia [Mr. HOWARD].

Mr. HOWARD. Mr. Chairman, I presume the gentleman from Virginia [Mr. GLASS] has put me in the attitude of a long-haired fanatic that was attending a country funeral. After the preacher had gotten through with his funeral oration, he asked, "If there are any friends of the deceased brother present who would like to say a few words about the life and character of the deceased brother, we will be glad to hear from them." Nobody seemed inclined to rise, and finally this old fellow got up and said: "Well, brother, if nobody else would like to say anything, I would like a few minutes to say a few words about the free and unlimited coinage of silver." [Laughter.] And so I presume that Brother GLASS, having nobody else to say anything about this bill, has yielded five minutes to me for the purpose of "filling in."

I could discuss the free and unlimited coinage of pig iron about as intelligently as some gentlemen have discussed this proposition before us. Now, there is one thing I want to say about this exchange proposition. I have had a good deal of dealings with banks on the outside, looking in, but never from the inside, looking out. I know a good deal about the banking business from that standpoint only. But I want the attention of these gentlemen that are talking about these poor little country banks and what a hardship it is on them to cut them off from the right to charge exchange that is unreasonable. And my good friend from Mississippi [Mr. HARRISON], who is always looking out for the common people, wants to give these "little country banks" a right to ride the people again on collecting exchange and amounts of money for which they do not render any commensurate service that is anything like the charge made.

Since the Federal Reserve System has been established in the cotton-growing States—the statement of the gentleman from Arkansas [Mr. WINGO], who knows as much about this bill as anybody else, to the contrary notwithstanding—here is the situation: A good many of the bankers in the Southern States are not bankers. They are pawnbrokers. Two-thirds of them to-day, with this country staring a food panic in the face, are charging the farmers in my State and in other Southern States usurious rates, and they would do it in the State of the gentleman from Mississippi, if, in 1914, that State had not passed one of the best and most regulatory State banking acts in existence in the United States. I will admit that the gentleman from Mississippi has an ideal banking law, but there were just as many of the other kind I was describing in Mississippi up to the time of the passage of the act of 1914 as there are in any other State.

Mr. WINGO. Will the gentleman yield?

Mr. HOWARD. I can not yield to the gentleman.

Mr. WINGO. You referred to me, and I can not see the connection, as I did not even mention the matter you are discussing. I confined my remarks to the pending bill.

Mr. HOWARD. I was talking about the gentleman a moment ago, and I am coming back to him presently. But I am talking now about the gentleman from Mississippi [Mr. HARRISON] and about his being excited here over these "poor little country banks" being put out of business; these "poor little country banks!" And the stock of 9 out of 10 of them to-day is worth 2 for 1. [Laughter.]

Mr. WINGO. I know the gentleman wants to be fair. I was not discussing that.

Mr. HOWARD. I can not yield to the gentleman to make a speech. Let me make this statement and I will clear you in half a minute. [Laughter.]

Mr. WINGO. I want to try to give the gentleman some information.

Mr. HOWARD. I can not take time to get it. [Laughter.]

Mr. WINGO. I thought the gentleman wanted information.

Mr. HOWARD. No; I do not want it. [Laughter.] I want to argue something now that the gentleman injected into this discussion by asking the gentleman from Missouri [Mr. BORLAND] a question.

Mr. WINGO. I did not ask the gentleman a question. I challenged a misstatement of the law.

Mr. HOWARD. The difference between what I said and what the gentleman said is the difference between "Stephen, come down," and "Come down, Stephen." [Laughter.]

Now, here is what I want to say: You are not exciting any sympathy with me for these "poor little country banks." I say that those banks to-day are profiting more by the Federal Reserve System than they ever profited before in their history, and by virtue of their not charging a nickel exchange—suppose they did not do it—they would make more money by the manipulation of the Federal Reserve System than they ever made before in their lives, and they do it in this way—and that is what I am coming to: For instance, the country bank in your city in Arkansas, when it loans its resources to the farmer, charges anywhere from 8, 12, to 20 per cent interest on growing crops, mules, milch cows, and any other securities, and when their resources are exhausted they go to the reserve bank and they make over to the national bank all their notes and borrow from the national bank on those notes properly transferred.

The SPEAKER. The time of the gentleman has expired.

Mr. HOWARD. Mr. Speaker, may I have a few minutes more? I want to explain this little transaction.

Mr. GLASS. I yield to the gentleman five minutes more.

The SPEAKER. The gentleman is recognized for five minutes more.

Mr. HOWARD. They borrow money on their notes, and the national banks loan it at the very lowest rate of interest—between 1 and 2 per cent of what the regional bank is charging the reserve bank—and in turn they take that money and go out in the country and loan it at anywhere from 8 per cent to 20 per cent per annum to the farmer to make a crop with.

Mr. WINGO. The gentleman knows that that is prohibited by statute.

Mr. HOWARD. I know it is not. I have read the law. Let us see if that transaction is prohibited. It is not an asset of the country bank that is discounted; it is the asset of the national bank that is discounted. Do you mean to tell me that the country bank of that little town of yours, Mena——

Mr. WINGO. The gentleman does not even know where I live. [Laughter.]

Mr. HOWARD. The gentleman from Ohio [Mr. LONGWORTH] and I had that proposition up once, and we all, as I take it, understood that you live at Mena, or at least we so decided.

Mr. HARRISON of Mississippi. The gentleman himself lives at Atlanta, where there is a Federal reserve bank.

Mr. HOWARD. Yes. Everybody knows that I live in Atlanta. I hope the gentleman will come through there some day and see a great city. [Laughter.] Now, the proposition is that that little country bank at Mena will take its resources and transfer them to the national bank at Little Rock, which is its national-bank connection, and that bank can take them to the Federal reserve bank and discount them in that bank as the assets of the national bank—not the assets of the nonmember or country bank.

Mr. WINGO. That is contrary to law. If the gentleman will read section 17——

Mr. HOWARD. Then, all the little bankers in the United States ought to be in the penitentiary, and all in the gentleman's State ought to be there, because, as the gentleman says, that is in violation of the law. That is the way they are reaching these small banks with a low rate of interest.

Mr. WINGO. They do not do it in my State. The gentleman and I do not agree as to the law.

Mr. HOWARD. Go to every Federal reserve bank, and what will they tell you? They will tell you that 70 per cent of all the paper is in their bank along about July of a given year, which is all predicated upon farm loans.

Mr. WINGO. That is a different proposition.

Mr. HOWARD. The farmer has gotten the money, and they are rediscounting it. That is what they are doing. I tell you, gentlemen, we ought to agree to this conference report. It is right that it should be agreed to. These banks are making enough money now, and you do not hear anybody complaining of low interest, do you? I know one bank which keeps me sweating all the time paying into it, and heaven knows it looks like it was getting higher and higher instead of lower and lower. [Laughter.] I tell you there is one regular thing; it comes around mighty regularly, and that is this big interest that they are charging, and they always charge as much as they can get. You can take all these bankers here, and I could go through this House and point them out. Look how well groomed they are! See how well kept they are! See how many automobiles they have! See how much society they indulge in! There is my friend from Pennsylvania [Mr. MCFADDEN], and there is my friend from South Carolina [Mr. RAGSDALE], just a president of an ordinary country bank. Why, the evidence is all against them. [Laughter.] They make profert of themselves in this House, and then they come in and say, "Poor little country banks! Help us, we need the money." I hope this conference report will be overwhelmingly agreed to, and that the people of the United States will have this unnecessary and unjustifiable charge taken off their shoulders.

Mr. GLASS. Mr. Speaker, I hope the gentleman from Pennsylvania [Mr. MCFADDEN] will use some of his time. All of the speeches of late have been on this side.

Mr. MCFADDEN. Mr. Speaker, I yield 15 minutes to the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. I am not going to talk to empty benches. I make the point, if I have got to talk, that there is no quorum present. Anyway, you can not finish this bill to-night, in my judgment.

ORDER OF BUSINESS.

Mr. HARRISON of Mississippi. Mr. Speaker, will the gentleman withhold his point for a moment?

Mr. CANNON. Yes.

Mr. HARRISON of Mississippi. I ask unanimous consent, Mr. Speaker, that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow morning.

The SPEAKER. The gentleman from Mississippi asks unanimous consent that when the House adjourns to-day it adjourn to meet to-morrow at 11 a. m.

Mr. ADAMSON. Reserving the right to object, I should like to ask the gentleman from Mississippi what his purpose is.

Mr. HARRISON of Mississippi. It might be possible to do more work to-morrow if we meet at 11 o'clock.

Mr. COX. I object, Mr. Speaker.

Mr. ADAMSON. I am willing that the House should meet at 11 o'clock, but I do not want to dispense with Calendar Wednesday.

The SPEAKER. The gentleman from Illinois [Mr. CANNON] makes the point of order that there is no quorum present.

Mr. GILLETT. If the gentleman will withhold that a moment, may I suggest to the gentleman from Virginia [Mr. GLASS] that it is now 5 o'clock, and that it would hardly be worth while to bring a quorum here. It would be wiser to adjourn now, because we can not finish the bill to-night anyway.

Mr. GLASS. I would be perfectly willing to have the House adjourn if we can get unanimous consent to proceed with this bill in the morning when we meet at 11 o'clock.

Mr. GILLETT. Does the gentleman mean Thursday morning?

Mr. GLASS. No; I mean to-morrow morning.

Mr. GILLETT. I am perfectly willing that the gentleman should go on with his bill to-morrow.

Mr. GLASS. That we proceed with the bill to a conclusion to-morrow.

Mr. GILLETT. But perhaps the gentleman from Georgia [Mr. ADAMSON] will not agree to that.

Mr. ADAMSON. There are certain bills that are not privileged, and we have not yet been able to get unanimous consent to make them so.

Mr. GLASS. We ought to be able to finish this bill by 1 o'clock to-morrow.

Mr. ADAMSON. We ought to be able to, but I observe in this House that when the talking machine starts there is a vast difference between what is and what ought to be. I have no objection to meeting at 11 o'clock, but I do not want to dispense with Calendar Wednesday.

Mr. STAFFORD. If the gentleman will yield, may I suggest to the gentleman from Georgia that even with a roll call this matter will be out of the way in two hours to-morrow, and if we meet at 11 o'clock the gentleman from Virginia will be able to go on with his bill by 1 o'clock or 1.30.

Mr. ADAMSON. I suggest as a compromise that we take a recess until 11 o'clock.

Mr. COX. I object to meeting at 11 o'clock.

Mr. ADAMSON. The only proposition I make is that we take a recess instead of adjourning.

The SPEAKER. The gentleman from Indiana [Mr. Cox] objects to the 11 o'clock proposition. Has any gentleman anything to suggest?

Mr. GLASS. I ask unanimous consent that we proceed with this bill to its conclusion to-morrow when the House reconvenes, Calendar Wednesday to the contrary notwithstanding.

Mr. ADAMSON. Mr. Speaker, if my request to make certain bills privileged can be agreed to I will not object, but unless I can get a privileged status for one or two bills, I shall object to dispensing with Calendar Wednesday. I ask unanimous consent——

Mr. GILLETT. I feel obliged to object to that proposition.

The SPEAKER. What proposition?

Mr. GILLETT. I object to the proposition to make certain bills privileged.

Mr. ADAMSON. Then let us agree to make Calendar Wednesday business in order on Thursday instead of to-morrow.

The SPEAKER. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that when the House meets to-morrow the business of Calendar Wednesday be waived to the extent of allowing him to finish with this bill.

Mr. ADAMSON. Reserving the right to object, I will make this suggestion, that Thursday may be made Calendar Wednesday instead of to-morrow, that business in order to-morrow may be in order on Thursday.

The SPEAKER. The gentleman from Georgia asks unanimous consent that business in order to-morrow shall be set for Thursday.

Mr. CURRY of California. I object.

The SPEAKER. The gentleman from California objects.

Mr. HARRISON of Mississippi. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HARRISON of Mississippi. The previous question having been ordered on this report, would it not come up to-morrow as unfinished business?

The SPEAKER. It would not.

Mr. GLASS. Mr. Speaker, I ask unanimous consent that the further consideration of this bill go over until Thursday morning.

The SPEAKER. The gentleman from Virginia asks unanimous consent that all further consideration of this bill go over until Thursday morning.

Mr. HARRISON of Mississippi. Reserving the right to object, it will be in order Thursday morning. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HARRISON of Mississippi. Is it not in order in the morning to move to dispense with Calendar Wednesday?

The SPEAKER. Of course, it is in order at any time to move or ask unanimous consent to dispense with Calendar Wednesday.

Mr. RAGSDALE. Mr. Speaker, I move that the House do now adjourn.

Mr. GLASS. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. RAGSDALE. Is not my motion a privileged motion?

The SPEAKER. It is, but the gentleman from Virginia has asked to put a parliamentary inquiry.

Mr. RAGSDALE. I demand the regular order.

Mr. GLASS. I want to know if this bill is not considered and disposed of to-morrow it has a privileged status on Thursday and may be brought up at any time?

The SPEAKER. Of course.

ADJOURNMENT.

Mr. GLASS. I move that the House do now adjourn.

The SPEAKER. The gentleman from South Carolina and the gentleman from Virginia both move that the House adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 3 minutes p. m.) the House adjourned until to-morrow, Wednesday, June 13, 1917, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Aquia Creek, Va., with a view to extending the present project (H. Doc. No. 181); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

2. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication of the Secretary of War submitting a supplemental estimate of appropriation for the service of the War Department for the fiscal year ending June 30, 1918 (H. Doc. No. 182); to the Committee on Appropriations and ordered to be printed.

3. A letter from the President of the United States, transmitting a letter from the Secretary of the Navy recommending the acquirement of an adequate naval base at Hampton Roads, Va. (H. Doc. No. 183); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. LEVER, from the Committee on Agriculture, to which was referred the bill (H. R. 4961) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel, reported the same without amendment, accompanied by a report (No. 75), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. ALEXANDER: A bill (H. R. 4988) to authorize the changing of the name of the steamship *Caldera;* to the Committee on the Merchant Marine and Fisheries.

Also, a bill (H. R. 4989) to provide a preliminary survey of the Grand River and its several forks and tributaries in Missouri with a view to the control of its floods; to the Committee on Flood Control.

By Mr. FERRIS: A bill (H. R. 4990) to expedite the classification of public lands for stock-raising homesteads, and for other purposes; to the Committee on the Public Lands.

Also, a bill (H. R. 4991) providing for the counting of service in the Army or Navy of the United States as equivalent to residence and cultivation upon homestead entries, and in the event of the soldier's death in such service providing for the issuance of patent for such land to his widow or minor children; to the Committee on the Public Lands.

By Mr. BACHARACH: A bill (H. R. 4992) to provide for the acquisition of an air station site for the United States Navy; to the Committee on Naval Affairs.

By Mr. HAWLEY: A bill (H. R. 4993) for the protection of the owners of mining claims and of desert-land entrymen who enter the military or naval service of the United States in time of war; to the Committee on the Public Lands.

By Mr. JONES of Texas: A bill (H. R. 4994) to fix the terms of court for the Wichita Falls, Fort Worth, and Dallas divisions of the United States district court for the northern district of Texas; and to transfer Hardeman County from the Fort Worth division to the Wichita Falls division; to the Committee on the Judiciary.

By Mr. RAKER: A bill (H. R. 4995) to provide for an increased production of foodstuffs by the reclamation of arid and swamp lands of the United States, and for other purposes; to the Committee on Irrigation of Arid Lands.

By Mr. GANDY: A bill (H. R. 4996) to authorize the payment of certain amounts for damages sustained by prairie fire on the Rosebud Indian Reservation, in South Dakota; to the Committee on Indian Affairs.

By Mr. PARK: A bill (H. R. 4997) to authorize the appointment of Philippine Constabulary and Philippine Scout Officers to the grades of captain and first and second lieutenants in the Army; to the Committee on Military Affairs.

By Mr. GANDY: A bill (H. R. 4998) authorizing the Sioux Tribe of Indians to submit claims to the Court of Claims; to the Committee on Indian Affairs.

Also, a bill (H. R. 4999) to prohibit the traffic in peyote, including its sale to Indians, introduction into the Indian country, importation, and transportation, and providing penalties therefor; to the Committee on Indian Affairs.

By Mr. VAN DYKE: A resolution (H. Res. 100), directing the Committee on Expenditures in the Post Office Department to make certain examinations; to the Committee on Expenditures in the Post Office Department.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. GANDY: A bill (H. R. 5000) granting a pension to Abraham M. Reams; to the Committee on Pensions.

Also, a bill (H. R. 5001) granting a pension to Nancy O. Putnam; to the Committee on Pensions.

Also, a bill (H. R. 5002) granting a pension to Gertrude Hunter; to the Committee on Pensions.

By Mr. GILLETT: A bill (H. R. 5003) granting an increase of pension to William A. Morton; to the Committee on Invalid Pensions.

By Mr. KNUTSON: A bill (H. R. 5004) granting a pension to Eliza H. Cooley; to the Committee on Invalid Pensions.

By Mr. RAKER: A bill (H. R. 5005) for the relief of Brig. Gen. Asher C. Taylor, United States Army, retired; to the Committee on Military Affairs.

By Mr. SHERWOOD: A bill (H. R. 5006) granting a pension to Lucy Phelps Walk; to the Committee on Invalid Pensions.

By Mr. SWITZER: A bill (H. R. 5007) to reimburse Isaac A. Gibbs for damages arising from the destruction of a ford across the Hocking River in Athens County, Ohio, due to backwater created by the construction of Lock and Dam No. 20 on the Ohio River; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. DALE of New York: Petition of sundry citizens of Brooklyn, N. Y., protesting against prohibition; to the Committee on the Judiciary.

By Mr. EAGAN: Petition of the music committee of the Alabama Rotary Club, relative to adopting Dixie as national war song of the United States; to the Committee on the Judiciary.

Also, memorial of Winston-Salem (N. C.) Board of Trade, relative to the adoption of the English or Canadian method of excess-profits taxation; to the Committee on Ways and Means.

Also, petitions of the Technical Press Chapel and Arthur Capper, governor of the State of Kansas, against increased postage; to the Committee on Ways and Means.

By Mr. ESCH: Memorial of the Common Council of La Crosse, Wis., relative to food control; to the Committee on Agriculture.

By Mr. FULLER of Illinois: Petitions of the Great Northern Lumber Co. and the Chicago Federation of Labor, protesting against an increase in postage; to the Committee on Ways and Means.

Also, petition of the Sherwin-Williams Co., of Chicago, Ill., protesting against the Hardwick amendment to the Federal reserve act; to the Committee on Banking and Currency.

Also, petition of the legislative committee of the Women's Relief Corps, of Denver, Colo., favoring House bill 2572, to increase pensions of certain widows, etc.; to the Committee on Invalid Pensions.

Also, petition of 76 citizens of Genoa, Ill., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. GALLIVAN: Memorial of the National Association of State Universities relative to the protection of training camps, etc.; to the Committee on Military Affairs.

By Mr. GANDY: Petition of numerous citizens of Corson, Zielbach, and Dewey Counties, S. Dak., favoring the passage of an act by Congress making blanket designations of land under the section grazing homestead act in western South Dakota; to the Committee on the Public Lands.

By Mr. HERSEY: Petition of Mystic Tie Grange, No. 58, Patrons of Husbandry, of Kenduskeag, Me., urging the closing of all breweries and distilleries as a war measure; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Petition of Rev. John Proude, of Providence, in the State of Rhode Island, favoring the daylight-saving plan; to the Committee on Interstate and Foreign Commerce.

By Mr. LESHER: Petition of the Railroad Young Men's Christian Association, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. LONERGAN: Memorial of the Connecticut State Medical Society, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. NOLAN: Petition of the American Piano Co. and 13 other musical-instrument dealers, of San Francisco, protesting against the proposed tax on musical instruments; to the Committee on Ways and Means.

Also, petition of the Sacramento Valley Development Association. of Sacramento, Cal., setting forth the advantages in the use of the Sacramento Valley for the raising of additional crops; to the Committee on the Public Lands.

By Mr. PLATT: Petitions of sundry citizens of Walden, Newburgh, Pleasant Valley, and Pine Bush, N. Y., favoring national prohibition; to the Committee on the Judiciary.

By Mr. RAKER: Memorial of Amador County Council of Defense, indorsing a plan for the Government to take over and farm the idle lands of the State for the people of the Nation; to the Committee on the Public Lands.

Also, petition of piano companies of San Francisco, Cal., relative to the tax on pianos and phonographs; to the Committee on Ways and Means.

Also, petition of the California Cotton Mills Co., relative to a reduction of the tariff on burlaps; to the Committee on Ways and Means.

By Mr. ROWE: Petitions of sundry citizens of New York, opposing increased postage; to the Committee on Ways and Means.

Also, petition of A. H. McCann, of Brooklyn, N. Y., favoring House resolution 73, relative to all nations respecting American rights; to the Committee on Foreign Affairs.

By Mr. SANDERS of New York: Petition of the Wyoming County Pomona Grange, with a subordinate membership of 2,126, favoring the prohibition of the use of all grains and cereals in the manufacture of intoxicating liquors; to the Committee on Agriculture.

By Mr. SNELL: Petition of sundry citizens of Hammond, N. Y., for full national prohibition of the manufacture, sale, and transportation of intoxicating beverages for the period of the war, in conservation of the man power, military and industrial efficiency, and the food supply of the Nation, and that all liquors now in bonded warehouses and elsewhere shall be commandeered by the Government and redistilled for undrinkable alcohol, to be purchased by the Government for war purposes, and opposing an increase in the tax on intoxicating liquors as a means of raising revenue to prosecute the war; to the Committee on the Judiciary.

Also, petition of sundry citizens of St. Regis Falls, N. Y., and vicinity, for the immediate enactment of prohibition of the manufacture of alcoholic liquors as a measure of food conservation and for the immediate prohibition of the sale of liquors for beverage purposes, in order to conserve the health, wealth, labor, transport facilities, and military efficiency of the people; to the Committee on the Judiciary.

Also, petition of sundry citizens of Ellenburg Depot, N. Y., for full national prohibition of the manufacture, sale, and transportation of intoxicating beverages for the period of the war, in conservation of the man power, military and industrial efficiency, and the food supply of the Nation, and that all liquors now in bonded warehouses and elsewhere shall be commandeered by the Government and redistilled for undrinkable alcohol, to be purchased by the Government for war purposes, and opposing an increase in the tax on intoxicating liquors as a means of raising a revenue to prosecute the war; to the Committee on the Judiciary.

By Mr. SULZER: Petition of the pioneers of Anchorage, Alaska, protesting against House bill 17499 of the Sixty-fourth Congress; to the Committee on the Merchant Marine and Fisheries.

By Mr. WASON: Petition of Mrs. Joseph Flather and 32 other members of the social circle of the Main Street Methodist Episcopal Church, of Nashua, N. H., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of C. H. Pettee and 165 members of the faculty and the student body of the New Hampshire College, of Durham, within the State of New Hampshire, favoring the prohibition of the manufacture and sale of all intoxicating beverages during the period of the war as a necessary and logical conservation measure; to the Committee on Agriculture.

SENATE.

WEDNESDAY, *June 13, 1917.*

(Legislative day of Tuesday, June 12, 1917.)

The Senate reassembled at 12 o'clock m., on the expiration of the recess.

Mr. CURTIS. Mr. President, I make the point of no quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	France	Johnson, S. Dak.	McLean
Beckham	Frelinghuysen	Jones, N. Mex.	McNary
Brady	Gallinger	Jones, Wash.	Martin
Brandegee	Gerry	Kellogg	Newlands
Calder	Gronna	Kenyon	Norris
Chamberlain	Harding	Kirby	Overman
Culberson	Hitchcock	Knox	Page
Cummins	Hollis	La Follette	Penrose
Curtis	Husting	Lodge	Phelan
Dillingham	James	McCumber	Pittman
Fletcher	Johnson, Cal.	McKellar	Poindexter

Pomerene	Sheppard	Stone	Vardaman
Ransdell	Sherman	Swanson	Williams
Reed	Smith, Ga.	Thomas	Wolcott
Robinson	Smith, S. C.	Thompson	
Saulsbury	Smoot	Trammell	
Shafroth	Sterling	Underwood	

Mr. FRELINGHUYSEN. I wish to announce the unavoidable absence of my colleague [Mr. HUGHES] on account of illness. I ask that this announcement may stand for the day.

Mr. CURTIS. I desire to announce the absence of the junior Senator from Michigan [Mr. TOWNSEND] on account of illness in his family. I will let this announcement stand for the day.

Mr. HUSTING. I desire to announce the unavoidable absence of the senior Senator from Montana [Mr. MYERS], the junior Senator from Montana [Mr. WALSH], and the senior Senator from California [Mr. PHELAN] on official business.

The VICE PRESIDENT. Sixty-five Senators have answered to the roll call. There is a quorum present.

JOURNAL OF THE EXECUTIVE COUNCIL OF PORTO RICO (H. DOC. NO. 184).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying paper, referred to the Committee on Pacific Islands and Porto Rico:

THE WHITE HOUSE,
Washington, June 13, 1917.

The PRESIDENT OF THE SENATE.

SIR: As required by section 19 of an act of Congress entitled "An act temporarily to provide for revenues and a civil government for Porto Rico, and for other purposes," approved April 12, 1900, I have the honor to transmit herewith a copy of the Journal of the Executive Council of Porto Rico for the third session of the eighth legislative assembly, beginning February 14 and ending April 12, 1917.

Very respectfully, WOODROW WILSON.

PRINT-PAPER INVESTIGATION.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Federal Trade Commission, which will be inserted in the RECORD and referred to the Committee on Printing.

The communication is as follows:

LETTER OF SUBMITTAL BY THE FEDERAL TRADE COMMISSION ON THE NEWS-PRINT INVESTIGATION.

FEDERAL TRADE COMMISSION,
Washington, June 13, 1917.

LETTER OF SUBMITTAL.

To the PRESIDENT OF THE SENATE:

The Federal Trade Commission has been engaged upon an investigation of the news-print paper industry pursuant to Senate resolution 177, Sixty-fourth Congress (Senator OWEN), adopted April 24, 1916, and there is submitted herewith its complete report. A preliminary report was submitted on March 3, 1917, which contained a summary of the commission's activities and findings in connection with the investigation, and which recited the efforts of the commission through processes of accommodation and arbitration to restore competitive conditions in the industry and to insure a fair price to consumers of news-print paper while the processes of restoration were going forward. This preliminary report with some revisions has been incorporated in the complete report and will be found in Chapter VIII, which contains the conclusions and recommendations of the commission.

INCREASED PAPER COST.

The consumption of news-print paper in the United States in 1916 amounted to about 1,775,000 net tons, valued at more than $70,000,000. At the prices now prevailing this tonnage will cost news-print consumers in 1917 more than $105,000,000, an increase of $35,000,000, or 50 per cent. Most of this increase will fall upon newspaper publishers. If the average increase in cost of manufacture in 1917 over 1916 is estimated at $10 per ton, which is liberal, one-half of the $35,000,000 increase in paper cost represents additional profits to the manufacturers.

FAILURE OF ARBITRATION AGREEMENT.

The efforts of the commission to restore competitive conditions in the news-print industry expeditiously and to arbitrate and effectively project a fair price for news-print paper have failed. Since the arbitration agreement referred to in the preliminary report was entered into with some of the manufacturers of news-print paper, and since the award of the commission fixing a fair price for news-print paper was announced, a Federal grand jury for the southern district of New York, partially upon evidence furnished by the commission, has found indictments against four of the signatories to such arbitration agreement for violations of the Sherman antitrust law and the said indictments are now pending for trial. From the time the arbitration agreement was signed and the award made, and prior thereto, the commission has bent every effort to bring about some practical relief to this situation. The plan failed for several reasons, the principal reason being that the arrangement was voluntary and the commission had no power or warrant under the law to make it effective. Several of the manufacturers signatory to the agreement, subsequent to the finding of the indictment in this matter, notified the commission that they would not proceed under such arbitration agreement. The result has been that news-print paper has been billed and sold at the same exorbitant prices that obtained in many instances theretofore.

PRESENT SITUATION SERIOUS.

The news-print paper situation is very serious, not only to the consumers of paper but to the public generally, and to the Government of the United States, which is itself a large consumer of paper. The commission has reason to believe that this situation will be still more aggravated and serious in the ensuing months. In normal times competitive conditions would have been gradually restored through the processes of law, but it would have required some time to translate the effect into the prices of paper. The demand for news-print paper is constantly increasing and gives promise of still greater increase with the continuance of the war. The supply of news-print paper available to meet this demand is dependent upon mills already in existence. This supply will probably not exceed the quantity produced last year, and may be less, owing to disturbances that may result from the war. Under normal conditions it takes from 12 months to 2 years to bring a new paper mill into operation. Under present conditions it would take much longer. It seems probable, therefore, that with the demand for news-print paper increasing and the supply remaining constant or possibly diminishing, there will be a repetition of the panic market of last year and the exaction of prices that are entirely out of measure with the cost of production. The consequences to thousands of smaller newspapers and to many of the larger ones, and through them to the reading public, will be most serious.

WAR EMERGENCY MEASURE RECOMMENDED.

By reason of this condition and because of the vital interest to the public of an efficient dissemination of news in this crisis, the commission recommends as a war emergency measure that Congress by appropriate legislation provide—

(1) That all mills producing and all agencies distributing print paper and mechanical and chemical pulp in the United States be operated on Government account; that these products be pooled in the hands of a Government agency and equitably distributed at a price based upon cost of production and distribution, plus a fair profit per ton.

(2) That pursuant thereto some Federal agency be empowered and directed to assume the supervision and control thereof during the pendency of the war.

(3) That by reason of the fact that approximately 75 per cent of the production of news-print paper in Canada comes into the United States, proper action be taken to secure the cooperation of the Canadian Government in the creation of a similar governmental agency for the same function, which shall be clothed with power and authority to act jointly with the governmental agency of the United States for the protection of the consumers and manufacturers of print paper and the public of the United States and Canada.

(4) That in case the Canadian Government shall not join in such a cooperative enterprise, then importation of paper and mechanical and chemical pulp into the United States shall be made only on Government account to or through the Federal agency charged with such supervision and distribution.

In this connection the commission desires to point out that such a plan contemplates the operation of mills under their present management and the use of the present distributing agencies, but that such use and operation shall be for the public good, directed by a disinterested public agency to secure equitable distribution and a price that is based upon a fair cost of production and a fair profit per ton, to be determined without regard to the panic market created by unusual and abnormal conditions. This plan has the virtue of being analogous to those plans which have been tried and successfully operated in Great Britain. It will also insure the maximum production and greatest facility in transportation and distribution and will adapt itself readily to a return to normal competitive conditions upon the conclusion of the war.

Respectfully submitted.

WM. J. HARRIS, *Chairman.*
JOSEPH E. DAVIES.
WILLIAM B. COLVER.
JOHN F. FORT.

JUNE 13, 1917.

AMENDMENT OF INTERSTATE-COMMERCE ACT.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2356) to amend the act to regulate commerce as amended, and for other purposes.

Mr. KELLOGG resumed the speech begun by him yesterday. After having spoken for a few minutes,

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes, recedes from its disagreement to the amendment of the Senate numbered 68, and agrees to the same with an amendment, in which it requested the concurrence of the Senate.

ARMY AND NAVY DEFICIENCIES—CONFERENCE REPORT.

Mr. MARTIN. If agreeable to the Senator from Minnesota, I will submit a conference report on the bill to supply urgent deficiencies in the appropriations for the Military and Naval Establishments. It is an important bill, and the money carried by the bill is urgently needed. If it is not entirely agreeable to the Senator, I will wait until he gets through.

Mr. KELLOGG. I yield for that purpose.

Mr. MARTIN submitted the following conference report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 3971) "making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 4, 9, 43, 51, 80, 82, and 85.

That the House recede from its disagreement to the amendments of the Senate numbered 5, 6, and 83, and agree to the same.

That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the matter inserted by the amendment of the House to the amendment of the Senate insert the following:

"EMERGENCY SHIPPING FUND.

"The President is hereby authorized and empowered, within the limits of the amounts herein authorized—

"(a) To place an order with any person for such ships or material as the necessities of the Government, to be determined by the President, may require during the period of the war and which are of the nature, kind, and quantity usually produced or capable of being produced by such person.

"(b) To modify, suspend, cancel, or requisition any existing or future contract for the building, production, or purchase of ships or material.

"(c) To require the owner or occupier of any plant in which ships or materials are built or produced to place at the disposal of the United States the whole or any part of the output of such plant, to deliver such output or part thereof in such quantities and at such times as may be specified in the order.

"(d) To requisition and take over for use or operation by the United States any plant, or any part thereof without taking possession of the entire plant, whether the United States has or has not any contract or agreement with the owner or occupier of such plant.

"(e) To purchase, requisition, or take over the title to or the possession of, for use or operation by the United States any ship now constructed or in the process of construction or hereafter constructed, or any part thereof, or charter of such ship.

"Compliance with all orders issued hereunder shall be obligatory on any person to whom such order is given, and such order shall take precedence over all other orders and contracts placed with such person. If any person owning any ship, charter, or material, or owning, leasing, or operating any plant equipped for the building or production of ships or material, shall refuse or fail to comply therewith or to give to the United States such preference in the execution of such order, or shall refuse to build, supply, furnish, or manufacture the kind, quantities, or qualities of the ships or material so ordered, at such reasonable price as shall be determined by the President, the President may take immediate possession of any ship, charter, material, or plant of such person, or any part thereof without taking possession of the entire plant, and may use the same at such times and in such manner as he may consider necessary or expedient.

"Whenever the United States shall cancel, modify, suspend, or requisition any contract, make use of, assume, occupy, requisition, acquire, or take over any plant, or part thereof, or any ship, charter, or material, in accordance with the provisions hereof, it shall make just compensation therefor, to be determined by the President; and if the amount thereof, so determined by the President, is unsatisfactory to the person entitled to receive the same, such person shall be paid 75 per cent of the amount so determined by the President and shall be entitled to sue the United States to recover such further sum as, added to said 75 per cent, will make up such amount as will be just compensation therefor, in the manner provided for by section 24, paragraph 20, and section 145 of the Judicial Code.

"The President may exercise the power and authority hereby vested in him, and expend the money herein and hereafter appropriated through such agency or agencies as he shall determine from time to time: *Provided*, That all money turned over to the United States Shipping Board Emergency Fleet Corporation may be expended as other moneys of said corporation are now expended. All ships constructed, purchased, or requisitioned under authority herein, or heretofore or hereafter acquired by the United States, shall be managed, operated, and disposed of as the President may direct.

"The word 'person,' as used herein, shall include any individual, trustee, firm, association, company, corporation, or contractor.

"The word 'ship' shall include any boat, vessel, or submarine, and the parts thereof.

"The word 'material' shall include stores, supplies, and equipment for ships, and everything required for or in connection with the production thereof.

"The word 'plant' shall include any factory, workshop, warehouse, engine works; buildings used for manufacture, assembling, construction, or any process; any shipyard or dockyard and discharging terminal or other facilities connected therewith.

"The words 'United States' shall include all lands and waters subject to the jurisdiction of the United States of America.

"All authority granted to the President herein, or by him delegated, shall cease six months after a final treaty of peace is proclaimed between this Government and the German Empire.

"The cost of purchasing, requisitioning, or otherwise acquiring plants, material, charters, or ships now constructed or in the course of construction and the expediting of construction of ships thus under construction shall not exceed the sum of $250,000,000, exclusive of the cost of ships turned over to the Army and Navy, the expenditure of which is hereby authorized, and in executing the authority granted by this act for such purpose the President shall not expend or obligate the United States to expend more than the said sum; and there is hereby appropriated for said purpose $150,000,000: *Provided*, That this appropriation shall be reimbursed from available funds under the War and Navy Departments for vessels turned over for the exclusive use of those departments or either of them.

"The cost of construction of ships authorized herein shall not exceed the sum of $500,000.000, the expenditure of which is hereby authorized, and in executing the authority granted herein for such purpose the President shall not expend or obligate the United States to expend more than said sum; and there is hereby appropriated for said purpose $250,000,000.

"For the operation of the ships herein authorized or in any way acquired by the United States, except those acquired for the Army or Navy, and for every expenditure incident thereto, $5,000,000."

And the House agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 86, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"SEC. 4. That the service of all persons selected by draft and all enlistments under the provisions of the act entitled 'An act to authorize the President to increase temporarily the Military Establishment of the United States,' approved May 18, 1917, shall be for the period of the war, unless sooner terminated by discharge or otherwise. Whenever said war shall cease by the conclusion of peace between the United States and its enemies in the present war, the President shall so declare by a public proclamation to that effect, and within four months after the date of said proclamation or as soon thereafter as it may be practicable to transport the forces then serving without the United States to their home station, the provisions of said act, in so far as they authorize compulsory service by selective draft or otherwise, shall cease to be of force and effect."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"SEC. 5. That, in addition to the reports now required by law, the Secretaries of the Treasury, War, and Navy shall each on the first Monday in December, 1917, and annually thereafter, transmit to the Congress a detailed statement of all expenditures under this act."

And the Senate agree to the same.

The committee of conference have been unable to agree on the amendment of the Senate numbered 68.

THOMAS S. MARTIN,
O. W. UNDERWOOD,
F. E. WARREN,
Managers on the part of the Senate.
JOHN J. FITZGERALD,
FRED H. GILLETT,
Managers on the part of the House.

Mr. SMITH of Michigan. Mr. President——

Mr. LODGE. If the Senator will allow me, I wish to say that, as I understand from the reading of the conference report, the office of manager of the shipping corporation is abolished.

Mr. MARTIN. That office has not been abolished. This bill does not deal with the manager of the shipping corporation. He is appointed by the corporation.

Mr. LODGE. But this bill created the office, and referred to it, as it was originally drawn.

Mr. MARTIN. This is verbatim et literatim the report which was heretofore adopted by the Senate. There has not been an "i" dotted nor a "t" crossed. It is exactly what the Senate did before.

Mr. LODGE. In the bill, as the Senator presented it here, there was a recognition of the office of manager of the Shipping Board.

Mr. MARTIN. I did not notice the reading of the report by the Secretary; but if it was in the other bill it is in this. There has not been a single particle of change.

Mr. LODGE. I had supposed it had been omitted so that Gen. Goethals might be left out later.

Mr. MARTIN. The Senator is very much mistaken about that, because the previous bill did not compel them to keep Gen. Goethals. He is an officer of a corporation, and that corporation controls the matter.

Mr. LODGE. But it did not compel them to turn him out; of course, it did not go so far as that; but I understood from the reading of this report, it abolishes the office. Personally I should like to see Gen. Goethals retained. That is the reason I make the point.

Mr. SMITH of Michigan. Mr. President, I rose for the same purpose as that expressed by the Senator from Massachusetts [Mr. LODGE]. It was my recollection that the Senate bill referred to Gen. Goethals by name. I have listened attentively, and I have not heard his name mentioned in this conference report.

Mr. MARTIN. There was some reference to it in the original Senate amendment; but as the bill came from conference before and as it was adopted the name of Gen. Goethals, so far as I recollect, was not mentioned. He is an officer of a corporation which can deal with him whenever it sees fit; but there is nothing in any bill that prevents that.

Mr. SMITH of Michigan. Mr. President, I simply want to say on that point that, if the question of Gen. Goethals's status in this matter is to be raised by the bill now reported from conference, it will make a great deal of difference with many Senators as to our attitude regarding the conference report. I think the Senate by a very large majority on both sides of the Chamber expressed its confidence in and its desire for Gen. Goethals's services in the expenditure of this money. If the position to which he has been appointed is to be abolished and the matter left solely to the Shipping Board, the issue may as well be made now, and neither the Senate nor the American people will be long in recording their verdict. The country has confidence in Gen. Goethals's judgment and his honesty and will trust him implicitly; he has performed a great service for the country and expended for the Government in the construction of the Panama Canal more money than is here appropriated for shipbuilding, and he enjoys the confidence of his fellow men in a greater degree than any other connected with this work. I feel very sure that some controversy will arise regarding this work if we are not watchful. I want to be certain, Mr. President, that Gen. Goethals is not being discriminated against in this bill as amended.

Mr. MARTIN. I can only say to the Senator that there is not a word in the conference report discriminating against Gen. Goethals, and there is not a member of the conference committee or of the Senate Committee on Appropriations, so far as I know, who does not agree with the Senator in everything that he has said about Gen. Goethals. He is in supreme control, but he has been put there by the action of a corporation, which has been duly chartered and created under law.

Mr. LODGE. Mr. President, when the bill came into the Senate and as it passed the Senate it contained a clause, which I examined with some care, providing for a manager of the shipping corporation, who is Gen. Goethals; but when it was returned from the other House that clause was out of the bill. I called the attention of the Senator from Virginia to the fact. The other House took that clause out. I do not know how true the rumor was, but it was rumored that it was taken out on the representations of the Shipping Board. I can not make out from hearing the conference report read whether or not the manager of the Shipping Board is retained. I do not want Gen. Goethals turned out in that way.

Mr. MARTIN. Mr. President, surely the Senator from Massachusetts knows that nobody has turned Gen. Goethals out of anything. We did not put him in office and we have not turned him out of office.

Mr. LODGE. No; but the House took pains to strike out the clause under which the office existed.

Mr. SMITH of Michigan. Mr. President, if I understand the situation correctly, the bill was acceptable to Senators because we know by whom it was to be administered. Gen. Goethals's name gave this enterprise prestige. The country has confidence in him. It understands that he is a man to be relied upon; the Government desires his service; the Senate is very anxious to strengthen his hands that he shall be retained in this important position, and it was so indicated by a vote here. Any proposition in this bill or in any other bill which in any way reflects upon the capacity of Gen. Goethals or the desire of the Government to see him retained would meet with very great disfavor.

I say this with some feeling, because I know something about the Shipping Board. They have appeared before our Committee on Commerce many times. If they have large capacity, they have yet to demonstrate it; but Gen. Goethals needs no credentials from Mr. Denman. He has demonstrated his capacity to all the world. Any proposition which will curtail his power or minimize his usefulness to the Government at this time ought to meet with a stern rebuke upon the part of this body.

Mr. LODGE rose.

Mr. MARTIN. Does the Senator from Massachusetts desire to proceed?

Mr. LODGE. I was only going to say that, as I understand it, this gives the opportunity to the Shipping Board to drive Gen. Goethals from office, which they did not before have.

Mr. MARTIN. The Senator is absolutely mistaken.

Mr. LODGE. I hope I am.

Mr. MARTIN. The Senator certainly is mistaken. They have not a particle more authority under the bill as it now stands than they had as it was before.

Mr. LODGE. Under the bill as it passed the Senate?

Mr. MARTIN. No; as it came from the House. The corporation was created by the Shipping Board, and that corporation elected Gen. Goethals its manager. There never has been a provision in any bill which prevented that corporation from displacing Gen. Goethals if it saw fit to do so. The language was changed by the conferees on the insistence of the House, and it gave the President the general power to expend this money through any agency he saw fit. He had that power before; but, in addition to that, there was permissive authority to have such portion of the money as he saw fit expended by the shipping emergency corporation—I think that is its name.

Mr. LODGE. Yes.

Mr. MARTIN. There was a provision simply authorizing the money to be expended through that channel. This report makes it more general and authorizes it to be expended in any way the President may see fit; but there has not been any impairment of the duties of Gen. Goethals. He is a creature of the emergency shipping corporation, and not of Congress. There has not been any office created which he has held at any time; he held his authority entirely from that emergency shipping corporation and he still so holds it. He enjoys the confidence, I think, of Congress and of the country and, so far as I know, of the Shipping Board. At any rate, not a thing has been changed in this bill since it was approved by the Senate; but the previous conference report did make some change of the bill as it was passed by the Senate, but none to interfere with Gen. Goethals.

Mr. LODGE. My point is that the bill as it passed the Senate recognized his office.

Mr. MARTIN. The bill as it passed the Senate did.

Mr. LODGE. Exactly.

Mr. MARTIN. But as it came from the conference it did not.

Mr. LODGE. I do not know what was brought back.

Mr. MARTIN. This report is in exactly the same language now as when it came from conference the first time.

Mr. LODGE. I was not able to be present when it came from the first conference, but I know the House struck out the clause which recognized the office held by Gen. Goethals. I spoke to the Senator from Virginia as to the importance of it, and he agreed with me. It came back, I dare say, the first time from the conference without it, and I am sorry I was not here to call attention to it, but I have been shut up all day long and every day in the Committee on Finance. In listening to the reading of the report I now find the House has carried its point.

Mr. UNDERWOOD. Mr. President, if the Senator will allow me, I had some personal relationship to this matter, and I may be able to throw some light on it.

Mr. LODGE. I should like to finish what I was saying, Mr. President.

Mr. UNDERWOOD. I thought the Senator had concluded.

Mr. LODGE. There is not any question that Congress and the country have confidence in Gen. Goethals, that they want him to be there and mean to have him there; but that is not the plan of the Shipping Board unless I am very much mistaken.

Mr. UNDERWOOD. Mr. President, when the bill originally passed the Senate the clause that is now under discussion read as follows:

The President may direct the general manager of the United States Shipping Board Emergency Fleet Corporation to exercise the power and authority hereby vested in him.

I thought at that time that that was ample power.

Mr. LODGE. Vested in whom?

Mr. UNDERWOOD. In the President.

Mr. LODGE. That is what I thought.

Mr. UNDERWOOD. I repeat, I thought at that time that that was ample power for the transfer of this authority. The House did not take that view. They struck out the words "Emergency Shipping Board Fleet Corporation" and inserted the words "such agency or agencies." The change was in dispute between the House and the Senate conferees for some time. The House bill did not have any provision for the transfer of the money along with the authority, and when the bill came to conference the House conferees suggested that the language was probably not broad enough to carry the money that the President had a right to expend along with the authority to expend it. I did not personally take that view, and I do not now. I think that when the right to transfer the authority to some one else was conferred it carried with it the right to spend the money, but the conferees on the part of the Senate did not care to stand on a technicality, and this language was finally agreed on tentatively in place of what was in the Senate bill:

The President may exercise the power and authority hereby vested in him and expend the money herein and hereafter appropriated through such agency or agencies as he shall determine from time to time: *Provided*, That all money turned over to the United States Shipping Board Emergency Fleet Corporation may be expended as other moneys of said corporation are now expended.

After the first part of the provision I have read was tentatively agreed to by the conferees of the two Houses, I called on Gen. Goethals personally, because I had the same feeling about the matter that the Senator from Massachusetts [Mr. LODGE] has expressed. I desired that Gen. Goethals should have the unlimited right to carry out the shipping contracts and that the Government should get advantage of his great executive ability. Therefore, before the conference agreed on the matter, I called on Gen. Goethals personally to ascertain whether such a provision would be within the line of his endeavors and whether he could carry out his work under this authority. He assured me that the language was entirely satisfactory to him; in fact, that he wanted the change made; that he thought it would be better to put in the words "such agency or agencies," than to confer this authority upon a Government officer, naming him, because the responsibility was on the President. Of course, under the Senate language, Gen. Goethals could have been thrown out at any hour by his discharge as general manager of the fleet corporation, and under the terms of the conference bill he can be discharged at any hour by the President changing the agency. So the matter has not been affected in that respect.

I was told by Gen. Goethals that under the terms of this bill, if passed, he would be named as the agency, or rather that the emergency fleet corporation, of which he is general manager, would be named as the agency to expend this money. He desired the authorization to come in that way, for this reason. He said that it would give him a broader latitude in which to make his contracts. He could make them as a corporation, and not be bound by the requirements of law that would restrict his action if he made them as a governmental officer; in other words, if he is designated as a governmental officer, he would probably have to publish advertisements for bids in many cases, while acting for a corporation he would not have to do so. As a governmental officer in carrying out this provision he would have to make many reports and be delayed by red tape and technicalities that would not embarrass him if he were carrying on the transaction acting for a corporation. Of course, the corporation is owned by the Government and controlled by the Government; the Government is the entire corporation; but he expressed to me his view that he would have a greater latitude. Then he asked that this language be put in, in addition to what had been tentatively agreed to by the conferees:

Provided, That all money turned over to the United States Shipping Board Emergency Fleet Corporation may be expended as other moneys of said corporation are now expended.

In other words, he wants to spend this money as he is spending the $50,000,000 which were heretofore given to the fleet corporation by the Congress. Although I am not sure, if it were turned over to the fleet corporation, that this proviso would be necessary; yet Gen. Goethals himself thought it was wiser to put in the provision in order that his hands might not be tied in any way by technicalities.

Now, having got the information directly from the source, and being assured that the fleet corporation would be designated as the agency to spend the $500,000,000, understand not the $250,000,000 for the purchase of vessels, and not the $5,000,000 for the operation of the ships, because that will go to other sources, but the $500,000,000 that is to be provided for the building, of the ships is to be turned over to the emergency fleet corporation, of which Gen. Goethals is not only the head, but the entire operating authority. The Senate conferees then agreed, not to the House amendment, because it was entirely different, but to the tentative proposition that was worked up by the conferees of the two Houses.

Mr. LODGE. And which has now been presented?

Mr. UNDERWOOD. And which is now in the conference report.

Mr. LODGE. That includes an addition that Gen. Goethals desired?

Mr. UNDERWOOD. It does.

Mr. LODGE. Well, Mr. President, of course, if Gen. Goethals is satisfied with that provision in the law, I have no objection to make. The reason I called attention to it was the disappearance of the name of the office which he holds; and I know—it came to me no later than yesterday—that there is an effort on foot to try to drive him from office. I know that. I was shown a letter that it was proposed to send and that may have been sent to every Member of the Senate and of the House, the object of which was to have Congress investigate Gen. Goethals and ask why more had not been done and why he did not favor wooden ships, the purpose being plainly to drive him from office. I advised against the sending of the letter; I thought it would be unwise; and that is what rendered me suspicious.

Mr. UNDERWOOD. My attitude in reference to this matter when it was before the Senate before was exactly the attitude of the Senator from Massachusetts, and it has not changed. Of course, I do not know about the efforts being made, as the Senator suggests, to drive Gen. Goethals from office. I think it would be a most unfortunate thing for the Government should it be consummated.

Mr. LODGE. It would be a disaster.

Mr. UNDERWOOD. But I will say that so far as that attitude is concerned, it is not affected by this bill, because if we named him as general manager of the corporation they could remove him just as well as they can if he is appointed the agency.

Mr. LODGE. That is true.

Mr. UNDERWOOD. And it is really not intended to appoint him personally the agent. He does not want it to come to him personally as the agent. He wants the fleet corporation of which he is the head named as the agent, and then he operates through the fleet corporation. Now, I did not consent to this proposition until I had personally consulted Gen. Goethals about the matter and received his assurance that the language in this bill was satisfactory and the way he wanted it.

Mr. LODGE. I know that the Senator feels as I do in regard to it, and of course I place absolute confidence in his assurances. If he is satisfied, as I have said, I have nothing more to say. But knowing that these efforts were on foot, having seen this proposition yesterday, and suspecting where the efforts originated, I thought it important that nothing should be done in the bill to forward them.

Gen. Goethals is a great administrator. I need not remind the Senate of what he has done. He is a very great administrator. His presence there is of vast importance. He is one of the men who give confidence to the country. Nothing is more important at this moment than the building of ships as rapidly as possible for the transportation of supplies to the allies.

Mr. VARDAMAN. Mr. President, may I inquire of the Senator from Massachusetts what determination has been reached with reference to the building of wooden ships? Has that scheme been abandoned?

Mr. LODGE. I do not know, Mr. President. I know some have been contracted for.

Mr. MARTIN. If the Senator will excuse me, I think that matter is absolutely under the control of Gen. Goethals—absolutely.

Mr. LODGE. Some, I know, have been contracted for.

Mr. VARDAMAN. I know that some have been contracted for, but I understood probably contracts would not be let for any more.

Mr. LODGE. I do not know about that. I do not mean to enter into that subject at all.

Mr. VARDAMAN. I understand that Gen. Goethals was in favor of building steel ships, and not wooden ships. It is my impression that Gen. Goethals's opposition to the building of wooden ships was the cause of the misunderstanding between him and some of his subordinates.

Mr. UNDERWOOD. I think, if the Senator will allow me to answer the question, that the plan, so far as I know it, is to use this money largely for building steel ships; but I know that some wooden ships have been contracted for, and I know that there is a proposal to make contracts for other wooden ships. I think some contracts are being let for wooden ships on the Gulf coast right now.

Mr. VARDAMAN. Yes; I so understand. A number of wooden ships are in course of construction in the State represented by the Senator from Alabama.

Mr. UNDERWOOD. So that the question of wooden ships is not entirely wiped out. I think Gen. Goethals's idea about the proposition was that where there was suitable timber, and there were yards in which to construct them, they would go ahead and build some wooden ships; but, as he expressed it, he did not desire to make contracts to build wooden ships out of trees in which the birds were singing.

Mr. VARDAMAN. My understanding is that Gen. Goethals is opposed to the building of wooden ships, and that he is in favor of building only steel ships.

Mr. UNDERWOOD. I do not think that exactly expresses it. My understanding of his attitude in the matter is that he is not opposed to building wooden ships; he is willing to build them where they can be built with expedition; but he thinks that he can complete the great bulk of the fleet very much more expeditiously by making the larger part of it out of steel.

Mr. LODGE. Mr. President, I did not mean to enter at all upon the question of wooden or steel ships. I know that some wooden ships have been contracted for, and I suppose others will be. I come from a country where wooden ships have been built for 300 years and are being built now, and there are some contracts in Maine. I have personally no faith in them for this exigency. One of the best wooden-ship builders in the country told me that they would take as long to build, if not a little longer, than the steel ships; but I do not care. I am ready to leave the decision of that matter to Gen. Goethals. If he decides in favor of the wooden ships, I have nothing to say. I have no doubt he is correct. If he decides in favor of the steel ships, I should bow to his decision. If he decides to build some of both, I should equally bow to his decision, because he has all the facts at his command, and the best information, and I have great confidence in the judgment of the man who carried through the building of the Panama Canal.

I want him kept there because he has been a great administrator, without reference to his opinion as to steel or wooden ships. I want him kept there because he gives confidence to the people; and we need some confidence from the people in the men who are spending these great sums of money and who are going to carry out these great powers.

The country has confidence in Gen. Goethals, for the reasons I have expressed; but, unfortunately, a man of that great distinction, recognized all over the world as a very remarkable administrator and engineer, sometimes arouses the hostilities of lesser men, and the lesser men are sometimes pretty active, particularly if by any chance he interferes with contracts. We have got to have a man there who is not afraid to interfere with contracts that he does not think beneficial to the Government—an officer of the Army whose one desire is to serve the country, and who has demonstrated to the world his capacity to do it.

That is why I have taken as much time as I have—because I wanted to make sure, so far as I could, that there was nothing in this conference report that would tend to remove Gen. Goethals from office. The Senator from Alabama [Mr. UNDERWOOD] feels about him exactly as I do. He has talked with him; Gen. Goethals is satisfied with these provisions, and I have nothing more to say.

Mr. SMITH of Michigan. Mr. President, I made the suggestion which I made a few moments ago because, in my opinion, there is a wide difference between the Senate bill and the conference report. I think the Senator from Virginia and the Senator from Alabama will both agree to that. The Senate bill contained a distinct recognition of the office now held by Gen. Goethals, and the conference report does not contain any recognition whatever of that office. So far as I am concerned, I do not propose to sit idly by and see a valuable man like Gen. Goethals ignored by this legislation, when the Senate is overwhelmingly in favor of his recognition and of his service.

Now, of course, he is a modest man, and he is not lying around nights looking for any office. He does not need any office. His fame is secure, and he needs no office and no legislative designation; but the country needs him, and if this conference report is the precursor of any warfare upon Gen. Goethals it ought to be defeated. If, on the other hand, the wisely administered Government is to avail itself of his knowledge and his courage and his independence and his honesty, I have nothing more to say about it. I know that his status under the law is very vastly changed, and I regret it; and I think it is a change for the definite and distinct purpose of humiliating him.

Mr. BORAH. Mr. President, I desire to address myself to the conference report before it is disposed of.

Mr. MARTIN. I will ask the Senator what item in it he refers to? If he refers particularly to the naval operating base, that is not embraced in the report at all. That will come up as a separate matter.

Mr. BORAH. Very well.

The VICE PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

The VICE PRESIDENT laid before the Senate the action of the House of Representatives agreeing to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes, and receding from its disagreement to the amendment of the Senate No. 68 to the bill, and agrees to the same with an amendment as follows:

In lieu of the matter inserted by said amendment insert the following:

Naval operating base, Hampton Roads, Va.: The President is hereby authorized and empowered to take over for the United States the immediate possession and title, including all easements, rights of way, riparian and other rights appurtenant thereto, and including all the rights and properties of railway, electric light, power, telephone, telegraph, water, and sewer companies, of the tract of land known as the Jamestown Exposition site, on Hampton Roads, Va., and of such lands adjacent thereto as lie north of Ninety-ninth Street and Algonquin Street, the entire property being bounded on the north and west by Hampton Roads and Willoughby Bay, on the east by Boush Creek, and on the south by Ninety-ninth and Algonquin Streets.

That if said lands and appurtenances and improvements thereof shall be taken over as aforesaid the United States shall make just compensation therefor, to be determined by the President, and if the amount thereof, so determined by the President, is unsatisfactory to the person entitled to receive the same such person shall be paid 75 per cent of the amount so determined by the President and shall be entitled to sue the United States to recover such further sum as added to said 75 per cent will make up such amount as will be just compensation therefor in the manner provided for by section 24, paragraph 20, and section 145 of the Judicial Code.

Upon the taking over of said property by the President as aforesaid the title to all property so taken over shall immediately vest in the United States.

For the payment of compensation for said property so taken over $1,200,000, or so much thereof as may be necessary, and toward the equipment of the same as a naval operating base, including piers, storehouses, oil-fuel storage, training station and recreation grounds for the fleet, and other purposes, $1,600,000; in all, $2,800,000: *Provided*, That the appropriation herein shall be available only for the acquisition of the entire property bounded on the north and west by Hampton Roads and Willoughby Bay, on the east by Boush Creek, and on the south by Ninety-ninth and Algonquin Streets, together with all easements, rights of way, riparian and other rights appurtenant thereto, and all the rights and properties of railway, electric light, power, telephone, telegraph, cable, water, and sewer companies: *Provided further*, That the Secretary of the Navy is authorized to expend public money in the development of said tract of land without reference to the requirements of section 355 of the Revised Statutes.

Mr. BORAH rose.

Mr. MARTIN. Mr. President, if the Senator will excuse me, before he commences his remarks I simply want to submit the usual motion that the Senate agree to the amendment of the House to the amendment of the Senate numbered 68, which has just been read.

Mr. BORAH. Mr. President, I have not had a copy of the amendment before me, but from listening to the reading it seems to me altogether a better provision than we had formerly. As I understand the amendment now, in the first place we are authorized to take immediate possession of the property, and thereafter the compensation is to be such compensation as the President shall determine is a just and fair compensation, and in case the owners of the property are not satisfied they have the privilege of bringing suit. Under the circumstances I will not delay this matter, as it is perhaps the best that can be done now.

Mr. FLETCHER. Mr. President, may I ask if the provision covers all riparian rights?

Mr. MARTIN. It does.

The VICE PRESIDENT. The question is on concurring in the amendment of the House to the amendment of the Senate.

The amendment was concurred in.

AMENDMENT OF INTERSTATE-COMMERCE ACT.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

Mr. STERLING. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hitchcock	McNary	Smith, Ariz.
Beckham	Hollis	Martin	Smith, Ga.
Borah	Husting	Nelson	Smith, Mich.
Brady	James	New	Smith, S. C.
Broussard	Johnson, Cal.	Newlands	Smoot
Calder	Johnson, S. Dak.	Norris	Sterling
Chamberlain	Jones, N. Mex.	Overman	Stone
Culberson	Jones, Wash.	Page	Swanson
Cummins	Kellogg	Phelan	Thomas
Curtis	Kendrick	Pittman	Thompson
Fletcher	Kenyon	Poindexter	Trammell
France	King	Pomerene	Underwood
Frelinghuysen	Kirby	Ransdell	Vardaman
Gallinger	Knox	Reed	Warren
Gerry	La Follette	Robinson	Weeks
Gore	Lodge	Saulsbury	Williams
Gronna	McCumber	Shafroth	Wolcott
Harding	McKellar	Sheppard	
Hardwick	McLean	Sherman	

Mr. McKELLAR. The senior Senator from Tennessee [Mr. SHIELDS] is absent on official business. I announce his absence for the day.

Mr. SMITH of Michigan. My colleague [Mr. TOWNSEND] is unavoidably detained from the Chamber on account of illness in his family. I desire to have this announcement stand for the day.

The VICE PRESIDENT. Seventy-four Senators have answered to the roll call. There is a quorum present.

Mr. KELLOGG. Mr. President, I am loath to take the time of the Senate to discuss this bill after three days of debate, and I shall devote but a short time to what I consider the main features of the bill, including the amendments offered, especially the amendment offered by the Senator from Nebraska [Mr. NORRIS].

I take it that there is no serious objection to the first section of this bill, and I shall not stop to discuss it. It does not seem that there can be any objection to prohibiting such interference with interstate commerce as the first section provides; but very serious objections have been made to section 2 of the bill. It seems to me those objections are largely born of the fear of what may happen if this power is conferred.

We are confronted with a condition of war, with a condition where the railways are unable to handle all of the traffic of the country which has been offered to them, and where we believe that the railways are going to be unable with all of their facilities to handle the entire traffic which will be offered to them, as has been usually the case in times of peace.

Such has been the condition during the last six months. We know that last autumn and last winter, in moving the crops, there was a scarcity of cars. There were blockades on the eastern lines by reason of the want of ocean transportation to take the commodities from the terminals. We know that the commerce of the country was to a very great extent injured by reason of the inability of the railroads to move the traffic as rapidly as necessary. It has been said here that the fault is with the railroads, because they did not procure sufficient cars and terminals. I think the Senator from Iowa [Mr. CUMMINS] sufficiently answered that proposition. He showed that during 1914, and prior, the railroads were not using all of the cars, and that their cars were standing upon the sidetracks. We know that suddenly in 1915 and 1916 the business of this country developed to an abnormal extent, and we know that now the railroads are purchasing all of the cars and equipment the manufactories can turn out, but with that it is impossible for them to handle the volume of traffic which has been offered to them.

Now, if that is the case, and upon this subject we must rely upon the Interstate Commerce Commission, the gentlemen connected with the railroads who are connected with the Council of National Defense, and the experts called before the committee. There is absolutely no disagreement that unless conditions rapidly change, unless the business of this country shrinks, the railroads are not going to be able to handle the volume of traffic incident to the ordinary business and incident to moving material, coal, supplies, and everything connected with the mobilization of our Army and the manufacture of an enormous amount of materials for the Army. That is not denied. We must rely upon the men who know the conditions; and there seems to be no dispute that in the event there should be large volumes of traffic necessarily incident to the movement of materials of war and materials for the manufacture of ships, munitions of war, and the building of factories necessary to supply the Army and Navy, there is going to be more traffic than the railroads can handle in the ordinary way. If that is the case, it is perfectly evident that there must be some priority; and two propositions necessarily follow.

The Government must either take over the railroads and operate them, or the Government must take such control of the railroads as will insure the priority of shipment of materials not only for the Army and the Navy, for the factories, but of commodities such as coal and foodstuffs necessary to make this war a success. In other words, there must either be Government ownership of railroads or there must be Government control of the roads.

I know that the senior Senator from Georgia [Mr. SMITH] said that conditions in Europe were entirely different. Of course they are different in that France and England, facing the great peril, must transport a greater number of soldiers, and must call into operation every possible means of transportation. That is the only difference. It is only a question of degree. We must give preference on the railroads not only to those things directly to be shipped for the Government but to all of the other secondary products which are necessary to make the mobilization of our armies, the operation of our great factories, the supplying of the country with food and with coal, an assured success.

Now, Great Britain took over her railroads; France took over the railroads; but Great Britain, finding that the railoads could be better operated by the managers and the men who had previously had control, turned them back. While it was considered a Government operation, they practically turned the railroads back to the managers and simply controlled their management. That is practically what we propose to do by this preference and priority. We propose that there shall be some power lodged somewhere that will be able to say what preference and what priority is necessary to make this war a success. That is all that is proposed by this bill.

Mr. HUSTING. Mr. President——

The PRESIDING OFFICER (Mr. NEW in the chair). Does the Senator from Minnesota yield to the Senator from Wisconsin?

Mr. KELLOGG. Yes, sir.

Mr. HUSTING. I want to ask the Senator whether it does not come down to this: That this power must either be lodged with the Government to control the priorities or else it must be left to the managers of the railroads themselves?

Mr. KELLOGG. The Senator from Wisconsin has stated it exactly.

As a matter of fact, there has been called in, in consultation, by a part of the Advisory Commission of the Council of National Defense, a committee of the leading railroad men of this country. They are able, intelligent, and patriotic citizens. They are not asking compensation, and no salary which the Government would pay would attract men of their ability. They are devoting their time to making the transportation facilities of this country a unit that can move the products of the country with the least obstruction and the most effectiveness. That is what they are trying to do.

Mr. KING and Mr. REED addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Utah?

Mr. KELLOGG. I do.

Mr. KING. I think it would be very instructive to many of us if the Senator would tell us what success has attended the efforts of these men, who are acting so patriotically, and whether or not, under their operations up to date, without any authority of law, they have relieved the congestion and improved the transportation facilities of our country?

Mr. KELLOGG. Mr. President, I am perfectly willing, so far as I am able, to do so. I have made some inquiry and have been informed that these gentlemen have been doing everything in their power to coordinate the railroads in order to use the transportation facilities of the country to the greatest advantage, especially the cars, to transport those products most needed to feed the people and to supply the Government manufactories and other manufactories that are supplying the needs of this country in time of war.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Missouri?

Mr. KELLOGG. I yield to the Senator.

Mr. REED. The Senator thinks, I take it, that the five railway presidents constituting this committee have very successfully managed the business up to this time. Is that correct?

Mr. KELLOGG. I think they have been doing the best they can.

Mr. REED. And that they have done it in a very patriotic, disinterested, high-minded manner?

Mr. KELLOGG. I think so.

Mr. REED. Does the Senator think that the designation of these gentlemen as members of this committee in any way improved their moral, intellectual, or patriotic standards over what they would have been if they had not been appointed?

Mr. KELLOGG. Not at all.

Mr. REED. Then, what is the point to the Senator's argument that you have to choose between railroad management and Government management, when the Senator insists that the railway presidents now operating under a quasi-governmental authority have so well conducted the business? What is the difference between railway management by railway presidents operating as railway presidents and railway management by railway presidents operating as members of a committee?

Mr. KELLOGG. Mr. President, I shall try to answer that question. I have no doubt, as stated by the Senator from Missouri, that the railroad presidents who are members of that committee have been managing the railroads so far as they could with ability, in the interest of the public, and doing their patriotic duty honestly and efficiently and without any compensation, and I believe the Senator from Missouri thinks so, too.

Mr. KIRBY. Mr. President——

Mr. KELLOGG. Let me complete the answer, if you will. They have been doing their best to give priority to those shipments which were necessary to prepare this Nation for this great struggle. What they have been doing has lacked the authority of law, to be sure. They procured the consent of the railways generally, so far as they could, to carry out their suggestion. But they had no power to enforce these suggestions.

If you call those men before a committee of the Senate, they will tell you, as they told us, that they could not without the consent of the railroads enforce their directions or their requests. What I desire and what we all desire is that there shall be over those gentlemen some power which can enforce such orders as ought to be made for priority and preference of shipment.

Mr. SHAFROTH. Is it not likely, I will ask the Senator, that when there is some measure some of the presidents of railroads will not agree to it will produce confusion and therefore they will not be expeditious in the handling of products and the shipment of them over the railroads? Is it not true that now at the crucial time some part of the lines of railroads will object and it will become a serious danger to the Government?

Mr. KELLOGG. I think that is entirely probable.

Mr. REED. Does the Senator from Colorado claim or the Senator from Minnesota affirm that the railroad presidents who do not happen to be members of this board are less patriotic and less honest than the members of the board? I will follow my question with this further one: Has there in fact been any refusal on the part of railways to cooperate up to this time?

Mr. KELLOGG. Not at all, Mr. President. If the Senator from Missouri is familiar with the railroad business, as I believe he is, and as I claim to be fairly so from many years of experience, he will know that the railroad operators are subjected to tremendous pressure and influences by every shipper who thinks his products should have priority and his business is more important than anybody's else. I desire not to be misunderstood. I am in sympathy with the great body of the shippers throughout the country, and I know that during the last year they have suffered great loss of profit and suffered by diminution of their business through inadequate railroad facilities. I hope and believe that we have to a great extent exaggerated the dangers of that in the future.

Mr. HUSTING. Mr. President, I desire to interrupt the Senator once more.

Mr. KELLOGG. I yield.

Mr. HUSTING. The question of the Senator from Missouri implies a difference in the duties and the motives of the railroad president when he acts as an officer of the United States purely in the interest of the United States Government and as a mere president of his railroad. Would this not be reflected in his action in the way of giving priority to foods? In other words, would he not feel under obligation, acting merely as a railroad president, to look out for the interests of his road, whereas if he were an officer of the United States and under a pledge to act in the interest of the United States he would feel that it was his primary duty to see that the business was conducted primarily in the interest of the Government. In other words, is there any difference between a man acting in a private capacity and a man in a public capacity?

Mr. KELLOGG. I think that is true.

Mr. KIRBY. Will the Senator from Minnesota yield for a motion to take a recess, he having the floor to-morrow?

Mr. KELLOGG. I will yield in one minute. I wish to complete the answer to the question of the Senator from Missouri. I should say I am not willing, and I do not think the railroad presidents who constitute this committee are willing or believe, that it should be left to the railroad companies of the country to say whether they will do it or whether they will not. There ought to be some power to say they must do it. I have a fair illustration. In the early spring, in April, there was a great scarcity of coal throughout the Northwest, coal to operate the mines and coal to operate the factories and coal for the people generally. It had been represented to the Council of National Defense that the steamships carrying ore down the Lakes were not willing to carry coal on the return trip, because it delayed them very much, they could make more money by hauling ore and returning empty. Complaint was made to the Council of National Defense and a recommendation that they should arrange to have the steamships carry coal, and the steamships stated in response to their request that they would do so.

I wish the power vested so that they must carry coal whether they wish to or not. It seems to me, in times when it is necessary to run the mines and the factories of this country and to supply the people with coal there should be, if there is a shortage of transportation facilities, a power that can compel compliance with the requests of these gentlemen. I know they feel as though there ought to be that power. They are not seeking or asking to exercise that power themselves.

Mr. REED. Mr. President——

Mr. KELLOGG. I yield to the Senator from Missouri.

Mr. REED. Not to interrupt the Senator now, but simply that we may clear up that one proposition before he closes his remarks for the evening, I take it then that the Senator's opinion of the bill is that if it passes the board appointed by the President would have the authority to issue orders to railroads to prefer coal shipments for the benefit of communities generally, so that the supply of coal could be kept up in different parts of the country as in the judgment of the board was necessary. All I want to get at is the Senator's view as to the scope of the bill, whether the power is conveyed here that there should be coal or other goods shipped to parts of the country where the board thinks necessary for general purposes or whether the power is limited to military operations for the defense of the Nation. I ask that question in all sincerity because it has been a matter of dispute.

Wednesday, June 13, 1917.

Mr. KELLOGG. Mr. President, at the time the Senate took a recess last evening I was discussing the proposition that during the war it will be necessary, or probably necessary, to give preference to our shipments for the Government as well as those shipments of food or products necessary to maintain the Army and the Navy. I have stated that all the information furnished us upon that subject was to the effect that such preference will be necessary to the public defense and security.

If it should develop that the freight blockade of last winter will not recur and that the facilities of the railroad companies under a coordinated management will be sufficient, then the bill can do no harm. But if it should turn out that we should again have, as we did during the winter, a freight blockade such power as is vested here must either be exercised by the railroads themselves without authority of law or there must be some power in the Government to make such discriminations legal.

Now, I come to the question of what preferences it is necessary to give. There are in the Senate two opinions upon this question: First, the belief that the law should be confined simply to giving Government shipments a preference; that is, shipments of munitions and materials for the manufacture of war supplies; second, the belief that it is necessary that the power be broad enough to include shipments of commodities other than Government shipments of materials necessary to manufacture munitions of war.

I come now to the question propounded to me by the junior Senator from Missouri [Mr. REED] whether under this bill it will be possible for the President to direct preferences in shipments between private individuals and corporations. My answer to that is that it undoubtedly will be within the President's power, provided he determines that the public security and defense demand such action or such discrimination.

It is conceded practically that some preference in shipments must be granted. In fact, the amendment of the senior Senator from Georgia [Mr. SMITH] would grant the power to the full extent provided for by this bill, for that amendment provides for a board of transportation which shall have power to investigate problems of transportation by common carriers, by rail or water, and when it finds that the national defense or the public welfare shall require, it may decide and direct that certain traffic shall have priority or preference in transportation, and having so found and so notified the common carriers, they shall carry into effect such directions.

[At this point Mr. KELLOGG yielded to Mr. MARTIN that he might present a conference report.]

Mr. KELLOGG. Mr. President, I hope the Senators will not ask me to yield again. I shall be as brief as possible in concluding my remarks, and when I have finished I shall be very glad to answer any questions which may be propounded me.

At the time I was interrupted I was suggesting that it is not sufficient simply to give preference to Government shipments, because many times shipments are not for the Government but for private individuals, and yet are as necessary to maintain the efficiency of the Army and Navy as though they were Government shipments. But, beyond this, the very fact of giving Government shipments preference may deter other shipments, so that it will be necessary to decide what shipments shall next be given preference. Let me illustrate that. It is just as important that certain commodities for private manufactories, in many instances manufacturing for the Government to sustain the Army and Navy here and in Europe, should have preference in shipments as though they were shipments of the Government. For instance, when, as was the case last winter, in the shipments of products to Europe there was a blockade upon the eastern coast because of the failure to procure ships sufficient to carry the products that a blockade was created all over the country. That blockade was felt clear to the Pacific coast. The failure to clear the tracks on the eastern lines made it impossible to move products over the western lines, and immediately not only were food products blocked, but coal and other shipments which were absolutely necessary to maintain the manufactories of the Government or the manufactories of private individuals supplying the Government and to furnish food and fuel for the people.

It works exactly as it would work if you were to build a dam across the Hudson River at New York. It would back up the water immediately at Albany and every town on the line would feel it. If we should have another blockade like the blockade of last winter during war time, it would be absolutely necessary for some power to designate priorities not only of Government shipments but of those shipments which are necessary to the very life of the Nation.

I do not desire, unless it is absolutely necessary, to confer upon anyone the power to arbitrarily control the great industries of this country. I concede that ordinarily in war times it is better to encourage the people to carry on their industries in the usual way and to allow trade and commerce to seek its natural flow rather than to interfere with it with all sorts of arbitrary power. But if we read aright not only the history of foreign countries but of this country in great exigencies, we know that that power is likely to be necessary to the very life of the Nation.

The railroads themselves within the last few months have been compelled—I say compelled (they thought it was necessary)—to give certain products preferential shipment, such as coal and foodstuffs. They rushed trainloads of feed to Utah and Wyoming to save the starving flocks in those parts of the country by reason of the extraordinary winter. They rushed coal to the Northwest to keep the mines going, and factories going, and they rushed grain and foodstuffs to the Atlantic coast within the last 30 days for shipment to Europe to maintain the armies of the allied nations. Those preferences undoubtedly lacked the authority of law, and all I think we should do is to place in some one the power to direct those preferences.

Now, I do not care whether this power is conferred upon the President or whether it is conferred upon a board or whether it is conferred upon the Interstate Commerce Commission already existing; nor do I care whether a part of the power is given to the President as to the movement of troops and supplies, and the preference as between other shipments, if necessary, is conferred upon the Interstate Commerce Commission.

I would much rather use the commission and the boards now existing than to create new boards and new authority. But so far as the movement of all the armed forces of this Government and the munitions of war and the supplies necessary to feed the armies in Europe, that power should undoubtedly be in the Commander in Chief, who has power to direct the movement of the armies themselves. In other words, we can not afford to divide that authority. The same power that directs the movement of the ships and the armies must direct the transportation to maintain the armies and furnish munitions. Beyond that it is immaterial to me whether the power of granting preferences in shipment which may follow by reason of the Government's action be conferred upon the Interstate Commerce Commission or upon a new board.

I have heard it stated that we should fix definite rules in this bill. It is as impossible for Congress to define the exact rules for the movement of preferential freight, to state from day to day what preferential freight shall be needed, as it is impossible for Congress to fix each individual rate for the transportation all over the country. We can not do it. We do not know what may happen to-morrow or next month, and we do not know what necessity may demand the movement of coal or foodstuffs or farm products in the future; and it must be left, as the questions of rates and discrimination and rules and regulations for the movement of freight are left, to some board or some body to meet the exigencies as they shall arise.

It is also said that we are conferring a most unparalleled power upon the President, which he may abuse. Mr. President, I, as every American lawyer in this Chamber, by training and by education and by tradition, am jealous of those constitutional privileges guaranteed to us and found necessary by the experience of ages to the preservation of human liberty. But, Mr. President, war is an exhibition of the most brutal power and necessitates coordination of action and concentration of power commensurate with the magnitude of the contest. This is a power that has been granted before, and it is to-day being exercised by the nations of Europe.

So far as I am concerned, I have definitely made up my mind to vote to confer every power which I believe will aid in winning this war. I am not going to be deterred by any partisan feeling, by any hope of political advantage, nor by any fear that the power thus granted may be abused.

If the President abuses this power, he is answerable to the great tribunal of public opinion. Under the Constitution he is and should be the Commander in Chief of the Army and the Navy, and with that power wisely conferred there should go with it all the auxiliary and necessary powers to make that position effective.

I have heard it said day after day on this floor that we are placing in the President powers never before conferred upon the head of this great democracy, and inconsistent with democratic principles. I deny this. Not only has such power been conferred before in great national struggles for the preservation of the Union but they are being conferred to-day by democracies equally as liberal as ours, in order that democracy may be preserved.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Idaho?

Mr. BORAH. The Senator says these powers have been conferred before. Upon what Presidents were they conferred?

Mr. KELLOGG. They were conferred during the War of the Rebellion.

Mr. BORAH. What particular power does the Senator have reference to?

Mr. KELLOGG. The power to control railroads. I wish the Senator would wait until I conclude my argument and then I will answer any question I am able to.

I have no fear that with the history and the traditions of this people trained in the atmosphere of personal liberty we will endanger any of their rights by granting powers necessary to the national preservation in the hour of this great human crisis. I would much rather confer powers of control necessary to make effectual the powers of war upon the President than to take over the railroads with all their millions of employees and make them a part of the Government. I believe the experience of Great Britain shows that it is better to leave the management of the railroads in the hands of those men who are now managing them, subject, however, to governmental control.

Mr. President, this brings me to one other question which I wish briefly to discuss, and that is the amendment of the Senator from Nebraska [Mr. NORRIS].

Objection is made to this bill because it is plain that it proposes not only to pay the railroads reasonable compensation for all services but, in addition, to pay damages by reason of disarranging the traffic, and not to pay damages to shippers whose traffic is disarranged. I do not think that that is the proper construction of the bill; and if it is, it should be amended, as was stated by the senior Senator from Iowa [Mr. CUMMINS] yesterday. The intention of the bill was simply to insure to the railroads such compensation as would give them a reasonable income to enable them to maintain their lines of road and to handle the traffic of the country.

The junior Senator from Georgia [Mr. HARDWICK], in commenting upon this phase of the bill, said that the bill first provided for a division of rates or authorized a division of income between two lines of railroad, where one line was carrying high-rate freight and another was carrying low-rate freight, and

one line would make more revenue and the other less than they ordinarily would make but for the order of the President.

The Senator from Georgia also said that the bill provides for payment to railroads of compensation for all transportation under these orders, and for compensation by the Government for all transportation of munitions and supplies; and that, therefore, in addition to complete compensation for all services performed, the bill also provides that the railroads might recover damages in addition to this compensation, by reason of the fact that they were required to carry cheaper freight when they might have carried higher-rate freight and made more money; in other words, if they were required to carry coal, when they might have carried pianos or automobiles or something else and could have made more money, they would be entitled to recover the difference from the Government. If that is the proper construction of this bill, it should be amended.

I am sure, as stated by the senior Senator from Iowa yesterday, the intention of the authors of the bill was simply to provide that if by reason of the orders of the President the practical taking over of the operation of these roads and forcing them to sidetrack ordinary business and carry perhaps munitions or other freight paying a rate not sufficient to maintain their lines, their entire business, including the rates paid for the Government business, was insufficient to give them reasonable compensation so that they could maintain their lines of railroad as great avenues, not only necessary in times of war but in times of peace, then the Government might make compensation in the nature of damages—"damages" undoubtedly was rather an unfortunate word—but if their business, including the Government business which they are directed to carry, and including the preferential shipments which they are ordered to carry, furnish them reasonable compensation, considering all the circumstances and conditions of the business of the country, they ought not to be allowed to receive one dollar of compensation from the Government or anybody else.

I do not wish to see the railroads given an opportunity to get into the Treasury and to get compensation because they were denied the right to haul higher-rate freight and were required to haul lower-rate freight under the exigencies of this war. I believe that the general burdens which are to be cast upon the railroads and the people of this country are burdens for which no one ought to seek compensation from the Treasury of the United States. These are burdens which owners of railway securities and people generally should bear as patriotic citizens, and should not seek to recover from the Government. I am unalterably opposed to opening the Treasury of this country to demands either of railroads or of shippers to make good to them the ordinary injury which the blockade of traffic caused by war may bring.

Mr. President, we are levying taxes and imposing burdens upon the people of this country such as we have never been called upon to do in times of peace or perhaps even in times of war, and we may not have yet commenced. No man can foretell what is going to happen in this great world conflict. We can not see into the future. We do know, however, that we must conserve our resources; we must watch carefully the burdens we place upon the people so that we may be able with our resources—our splendid resources—to meet any of the exigencies which may arise in this unfortunate struggle.

I say either for the railroads or for the shippers to be able to come into court or before the Interstate Commerce Commission and to get their hands into the Treasury of the United States to make good to them any loss, direct or indirect, which they may have suffered by reason of the blockade in traffic in time of war is unconscionable and should not for a moment be thought of. I am not going to agree to it on either side if I know what I am about.

If the bill is not clear and specific in that regard; in other words, if it bears the construction that a railroad earning reasonable compensation on all its business, including the Government business, still may come in and present a claim for damages because it is required to carry coal, which bears a low rate, instead of luxuries, which bear a high rate, then the bill should be amended. As stated by the senior Senator from Iowa, if no one else offers such an amendment, I shall do so myself. I know the chairman of the committee had no idea that the bill would impose any such obligation on the people of this country, and it seems to me, at least, that the following amendment should be adopted. I shall not offer it at this moment, but I should like to read it to illustrate my meaning. Add to line 2, page 2, after the words "otherwise appropriated"—that is, add after the provision for damages—the following clause:

That no such damages shall in any case be allowed when, taken together with the rates fixed by law or the Interstate Commerce Commission for such services, shall give any carrier more than reasonable and just compensation for its entire service performed and its entire railroad business transacted.

I do not know that the amendment is necessary, but I think it should be adopted to make it perfectly clear that we are not going to open the Treasury for claims of a railroad company that it might have made more money if it could have carried other kinds of traffic than that directed by the President or by the Interstate Commerce Commission. I for one never dreamed that the bill meant anything of that kind, and if it does I am in favor of its amendment.

With that amendment, or with some other amendment which will accomplish the same purpose and make that point perfectly clear, I am in favor of this bill. While I should regret to see the business of this country blocked and injured, as it was during the last six months, for want of adequate transportation and ability of the railroads to move the traffic promptly, if such a condition arises again, by reason of the exigency of the situation and in the national defense, I say it is the duty of the entire American people, including the holders of railroad securities, to bear that as a common lot and as a common burden rather than to go to the Treasury for recompense.

All I wish to see is that this bill is made perfectly clear; that some agency of this Government may direct the great arteries of transportation absolutely necessary to the effectiveness of this war, and that the burdens arising from that condition shall be borne by the people generally as equally and as equitably as possible. I feel sure, from all the information I get—and I must rely upon those in authority who are giving special attention to this question—that we shall be safer if there is lodged in some officer of the Government or some commission the power to direct preferential shipments during war. Then, after that condition has ceased to exist, I am willing to go back to that more equitable rule in time of peace of equal rates and no discrimination to all the people of this country; but we should not balk at the granting of power when any question is raised that it is necessary to save the life of the Nation.

Mr. KING. Mr. President, before the Senator concludes I should like, with his permission, to ask him a question.

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Utah?

Mr. KELLOGG. I yield.

Mr. KING. I may not have correctly apprehended one statement the Senator made, but, as I understood him, he said that he would not object to a commission for the purpose of determining priorities, and, as I also understood him, at the same time he said that the executive department ought to have charge of determining the priorities with respect to the shipment of troops and munitions of war. Does not the Senator think it would be a very great mistake to have two boards, two agencies or instrumentalities, for determining priorities, and does not the Senator feel that, because the executive department needs a large portion of the railroads and their services, there ought to be lodged with one board only, and that an executive board or branch of the Government, the power to determine priorities with respect not only to shipments upon the part of the Government but shipments made by private individuals?

Mr. KELLOGG. Mr. President, answering the question of the Senator from Utah, I will say that I agree with him entirely. I think it is much more wise to lodge the power, not only to direct the movement of troops and the shipment of munitions and war supplies, but all supplies used by the Government and commodities necessary to produce those war agencies, in one board, or in an executive head, because I believe that when the Government finds it necessary to direct that shipments of coal or iron or foodstuffs be rushed to the seaboard or to some other point, thereby displacing the ordinary commerce of the country, if somebody must make the secondary direction of preference, it is much wiser to lodge that power in the hands of the same authority. I think the power should be somewhere; but if the Senate believes that the power should not be conferred upon the Executive, but should be conferred upon a board or upon the Executive and the Interstate Commerce Commission, I am willing to do that, so far as my vote goes. I am simply giving my opinion.

So far as I am concerned, I am not afraid of the abuse of that power. It is limited by the language of the bill to such purposes as are necessary for the safety and the defense of the country. I can not be brought to believe that any Executive or any board upon whom this power shall be conferred will meddle with the business of this country or abuse this power; but often we must rely upon the great tribunal of public opinion for our remedy if such abuse does occur. We must trust somebody with this power. I believe that we are worrying about a great many things that will never happen, as we often do. Most of our

anticipated troubles never come to pass. I do not believe that when this power is conferred anybody is going to make orders for preferential shipments all over the country and mix up the business of the country.

Mr. HUSTING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Wisconsin?

Mr. KELLOGG. I yield.

Mr. HUSTING. The Senator said that sometimes we must rely upon the tribunal of public opinion to prevent abuses. I desire to ask the Senator whether the power that would give to a tribunal these powers could not withdraw the powers in case they were abused and lodge them elsewhere?

Mr. KELLOGG. Certainly; there is no question about that.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Nebraska [Mr. NORRIS].

Mr. NEWLANDS. Mr. President, there has been a parley regarding this bill with a view to adjusting the differences and there is a fair prospect of adjusting them. It has been suggested that we take a recess until 12 o'clock to-morrow and then proceed with the bill. If there is no Senator who desires to speak to-day I will take that course.

Mr. CURTIS. Mr. President, if the Senator from Nevada is going to move a recess, I suggest that the Senator from Minnesota [Mr. KELLOGG] have his amendment printed in the usual form, so that we may be enabled to read it by to-morrow.

The PRESIDING OFFICER. The amendment intended to be proposed by the Senator from Minnesota will be printed and lie on the table.

Mr. BORAH. Mr. President, I did not understand the reason for the recess.

Mr. NEWLANDS. I suggested that a parley has been going on with reference to the adjustment of differences regarding the shaping of this bill.

Mr. BORAH. A parley among Senators?

Mr. NEWLANDS. Yes.

Mr. BORAH. I am glad the Senate has retained jurisdiction of the measure. I supposed, perhaps, it was being shaped somewhere else.

Mr. NEWLANDS. I refer to a parley among Senators.

Mr. JOHNSON of California. I submit an amendment which I ask may be printed and be taken up to-morrow on the occasion suggested by the Senator from Nevada.

The PRESIDING OFFICER. The proposed amendment will be stated.

The SECRETARY. It is proposed to strike out all after the word "appropriated," in line 17, on page 4.

The PRESIDING OFFICER. The amendment will be printed and lie on the table.

Mr. NEWLANDS. I will ask whether any Senator wishes to speak on the bill at this time?

Mr. JONES of Washington. Mr. President, I think I will take two or three minutes to express my views about one or two provisions in the bill, so as to let the Senator know my views with reference to one particular phase of it. I have no doubt that these matters are being considered by those who are conferring with reference to the bill, so I will say just a word or two at this time.

I know we will have to place a great deal of power and a great deal of discretion in the hands of the President during this war; and while I think we could take a wiser course than is suggested in this bill, I feel like deferring very largely to the judgment of the committee in a matter of that kind.

There is one phase of the bill that I want to speak about, and that is this matter of damages. It is all right to pay the railroads reasonable compensation for the service which they perform in transporting the supplies and products of the country; but it seems to me that this bill goes much further than that, and it seems to me that this is perfectly plain from the language of the bill itself. On page 4 it says:

> For the transportation of persons or property in carrying out the orders and directions of the President the lawfully established tariffs shall apply unless otherwise fixed by law.

In other words, as I understand that, it means that for rendering a service directed by the President the railroads shall receive the compensation now fixed by law. There can be no objection to that.

> For the transportation of troops in carrying out the orders and directions of the President, reasonable rates shall be fixed by the Interstate Commerce Commission.

I can see no objection to that. We have a right to rely upon the judgment of the Interstate Commerce Commission as to what would be reasonable rates for the transportation of these troops, and, of course, we can not reasonably ask the railroads to transport them for less than what is reasonable—

> And if the transportation be for the Government of the United States it shall be paid for currently or monthly by the Secretary of the Treasury out of any funds not otherwise appropriated.

Mr. President, it seems to me that that language is broad enough to cover whatever special consideration we ought to give to the railroad companies. That takes care of all they have a right to ask the Government to take care of; that compensates them in every way that they ought to expect compensation from the Government. The people would not complain of that. But it goes further. Apparently those who framed this bill thought there might be some inconvenience for the railways, or some loss suffered by them, that the foregoing provision would not take care of and so they wanted to take care of any such situation as that. In other words, the framers of this bill seem to be especially solicitous to see that the railroads suffer no damage of any kind or character:

> *Provided*, That if by reason of giving preference or priority in transportation under an order or direction authorized hereunder, or by reason of disarrangement of taffic caused by giving such preference or priority, any carrier shall suffer injury or damage, the Interstate Commerce Commission shall, upon application by the carrier and upon notice to the Attorney General of the United States, and after due hearing, determine the amount thereof, which amount shall be paid by the Secretary of the Treasury out of any funds in his hands not otherwise appropriated.

This language shows a peculiar solicitude to take care of any possible injury or damage that the railways may suffer, whether in the loss of freight rates or prospective profits or any remote or inconsequential injury or damage.

Mr. President, I think that part of the bill ought to be stricken out. I think the railways ought to be paid fair, reasonable, and just compensation for the service which they render to the Government; and then, if they suffer any additional loss or damage, that is a loss or damage that they ought to be willing to bear patriotically with the rest of the country, who must suffer tremendous losses for which they can receive no compensation from the rest of the people of this country.

Mr. NEWLANDS. Mr. President, may I ask the Senator a question?

Mr. JONES of Washington. Certainly.

Mr. NEWLANDS. Suppose, in the case of a given railroad, that in the ordinary course of its business it had different varieties of traffic, some costly and some cheap commodities, and that an order should result in condemning that railroad to carry, in the interest of the public and the national security and defense, the cheap commodities which had a very low rate, and cut off the transportation of the valuable commodities which have a high rate. Would the Senator regard that as such an incident of the war that the railroads must suffer that loss as a patriotic duty and sacrifice?

Mr. JONES of Washington. I would say yes, if you are going to insist that others who suffer a direct loss by reason of the diversion of this transportation to some other line of work must suffer the direct damage that results to them.

Mr. NEWLANDS. When the Senator refers to others, I presume he means the shippers?

Mr. JONES of Washington. Yes; certainly.

Mr. NEWLANDS. But does not the Senator distinguish between the case of the shipper——

Mr. JONES of Washington. Oh, Mr. President, it is very easy to make technical and legal distinctions with reference to these matters; but we are legislating here to meet a peculiar and special situation.

Mr. NEWLANDS. I am talking about substantial differences.

Mr. JONES of Washington. That is all right. I am referring to substantial differences, too.

Mr. NEWLANDS. Here in this case the property of the railroad is directly condemned to an inferior and unprofitable use by the Government in the interest of the security and defense of the Nation. In addition to that, is it not to the interest of the Government to see that a railroad corporation is not condemned to such an injury, for the reason that the country and the Government are interested in the maintenance of the efficiency of the railroads?

Mr. JONES of Washington. Oh, there is no room for argument on that.

Mr. NEWLANDS. Very well. I will ask, then, whether those distinctions do not exist?

Mr. JONES of Washington. The country and the Government are also interested in the prosperity of their people and the loss that private individuals may suffer.

Mr. POINDEXTER. Mr. President——

Mr. JONES of Washington. I yield to my colleague.

Mr. POINDEXTER. I interrupt just at this time, on account of the suggestion made by the Senator from Nevada that there was some peculiar interest of the Government in the efficiency of the railroad, to make this remark:

The only interest that the Government has in the efficiency of the railroad is that the railroad may carry the freight of the shippers of the country. The Government has no interest whatever in the railroad as a money-making concern, any more than it has in the universal prosperity of all of its citizens in an indirect and general way.

If there are a number of shippers that have their freight at the station ready to be shipped—some of it, as the Senator from Nevada says, high-class freight and some of it low-class freight—it is true, as he suggests, that it is in the interest of the railroad to be allowed to carry the high-class freight. It can make more money out of it; and if the Government intervenes and requires it to carry the low-class freight it may inflict a loss upon the railroad. But does it not, or may it not at the same time, by the same act, inflict a loss on the owner of the high-class freight who has it there, ready to be shipped, and who has just as much right to have it shipped and receive the service of the railroad as the railroad has to operate its trains and carry the freight?

I say that the interest of the Government in one is just the same as it is in the other.

Mr. JONES of Washington. Mr. President, I concur in what my colleague has so well said, and I want to call attention to another feature of the bill:

The bill absolutely takes away certain rights which shippers now have, and it does not pretend to give them any compensation. The common carriers of this country are under certain obligations to the shippers of the country. If I take my produce to a common carrier and demand transportation, I have certain rights that I can enforce in the courts, by damages or otherwise, if transportation is not furnished. That right of the shipper is absolutely taken away by this bill. The railroads are expressly relieved from every obligation that they owe to the shippers of this country when they act under the orders of the President or the body designated by him under authority of this bill. Listen to what it says:

> Any carrier complying with any such order or direction herein authorized shall be exempt from any and all provisions in existing law imposing civil or criminal pains, penalties, obligations, or liabilities upon carriers on account of any such action.

What compensation is provided in this bill for the shipper whose rights are taken away from him by the express terms of that provision of the bill? We take from him a very substantial right, but we do not propose to give him any compensation. That is not right.

Mr. President, if we are going to relieve the railroads from all the obligations that they now owe to the shippers of this country, and if we are not only going to provide for just compensation for the service which they render the Government, but also save them from any possible loss, damage, or injury by reason of the action of the Government, then I say that we ought to make provision under which the Government shall save the shippers of the country from damages caused by the direct action of the Government in taking away from them rights which they have against the common carriers of the country, by depriving them directly of facilities for transportation. I am not urging that a provision of that kind be put in this bill if you will cut out these other provisions; but if you do not cut them out, then the people of this country and the shippers of this country have a right to have their rights protected, and it should be done in this bill, which creates the very conditions that may cause the damage.

Mr. President, I want to call attention to just one or two instances. Some time ago I read into the RECORD a portion of a circular that was sent out by one of the great transportation companies of this country to the producers of fruit in a particular locality in my State, warning these people that they would not have transportation facilities for taking their fruit to market because of the needs of the Government and the diverting of their equipment into other lines of transportation. That is the situation in some portions of our State, and I have not any doubt but that a similar situation in other lines of production exists in other States. I cite this simply because I know of it.

Mr. POMERENE. Mr. President, may I ask by whom that circular was issued?

Mr. JONES of Washington. It was issued by the Northern Pacific Railway Co.

In my section, Mr. President, we produce a great deal of fruit. Many of our farmers raise nothing but perishable fruit. They have small tracts—5, 10, or 15 acres—and they produce berries, peaches, and pears, and other kinds of fruit that must be shipped promptly. They have been depending, of course, upon transportation to get to market. If they have no transportation, their product is an absolute loss. They have a right to transportation. The Senator from North Dakota [Mr. GRONNA] suggests that that applies to potatoes, vegetables, and other things. It does; but not so directly. You can keep potatoes over for several months, but there are certain classes of fruit which you can not keep. They must go promptly to market, and if they are not taken to market promptly they are an utter loss. These people have had a right to expect transportation, and they have a right to expect it now. Instead of trying to discourage our people we ought to make special efforts to meet the situation. We ought to see to it that if possible the special situation in special localities shall be met by refrigerator cars and things of that sort which in the way of transportation are necessary to take their products to market. But they say, "We can not furnish transportation." In that case those people lose everything they have.

I have another letter here. Our people are considerably worked up about this matter. As I said, I recognize that we must place extraordinary powers in the President and those acting under him. I believe they will do everything in their power to meet this special situation unless we lend some encouragement by our legislation for them not to do it.

Who is going to administer this law? The President is going to select a great many railroad men. He will use these as instruments; I have not any doubt about it. They are the men best equipped for looking after transportation matters, and we ought to see to it that they are not encouraged to recommend the diversion of their transportation facilities from this line of industry or another just in the hope of making things easier, and with the knowledge that they can recoup from the Government any damage that they can show in any way, shape, or form. Just think of it! Under this bill if the railroads are directed to take the cars that would carry out fruit to transport a cheaper article of freight the farmer would lose his fruit and the railroad would be permitted to collect the equivalent of the freight for carrying that fruit. That is surely enough, and yet it is further provided that any additional damage by interference or inconvenience to the railroad shall be paid for.

I have here a letter sent out from North Yakima, signed by an official of the Northern Pacific Railroad Co. Without reading the whole letter I just want to read this part of it:

> It will not be what the railroads want to do, but what they are permitted to do. The next few months will find the railroads wholly occupied in the movement of necessaries. It is doubtful if any portion of the fruit crop can be transported.

Mr. President, there is no encouragement there to our fruit growers. This did not come out until after their crops were all in. They can not change them now. If they can not get transportation, they are ruined.

Mr. FLETCHER. Mr. President——

Mr. JONES of Washington. It may be that the necessities of the Government will require the diversion of this transportation somewhere else, but I say we ought not to encourage such diversion by the express terms of the law under which the railway companies can divert their transportation facilities without any possible chance of loss to them, saying to the people whose rights we take away by the express terms of the bill, "You must suffer the entire loss; you can not recoup yourselves." I yield to the Senator from Florida.

Mr. FLETCHER. Does the Senator believe that a railroad company could send out a notice like that and escape its obligations to the public to serve the public needs? It seems to me that the fruit growers in Washington are simply called on to haul their products to the station and leave them there, and if the railroad company does not take them they would have a right of action against them for the entire value of the property.

Mr. JONES of Washington. I think they would, unless that right is taken away by the express terms of the bill.

Mr. FLETCHER. I think the Senator is quite right about that.

Mr. JONES of Washington. That is one thing I am objecting to in the bill, that it expressly takes away the right of the shipper to recover against the railroads and gives him no recourse, but preserves to the railroad more than its right to just compensation. If you are going to compel the railway to take its transportation facilities somewhere else, of course you must relieve it from its obligations to the shipper. You should do that only in the direst necessity, and then you should compensate the shipper if you take care of remote damages to the road.

Mr. POMERENE. Does not the Senator state his position rather too strongly? Bear in mind that the President only has

the right to make preferential shipments when it is necessary for the public defense and security. Of course, if it was necessary for the public defense to send wheat instead of berries, I suppose the berry shipper would be jeopardized thereby, but neither the President nor any representative he might suggest could arbitrarily say it is necessary for the common defense of the Nation, and therefore discriminate against these shippers.

I do not believe for a minute that that is going to be done. I do believe that there will be special instances in which shippers will be inconvenienced by orders of this kind. That will happen; it is one of the necessities arising out of war conditions.

Mr. JONES of Washington. I think I agree generally with the suggestion of the Senator, except he must not forget that when the President or those authorized to exercise the discretion granted by the bill has exercised that discretion there is no power that can question it. I do not believe that he will arbitrarily do what he believes to be wrong. Of course I do not.

Mr. POMERENE. I can not quite agree with the construction the Senator places on it.

Mr. JONES of Washington. I would like to have the Senator tell me when the President decides that certain transportation is necessary for the public security and defense what authority can question it?

Mr. POMERENE. When it comes to an exercise of discretion, that means a reasonable and honest discretion.

Mr. JONES of Washington. But how can you question it?

Mr. POMERENE. It is a question of fact to be determined by a court if anyone has been injured, just as many other things. A question comes up as to what is a fraud. A court determines that. A question comes up as to what is a reasonable doubt. A court determines that. There are many other similar instances we might refer to.

Mr. JONES of Washington. I do not believe the Senator can find any authority anywhere that will sustain any contention of that sort with reference to this matter. We place this entirely in the judgment of the President. We say, "That during the continuance of the war in which the United States is now engaged the President is authorized, whenever in his judgment such action is necessary to the public security and defense," the President may direct transportation. When the President acts there is no power in this Government to overturn his action. There is no power to decide that he has been wrong in determining that it is necessary for the public defense and security to do this or that.

As I said, I am satisfied that neither the President nor those acting under his orders will do this arbitrarily, but I do fear the judgment that may be used. What I am insisting upon, however, is that whenever the President takes action that he deems necessary and that may deprive shippers of the right to damages which they have against the common carrier, you do not by law give to the common carrier a right to recoup itself for anything other than reasonable compensation for the service which it renders the Government and leave the shippers without any compensation whatever for taking from them a most substantial right. They will suffer more damage than anybody else. Theirs will be a real, direct, substantial damage. The man who loses his crop loses his all for this year. We provide in one section that the railroads shall get reasonable rates for the service they render. I submit, Mr. President, that when we go that far we go far enough, and if we go further with reference to the railroads and the remote damages they may recover then the Government can not afford to refuse to go a little further than the legal technicalities possibly would permit in behalf of the shippers of the country. That is all that I am urging upon the chairman of the committee.

Now, Mr. President, as just showing how some of our people look at this matter, I will ask to have inserted in the RECORD, without taking the time of the Senate to read it, a petition which I received from one locality in my State, in which they set out their condition and the damages which they will suffer if their transportation facilities are taken away.

The petition referred to is as follows:

KENNEWICK, WASH., *May 25, 1917.*

To the Hon. WESLEY L. JONES,
Washington, D. C.

HONORABLE SIR:

Whereas His Excellency President Wilson has, by proclamation, called upon all patriotic farmers to make a special effort to produce the largest possible amount of foodstuffs; and

Whereas the farmers of the Yakima and Columbia River Valleys have by much expenditure of time, money, and labor brought our land to a high state of productivity; and

Whereas most of us have our entire capital engaged in this business, and it would be out of the question at this time to pull out our trees in order to put in other crops; and

Whereas our entire living, and a large part of the living of those who help in fruit harvest, depends upon our being able to market our fruit; and

Whereas we have been notified by the railway officials that our soft fruits are likely to be classed as luxuries and denied transportation: Be it

Resolved by the Kennewick Valley Club—

First. That our Senators and Representatives in Congress be earnestly requested to present to the proper authorities the condition which confronts this section.

Second. That instead of being a luxury our fruit is an absolute necessity, not only as an addition to the food supply, but it is the sole source of income for thousands of our people.

Third. That to deprive us of cars for the transportation of our crops of soft fruits, strawberries, cherries, peaches, pears, etc., will mean for many of us bankruptcy and ruin. It may also mean that instead of being a support to the Government we may have to call for assistance.

Fourth. That we recognize the fact that we will not be able to move our apple crop speedily, but the apples can be stored, while the soft fruits must be moved when ready or they are a total loss.

Now, we, as officers and members of Kennewick Valley Club, do earnestly beseech you to give this matter your immediate and active attention.

JAMES JOHNSTON,
W. H. ALLISON,
NEWTON NEWKIRK,
Committee.

Mr. JONES of Washington. Mr. President, I am not going to take any further time of the Senate. All I want to impress upon the chairman of the committee and the Senators who are conferring in regard to this matter is simply this: Let us treat the railroads fairly and squarely, but let us not treat them in one way and treat the shippers of the country in another. If we insist upon the shippers of the country bearing patriotically a loss which comes to them by reason of the necessities of the Nation, let us say to the railroads that remote damages and injuries that may come to you by reason of this great struggle in which we are engaged should be borne by you patriotically, and that you ought to ask no more than just and reasonable compensation for the services that you render the Government.

In justice to the Secretary of Agriculture and those who are administering this matter, I wish to put in the RECORD a copy of a letter which I received from the Acting Secretary of Agriculture in answer to my letter sending to him the circular that I referred to awhile ago. I will say that, in substance, the Secretary states that he thinks the railroads really misapprehended the situation or did not convey the proper situation to the people of this locality; that evidently the railroads led our people to believe that they would be deprived this year of the ordinary railway transportation facilities that they have heretofore had for the transportation of their fruit, while such would not be the case; and that he has called upon the Northern Pacific Railway to correct this misapprehension. It is only by inference that we draw this even from his letter; but apparently he has called this to the attention of the railroad, and I hope that action to allay the apprehension of the people along that line will be taken by the railroads.

The letter referred to is as follows:

DEPARTMENT OF AGRICULTURE,
Washington, June 7, 1917.

Hon. W. L. JONES,
United States Senate.

DEAR SENATOR JONES: Your letter of May 25, addressed to the Secretary of Agriculture, with which was transmitted copies of communications from the Yakima Valley Traffic Association in regard to the classification of fruit as foodstuffs for transportation purposes, has been referred to me for attention.

The principal point to which the Northern Pacific Railway apparently is calling attention is the necessity for more storage warehouses to take care of such part of their fruit as does not necessarily have to be moved to market immediately that it is harvested. We indorse this advice to growers, but the circular was so unfortunately worded as to leave the impression upon shippers that there was a possibility that what cars and facilities they had had last year might be withdrawn this year.

At a conferenee between the representatives of the department and the executive committee of the special committee on national defense of the American Railway Association it was ascertained that the executive committee, immediately on receipt of a copy of the circular, called it to the attention of the president of the Northern Pacific Railway and asked him to correct the impression under which it had left shippers.

Very truly, yours,

CARL VROOMAN,
Assistant Secretary.

PETITIONS AND MEMORIALS.

Mr. FRELINGHUYSEN presented petitions of the Methodist Sunday schools of Wrightstown; of the Woman's Home Missionary Society of the Broad Street Methodist Episcopal Church, of Burlington; and of sundry citizens of East Orange, all in the State of New Jersey, praying for national prohibition, which were ordered to lie on the table.

He also presented petitions of Plumbers' Union No. 2, of Newark; of Local Union No. 2, Travelers Goods and Leather Novelty Workers' Associations, of Newark; and of Local Union No. 113, White Goods, Waist, and Coat Makers' Union, of Newark, all in the State of New Jersey, praying for Federal control of foodstuffs, which were referred to the Committee on Agriculture and Forestry.

He also presented memorials of Carpenters' Local Union No. 299, of West Hoboken; of Carpenters' Local Union No. 119, of Newark; of Painters' Local Union No. 241, of Montclair; of the Central Labor Union of Atlantic City; of Local Union No. 262, Independent Brotherhood of Electrical Workers, of Plainfield; of the Hudson County Building Trades Council of Jersey City; of Bakers' Local Union No. 84, of Newark; of Carpenters' Local Union of Englewood; and of Carpenters' Local Union No. 139, of Jersey City, all in the State of New Jersey, remonstrating against the enactment of legislation to prohibit the manufacture of beer and light wines, which were referred to the Committee on Finance.

Mr. GALLINGER presented the petition of Eugene L. Aldrich, of Kenne, N. H., and a petition of the Woman's Christian Temperance Union, of Exeter, N. H., praying for national prohibition, which were ordered to lie on the table.

He also presented a memorial of Local Union No. 333, International Brotherhood of Stationary Firemen, of Franklin, N. H., remonstrating against national prohibition, which was ordered to lie on the table.

COAL PRODUCTS.

Mr. POMERENE. I introduce a joint resolution and ask that it be referred to the Committee on Interstate Commerce.

The joint resolution (S. J. Res. 77) to provide further for the national security and defense by regulating the production, sale, and distribution of coal was read twice by its title and referred to the Committee on Interstate Commerce.

COMMITTEE ON MINES AND MINING.

Mr. WALSH submitted the following resolution (S. Res. 83), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Mines and Mining, or any subcommittee thereof, be, and hereby is, authorized, during the Sixty-fifth Congress, to send for persons, books and papers; to administer oaths and to employ a stenographer, at a cost not exceeding $1 per printed page; to report such hearings as may be had in connection with any subject which may be pending before said committee, the expense thereof to be paid out of the contingent fund of the Senate; and the committee, or any subcommittee thereof, may sit during the sessions or recess of the Senate.

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had, on June 12, 1917, approved and signed the following act:

S. 2133. An act to amend an act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, and for other purposes.

PRINT-PAPER INVESTIGATION.

Mr. OWEN. Mr. President, there was submitted to the RECORD a letter of transmittal by the Federal Trade Commission of a report of the news print paper industry in pursuance of Senate resolution 177 of the Sixty-fourth Congress, which I had the honor to present. That resolution, adopted by the Senate April 24, 1916, reads as follows:

Resolved, That the Trade Commission is hereby requested to inquire into the increase of the price of print paper during the last year and ascertain whether or not the newspapers of the United States are being subjected to unfair practices in the sale of print paper.

This report is one of very great importance, and I wish to call the particular attention of the Senate to the recommendations made by the Federal Trade Commission. They say:

By reason of this condition and because of the vital interest to the public of an efficient dissemination of news in this crisis, the commission commends as a war emergency measure that Congress by appropriate legislation provide:

(1) That all mills producing and all agencies distributing print paper and mechanical and chemcial pulp in the United States be operated on Government account; that these products be pooled in the hands of a Government agency and equitably distributed at a price based upon cost of production and distribution plus a fair profit per ton.

(2) That pursuant thereto some Federal agency be empowered and directed to assume the supervision and control thereof during the pendency of the war.

(3) That, by reason of the fact that approximately 75 per cent of the production of news-print paper in Canada comes into the United States, proper action be taken to secure the cooperation of the Canadian Government in the creation of a similar governmental agency for the same function, which shall be clothed with power and authority to act jointly with the governmental agency of the United States for the protection of the consumers and manufacturers of print paper and the public of the United States and Canada.

(4) That in case the Canadian Government shall not join in such a cooperative enterprise, then importation of paper and mechanical and chemical pulp into the United States shall be made only on Government account to or through the Federal agency charged with such supervision and distribution.

In this connection the commission desires to point out that such a plan contemplates the operation of mills under their present management and the use of the present distributing agencies, but that such use and operation shall be for the public good, directed by a disinterested public agency to secure equitable distribution and a price that is based upon a fair cost of production and a fair profit per ton to be determined without regard to the panic market created by unusual and abnormal conditions.

I wish to give notice that I shall at a very early date present to the Senate a bill for the purpose of putting into effect these recommendations. It is a matter of most urgent importance to every newspaper in the United States and to the publicity of intelligence which is so necessary to a Republic such as ours.

AMENDMENT OF INTERSTATE-COMMERCE ACT.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

Mr. POMERENE. Mr. President, I move that the Senate take a recess until 12 o'clock noon to-morrow.

Mr. FLETCHER. I suggest to the Senator from Ohio that there ought to be a short executive session.

Mr. POMERENE. I will modify the motion and move that when the Senate takes a recess it shall be until 12 o'clock to-morrow.

Mr. POINDEXTER. I wish to ask the Senator from Ohio if he has received any notice from any Senator as to his desire to speak on the bill?

Mr. POMERENE. The chairman of the committee in charge of the bill announced awhile ago that he knew of no one else who wanted to speak this afternoon, and he stated that there was to be a conference among certain Senators who had some amendments which they wanted to consider with a view to reconciling their differences. That was the reason for the motion.

Mr. POINDEXTER. The Senator from Nevada was of opinion very possibly that some of the amendments that have been suggested are good amendments, and if Senators were to talk it over with him, he would agree to them, but there is no difficulty about doing that here. The amendments have been pretty fully discussed and they are short and clear. The bill has been before the Senate a number of days. It was before the committee for a week. It has been discussed in the public press of the country for months. I for one fail to see any exigency calling for a cessation of the business of the Senate at this time. It is early in the afternoon, only a quarter after 2, and I feel that the Senate is ready to vote on the amendments and on the bill. The Senator has stated that he knows of no other Senator who wants to speak, and I doubt very much whether there is any appreciable number of Senators who are not informed as to the provisions of the bill and the amendments which are offered to it.

Mr. POMERENE. I can only say that I made the motion out of deference to the request of the Senator in charge of the bill. I have sent for him and I hope he may be on the floor very soon.

Mr. POINDEXTER. I hope the Senator will not make the motion to take a recess and that we will proceed with the regular order of business and dispose of this important matter.

Mr. OWEN. Mr. President, I think the time has come when we ought to change the rules of the Senate and have a cloture that really will work. We have been wasting a good many days here in discussion that has not really been profitable, and I think I am not exposing any secret in making that observation.

It has been imagined that the rules of the Senate preclude the possibility of a previous question being moved. I contend very emphatically that the previous question can be moved at any time, but I do not intend to take the time of the Senate to discuss that now. I merely want to point out now that a motion made to amend the rules of the Senate by substituting a new set of rules will not be subject to a point of order when the previous question is moved upon the substitution of a new set of rules which shall include the previous question. It would have to be determined by general parliamentary law if a motion be made to set aside the rules of the Senate and substitute a new set of rules. I have pending before the Senate such a motion.

This body ought to preserve the right of debate. I believe that no Member of this body desires to prevent liberal debate, and with only 96 members abundant opportunity can always be afforded to any Senator to say anything which will add to the information, the knowledge, or the efficiency of the Senate. But I submit that the Senate ought not to have day after day consumed when the discussion is not adding anything to the knowledge of the Senate but has the effect of vacating the Senate, and when repeated calls for a quorum are made necessary by the fact that the Senate is emptied by the continuation of a debate that is not really instructive.

Mr. GALLINGER. Mr. President, I heard this speech of the Senator from Oklahoma the first time he made it, and I have

heard it repeated at least 25 times in the last two years. In fact, we always hear it when the Senator returns from an extended absence from his duties. If the Senator thinks that he can by elocution change the rules of the Senate and introduce the previous question, he will stand almost alone in that contention. The Senator lectures us regularly on this subject, but the Senator has some things to learn. We have lived more than 100 years under the rules of the Senate, and no Senator before has seriously argued since the previous question was abolished by the Senate a great many years ago that it still exists as a part of our rules. The Senator from Oklahoma will certainly accomplish a miracle if, without changing our rules and making the previous question a part of them, as is the case in the House of Representatives, he can force the Senate to accept his views.

Mr. OWEN. It is only necessary to move the substitution of a new set of rules, and it would then make the previous question on that question in order.

Mr. GALLINGER. That is a device the Senator has discovered which, in my opinion, the Senate will not agree to.

Mr. OWEN. Perhaps the Senate may not agree to it, but that remains to be seen, and I shall on a convenient occasion put that matter to the test. But I will say to the Senator that the people of the United States I think have slowly come to the opinion, after hearing this matter discussed, that the Senate ought to be put in a position where it can transact the business of the country without an undue waste of time.

Mr. GALLINGER. My observation has been that the Senate transacts an enormous amount of business, and does it in an orderly way under the rules which the Senate has adopted for its guidance. So far as speaking for the people is concerned, which we hear from the Senator from Oklahoma so often, I believe the people are less concerned about this matter than is the Senator from Oklahoma.

Mr. GRONNA obtained the floor.

Mr. VARDAMAN. I suggest the absence of a quorum.

Mr. GRONNA. I rose to ask the Senator from Oklahoma a question. Is it admitted now by the Senator from Oklahoma that the reform instituted by him and his party at the beginning of this session is a failure? I understood from reading the newspapers at the beginning of this session that no more filibustering could be indulged in.

Mr. POMERENE. Mr. President, I rise to a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. POMERENE. The Senator from Mississippi [Mr. VARDAMAN] suggested the absence of a quorum.

Mr. GRONNA. I was on my feet and was recognized before that was done, I will state to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from North Dakota had been recognized.

Mr. POMERENE. I did not understand that the Senator had been recognized. If so, I will withdraw the point.

Mr. GRONNA. If the Senator will allow me, with all due respect to the Senator from Mississippi——

Mr. VARDAMAN. I recognize that the ruling of the Chair is correct. I did not get the consent of the Senator from North Dakota to make the point of no quorum.

The PRESIDING OFFICER. The Senator from North Dakota is entitled to the floor.

Mr. GRONNA. It has not yet been customary, I will say to the Senator from Ohio, for any Senator to rise in his place and suggest the absence of a quorum when another Senator has the floor. I shall not detain the Senate. I know the Senator from Oklahoma has given this question a great deal of study, and I think it is only a fair question that I am asking, and I am asking it in all good faith.

I read in the newspapers a month or two ago that from now on there would be no such thing as filibustering, that there would be no opportunity for any Member of this body to delay any action that the Members of the Senate wanted to take. If I understood the Senator from Oklahoma correctly, he has called attention to the fact that we are still in need of some reform so far as the rules are concerned.

Mr. OWEN. Mr. President——

Mr. GRONNA. I yield to the Senator from Oklahoma.

Mr. OWEN. The Senator from North Dakota addressed a question to the Senator from Oklahoma. My answer to it is that while the change in the rules makes it possible under an earnest effort on the part of two-thirds to put an end to an obvious filibuster, it is not a very good working rule. It is so difficult to invoke it that ordinarily the Members of the Senate prefer to quietly wait until gentlemen who wish to discuss matters at great length have become weary and will permit the Senate to act. So it does not, I think, work very well. I think it would work better if we had an immediate, ordinary, old-fashioned, previous question, and that is what I favor.

Mr. GRONNA. I thank the Senator from Oklahoma. He has given an answer which is entirely satisfactory to me. I do not say that I will oppose even the proposition advanced by the Senator from Oklahoma; but evidently I was mistaken in my conclusion, having read in the newspapers that at the request of the administration the rules had been amended so that in the future it would be impossible for any Member of this body to delay the action which the Members of the body desired to take.

Mr. NEWLANDS. Mr. President, I understand that an executive session is desired. I move therefore that at the conclusion of to-day's session the Senate will take a recess until 12 o'clock to-morrow.

Mr. SMOOT. The Senator means that when the Senate takes a recess to-day, it shall be until 12 o'clock to-morrow?

Mr. NEWLANDS. Until 12 o'clock to-morrow.

Mr. SMOOT. I do not want to speak to the motion, but——

Mr. NEWLANDS. I will state to the Senator from Utah, in order that he may understand it——

Mr. SMOOT. I understand it.

Mr. NEWLANDS. There is a parley going on with reference to the adjustment of some differences, and we hope to be able to get together by 12 o'clock to-morrow. With that view, in order that Senators may meet this afternoon——

Mr. SMOOT. That, I think, is very wise.

Mr. NEWLANDS. In order that Senators may meet this afternoon it will be necessary that we should be excused from attendance on the Senate. I have therefore made the motion that when the Senate closes its session to-day it shall take a recess until 12 o'clock to-morrow.

Mr. POINDEXTER. Mr. President, a parliamentary inquiry. Is this motion debatable?

The PRESIDING OFFICER. A motion to adjourn is not debatable, of course, but this is a motion that when the Senate takes a recess it takes the recess to meet at a certain hour to-morrow; and in the opinion of the Chair it is a debatable motion.

Mr. POINDEXTER. Mr. President——

Mr. NEWLANDS. I ask the Senator to let this action be taken, because we have to meet in conference in a few moments, and it is quite important that we should have time to discuss these matters in that conference with a view to their adjustment.

Mr. POINDEXTER. I will not detain the Senator from meeting the conference, but I want to debate the motion.

I fail to appreciate the relevancy of the argument of the Senator from Oklahoma [Mr. OWEN] in favor of a cloture rule at this juncture of the business of the Senate. The Senate has concluded the debate on this measure, it being one of the few times that I have ever seen in the history of the Senate when there was not any conversation on hand. The Senate is ready to act on this bill. I am satisfied that we could dispose of the amendments on the floor of the Senate in a very few moments; but instead of an effort being made to bring the debate to a close and to transact the business of the Senate, which the country is awaiting with great expectancy to have transacted, the effort is made to encourage further debate, further conference, further postponement of the business of the Senate. We do not need any cloture rule; we need some sort of a rule, or some sort of an incentive, to proceed with the business and bring it to a conclusion. I for one will vote against the motion to take a recess.

The PRESIDING OFFICER. The question is on the motion of the Senator from Nevada that when the Senate takes a recess to-day it be until 12 o'clock to-morrow.

Mr. SMOOT. Mr. President, just a word. I think it is very unwise for any Senator to try to impress upon the country that the Senate has pressing business on hand at this time and has been held up by any filibuster during this session of Congress. In fact, I think a great deal of time would have been gained during this session if we had taken recesses or adjournments from day to day and allowed the committees that had emergency legislation before them to give their undivided attention to the legislation being considered by them, so that they might report it to this body to be considered and then kept under consideration until concluded. I do not believe there has been a time since the opening day of this session of Congress when any Senator would want to have enforced even the rules we have in reference to closing debate. I do not think that one-tenth of the Senators would have signed a request that a vote be taken on any measure and that speeches be limited under the rules we already have.

It becomes almost nauseating at times to see efforts made on the part of some Senators, who attend the sessions of the Senate perhaps one day in two weeks and proclaim to the country that the Senate is not attending to the business before it. There has never been a session of the Senate since I have been a Member of it when so much important legislation has passed as at the present session. There is now pending before committees legislation that is of vital interest to the people of this country. It must first be considered by the committees, and by the careful consideration of it by the committees time will be saved when the measures are considered upon the floor of the Senate.

I simply wanted to say this much in answer to what has been said about the lagging of the Senate.

The PRESIDING OFFICER. The question is on the motion of the Senator from Nevada [Mr. NEWLANDS], that when the Senate takes a recess it will be until 12 o'clock to-morrow.

The motion was agreed to.

EXECUTIVE SESSION.

Mr. FLETCHER. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 20 minutes spent in executive session the doors were reopened.

RECESS.

Mr. HITCHCOCK. I move that the Senate take a recess until 12 o'clock to-morrow.

The motion was agreed to; and (at 2 o'clock and 55 minutes p. m., Wednesday, June 13, 1917) the Senate took a recess until to-morrow, Thursday, June 14, 1917, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate June 13 (legislative day of Tuesday, June 12), 1917.

MEMBER OF THE EXECUTIVE COUNCIL OF PORTO RICO.

Luis Sanchez Morales, of Porto Rico, to be a member of the Executive Council of Porto Rico. (Reappointment.)

RECEIVER OF PUBLIC MONEYS.

John S. Hunter, of Alabama, to be receiver of public moneys at Montgomery, Ala., his present term expiring June 22, 1917. (Reappointment.)

PROMOTIONS IN THE ARMY.

QUARTERMASTER CORPS.

To be lieutenant colonels with rank from May 15, 1917.

Maj. James Canby, Quartermaster Corps, to fill an original vacancy.

Maj. Charles R. Stanton, Quartermaster Corps, subject to examination required by law, to fill an original vacancy.

Maj. William S. Scott, Quartermaster Corps, subject to examination required by law, to fill an original vacancy.

Maj. Robert H. Rolfe, Quartermaster Corps, subject to examination required by law, vice Lieut. Col. Chauncey B. Baker, promoted.

Maj. Louis F. Garrard, jr., Quartermaster Corps, subject to examination required by law, vice Lieut. Col. George McK. Williamson, promoted.

Maj. Bertram T. Clayton, Quartermaster Corps, subject to examination required by law, vice Lieut. Col. Thomas H. Slavens, promoted.

Maj. Frank A. Grant, Quartermaster Corps, subject to examination required by law, vice Lieut. Col. David S. Stanley, promoted.

Maj. Kensey J. Hampton, Quartermaster Corps, subject to examination required by law, vice Lieut. Col. Thomas C. Goodman, promoted.

Maj. William R. Grove, Quartermaster Corps, subject to examination required by law, vice Lieut. Col. James B. Houston, promoted.

Appointment as second lieutenants of the Army:

Cadet William Harold Kehoe, of Kentucky.

Cadet Clyde R. Altman, of Pennsylvania.

PROMOTIONS IN THE NAVY.

The following-named lieutenants to be lieutenant commanders in the Navy, from the 1st day of January, 1917:

Anthony J. James.

John M. Poole, 3d.

Lieut. William E. Eberle to be a lieutenant commander in the Navy, from the 19th day of January, 1917.

Lieut. William T. Lightle to be a lieutenant commander in the Navy, from the 28th day of March, 1917.

Lieut. William L. Culbertson to be a lieutenant commander in the Navy, from the 5th day of April, 1917.

Lieut. (Junior Grade) George W. Hewlett to be a lieutenant in the Navy, from the 5th day of June, 1917.

Ensign Allan W. Ashbrook to be a lieutenant (junior grade) in the Navy, from the 6th day of June, 1917.

Pay Inspector Henry A. Dent to be a pay director in the Navy, from the 29th day of August, 1916.

Passed Assistant Paymaster Swinton L. Bethea to be a paymaster in the Navy, from the 29th day of August, 1916.

Gunner George C. Smith to be a chief gunner in the Navy, from the 18th day of February, 1917.

Machinist Rufus H. Bush to be a chief machinist in the Navy, from the 31st day of December, 1916.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 13 (legislative day of Tuesday, June 12), 1917.

ASSOCIATE JUSTICES OF THE SUPREME COURT OF THE PHILIPPINES.

Thomas A. Street to be an associate justice of the Supreme Court of the Philippine Islands.

George A. Malcolm to be an associate justice of the Supreme Court of the Philippine Islands.

PROMOTIONS IN THE ARMY.

To be major generals.

Brig. Gen. John F. Morrison.
Brig. Gen. William L. Sibert.
Brig. Gen. Charles G. Morton.

To be brigadier generals.

Col. Edwin F. Glenn.
Col. John Biddle.
Col. Henry C. Hodges, jr.
Col. Adelbert Cronkhite.
Col. William H. Sage.
Col. Omar Bundy.
Col. Richard M. Blatchford.
Col. David C. Shanks.
Col. Robert L. Bullard.
Col. Augustus P. Blocksom.
Col. George T. Bartlett.
Col. Joseph T. Dickman.
Col. Henry T. Allen.
Col. Chase W. Kennedy.
Col. Harry C. Hale.
Col. Samuel D. Sturgis.
Col. William M. Wright.
Col. Peyton C. March.

PROMOTIONS IN THE NAVY.

Lieut. Commander Arthur St. C. Smith to be a commander.

Lieut. Arthur K. Atkins to be a lieutenant commander.

Lieut. Albert Norris to be a lieutenant commander.

The following-named lieutenants (junior grade) to be lieutenants:

Henry R. Keller and
Henry G. Shonerd.

Ensign Solon E. Rose to be a lieutenant (junior grade).

The following-named ensigns to be lieutenants (junior grade):

James R. Webb and
David R. Lee.

Pay Inspector William J. Littell to be a pay director.

Pay Inspector Martin McM. Ramsay to be a pay director.

The following-named paymasters to be pay inspectors:

Charles Conard and
Robert H. Woods.

Capt. Lee B. Purcell to be a major in the Marine Corps.

The following-named first lieutenants to be captains in the Marine Corps:

Robert W. Voeth,
Marion B. Humphrey,
John A. Gray,
William C. MacCrone, and
Norman C. Bates.

First Lieut. John B. Sebree to be a captain in the Marine Corps.

Second Lieut. Archibald Young to be a first lieutenant in the Marine Corps.

Pay Clerk Henry E. Brown to be a chief pay clerk.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *June 13, 1917.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father who art in heaven, Hallowed be Thy name.

Thy kingdom come. Thy will be done in earth, as it is in heaven.

Give us this day our daily bread.

And forgive us our debts, as we forgive our debtors.

And lead us not into temptation, but deliver us from evil: For Thine is the kingdom, and the power, and the glory, for ever. Amen.

The Journal of the proceedings of yesterday was read and approved.

FOOD CONTROL.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that on Friday next, after the Journal is read and the disposition of matters on the Speaker's table, it shall be in order to consider the bill H. R. 4961, known as the Lever food-control bill, and that the same shall continue the order of the House until it is disposed of.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that on Friday next after the reading of the Journal and the disposition of matters on the Speaker's table it shall be in order to consider the bill H. R. 4961, and that the same shall be the continuing order of the House until disposed of. Is there objection?

Mr. YOUNG of Texas. Mr. Speaker, I object.

Mr. KITCHIN. Then I make the same request, Mr. Speaker, substituting Monday next for Friday next.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that Monday next, after the reading of the Journal and the transaction of such business as is necessary on the Speaker's table, the bill H. R. 4961 shall be considered in order and that it shall be the continuing order until disposed of. Is there objection?

Mr. ADAMSON. Mr. Speaker, reserving the right to object, which I never do, I desire to say that I do not desire to be captious and never have been, and if I can get Calendar Wednesday to-day I can dispose of two or three important matters that ought to be disposed of, and in the hope that the gentleman will cooperate with me in doing so I shall not object.

Mr. KITCHIN. I shall do the best I can for all.

Mr. GILLETT. Mr. Speaker, reserving the right to object, I understand this is the food-control bill. Is it the purpose to make it the order of business and to prosecute it until it is finished?

Mr. KITCHIN. Yes.

Mr. GILLETT. I have no objection. I take it there will be full debate?

Mr. KITCHIN. Yes; there will be full debate. It will probably take all of the week. I understand that it is important that it should be passed and become a law before July 1.

Mr. GILLETT. I recognize that fact.

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I assume liberal debate will be afforded, both general debate and under the five-minute rule?

Mr. KITCHIN. Certainly. It will take all week to pass it.

Mr. STAFFORD. And there will be no disposition to cut off debate?

Mr. KITCHIN. No.

Mr. MOORE of Pennsylvania. Mr. Speaker, reserving the right to object, does this mean that if the river and harbor appropriation bill is not passed before that time this order will displace it?

Mr. KITCHIN. It will displace it, yes; but I think the making of this order would facilitate the passage of the river and harbor bill this week.

Mr. GILLETT. It could only be displaced by a vote of the House. They would be of equal privilege.

Mr. STAFFORD. Oh, no. The request here is that this food bill shall be the continuing order of the House, to be taken up regardless of all other business

Mr. GILLETT. Oh, I understood that it gave it only a privilege.

The SPEAKER. The request of the gentleman from North Carolina is that on Monday next, after the reading of the Journal and the disposition of matters on the Speaker's table, barring conference reports, this bill—H. R. 4961—shall be in order and that it shall be a continuing order. That shuts out everything except conference reports.

Mr. MOORE of Pennsylvania. It shuts out suspension day also?

The SPEAKER. Yes; of course it does.

Mr. WALSH. Mr. Speaker, reserving the right to object, will the gentleman state a little further why there is necessity for action upon this measure before July 1?

Mr. KITCHIN. I understand that those who would probably administer the law, the administration and others, think it very important that it should become a law by July 1. That is the beginning of the fiscal year, and the beginning of the movement of some of the crops in the country.

Mr. LINTHICUM. Mr. Speaker, when we adjourned on last Wednesday the Buchanan monument bill was before the House. Is not that the unfinished business for Monday next?

The SPEAKER. No; the gentleman would have to start all over again.

Mr. LINTHICUM. It does not look as though there would be much chance for that.

The SPEAKER. There will not be on next Monday, if this order is agreed to.

Mr. MOORE of Pennsylvania. Mr. Speaker, in view of the uncertainty respecting the status of other bills that ought to be considered, for the present I object.

Mr. LENROOT. Mr. Speaker, will the gentleman reserve his objection for a moment?

Mr. MOORE of Pennsylvania. Yes.

Mr. LENROOT. And I think this is in the interest of the gentleman from Pennsylvania. I would like to ask the gentleman whether if objection is made it is probable that a rule may come into the House displacing the river and harbor bill and making this bill in order next week?

Mr. KITCHIN. We could do that, but I wanted to avoid it. I think it very important that some kind of a food-control bill should be passed. Whether I favor the one as it is now I do not know. I may and I may not.

Mr. MOORE of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. KITCHIN. Yes.

Mr. MOORE of Pennsylvania. It is announced constantly in the newspapers that there is some special reason why the food-control bill should be passed before the 1st of July.

Mr. KITCHIN. I just gave the reason.

Mr. MOORE of Pennsylvania. And those reports come largely from London and indicate that there is a great deal of unrest in England because the American Congress is not pursuing its duty here with more diligence. I want to ask the gentleman if the suggestion which he has as to the necessity for the passage of the food bill by the 1st of July comes from foreign or domestic sources?

Mr. KITCHIN. Absolutely from domestic sources. I have not heard anything from foreign sources. I am not in touch with them.

Mr. MOORE of Pennsylvania. The gentleman is probably familiar with the articles that come from London each day. One of them came from the British Parliament only a few days ago, that there was considerable agonizing over there because the American Congress was so slow, that it was not moving quite as rapidly as the British Parliament thought it ought to move in matters of this kind.

Mr. KITCHIN. I do not think that any committee or anyone favorable to this proposition takes that into consideration.

Mr. MOORE of Pennsylvania. It has a great effect upon the public mind, which is already paying exorbitantly high prices for supplies throughout the United States.

Mr. KITCHIN. I think some kind of a food-control bill ought to pass the House as early as possible. We know it will be debated some time in the Senate. I do think, if possible, this or a similar bill should become a law early in July anyway, preferably by July 1. As I said a while ago to the gentleman from Massachusetts [Mr. GILLETT], some of the food crops begin to move about that time, and it is very important that the bill be a law by the time they begin to move, and of course it will take some time to organize under the law—30 or 60 days, perhaps. I think these measures ought to be considered without the necessity of forcing the committee to ask for a rule. I think we ought to have a full, free, and fair discussion. If it takes a whole week on this bill, we ought to have it; and if the committee is forced to ask a rule, why then it may not give Members as much time as it otherwise would, and I believe we ought to bring these war measures into the House without any rule and give every man an opportunity to discuss them and to offer any amendment he sees fit to offer.

Mr. SMALL. Will my colleague yield to me for a moment?

Mr. KITCHIN. I yield to the gentleman from North Carolina.

Mr. SMALL. Mr. Speaker, I wish to make a statement regarding the request of my colleague and also regarding the river and harbor bill. General debate upon the river and harbor bill has been concluded. Ample time was given. There was no intention to conclude debate before everyone who desired to discuss the bill had enjoyed the opportunity to do so. It was stated more than once during the general debate as a reason why we should proceed leisurely that there was ample time for the consideration of the bill. I remember the gentleman from Illinois [Mr. MADDEN], at least one time if not at others, made that statement, and that was given as a reason for being generous in allowing general debate to proceed. Now, after general debate has been concluded it is asked that another bill shall displace it. Mr. Speaker, it will take only a brief time, if I may have the attention of my colleague, to consider the bill under the five-minute rule. If the information that has come to me from both the friends and critics of the bill it is well founded, and I think it is, there will be little disposition to discuss the bill while it is being read for amendment. Therefore I hope my colleague will modify his request and ask unanimous consent that the food bill be in order after the river and harbor bill has passed.

There are gentlemen in the House who, for reasons satisfactory to themselves, would like to delay the consideration of the river and harbor bill, or would like to defeat the bill. If unanimous consent should be given that the food bill should be in order on Monday next those gentlemen, under the rules of the House, could and perhaps might so proceed as to consume time and prevent the disposal of the bill before adjournment on Saturday next, and for that reason I think the objection of the gentleman from Pennsylvania [Mr. MOORE] was well founded, and I am sure. I do not know what his attitude about the food bill is, but surely I bespeak the sentiments of all those favoring the river and harbor bill in saying we have no disposition to place obstacles to the consideration of the food bill, but the river and harbor bill ought first to be passed. A majority of the House favor it, and it seems to me that my colleague and the House ought to be willing to let it pass before any other bill displaces it.

Mr. KING. Mr. Speaker, will the distinguished gentleman from North Carolina yield for a suggestion?

Mr. KITCHIN. I will.

Mr. KING. For the enlightenment of the gentleman from Pennsylvania, I would like to ask if one of the reasons that led to the passage of this bill before the 1st of July is not the fact that to-day speculators are going all about the country buying up the foodstuffs of the country?

Mr. KITCHIN. That is why we want to get it passed before the crops begin to move, to prevent that.

Mr. MOORE of Pennsylvania. Will the gentleman yield for a question on that line? Is it not true that the exchanges of the country and many of the speculators have already been called in to help regulate the food supply of the country.

Mr. KITCHIN. I do not think so.

Mr. MOORE of Pennsylvania. Will the gentleman yield to me to make a brief statement?

Mr. KITCHIN. In a minute. In reply to my colleague from North Carolina, I desire to say that it was my intention and the intention of other Members to reach this food bill the first of this week. If my colleague will recall, I told him when we were discussing when we should consider the river and harbor bill that I hoped they would get it out of the way by this week, because it was very important that the food bill should be enacted into law as early as possible.

Mr. SMALL. But my colleague will admit——

Mr. KITCHIN. In a moment. The question was as to whether the food bill should precede the river and harbor bill, and after a conference with Mr. LEVER and others on the committee we arranged it so the river and harbor bill could be taken up first—not with a distinct agreement, but certainly with the understanding on my part we would finish the river and harbor bill last week—and we had three days on it, and they sometimes pass those bills in a day. I say further——

Mr. COOPER of Wisconsin. Will the gentleman permit a question?

Mr. KITCHIN. I will.

Mr. COOPER of Wisconsin. I think the food bill ought to be disposed of at the earliest possible opportunity. Could not an arrangement be made of this kind, that the food bill shall temporarily displace the river and harbor bill and that bill should follow immediately after the vote on the food bill?

Mr. KITCHIN. My idea was the river and harbor bill being in order, would follow immediately, and we have an understanding that it should follow immediately.

Mr. STAFFORD. It does not require an understanding, because it would be the unfinished business, unless another order or rule were made.

Mr. KITCHIN. If it would be satisfactory to the gentleman from North Carolina and the gentleman from Tennessee, I would couple with it the request that the river and harbor bill should be the continuing order after the disposition of the food-control bill until it is completed.

Mr. MOORE of Pennsylvania. Will the gentleman yield at that point?

Mr. BARNHART. I want to ask the gentleman from Pennsylvania how 't would interfere with the status or the consideration of the river and harbor bill to temporarily displace it?

Mr. MOORE of Pennsylvania. The gentleman from North Carolina [Mr. WEBB], chairman of the Committee on the Judiciary, has given notice that he expects to call up certain bills that are supposed to be war bills. The gentleman from Georgia [Mr. ADAMSON], chairman of the Committee on Interstate and Foreign Commerce, is perhaps the most insistent chairman on the floor to get recognition for the bills coming from his important committee, and those bills will take time. Now, I say frankly to the gentleman from Indiana [Mr. BARNHART] that if the purpose of the motion or the request of the gentleman from North Carolina [Mr. KITCHIN] is to displace the river and harbor bill by these other bills I shall object to his request. If the request is so made that the river and harbor bill is not to be displaced, I will not object to it. I will say to the gentleman from Indiana that the river and harbor bill has been suggested as a war measure by the War Department, and there is ample evidence to prove that it is a war measure. It is as necessary to carry the grain products of the country on the waterways and relieve the congested railroads for war purposes as it is to pass these other war measures.

Mr. KITCHIN. Let me say to the gentleman from Pennsylvania that I am interested in the passage of both the river and harbor bill and the food bill—the river and harbor bill in some good shape and the food bill in some good shape, both propositions just as they are.

Mr. MOORE of Pennsylvania. One is the carrier for the other; that is all.

Mr. KITCHIN. I know the gentleman is very much interested in the passage of the river and harbor bill. I believe if my request is granted you will get the river and harbor bill through earlier. Here is a request for unanimous consent. You notice some very decided opposition, but I trust not enough to defeat the bill. But you know there is some fighting opposition to the river and harbor bill. You could not take it up Monday, because they would not give you unanimous consent. You could not take it up on Calendar Wednesday. You would lose those two days. There may be some gentleman who is very much in favor of this food bill passing, and may go in and help some of the fellows with a little delay, and then if they force the committee to bring in a rule I imagine, with unanimous-consent day and Calendar Wednesday intervening, it would be 10 days before you would pass the bill.

Mr. MOORE of Pennsylvania. Does not the gentleman think we could conclude the river and harbor bill on Thursday, Friday, or Saturday—three full days?

Mr. KITCHIN. I think we will.

Mr. MOORE of Pennsylvania. Why not make the request that the food bill be taken up immediately after the passage of the river and harbor bill?

Mr. KITCHIN. I believe it is the best way to get through as early as possible.

Mr. HARRISON of Mississippi. Does the gentleman believe it would be satisfactory, in view of the fact that you would have Thursday, Friday, and Saturday to take up and dispose of the river and harbor bill, to couple with his suggestion for unanimous consent that if the river and harbor bill is not finally disposed of by 3 or 4 o'clock on Saturday, the committee shall then rise and vote on the proposition and dispose of it? And then you can take up the proposition——

Mr. STAFFORD. If the gentleman understood the bill he would not make any such request.

Mr. MOORE of Pennsylvania. Will the gentleman modify his request so that it will provide that immediately following the passage of the food bill the river and harbor bill will be considered?

Mr. KITCHIN. Yes.

The SPEAKER. The gentleman from North Carolina [Mr. KITCHIN] asks unanimous consent that on next Monday, immediately after the reading of the Journal and disposition of the business on the Speaker's table, and barring conference reports, that this food bill shall be made the order of the day and the continuing order until it is disposed of. And then it shall be

followed by the river and harbor bill, which, under the same condition, shall be the continuing order until it is disposed of. Now, is there objection?

Mr. HAUGEN. Reserving the right to object——

Mr. CANNON. Mr. Speaker, that would dispose of Calendar Wednesday and also of Monday, as I understand it.

The SPEAKER. Yes; it will dispose of unanimous-consent calendar and suspensions, and so forth, on next Monday, and the Chair would be very much disposed to construe it that it would cut out Calendar Wednesday of next week.

Mr. CANNON. I want to say, so far as the food bill is concerned, that, while I am not in love with it, I have no objection to its consideration, but it is impossible to fix a program now that will possibly pass through in 10 days or 2 weeks.

Mr. HAUGEN. Mr. Speaker, reserving the right to object, I certainly have no desire to delay the passage of this bill. I believe, as stated by other gentlemen, the House should be given an opportunity to consider it at the very earliest moment. However, I desire to have all points of order reserved. With that understanding, I certainly have no objection.

The SPEAKER. The gentleman gives notice that all points of order against that food bill are reserved.

Is there objection to the request of the gentleman from North Carolina [Mr. KITCHIN]?

Mr. STAFFORD. Reserving the right to object, I do not see the necessity of coupling with the request of having the food bill given the right of way the request that the river and harbor bill should be given a privileged status other than it will have by reason of its being unfinished business. There are conference reports that will come in. There are other bills of equal importance, and the river and harbor bill will be the unfinished business. And I therefore object to that part which makes the river and harbor bill a special order regardless of other business.

Mr. KITCHIN. This does not interfere with other reports. I think the request, even if granted, does not make a bit of difference or make any difference in the situation, because without that request it would have the very same——

Mr. STAFFORD. The river and harbor bill has three days remaining this week, and that will come very near completing it.

Mr. DUPRÉ. It will if the gentleman from Wisconsin will not talk too much. [Laughter.]

Mr. STAFFORD. I am very thankful to the gentleman for that gratuitous compliment. The gentleman from Louisiana has talked more on the river and harbor bill than I.

Mr. DUPRÉ. I take issue with you on that.

Mr. McARTHUR. I demand the regular order, Mr. Speaker.

Mr. GARNER. Let me suggest to the gentleman from Wisconsin [Mr. STAFFORD] that this order does not facilitate the passage of the river and harbor bill now.

Mr. KITCHIN. It does not change the situation at all.

The SPEAKER. The regular order is demanded.

Mr. STAFFORD. I object to that part of the request that makes the river and harbor bill a special order.

The SPEAKER. The gentleman from Wisconsin objects to the river and harbor feature of the request. Is there objection to the request of the gentleman from North Carolina [Mr. KITCHIN] to making this food bill in order next Monday after the reading of the Journal, and so forth, and subject to the presentation and disposal of conference reports, and to be the continuing order until it is disposed of?

Mr. MOORE of Pennsylvania. Mr. Speaker, if that is without condition, I object.

The SPEAKER. The gentleman from Pennsylvania objects.

CALENDAR WEDNESDAY.

The SPEAKER. This is Calendar Wednesday.

Mr. ADAMSON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. ADAMSON. The last time we had a Calendar Wednesday the gentleman from North Carolina [Mr. WEBB] had the floor and yielded it. My committee was then called, and by a public arrangement here in the House I yielded to the Committee on Agriculture, with the understanding, although the House did not by vote agree to it, that it was only temporary, and that my committee would be replaced in the call.

The SPEAKER. How did the gentleman's committee get the call if the gentleman from North Carolina had the call?

Mr. ADAMSON. He yielded.

The SPEAKER. Then he yielded to the gentleman as a matter of courtesy.

Mr. ADAMSON. And I yielded to the gentleman from South Carolina [Mr. LEVER], chairman of the Committee on Agriculture. I made the reservation that it was only temporary.

The SPEAKER. You can not make a reservation of that kind.

Mr. CANNON. Did the House agree?

Mr. ADAMSON. I ask that the House replace me in my place before the Committee on Agriculture.

Mr. CURRY of California. I object, Mr. Speaker.

The SPEAKER. The gentleman from California objects.

Mr. STAFFORD. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. STAFFORD. When we last had proceedings under the Calendar Wednesday, did not the call rest with the Committee on the Judiciary?

The SPEAKER. It rested with the Committee on Agriculture, according to the RECORD.

Mr. ADAMSON. That is where I yielded it temporarily.

The SPEAKER. The gentleman from Georgia and the gentleman from North Carolina and no other two gentlemen can make a private agreement to control the House.

Mr. ADAMSON. I admit that, and the gentleman from California declined to do it.

The SPEAKER. The Chair understands he is entirely within his rights. The Clerk will call the committees.

The Clerk called the roll of committees.

PROMOTION OF EXPORT TRADE.

Mr. WEBB (when the Committee on the Judiciary was called). Mr. Speaker, I desire to call up House bill 2316 from the Committee on the Judiciary.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

A bill (H. R. 2316) to promote export trade, and for other purposes.

Be it enacted, etc., That the words "export trade" wherever used in this act mean solely trade or commerce in goods, wares, or merchandise exported, or in the course of being exported, from the United States or any Territory thereof to any foreign nation; but the words "export trade" shall not be deemed to include the production, manufacture, or selling for consumption within the United States or any Territory thereof of such goods, wares, or merchandise, or any act in the course of such production or manufacture.

That the words "trade within the United States" wherever used in this act mean trade or commerce among the several States or in any Territory of the United States, or in the District of Columbia, or between any such Territory and another, or between any such Territory or Territories and any State or States or the District of Columbia, or between the District of Columbia and any State or States.

That the word "association" wherever used in this act means any corporation or combination, by contract or otherwise, of two or more persons, partnerships, or coporations.

SEC. 2. That nothing contained in the act entitled "An act to protect trade and commerce against unlawful restraints and monopolies," approved July 2, 1890, shall be construed as declaring to be illegal an association entered into for the sole purpose of engaging in export trade and actually engaged solely in such export trade, or an agreement made or act done in the course of export trade by such association, provided such association, agreement, or act is not in restraint of trade within the United States, and is not in restraint of the export trade of any domestic competitor of such association: *And provided further*, That such association does not, either in the United States or elsewhere, enter into any agreement, understanding, or conspiracy, or do any act which artificially or intentionally and unduly enhances prices within the United States of commodities of the class exported by such association.

SEC. 3. That nothing contained in section 7 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, shall be construed to forbid the acquisition or ownership by any corporation of the whole or any part of the stock or other capital of any corporation organized solely for the purpose of engaging in export trade, and actually engaged solely in such export trade, unless the effect of such acquisition or ownship may be to restrain trade or substantially lessen competition within the United States.

SEC. 4. That the prohibition against "unfair methods of competition" and the remedies provided for enforcing said prohibition contained in the act entitled "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes," approved September 26, 1914, shall be construed as extending to unfair methods of competition used in export trade against competitors engaged in export trade, even though the acts constituting such unfair methods are done without the territorial jurisdiction of the United States.

SEC. 5. That every association now engaged solely in export trade, within 60 days after the passage of this act, and every association entered into hereafter which engages solely in export trade, within 30 days after its creation, shall file with the Federal Trade Commission a verified written statement setting forth the location of its offices or places of business and the names and addresses of all its officers and of all its stockholders or members, and if a corporation, a copy of its certificate or articles of incorporation and by-laws, and if unincorporated, a copy of its articles of contract or association, and on the 1st day of January of each year thereafter it shall make a like statement of the location of its offices or places of business and the names and addresses of all its officers and of all its stockholders or members and of all amendments to and changes in its articles or certificates of incorporation or in its articles or contracts of association. It shall also furnish to the commission such information as the commission may require as to the organization, business, conduct, practices, management, and relation of other associations, corporations, partnerships, and individuals. Any association which shall fail so to do shall not have the benefit of the provisions of section 2 and section 3 of this act, and it shall also forfeit to the United States the sum of $100 for each and every day of the continuance of such failure, which forfeiture shall be payable into the Treasury of the United States, and shall be recoverable in a civil suit in the name of the United States brought in the district where the association has its principal office, or in any district in which

it shall do business. It shall be the duty of the various district attorneys, under the direction of the Attorney General of the United States, to prosecute for the recovery of the forfeiture. The costs and expenses of such prosecution shall be paid out of the appropriation for the expenses of the courts of the United States.

Whenever the Federal Trade Commission shall have reason to believe that an association or any agreement made or act done by such association is in restraint of trade within the United States or in restraint of the export trade of any domestic competitor of such association, or that an association either in the United States or elsewhere has entered into any agreement, understanding, or conspiracy, or done any act which artificially or intentionally and unduly enhances prices within the United States of commodities of the class exported by such association, it shall summon such association, its officers, and agents to appear before it, and thereafter conduct an investigation into the alleged violations of law. Upon investigation, if it shall conclude that the law has been violated, it may make to such association recommendations for the readjustment of its business, in order that it may thereafter maintain its organization and management and conduct its business in accordance with law. If such association fail to comply with the recommendations of the Federal Trade Commission, said commission shall refer its findings and recommendations to the Attorney General of the United States for such action thereon as he may deem proper.

For the purpose of enforcing these provisions the Federal Trade Commission shall have all the powers, so far as applicable, given it in "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes."

With committee amendments, as follows:

On page 2, in line 4, strike out the word "of" and substitute therefor the word "in."

On page 3, in line 13, strike out the word "ownship" and substitute therefor the word "ownership."

On page 4, in line 10, strike out before the word "contract" the word "of" and insert therefor the word "or," and after the word "contract" strike out the word "or" and substitute therefor the word "of."

On page 4, in line 15, strike out the word "certificates" and substitute therefor the word "certificate"; also strike out in line 16 the word "contracts" and substitute therefor the word "contract."

On page 4, in line 18, strike out the word "the" following the word "to" and substitute therefor the word "its."

On page 4, in line 19, strike out the word "of" and substitute therefor the word "to."

On page 5, in line 18, strike out the word "enhances" and substitute therefor the word "affects."

On page 6, in line 3, strike out the word "fail" and substitute therefor the word "fails."

The SPEAKER. The gentleman from North Carolina is entitled to one hour.

Mr. WEBB. Mr. Speaker, the matter of increasing our export trade has been one of our chief commercial desires in recent years, and various means have been suggested to accomplish this end.

This desire led Congress to insert in the act creating the Federal Trade Commission the following provision:

That the commission shall also have power to investigate, from time to time, trade conditions in and with foreign countries where associations, combinations, or practices of manufacturers, merchants, or traders, or other conditions may affect the foreign trade of the United States and to report to Congress thereon with such recommendations as it deems advisable.

Under this provision the commission went to work and made a comprehensive investigation of competitive conditions affecting our foreign trade, and in the report which they made to Congress they recommend the passage of a law such as is here proposed.

The commission finds from their investigation that the exporter from this country is at a serious disadvantage in the foreign markets where he meets the competition from other countries due to a lack of organized selling agencies such as other countries have with which he is forced to compete for export business.

It has been a matter of serious doubt whether our exporters are permitted under our existing antitrust laws to form a joint selling agency in the export trade. Many eminent lawyers are of the opinion that such a combination for export trade is not prohibited by these laws, but the doubt that exists has been sufficient to restrain any such effort.

This bill seeks to make it legal, if it is not already so, to organize cooperative selling agencies or associations among American exporters. These common selling agencies or associations among American exporters. These common selling agencies or associations for export trade would be separate and distinct organizations for the sole purpose of engaging in export trade and would be made up of stockholders from the various exporting companies or individuals interested in this trade. There are many advantages which could be had by them. Chief among these advantages is the saving in cost to the exporting members of the association.

In order to build up an export trade it is necessary to have the most expert representatives in the foreign fields to introduce and thoroughly advertise our American goods. This involves a large expenditure of money before the trade can be established. A number of our larger enterprises are able to do this alone, and for this reason the proposed law would not greatly benefit these large enterprises, but our smaller manufacturers and merchants would be prohibited from undertaking such an enterprise because of the tremendous costs that it would involve. By this method of organizing these cooperative agencies the smaller exporters would be enabled to combine and share this expense among a number of them. After a foreign business had been established it could be continued at a great saving to the trade which would help our exporters to successfully meet the foreign competition.

As pointed out by the Federal Trade Commission, the other great commercial nations permit, and in some instances encourage, similar organizations for export trade to those authorized by this bill. It is pointed out that in Germany prior to the war there were 600 important combinations to control the market, embracing practically every industry in the Empire. These carried on vigorous campaigns to extend their foreign business, to prevent competition among German producers in foreign markets, and to secure profitable prices.

In France and Belgium syndicates of iron and steel, coal, glass, and other industries were strong factors in handling their foreign trade. In Japan attention is called to their strong export organization of textile manufacturers which is rapidly capturing the cotton-goods trade of northern China, and to their nation-wide "tea council" which controls its tea trade. In England their associations of merchants and manufacturers dominate the foreign business.

This brief mention of conditions in other countries will suffice to show how keen the competition is which our exporters are forced to meet.

I do not deem that it is necessary to make an extended argument on this bill, as it is the same bill practically that passed the House on the 2d day of last September by a vote of 199 to 25.

I believe that every Member of this House who is interested in the progress and health of our foreign export trade realizes that something in the nature of this bill must be passed in order to secure that desired end.

This bill is recommended by the President very heartily. It is recommended by the Federal Trade Commission, who, after making an investigation for a year and a half, have come to the conclusion that some such bill as this is necessary for our foreign export trade. It is recommended by the Secretary of Commerce, Mr. Redfield. It passed the House, as I said, by an overwhelming vote last September, and has been rereported in the very words that you have before you now, favorably, and I believe unanimously, by the Committee on the Judiciary.

Mr. WINGO. Mr. Speaker, will the gentleman yield for a question?

Mr. WEBB. Yes.

Mr. WINGO. Does the bill which the gentleman has now called up contain the features covered by the amendment I offered to the bill that was formerly passed by the House?

Mr. WEBB. Yes; in the language added, prohibiting the selling for consumption within the United States.

Mr. WINGO. The gentleman will recall the objection to the bill then?

Mr. WEBB. Yes; and this language covers the gentleman's amendment.

Mr. WINGO. That question is taken care of?

Mr. WEBB. Certainly. It does not permit any one of these foreign agencies to sell anything in the United States. We can confine them absolutely to foreign operations.

I may say in a word, Mr. Speaker, that practically all of the great commercial nations of the earth permit their manufacturers and exporters to do exactly what is provided for in this bill, and it has long been realized as unfair to our manufacturers and exporters to put them in competition in foreign countries with well-trained and highly organized corporations that are allowed by our competitors' countries. I have often illustrated that by saying you might as well expect an unorganized rabble to go up against a well-organized army as to expect unorganized individuals in this country to maintain their selling agencies throughout the world when they come in competition with the corporations of all countries whose output represents the production of their entire nation.

Mr. SLAYDEN. Mr. Speaker, will the gentleman permit a question?

Mr. WEBB. I will.

Mr. SLAYDEN. Is the gentleman absolutely convinced that some authority like this is necessary before our export merchants can compete effectively in foreign countries?

Mr. WEBB. That has been absolutely demonstrated by the trade commission, and by every other organization that has had to do with export business. I could give illustration after illustration where our American exporters are put out of business, as we would say—undersold—because they have to act individually, whereas our competitors have a combination of well-

organized and highly trained men, and this permits our competitors to reduce tremendously the overhead charges of their distribution. Why, I understand that England has in New York a buying agency which buys for fourteen hundred different corporations in that country.

Germany has 600 of these selling agencies, which control practically the entire output of the German Empire, while we are an unorganized rabble, as it were, in our exportation agencies, all afraid to specialize and organize, because it is feared that the Sherman antitrust law might be called into operation to prosecute such an organization. For my own part I never have believed that the Sherman antitrust law was intended to control the operations of American citizens in export trade, when their business is confined entirely to foreign countries; but there has been such doubt about it that our foreign exporters and manufacturers have been too timid to form these highly important organizations which would put them on a level with their foreign competitors.

Mr. CANNON. I want to ask the gentleman a question in perfect good faith, for information.

Mr. WEBB. I am quite sure of that.

Mr. CANNON. If I understand this bill, it would permit the formation of trusts, agreements, and so forth, to capture the export trade, or compete with the world in our exports.

Mr. WEBB. Practically. Here is what it does——

Mr. CANNON. Now, question No. 2: These trusts, when formed, will presumably be corporations, of course. Is this confined to corporations?

Mr. WEBB. No; it also authorizes partnerships or associations.

Mr. CANNON. Partnerships or individuals.

Mr. WEBB. Yes.

Mr. CANNON. These trusts can not manufacture for the home market?

Mr. WEBB. Or for any other market.

Mr. CANNON. They can for the foreign market.

Mr. WEBB. They can not produce, manufacture, or sell for consumption within the United States.

Mr. CANNON. Precisely; that is the home market. They manufacture in the United States, do they not?

Mr. WEBB. No.

Mr. CANNON. Well, then, what is the use of it?

Mr. WEBB. It is not intended to be a manufacturing association. A manufacturing association can not form one of these organizations, because the language is this:

But the words "export trade" shall not be deemed to include the production, manufacture, or selling for consumption within the United States or any Territory thereof.

This is what it does: It allows the manufacturers of the country to take stock in a common selling agency for the purpose of selling goods anywhere in the world outside of this country.

Mr. CANNON. Can they not manufacture?

Mr. WEBB. No.

Mr. CANNON. Under that language such a trust might include every corporation, or half of the corporations, or any number of them, in the manufacture of the products that they export, but they can not sell in the United States. Am I correct?

Mr. WEBB. That is correct; and I will say further that if the combination for export trade affects unduly or artificially the prices in the United States, then they come within the Sherman antitrust law. I think this is the most carefully guarded and hedged-about bill that we could possibly present.

Mr. CANNON. Now, I want to understand, in perfect good faith——

Mr. WEBB. That is all right.

Mr. CANNON. Suppose that one-half or two-thirds of the people who produce under the trust agreement, in the United States, will not be at liberty to sell their product in the United States, but will be at liberty to sell to the people in the other countries that we are not bound to look after. That would leave a smaller number of people who would operate under the Sherman Antitrust Act for the home market, would it not?

Mr. WEBB. Of course every individual has a right to sell to the export trade, and does now.

Mr. CANNON. But I am speaking of the home market. If half of our people should manufacture in the United States, employing their labor in the United States, and could only sell in the world outside, that would leave the other half with so much less power of production for the home market, would it not?

Mr. WEBB. That would depend on whether the foreign market was sufficient to take all that might be manufactured. The law of supply and demand would control that, of course.

Mr. CANNON. Would it when one-half of the people producing in the United States were in this trust to capture the markets of the world? Would not that leave the other half free from that competition?

Mr. WEBB. Provided the rest of the world does not compete with the selling organization which the gentleman has just described. But if it does compete, it will keep the prices down both here and abroad, as it does now.

Mr. CANNON. Yes; but there are several provisos there. Now, I want to ask the gentleman whether these foreigners who form these trusts for production, and these selling agencies also, are shut out of their own home market?

Mr. WEBB. I do not know whether I catch the gentleman's question.

Mr. CANNON. It is alleged by the gentleman, and I presume truly, that foreign countries form trusts for production and sale. That is the allegation, and I presume it is correct.

Mr. WEBB. Yes.

Mr. CANNON. And that includes perhaps many countries, or several countries, as the case may be. Now, these goods that are created by these trusts or by labor controlled by these trusts for the foreign trade—can they sell their own products in the home trade?

Mr. WEBB. I can not answer the gentleman in detail about it, but nearly all of the great nations have laws in restraint of trade in their territory very much similar to ours. I do not think their moral business standard is quite as high as ours, but they all have laws against trusts and monopolies.

Mr. CANNON. Our trusts under this bill can not sell in the home market, but can sell cheaper abroad. Now, the foreign trusts we compete with can sell in the home market—England, Germany, and France. Has the gentleman any adequate information on that point?

Mr. WEBB. No; except that all the great countries have laws against monopolies and trusts, except Germany, which permits certain cartels, and even Germany is in partnership with some of those trusts and gives them preferential freight rates.

Mr. CANNON. It is lawful for an English partnership or a corporation or a number of them to cooperate under trust agreements for foreign trade?

Mr. WEBB. Yes.

Mr. CANNON. What I want to know is whether that same trust can sell in England?

Mr. WEBB. I think they will if their sale does not operate in restraint of trade and create a monopoly. We do not allow that in this bill.

Mr. CANNON. Does the gentleman think that this trust will amount to much for the foreign trade?

Mr. WEBB. The combination to be formed under this bill?

Mr. CANNON. Yes.

Mr. WEBB. Yes; I do not think that our foreign exporters can live unless they are put on the same level with foreign competitors. They say that they are utterly helpless unless they get this provision.

Mr. CANNON. It is against the law for them to form a trust and enter into a foreign trade now?

Mr. WEBB. I doubt very much whether it is. A great many able lawyers maintain that the Sherman law never was intended to apply to citizens doing business in foreign countries, that it never was intended to have extra territorial effect.

Mr. DILLON. Will the gentleman yield?

Mr. WEBB. Yes.

Mr. DILLON. I wish the gentleman might explain the difference between this bill and the bill that was before the Sixty-fourth Congress.

Mr. WEBB. The bill that was passed last September? The main difference is on page 2, line 21; this language is added:

and is not in restraint of the export trade of any domestic competitor of such association.

Now, on page 5, beginning at line 11, the remainder of the paragraph is new, put in to safeguard what we had already done to give the Federal Trade Commission very drastic powers over this matter.

Mr. DILLON. Does the gentleman think, in his judgment, that this will meet the opposition that many Members urged in the bill at that time?

Mr. WEBB. I think the debate last fall did a great deal of good. The amendments I have read have been put in in response to that demand, and the gentleman from South Dakota is one of them.

Mr. CANNON. One further question, if the gentleman will permit.

Mr. WEBB. I will yield to the gentleman.

Mr. CANNON. Has the gentleman anywhere in this bill prohibited a stockholder from owning stock in corporations, or individuals who own stock in a corporation for foreign trade, from being stockholders in corporations for home trade?

Mr. WEBB. No.

Mr. CANNON. Does not the gentleman think that ought to be done?

Mr. WEBB. No; we have set a parallel case, for example, to that in order to capture the foreign trade, and I think the gentleman from Illinois perhaps voted for it. We allow the national banks in the United States to combine, if they want to, and have a common stock ownership in foreign banks, and by that means we are establishing banks in all of the foreign countries that will help the trade that I hope will be built up under this bill.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. WEBB. Yes.

Mr. MOORE of Pennsylvania. I simply want to ask the gentleman if he will yield me five minutes?

Mr. WEBB. Yes; later on.

The Committee on the Judiciary of the House in reporting this bill to the Sixty-fourth Congress gave the following reasons for its passage:

The object of this bill is to aid and encourage our manufacturers and producers to extend our foreign trade.

The bill seeks to do this by permitting the organization of cooperative selling agencies or associations among American exporters in order that they may meet foreign competition on equal terms in international commerce.

The necessity for this legislation rests largely upon the doubt that exists in the minds of our exporters as to the correct construction that should be placed upon existing antitrust laws as applied to organizations engaged in export trade.

It is not the purpose here to make a legal argument upon the question whether our existing antitrust laws do or do not permit the things authorized to be done by this bill. The Federal Trade Commission after a careful study of trade conditions has not been able to give clear assurance to the exporting interests that the formation of common selling agencies for the foreign trade, by contract, made between different manufacturers or producers would not come within the prohibitions of existing law. Sufficient doubt exists in the minds of those engaged in this trade to prevent them from undertaking it, and the practical effect is the same as if it had been settled that such organizations are prohibited by existing laws.

Our exporters are forced to meet sharp competition in the foreign trade. To successfully do this it is necessary to have the most expert representatives abroad and to thoroughly advertise our goods. A few of our large enterprises may be able to stand such expense alone, but our smaller producers and manufacturers can not. This would, however, be made possible by permitting a number of such concerns to combine in employing one selling agency. While one small concern could not maintain a selling agency at a cost, say, of $100,000 a year, 50 such concerns might be able to bear each one-fiftieth of this expense. One prime result of the common selling agency would be to reduce the cost of marketing the product and to that extent help the exporter's profits and enable him the more easily to meet foreign competition.

We were cited to a large electrical contract in Chile about two years ago. The German firm or combination, during a period of three or four years, spent, it is estimated, $60,000 in drawing plans and specifications, which were submitted to the Chilean people, while three of our concerns submitted three different plans. The exact amount which each of our concerns spent is not given, but it was three times the amount they should have spent in such close competition.

All the great commercial nations permit similar organizations to those allowed by this bill. Some of these countries grant additional advantages in the way of preferential freight rates for export shipment; direct ocean transportation controlled by powerful international combinations of foreign shipowners who discriminate against American shippers, and well-organized banking facilities to take care of their foreign credits with main banks in the chief cities of England and Europe, and branch banks in the chief countries where trade is sought. These banks give their foreign exporters information, finance their transactions, and give them every aid possible.

Before the war Germany had about 600 such agencies, which practically handled the entire export trade of all her industries. The dye-color industry of the Empire worked as a unit under an agreement in the foreign trade. The same is true with regard to her foreign trade in electrical equipment, coal and coke, iron and steel. France and Belgium had their strong syndicate to sell their iron, steel, coal, glass, etc., in foreign countries. Japan has resorted to the same method, and by its aid has built up a large trade in cotton goods in northern China. England's strong mercantile associations have been gradually built up for the last 50 years, and are carefully fostered in every way possible to the disadvantage of her rivals.

In order that this country may hold the foreign trade which has been acquired during the European war and successfully meet the competition that will be offered when the war is over, our exporters must be in a position to compete in the cheapest and most effectual manner.

In order to do business in the countries of South America, Africa, China, and others, we will have to compete with these highly organized selling agencies. It is not only more economical to combine the efforts of a number of producers under one selling agency, but by this means we can prevent our own merchants from cutthroat bidding against each other for the foreign business. These foreign selling agents also act as buying agents, and when they come into our market for commodities which we have to export they play one exporter against another for the purpose of hammering down the price of our goods, which accounts in many cases for the fact that goods are sold for export cheaper than the same goods are sold in our open market.

We are informed that combinations of British coal brokers fix the contract price for bunkering ships at Newport News, and by these methods the contract price has been fixed at 5 to 7 cents per ton below the domestic price. In the same way the copper trade of the world has been ruled by a vast German metal-buying organization, which has subsidiaries and affiliated companies in all the leading nations, and through its operations for a number of years has bought millions of tons of American copper at prices averaging nearly a cent a pound below the price paid by American consumers.

The bill is drawn so as to leave in full force our antitrust laws as applied to our own markets and as affecting different American exporters in their dealings with each other. Export trade is, by force of the methods adopted by other leading nations, largely a matter of competition between nations. Our home market is to be determined by competition between the several producers and manufacturers.

In order to safeguard the home market it is provided in the bill that the associations authorized by the bill must be for the "sole purpose of engaging in export trade and actually engaged solely in such trade, or an agreement made or act done in the course of export trade by such association, provided such association, agreement, or act is not in restraint of trade within the United States."

Permission is granted to own the whole or any part of the stock of a corporation organized solely for the purpose of engaging in export trade, etc., under the terms of the Clayton Act only when such acquisition does not have the effect of restraining trade or substantially lessening competition within the United States in articles of the kind exported by the association whose stock is acquired or controlled. And, further, by section 5 it is required repeatedly to inform the Government of the manner in which it is availing itself of the privileges granted by the bill.

The bill does not authorize any violation of the present antitrust laws. There are many great lawyers who think there is nothing in existing laws to prevent American manufacturers and exporters from combining in whatever manner they please in foreign countries to dispose of their products; but other lawyers take the position that there is doubt about this power, and in order to absolutely clarify the situation and in common fairness to our American exporters, we present this bill. The bill prohibits the slightest violation of our antitrust laws within the United States, but makes it clear that American exporters doing business in foreign countries are to be allowed to do business in those foreign countries according to the foreign laws.

Few, if any, foreign countries compel their exporters to observe business standards prescribed by our antitrust laws, then why should we require our exporters to observe a higher and stricter standard of conduct than their foreign competitors are required to observe? In other words, by this bill we permit our American exporters to meet their foreign rivals on foreign soil on equal terms.

The bill here reported has the indorsement of the Federal Trade Commission and also the Secretary of Commerce.

Your committee is of the opinion that such a measure will be much needed to meet trade conditions which are likely to follow a declaration of peace among the great commercial nations of Europe now at war, and earnestly recommend its enactment at an early date, in order that our exporters may fortify themselves in time to meet the expected competition.

Mr. KITCHIN. Will the gentleman yield to me?

Mr. WEBB. I yield to the gentleman from North Carolina.

ORDER OF BUSINESS.

Mr. KITCHIN. Mr. Speaker, I desire to renew my request of a moment ago that on next Monday, immediately after the reading of the Journal and the disposition of matters on the Speaker's table, it shall be in order to consider the bill (H. R. 4961) for the conservation of food and fuel, and that it be the continuing order of the House until concluded, not to interfere with conference reports.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that on next Monday, after the reading of the Journal and the disposition of business on the Speaker's table, House bill 4961 shall be in order and shall be a continuing order until finished, not to interfere with conference reports, and so forth. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object, I understand the chairman of the Ways and Means Committee has had some conference with the chairman of the Rivers and Harbors Committee. Is it understood that the river and harbor bill will have a fair chance of going on this week?

Mr. KITCHIN. Yes; it will be in order immediately after the Glass bill is disposed of.

Mr. CANNON. Does that bind all of us?

Mr. KITCHIN. No; it does not bind anybody.

The SPEAKER. The river and harbor bill will be in order to-day as soon as the Calendar Wednesday business is disposed of.

Mr. KITCHIN. It will be in order as soon as the conference report on the Glass bill is concluded.

The SPEAKER. Is there objection?

Mr. SMALL. Reserving the right to object—and I do not intend to object—I desire to make this statement: Certainly the chairman of the Committee on Rivers and Harbors—and I believe I speak for the entire committee—has no disposition to oppose consideration of the food bill, which many regard as of vital importance. At the same time they are convinced that the river and harbor appropriation bill is an important piece of legislation which ought to be passed, and, in consideration of the statement of the gentleman from North Carolina [Mr. KITCHIN], I shall not make any further objection, but I do wish to put up to the fairness of the House the suggestion that when the river and harbor bill shall be under consideration, if it shall be taken up this afternoon because the calendar for Wednesday is exhausted, or if it shall be taken up to-morrow after the conference report upon the amendments to the Federal reserve act shall have been disposed of, and the unanimous-

consent order for a speech on Flag Day shall have been concluded, Members of the House, both those who favor the bill and those who may be critics of the bill, may deal fairly with it, that there may be ample discussion upon the merits but no time unduly consumed. If there is that spirit of fairness, with an opportunity to everyone to discuss the items in the bill as they may desire, and if Members of the House will remain in the hall, we shall have no difficulty in passing the bill by Saturday afternoon.

Mr. CANNON. Who is to pass upon the question of fairness?

Mr. SMALL. If I had to pass on the fairness of the gentleman from Illinois in connection with the river and harbor bill I would give him a clean certificate. And I am not imputing unfairness to anyone else, but in their enthusiasm critics of the bill may be disposed to take more time than is necessary, and it is that to which I refer. I hope we may be able to pass the bill this week.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina? [After a pause.] The Chair hears none, and it is so ordered.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 3971) making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes, and had agreed to the amendment of the House of Representatives to the amendment of the Senate numbered 68 to the said bill.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message, in writing, from the President of the United States was communicated to the House of Representatives by Mr. Sharkey, one of his secretaries, who also informed the House of Representatives that the President had approved and signed joint resolution and bills of the following titles:

On June 9, 1917:

H. J. Res. 94. Joint resolution authorizing the Board of Regents of the Smithsonian Institution to permit the Secretary of War to erect temporary buildings in the Smithsonian Grounds.

On June 12, 1917:

H. R. 11. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1918, and for other purposes; and

S. 2133. An act to amend an act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, and for other purposes.

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 291. An act to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes.

HOUR OF MEETING TO-MORROW.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow. Is there objection?

There was no objection.

JOURNAL OF THE EXECUTIVE COUNCIL OF PORTO RICO (H. DOC. NO. 184).

The SPEAKER laid before the House the following message from the President of the United States, which was read and, with the accompanying documents, ordered printed and referred to the Committee on Insular Affairs:

THE WHITE HOUSE,
Washington, June 13, 1917.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIR: As required by section 19 of an act of Congress, entitled "An act temporarily to provide revenues and a civil government for Porto Rico, and for other purposes," approved April 12, 1900, I have the honor to transmit herewith a copy of the Journal of the Executive Council of Porto Rico for the third session of the eighth legislative assembly, beginning February 14 and ending April 12, 1917.

Very respectfully, WOODROW WILSON.

PROMOTION OF EXPORT TRADE.

Mr. WEBB. Mr. Speaker, I understand that the gentleman from Minnesota, who, with two of his colleagues, Mr. MORGAN and Mr. NELSON, has filed minority views, is entitled to an hour.

The SPEAKER. Yes.

Mr. WEBB. Then I desire to reserve the remainder of my time and let the gentleman from Minnesota consume some of his.

The SPEAKER. The gentleman from Minnesota is recognized for one hour.

Mr. VOLSTEAD. Mr. Speaker, it has been suggested that this is a war measure. I am not able to understand on what theory that suggestion is made. This is a measure that we ought to take up when we can have ample time to consider it. No false claims should be made to divert our attention from its real character. It is not a war measure. It is a very far-reaching bill, and it is one that I should like very much the Members of the House to thoroughly understand. I believe if they really understood the effect of it, they would not vote for it. If you pass this bill, you will in effect wipe from the statute books the Sherman antitrust law. I do not believe there is the slightest doubt of that being its practical effect. I do not consider that the provisions which are in the bill prohibiting restraints of trade as of any value. What it does is this: You create or authorize the creation of organizations that in themselves will of necessity practically nullify the Sherman Act. I want this House to understand that this bill, if it becomes a law will authorize every person, partnership, and corporation engaged in any line of trade to combine, through a corporation or by an oral or written contract, for the purpose of carrying on export trade. When you make such a combination you can not avoid affecting the domestic trade. It will follow necessarily that an agreement to control the foreign trade will react upon the domestic trade.

The two are so closely interwoven that the control of one is impossible without controlling the other. To illustrate. The grain trade of the Northwest is largely handled by Minneapolis, Chicago, Milwaukee, Buffalo, and New York. This bill authorizes all of the millers and grain buyers of those cities to form a combination to control every bushel of grain and every pound of flour shipped to a foreign country. Before they ship abroad they have to buy. You must have something to sell before you can sell it. When they form this organization for export they must arrange in some way to secure the grain and flour to export. They will have to buy it, and in doing that they will fix the price to be paid so that it can be exported. Anyone who knows anything about the grain trade knows that you can not keep separate the wheat bought for home consumption from that bought for export. You may attempt to put language in the act to keep the two separate. It can not be done. In fixing the price for the foreign trade the combination will fix at the same time the price for the domestic trade. It could not avoid it if it tried. Then if there is a shortage of grain in one locality and a surplus in another, the combination may so manipulate by taking grain for export from some particular locality as to raise or lower it whenever it may choose. That is permitted. There can be no question about it.

The same would be true, for instance, with shoes. There are manufacturers of shoes at St. Louis, Minneapolis, Chicago, and a number of other points East and West. Every shoe man can combine under this bill. He is authorized to do it, not only by buying stock in another corporation but by an agreement with others. This will authorize them to consult not only as to prices but as to all matters affecting the trade, both domestic and foreign. They tell us that we must have these combinations to meet like foreign combinations in the foreign trade. Is there any real argument in favor of it upon that ground? The Federal Trade Commission has examined into this matter quite fully. I filed a minority report, in which I called attention briefly to some of the things that they have reported. There are no combinations in the foreign trade against which complaint can fairly be made. There are some, but nearly all of them have been built by American capital and American brains. Our American corporations engaged in the foreign trade are the chief offenders, not foreign corporations or foreign monopolies. Are you willing to authorize another such combination as the one to which the Steel Trust is a party to in regard to steel rails? They went into arrangements with the Belgian, English, and other producers to parcel out the world's trade

in steel rails, and for the last twenty-odd years these men have kept steady the price of rails at $28 a ton by means of this combination in the foreign trade, a combination such as they now ask us to make legal as to every industry in this country.

They said in that contract that the producers in the United States might sell on this continent but must not sell in Europe, and that the European producers must not sell in the United States. They can compete, however, in the South American trade, but there must be no competition either here or in Europe, and they have maintained that combination for many years. Let me call attention to this question of foreign cartels or foreign combinations. Are they such as the gentleman from North Carolina urges upon us? The Federal Trade Commission, after making a very exhaustive examination, are reluctantly, as it would appear, compelled to admit that they are unable to find any cartels in the foreign trade that seriously interfere with our commerce. They issued a report in two large volumes as a summary of the general situation so far as they are able to obtain it from the exporters of this country; they say on page 415 of that report:

The export commission houses, manufacturers' export agents, etc., who come more directly in contact with foreign buying combinations than any other class, also furnish practically no information on the subject. One of them says: "During a long experience promoting the sale of manufactured goods in many countries we have not found such conditions which work any hardship. In certain raw material this might apply, but doubtful to any extent."

The Trade Commission after raking the world for evidence to bolster up this theory are compelled to admit the falsity of it. Still it is doing duty to-day because so often repeated that it is believed. There is another statement in that same report that is interesting. It calls attention to the fact that German authors in discussing the trust evil only mention American cartels, not the cartels of Germany but the cartels of the United States, cartels engineered by our men and financed by our money. The supporters of this bill tell us foreign cartels and combinations have the assistance of their governments. There is one instance, the German potash syndicate and Germany's participation in the mining of coal for its own railroads, I am not aware that anything else can be pointed to.

They urge that foreign railroads favor export trade, but that it is true in this country our railroad rates have for years favored the export trade. There is nothing in that at all. They complain that foreign governments have commercial agencies. They have. They have a consular system extending all over this world, just as we have; but is that any reason why these combinations should be permitted, and why we should destroy competition at home by authorizing monopolies? But I realize I am speaking to deaf ears—at least I am afraid I am. A few days ago at a meeting in New York Mr. Perkins and other great financiers made the statement, openly, triumphantly, that the time for competition had gone. We are told that we are not to have any more competition. This administration has done everything it could to destroy it. It is deaf to the constant appeal against the oppression due to the extortionate prices dictated by trusts and combinations. It appealed to the American people four years ago, promising, if given power, that it would put the man in jail who robbed the public by trust methods. But what is it doing? Passing bills to repeal the law under which trust offenders can be put in jail. It is so drawn that no one could ever be convicted under it.

Under this bill it is no offense to depress prices in the domestic market. You authorize that; but if prices are enhanced—be artificially or intentionally and unduly enhanced—you may be asked to answer. When would you ever convict anybody on that kind of a charge? Why, never; and you do not want to convict. You propose to throw the thing wide open and try to excuse yourself by the false claim that this is the method pursued in foreign countries. It is not anything of the kind. As the years have gone by they have realized in foreign countries that competition is necessary and have endeavored to strengthen the law against trusts, but in this country we are trying to wipe it out. That is what we are doing, and that is all this bill will ever accomplish. This is not a war measure; this is nothing but a covert attack upon the Sherman Antitrust Act. [Applause.]

Mr. Speaker, I reserve the balance of my time.

Mr. WEBB. Will the gentleman use some more time now?

Mr. VOLSTEAD. I do not know just who wants to talk, but there are one or two parties who have called my attention to the fact that they desire to be heard. If the gentleman will consume some of his time now, I will see about it.

Mr. WEBB. Mr. Speaker, I yield five minutes to the gentleman from Ohio [Mr. GARD].

Mr. GARD. Mr. Speaker, I believe this bill can be justified both upon legal and upon business grounds. In the first place, speaking of the legal grounds, it is sought to make clear the attitude of the United States through its legislative expression as to just what selling agencies may do. I think the only precedent we have is the case of the American Banana Co. against The United Fruit Co., appearing in volume 213 of the United States Reports, at page 347 and following. On page 348 there appears a portion of the syllabus in which it says:

Prohibitions of the Sherman Antitrust Act of July 2, 1890, do not extend to acts done in foreign countries even though done by citizens of the United States and injuriously affecting other citizens of the United States.

I therefore do not believe that that which it is sought to confer by this act is prohibited by the Sherman Act. But nevertheless it is eminently desirable that it be definitely known whether this is or is not prohibited. So that the legal aspect of this matter is to once and for all make known by legislative enactment that that which is provided for in this bill is not in contravention of the Sherman Act, of the extensions given to it by the so-called Clayton Act, or of the Federal Trade Commission law.

Something was said in debate a moment ago about this act including domestic production. The language of this bill—the material part of it—is that the words "export trade" wherever used in this act mean solely trade or commerce in goods, wares, or merchandise exported or in the course of being exported from the United States or any Territory thereof to any foreign nation. So it is not a question of production. It is not a question of manufacture, but it is a question of sales agency alone.

Mr. Speaker, the object of the bill is not to restrict in any way the very beneficial results of the antitrust legislation which we have passed, but it is to allow the American business man to fairly compete in foreign countries with the business men of foreign countries.

Now, the gentleman from Minnesota [Mr. VOLSTEAD] has had in his mind some idea that this proposed act will allow the fixing of prices here at home. But surely he does not read, if he so maintains seriously, the language which says that this shall not apply to the production, manufacture, or selling for consumption within the United States or any Territory such goods, wares, or merchandise, or any act in the course of such production or manufacture. The gist of the bill is, Mr. Speaker, that the American business man be allowed the same latitude in his business in foreign countries as the other countries themselves have, and no more.

The position of the United States can not longer be regarded as self-sufficient or as insular. Whether we view it as a war measure or not—and I am frank to say that I do not—but whether we view it as a war measure or not, we must understand that in the years to come the United States must go into the great countries of the world to sell its products; that the business destiny of the United States can not be limited by the Atlantic or the Pacific Ocean or our territorial possessions, but that we must go into the markets of the world, that we must build up an export trade, and with that export trade must sell in foreign countries the goods honestly manufactured in this country.

The purpose of this bill is merely to allow the manufacturers of the United States the privilege of standing upon the same business base as manufacturers of other countries; that the Congress of the United States declares it is not unlawful for manufacturers in the United States to create a selling agency—not a manufacturing agency; not a producing agency; not an agency contravening any United States trust laws—but a sales agency.

Mr. FESS. Will my colleague yield right there?

Mr. GARD. Yes.

Mr. FESS. I have heard it remarked that this law will permit us to do things in Europe that if they were done here would be unlawful. Is not there some embarrassing compromise in that statement?

Mr. GARD. I think that statement is not true. I think the real idea of the bill, that the authority conveyed by the bill, as I have said——

The SPEAKER pro tempore. The time of the gentleman from Ohio has expired.

Mr. WEBB. I yield one more minute to the gentleman in order that he may answer the question.

Mr. GARD (continuing). Is to allow manufacturers to establish a selling agency in foreign countries. And it is not a matter which affects the great business concerns of the country, because they have already large selling agencies there, but it is permissive of the small concerns to combine with one another in order that they may mutually contribute to the expenses of a selling agency. In other words, that one man may represent two or three business concerns of the United States,

say, in a South American country, and he may bring to the attention of merchants and business men in that country the merits of the things he represents. In other words, a combination for sale and not a combination in restraint of trade.

Mr. FESS. Would the gentleman yield to another question?

Mr. GARD. If I have time I would be very glad to yield.

Mr. FESS. I have heard this statement also. I am in favor of this bill, I think, but I have heard some statements that are a little compromising. This statement has been made, that we permit combinations in Europe, with a European cartel——

The SPEAKER pro tempore. The time of the gentleman from Ohio [Mr. GARD] has again expired.

Mr. WEBB. I yield to the gentleman one minute more.

Mr. FESS (continuing). But we forbid the competition here at home. For example, we allow our organization to compete with an organization in Europe, but we will not allow our organization to compete with the same organization selling in this country. Is that true?

Mr. GARD. That is true. This law has no application at all to the United States, because it is still restrictive of all transactions in the United States prohibited by the Sherman law, the Clayton law, and the Federal Trade Commission law. But in so far as the extension of our commerce in foreign countries is concerned, it permits the creation of a mutual selling agency, and that is the sum and substance of the whole bill.

Mr. ROSE. Mr. Speaker, will the gentleman permit me one question?

Mr. GARD. Yes.

Mr. ROSE. Does not the United States Steel Corporation have such combinations or cartels now in foreign countries?

Mr. GARD. I am not acquainted with that.

The SPEAKER pro tempore. The time of the gentleman from Ohio has expired.

Mr. WEBB. Mr. Speaker, in answer to that question I will say to my friend from Pennsylvania that this bill has been before the Committee on the Judiciary for practically two years, and we have never had a suggestion from the United States Steel Corporation or the International Harvester Co. or the Standard Oil Co. or any of that class of the biggest corporations in the United States advocating it at all. The fact is that they do not care for it, so far as they are concerned; they do not want it. They are able to take care of themselves throughout the world without it. It is the little fellows that need it in order that they may carry their goods to the farthest ends of the earth.

I have in my possession hundreds and thousands of letters and telegrams from little business concerns all over the country begging to be permitted to form these selling agencies, so that their overhead charges may be reduced and that they may be enabled to capture some part of the world's trade.

Mr. VOLSTEAD. Mr. Speaker, will the gentleman yield?

Mr. WEBB. Yes.

Mr. VOLSTEAD. Has the gentleman read the report of the Trade Commission, showing that the big concerns are the ones that are demanding it more unanimously than the smaller ones?

Mr. WEBB. I have no report that shows that. I have a report signed by Mr. Harris and Mr. Parry and Mr. Davies and Mr. Rublee showing how it will help small organizations, but there is no word there as to how it will help big business. The gentleman knows that big business already has its selling agencies throughout the world. These big concerns do not care anything about this. It is the little fellows that want to be permitted to combine their capital and establish selling agencies so that they can compete in the markets of the world.

Mr. Speaker, I yield to the gentleman from New York [Mr. HICKS].

The SPEAKER pro tempore. The gentleman from New York is recognized for five minutes.

Mr. HICKS. Mr. Speaker, for years the American people have looked forward with confident hope and expectation to the time when American products might occupy a commanding position in the markets of the republics to the south of us. In my judgment this bill will hasten that day. Our exporters in competing with their foreign competitors have been handicapped by reason of three great factors which are essential to the development of an export trade. One was the lack of proper banking facilities. One was the lack of proper transportation facilities, and one was the inability of the exporters to unite and cooperate with their coproducers in America. By the extension of our banking system and the enlargement of old steamship lines and the establishment of new ones these two disadvantages have largely been removed. The passage of this bill will overcome the third hindrance. The American exporter will be placed upon a fair basis with his foreign competitor, and whenever you give American enterprise, backed by American genius and American energy and American inventive talent, an equal chance, it means the supremacy of the American flag in every market of the world. [Applause.]

Mr. WEBB. Mr. Speaker, I yield five minutes to my colleague on the committee [Mr. SUMNERS].

The SPEAKER pro tempore. The gentleman from Texas is recognized for five minutes.

Mr. SUMNERS. Mr. Speaker, this bill, instead of contributing to the development of trusts, seems to be the only possible escape from the passage of the export business of America to great trusts. In export trade the distance between the point of production and the point of market is so great that the little concerns can not bridge the distance. The irresistible economic tendency of our present condition is to form great corporations which can bridge the distance and reach to the markets.

As has been stated by one of my colleagues, these are purely selling organizations which are contemplated. The purpose of this bill is to permit the little concerns to have access to the markets of the world. Whether or not such an organization as is by this bill authorized would have within it some of the trust features is a matter of speculation and honest difference of opinion, but I do not see, as I view the situation and the conditions which we have reached in the evolution of trade and commerce, how any gentleman can hope that the little exporting concern can live unless it is permitted to pool its strength with other little concerns, so that they together with their combined strength may be able to send their agents to the markets of the world and sell the products of the little businesses. This bill has nothing to do with production or domestic sales. It merely authorizes the organization of a joint selling agency for foreign sales. When we come to consider a matter of this sort, it is not a question as to whether or not there are involved some possibilities which we would be glad to have eliminated, but it is a choice between present conditions and those proposed to be created. The great Steel Trust does not need such an organization as this bill authorizes, because it reaches from the mine to the man who wants to buy. The Standard Oil Co. does not need such an organization as this. But gentlemen have in mind many little corporations in their own districts that are absolutely shut off from foreign markets as completely as though we put a law upon the statute books of the United States which prohibited them from entering the markets of the world. Economically they are prohibited. This bill gives them a chance to live.

That is the only point, Mr. Speaker, that I wanted to make, and I yield back the balance of my time. [Applause.]

Mr. WEBB. Mr. Speaker, I yield five minutes to the gentleman from Pennsylvania [Mr. GRAHAM].

The SPEAKER pro tempore. The gentleman from Pennsylvania is recognized for five minutes.

Mr. GRAHAM of Pennsylvania. Mr. Speaker, this bill is in the line of progress. It is in accordance with the recommendation of the President in one of his addresses to the Senate and the House. It is something that will fill a want in the commercial life of this Nation, and therefore the bill ought to be enacted into law.

I do not think that the fears of my colleague [Mr. VOLSTEAD], who spoke in opposition are well founded. I can not conceive how this bill will tend to foster trusts or monopolies. It is impossible, with the restrictive language that is in the bill, for that end to be accomplished. On the contrary, it seems to me that the only doubt that can exist about this bill arises from the many safeguards that have been put into it for the purpose of preserving the power and the effect of the Sherman antitrust law and the Clayton law and the other legislation in relation to the prevention of trust aggregations or monopolies in restraint of trade. When you read the language of this bill you will find that it is confined to one subject, export trade, and then you find as a protective phrase injected in the paragraph, "Provided it does not restrain trade in the United States or by any competitor engaged in export trade." So that it would appear that the language of the bill itself, if it creates a doubt in any direction in my mind, would create it as to the efficacy of the bill itself to accomplish its purpose.

When this language is interpreted by our courts it may be that that which the bill intends shall be free from the power and effect of these antitrust laws will be held by this very language to be within it and acts done under this bill be found to be an infringement of those laws and in restraint of trade as between competitors engaged in export trade. This is not a measure calculated to help great concerns, for an organization like the United States Steel Corporation, which is so frequently referred to here and made a target of abuse, is strong enough to take care of its own foreign agencies and to plant them in every great commercial center and have its sales agencies and channels

through which its products can be safely distributed. The products of the Standard Oil can hardly be said to be a subject of competition. Its agencies are everywhere and its product, as I said, in large degree is noncompetitive, for it is exported out of this country. So that you see the familiar attack upon these great corporations falls short of touching anything that is to be effected by the terms and provisions of this bill.

The bill is intended to enable half a dozen or more men engaged in the same line of business to organize an agency that will handle their product intended for export trade, to be used in that trade alone, and can not in any wise affect the question of prices in this country; and if it does and becomes an element in restraint of trade here or destructive to competition, the saving clauses of the bill will bring the corporation or association offending under the control of the Federal Commission, which can dictate the terms by which its business shall be perfected and made unobjectionable; and in case of failure of the corporation to observe those rules, then the offending association is turned over to the Attorney General.

I wish to say to the House, as a result of my own personal observations in connection with my own business as a lawyer, I have found that what my friend and colleague says does not exist is in actual existence to-day in England and in Germany. The laws there are protective of corporations and combinations engaged in foreign trade. Associations of individuals are organized there for that very purpose, and I know from my knowledge of the indictments in New York against certain coal operators, that men who are engaged in the shipping of bunker coal from this country, because they have been in some wise connected as members or otherwise with one of those organizations in England, sanctioned by law in England, incorporated under the law, have been indicted and are to be tried as conspirators in this country. This bill only puts the American man or merchant upon a basis where he can fight on equal terms with his competitors who are favored by legislation and by government acts on the other side of the sea. [Applause.]

Mr. WEBB. I yield two minutes to the gentleman from Kansas [Mr. LITTLE].

Mr. LITTLE. Mr. Speaker, some years ago I was sent by the American Government to represent it in Egypt. Of course, my attention was directed considerably to the trade of that country. One thing I observed was that the coal oil trade of Egypt had been dominated by American oil, but America had lost that entire oil trade and it had gone to the Russians. I called the attention of the State Department to it and endeavored to get the matter on a satisfactory basis, but later I found to my astonishment—I was young then—that the Standard Oil Co. had made an arrangement with the Russians by which they yielded that territory to Russia. I was wasting my time. But I learned this: That there are bound to be foreign combinations which we can not control. I think the representatives of this Government abroad should protect American trade. This bill carefully guards against any combinations for control of trade here. When a dozen American firms go to Paris for trade they go up against foreign combinations. They should be allowed to battle as allies. Only 15 voted against this bill in the Sixty-fourth Congress. Now there is much greater reason for its passage. The foreign commerce of the world is at stake. Give our people every opportunity to capture the trade of the world.

I think this bill should pass, and that our manufacturers should have the opportunity to arrange with one another instead of arranging with foreigners against one another. As it is, our smaller factories can not get into the foreign trade. This will give them an opportunity to unite and venture over the sea. If you do not fix it so that they can get together and unite to protect American interests abroad mutually by working together in foreign lands to advance American trade abroad, you will find that every one of the big companies will make some alliance with some foreign organization against the others. I think this is a wise and prudent measure. It simply gives our merchants in other lands the same chance their foreign opponents have there. You must not start them into the fight with one hand tied. I am as much averse as any man in the House to combinations at home in restraint of trade which affect our own people, but I do not see that it is the duty of this Congress to look after the interests of foreign nations, which legislate against us, and whose manufacturers combine against ours, and I feel that we ought to give these people the right to go to Russia or France and meet the combinations against us there on even terms. How can that hurt us? Any increase in our exports gives employment to our people at home and is to the best interests of the men who work in this country in factories, on railroads, and in all features of production.

Mr. VOLSTEAD. Will the gentleman yield?

Mr. LITTLE. I yield to the gentleman from Minnesota.

Mr. VOLSTEAD. Will not this bill, if it passes, give to our manufacturers an opportunity to make deals and combinations with foreign manufacturers? Is not that the very purpose of this bill?

Mr. LITTLE. You can not stop that. That is what I first directed your attention to. Our biggest corporations make terms with foreigners we can not even discover, much less control. We should give our smaller firms opportunity to join their forces and compete on even terms abroad.

Mr. VOLSTEAD. This directly authorizes it, does it not?

Mr. LITTLE. No; not for American trade. As to foreign, you can not stop that anyway. I was just stating that 20 years ago the Standard Oil Co. divided the trade of the world with the foreigners anyway. Out of our reach they will combine anyhow. There is nothing in this bill that interferes with the laws of this country against combinations affecting domestic conditions. No American will buy of any Americans in France or Russia. Let our citizens abroad take advantage of all local conditions there and meet all foreigners on an equality. It will undoubtedly add to our foreign commerce, give employment to more people at home, and can not injure any American. Whatever we do at home, whatever laws we make—and we must enforce them all—are not made for the benefit of Europeans or Chinamen. We must present a united front against foreign competition in foreign markets. This is a sound and patriotic principle. I would rather have Americans combine together for America abroad instead of having them combine with foreigners and against one another. [Applause.]

Mr. WEBB. Does the gentleman from Minnesota desire to use some time?

Mr. VOLSTEAD. I yield five minutes to the gentleman from Pennsylvania [Mr. MOORE].

Mr. MOORE of Pennsylvania. Mr. Speaker, what the gentleman from Minnesota [Mr. VOLSTEAD] said about this bill made an impression upon me. I believe there is something in what he says about the possibility of unfair combination under this bill; but I submit also that there is much force in what the gentleman from Pennsylvania [Mr. GRAHAM] has said in favor of the bill. It is evident that this bill is intended not to help the little fellow, as stated by the gentleman from North Carolina [Mr. WEBB], so much as it is to help the fellow who is big enough to engage in trade in a foreign country. It is intended to enable Americans——

Mr. WEBB. May I interrupt the gentleman?

Mr. MOORE of Pennsylvania. Yes.

Mr. WEBB. The gentleman does not think that a firm that is big enough now to engage in foreign commerce needs this bill, does he? It is only to unite those little fellows who can not do it individually.

Mr. MOORE of Pennsylvania. If it is as large a concern as the United States Steel Corporation, to which the gentleman from Pennsylvania referred, I would say perhaps it would be of no special advantage to it, because it already has agencies throughout the world, and so with the Standard Oil Co., which to a certain extent has been helpful to the Government of the United States in having agents abroad who have sometimes been of as much service to American travelers as our own consuls have been, and in securing information for Americans. But the gentleman from North Carolina [Mr. WEBB] has indicated several times that this is to let the "little fellow" get into the foreign trade. The average little fellow in the United States is not big enough to get into the foreign trade——

Mr. GRAHAM of Pennsylvania. Will my colleague permit a question?

Mr. MOORE of Pennsylvania. Yes.

Mr. GRAHAM of Pennsylvania. Will it not give an opportunity for a dozen small concerns to combine on one foreign agent to handle their export products and enable the very smallest of commercial manufacturers in this country to engage in the foreign trade, without which it would be impossible?

Mr. MOORE of Pennsylvania. Yes; he can come into an association that may be formed under the terms of this act for the purpose of engaging in foreign trade—that is true.

But, Mr. Speaker, what I want to say about the bill is this, that it makes nugatory certain enactments of the Sherman antitrust law. Our friends on the Democratic side are doing in the export trade what they inveighed against in the domestic trade. They are permitting combinations that may be domestically illegal to be established as to foreign commerce. They have hitherto pretended to resist the organization of such combinations within the United States.

Their so-called Clayton antitrust law was supplemental to the Sherman antitrust law, which they said was not sufficient to restrain illegal combinations. Through the Clayton antitrust law they proposed to put malefactors in jail, at least

those who engaged in the formation of illegal combinations. Now in this bill they propose to repeal what they pretended they were going to do when they put the Clayton law into effect.

Mr. MORGAN. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. MORGAN. Is the gentleman from Pennsylvania in favor of this bill or against it? [Laughter.]

Mr. MOORE of Pennsylvania. I have indicated my sympathy with speeches made on both sides of the question. Of course, I could not expect the gentleman from Oklahoma to catch the drift of my speech under such circumstances. [Laughter.] This bill apparently is an administration measure, a very urgent "war measure," although the democratic caucus indicated——

Mr. MORGAN. Mr. Speaker, I make the point that no quorum is present. I think that a speech of this importance ought to be heard.

Mr. MOORE of Pennsylvania. I hope the gentleman will not be so ungenerous.

Mr. MORGAN. Mr. Speaker, I will withdraw the point of no quorum for the time being.

Mr. MOORE of Pennsylvania. How much time, Mr. Speaker, have I remaining?

The SPEAKER pro tempore (Mr. MOON). The gentleman has one minute remaining.

Mr. VOLSTEAD. I will yield to the gentleman from Pennsylvania five minutes more.

Mr. MOORE of Pennsylvania. I thank the gentleman. The Democratic Party in its campaign of 1912 made the public believe that it intended to destroy the trusts and combinations, and one of its first acts in line with that promise was the so-called Clayton antitrust law.

Mr. BENJAMIN L. FAIRCHILD. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. BENJAMIN L. FAIRCHILD. If that was the appeal in 1912, what did they try to make the public believe in 1916?

Mr. MOORE of Pennsylvania. In 1916 they were so tied up with the big interests that they did not want to say anything about what they had said in 1912. [Laughter.] But they came into power on the strength of the promise that they were going to destroy the trusts and put the malefactors in jail.

Mr. BENJAMIN L. FAIRCHILD. I was in hopes that the answer might have some reference to the war.

Mr. MOORE of Pennsylvania. They have brought this new trust law in as a "war measure."

Mr. ADAMSON. A parliamentary inquiry, Mr. Speaker. If this is to be a humorous meeting, ought they not to give time to gentlemen to laugh?

Mr. MOORE of Pennsylvania. Mr. Speaker, the gentleman can not make a parliamentary inquiry in my time.

The SPEAKER pro tempore. The gentleman from Pennsylvania is correct.

Mr. ADAMSON. I intended to ask the gentleman if he would yield.

Mr. MOORE of Pennsylvania. If that is the point, I will yield to the gentleman.

Mr. ADAMSON. I wanted to inquire, if this was to be turned into a humorous meeting, if they would not stop long enough for us to laugh.

Mr. MOORE of Pennsylvania. No; I am going to give the gentleman some information. I want to inject some common sense into the situation.

Mr. ADAMSON. If the gentleman has any qualities that will enable him to do that, I would like to discover them.

Mr. MOORE of Pennsylvania. I will continue to enlighten the gentleman. The Democratic Party, of which the gentleman from Georgia is a distinguished member, has formulated much peculiar legislation since that party started out upon the destruction of the trusts and monopolies in 1912. If the gentleman will bear with me a minute, I will explain why this bill is peculiar in that regard.

Mr. ADAMSON. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. ADAMSON. Does the gentleman think we can cure in 4 years all the mischief that your party has done in 16 years?

Mr. MOORE of Pennsylvania. It is going to take 16 years to undo the bad legislation that the gentleman's party has enacted in 4 years. [Applause on the Republican side.] I am not so sure but that we are to begin that good work very soon. That is why I thought it well to discuss this bill for five minutes or so. The gentleman should have light and be prepared for the future.

The gentleman from Georgia himself has been bringing in much administration legislation, apparently to promote the war in Europe. But occasionally, as he will remember, a bill slips in that is a little more political than it is warlike. This bill affects certain planks of the Democratic platform relating to trusts and combinations. It is not a war measure, as the gentleman very well knows, but it pretends to be.

The Democratic Party pretenses of 1912 are to be taken out of practice by the passage of this bill. Gentlemen on that side of the House during the discussion of the Clayton antitrust law said they proposed to put teeth into the Sherman antitrust law; they proposed to put the violators of that law in jail.

Yes; they did, and then they heard from Wall Street, and then they came in with a law that gave the complainant, the little fellow for whom they had been pleading, the right to go into court somewhere and begin an action against the big fellow if he wanted to. They protected the little fellow by telling him to begin "a civil action" and thus go up against the big fellow and his well-paid attorneys. That was more severe on the little fellow than it was on the big fellow.

The Clayton antitrust law, this so-called drastic law, which was passed in October, 1914, came in sans teeth; but toothless as it it, we find in this "war measure" now before the House a proposition to remove such teeth as are left. This bill lets anybody form a combination if he wants to, provided he does it in the export trade. If a Republican ever again hears anything about American manufacturers selling goods abroad cheaper than he sells them in the United States—Ingersol watches or sewing machines, or anything like that—let him call to mind this Democratic war measure. An American is here permitted to sell his products abroad cheaper than he does in the United States. You will have that question up when we come to consider the next tariff law, so bear in mind that these monumental Democratic barriers against injustice, these barriers against criminal combinations, set up by the Democratic Party when it passed the Clayton antitrust law, are being repealed now under the guise of a war measure! Do not forget that.

Mr. COX. Does not the gentleman think this is just as much a war measure as the river and harbor appropriation bill, and is much nearer to it in fact?

Mr. MOORE of Pennsylvania. The river and harbor bill is much more a war measure, because out in the gentleman's country, where they raise corn and are making barrels of money, their trouble is to obtain enough freight cars to carry their products to the coast. If we had our waterways opened up, we could give the gentleman transportation, and he could get his commodities to market.

But the gentleman, under this bill, is so anxious to give the railroads and the large combinations an increase of power, that he is willing to vote down the restrictions his own party pretended to establish.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania has expired.

Mr. VOLSTEAD. Mr. Speaker, I yield five minutes to the gentleman from Pennsylvania [Mr. KREIDER].

Mr. KREIDER. Mr. Speaker, I want to say that after the war and even now, but more particularly after the war, we will be in competition in the neutral markets of the world, which will be fiercer than any we have ever experienced. I believe that the American Congress should pass legislation that will be beneficial to American business interests, so that they may be in a position to compete with foreign competitors in those markets. This bill, I think, is not needed for the large corporations such as the Steel Co. and the Standard Oil Co. nor any corporation with practically unlimited capital.

Mr. MORGAN. Mr. Speaker, will the gentleman yield?

Mr. KREIDER. Yes.

Mr. MORGAN. Under this bill could not all of the large corporations combine as well as the small ones?

Mr. KREIDER. They could; but they would not because there is no need of combining, because the United States Steel or the Bethlehem Steel is each so large that it has its own selling agencies throughout the civilized world, and there is no reason why they should take in anyone to divide the trade which they are able to obtain. Let me go one step further. One of the great hindrances to securing foreign business has been the difficulty in securing bottoms for the shipment of commodities. Along that line, I think, it is generally known, but perhaps not remembered by Members of Congress, that the Steel Corporation owns over 100 ships of its own, so that it can reach the foreign market at its convenience. Smaller organizations who are competitors can not do so, because they are hampered in securing transportation. They can not get the bottoms.

The Standard Oil Co. we all know has its own individually owned tank steamers, transporting its own oil, but the smaller operator is handicapped because he can not secure those ready means of transportation; and so I might go on and point out the difficulty that the smaller operator encounters in securing

foreign trade. It has been said, and I repeat, that there are three things essential to securing foreign business. The first is the banking facilities; second, the transportation facilities; and, third, the assistance of our Government in giving us every facility it can in order to permit our manufacturers to compete. The gentleman from Minnesota [Mr. VOLSTEAD] spoke about a combination selling wheat and flour. The gentleman knows that the price of wheat in this country is regulated by world competition. The price of wheat in the United States is largely regulated by the price of wheat in Liverpool. No combination could be so large as to combine and buy every bushel of wheat and then perhaps do an injustice to the producing and consuming public in the United States. It requires only a very limited amount of capital to build a flouring mill and consume the wheat. Therefore, under the circumstances, this is one of the occasions when I am pleased to vote for the bill.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania has expired.

Mr. VOLSTEAD. Mr. Speaker, I yield 10 minutes to the gentleman from Oklahoma [Mr. MORGAN].

Mr. MORGAN. Mr. Speaker, the bill under consideration, H. R. 2316, is entitled "A bill to promote export trade, and for other purposes." The purpose of the bill as expressed by the title is a very worthy one. The foreign market for our surplus products is an important factor in developing the wealth of the country, but in my judgment the means provided in this bill for the promotion of export trade are unwise and absolutely dangerous to both the producers and consumers in this country.

Under the terms of the bill partnerships and corporations are given absolute and full authority to combine for the purpose of engaging in export trade. Under the provisions of the act the provisions of the Sherman antitrust law and the Clayton antitrust law are repealed, in so far as they apply to export trade.

For a third of a century the trust question has been the most important one before Congress and the American people. The whole drift of our legislation has been to put restrictions and limitations upon large business concerns with a view to preventing monopolistic control of the necessaries of life. This bill is an absolute revolution in our national policy, because it authorizes combinations in export trade.

I am opposed to this bill. When it was up before the last Congress I opposed it, and, while the bill has been amended somewhat, possibly improved somewhat, I do not think it is amended sufficiently to justify me in voting for it. Ever since the bill has been up for consideration before the House I have been surprised at the attitude of the Democratic membership of this House upon this bill. There has been a great deal said about the various bills that have been passed in the last four years under the present Democratic administration, and unquestionably the party has gone far away from the landmarks of the past and has been out upon an ocean, so that it would be difficult to-day for any man to say what are the primary doctrines of that party.

Mr. COX. Mr. Speaker, does my friend from Oklahoma recall that his candidate for President last fall, Judge Hughes, O. K'd this legislation?

Mr. MORGAN. I do not recollect anything of the kind.

Mr. COX. He did, specifically.

Mr. MORGAN. I was not saying anything about the doctrines of the Republican Party. I was discussing the doctrines of the Democratic Party, and while some Republican may stand for this kind of legislation, I have been surprised, and I say it sincerely, that a Democratic President; a Democratic administration; a Federal Trade Commission, with a majority of Democrats upon it, or all Democrats, so far as I know; a Democratic Judiciary Committee; and a Democratic House should stand up and support this kind of a bill in view of the record, the teachings, and the platform of that party, especially for the past quarter of a century.

As I pointed out when this bill was before the House at the last Congress, going back for a quarter of a century, the Democratic Party and its platforms had been declaring against trusts, making the most violent declarations against trusts in all forms and phases, and leading the American people to believe that, if the Democratic Party was in power, all trusts would be strangled at infancy. That went on; it was in the platform, and the chief matter of all campaign discussions of public speakers, from the leaders down to the lowest campaign platform orator. But here in this House ever since I came here, eight years ago, there has been the same kind of story until the Democratic Party came into power, but in the platform adopted in St. Louis in 1916 there was practically nothing said about trusts; it was all at once silent; and here the Democratic Party that had got into power by making the people believe that they would regulate the trusts have now turned out to be the chief champions of the trusts of this Nation. I do not know what has caused it.

I do not know why the Democratic leaders of this Nation and of this House have changed their attitude, whether they were insincere originally or not, or whether they have come to the conclusion that it is necessary to favor these great organizations in order to perpetuate themselves in power. I do not know, but for some reason or other that attitude has been changed. When this bill was before the last Congress, the bulk of the Democratic Members of this House voted for it and it passed. I do not understand that, and I regret this change of attitude on the part of the Democratic Party, because I as a Republican have always believed that the great moneyed interests of this country, represented by our great manufacturing industries, had too much power, and I believe to-day that the profits which the great manufacturing organizations and great corporations of this country are exacting from the producers of this country are too great. Hence my surprise that—from the President down to the Cabinet and the Federal Trade Commission—the leaders of this House should come forward with a bill actually to legalize the formation of trusts. Now, I know gentlemen say this is done for the little fellow; it is done for the little fellow. Then why not put some clause in here that will restrict and limit these organizations in some way. There is not a single restriction, not a single limitation; it absolutely gives the corporations of this country absolute power to combine, so far as the export trade is concerned.

Mr. JOHNSON of Washington. Will the gentleman yield for a question?

Mr. MORGAN. I will.

Mr. JOHNSON of Washington. Will the gentleman consider the case of Pacific coast lumber manufacturers who sell lumber in Australia——

Mr. MORGAN. Yes, sir.

Mr. JOHNSON of Washington. In competition with themselves. Each manufacturer has to have an agent in Australia or else depend on an Australian broker who frequently adds arbitrarily to the retail price, whereas if these Pacific coast lumbermen could combine under this bill they could do business with one agency, make a profit for themselves, sell lumber cheaper in that market, and destroy that Australian middleman who is taking a toll on each one of those separate small enterprises trying to do business.

Mr. MORGAN. I have heard that argument before.

Mr. JOHNSON of Washington. What is the answer?

Mr. MORGAN. What occurred before the Sixty-fourth Congress? Why, when the question as to whether lumber should be placed on the free list or not the great bulk of the Members of this House stood up and voted solidly for free lumber with few exceptions. Why? In order that we might give the people of this country cheaper lumber to construct their houses, buildings, and so forth. Now, that is why there is a great lumber trust in this country, and yet here you are proposing to permit an absolute combination for that matter, not simply of the lumber industry of the Pacific but, under this bill, the lumber corporations and interests of the entire country can go into one single corporation to control the export of lumber. Does the gentleman think the export of lumber to Australia will make lumber cheaper in this country? Primarily every dollar's worth of goods we export makes the home supply less and tends to increase prices, and yet you are going to encourage the lumber dealers to combine so they can sell more lumber abroad, which will make lumber inevitably higher at home.

The gentleman from Washington stands up here openly and says under this bill the lumber dealers of the Pacific coast, and, for that matter, all of this country, in the South, can all go into one grand aggregate combination to control the price of lumber abroad, and by that way, in increasing the exports, reduce the supply of lumber here at home and make the lumber higher for the poor man of this country in the towns and cities. That inevitably comes if this bill passes.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. MORGAN. I will.

Mr. JOHNSON of Washington. How will the export of lumber make prices higher at home?

Mr. MORGAN. Because when you reduce the supply at home—does not the gentleman think that the law of supply and demand, even in lumber, has something to do with the price?

Mr. JOHNSON of Washington. No; I do not agree to that at all.

Mr. MORGAN. If you decrease the supply by sending it abroad, does it not tend to increase the price here?

Mr. JOHNSON of Washington. I do not agree to that. Let me ask the gentleman another question. The gentleman would have no exports at all of any kind, would he?

Mr. MORGAN. No, sir——

Mr. JOHNSON of Washington. None whatever?

Mr. MORGAN. I do not go that far at all.

Mr. JOHNSON of Washington. If the gentleman goes that far on lumber exports, he must go that far on cotton or boots and shoes and any other thing which the United States now exports and makes a profit on, to the glory of the United States.

Mr. MORGAN. That does not follow at all.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MORGAN. May I have some more time?

Mr. VOLSTEAD. I yield the gentleman five minutes additional.

Mr. MORGAN. It is the principle of economics that the more you export and sell abroad the more you reduce the supply at home, and when you reduce the supply at home you increase the price at home. That is a universal law, recognized everywhere.

Mr. JOHNSON of Washington. Why not build a Chinese wall around the United States and let it go at that?

Mr. MORGAN. That is not the question here. I am willing to let exports go in the ordinary way, but I am not willing to let the lumber dealers in the South, and in the West, and in the North unite in one identical combination to control all the export trade. That is an infamous proposition which this Congress ought not to permit.

Mr. JOHNSON of Washington. If it will make a profit for the exporters and help them find and hold a market in foreign countries, and not hurt the retail market here, is it not a good thing for the United States? It is so self-evident it needs no answer.

Mr. CARAWAY. Will the gentleman yield?

Mr. MORGAN. Yes.

Mr. CARAWAY. I was going to ask the gentleman if there are going to be exports at all why should not the exportation be done in the most businesslike and economical manner possible?

Mr. MORGAN. I lay down this proposition, and that applies to the whole of this bill, that if we allow a combination to control the price abroad, the export price inevitably will affect the price at home. There is no escape from that conclusion. If the export trade is controlled arbitrarily, which it will be, the great combination will fix the price at which they sell abroad, and if you fix the price abroad that will affect the price at home.

Mr. WEBB. Let me ask the gentleman if it does not state in this bill that if it unduly enhances the price here they are guilty of a violation of the law and also of the Sherman antitrust law? Does the gentleman think this bill is safeguarded?

Mr. MORGAN. If it unduly enhances the price? Who in the world will say when it will unduly enhance the price? That is an indefinite and uncertain term. What is the price of lumber today? I believe it is already under present conditions unduly enhanced. What is the great problem we have before this Congress now? It is the undue enhancing of the prices of foodstuffs controlled by these various corporations that you are giving power with which to combine and sell any export of ours.

Mr. WEBB. Does the gentleman think that the price of cotton is unduly enhanced in his district, or that the price of wheat is unduly enhanced?

Mr. MORGAN. The price the farmers received last fall was not too high, but the price speculators are getting is too high.

Mr. CANNON. Will the gentleman allow me a question?

Mr. MORGAN. Certainly.

Mr. CANNON. If I understand the gentleman, he claims that this bill authorizes trusts and combinations to capture foreign trade, and that the manufacture of the products under the lead of these trusts and combinations can export and sell abroad far cheaper than we sell at home? They are not allowed to sell at home, as I understand it—these wicked trusts?

Mr. MORGAN. The wicked trusts now can sell abroad at their own price. There is no restriction on the price now.

Mr. CANNON. You can not form the trusts, can you?

Mr. MORGAN. We have already got the trusts. The Democratic Party has not killed all those.

Mr. CANNON. They are illegal.

Mr. MORGAN. That depends on what you call a trust.

Now, then, here we are in a war. We have as our allies England and France and Italy and Russia. In a way we are working together, and yet we propose to allow our corporations to go into a combination whereby they can absolutely and arbitrarily control the price at which they will sell any manufactured product of this country abroad.

Mr. FESS. Reverting to the question——

The SPEAKER pro tempore. The time of the gentleman from Oklahoma has expired.

Mr. MORGAN. May I have five minutes more, and I will not ask for any more time?

Mr. VOLSTEAD. How much time have I left, Mr. Speaker?

The SPEAKER pro tempore. Fifteen minutes.

Mr. VOLSTEAD. I yield three minutes more to the gentleman.

Mr. FESS. Reverting to the question of export price fixing the price at home, are we in danger of any export at a price that is lower than the price at home when they sell it at home at a higher price than they sell it abroad?

Mr. MORGAN. In some instances that is true. For instance, they claim that because of Germany buying our copper through one concern the price which they fix for copper is the price fixed for our copper.

Mr. FESS. But the selling to Germany cheaper does not keep the price up at home. It tends to reduce it, does it not?

Mr. MORGAN. I do not know about that. I consider the price at home and abroad to a certain extent intermingled, interwoven, and related so that they affect each other.

Mr. FOCHT. I would like to ask the gentleman what call or justification there could possibly be for a bill at this time, when we are not able to manufacture enough for our own consumption, and after the war there must be a whole world commercial readjustment, and this bill could not possibly fit at that time?

Mr. WEBB. We are getting ready for it.

Mr. FOCHT. You want to get ready for something and you do not know what it is going to be.

Mr. MORGAN. We are fraternizing with these other great nations; we are engaged in a war in which those nations are our allies, and commerce is one of the great things that has led, perhaps more than anything, to this conflict that has been going on in Europe for the last three years, a conflict in commerce and trade. And nations want trade. They want trade because it brings wealth to the nation. And this Nation is like other nations. It wants trade, and one of the most difficult things when we come to make a peace will be the question of trade relations between these great nations with which we are allied.

And yet we are starting on a policy against these other nations to allow absolute combinations among our corporations so that they can dictate absolutely the price which the people of England and France and Italy and Russia and our other allies shall pay for everything they buy in this country. It is not along the line of peace that you are moving. It is along the line of conflict, along the line of conflict for trade and commerce, along the line of conflict for wealth. It is a movement of conflict and not a movement for peace. I hope this bill will not pass. [Applause.]

Mr. WEBB. Mr. Speaker, I yield to the gentleman from Arkansas [Mr. CARAWAY] five minutes.

The SPEAKER. The gentleman from Arkansas is recognized for five minutes.

Mr. CARAWAY. Mr. Speaker and gentlemen of the House, I am a little curious to know just what it is that excites the gentleman from Oklahoma [Mr. MORGAN]. In one breath he says that this is an authorization for a combination that is going to raise the price of commodities to the American people and in a beautiful peroration says his concern is that he fears the price will be enhanced to foreign people. [Laughter.]

Mr. JOHNSON of Washington. He has been bitten by the octopus. [Laughter.]

Mr. CARAWAY. I do not know just what has gotten the gentleman. They have been having a good many cyclones in Oklahoma, and his talk may be but a reflex action of these. [Laughter.]

I am at a loss to know what it is in the bill that can excite the fears of either the gentleman from Oklahoma or the gentleman from Pennsylvania [Mr. MOORE]. Both of them profess to believe that it is an attempt on the part of the Democratic Party to sanction trusts and combinations, and the gentleman from Pennsylvania professed to be very much exercised because trusts and combinations had not been prosecuted and people put in jail.

Well, I can hardly think he is serious about that, because you know we have always contended, and rightly so, that all of the trusts and combinations were Republican in origin and in sympathy. Therefore when these gentlemen profess to believe that these trusts and combines are being favored by this legislation and profess to regret that these trusts and combines have not been prosecuted, I suspect that there is not much sincerity in their "professes" and "regrets" that such pretended conditions exist. [Applause.]

The only thing that there is in this bill at all that can affect in any way domestic concerns is the provision that will bring them, the corporations and combines, without question, under the terms of the antitrust law, because it prevents corporations or persons associated together to do an export business to so combine as to destroy a domestic concern engaged in the same kind of business. In other words, it goes a bit further than the original antitrust law, which left it extremely doubtful whether or not combinations formed to do business in foreign countries are amenable at all to the provisions of that law, and provides that where combinations are formed to engage in export trade, they shall not so conduct their business as to restrict, limit, or destroy other people, other combinations, or other corporations engaged in export. It gives protection, if it gives anything, to those people who are honestly engaged in export business, and prevents the formation of corporations and combines that will drive out of such business their competitors engaged legitimately in a foreign export business.

The gentleman from Oklahoma said that if we permitted the formation of combines to sell lumber in some other country it would raise the price of lumber in this country. Now, that is true about everything, every article that goes abroad. If there is a demand for such articles at home and abroad, that demand will enhance the value of those articles here at home, and as the gentleman from Washington [Mr. JOHNSON] suggested, if there is any virtue in his argument, we ought to restrict all kinds of exports and confine to the home markets the producers of everything that the American people eat and wear. If there is any virtue in his argument we ought to restrict and absolutely forbid any kind of export business at all in any kinds of products in which the American people are interested and which they use for food or clothing, or for the building of houses, or for any other. This, of course, would mean stagnation and commercial death.

Mr. CAMPBELL of Kansas. Mr. Speaker, will the gentleman yield?

Mr. CARAWAY. Yes.

Mr. CAMPBELL of Kansas. I take it that the gentleman from Arkansas does not contend that there is a military necessity or a necessity growing out of the war for this legislation?

The SPEAKER. The time of the gentleman from Arkansas has expired.

Mr. CAMPBELL of Kansas. Give the gentleman a few minutes.

Mr. WEBB. I will yield to the gentleman one minute, Mr. Speaker.

The SPEAKER. The gentleman from Arkansas is recognized for one minute more.

Mr. CAMPBELL of Kansas. The gentleman does not contend that this is necessary in the export trade just now, but that this bill, if necessary at all, is necessary because of the conditions that may follow the war?

Mr. JOHNSON of Washington. If the gentleman will permit, there is greater need for this bill now than ever before, as the gentleman will be convinced if he will look at the business on the Pacific Ocean, where the fight for American supremacy is to be.

Mr. CAMPBELL of Kansas. I mean to-day.

Mr. JOHNSON of Washington. There never was a greater emergency.

Mr. CAMPBELL of Kansas. We are consuming a lot of things now in the United States, and the prices are going up. Why is it a war measure? Why is it pressed now as a war measure?

Mr. CARAWAY. Well, under the term "war measures" a great many things may be included. It does not necessarily mean measures for the manufacture of guns and ammunition and the conscripting of men to wage the war. The conditions in this country that will make it possible for American business men to meet the competition of other countries when the war is over must be created now. You can not wait until the emergency actually exists. You have got to lay the foundation for it and permit them, the business men, to form their trade alliances so that they can take care of the situation when the conditions return to what they were before the war. Our future success depends on our present preparation. [Applause.]

The SPEAKER. The time of the gentleman from Arkansas has again expired.

Mr. WEBB. Mr. Speaker, I yield to the gentleman from Texas [Mr. SLAYDEN] two minutes.

The SPEAKER. The gentleman from Texas is recognized for two minutes.

Mr. SLAYDEN. Mr. Speaker, I heard a brief discussion a while ago as to the nature of this bill, one gentleman contending that it was in the interest of big business, and the other that it was designed to help small business men. I have no patience with legislation intended to help any one class or any two classes. I believe that all legislation should be for all the American people, and with the idea of putting them all upon a plane of perfect equality before the law, with absolute justice for all and favors to none. It is because I believe in that sort of thing that I am a Democrat. Very likely there are gentlemen here who say that because they believe in that doctrine they are Republicans. It is sound Americanism anyway and I do not care from which political party it comes.

Mr. Speaker, I believe this bill should pass. I believe this is the most opportune time in which to increase our trade with other countries. Particularly is that true, in my judgment, with the countries that lie to the south of us. The other 20 Republics have a great trade now, and potentially it is much greater. Now is the time for us to get it. The German Empire, with which we have gone into war, has controlled a large part of the trade with those countries. At this particular moment some of them seem not to be on very friendly terms with Germany. Some have frankly and openly avowed their hostility. This makes an opportune moment for us. I believe that to-day the statesmen of Germany are tremendously afraid of the post bellum conditions. They realize that the course pursued by that Empire is causing hostility to spread throughout the world, and they have come to believe that it is going to interfere with their trade and prosperity after the war, and we have an opportunity now not to cripple them commercially but to develop in them an inclination to restore peace by extending our trade in a field which heretofore they have largely controlled. This bill, I repeat, will help us to do it.

Within a day or two I read a very important telegram coming from Switzerland, as I remember it, which stated the hope and belief that the war will be over by the 1st of July. That of course would be a very desirable thing to happen, but the suggestion is fanciful. It can not be. But this cablegram stated—and it is worthy of consideration—that Mr. Ballin, the head of the great Hamburg-American Steamship Line, and other representatives of tremendous corporate interests in Germany, realized that they were not only on the verge of bankruptcy but that the country itself would lose its commerce throughout the world unless peace were quickly reestablished, and the Germans, with their wonderful sagacity and enterprise, supported by a less harsh feeling, by a feeling of less hostility than is now indicated, be permitted to resume normal business activities. For those reasons, Mr. Speaker, I believe that it would be a tremendous support to the suggestions for the speedy restoration of peace to pass this bill or any other measure that will enable the merchants of our country to invade territories that have hitherto been so largely dominated in a commercial way by the countries of Europe. I thank the House for its attention. [Applause.]

Mr. MOORE of Pennsylvania. Will the gentleman yield for one question?

The SPEAKER. The time of the gentleman has expired.

Mr. SLAYDEN. I will tell the gentleman privately. [Laughter.]

Mr. VOLSTEAD. I yield four minutes to the gentleman from Illinois [Mr. JUUL].

Mr. JUUL. Mr. Speaker and gentlemen, under other circumstances I might favor this bill, but this is a bill to promote export trade and for other purposes, and I maintain that if this Congress goes on legislating along the line that it is proposed to legislate in this bill, the statutes of the United States will present nothing less than chaos. There are three separate and distinct acts mentioned in this bill, which this bill proposes to amend. All of the three acts will remain upon the United States statute books identically as they are now, and somewhere, stuck away in a corner, will come this act that utterly destroys the meaning and intent of the other acts. I will illustrate to you in a minute what I mean. I think it is the most dangerous way of manufacturing law that any bright lawyer ever invented. If you will look upon page 2, section 2, of this bill, you will find—

That nothing contained in the act entitled "An act to protect trade and commerce against unlawful restraint and monopolies," approved July 2, 1890, shall be construed as declaring to be illegal an association entered into for the sole purpose of engaging in export trade and actually engaged solely in such export trade, or an agreement made or act done in the course of export trade by such association—

And so forth.

In other words, if that act mentioned here contains an inhibition against doing something and declaring that something unlawful, that act still remains in the United States statutes; but this will take the sting out of it.

Then, if you will look upon page 3, section 3, you will find—

That nothing contained in section 7 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, shall be construed to forbid the acquisition or ownership by any corporation of the whole or any part of the stock or other capital of any corporation organized solely for the purpose of engaging in export trade.

In other words, in so far as that act amounts to anything, this act utterly destroys its usefulness. That is the second act that you are amending. Then you drop down to section 4 in this bill, and you amend a third law by saying—

That the prohibition against "unfair methods of competition" and the remedies provided for enforcing said prohibition contained in the act entitled "An act to create a Federal Trade Commission, to define its powers and duties, and for other purposes," approved September 26, 1914, shall be construed as extending to unfair methods of competition used in export trade against competitors engaged in export trade.

Now, gentlemen, here are three laws that will remain on the statute books of the United States. Each one will contain a section that makes a thing unlawful, and this bill here alters and amends three separate and distinct acts passed by this Congress at some time or another. Now, I maintain that if you want to legislate for the benefit of this country the fair and honest method of legislating would be to introduce three separate bills and honestly tell the people in the title page that you propose to alter and amend those acts. That is what this bill does not do, and I will not sit here and help to fill up the statutes of the United States with legislation drafted and put together and shoved in here in so absolutely slipshod a method as this.

The SPEAKER. The time of the gentleman has expired.

Mr. VOLSTEAD. I yield three minutes to the gentleman from Illinois [Mr. GRAHAM].

Mr. GRAHAM of Illinois. Mr. Speaker and gentlemen, I would not trespass upon the time of this House in this matter if I did not feel in my own mind that this is the worst piece of legislation that I have seen in this House. I do not desire to speak intemperately, but I believe I speak with some thought about the subject. In the first place, it comes here under false pretenses. It is not a war measure or a war necessity. It has no business here at a special session at which we are considering emergency legislation only.

In the second place, the potential possibilities for harm in this bill are, it seems to me, very great. This bill proposes to take the lid off, if I may be allowed the expression, of the Sherman antitrust law and to give persons, corporations, or associations who are engaged in exporting any kind of merchandise or products the right to combine in any way they can for the control of the export trade. I come myself from a great agricultural country, and we are interested in cereal crops and in live stock out there. I can see no reason, gentlemen of the House, if this bill becomes a law, why those engaged in the export of these products, raised on our western farms, can not absolutely control the price of every bushel of grain that is raised on the Illinois farm. I believe that the price of these products is largely controlled by the price of the excess or surplus over what we consume. Our price in this country is regulated by the export price, largely; and suppose it becomes possible by law for great steamship or other companies interested in the export of wheat to so combine that nobody can export wheat except under the direction and orders of this combination. Immediately they can manipulate the exports, they can stimulate the exports or decrease the exports, and immediately on the Illinois farms we feel the result in our prices. The same thing can be done with the prices of meat and the meat products of our farms. Everybody knows that these products are largely controlled by the great packers of the country. Put it into their hands, if you please, to control the surplus products and they will control the price of every pound of beef and pork raised on the western farms. The potential possibilities of this bill for harm are great and I earnestly insist, gentlemen of the House, that you ought not to encourage a system that will do this sort of thing to the products of the farms and to the farmers of this country. [Applause.]

Mr. VOLSTEAD. Mr. Speaker, how much time have I left?

The SPEAKER. The gentleman has five minutes.

Mr. VOLSTEAD. I desire, Mr. Speaker, to occupy those five minutes, if the Chair will permit me. A good deal has been said in this discussion in regard to large corporations not being interested in this bill. About the only ones that appeared before the committee in support of the bill were large concerns. Mr. Ryan, of the Amalgamated Copper Co., appeared and urged it strongly. Why did he urge it? He said that in selling in foreign countries he often had to compete with people at home. He asked to have a chance to make an agreement with his domestic competitors so that he would not be required to bid against them in the foreign trade. The copper trade is not alone interested, but the great steel corporations are anxious to make like arrangements. The report of the Trade Commission shows that the large concerns are more strongly in favor of it than the smaller ones.

As I said, in speaking on this subject a minute ago, there is no necessity for it. All this talk about its necessity in the foreign trade is without support in fact. Who would you ask to answer that question? Would not our foreign consuls be the ones to know? They were asked, 35 of them; they made special reports, practically covering the whole field. Not one of them believed combinations in the foreign trade necessary, and many of them expressed the opinion that it would not be practicable. The Trade Commission showed in its report, after having sent inquiries to every exporter in this country, that there are no large combinations in the foreign trade to be feared. It is not for the foreign trade that this is wanted; it is for the domestic trade—corporations want to combine with every competitor to stifle competition here. It is absolutely idle to talk about competition at home if the foreign trade can be combined. The foreign and domestic trade can not be separated; what affects one will affect the other. This bill will no doubt pass, but I believe the time will come when we shall have to undo this work. The trusts are asking for it, and you are going to give it to them. They want it for the trade at home; they want it to destroy the Sherman Antitrust Act, and that is exactly what it will accomplish. [Applause.]

Mr. WEBB. Mr. Speaker, I yield two minutes to the gentleman from Tennessee [Mr. AUSTIN.]

Mr. AUSTIN. Mr. Speaker, this bill, or a similar bill, passed the last House on September 20, 1916, only 25 votes being cast in the negative—15 Republicans and 10 on the Democratic side. The bill was held up in the Senate under the rules of that body by a single objection made, as I recall, by the Senator from Wisconsin, Mr. LA FOLLETTE. The Members of the Senate were overwhelmingly in favor of it, and a strong report was made on the bill by the Senate Committee on Interstate and Foreign Commerce.

Now, the gentleman from Oklahoma [Mr. MORGAN], who is fighting this measure, says that it is an improvement on the bill passed by the House almost by a unanimous vote last September. So if it deserved practically the entire Republican vote and every Democratic vote except 10 in the last Congress, and has been improved since that time, why should we not give it a second indorsement, especially in view of the fact that since that time the President of the United States, as well as the Republican candidate for the Presidency, Gov. Hughes, have both gone on record in favor of it?

Mr. MORGAN. Will the gentleman yield?

Mr. AUSTIN. No; I can not in two minutes. We must consider the condition which is going to confront America at the close of this horrible war in Europe. In time of peace prepare for war, and in time of industrial peace let the American Congress prepare for the industrial and commercial war which will surely confront us in every market of the world at the close of the war. Our competitors of Europe and of the Orient have had the advantage of this kind of legislation and have met us in successful competition, and it is the duty of the American Congress to equip our exporters and manufacturers with the same machinery, the same advantages, to meet our competitors in South America, Africa, Europe, and in the Orient in the future. Similar legislation and methods have resulted favorably to our competitors and to the injury of the American exporters in the past. This is not a political question. This measure should appeal to the patriotism of every Member of this House. I congratulate the gentleman from North Carolina [Mr. WEBB] in reporting a bill here which is entitled on its merits to the unanimous support of the American Congress. [Applause.]

Mr. WEBB. Mr. Speaker, the organizations or associations authorized under this bill are not permitted to manufacture or produce any of the goods they are supposed to sell in foreign countries, and they are not permitted even to sell in the domestic markets any of the goods they buy.

Mr. VOLSTEAD. Is it not true that this authorizes manufacturers to combine for foreign trade by contract?

Mr. WEBB. No; it does not.

Mr. VOLSTEAD. Has the gentleman read the bill?

Mr. WEBB. I suspect I have.

Mr. FOCHT. Let us hope so.

Mr. WEBB. I am afraid the gentleman has not, or, if he has, he has not understood it, because if the gentleman will read line 7, on page 1, he will find that the words "export trade" are not to be deemed to include the production, manufacture, or selling for consumption within the United States, and so forth.

Mr. VOLSTEAD. And will the gentleman turn to page 2 and see what the word "association" means?

Mr. WEBB. Yes.

Mr. VOLSTEAD. I think he will find it absolutely authorizes a combination by contract or otherwise of two or more partnerships, persons.

Mr. WEBB. But that association must be engaged in export trade, and export trade does not permit the manufacture, production, or sale in the United States.

Mr. JOHNSON of Washington. Mr. Speaker, will the gentleman yield?

Mr. WEBB. Yes.

Mr. JOHNSON of Washington. Why should not some export company in the United States have the same right as the celebrated Hudson Bay Co., which exports to all the world at our expense?

Mr. WEBB. I am in favor of giving them the same rights. I can not understand how an American Congressman can object to putting American manufacturers in foreign trade upon the same footing as their competitors. I do not understand the spirit that fights the American manufacturer, who is fighting for his life in export trade, who is hobbled to death by what is supposed to be the Sherman antitrust law, when every one of his competitors is cutting his throat. I have no silly sentimental objection to manufacturers making a little money. I want to help them do it. I want to help them by putting them on the same footing as their foreign competitors; and every foreign nation to-day permits its manufacturers to do what we want to permit them to do in this bill.

Mr. VOLSTEAD. Is it not true that you can not find in the report made by the trade commission any support for the gentleman's statement that there is any such combination in foreign trade?

Mr. WEBB. Wait a minute and I will read it. Here is what they say.

Mr. VOLSTEAD. I am referring to the report in two volumes.

Mr. WEBB. They say:

In seeking business abroad American manufacturers and producers must meet aggressive competition from powerful foreign combinations, often international in character. In Germany, England, France, Italy, Austria-Hungary, Switzerland, Holland, Sweden, Belgium, Japan, and other countries business men are much freer to cooperate and combine than in the United States. They have developed numerous comprehensive combinations, often aided by their Governments, which effectually unite their activities both in domestic and foreign trade.

The gentleman evidently has not read that.

Mr. VOLSTEAD. Will the gentleman permit——

Mr. WEBB. I am sorry, but I can not yield now.

Mr. VOLSTEAD. Why did they not put that statement in that exhaustive report?

Mr. WEBB. It is in the report that was sent to Congress by the Federal Trade Commission on June 2, 1916.

Mr. VOLSTEAD. They have a report of five or six hundred pages, and they flatly deny that statement.

Mr. WEBB. There is one statement further that evidently the gentleman has not read in this report:

If Americans are to enter the markets of the world on equal terms with their organized competitors and their organized customers, if they are to expand the foreign trade of the United States as they should, and if our small producers and manufacturers are to obtain their rightful share of foreign business on profitable terms, they must be free to unite their efforts.

There is a direct declaration from the Federal Trade Commission that the bill is largely in the interest of the little manufacturers. I can conceive of a hundred small manufacturing concerns in my country and in New England manufacturing cotton goods, each with $100,000 or $200,000 capital stock, and not one of them able to maintain a foreign selling agency in China or any other foreign country that buys cotton goods, while Japan has a combined foreign agency practically controlling all of the output of cotton goods in those foreign territories. My little concern and yours can not afford to maintain independently an individual foreign selling agency, but 50 or 60 of them can form a corporation or association in order to have a selling agency, and the overhead charges then in proportion will be so small that they will be able to meet their organized competitor. Who objects to that, especially when we have it hedged about so that it can not unduly or artificially affect the home market?

Mr. MEEKER. Mr. Speaker, will the gentleman yield?

Mr. WEBB. Yes.

Mr. MEEKER. Does not the gentleman believe that by permitting these different concerns to work together, offering a diversified line of goods on the other side, it will be to the mutual advantage of all here?

Mr. WEBB. Absolutely. That is what we are working for. Somebody has suggested that we might put a wall around this country and compel our people to use all of the manufactured products that we have. That would mean stagnation and death, and what we are fighting for is to extend our trade in the markets of the world, and all this bill does is to take the hundred-pound weight off the back of our horse in the international race, because no horse that he is racing with has the same weight to carry. I say again that I can not understand the spirit that actuates Members who oppose giving American manufacturers the same living chance that their competitors have in a foreign country.

The following is a brief summary of the report made to Congress by the Federal Trade Commission:

COOPERATION IN AMERICAN EXPORT TRADE.

FEDERAL TRADE COMMISSION,
Washington, May 2, 1916.

TO the PRESIDENT OF THE SENATE OF THE UNITED STATES.

SIR: In accordance with the provisions of subsection (h) of section 6 of the Federal Trade Commission act, I have the honor to transmit herewith a brief summary of the facts and recommendations embodied in the detailed report of the Federal Trade Commission's investigation into trade conditions in and with foreign countries where associations, combinations, or other conditions may affect the foreign trade of the United States.

Respectfully, JOSEPH E. DAVIES, *Chairman.*

SUMMARY.

Under the authority of its organic act the Federal Trade Commission has completed a comprehensive investigation of competitive conditions affecting Americans in international trade. The commission finds:

(1) That other nations enjoy marked advantages in foreign trade from superior facilities and more effective organizations.

(2) That doubt and fear as to legal restrictions prevent Americans from developing equally effective organizations for over-seas business and that the foreign trade of our manufacturers and producers, particularly the smaller concerns, suffers in consequence.

The commission appreciates the importance of fostering foreign trade and realizes the urgent need of enabling our citizens to meet foreigners on equal terms in international commerce. It therefore recommends the immediate clarification of the law to permit cooperation among Americans for export trade.

ADVANTAGES ENJOYED BY FOREIGN EXPORTERS.

While the United States has been absorbed in domestic development other nations have followed definite policies for the expansion of their foreign trade and have efficient organizations for the purpose in view.

Recognizing the vital influence of transportation facilities, foreign nations have built up their ocean shipping, have granted low export railway rates, and have combined their land and ocean transportation to give their shippers ready entrance into their over-seas markets. The United States, on the contrary, has neglected its merchant marine until it is dependent upon its commercial rivals to deliver its goods. In consequence the transportation of its products is now largely controlled by powerful international combinations of foreign shipowners who discriminate against American shippers.

Realizing the necessity of banking and credit facilities to finance their transactions, foreign nations have not only established connections with banking houses in every land, but have dotted the map of the world with foreign trade banks of their own. Banks with their main offices in London, Berlin, Paris, Rome, or Vienna operate hundreds of branches and agencies in South America, the Orient, Australasia, the Levant, and all around the coast of Africa and far within the remote interior. They give the foreign exporter information, extend credit, finance his transactions, and constantly strive to increase the foreign business of the mother country. The few foreign branches of American banks have but recently been established, and in most markets our exporters must depend on alien bankers.

Though now increasing, American investments abroad are comparatively small. British, French, German, and other foreign traders, on the other hand, enjoy a peculiar advantage from the billions of dollars of investments made by their fellow nationals in foreign lands, frequently on the express condition that supplies and equipment should be purchased in the country furnishing the funds. British and German investments in South American railways and public utilities, French investments in Turkey, and Japanese investments in China and Manchuria are typical examples. In consequence, time and again American manufacturers have found it impossible to sell their products abroad because the prospective customer was forced to purchase from or through interested investors.

Shipping facilities, banking and credit arrangements, and investment of capital abroad are thus of primary importance in international trade. Other branches of the Government have special jurisdiction of some of these matters and all of them will doubtless receive consideration from Congress. In accordance with its specific authorization, this commission has therefore directed its investigation to the effect of foreign combinations on the commerce of the United States.

FOREIGN COMBINATIONS COMPETING WITH AMERICAN EXPORTERS.

In seeking business abroad, American manufacturers and producers must meet aggressive competition from powerful foreign combinations, often international in character. In Germany, England, France, Italy, Austria-Hungary, Switzerland, Holland, Sweden, Belgium, Japan, and other countries business men are much freer to cooperate and combine than in the United States. They have developed numerous comprehensive combinations, often aided by their Governments, which effectually unite their activities both in domestic and foreign trade.

In Germany prior to the war there were 600 important cartels, i. e., combinations to control the market, embracing practically every industry in the Empire. Many dominated the export trade of their industries and carried on vigorous campaigns to extend their foreign business, to prevent competition among German producers in foreign markets, and to secure profitable prices. Thus the German dye-color industry operated as a unit in foreign trade under the leadership of two great groups of allied producers, the Badische group and the Hochst-Casella, which were working under agreement to avoid competition between themselves for 50 years. The manufacture and exportation of electrical equipment has been made one of the bulwarks of German foreign trade by two great companies—the Allgemeine Electricitats Gesellschaft and the Siemens-Schuckert, with numerous subsidiaries at home and abroad working in harmony with each other. Half of the $150,000,000 worth of coal and coke exported annually was sold by one central selling agency, maintained by the great Rheinisch-Westfalische coal syndicate,

of which the Prussian Government mines are members, and which embraces the bulk of all coal and coke production of the Empire. Practically all the rapidly increasing and highly valuable iron and steel export business was handled by the single selling agency of the Stahlwerks Verband, the aggressive union of German iron and steel manufacturers which has actively fostered business through export bounties and other means.

In France and Belgium syndicates of iron and steel, coal, glass, and other industries were strong factors in domestic and foreign trade. Silk-ribbon manufacturers of France and Germany conducted their export trade in accordance with a joint agreement. In Italy, Russia, Austria-Hungary, Switzerland, Sweden, Greece, Argentina, Chile, and Ecuador, central organizations unite the interests of producers in various industries, such as coal, iron and steel, agricultural machinery, oil, sulphur, superphosphates, cement, matches, chocolate, embroidery, silk goods, watches, cotton goods, condensed milk, canned fish, currants, quebracho, iodine, cacao, etc.

In Japan an export organization of textile manufacturers is rapidly obtaining the rich cotton-goods trade of North China. The trade in tea is controlled by a nation-wide "tea council." One great Japanese firm, which in itself combines manufacturing, mining, shipping, and merchandising enterprises, is rapidly extending Japanese trade in all lines throughout the Far East, and the Japanese Government is directly assisting the development of shipping, banking, and trading for foreign business.

British manufacturers have relied more fully upon an unusually effective merchandising organization for foreign trade, long established in foreign markets, and giving British products a superior representation there, but in various important industries they have gone much further. Thus most of the great coal export business is done by powerful organizations, combining mine operators, marketing companies, shipping lines, and foreign distributing companies. This gives British coal its grip in the rich South American market. British cement manufacturers are united in a strong and successful union for the extension of their over-seas trade. Recently a number of large British manufacturers of machinery of all sorts have formed the Representation for British Manufacturers (Ltd.), an organization to handle their business in certain important foreign markets and to carry on an aggressive campaign for its extension. Similar organizations for foreign trade are in process of formation among other British manufacturers. In the electrical, cotton-textile, pottery, tobacco, wall paper, iron and steel, and various other industries strong associations and combinations are important factors in foreign and domestic business.

It is against such organizations as these, uniting powerful groups of foreign concerns, backed by great banks aided by railway and ship lines, and vigorously assisted by foreign Governments that hundreds of comparatively small American manufacturers and producers must compete for trade beyond our shores. Some of the foreign trade combinations, which enjoy overwhelming advantages in international trade, have established branches and plants here which compete with American manufacturers for the home trade. Moreover, in some industries our smaller manufacturers must compete abroad with great American companies having most efficient world-wide selling organizations.

In various manufacturing industries the lack of raw materials, higher manufacturing costs, and similar handicaps make it extremely difficult at best for Americans to compete with foreigners for trade abroad. Therefore, with Americans suffering rigorous competition from powerful foreign combinations and forced to expose secrets of their over-seas business to their foreign competitors and to risk effective discrimination against their trade through dependence on foreign cables, telegraphs, banks, and ships, our manufacturers, and especially our smaller producers, are frequently at a decisive disadvantage in foreign trade.

FOREIGN BUYING COMBINATIONS WHICH DEPRESS AMERICAN EXPORT PRICES.

In various markets American manufacturers and producers must deal with highly effective combinations of foreign buyers. Thus exporters of lumber find such combinations in Australia and on the Continent of Europe.

Cottonseed products are handled by combinations of buyers in Holland, Denmark, and Germany, and Austrian cotton-textile manufacturers have a buying combination to import their raw cotton. The Wholesale Cooperative Societies (Ltd.), an astonishingly comprehensive wholesale buying organization maintained by 1,400 cooperative societies in Great Britain, has one buyer in New York who annually purchases millions of dollars' worth of American products. Combinations of British coal brokers fix the contract price for bunkering ships at Newport News. Four London firms, known as the Fixing Board, daily set the price of silver for the world, and American mining companies must sell their silver for either the English or the great Indian market to one of these four houses. For years the copper trade of the world has been ruled by a vast German metal-buying organization centering in the Metallbank and Metallurgische Gesselschaft A. G. of Frankfort on the Main. This combination has subsidiary and affiliated companies in Germany, England, France, Spain, Switzerland, Belgium, Africa, and Australia, controls copper and lead mines and smelters in the United States, Mexico, and other countries, and works in agreement with other German metal-buying concerns.

These combinations constantly make individual American producers bid against each other, and are thus able to buy at prices near or below the cost of production. By such tactics the present contract price for bunkering ships in Hampton Roads has been fixed at 5 to 7 cents per ton below domestic price. By similar means and the manipulation of the foreign future markets the German metal-buying combination over a series of years has bought millions of tons of American copper at prices averaging a cent a pound below the prices paid by American consumers.

SACRIFICING OUR NATURAL RESOURCES.

Our forests constitute a rich source of timber, our coal measures are among the greatest known, our phosphate-rock deposits parallel the potash beds of Germany, our copper mines produce more than half the world's output and are necessary for the world's demands. Other nations take measures to conserve their national resources. A combination of Chilean producers fixes export quotas and prices for iodine. The German Government promotes combination among German potash producers, with a Government board to determine output for domestic and export trade, and the law prohibits sales abroad below the prices fixed for domestic business. We, on the contrary, because our industrial organization is unsuited to international commerce, are favoring foreign above home consumers, and without present gain are wasting the priceless heritage of future generations. The mere statement of these conditions should be sufficient for their correction.

COOPERATION NEEDED IN AMERICAN FOREIGN TRADE.

If Americans are to enter the markets of the world on equal terms with their organized competitors and their organized customers; if they are to expand the foreign trade of the United States as they should, and if our small producers and manufacturers are to obtain their rightful share of foreign business on profitable terms, they must be free to unite their efforts. We are in danger of being misled into overconfidence and baseless self-assurance by the imposing totals of our present abnormal foreign trade. A great part of our present foreign trade is purely war business which will end with peace. Another part is enforced buying by parties cut off from former sources of supply, and unfortunately much of this business is being done on terms and by methods that are alienating the purchasers and that insure the diversion of their trade to other countries at the earliest opportunity. Moreover, the end of the war will doubtless see vigorous efforts by Europeans to recapture lost trade. Therefore, earnest thought should be given to measures for the improvement of our foreign business.

Our surplus foodstuffs and raw materials will sell themselves at some price, but to avoid needless expense in distribution, to meet formidable foreign buying organizations, to insure reasonable export prices, and to prevent the profitless exhaustion of our natural resources, cooperation among American producers is imperative.

In the sale of our factory products cooperation is equally necessary. Such goods must be advertised, demonstrated, and a market created among alien peoples, often in the face of determined and destructive competition from great combinations of foreign manufacturers. But if our industrial development is to proceed as it should, the foreign business of our manufacturers must be expanded. Obviously only strong organizations can undertake the contest. If groups of American manufacturers and producers, either competing or noncompeting, can combine their efforts, they can share the cost of developing new markets, can establish themselves firmly, can assist in the financing of foreign enterprises, can more readily extend credit to foreign customers, and can compete more successfully with foreign syndicates and cartels. Precisely such action by our manufacturers is therefore one of the first requisites for the successful growth of our industries.

PREVENT DANGER OF MISUSE OF COOPERATIVE EXPORT ORGANIZATIONS.

Two chief dangers from cooperative export organizations of American manufacturers and producers are apparent. They may be used to exploit the home market and they may be used unfairly against individual American exporters in foreign trade. The dangers in cooperative action must be faced frankly and provided against fully.

The commission is confident that this can be done without sacrificing the essential advantages of joint action and without altering the policy of the antitrust laws or interfering with their enforcement. Thus specific extension of the law prohibiting unfair methods of competition to export trade and requirement of full reports to the Federal Trade Commission from cooperative export organizations will protect the individual exporter, while the enforcement of the antitrust laws will prevent the use of such organizations to effect restraint of trade or monopoly in the domestic market.

The commission does not believe that Congress intended by the antitrust laws to prevent Americans from cooperating in export trade for the purpose of competing effectively with foreigners, where such cooperation does not restrain trade within the United States and where no attempt is made to hinder American competitors from securing their due share of the trade. It is not reasonable to suppose that Congress meant to obstruct the development of our foreign commerce by forbidding the use, in export trade, of methods of organization which do not operate to the prejudice of the American public, are lawful in the countries where the trade is to be carried on, and are necessary if Americans are to meet competitors there on equal terms.

DECLARATORY LEGISLATION RECOMMENDED.

By its investigation the commission, however, has established the fact that doubt as to application of the antitrust laws to export trade now prevents concerted action by American business men in export trade, even among producers of noncompeting goods. In view of this fact and of the conviction that cooperation should be encouraged in export trade among competitors as well as noncompetitors, the commission respectfully recommends the enactment of declaratory and permissive legislation to remove this doubt.

The commission feels that it would fail in its duty if it did not urge the pressing need of such action immediately. If American business men are to make the most of the great opportunities now before them, are to build securely in foreign trade, and are to avoid disaster in the shock of the stern and determined competition that will doubtless follow the war, they must at once perfect the organization demanded by the conditions of international trade.

Respectfully submitted.

JOSEPH E. DAVIES, *Chairman*,
EDWARD H. HURLEY, *Vice Chairman*,
WILLIAM J. HARRIS,
WILL H. PARRY,
GEORGE RUBLEE,
Federal Trade Commission.

Mr. Speaker, there has been a great deal of argument here of a very shadowy and scary sort, that great trusts are going to be formed. The gentlemen who make that argument evidently have not read this bill, because it is hedged about as carefully as it is possible to hedge about any bill. The moment these agencies begin to act so as to be unfair, not to restrain trade, but to be unfair, the Federal Trade Commission can jerk them into the court and stop it by injunction and send them to jail. The moment they begin to restrain trade in the United States the Sherman antitrust law steps in. All that this bill does is to put the American manufacturer and exporter on equal terms with his competitor, and every American wants to give them a chance to do that, and unless we do it we may as well go out of the export business. I appeal to this House not to be carried away by this argument that it affects big or little business. I am in favor of all business, big or little, if it is just, legitimate, and honest, but, as has been said here, this bill is for the purpose of aiding little honest business. If you want to

drive out of business little concerns which can not go around the world like the Standard Oil, the United States Steel, the International Harvester, then kill this bill and give the little fellow no opportunity to combine in a selling agency by which he can sell his goods abroad and meet the competition of the men who sells their goods around the world. Now, I would ask that this bill be read and put to a vote.

The SPEAKER. The question is on agreeing to the committee amendments.

The question was taken, and the committee amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading——

Mr. MORGAN. Mr. Speaker, I have an amendment. Let the bill be read by sections under the five-minute rule.

The SPEAKER. If anybody wants the bill read by sections——

Mr. STAFFORD. Mr. Speaker, this is a House bill and has been read once. The question is if the gentleman from North Carolina wishes to move the previous question on the bill.

The SPEAKER. The bill does not have to be read by sections. If the gentleman has an amendment he can send it up.

Mr. MORGAN. I offer this amendment as a proviso after section 2, page 3.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Mr. MORGAN offers the following amendment: At the end of section 2, line 3, page 3, strike out the period and add a colon and the following proviso:

"*Provided*, That before any association shall engage in business under this act it shall secure from the Federal Trade Commission a permit to engage in such business, and the said commission is authorized to issue such permits, and may, in its discretion, refuse a permit to any association, and may, after hearing, cancel any permit issued."

Mr. MORGAN. Mr. Speaker, I think those who heard this amendment read will understand its object. Of course, if this bill is going to pass, I would like to have it amended in a way that will make it as least harmful as possible. This gives to the Federal Trade Commission the power to grant permits to associations; in other words, before associations can be formed and do business under this act they must make an application to the Federal Trade Commission, and that commission has the authority to grant that permission or refuse to grant it. We will suppose here comes up an association composed of all the lumber producers in the United States, which might occur, and they file their application with the Federal Trade Commission. That commission says, "Well, we do not think it is proper that all the lumber producers of the United States should enter into a combination to engage in the export trade and thus monopolize the entire export trade."

Mr. JOHNSON of Washington. Will the gentleman yield? That is a preposterous statement. The rail shippers could not go into that kind of a combination——

Mr. MORGAN. Mr. Speaker, I refuse to yield, and I hope the gentleman will observe the rules here. I will be very glad at the proper time to yield; but now we will suppose that all the millers of the United States should join in one combination, which they can do under this act. The Federal Trade Commission will say that that is not proper; that is an outrage; you can form a half dozen or a dozen associations, but you can not all go in together. We will suppose the United States Steel Corporation, with all the minor steel companies, should come in and want to form an association to engage in the export trade in exporting steel and its products. Under my amendment the Federal Trade Commission can say that is not proper and could refuse to permit it. Now, that is all this amendment is. Is not that fair?

Mr. MADDEN. Will the gentleman yield for a question?

Mr. MORGAN. I will.

Mr. MADDEN. Who is to pass on that question under the terms of the bill?

Mr. MORGAN. Nobody passes on it. Companies have absolute authority. They can unite in spite of any authority. Now, I say to the chairman of this committee, is not that fair, and is he not willing to trust the Federal Trade Commission to pass on these applications?

Mr. WEBB. If the gentleman will look on page 4, with reference to the requirements of this bill it says that within 60 days after the passage of this act that if one of these associations is formed it shall file with the Federal Trade Commission a verified written statement setting forth the location of its offices or places of businesses and the names and addresses of all its officers and all its stockholders or members, and so forth. They must show everything about it.

Mr. MORGAN. Yes; they have to show where they live and where they come from, but that does not give any authority to refuse a permit to these organizations. Suppose a man is a thief. What kind of a law would it be to say a man may steal if he will first give his address? If these export combines are monopolies there is nothing gained by requiring them to give their addresses.

Mr. WEBB. If the gentleman is a thief he has to state it under oath and tell the Federal Trade Commission he is a thief under this act.

Mr. MORGAN. That is all bunk. Let us be fair about it. It does require them to state where they came from——

Mr. WEBB. And what they are doing.

Mr. MORGAN. But the Federal Trade Commission can not refuse them the right to organize.

Mr. WEBB. Congress permits them to organize and the Federal Trade Commission controls them.

Mr. MADDEN. Will the gentleman yield?

Mr. MORGAN. Yes.

Mr. MADDEN. I would like to ask the gentleman whether he thinks it wise to grant the power to the Federal Trade Commission to say whether these companies can organize or not? Might not the Federal Trade Commission be prejudiced against some line of industry in which certain men were engaged and prevent them from doing a thing which other men were permitted to do?

Mr. MORGAN. I will admit members of the Federal Trade Commission are not all wise, because I think they have acted very unwisely in supporting this measure. But you have to trust somebody. I think they might do wrong occasionally. But on the whole we will assume that here is a bill which they have supported and recommended and boosted in every way possible, and I think we have to assume that these public officers would be fair under the law.

Mr. HUDDLESTON. Will the gentleman yield?

Mr. MORGAN. Yes.

Mr. HUDDLESTON. Will the gentleman permit me to call attention to the fact that if the Federal Trade Commission shall discover that the firm is operating in restraint of trade, there is no law to stop it, but a suit may be instituted against it that may be prolonged for years?

Mr. MORGAN. They pretend there that if they find they are engaged in unfair practices, which is another indefinite term, they can call them before it and give them a lecture, and if they do not desist they can file the papers down there. But they may restrain trade and yet engage in no unfair practices.

Mr. MADDEN. Is there any real reason on earth why American business men ought not to be permitted and encouraged in every way within the power of the Government to exploit the trade of the world outside of the United States, and ought not we to make them just as strong as it is possible for the Government to make them in order to enlarge the trade of the American people in the countries of the world?

Mr. MORGAN. If that is the policy, then we ought to repeal the Sherman Antitrust Act.

Mr. MADDEN. What has that got to do with this?

Mr. MORGAN. And we ought to repeal the Clayton Antitrust Act, and the Federal Trade Commission act, and wipe off the statute every line of law that in any way restricts them.

Mr. JOHNSON of Washington. Does the gentleman think we ought to cut off the commercial attachés that we send throughout the world in order to get this business?

Mr. WEBB. Let me call the attention of the gentleman to this language, on page 4:

It shall also furnish to the commission such information as the commission may require as to its organization, business, conduct, practices, management, and relation to other associations, corporations, partnerships, and individuals.

Any association that does not do that can have its charter taken away from it, and they can be stopped from doing business and fined $100 a day for each and every day of the continuance of such failure.

Mr. MORGAN. They get all the information, but they can go on and incorporate, and of course there is a restriction in regard to engaging in unfair practices. Then they can proceed against them, but——

Mr. HARDY. Will the gentleman yield?

Mr. MORGAN. I will.

Mr. HARDY. I will ask the chairman of the committee to listen to this interrogatory. It seems to me that on page 4 these corporations are required to furnish information, but if the information furnished or other sources of information demonstrate they are violating the provisions of this law there is no remedy provided by this act. There is not any provision that stops them from the rights under this act except that if they fail to make a report they shall no longer have rights under this act. But if their reports show they are violating the provisions of this law

or are not complying with this law, they still can go on with their business.

Mr. WEBB. If that is the case, they are liable both under the Federal Trade Commission law and the Sherman antitrust law.

Mr. HARDY. It only requires a condition that they shall report to the Federal Trade Commission what they shall do, and it does not provide any penalty if they report the truth and the truth shows they are violating the law.

Mr. MORGAN. Coming back to the discussion of my amendment, here is the bill, without restriction, that authorizes the combination of all manufacturing concerns. My amendment puts a limitation on that. We have created a Federal Trade Commission that is supposed to have special power to deal with trusts and monopolies, and so forth and so on. The Trade Commission is supposed to be composed of the best men we can get, though I confess my admiration for that commission, which I earlier advocated, has been somewhat weakened, but I am willing to make allowances. But there is that great commission, and I say why not give absolute authority or give the right to this commission to pass on the applications to engage in export trade? It would prevent the lumber dealers combining. It would prevent all the other great combinations, all the steel corporations, combining. It would give a little limitation. Why is not that right and proper?

Mr. MADDEN. Will the gentleman yield?

Mr. MORGAN. For a question.

Mr. MADDEN. This is a question. I understand the gentleman to say that he had lost confidence in the commission?

Mr. MORGAN. Partly.

Mr. MADDEN. If he has, why does he want to give them this extreme power?

Mr. MORGAN. I still have more confidence in the commission than I have in some of our big corporations. I do not think I am very rabid against so-called big business, but I do not think we have gone far enough in the control and regulation of our big business concerns. However, I believe the tendency is for the concentration of wealth in a few hands, and I do not think a man is a radical who calls attention to that.

Now, for instance, you take the report of the Commissioner of Internal Revenue for 1915 of the individual income tax, and what does that show? It shows there are 120 persons in the United States each of whom have a net annual income in excess of $1,000,000. There are 329 persons each of whom have a net annual income in excess of $500,000, and there are 3,874 persons each with a net annual income in excess of $100,000. Now, in the aggregate 336,672 persons have a net annual income of $6,794,000,000.

Do you know how much that is? It is more than the value of all the annual crops produced by the six and one-half million farmers in the United States, and it is double in amount the entire wages paid to the seven millions of men employed in the manufacturing establishments in 1910. In other words, it shows that 336,672 persons have a greater net income than 14,000,000 persons constituting our best-paid labor. In other words, 336,672 persons, representing a population of about 1,500,000 persons, have a net annual income greater than 14,000,000 wage earners representing 70,000,000 people.

Now, then, I say there is a tendency to concentration, and this great wealth has developed under this system of large corporations. I believe we have to have large corporations, but we ought to exercise greater and greater control over them. This bill is a step backward, and we ought to place this restriction on them. So I appeal to the Republicans here to permit this amendment, to vote for this amendment, which places a little restriction upon these combinations and places it in the hands of the Federal Trade Commission. I appeal to you Democrats here, who ought to look at the question with a view to the historical teachings of your party. You ought not, by your vote here to-day when you come to the roll call, to go back upon your record for 25 years, the record of your party platforms, the record of your party leaders, the record of the speeches that you have made in Congress, with which for years you have filled the CONGRESSIONAL RECORD. You must have some respect for past history, and in behalf of the people of the country you should place some restriction on the organization of these combinations. Give this power to the Federal Trade Commission to say something about what combinations shall be made for the purpose of controlling our export trade. [Applause.]

Mr. MADDEN. The gentleman stated the number of people who have large incomes. I suppose he would be willing to admit that those men are only the instrumentalities by means of which these incomes are kept at work for the benefit of the industrial side of American life, by means of which men are kept employed. They are not the owners of this wealth. They do not possess that wealth in the shape of cash. Their incomes are in a large measure in railroad tracks, in railroad ties, in cars, in wagons, in horses, in machinery of all kinds; and that is wearing out all the time. The simple fact of the matter is that the men with large incomes are merely the trustees who have the brains sufficient to manage the industrial side of American life and keep the activities of the country in motion and the people of the country employed.

Mr. MORGAN. I sympathize with that splendid sentiment that the gentleman from Illinois has uttered. [Laughter.] I sincerely do. I have the very highest admiration for the splendid business men of this country. Certainly ours should be a great country, and we would not be a great people unless we had these splendid business men with broad vision and great talents and the nerve and foresight and vision to conduct these great business interests. I want to see our great business men in every sense be greater and broader than the business men of any other nation. We ought to be proud of them, and I am proud of them. We can not be a great Nation without great captains of industry in this country; certainly not. But, on the other hand, our great business men have the same human nature that we small business men have. They have their viewpoint, and there is always danger that they will overlook the great masses for whom they work. But when I see by the official record that 336,000 men, representing about one million and a half people, have net annual income equal to what 14,000,000 men have, representing 70,000,000 people, I almost fear for the safety of the country.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman from Oklahoma yield to the gentleman from Wisconsin?

Mr. MORGAN. Not just now.

Mr. STAFFORD. The gentleman has an hour.

Mr. MORGAN. Just in a moment. I want to finish this sentence. While it is true that we need great business men, and while it is true that we admire them, on the other hand our real safety in this Nation to-day, when we are in war, depends not so much upon our leaders as upon the great masses of American citizens; and while we should admire our great business men, we must remember, after all, that the safety of our Nation in the future lies in the great masses of the people. The way our people are fed, the way they are clothed, the way they are housed, the way they are educated will determine the character of the future generations. So, while we admire our business men, yet we must remember that the real glory of the country is in the great masses of our citizenship, excelling in character, as I believe, the citizenship of any other nation on earth.

Mr. MADDEN. Will my friend yield for another question?

Mr. MORGAN. Just excuse me. I promised to yield to the gentleman from Wisconsin [Mr. STAFFORD] first.

Mr. MEEKER rose.

The SPEAKER. For what purpose does the gentleman from Missouri rise?

Mr. MEEKER. I rise to make the point of order that the gentleman is not discussing the amendment.

The SPEAKER. The gentleman will confine himself to the amendment.

Mr. MADDEN. Now, will the gentleman yield?

Mr. MORGAN. Yes.

Mr. MADDEN. The gentleman from Oklahoma will recall the time when all the wagons made in the United States were made in the country crossroad blacksmith shop, when all the horseshoes were made there, when all the buggies and things like that, and the plows and harrows were made in the blacksmith shop at the corners of the road. Now, if the crude method of conducting the business of the country in those days had not been improved they would then continue to this day, would they not? And it is only because of the improved methods of conducting the business, and the magnitude of the business, and the interrelationship of all the things that make up the activities of the American people, that we have been obliged to concentrate into bigger concerns, so that the man with $50, or the man with $1,000 at any rate, may join with another man with $1,000, and they with others may have a capital of $1,000,000 in one concern, and no one person in the concern will own any more than $1,000; and yet if the gentleman's notion of things would prevail, we would go back to the oxcart period, instead of moving on to meet the conditions that prevail now throughout the world?

Mr. MORGAN. I think the gentleman is unfair in his conclusion.

Now I yield to the gentleman from Wisconsin.

Mr. STAFFORD. If I understand the gentleman's amendment, it purposes to vest absolute power in the Federal Trade Commission to authorize these associations to be formed.

Mr. MORGAN. Yes.

Mr. STAFFORD. Does the gentleman believe such autocratic power should be vested in any commission of the Government, to determine who shall do business in the export trade?

Mr. MORGAN. It does not determine who shall do business.

Mr. STAFFORD. The commission will have the authority to negative an application to do this business, and under that authority they certainly have the power to forbid corporations organizing to control the foreign trade.

Mr. MORGAN. They do not determine who shall combine together.

Mr. STAFFORD. It would place in the hands of the Federal Trade Commission the power to single out certain favored combinations as against other combinations which might wish to engage in the foreign trade.

Mr. GRAHAM of Illinois. Does not the bill as drawn on page 5 give the Federal Trade Commission more power than that already? It gives them absolute power to determine whether any combination is operating in restraint of trade or not, and without any power of appeal to anybody or any place—absolute and unlimited power—more than is contained in the amendment of the gentleman.

Mr. STAFFORD. In reply to that suggestion, I beg to call the attention of the House to the fact that there had to be some facts upon which the Federal Trade Commission would have to predicate their action; but in the amendment, as purposed by the gentleman from Oklahoma, they could negative and refuse the right of corporations to combine to control the foreign trade, whether there were any facts that justified it or not. Absolute power would be vested in the Federal Trade Commission to do as they saw fit.

Mr. MEEKER. Does not the gentleman from Wisconsin think the greatest good fortune that could come to this country would be for all the flour men in the country to get together?

Mr. STAFFORD. The gentleman does not appreciate the basis of my objection, which is that it would place in the Federal Trade Commission the authority by their ipse dixit to say who shall control our foreign trade.

Mr. MORGAN. I decline to yield further, Mr. Speaker.

The SPEAKER. The gentleman from Oklahoma declines to yield further.

Mr. MORGAN. If this should be voted down, there is another kind of limitation which might be presented, and that is to limit the percentage. We will suppose, for instance, that the United States Steel Corporation controls 50 per cent of all the steel products of the country. Now, would the gentleman be in favor of permitting the Steel Corporation to combine with other corporations for the purpose of engaging in the export trade? I should like to be informed upon that.

Mr. WEBB. If it is not in violation of a law of the United States, yes; I would be willing that there should be a combination between anybody or anything for the purpose of capturing the trade of the world, if they do not punish the people of the United States in doing it.

Mr. MORGAN. The gentleman is honest in his logic, at all events.

Mr. WEBB. Does not the gentleman want our corporations and our people to take the world in trade if they can do it honestly?

Mr. MORGAN. I do not want any corporations in this country to engage in business here, in local trade or in export trade, with arbitrary power to control and fix prices, and by no vote of mine will I ever sanction such a thing.

Mr. WEBB. The gentleman has not answered my question.

Mr. MORGAN. I am opposed to that. You admit here that you are willing that the United States Steel Corporation, against which proceedings are pending in the Supreme Court of the United States, a corporation that admittedly has been able to dictate the price of steel rails for a quarter of a century, that dominates and controls that business in this country, shall combine with lesser corporations to absolutely control the export business of the country.

Mr. WEBB. I made no such admission.

Mr. MORGAN. I am not for such a proposition as that.

Mr. WEBB. I made no such proposition.

Mr. MORGAN. You did admit it, as I understood your proposition.

Mr. WEBB. Oh, well, I beg the gentleman's pardon. If my friend will allow me, I said that I am willing for the United States Steel Corporation, or any other corporation, or any other set of individuals to form a foreign selling agency and carry on their business in foreign countries as the laws of those foreign countries permit them, and that is what this bill does.

Mr. MORGAN. That is what I said the gentleman said. I do not think this House should vote for such a proposition. I do not think you ought to vote for the arbitrary control of prices by the great corporations of this country.

Mr. WEBB. Mr. Speaker, I regret to insist on the point of order made by the gentleman from Missouri that the gentleman from Oklahoma is not discussing the amendment.

Mr. FOCHT. What is the difference, if he is making a good argument?

The SPEAKER. Under the rules of the House, the point of order being made, the gentleman must speak to the amendment.

Mr. MORGAN. I am trying to.

The SPEAKER. The trouble with the gentleman is that he lets these other men divert him from his line of argument. [Laughter.]

Mr. MORGAN. No; Mr Speaker, I think not. In all earnestness, I was undertaking to speak to my amendment absolutely and strictly, and the point of order is not well taken.

Mr. MEEKER. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. MEEKER. Was the gentleman's peroration awhile ago, that he did not want to be interfered with, speaking to the question?

The SPEAKER. That is past and gone.

Mr. MADDEN. I suppose my friend from Oklahoma will admit that no combination authorized to sell goods abroad would be able to fix prices for its commodities abroad unless the people abroad were willing to let it do so. Would he be willing to admit that?

Mr. MORGAN. Oh, no——

The SPEAKER. The Chair will state that the question asked by the gentleman from Illinois [Mr. MADDEN] has nothing on the face of the earth to do with this amendment, and the gentleman from Oklahoma is absolved from answering the question. [Laughter.]

Mr. JOHNSON of Washington. Mr. Speaker, may we have the amendment read, so that we will know what it is?

The SPEAKER. If there be no objection, the Clerk will report the amendment again.

Mr. MORGAN. I object.

Mr. JUUL. May we not have the amendment read?

Mr. MORGAN. I withdraw my objection, and ask that it be read in my time.

The SPEAKER. The Clerk will report the amendment.

The amendment was read.

Mr. MORGAN. Now, to go back to the original proposition, which I think will bear repetition. This bill gives absolute power, without restriction or limitation, to all manufacturing concerns, big and little, to combine in the export trade, and is broad enough so that the steel companies can combine with the lumber companies and the mill companies, and we will have one big corporation doing all the export business in those lines. What do we want to do? We want to put a little restriction or limitation upon them and give the Federal Trade Commission authority to look after such matters as this. My amendment provides that before any of these associations can do business they must get a permit from the Federal Trade Commission.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. MORGAN. Yes.

Mr. JOHNSON of Washington. Let us suppose that certain manufacturers go into a combination for the export business in China; that they induce all of the Chinese people to wear shirts; and that causes an increase in price of shirts in the United States. There would be a great hue and cry among the muckrakers that the price of shirts had gone up and that we were robbing the Chinese. Petitions would come in and Members of Congress would go to the Federal Trade Commission to cancel this right of combination, and the shirts in China would be cut off at the pocket or at the tail. [Laughter.] What happens to business?

Mr. WEBB. Mr. Speaker, I make the point of order that the question is not germane.

Mr. JOHNSON of Washington. The question is pertinent to the amendment proposed to allow these corporations to go into a combination, and that it may be suspended by the Federal Trade Commission without even a notice.

The SPEAKER. The amendment provides, in substance, that nobody can enter this arrangement provided for in the bill unless he gets the consent of the Federal Trade Commission.

Mr. JOHNSON of Washington. And that it can be canceled without notice.

The SPEAKER (reading)—

Provided, That before any association shall engage in business under this act it shall secure from the Federal Trade Commission a permit to engage in certain business, and said commission is authorized to issue such a permit and may in its discretion refuse a permit to any association, and after hearing to cancel any permit issued.

There are three propositions in the amendment.

Mr. JOHNSON of Washington. I would like to have the gentleman answer my question.

Mr. MORGAN. I will answer it later on if I can get the time. Now, I have been lecturing the Democratic Party because this bill is contrary to their principles. I want now to talk especially to the Republican Members. We have been assailed by our political opponents throughout the year on the ground that we were controlled by the great moneyed interests of the country.

Mr. WEBB. Mr. Speaker, I make the point that the gentleman is not talking to his amendment.

The SPEAKER. The gentleman from Oklahoma will proceed in order and discuss his amendment.

Mr. MORGAN. Of course, I yield to the Speaker's judgment, although I think if he had waited until I had got my preliminary statement made he would have thought otherwise. And especially as I was going to lecture my Republican brethren, I am a little surprised that he held my remarks out of order, but I have no doubt that he did it in good faith.

Mr. ADAMSON. Will the gentleman yield?

Mr. MORGAN. No; I can not yield. I insist that we ought not to give unlimited power to these combinations. I have said that several times before, but until I am satisfied that I have convinced the gentleman I want to keep repeating that statement. Some one says that the foreign nations allow combinations and that we must permit combinations in order that we may compete with the foreign combinations. I believe that combinations abroad are just as wrong as they are at home.

Mr. WEBB. Mr. Speaker, I make the point of order that the gentleman has not touched his amendment since he was admonished before.

The SPEAKER. The point of order is sustained.

Mr. MORGAN. Mr. Speaker, may I proceed in order?

The SPEAKER. Yes.

Mr. HAMILTON of Michigan. Will the gentleman yield?

Mr. MORGAN. Yes.

Mr. HAMILTON of Michigan. In relation to the far-reaching question propounded by the gentleman from Washington in relation to Chinese shirts——

Mr. MORGAN. I can not yield for that.

Mr. HAMILTON of Michigan. That was an illustration, and what I want to ask the gentleman is whether the Chinese, having been induced——

The SPEAKER. The gentleman from Michigan is out of order. The inquiry of the gentleman has nothing to do with this amendment. If the gentleman wants the rule construed strictly the Chair will do so.

Mr. MORGAN. Now, gentlemen, I do not wish to detain the House much longer. In my judgment this amendment is very appropriate and proper. I think it is very unwise for this great Government, with 100,000,000 people, to permit combinations without restriction upon our manufacturing concerns to engage in export trade. I believe if the bill is passed at all there ought to be some limitations and restrictions. I believe while there is some danger in trusting the Federal Trade Commission with this power, under the circumstances it is the best we can do. We are passing bills and measures every day in which there is almost unlimited power given to the President or some officer. The power that this would give to the Federal Trade Commission is very limited compared with the great powers we are conferring on the President and other officers. It would be a safeguard to the people. I do not believe that the people of the United States have ever understood this bill. If they did I believe there would be a protest against it. Here are great business concerns that want this passed.

The administration in power that seems to be in favor of great business interests and concerns, and the Federal Trade Commission, that was supposed to be designed to destroy the trusts, has come here in favor of the bill that will do more to create trusts and monopolies than all the legislation the Republican Party has enacted for half a century.

Mr. WEBB. Mr. Speaker, I make the point of order that the gentleman is not speaking to his amendment.

Mr. MORGAN. I am discussing the amendment in good faith.

Mr. WEBB. I am going to make the point of order every time the gentleman gets away from his amendment.

The SPEAKER. The point of order is sustained.

Mr. MORGAN. We are going backward, and in this day and age the whole tendency of this Nation, as well as foreign nations, is to give power into the hands of the executive. Our courts have fallen down. Everywhere our courts are crowded with business. They can not transact the business. There is too much Federal business, too much State business, too much county business, and the courts can not attend to this business. So we have to create these great commissions and confer upon them both judicial and administrative powers, and that is what my amendment proposes to do. It probably gives to the Federal Trade Commission both judicial and executive power, but we have already done that. This is right along in line with the rest of the legislation in this country. Let us go one step further and gives this Federal Trade Commission these additional powers, and let that great Federal Trade Commission, even though it is under Democratic persuasion at the present time, stand there between the great corporations of the country and the great masses of the people as a slight protection to the people against the great combinations of money in this country. That is what I am asking.

Mr. ROBBINS. Mr. Speaker, will the gentleman yield for a question?

Mr. MORGAN. If it is in order.

Mr. ROBBINS. I want to ask the gentleman this: His amendment proposes to authorize the Federal Trade Commission first to issue permits?

Mr. MORGAN. Yes.

Mr. ROBBINS. And, second, to inquire whether they are complied with, and then, if not complied with, to revoke them?

Mr. MORGAN. If necessary.

Mr. ROBBINS. Does not this act, on page 5, line 5, give the United States district attorney power to prosecute and bring about a forfeiture for the very thing that you are proposing to give to the Trade Commission?

Mr. MORGAN. Oh, no. If they violate any law, of course the United States district attorney can prosecute them—that is, if he can convict them—but if they do not do any better in conviction than the present administration has we might as well not have the law at all. When you give that commission the administrative power to simply refuse an organization, to simply by one stroke of the pen cancel their permits, then you give them power that is worth something; but when you have to go into court, indict them, try them, and go through all of that, you are powerless to do any good. Any student of the subject knows that if you want an effective law you must give it to administrative officers. The courts are powerless to enforce the laws. Give it to the hands of an executive officer, which I propose to do by this amendment, and there it stands. That democratic Trade Commission shall say, in the first place, who shall engage in the business, and, second, if they engage in the business and are not conducting themselves right, or if conditions change so that they ought not to be in the business, there is that Federal Trade Commission with power to arbitrarily close down the business. That is the kind of power that we need now to make it effective.

Mr. MEEKER. Does not the gentleman believe that even corporations should have a right to go into court to defend themselves against even a Federal trade commission?

The SPEAKER. That question is out of order. It has nothing to do with this amendment.

Mr. STEENERSON. Mr. Speaker, will the gentleman yield?

Mr. MORGAN. Yes.

Mr. STEENERSON. On page 2 of the bill I find this provision:

And provided further, That such association does not, either in the United States or elsewhere, enter into any agreement, understanding, or conspiracy, or do any act which artificially or intentionally and unduly enhances prices within the United States of commodities of the class exported by such association.

The question arises if this combination authorized by this section might not unduly depress prices——

The SPEAKER. That question is out of order.

Mr. STEENERSON. I submit, Mr. Speaker——

The SPEAKER. Everyone who undertakes to talk about this amendment has to talk about the amendment.

Mr. STEENERSON. This amendment refers to this section that I am speaking of, and, of course, it limits——

The SPEAKER. Where does this amendment refer to this section?

Mr. STEENERSON. It comes at the end of the section.

The SPEAKER. I know it does.

Mr. STEENERSON. Well, you see this amendment limits the power, and I desire to argue that point of order. It limits the power——

Mr. MORGAN. Mr. Speaker, I hope this does not come out of my time.

The SPEAKER. No; it does not come out of the gentleman's time.

Mr. STEENERSON. This authorizes an association or selling agency in the export trade.

The SPEAKER. What does?

Mr. STEENERSON. The section does.

The SPEAKER. I know it does.

Mr. STEENERSON. And this amendment provides that the permission to engage in that combination is left to the Trade Commission, and I am asking this question to understand the scope of this permission which the Trade Commission will give.

The SPEAKER. There is no mystery about this amendment. It provides for three things, and three things only, and they are very simple.

Mr. STEENERSON. It is not so simple as it may seem upon its face. This affects the export trade, and the permission is to engage in this combination in the export trade, and the section which this amendment is offered to provides there shall be no combination to depress the price in the domestic trade.

The SPEAKER. I know; but that is one question and this amendment is an entirely different question. This amendment simply goes to how this license or permit is to be issued.

Mr. STEENERSON. Certainly; and we have a right to consider the scope of the section.

The SPEAKER. Not on this amendment.

Mr. STEENERSON. Of course this amendment limits the scope of the section, and necessarily we have to discuss the scope of the section, whether it will affect the section——

The SPEAKER. The Chair thinks not.

Mr. HAMILTON of Michigan. Mr. Speaker, has not the Chair already ruled on that?

Mr. STEENERSON. This is the first time in 15 years since I have been in the House when a Member can not ask a question.

The SPEAKER. This rule is very rarely invoked. The gentleman himself has been here a number of years, and he knows that it is the rarest kind of a thing when one Member insists that a Member who is making a speech on an amendment shall confine himself to the amendment, but whenever the rule is invoked it is the business of the presiding officer, whoever he is, to enforce the rule.

Mr. STEENERSON. Yes; but the presiding officer in this instance declared what the scope of the amendment is and does so arbitrarily. I claim the scope of this amendment is to limit the section which governs this selling agency authorized by the section, and my inquiry was as to the powers that are embraced in that selling agency.

The SPEAKER. The Chair knows, and this amendment does not have a thing in the world to do with it.

Mr. STEENERSON. It has everything to do with it.

The SPEAKER. The Chair has ruled.

Mr. STEENERSON. Mr. Speaker, I desire to appeal from the decision. We have a right to find out about this bill.

The SPEAKER. The gentleman from Minnesota appeals from the decision of the Chair.

Mr. FOSTER. Mr. Speaker, I move to lay the appeal on the table.

The SPEAKER. The gentleman from Illinois moves to lay the appeal on the table.

The question was taken, and the Speaker announced the ayes seemed to have it.

Mr. STEENERSON. Mr. Speaker, I call for a division.

The SPEAKER. The gentleman from Minnesota demands a division.

The House divided; and there were—ayes 68, noes 11.

Mr. STEENERSON. Mr. Speaker, I raise the point of no quorum.

The SPEAKER. The gentleman from Minnesota makes the point of order that there is no quorum present, and evidently there is not.

Mr. WEBB. Mr. Speaker, I move a call of the House.

Mr. STAFFORD. There is an automatic call, Mr. Speaker.

The SPEAKER. Yes; it is automatic. The Doorkeeper will lock the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll. Those in favor of tabling the appeal, when their names are called, will answer "yea," and those opposed will answer "nay."

The question was taken; and there were—yeas 247, nays 21, answered "present" 8, not voting 154, as follows:

YEAS—247.

So the motion to lay the appeal on the table was agreed to.

The Clerk announced the following pairs:

For the session:

Mr. STEELE with Mr. BUTLER.

Ending June 11:

Mr. KITCHIN with Mr. MANN.

Ending Saturday:
Mr. DILL with Mr. JOHNSON of Washington.
Until further notice:
Mr. DENTON with Mr. COOPER of Ohio.
Mr. LITTLEPAGE with Mr. COOPER of West Virginia.
Mr. STEPHENS of Nebraska with Mr. SLOAN.
Mr. BELL with Mr. HAMILTON of Michigan.
Mr. CLARK of Florida with Mr. FULLER of Illinois.
Mr. LUNN with Mr. STERLING of Illinois.
Mr. HULL of Tennessee with Mr. HILL.
Mr. DALE of New York with Mr. HASKELL.
Mr. TALBOTT with Mr. STINESS.
Mr. BRUCKNER with Mr. KENNEDY of Rhode Island.
Mr. DENT with Mr. GEORGE W. FAIRCHILD.
Mr. FITZGERALD with Mr. FOSS.
Mr. CARTER of Oklahoma with Mr. DALLINGER.
Mr. CRISP with Mr. CANNON.
Mr. AYRES with Mr. COPLEY.
Mr. BORLAND with Mr. COSTELLO.
Mr. BRAND with Mr. CRAGO.
Mr. CANTRILL with Mr. FORDNEY.
Mr. BURNETT with Mr. DALE of Vermont.
Mr. CAREW with Mr. DEMPSEY.
Mr. CARLIN with Mr. EDMONDS.
Mr. ESTOPINAL with Mr. DARROW.
Mr. FIELDS with Mr. DYER.
Mr. COADY with Mr. GOULD.
Mr. CROSSER with Mr. FREAR.
Mr. DECKER with Mr. GRAY of New Jersey.
Mr. DEWALT with Mr. FREEMAN.
Mr. DICKINSON with Mr. DAVIDSON.
Mr. DIXON with Mr. DRUKKER.
Mr. DOOLING with Mr. DUNN.
Mr. GARRETT of Tennessee with Mr. KAHN.
Mr. MAHER with Mr. KENNEDY of Iowa.
Mr. GALLIVAN with Mr. IRELAND.
Mr. GRIFFIN with Mr. HEATON.
Mr. LEE of Georgia with Mr. MASON.
Mr. LEVER with Mr. HAYES.
Mr. HAMILL with Mr. KELLEY of Michigan.
Mr. SULLIVAN with Mr. WARD.
Mr. O'SHAUNESSY with Mr. ROWLAND.
Mr. POLK with Mr. NOLAN.
Mr. WISE with Mr. SNYDER.
Mr. GALLAGHER with Mr. TINKHAM.
Mr. EAGAN with Mr. SLEMP.
Mr. HARRISON of Mississippi with Mr. JOHNSON of South Dakota.
Mr. LAZARO with Mr. MCKINLEY.
Mr. LEA of California with Mr. MCLAUGHLIN.
Mr. HELVERING with Mr. WASON.
Mr. KEATING with Mr. WATSON of Pennsylvania.
Mr. LOBECK with Mr. MORIN.
Mr. JONES of Virginia with Mr. HUTCHINSON.
Mr. KEY of Ohio with Mr. MONDELL.
Mr. HOWARD with Mr. KEARNS.
Mr. NEELY with Mr. VARE.
Mr. MARTIN of Illinois with Mr. TILSON.
Mr. RIORDAN with Mr. PARKER of New York.
Mr. SHALLENBERGER with Mr. PETERS.
Mr. FLYNN with Mr. POWERS.
Mr. ROBINSON with Mr. PAIGE.
Mr. SEARS with Mr. TEMPLETON.
Mr. THOMAS with Mr. SCOTT of Michigan.
Mr. TAGUE with Mr. SINNOTT.
Mr. STERLING of Pennsylvania with Mr. WOOD of Indiana.
Mr. MAYS with Mr. SELLS.
Mr. STEVENSON with Mr. ROBERTS.
Mr. HULBERT with Mr. WINSLOW.
Mr. KETTNER with Mr. SCOTT of Pennsylvania.
Mr. MCCLINTIC with Mr. TREADWAY.
Mr. SAUNDERS of Virginia with Mr. HOLLINGSWORTH.
Mr. SHERLEY with Mr. HULL of Iowa.
Mr. SCULLY with Mr. SANFORD.

Mr. BUTLER. Mr. Speaker, I am paired with my colleague, Mr. STEELE. I am sure if he were here he would vote "aye" also, and therefore will let my vote stand. I will observe the pair on the next roll call.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present, the Doorkeeper will unlock the doors, and the gentleman from Oklahoma [Mr. MORGAN] has 10 minutes remaining.

Mr. MORGAN. Mr. Speaker, I ask that the amendment that I offered be read in my time.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. MORGAN: At the end of section 2, on page 3 of the bill, insert:

"*Provided*, That before any association shall engage in business under this act it shall secure from the Federal Trade Commission a permit to engage in such business, and the said commission is authorized to issue such permits and may in its discretion refuse a permit to any association and may, after hearing, cancel any permit issued."

Mr. MORGAN. Mr. Speaker, my time has been somewhat limited and I have been very free in allowing interruptions and have not had full time to discuss this amendment in all its importance.

Now, there are a good many here present at this time who have not been here and heard all of this discussion. So it will be necessary for me even in my 10 minutes of time to review somewhat the situation. Now, this bill, as you know, is called a bill to increase export trade; a very good title, a very commendable title, because we are all in favor of increasing our export trade in every proper way that is possible. Now, then, in order to increase our export trade this bill provides that any manufacturing concern or corporation may combine, that is, form a new corporation for the purpose solely of engaging in export trade. This bill permits associations, corporations, and individuals without restriction and limitation to combine for the purpose of engaging in export trade.

I have an amendment pending which proposes to limit and restrict to some extent these combinations. So my amendment provides that before any corporation shall be formed and be permitted to engage in export trade it shall make application to the Federal Trade Commission and get a permit or a license, if you please, to engage in this business. In other words, instead of allowing unlimited combinations of our large corporations as well as our small ones, we let this administrative power of the Federal Trade Commission pass upon these combinations. For instance, suppose the United States Steel Corporation and 8 or 10 of the next largest steel corporations should ask to form a combination to engage in export trade, the Federal Trade Commission would have authority simply to say, "You are already large enough to engage in export trade and we will refuse you the authority to combine for that purpose."

I think that is a reasonable restriction, a reasonable limitation. It is something, at least, to protect the great masses of the people from undue monopoly that may come from the organization of these large corporations into export associations, because I hold that it is an inevitable consequence that as individuals or corporations are combined for the purpose of export trade they in effect will be combined for local trade. If my friend from Pennsylvania and I are partners in export trade we will not be very far apart in our domestic trade. That would be utterly impossible.

Now, then, there is a proposition. One argument which I have not presented is this: There were a great many wise men who proposed and advocated that we should require all of our domestic corporations engaging in interstate commerce to secure a license from the Federal Government, a proposition which was really a very wise one. And I am not sure yet but that you will be driven to that position, so that we will have power over our domestic corporations which are engaged in interstate commerce, and have the Federal Trade Commission license these corporations. And then they will have an effective method to deal with them if they violate the law, because all they need to do is to revoke the license, and then they could not engage in business. They could not be compelled to proceed, as they are now, in a long prosecution. So that is an argument in favor of this amendment.

Mr. DILLON. Will the gentleman yield?

Mr. MORGAN. I will.

Mr. DILLON. Can the gentleman tell us what portion of our manufactured products constitutes our domestic trade and what portion our foreign trade?

Mr. MORGAN. My memory is that it is less than 10 per cent.

Mr. DILLON. Is it not about 30 per cent?

Mr. MORGAN. That is not my memory.

Mr. DILLON. Can the gentleman tell the committee what is the percentage on agricultural products that go into export trade?

Mr. MORGAN. I think only 5 per cent. It is a very small one. But it is the surplus product that has the most to do with the prices. So, following the argument presented by these wise men who are in favor of licensing our domestic corporations engaged in interstate commerce, it would be a good time now to try that method on these combinations which we are going to authorize to engage in export trade by giving the Federal Trade Commission the authority to license these combi-

nations. And then they could to some extent keep out the large corporations that are already large enough.

The main argument presented, the only thing that the advocates of this bill harped on all the time, was that this is for the benefit of the little corporation; for the benefit of the little fellow. They talked that all the time. That is what the Federal Trade Commission says. That is the argument that has been made before the Judiciary Committee—to help the little fellow. But if that argument is honest, if the men who present it are sincere, they ought not to object to my amendment.

The SPEAKER. The time of the gentleman has expired.

Mr. MORGAN. I hope that my amendment will pass. [Applause.]

Mr. WEBB. Mr. Speaker, I move the previous question on the bill and all amendments thereto to final passage.

The SPEAKER. The gentleman from North Carolina moves the previous question on the bill and all amendments thereto to final passage.

The previous question was ordered.

The SPEAKER. The question is on the amendment offered by the gentleman from Oklahoma [Mr. MORGAN].

The question was taken, and the Speaker announced that the noes seem to have it.

Mr. MORGAN. Mr. Speaker, I make the point of no quorum.

The SPEAKER. The Chair will count.

(The Speaker proceeded to count.)

Mr. MORGAN. Mr. Speaker, I withdraw my point of no quorum. I ask for a division.

The SPEAKER. The gentleman from Oklahoma asks for a division.

The House divided; and there were—ayes 11, noes 131.

So the amendment was rejected.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. STEENERSON. Mr. Speaker, I want to move to recommit the bill, if that is in order now.

The SPEAKER. The gentleman will send up his motion.

Mr. STEENERSON. I move to recommit the bill by inserting after the words "unduly enhances" the words "or unduly depresses."

The SPEAKER. The Clerk will report the gentleman's motion.

Mr. STEENERSON. On page 3, line 1, insert after the word "enhances" the words "or unduly depresses."

The SPEAKER. The gentleman from Minnesota moves to recommit the bill with instructions, which the Clerk will report.

The Clerk read as follows:

Mr. STEENERSON moves to recommit the bill to the Committee on the Judiciary with instructions to report the same back forthwith with an amendment, on page 3, after the word "enhances," on line 1, to insert the words "or unduly depresses."

Mr. WEBB. Mr. Speaker, I move the previous question on the motion.

The SPEAKER. The gentleman from North Carolina moves the previous question.

The previous question was ordered.

The SPEAKER. The question is on the motion of the gentleman from Minnesota [Mr. STEENERSON] to recommit with instructions.

The question was taken, and the motion was rejected.

The SPEAKER. The question is, Shall the bill pass?

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. MORGAN. Mr. Speaker, I make the point that there is no quorum present.

The SPEAKER. The gentleman from Oklahoma makes the point of no quorum. The Chair will count. [After counting.] Including myself, there are 209 Members present, not a quorum.

Mr. WEBB. Mr. Speaker, I move a call of the House.

Mr. STAFFORD. There is an automatic call, Mr. Speaker.

The SPEAKER. The Chair thought maybe the requisite number would come in in a moment.

Mr. STAFFORD. The Speaker has announced that there is no quorum present.

The SPEAKER. Not enough have come in. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll. Those in favor of passing this bill will, when their names are called, answer "yea"; those opposed will answer "nay."

The question was taken; and there were—yeas 242, nays 29, answered "present" 4, not voting 155, as follows:

YEAS—242.

So the bill was passed.

The Clerk announced the following additional pairs:

For the session:

Mr. STEELE with Mr. BUTLER.

Until further notice:

Mr. AYRES with Mr. ZIHLMAN.

Mr. DICKINSON with Mr. KAHN.

Mr. EAGAN with Mr. ANTHONY.

Mr. OVERMYER with Mr. BROWNE.

Mr. DILL with Mr. MCCORMICK.

Mr. LEA of California with Mr. WATSON of Pennsylvania.

Mr. CROSSER with Mr. NICHOLS of Michigan.

Mr. PRICE with Mr. HAUGEN.

Mr. SCULLY with Mr. KREIDER.

Mr. SISSON with Mr. MCKENZIE.

Mr. ESTOPINAL with Mr. MCKINLEY.

Mr. STEVENSON with Mr. MCLAUGHLIN of Michigan.

Mr. WINGO with Mr. MUDD.

Mr. TAGUE with Mr. PAIGE.

Mr. BURNETT with Mr. RODENBERG.

Mr. DIXON with Mr. ROGERS.

Mr. HARRISON of Mississippi with Mr. TINKHAM.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will unlock the doors.

On motion of Mr. WEBB, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE TO EXTEND REMARKS.

By unanimous consent, leave was granted to extend remarks in the RECORD as follows:

To Mr. MORGAN.

To Mr. CAMPBELL of Kansas, by inserting a speech delivered by Col. Robert G. Ingersoll on the life and character of Roscoe Conkling.

To Mr. CARY, on prohibition.

To Mr. LAGUARDIA, on the food question.

To Mr. MCLEMORE.

CALL OF COMMITTEES.

The SPEAKER. The Clerk will call the next committee.

The Clerk proceeded with the call of committees.

INTERSTATE COMMERCE COMMISSION.

Mr. ADAMSON (when the Committee on Interstate and Foreign Commerce was called). Mr. Speaker, by authority of my committee I call up the bill (S. 1816) to amend the act to regulate commerce, as amended, and for other purposes. This is the bill to increase the Interstate Commerce Commission.

This bill has always been considered in the House as in Committee of the Whole. It has passed the House twice. I make the same request now for unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman asks unanimous consent that this bill be considered in the House as in Committee of the Whole. Is there objection?

Mr. STAFFORD. This is an important bill, Mr. Speaker. I think it ought to be considered in the Committee of the Whole.

The SPEAKER. The gentleman from Wisconsin objects. The House automatically resolves itself into the Committee of the Whole——

Mr. ADAMSON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. ADAMSON. I desire at the proper time, whether in the House or in the Committee of the Whole, to request unanimous consent that the substitute be considered in lieu of the original bill.

The SPEAKER. The gentleman asks that the substitute be considered as the original bill. Is there objection?

Mr. STAFFORD. Reserving the right to object, Mr. Speaker, do I understand that if the bill is considered in the House as in Committee of the Whole there will be opportunity for general debate as in the House on Calendar Wednesday?

Mr. ADAMSON. I should be glad to dispose of this bill this evening if possible. If I can not do so, I shall regret it very much. The House has passed this bill twice as reported by the committee, and I was in hopes that there would not be much debate on it.

Mr. STAFFORD. That does not reply to my question. I do not object to the gentleman's last request.

The SPEAKER. Is there objection to the request that the substitute be considered as the original bill?

There was no objection.

The SPEAKER. The House automatically resolves itself into the Committee of the Whole House on the state of the Union, and the gentleman from Kentucky [Mr. JOHNSON] will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (S. 1816) to amend the act to regulate commerce, as amended, and for other purposes, with Mr. JOHNSON of Kentucky in the chair.

Mr. ADAMSON. Mr. Chairman, I ask unanimous consent to dispense with the first reading of the substitute.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to dispense with the first reading of the substitute. Is there objection?

There was no objection.

Mr. ADAMSON. Mr. Speaker, this bill, in substance, most of it, has passed the House twice. The first time it passed the House it did not provide for the subdivision of the Interstate Commerce Commission into two or more divisions. The last time it passed it not only increased the commission to nine members, whereas there are now seven, but it provided for the subdivision of the commission into two or three divisions, and it increased the salary of the secretary. The Senate passed the Senate bill this time before we considered ours. The Senate never acted on the bill on the two previous occasions when it passed the House. This time the Senate in passing the bill adopted all of ours with the addition of an amendment to govern the action of the commission in cases of a request for increase of rates. The present law, section 15, provides that the commission is authorized to suspend rates when they are filed by a carrier on its own motion or on the application of another person. The amendment the Senate put on to the text of our bill was that whenever a protest was filed the commission should suspend the rates. In other words, where it is now voluntary the Senate makes it compulsory that they shall suspend in the case of an application or a protest. I presume that amendment will be offered to this bill at the proper time. The only differences between the House and the Senate of a substantial character are those.

I wish to say that it is absolutely necessary to the transaction of business that the membership of the commission shall be increased. They have so many duties to perform—the valuation itself requires considerable attention, and the numerous cases and issues and investigations before them, of safety appliances and other requirements make a tremendous amount of work which they can not perform. When cases are made they have to have an investigation, and instead of having a commissioner which would satisfy the public they have to send an examiner, a young clerk or a young lawyer, and the people are dissatisfied. They want one of the commissioners.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. ADAMSON. Yes.

Mr. JOHNSON of Washington. What are these examiners paid?

Mr. ADAMSON. Different salaries, all the way from $1,800 up to $5,000.

Mr. JOHNSON of Washington. What is the salary of the present secretary?

Mr. ADAMSON. Five thousand dollars.

Mr. LENROOT. Will the gentleman yield?

Mr. ADAMSON. Yes.

Mr. LENROOT. Is there any change in the substitute bill from the bill which passed at the last session?

Mr. ADAMSON. I do not remember any.

Mr. LENROOT. Did the committee consider the provision in the Senate bill requiring the suspension of rates?

Mr. ADAMSON. Yes; the committee considered it, and the idea of the committee was that we would repass the House bill, get into conference immediately, and thrash out the subject. We thought that expedition was necessary, but we were unable to get it considered in the House and gentlemen now think it necessary to dispose of the question here. I would be willing, in order to save time, that the House should repass the House bill as we passed it before and let us get into conference to-morrow.

Mr. LENROOT. May I ask the gentleman what the attitude of the committee is on this provision in the Senate bill?

Mr. ADAMSON. I can not say what the attitude would be on that question, as there was no accentuation of it made there. We only agreed to substitute the House bill.

Mr. LENROOT. If the House believes that that should be adopted, then the only safe way would be for the House to amend the substitute bill and incorporate it?

Mr. ADAMSON. I think nobody would object to that; if they did, Judge SIMS is going to offer the amendment to the House

bill. I have two or three minor amendments myself that I want to offer.

Mr. WALSH. Will the gentleman yield?

Mr. ADAMSON. Yes.

Mr. WALSH. Does the gentleman state that one reason for increasing the commission is because of the present work of the valuation of railroads that takes place?

Mr. ADAMSON. One of the reasons.

Mr. WALSH. Does not the gentleman think it would be better for Congress to pass an act discontinuing the work and let the commission go about its business instead of continuing a work that is going to be absolutely worthless when completed?

Mr. ADAMSON. If the gentleman will excuse me, I do not think we have the time to thrash out that question. I wish to emphasize the great increase of the work that the commission has devolving upon it, exclusive of the question of valuation. When we first passed the bill there was no valuation law at all. It ought to have been done regardless of the valuation, because seven members can not do the work, even if they were relieved of the valuation. I have a tabulation that I am going to put in the RECORD showing that they have many times as much work to do to-day as they had 10 years ago.

Mr. STAFFORD. Will the gentleman yield?

Mr. ADAMSON. Yes.

Mr. STAFFORD. As I understand the bill, with two exceptions, if the bill becomes a law, the commission may appoint one or any number of the commission to constitute a division.

Mr. ADAMSON. Under this bill, yes. They may subdivide into as many divisions as the commission deems proper, but we require or expect to provide by amendment that not less than three shall participate in any decision of rates, and not less than five in any question of valuation.

Mr. STAFFORD. The gentleman proposes to offer an amendment to the effect that no important measure shall be passed on by one commissioner or two commissioners?

Mr. ADAMSON. Yes.

Mr. STAFFORD. Will the chairman be kind enough to submit those amendments, so that we may have them before us and consider them?

Mr. ADAMSON. I will read them now.

In line 13, page 11 of the House substitute, there is a misprint. The word "any" should be "and." That is the first amendment.

The second amendment I am going to offer is, in line 16, page 12, where one division is authorized to act for the commission. I wish to offer an amendment inserting the words "subject to revision by the commission when demanded by either party interested."

Mr. STAFFORD. Where does that amendment come in?

Mr. ADAMSON. After the word "thereof," in line 16. Then, in line 12 on page 13 and in line 13 on page 13 the language is a little awkward. Senator CUMMINS called my attention to it, and I agreed with him. It says that not less than seven members shall sit in the hearing and participate in the decision. He thought there might be some misunderstanding and a literal construction that would require a man to sit there all of the time without any intermission and suggested that in line 3 I strike out the word "sit" and insert the word "participate," and strike it out where it occurs later in another line, so that it would read "shall participate in the hearing and decision." This would require the same amendment being made in lines 12 and 13.

Mr. SIMS. In line 12, on the same page, we should strike out "seven" and insert "five."

Mr. ADAMSON. Yes; and Judge SIMS is going to offer the amendment about suspending the rates.

Mr. STAFFORD. Where is the amendment that the gentleman just suggested that would restrict the number of commissioners that may constitute the division that will pass upon these important questions?

Mr. ADAMSON. On page 13 the gentleman will notice this language:

> In all proceedings relating to the reasonableness of the rates or to alleged discriminations not less than three members shall participate.

And farther down the provision that in all matters concerning valuation not less than five shall participate.

Mr. STAFFORD. That is in the present bill. I understood the gentleman was going to offer an amendment that would place further restrictions upon the members in a division.

Mr. ADAMSON. Does the gentleman mean the number of the members?

Mr. STAFFORD. Yes; the number of members that will constitute a division to pass upon important questions.

Mr. ADAMSON. No; the gentleman misunderstood me.

Mr. STAFFORD. Then, under this bill, one commissioner may have the authority to pass on a question other than that of rates and valuation of railroad property?

Mr. ADAMSON. Subject to revision by the commission itself. Either party interested may demand that the entire commission revise that action.

Mr. SIMS. Ought not that word to be "review" instead of "revise"?

Mr. ADAMSON. I think that it means the same thing, that it will not become the order of the commission unless the commission approves it.

Mr. STAFFORD. It will not be heard de novo, but it will be a review of the testimony taken by the one or two or three commissioners?

Mr. ADAMSON. It would be in the discretion of the commission to do either.

Mr. MADDEN. Mr. Chairman, will the gentleman yield to me?

Mr. ADAMSON. Yes.

Mr. MADDEN. Does not the gentleman from Georgia think this is of sufficient importance to prevent any subcommittee of the commission from acting upon an important matter without review by the full commission, regardless of whether appeal is taken by either side or not?

Mr. ADAMSON. The gentleman will note that in the two important things, as we thought, we fixed the minimum number that shall act.

Mr. MADDEN. I understand that; but it seems to me that the number does not make any difference, if it is less than the whole commission; that while you can appoint a committee of three members of the commission to take the testimony, and thereby facilitate the transaction of business that comes before the commission, no committee of the commission, no matter what number of members it might consist of, should have the power to reach a conclusion that would bind anyone as to fixing rates, at any rate, because rates are things that are vital to the different sections of the country. Let us take an example. I do not say that it would be done, but suppose we had a rate case affecting the Central West or the extreme West, and the commission was rather favorably inclined to granting the rates and it selected a committee of three men from the East who were members of the commission to sit on that case. What would prevent those three men, who have no special interest in the West, from authorizing the railroad to fix a rate beyond reason? Of course, I recognize the fact that there is a right of appeal or a right of review, but there ought not to be any such requirement. The requirement ought to consist of the submission of the evidence adduced by the three men appointed by the commission to the commission for final adjudication, without respect to any dissatisfaction on the part of either side.

Mr. ADAMSON. The gentleman will note that we did not require any form of appeal.

Mr. MADDEN. But you require a proceeding.

Mr. ADAMSON. We say subject to the demand of either party.

Mr. MADDEN. I say, Why require it?

Mr. ADAMSON. I will answer that. A great many cases arise in which the principles are plain and well settled, and two or three commissioners would have no difficulty in reaching a proper conclusion in the matter, and in such a case each party would acquiesce, but if a case arises where either party is dissatisfied, all he has to do is to note the fact that he asks a revision by the entire commission.

Mr. MADDEN. I have known cases of my own knowledge before the Interstate Commerce Commission where interstate rates provided by the commission had been violated by the railroads involved, where complaint was filed, and where the commission found against the railroad for the violation and where they refused to execute their own orders. Now, if they allowed that they are liable to do it on other features.

Mr. ADAMSON. What does the gentleman suggest?

Mr. MADDEN. I suggest that nothing less than the whole commission be authorized under any circumstances to decide a rate case.

Mr. ADAMSON. That would be five—a quorum.

Mr. MADDEN. But you would have to have, at any rate, a quorum present to decide a case.

Mr. ADAMSON. I am perfectly willing, if the gentleman desires, to strike out the three and write in five.

Mr. MADDEN. I think a quorum of the commission must be present; that includes the whole commission, of course.

Mr. ADAMSON. If you say five shall be present, that is a quorum of the whole commission.

Mr. MADDEN. That not less than a quorum of the commission shall be present; that includes the whole commission.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. ADAMSON. I do.

Mr. COOPER of Wisconsin. Would that mean three or the five should render a decision?

Mr. MADDEN. I do not think it would mean that.

Mr. COOPER of Wisconsin. That is the provision, that five members shall participate in the hearing and decision. Well, if five participate in the decision, a majority of five, or three, would render the decision, which would be one-third of the commission.

Mr. MADDEN. Personally I am not in favor of that.

Mr. COOPER of Wisconsin. In my judgment, that goes right into the very vitals of this question.

Mr. MADDEN. I think so.

Mr. ADAMSON. That is a matter of construction, of course.

Mr. COOPER of Wisconsin. I do not think there is any other construction possible—that if you permit five to make a decision, a majority of the five would make it.

Mr. ADAMSON. I am too frank to deny the gentleman's construction.

Mr. COOPER of Wisconsin. Now, another thing in that connection. Will the gentleman please read again the amendment he proposes and which the gentleman from Illinois spoke about on the question of appeal?

Mr. ADAMSON. That is that they may issue orders, subject to revision by the commission when demanded by either party interested.

Mr. COOPER of Wisconsin. I want to call the attention of the gentleman from Illinois to this. It is subject to appeal upon the demand of either party. Now, where there is a complaint both against the railroad company before the commission for a revision of the rates and for the fixing of rates there are actually parties litigant, two parties, but where there is an investigation to find simply the valuation of property are there parties to the action?

Mr. ADAMSON. Well, parties are heard there just as well as in other cases.

Mr. COOPER of Wisconsin. But are there parties?

Mr. ADAMSON. I think there are.

Mr. COOPER of Wisconsin. The commission does not make any order that affects the railroad company if it decides the property is worth $20,000,000; it just simply puts a valuation of the property.

Mr. ADAMSON. I know, but there is an issue made between them if either of the parties desire to oppose the finding of the commission as to what the valuation is.

Mr. COOPER of Wisconsin. When we speak of parties we mean parties in litigation, but there is no litigation over an investigation, but where you fix rates there is a plaintiff and a defendant. That is the point I desire to make.

Mr. MADDEN. I am not a lawyer, you know, but I want to call the attention of the lawyers of this House to the fact that there ought not to be any litigation here except when it is necessary.

There will be no litigation if a subcommittee of the commission is obliged to report its findings to the full commission for its final determination, without respect to whether anybody complains or not.

Mr. ADAMSON. As I understand, the gentleman does not desire the rate shall be made by any subdivision of the commission.

Mr. MADDEN. That is the point exactly, because I think with the commission acting through parts of the commission, as it did in the case I described with respect to a certain rate, where they found the railroad company was violating the law and refused to execute the law after they found the railroad had violated it, what is to happen by having 12 or 13 of the commissioners doing the same thing in any of the other cases?

Mr. ADAMSON. I would first like to have the gentleman hear from the gentleman from Wisconsin [Mr. ESCH], and then I am willing to vote on the amendment.

Statistics of work of the commission for the fiscal years ending Nov. 30, except as otherwise noted.

Mr. JOHNSON of Washington. Is there going to be an opportunity for any general debate on this thing?

Mr. ADAMSON. What is the question?

Mr. JOHNSON of Washington. I want to get some time for debate on the affairs of the Interstate Commerce Commission, and particularly as to those fellows who are making valuations in the stone quarry part in my State, and will not be through for a couple of years. Now is the time to air the Interstate Commerce Commission before we add a couple more men at $10,000 a year and further to increase the employees of this Government and embarrass the people.

Mr. MADDEN. Mr. Chairman, this has been an awfully hot day, and we have been working hard and have taken care of important business. So I make the point of no quorum.

Mr. SIMS. Will the gentleman withhold that for a moment, until I can have this put in the RECORD?

Mr. MADDEN. Yes.

Mr. SIMS. Because Members of the House have asked me and because it will be of general interest, and the chairman has referred to it, I ask to have sent to the desk and have read the amendment I propose to offer in reference to the rate suspensions.

The CHAIRMAN. The Clerk will report the amendment.

Mr. JOHNSON of Washington. I object to its being read. Let it be put in the RECORD.

Mr. SIMS. It will be in the RECORD for the benefit of everybody.

The following is the amendment:

Insert, immediately after line 13, page 13, the following: The second paragraph of section 15 of the act to regulate commerce as amended is further amended so that the said second paragraph of said section 15 shall read as follows:

"Whenever there shall be filed with the commission any schedule stating a new individual or joint rate, fare, or charge, or any new individual or joint classification, or any new individual or joint regulation or practice affecting any rate, fare, or charge, the commission upon its own initiative may, and upon complaint or protest shall, at once, and if it so orders, without answer or other formal pleading by the interested carrier or carriers, but upon reasonable notice, enter upon a hearing concerning the reasonableness and propriety of such rate, fare, charge, classification, regulation, or practice; and pending such hearing and the decision thereon the operation of such schedule shall be suspended and the use of such rate, fare, charge, classification, regulation, or practice shall be deferred until after full hearing, and shall take effect only after the commission has found and declared the same to be just and reasonable, neither unjustly discriminatory nor unduly preferential or prejudicial nor otherwise in violation of the provisions of this act, and after full hearing the commission shall make such order in reference to said rate, fare, charge, classification, regulation, or practice as would be proper in a proceeding initiated after the rate, fare, charge, classification, regulation, or practice had become effective.

"The foregoing provision shall apply to all such schedules now on file with the commission, but which have not become effective, but shall not apply to any schedule filed in pursuance of an order of the commission.

"At any hearing involving a rate or fare which has been increased since January 1, 1910, or a rate or fare sought to be increased by any such schedule now on file, but which has not taken effect, or a rate or fare which is sought to be increased by any such schedule hereafter filed the burden of proof to show that the increased rate or fare, or the proposed increased rate or fare, is just and reasonable shall be upon the common carrier, and the commission shall give to the hearing and the stating of such questions preference over all other questions pending before it and decide the same as speedily as possible.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] has made the point of no quorum. The Chair will count. [After counting.] Seventy-nine gentlemen have arisen—not a quorum. The Clerk will call the roll.

Mr. ADAMSON. Mr. Chairman, I do not think I would have the heart to call the roll now. I think that would be doing an injustice to my comrades. Therefore I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. JOHNSON of Kentucky, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (S. 1816) to amend the act to regulate commerce, as amended, and for other purposes, had come to no resolution thereon.

EXTENSION OF REMARKS.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent to extend my remarks by printing the table to which I referred.

The SPEAKER. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

ORDER OF BUSINESS.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent to proceed with the consideration of this bill to-morrow morning.

Mr. GILLETT and Mr. CURRY of California objected.

The SPEAKER. There is a conference report to come up.

Mr. ADAMSON. I mean subject to the conference report.

The SPEAKER. The gentleman from New York [Mr. HICKS] has an order of the House authorizing him to speak for an hour.

Mr. ADAMSON. Well, subject to his speech.

Mr. CURRY of California. I object.

EXTENSION OF REMARKS.

Mr. MOORE of Pennsylvania. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of waterways.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. CURRIE of Michigan. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a poem, written by a friend, entitled "Buy a liberty bond."

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. SIEGEL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

Mr. McARTHUR. Reserving the right to object, on what subject?

Mr. SIEGEL. On the Italian commission.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. GREENE of Vermont. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

ADJOURNMENT.

Mr. ADAMSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 20 minutes p. m.) the House, under its previous order, adjourned until to-morrow, Thursday, June 14, 1917, at 11 o'clock a. m.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. RAKER, from the Committee on the Public Lands, to which was referred the bill (H. R. 3331) for the protection of the owners of mining claims and of desert-land entrymen who enter the military or naval service of the United States in time of war, reported the same with amendments, accompanied by a report (No. 77), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. ASHBROOK, from the Committee on Coinage, Weights, and Measures, to which was referred the bill (H. R. 3548) providing for the modification of the designs of the current quarter dollar, reported the same without amendment, accompanied by a report (No. 78), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. PARK, from the Committee on Accounts, to which was referred the resolution (H. Res. 44) authorizing clerks to certain committees of the House, reported the same with amendment, accompanied by a report (No. 76), which said bill and report were referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. DILLON: A bill (H. R. 5008) to amend the act entitled "An act establishing post routes, and for other purposes," approved March 3, 1877; to the Committee on the Post Office and Post Roads.

By Mr. KELLY of Pennsylvania: A bill (H. R. 5009) for the creation of the United States War Information Commission; to the Committee on Education.

By Mr. CHARLES B. SMITH: A bill (H. R. 5010) to amend section 4414 of the Revised Statutes of the United States relating to the appointment of local and assistant inspectors of steam vessels; to the Committee on the Merchant Marine and Fisheries.

Also, a bill (H. R. 5011) to establish a United States Court of Patent Appeals, and for other purposes; to the Committee on the Judiciary.

By Mr. EMERSON: A resolution (H. Res. 101) to have the Department of Justice investigate combinations in the District of Columbia that fix the prices of food, and also what increases have been made in rents since the outbreak of the war with Germany; to the Committee on the District of Columbia.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 5012) granting a pension to Charles O. Beum; to the Committee on Pensions.

By Mr. DOOLITTLE: A bill (H. R. 5013) granting a pension to Harl K. Harris; to the Committee on Pensions.

By Mr. JAMES: A bill (H. R. 5014) granting a pension to Christian Broemer; to the Committee on Invalid Pensions.

By Mr. JOHNSON of Washington: A bill (H. R. 5015) for the relief of Thomas H. Casey; to the Committee on Claims.

By Mr. McKEOWN: A bill (H. R. 5016) granting a pension to William P. Johnson; to the Committee on Invalid Pensions.

By Mr. RAMSEYER: A bill (H. R. 5017) to correct the military record of William H. Minnick; to the Committee on Military Affairs.

Also, a bill (H. R. 5018) to correct the military record of John W. Terry; to the Committee on Military Affairs.

By Mr. SANFORD: A bill (H. R. 5019) for the relief of John McNeil; to the Committee on Military Affairs.

By Mr. CHARLES B. SMITH: A bill (H. R. 5020) granting a pension to Frederick Rattke; to the Committee on Pensions.

Also, a bill (H. R. 5021) for the relief of Augustus C. Smith; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BRODBECK: Petition of 155 citizens of Wellsville, Pa., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of 209 citizens of York County, Pa., favoring a Christian amendment to the Constitution of the United States; to the Committee on the Judiciary.

Also, petition of the Woman's Foreign Missionary Society of the First Methodist Episcopal Church, of York, Pa., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of 23 citizens of Dillsburg, Pa., and vicinity, favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petitions of 70 citizens of York County, Pa.; 71 citizens of York County, Pa., and Harford County, Md.; and 68 citizens of York County, Pa., and Harford County, Md., for a Christian amendment to the Constitution of the United States; to the Committee on the Judiciary.

Also, petition of 23 citizens of Dillsburg, Pa., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. BYRNS of Tennessee: Petition of the Woman's City Mission Board of the Methodist Episcopal Church South of Nashville, Tenn., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. CALDWELL: Petition of sundry citizens of Long Island City, N. Y., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. DALLINGER: Resolution of the Boston Branch of the Association of Collegiate Alumnæ, favoring the creation of zones around military camps; to the Committee on Military Affairs.

By Mr. DENISON: Memorial of sundry citizens of Carbondale and Men's Union Gospel Team of West Frankfort and Frankfort Heights, all in the State of Illinois, favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Sparta and Sesser, in the State of Illinois, favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of sundry citizens of Cairo, Ill., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. DOOLING: Petition of the Chamber of Commerce of the State of New York, favoring the daylight-saving bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of the Chamber of Commerce of the State of New York, commending the Senate Finance Committee for its action on the war-revenue measure, and urging the exemption of gifts to educational, philanthropic, and religious organizations from taxation; to the Committee on Ways and Means.

By Mr. EMERSON. Petition of B. F. Beal and others, of Cleveland, Ohio, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. GEORGE W. FAIRCHILD: Petition of T. H. Porter and others, of Binghamton, N. Y., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. GOULD: Petition of citizens of Williamson, Wayne County, N. Y., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. HERSEY: Petition of Rev. J. H. Bryant, of Greenville Junction Methodist Episcopal Church, State of Maine, favoring national prohibition; to the Committee on the Judiciary.

By Mr. HUDDLESTON: Petition of Mrs. Jessie L. Parrish, Mrs. E. H. Shiffer, and many others, of Birmingham, Ala., favoring national prohibition; to the Committee on the Judiciary.

By Mr. JOHNSON of Washington: Petition of members of the First Methodist Episcopal Church, Hoquiam, Wash., favoring national prohibition; to the Committee on the Judiciary.

By Mr. LUNDEEN: Resolution of the International Brotherhood of Stationary Firemen, Local No. 29, Minneapolis, Minn., opposing national prohibition; to the Committee on the Judiciary.

By Mr. MORIN: Petition of the Sir Roger Casement Branch of the Friends of Irish Freedom, pledging to the Government the loyal service which the Irish race has ever given, and urging that the Government insist that England shall remove her forces from Ireland and renounce all claim to rule over an unwilling people; to the Committee on Foreign Affairs.

By Mr. MOTT: Petition of members of Bethany Methodist Episcopal Church and the First Baptist Church of Watertown, and members of the Presbyterian Church of Chaumont, and the Methodist Aid Society of Harrisville, and sundry citizens of Harrisburg and Denmark, all in the State of New York, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. PARKER of New York: Petition of the Young Men's Bible Class of the Methodist Episcopal Church of Ballston, N. Y., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of sundry citizens of Glens Falls, N. Y., favoring the enactment of prohibition legislation as a war measure; to the Committee on the Judiciary.

By Mr. PRATT: Petition of George W. Frost, John R. Crawford, and sundry other citizens of Ithaca, N. Y., favoring war prohibition; to the Committee on the Judiciary.

Also, petition of M. A. Soper, Virgil W. Mattoon, Gordon Dykes, and sundry other citizens of Horseheads, N. Y., favoring certain prohibition measures; to the Committee on the Judiciary.

By Mr. RAINEY: Petition of the Trades and Labor Assembly of Jacksonville, Ill., favoring food control; to the Committee on Agriculture.

Also, petition of R. E. Dummnitt and 98 other citizens of Greggsville, Ill., favoring prohibition; to the Committee on the Judiciary.

Also, petition of the Church of Christ of Virginia, Ill., favoring national prohibition; to the Committee on the Judiciary.

By Mr. REED: Petition of J. E. Vance, Marguerite Young, Lorisa Bunten, A. D. Page, Elsie Page, Lercy Linger, Ellis W. Brooks, Willie R. Brooks, Louise Gould, A. M. Gould, Pauline O. Brooks, Annie Vance, Willa Rohrbough, C. L. Rohrbough, Mrs. C. L. Rohrbough, A. N. Linger, George G. Gould, Amie E. Morgan, Aubrey Brooks, C. S. See, Clarence Wingrove, Edwin I. Hyre, Mabel Vance, Mary Hyre, Jennie Crouch, Myrtle See, L. K. Wingrove, Mrs. L. K. Wingrove, Jessie Hyre, Amanda Phillips, Louise See, May Hyre, W. H. Lyon, Grace Brooks, and Fred E. Brooks, members of the Presbyterian Church of French Creek, W. Va., urging the conservation of grain and foodstuffs now used in the manufacture of intoxicating liquors and the prohibition of the manufacture and sale of intoxicating liquors, etc.; to the Committee on the Judiciary.

By Mr. ROSE: Petition of the Sunday-school convention of Sixth District Mines, Blair County, Pa., favoring national prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of Tillman K. Saylor, John W. Walters, S. H. Heckman, W. E. Matthews, George T. Reese, F. B. Kinsey, Harry Winger, H. M. Davies, T. E. Reynolds, George Robinson, C. L. Ferguson, and Ralph Wolf, of Johnstown, Pa., praying for immediate prohibition as a war measure; to the Committee on the Judiciary.

By Mr. RAKER: Memorial of the New York Chamber of Commerce on the revenue measure; to the Committee on Ways and Means.

Also, memorial of the New York Chamber of Commerce, relative to the daylight-saving system; to the Committee on Interstate and Foreign Commerce.

Also, petition of Herbert P. Sheets, of Argos, Ind., favoring empowering the Federal Reserve Board to regulate collection charges on bank checks; to the Committee on Banking and Currency.

By Mr. RAMSEYER: Petition of the citizens of Malcom, Iowa, and vicinity, urging taxation of mail-order houses doing business in the several States; to the Committee on Ways and Means.

By Mr. SHOUSE: Petition of citizens of Leoti, Coldwater, and members of the congregation of the Methodist Church of Macksville, Kans., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. SINNOTT: Petition of Vale (Oreg.) Chamber of Commerce, advocating Government guarantee of minimum prices; to the Committee on Agriculture.

By Mr. SMITH of Michigan: Petitions of E. J. Clark and 66 citizens, of Albion; C. H. Palmatier and 42 citizens, of Climax; Gordon T. McDonald and 26 citizens, of Sherwood; and 56 citizens of Galesburg, Mich., favoring prohibition; to the Committee on the Judiciary.

By Mr. WALDOW: Petition of the Humboldt Parkway Men's Club, favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of citizens of Springville, Buffalo, and Cazenovia, Woman's Christian Temperance Union of Buffalo, and Rev. F. A. Brown, pastor, Methodist Episcopal Church, of Boston, N. Y., favoring prohibition as a war measure; to the Committee on the Judiciary.

SENATE.

THURSDAY, *June 14, 1917.*

(Legislative day of Tuesday, June 12, 1917.)

The Senate reassembled at 12 o'clock m., on the expiration of the recess.

BOOK-PAPER INDUSTRY (S. DOC. NO. 45).

The VICE PRESIDENT. The Chair lays before the Senate a preliminary report from the Federal Trade Commission on the book-paper industry, which will be referred to the Committee on Printing.

Mr. FLETCHER. Mr. President, in this connection I desire to state that that report is made in pursuance of Senate resolution 269, which I introduced September 7, 1916, and which was adopted on that date by the Senate. It is a very important report affecting the whole book-paper industry.

I will say that the principal grades of book paper are machine finished, sized and supercalendered, coated, and cover paper.

The report shows that there were in 1916 approximately 40 companies operating 70 mills the bulk of whose output was book paper, and a number of other mills which manufactured some book paper in addition to various other grades. The output of the principal book-paper mills in 1916 probably aggregated more than a million tons, valued at more than $87,000,000.

Contracts made by 23 manufacturers in the last half of 1916, on the average, were 84 per cent higher for machine finish, 56 per cent higher for supercalendered, and 65 per cent higher for coated book paper than in 1915. The average profits per ton of 41 principal book-paper mills were 100 per cent higher in 1916 than for the preceding year. The margins of profit of paper jobbers on book-paper sales were generally much larger in 1916 than in 1915.

The report further states that concerted activities of the book-paper manufacturers, with the effect thereof upon the prices charged in 1916 and 1917, have been investigated, and the commission is considering the institution of a proceeding directed against certain practices which appear to exist in the industry.

The report further shows—and it is not a very extensive or full one; it is entitled "A preliminary report"—that the average profits per ton of the principal book-paper mills increased about 100 per cent in 1916 as compared with 1915, showing that in general average receipts at the mill increased more rapidly than costs.

On the basis of the book investment the average profit of these companies were 8.6 per cent in 1915 and 21.2 per cent in 1916.

Further, that the average profits of the six coating mills whose costs are given were $16.89 per ton in 1915 and $23.26 per ton in 1916, an increase of $6.37 per ton, or 37.7 per cent.

The profits of 17 important book-paper mills were obtained for the first quarter of 1917. The average profit of these mills in 1916 was $14.71 per ton, and in the first three months of 1917, $38.14 per ton, an increase of $23.43, or 159.3 per cent.

I ask that this report be printed as a public document, and that an additional number of 5,000 copies be printed for the use of the Senate document room, and that it be referred to the Committee on Printing.

Mr. SMOOT. The request is to be referred to the Committee on Printing?

Mr. FLETCHER. The request is to have the report printed as a public document and 5,000 additional copies for the document room, and also to refer it to the Committee on Printing. It will not cost very much. I think the total cost of the printing will be less than $50. It is a very important document, and I think it ought to be printed now.

Mr. SMOOT. Which are the companies the Senator has reference to?

Mr. FLETCHER. The companies are not named in the report; they are just referred to as so many book-paper companies. The names of the companies are not set forth, as I recall it, in the report.

Mr. SMOOT. The Senator asks, then, that it be referred to the Committee on Printing to determine whether it shall be printed as a public document?

Mr. FLETCHER. No; I am asking now that the report be printed as a public document, and that 5,000 extra copies be printed, because the Federal Trade Commission has asked for 2,000 copies of the report as quickly as they can get them. I ask that it be printed as a public document, and that 5,000 additional copies be printed for the use of the Senate document room. Then I am asking that the report be referred to the Committee on Printing, because it is made in pursuance of a resolution which I offered on that subject, and it refers to other matters upon which the Committee on Printing may make a further report.

Mr. SMOOT. Does the Senator refer to the Committee on Printing the motion to print additional copies?

Mr. FLETCHER. No; but for such other action as the committee may see fit to take in regard to the subject covered by the report. It is not a matter of referring it to that committee to determine whether it shall be printed or not, but to consider the substance of the report in connection with possibly some suggestions the committee may make respecting legislation upon the subject.

Mr. SMOOT. I wish to ask the Senator if this document has been printed by the Federal Trade Commission.

Mr. FLETCHER. It has not. It has just been sent in.

Mr. SMOOT. Then I have no objection.

The VICE PRESIDENT. Without objection, it is so ordered.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed a bill (H. R. 2316) to promote export trade, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice President:

H. R. 291. An act to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes; and

H. R. 3971. An act making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented the petition of E. V. Bowker, of Pittsburgh, Pa., praying for the enactment of legislation to reduce the high cost of living, which was referred to the Committee on Agriculture and Forestry.

He also presented a memorial of the International Stereotypers and Electrotypers' Union, in convention assembled, remonstrating against the proposed increase of postage on second-class mail matter, which was referred to the Committee on Finance.

He also presented a petition of the International Stereotypers and Electrotypers' Union, in convention assembled, praying for the regulation of prices on foodstuffs and other necessities of life, which was referred to the Committee on Agriculture and Forestry.

Mr. KNOX presented petitions of sundry citizens of York County, Pa., and Harford County, Md., praying for the adoption of an amendment to the Constitution to found the Government on Christianity, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Pennsylvania, praying for national prohibition as a war measure, which were ordered to lie on the table.

Mr. THOMPSON presented a memorial of sundry citizens of Newton, Kans., remonstrating against the proposed increase in the rate of postage on second-class mail matter, which was referred to the Committee on Finance.

Mr. PAGE presented a petition of sundry citizens of Greensboro Bend, Vt., praying for the enactment of legislation to prohibit the use of food products in the manufacture of intoxicating liquors, which was referred to the Committee on Agriculture and Forestry.

Mr. CHAMBERLAIN presented a petition of sundry citizens of Clatskanie, Oreg., and vicinity, praying for the prohibition of the manufacture of alcoholic liquors as a measure of food conservation, which was referred to the Committee on Agriculture and Forestry.

Mr. SAULSBURY presented a petition of Pomona Grange, No. 1, Patrons of Husbandry, of Stanton, Del., praying for national prohibition as a war measure, which was ordered to lie on the table.

Mr. FRELINGHUYSEN presented memorials of Miners' Local Union, No. 270, of Oxford; of Carpenters' Local Union, No. 391, of Hoboken; of Glassblowers' Local Union, No. 53, of Swedesboro; and of Carpenters' Local Union, of Union Hill, all in the State of New Jersey, remonstrating against the enactment of legislation to prohibit the manufacture of beer and light wines, which were referred to the Committee on Finance.

Mr. MARTIN presented a memorial of the Religious Liberty Association of Virginia, in convention assembled at Gordons-

ville, Va., remonstrating against the enactment of legislation making Sunday a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. POMERENE. I present a telegram from Gov. James M. Cox, chairman, and Clark S. Wheeler, secretary, of the Ohio branch of the Council of National Defense, on the subject of food control, which I ask to have read.

There being no objection, the telegram was read and referred to the Committee on Agriculture and Forestry, as follows:

COLUMBUS, OHIO, *June 12, 1917.*

HON. ATLEE POMERENE,
Washington, D. C.:

Sensible of the impending danger resulting from the shortage of food and from the waste of foodstuffs by the consumer, the Ohio branch of the Council of National Defense in this crisis therefore recommends that the Congress of the United States take immediate steps toward conferring upon the President power to assume control of the food supply of the country both as to price and as to quantity to be sold to the consumer. We further recommend that such power be also extended to the exportation of foodstuffs to neutral countries.

JAMES M. COX, *Chairman.*
CLARK S. WHEELER, *Secretary.*

Mr. WOLCOTT presented a petition of Pomona Grange, No. 1, Patrons of Husbandry, of Stanton, Del., praying for national prohibition as a war measure, which was ordered to lie on the table.

Mr. PHELAN presented a petition of the faculty of the Leland Stanford Junior University, Palo Alto, Cal., suggesting certain methods for raising increased revenue, which was referred to the Committee on Finance.

Mr. GRONNA. I present a telegram from the Woman's Christian Temperance Union of Cando, N. Dak., which I ask to have printed in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

CANDO, N. DAK., *June 2, 1917.*

Hon. A. J. GRONNA,
United States Senate, Washington, D. C.:

The Woman's Christian Temperance Union of Cando, N. Dak., most urgently petition you to use your influence to prohibit the manufacture and sale of intoxicating liquor. We are giving our sons born in a prohibition State to the service of our country, and we demand this protection for them. We promise cooperation in every possible way in the saving and increase of food supplies, and we protest against the waste of grain in the manufacture of that which only debauches men.

MABEL NELSON,
President Woman's Christian Temperance Union.
ANNA R. LEAN.
MRS. C. TAYLOR.
EDNA F. SALMONS.

Mr. MYERS. I present a telegram in the nature of a petition, which I ask may be printed in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

ANACONDA, MONT., *June 13, 1917.*

Hon. HENRY L. MYERS,
Senate Chamber, Washington, D. C.:

Associated Press report to-night contains statement from Federal Trade Commission, announcing its failure to relieve paper situation, and predicts further increase. Please circulate as widely as possible among Members of Congress the Standard's reply to announcement in telegram to commission to-night, as follows: "Federal Commission, Washington, D. C.: Suggest your commission will obtain better results toward relieving paper situation if you will urge Senate committee to adopt House bill provisions with regard to zone-system charge for handling second-class mail. Make publishers of every kind of publications using the mails pay for service according to distance and you will solve the problem of paper shortage and at the same time save the Government thirty millions a year, now lost through retaining the ridiculous rate on second-class matter. Metropolitan newspapers have not shown disposition to curtail size of their editions, especially Sundays, and the national weeklies and magazines are permitted to swell their circulations and make enormous profits unjustly through Government subsidy permitting uniform rate of 1 cent a pound, regardless of service rendered. We urge your recommendation of zone rates as most effective remedy."

THE ANACONDA STANDARD.

CONSERVATION OF FOOD.

Mr. GORE, from the Committee on Agriculture and Forestry, submitted a report (No. 53), accompanied by a bill (S. 2447) to prohibit the use of food and feeds in the manufacture of intoxicating liquors for beverage purposes, and authorizing and directing the President to commandeer existing stocks of distilled spirits for the manufacture of munitions and for other military and hospital supplies, if the public interests require it, and for other purposes, which was read twice by its title.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CHAMBERLAIN:

A bill (S. 2448) granting an increase of pension to Luther C. Wright; and

A bill (S. 2449) granting an increase of pension to George F. Lasher; to the Committee on Pensions.

By Mr. THOMPSON:

A bill (S. 2450) granting an increase of pension to Joseph T. Lewis; and

A bill (S. 2451) granting a pension to Lena Howe (with accompanying papers); to the Committee on Pensions.

By Mr. CURTIS:

A bill (S. 2452) to regulate the height of buildings on Sixteenth Street and on Massachusetts Avenue, and on such other streets or avenues as may be hereafter designated by the Commissioners of the District of Columbia, in the city of Washington, D. C.; to the Committee on the District of Columbia.

By Mr. ROBINSON:

A bill (S. 2453) to authorize condemnation proceedings of lands for military purposes; to the Committee on Military Affairs.

By Mr. PHELAN:

A bill (S. 2454) granting an increase of pension to John K. Madden (with accompanying papers); to the Committee on Pensions.

By Mr. SHAFROTH:

A joint resolution (S. J. Res. 78) to suspend during the present war with Germany, the requirement that not less than $100 worth of labor shall be performed or improvements made on each mining claim during each year for all owners who, in lieu of such assessment work, expend the sum of $100 or perform 25 days of labor in the raising or manufacturing of products necessary for the maintenance of the Army, Navy, or people of the United States or pay into the Treasury of the United States $100; to the Committee on Mines and Mining.

HEARINGS BEFORE COMMITTEE ON PUBLIC LANDS.

Mr. MYERS submitted the following resolution (S. Res. 84), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Public Lands, or any subcommittee thereof, be, and hereby is, authorized during the Sixty-fifth Congress to send for persons, books, and papers; to administer oaths; and to employ a stenographer, at a cost not to exceed $1 per printed page, to report such hearings as may be had in connection with any subject which may be pending before said committee, the expenses thereof to be paid out of the contingent fund of the Senate, and that the committee, or any subcommittee thereof, may sit during the sessions or recess of the Senate.

PROPOSED COMMITTEE ON AERONAUTICS.

Mr. SHEPPARD. I desire to give notice of the following amendment to the rules of the Senate for the purpose of creating a committee on aeronautics. I ask that it be read.

The Secretary read as follows:

Notice of amendment to Rule XXV of the standing rules of the Senate to be proposed by Mr. SHEPPARD for the purpose of creating a committee on aeronautics, the amendment being as follows:

"*Resolved*, That the standing rules of the Senate be, and they hereby are, amended as follows:

"Amend Rule XXV by inserting after the paragraph reading as follows:

"A committee on additional accommodations for the Library of Congress, to consist of five Senators, the following paragraph:

"A committee on aeronautics, to consist of 17 Senators."

HISTORY OF THE FLAG.

Mr. CURTIS. Mr. President, this being Flag Day, I ask unanimous consent to have printed in the RECORD a brief history of the United States flag, prepared by Mrs. Isabel Worrell Ball.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

THE UNITED STATES FLAG—ITS HISTORY, LEGAL PRESCRIPTIONS AS TO FORM AND SIZE, AND ITS ETIQUETTE ON ALL OCCASIONS.

The United States flag was born June 14, 1777, in Philadelphia, Pa. Myth, tradition, and legend assigned the designing and making of the first United States flag to Betsy Ross, a Quakeress, of Philadelphia. The same myth, legend, and tradition states that she made this flag at the suggestion of a committee of Congress, composed of George Washington, Robert Morris, and George Ross. This myth, legend, and tradition is not authenticated by any written or printed documents of the day, and only had its birth as a public fact about 1876, when the country was getting ready to celebrate the centennial of the Declaration of Independence.

ITS BIRTH.

The authentic history of the flag begins on the hour and day when the Continental Congress—

"*Resolved*, That the flag of the thirteen States be 13 stripes, alternate red and white; that the union be 13 stars, white on a blue field, representing a new constellation"

Who presented the resolution or how it was brought to a vote in Congress is not known. So the flag stands without father or mother, as far as recorded history is concerned, and the beautiful Betsy Ross theory is alike unsubstantiated.

The United States flag was born of revolution and baptized in blood and tears.

From the hour it was brought into existence by the Continental Congress to the present day it has been the symbol of light and liberty, of justice and equality, of patriotism and progress.

It has floated for 140 years, the pride and glory of 3,000,000 of people in 1777 and 110,000,000 in 1917.

OLDEST NATIONAL FLAG.

It is the oldest national flag in the world.

The United States flag has never been anything but stars and stripes. As it appeared in the beginning, so it appears now. In 1791 Vermont was admitted to the Union, and in 1792 Kentucky. In 1794 a bill was introduced in Congress to increase both stripes and stars to 15, thus indicating the intention of the founders to have each State represented upon the flag.

Fifteen stripes and stars continued to be the official United States flag until 1818, when the number of States in the Union had increased to 18, and the three new States demanded representation upon the flag. Then Congress passed the third and final act fixing the number of stars and stripes on the flag. The bill was entitled

"An act to establish the flag of the United States.

"SECTION 1. *Be it enacted, etc.*, That from and after the 4th day of July next, the flag of the United States be 13 original stripes, alternate red and white; that the Union have 20 stars, white in a blue field.

"SEC. 2. *And be it further enacted*, That on the admission of every new State into the Union, one star shall be added to the union of the flag; and that such addition shall take effect on the 4th of July next succeeding such admission."

Approved April 4, 1818.

The adding of the few stripes and stars and the taking away of the few stripes never altered the appearance of the flag a thread. When flying from the peak of ships at sea, or from flagpoles or towers, the United States flag has been stars and stripes from the first, and is known to the uttermost parts of the earth.

ARRANGEMENT OF THE STARS.

The official flags of the United States, those used by the Army and Navy, have, from the very beginning, had the stars arranged in parallel rows. The suggestion that the first flag was made with a circle of stars can not be authenticated. The earliest official flags show the parallel arrangement. May 18, 1818, James Monroe, President of the United States, issued an order that the arrangement of the stars should be in parallel rows on the flags used by the Army and Navy, and other branches of the United States Government. President Monroe also decided that the official flags should be in the proportion of 14 feet to 24; that the union must be one-third of the length of the flag and seven-thirteenths of its depth, so that from the top to the bottom of the union there will be seven stripes, and six stripes from the bottom of the union to the bottom of the flag. The lower stripe and the top stripe to be red. Seven red and six white.

The sun never sets upon the United States flag. Somewhere every hour and every minute of the 24 the sun is shining upon Old Glory.

ETIQUETTE OF THE FLAG.

There is a strict and severe etiquette of the flag. The flag must not be raised before sunrise, and should be lowered at sunset. At all the military posts and forts of the United States a sunrise and a sunset gun is fired as the flag is raised to the top of the staff and as it is lowered.

The flag should not be left out over night, and upon stormy days a very small flag, known as the storm flag, should take the place of the regulation flag.

On Memorial Day Grand Army rules and Army and Navy regulations prescribe that the flag shall be flown at half-staff until noon, and then shall be raised to the peak for the remainder of the day. In half-masting the flag it should be raised first to the top of the staff, then lowered to a distance corresponding to the width of the flag that is used.

In raising the flag upon a staff or a building and in lowering it all the people witnessing the ceremony should stand at attention, men with uncovered head and women with hand at the forehead ready to salute it.

Under no circumstances should the flag be permitted to touch the ground. In the Army and Navy severe discipline is meted out to those who disobey this regulation.

THE UNITED STATES FLAG.

The official designation is the United States flag.

In the Navy the United States flag is generally referred to as an ensign. The Union Jack is the distinctive flag of the Navy. It is comprised of the blue field of the United States flag with a star for every State therein. The Union Jack carried with the United States flag must be just the size of the field of the flag with which it is carried, and should never be carried unless accompanied by the national ensign.

The national salute to the United States flag is 21 guns.

When used in decoration the United States flag should not be draped, as it is a thing made to fly in the free air of heaven. The folds should hang straight down and should never be pinned nor fastened. If you desire to use the colors of the flag in drapery, it is better to use them in the striped red, white, and blue.

BLUE AT THE TOP.

In hanging these colors place the blue at the top. The United States followed the French in the making of the five-pointed star, and they also followed the French in the arrangement of the colors. One of the reasons for this is that the stars of the flag are placed in the blue field, and the stars should always be kept at the top. If one desired to place stars upon a blue stripe, it would be absurd to have the blue stripe at the bottom. There is no regulation of either Army or Navy for the use of the striped bunting, for the reason that neither the Army nor Navy ever use anything but the flag. It is simply a matter of French heraldry and good taste which demands that the blue field shall always be uppermost.

If hung lengthwise, the field should be at the right as one faces it. If hung as it flies from the upright pole, the field should be at the left. When two flags are used in drapery, the two fields should join, and they should always be at the top

FLAG FLOATS TO THE RIGHT.

It is impossible to trace to its original source the conventional use of one flag in reproduction by a printing press, but it seems to have been the custom from time immemorial to place the staff of the flag to the left, with the colors or the length of the banner flowing to the right as you face it, and custom makes law.

FLAG ANNIVERSARIES.

The national anniversaries when flags should be flown are Lincoln's Birthday, February 12; Washington's Birthday, February 22; Memorial Day, May 30; Flag Day, June 14; Independence Day, July 4. Other days that may be observed are the Battle of Lexington, April 19; Bunker Hill, June 17; Battle of Saratoga, October 17; Surrender of Yorktown, October 19; and Evacuation Day, November 25.

SALUTES.

When passing a flag raised on its staff lift the hat or the hand in salute.

When the flag is passing in parade or review, rise, if sitting, and salute with hat or hand, and always lift the hat from the head till the flag has passed. This is the military law of all nations.

A flag hung union down is said to be at "distress," and thus sends a call for help. It is sometimes thus hung by those who do not love it and desire to humiliate it. Custom has thus made law for lovers of the flag. The Army and Navy have no regulations governing this. In very early times it was the custom to carry the banner upside down to denote mourning for the death of a lord or baron. The "distress" signal, so called, has probably grown out of this.

ISABEL WORRELL BALL.

HOUSE BILL REFERRED.

H. R. 2316. An act to promote export trade, and for other purposes, was read twice by its title and referred to the Committee on Interstate Commerce.

AMENDMENT OF INTERSTATE-COMMERCE ACT.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

The VICE PRESIDENT. The pending amendment is the amendment offered by the Senator from Nebraska [Mr. NORRIS].

Mr. REED. Mr. President, as a part of my remarks I desire to have read an article which appeared in the May 25 issue of Wallace's Farmer, a farm journal published at Des Moines, Iowa. I respectfully invite the earnest consideration of the Members of the Senate to the opinion of the editor.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read.

The Secretary read as follows:

ARE PRICES TOO HIGH.

Last week we were talking with several Members of Congress, when one of them said, referring to the article headed, "Clear thinking needed," which appeared in a recent issue of Wallace's Farmer:

"If I understand what you have been writing, you are of the opinion that the Government should do nothing at all to control these high prices."

We replied that he had the correct understanding.

"But," he said, "what is going to become of the people in the cities who can not afford to pay such high prices? Already there have been bread lines in New York. It seems to me we must do something to control prices or many people will starve."

To which we replied that arbitrary control of prices now would simply make a very much worse situation later; that nothing the Government can do in the way of controlling prices will produce more food; and that when people go hungry it is because of lack of food and not primarily because food is high priced. Many times in the history of the world governments have undertaken to arbitrarily fix the prices of foodstuffs. At no time in all history has any government succeeded in this for any length of time. This is true from the days of the Roman Empire down to the recent experiments in Great Britain, France, and Germany. All efforts on the part of governments to permanently control food prices have failed, and they always will fail.

A distinguished Frenchman, we believe it was, once said that the cure for the evils of democracy is more democracy. That was a true statement. It is equally true that the cure for high prices is high prices. When prices become exorbitantly high, there is a double effect. Production is stimulated, thereby increasing the supply and consequently reducing the price; and consumption is restricted, which has the same effect.

Take the price of wheat, for example. There is a world shortage of wheat. Consequently, the price has gone up. If now the Government steps in and arbitrarily fixes a price lower than the legitimate price produced by the fundamental law of supply and demand, what happens? People continue to eat wheat and exhaust the supply. The fact that the Government has fixed the price has not increased the amount of wheat by one bushel, but it may discourage the production of more wheat. If the high prices are allowed to stand, people are forced to economize by substituting in whole or in part other grains for the wheat to which they have been accustomed. This is only an imaginary hardship. People can live on corn and be just as healthy and feel just as well as when living on wheat.

For a month now one of the editors of Wallace's Farmer has lived on corn and dairy products, with one egg a day, which is used in making corn cakes for breakfast, a little sugar, and, since lettuce and radishes have come, an occasional bite of them. The cost of his daily food has not exceeded 30 cents at any time during the month. On this ration he has maintained his weight, feels in perfect health, and has carried on his work both on the farm and in the office with entire comfort.

Members of Congress and people generally seem to be obsessed with the idea that we must keep down the price of wheat, notwithstanding the great shortage in the world wheat crop. If they would turn even a small part of their ill-considered efforts to fix prices toward teaching people how to use corn in place of wheat, we would get relief much quicker and with much less disorganization of agriculture.

Are the present high prices justified?

Two hundred and fifty years ago an Englishman by the name of Gregory King noticed that wheat prices varied greatly from year to year. Upon searching for the cause he found it chiefly in the size of the harvest. We quote:

"We take it a defect in the harvest may raise the price of corn (wheat was called corn in that country in those days) in the following proportions:

0.1 defect raises the price	0.3
.2 defect raises the price	.8
.3 defect raises the price	1.6
.4 defect raises the price	2.8
.5 defect raises the price	4.5

The ratios laid down by Gregory King may not apply exactly to modern times and conditions, but the principle holds true. A deficiency in production below the normal increases prices much more proportionately. That always has been true, and always will be more or less true of all standard food products.

Our wheat crop last year was 40 per cent less than the year preceding, and 20 per cent less than normal. According to the law of wheat prices as laid down by Gregory King, and as worked out more definitely in modern times, it is to be expected that with such a deficiency prices should double over the normal price, and that without taking into account the unusual condition brought about by the war. When to this normal increase in price because of the short crop we add war conditions, difficulties in transportation, etc., it is a question whether wheat prices of the last 60 days have been out of line at all.

On December 1, 1915, the wheat price got by the farmers of the United States was 92 cents. The price was low notwithstanding the war, because we had a record-breaking crop. On December 1, 1916, the price on the farm was $1.60, an advance of 74 per cent over the preceding year. This advance was caused primarily by the short crop, but even then it was rather less than might have been expected; $1.80 a bushel would have been nearer the true price, making allowance for the crop deficiency. This spring the Government reports on winter wheat indicated the smallest prospective crop in many years. Two bad crops in succession are enough to make prices jump to unusual altitudes. Wheat actually became worth $3 per bushel in the United States. Intelligent agents for the allies were fully justified in bidding such prices. They needed the wheat to feed their people, and as food was imperatively necessary they came into our markets and bid whatever was necessary to get the food. If we had had an abundant crop, the allies would have been able to purchase wheat at much lower prices, but the short supply and the imperative demand sent prices skyrocketing.

Why should prices go so high in times of short crops? Why should prices double in response to a shortage of only 20 to 40 per cent and treble in response to a shortage of 50 per cent? There are very good reasons: The higher prices are necessary to compel people to economize on the small crop, and the high prices are equally necessary to recompense the farmer for the small yield. High prices in seasons of shortage serve as the only form of insurance which farmers have against bad weather and pests.

The situation was immensely aggravated by the fact that a number of people, some of them in responsible positions, lost their heads and all at once began to talk of the necessity of Government regulation of prices. Meetings were held and scare heads appeared in the papers. Some people really got the notion that unless they laid in supplies at once they were in danger of starving.

On the day this was written we met at lunch a gentleman from the State of Washington. Something was said about high prices, and he said that nearly everyone in the city in which he lived had laid in large supplies of food, and that most of his friends had stored away enough flour and sugar in their homes to last them for a year, and that they had laid in supplies of other foodstuffs. This condition prevails all over the country to some extent. In Des Moines a few weeks ago the grocers came out in the papers with the statement that they would sell only a dollar's worth of sugar to any one customer. What was the result? Almost every woman in town who had any money in her pocketbook started out and made the rounds of the grocery stores, buying the limit at each one, and took it home and stored it away. By their silly talk the grocers precipitated the very condition which they wanted to avoid. But the grocers of Des Moines were no sillier in this than many men in very responsible positions.

People can not be forced to economize by official edict. Germany has discovered this. If the information we get from Germany is correct, there is constant evasion of the foodstuff laws. Every family that can do so hides food. Every grocer and dealer in meats sells on the sly to favorite customers who can be depended upon to keep quiet about it. Every farmer hides away as much grain as he can and peddles it out slyly. The result is that there is great irritation between the different States of Germany and the different classes of people because of food control. Notwithstanding all this, it is quite evident that Germany has been able to exercise considerable control over the consumption of food. People there are more obedient to law than in other countries. In addition to this, Germany has taken over the matter of production to some extent, and has crops grown under government supervision. But Germany is a small country. No man with common sense in his head believes that any such policy could be successfully carried out in the United States; and even in Germany we suspect they would have been better off had there been no meddling with the old and fast law of supply and demand. Government action to hold down prices encourages more wasteful use of food and discourages unusual production. It may actually produce a chronic shortage, continuing over a period of several years.

The supply of food to-day, assuming that war conditions are no worse to-day than they were a year ago, would appear to warrant a wheat price of $2.25, a corn price of 90 cents, a price on oats of 60 cents, and a price on potatoes of $1.50 per bushel, and hogs at $13 per hundredweight. But the unusual demands on the other side of the water, brought about by an added year of the war, the increased difficulties of transportation, and the depreciation of the dollar, due to the flood of gold, have combined to justify prices much higher than those just named. Prices of $3 for wheat, $1.40 for corn, 70 cents for oats, $2 for potatoes, and $16 per hundredweight for hogs are not at all out of the way when we consider all of the conditions.

On the whole, looking toward the future, the situation has been unusually healthy, and there will be no difficulty at all in the United States raising all the food necessary to feed herself and her allies if we will but keep in mind fundamental principles and not throw production out of balance by undertaking to overthrow these principles. High prices for wheat will tend to restrict consumption and promote the use of cheaper grains. High prices for corn also will teach us how to produce beef and pork more economically than we have ever done in the past by using more roughage and less grain.

Every attempted interference with food prices by governmental agencies will increase our troubles. Such interference may seem to have a wholesome effect temporarily, but the more it operates to reduce prices now the greater the probability that next winter or next summer we will find ourselves in a far worse situation than we are in now. And, more than that, it will disorganize our agricultural operations and affect us where we least expect it at the present time.

There has been a good deal of talk in Congress and by Government officials about the hoarding of foods. We believe the greatest amount of hoarding of foodstuffs has been done by the housewives of the country, and it was precipitated by the talk of food scarcity which originated in Washington. We have no doubt that in the larger cities there are some speculators who have been laying in supplies with the expectation of selling them out later at handsome profits; but this also has been encouraged by the talk of food scarcity.

Very shortly Mr. Herbert C. Hoover, who has had charge of the Belgian relief work, will be placed in charge of the food problem in the United States. He should be given the power needed to deal summarily with food speculators, whose greed is greater than their patriotism, and who try to fatten themselves at the expense of their countrymen.

The crop-planting season is practically over. Nothing now can be done to increase our acreage. Government activities should now be directed toward helping the farmer to secure needed labor, harvesting machinery, etc., and to organizing transportation facilities. Nothing should be done to interfere with our established methods of marketing or of fixing prices, and nothing should be done to discourage those who have made it their business to store foodstuffs in warehouses, thus taking up the surplus in the flush market season and saving it for the time of need. The way to discourage excessive greed is to take away by tax any excessive profits. Those who think that the Government can displace our established agencies for the handling of foodstuffs and fixing of prices are woefully ignorant of the fundamental conditions which govern these things. Direct Government control will greatly increase cost instead of decreasing it. There are abuses which should be corrected in our present system of distribution, but, taking it by and large, it is by all odds the best system in the world to-day.

Mr. REED. Mr. President, I now ask to have printed as a part of my remarks, but I do not ask to have read, what is known as the Lever bill.

The VICE PRESIDENT. Without objection, it is so ordered.

The bill referred to is as follows:

A bill (H. R. 4961) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel.

Be it enacted, etc., That by reason of the existence of a state of war, it is essential to the national security and defense, for the successful prosecution of the war, and for the support and maintenance of the Army and Navy, to assure an adequate supply and equitable distribution, and to facilitate the movement, of foods, feeds, fuel, and articles required for their production, hereafter in this act called necessaries; to prevent, locally or generally, scarcity, monopolization, hoarding, injurious speculation, manipulations, and private controls, affecting such supply, distribution, and movement; and to establish and maintain governmental control of such necessaries during the war. For such purposes the instrumentalities, means, methods, powers, authorities, duties, obligations, and prohibitions hereinafter set forth are created, established, conferred, and prescribed.

SEC. 2. That words used in this act shall be construed to import the plural or the singular, as the case demands. The word "person," wherever used in this act, shall include individuals, partnerships, associations, and corporations. When construing and enforcing the provisions of this act, the act, omission, or failure of any official, agent, or other person acting for or employed by any partnership, association, or corporation within the scope of his employment or office shall, in every case, also be deemed the act, omission, or failure of such partnership, association, or corporation as well as that of the person.

SEC. 3. That there is hereby established a governmental control of necessaries which shall extend to and include all the processes, methods, activities of, and for the production, manufacture, procurement, storage, distribution, sale, marketing, pledging, financing, and consumption of necessaries, which shall be exercised and administered by the President for the purposes of this act; and all such necessaries, processes, methods, and activities are hereby declared to be affected with a public interest. And in carrying out the purposes of this section the President is authorized to enter into any voluntary arrangements or agreements, to use any agency or agencies, to accept the services of any person without compensation, to cooperate with any agency or person, to utilize any department or agency of the Government, and to coordinate their activities so as to avoid any preventable loss or duplication of effort or funds: *Provided,* That none of the penalties of this act shall apply to this section.

SEC. 4. That it is hereby made unlawful for any person willfully to destroy any necessaries for the purpose of enhancing the price or restricting the supply thereof; knowingly to commit waste or willfully to permit preventable deterioration of any necessaries in or in connection with their production, manufacture, or distribution; to hoard, as defined in section 6 of this act, any necessaries; to monopolize or attempt to monopolize, either locally or generally, any necessaries; to engage in any discriminatory and unfair, or any deceptive or wasteful practice or device, or to make any unjust or unreasonable rate or charge, in handling or dealing in or with any necessaries; to conspire, combine, agree, or arrange with any other person (a) to limit the facilities for transporting, producing, manufacturing, supplying, storing, or dealing in any necessaries; (b) to restrict the supply of any necessaries; (c) to restrict distribution of any necessaries; (d) to prevent, limit, or lessen the manufacture or production of any necessaries, or to enhance the price thereof, or (e) to exact excessive prices for any necessaries; or to aid or abet the doing of any act made unlawful by this section.

SEC. 5. That, from time to time, whenever the President shall find it essential to license the importation, exportation, manufacture, storage, or distribution of any necessaries, in order to carry into effect any of the purposes of this act, and shall publicly so announce, no person shall, after a date fixed in the announcement, engage in or carry on any such business specified in the announcement of importation, exportation, manufacture, storage, or distribution of any necessaries as set forth in such announcement, unless he shall secure and hold a license issued pursuant to this section. The President is authorized to prescribe such regulations governing the conduct of the business of licensees as may be essential to prevent uneconomical manufacture and inequitable distribution of necessaries and otherwise to carry out the purposes of this act. Such regulations may also include requirements for the issuance of licenses and requirements for systems of accounts and auditing of accounts to be kept by licensees, submission of reports by them, with or without oath or affirmation, and the entry and inspection by the President's duly authorized agents of the places of business of licensees. Whenever the President shall find that any rate, charge, or practice of any licensee is unjust, or unreasonable, or discriminatory and unfair, or wasteful, and shall order such licensee, within a reasonable time fixed in the order to discontinue any such unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge,

or practice, thereafter, unless such order is revoked or suspended, such licensee shall, within the time prescribed in the order, discontinue such unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice. The President may, in lieu of any such unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice, find what is a just, reasonable, nondiscriminatory and fair, or economical rate, charge, or practice; and in any suit in any Federal or State court of competent jurisdiction such finding of the President shall be prima facie evidence. Any person who, without a license issued pursuant to this section, knowingly engages in or carries on any business for which a license is required under this section, or willfully fails or refuses to discontinue any unjust, unreasonable, discriminatory and unfair, or wasteful rate, charge, or practice, in accordance with the requirement of an order issued under this section, or willfully violates any provision of this section or any regulation prescribed under this section shall, upon conviction thereof, be punished by a fine not exceeding $5,000 or by imprisonment for not more than two years, or both: *Provided*, That this section shall not apply to any farmer, gardener, or other person with respect to the products of any farm, garden, or other land owned, leased, or cultivated by him, nor to any retailer with respect to the retail business actually conducted by him, nor to any common carrier, nor shall anything in this section be construed to authorize the fixing or imposition of a duty or tax upon any article imported into or exported from the United States or any State, Territory, or the District of Columbia.

SEC. 6. That any person who willfully hoards any necessaries shall upon conviction thereof be fined not exceeding $5,000 or be imprisoned for not more than two years, or both. Necessaries shall be deemed to be hoarded within the meaning of this act when either (a) held, contracted for, or arranged for by any person in a quantity in excess of his reasonable requirements for use or consumption by himself and dependents for a reasonable time; (b) held, contracted for, or arranged for by any manufacturer, wholesaler, retailer, or other dealer in a quantity in excess of the reasonable requirements of his business for use or sale by him for a reasonable time, or reasonably required to furnish necessaries produced in surplus quantities seasonably throughout the period of scant or no production; or (c) withheld, whether by possession or under any contract or arrangement, from the market by any person for the purpose of unreasonably increasing or diminishing the price: *Provided, however*, That any accumulating or withholding by any farmer, gardener, or any other person, of the products of any farm, garden, or other land owned, leased, or cultivated by him shall not be deemed to be hoarding within the meaning of this act.

SEC. 7. That whenever any necessaries shall be hoarded as defined in section 6 they shall be liable to be proceeded against in any district court of the United States within the district where the same are found and seized by a process of libel for condemnation, and if such necessaries shall be adjudged to be hoarded they shall be disposed of by sale in such manner as to provide the most equitable distribution thereof as the court may direct, and the proceeds thereof, less the legal costs and charges, shall be paid to the party entitled thereto. The proceedings of such libel cases shall conform as near as may be to the proceedings in admiralty, except that either party may demand trial by jury of any issue of fact joined in any such case, and all such proceedings shall be at the suit of and in the name of the United States. It shall be the duty of the United States attorney for the proper district to institute and prosecute any such action upon presentation to him of satisfactory evidence to sustain the same.

SEC. 8. That any person who willfully destroys any necessaries for the purpose of enhancing the price or restricting the supply thereof shall, upon conviction thereof, be fined not exceeding $5,000 or imprisoned for not more than two years, or both.

SEC. 9. That to carry into effect the purposes of this act the President is authorized to purchase, provide for the production or manufacture of necessaries; to store them and to provide storage facilities for them by construction, purchase, lease, or otherwise; to sell them; and to require any person having the control of any necessaries, or any storage space suitable for the storing of necessaries, to furnish the whole or any part of such necessaries or storage space to the Government in such quantities, at such times, and at such prices as shall be determined by the President to be reasonable. Upon failure of the person to comply with such requirement, the President is authorized to requisition and take possession of any such necessaries or storage space, and to pay for them at the price so determined. If the price so determined be not satisfactory to the person entitled to receive the same, such person shall be paid the amount prescribed by the President, and shall be entitled to sue the United States to recover such further sum as, added to the amount so paid, will be just compensation for such necessaries or storage space, and jurisdiction is hereby conferred on the United States district court to hear and determine all such controversies: *Provided*, That nothing in this section shall be construed to require any natural person to furnish to the Government any necessaries held by him and reasonably required by himself and dependents for a reasonable time. Any moneys received by the United States from or in connection with the disposal by the United States of necessaries under this section may, in the discretion of the President, be used as a revolving fund for further carrying out the purposes of this section. Any balance of such moneys not used as part of such revolving fund shall be covered into the Treasury as miscellaneous receipts.

SEC. 10. That whenever the President shall find that it is impossible by license or by voluntary arrangement or agreement to assure an adequate and continuous supply of necessaries, he is authorized to requisition and take over, for use or operation by the Government, any factory, mine, or other plant, or any part thereof, in which any necessaries are or may be manufactured, produced, prepared, or mined. Whenever the President shall determine that the further use or operation by the Government of any such factory, mine, or plant, or part thereof, is not essential for the national security or defense, the same shall be restored to the person entitled to the possession thereof. The United States shall make just compensation, to be determined by the President, for the taking over, use, occupation, and operation by the Government of any such factory, mine, or plant, or part thereof. If the amount so determined be unsatisfactory to the person entitled to receive the same, such person shall be paid the amount prescribed by the President, and shall be entitled to sue the United States to recover such further sum as, added to the amount paid, will be just compensation, in the manner provided by section 24, paragraph 20, and section 145 of the Judicial Code. The President is authorized to prescribe such regulations as he may deem essential for carrying out the purposes of this section, including the operation of any such factory, mine, or plant, or part thereof, the purchase, sale, or other disposition of articles used, manufactured, produced, prepared, or mined therein, and the employment, control, and compensation of employees. Any moneys received by the United States from or in connection with the use or operation of any such factory, mine, or plant, or part thereof, may, in the discretion of the President, be used as a revolving fund for the purpose of the continued use or operation of any such factory, mine, or plant, or part thereof, and the accounts of each such factory, mine, plant, or part thereof, shall be kept separate and distinct. Any balance of such moneys not used as part of such revolving fund shall be paid into the Treasury as miscellaneous receipts.

SEC. 11. That, whenever the President finds it essential in order to prevent undue enhancement or fluctuation of prices of, or in order to prevent injurious speculation in, or in order to prevent unjust market manipulation or unfair and misleading market quotations of the prices of necessaries, hereafter in this section called evil practices, he is authorized to prescribe such regulations governing, or may either wholly or partly prohibit, operations, practices, and transactions at, on, in, or under the rules of any exchange, board of trade, or similar institution or place of business as he may find essential in order to prevent, correct, or remove such evil practices. Further, for the purposes of this section, the President may require all persons coming within its provisions to keep such records and statements of account, and may require such persons to make such returns, verified under oath or otherwise, as will fully and correctly disclose all transactions at, in, or on, or under the rules of any such exchange, board of trade, or similar institution or place of business, including the making, execution, settlement, and fulfillment thereof. He may also require all persons acting in the capacity of a clearing house, clearing association, or similar institution, for the purpose of clearing, settling, or adjusting transactions at, in, or on, or under the rules of any such exchange, board of trade, or similar institution or place of business, to keep such records and to make such returns as will fully and correctly disclose all facts in their possession relating to such transactions, and he may appoint agents to conduct the investigations necessary to enforce the provisions of this section and all rules and regulations made by him in pursuance thereof, and may fix and pay the compensation of such agents. Any person who willfully violates any regulation made pursuant to this section, or who knowingly engages in any operation, practice, or transaction prohibited pursuant to this section, or who willfully aids or abets any such violation or any such prohibited operation, practice, or transaction, shall, upon conviction thereof, be punished by a fine not exceeding $10,000 or by imprisonment for not more than four years, or both.

SEC. 12. That, whenever the President shall find that an emergency exists requiring stimulation of production and that it is essential that the producers of any nonperishable agricultural products produced within the United States shall have the benefits of the guaranty provided for in this section in order to stimulate production of such products, he is authorized, from time to time, seasonably and as far in advance of seeding time as practicable, to determine and fix and to give public notice of what, under specified conditions, is a reasonable guaranteed price for any such products, in order to assure such producers a reasonable profit. Thereupon, the Government of the United States hereby guarantees every producer of any merchantable nonperishable agricultural products produced within the United States, for which a guaranteed price shall be fixed by notice in accordance with this section, that, upon compliance by him with the regulations prescribed by the President, he will receive for any such products produced in reliance upon this guaranty within the period, not exceeding three years, prescribed in the notice, a price not less than the guaranteed price therefor as fixed pursuant to this section. In such regulations the President shall prescribe the terms and conditions upon which any such producer shall be entitled to the benefits of such guaranty. When the President finds that the importation into the United States of any such products produced outside of the United States seriously interferes or is likely seriously to interfere with the practical operation of any guaranteed price therefor fixed pursuant to this section, or materially enhances or is likely materially to enhance the liabilities of the United States under guaranties of prices therefor made pursuant to this section, and shall so proclaim, there shall be levied, collected, and paid a rate of duty, upon the products so imported, the amount of which rate of duty shall be ascertained and proclaimed by the President, which amount shall, when added to the value of the product at the time it is offered for entry, be sufficient to bring the price thereof at which imported up to the price which shall have been fixed therefor pursuant to this section; but in no case shall any such rate of duty be fixed at an amount which will effect a reduction of the rate of duty upon any such products under any then existing tariff law of the United States. For the purpose of making any guaranteed price effective under this section, or whenever he deems it essential in order to protect the Government of the United States against material enhancement of its liabilities arising out of any guaranty under this section, the President is authorized also, in his discretion, to purchase any such products for which a guaranteed price shall be fixed under this section, and to hold, transport, or store them, or to sell, dispose of, and deliver the same to any person or to any Government engaged in war with any country with which the Government of the United States is or may be at war or to use the same as supplies for any department or agency of the Government of the United States. Any moneys received by the United States from or in connection with the sale or disposal of any products under this section may, in the discretion of the President, be used as a revolving fund for further carrying out the purposes of this section. Any balance of such moneys not used as part of such revolving fund shall be covered into the Treasury as miscellaneous receipts.

SEC. 13. That whenever the President shall find that limitation, regulation, or prohibition of the use of foods, food materials, or feeds in the production of alcohol or of alcoholic or nonalcoholic beverages, or such nonalcoholic beverages as he shall determine, or that reduction of the alcoholic content of any beverage, is essential, in order to assure an adequate and continuous supply of food, he is authorized, from time to time, to prescribe, and give public notice of, the extent of the limitation, regulation, prohibition, or reduction so necessitated. Whenever such notice shall have been given and shall remain unrevoked, no person shall, after a reasonable time, which shall be prescribed in the notice, use any foods, food materials, or feeds in the production of alcohol or nonalcoholic beverages, except in accordance with the limitations, regulations, and prohibitions prescribed in such notice, or produce any beverage having an alcoholic content in excess of the amount prescribed therefor in such notice. Any person who willfully violates this section shall, upon conviction thereof, be punished by a fine not exceeding $5,000 or by imprisonment for not more than two years, or both.

SEC. 14. That in carrying out the purposes of this act the President is authorized to create an agency or agencies, to accept the services of any person without compensation, to cooperate with any agency or person, to utilize any department or agency of the Government, and to coordinate their activities so as to avoid any preventable loss of funds or duplication of work.

SEC. 15. That under regulations to be prescribed by the President the use of the mails of the United States free of charge for postage for exclusively official business in carrying out the purposes of this act shall be extended to any agency or person designated by the President.

SEC. 16. That the President is authorized to make such regulations and to issue such orders as are essential effectively to carry out the provisions of this act.

SEC. 17. That every person who willfully assaults, resists, impedes, or interferes with any officer, employee, or agent of the United States in the execution of any duty authorized to be performed by or pursuant to this act shall upon conviction thereof be fined not exceeding $1,000 or be imprisoned for not more than one year, or both.

SEC. 18. That the sum of $2,500,000 is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, to be available immediately and until expended, for the payment of such rent, the expense of such printing and publications, the purchase of such material and equipment, and the employment of such persons and means, in the city of Washington and elsewhere, as the President may deem essential.

SEC. 19. That for the purposes of this act the sum of $150,000,000 is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, to be available immediately and until expended: *Provided*, That no part of this appropriation shall be expended for the purposes described in section 18.

SEC. 20. That if any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof, directly involved in the controversy in which such judgment shall have been rendered.

SEC. 21. That the provisions of this act shall cease to be in effect when the national emergency resulting from the existing state of war shall have passed, the date of which shall be ascertained and proclaimed by the President; but the date when this act shall cease to be in effect shall not be later than one year after the termination, as ascertained by the President, of the present war between the United States and Germany. Nothing in this section shall be construed to prevent the fulfillment by the United States of any legal obligation incurred pursuant to this act which shall be in force when this act ceases to be in effect.

Mr. REED. Mr. President, I call special attention to sections 1, 3, 9, 10, 12, and 19. Section 1 undertakes by a legislative recital to create a "war necessity," and undertakes to bring the powers of the bill within the limits of the Constitution by a false recital of fact. It then provides that the President shall have the power—

To assure an adequate supply and equitable distribution * * * of foods, feeds, fuel, and articles required for their production, hereafter in this act called necessaries; to prevent, locally or generally, scarcity, monopolization, hoarding, injurious speculation, manipulations, and private controls affecting such supply, distribution, and movement; and to establish and maintain governmental control of such necessaries during the war.

In a word, the proposition is to confer, according to the language of the bill, upon the President—but, as we all know, in fact upon some other individual who is to act in the name of the President—the right to control every one of the prime necessities of life, the distribution of and the commerce in the same.

Mr. President, on account of the storm which has suddenly swept over the Capitol it is a little difficult to make myself heard.

RECESS.

Mr. HOLLIS. Mr. President, I move that the Senate take a recess for 20 minutes.

The VICE PRESIDENT. The question is on the motion of the Senator from New Hampshire.

The motion was agreed to; and (at 12 o'clock and 35 minutes p. m.) the Senate took a recess until 12.55 p. m.

At the expiration of the recess the Senate reassembled.

AMENDMENT OF INTERSTATE-COMMERCE ACT.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

Mr. SMITH of Michigan. Mr. President, I think the matter under consideration is a very important one. I make the point of no quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hollis	Myers	Smith, Mich.
Beckham	Husting	Nelson	Smoot
Borah	James	New	Sterling
Broussard	Johnson, Cal.	Newlands	Swanson
Chamberlain	Johnson, S. Dak.	Norris	Thomas
Culberson	Jones, Wash.	Page	Thompson
Cummins	Kellogg	Penrose	Trammell
Curtis	Kendrick	Poindexter	Underwood
Fernald	Kenyon	Pomerene	Vardaman
Fletcher	King	Ransdell	Wadsworth
France	Kirby	Reed	Walsh
Frelinghuysen	Knox	Saulsbury	Warren
Gallinger	McCumber	Shafroth	Weeks
Gerry	McKellar	Sheppard	Williams
Gronna	McLean	Sherman	Wolcott
Harding	McNary	Smith, Ariz.	
Hardwick	Martin	Smith, Ga.	

Mr. FRELINGHUYSEN. I announce the necessary absence of my colleague [Mr. HUGHES] on account of illness. I ask that this announcement may stand for the day.

Mr. McKELLAR. The senior Senator from Tennessee [Mr. SHIELDS] is absent from the city on important business. I should like to have this announcement stand for the day.

Mr. SMITH of Michigan. My colleague [Mr. TOWNSEND] is unavoidably absent from the Chamber on account of sickness in his family. I desire this announcement to stand for the day.

Mr. SAULSBURY. I have been requested to announce the absence on official business of the senior Senator from Maryland [Mr. SMITH] and the senior Senator from Arkansas [Mr. ROBINSON].

The VICE PRESIDENT. Sixty-six Senators have answered to the roll call. There is a quorum present.

Mr. REED. Mr. President, when we were interrupted by the storm I was saying that section 1 of the act conveys certain powers, which I had already enumerated.

Section 3, proceeding with the question of powers, provides that there shall be established "a governmental control of necessaries."

I ask the Senate to kindly attend to the power granted this "governmental board of necessaries." The bill recites that its power—

shall extend to and include all the processes, methods, activities of, and for the production, manufacture, procurement, storage, distribution, sale, marketing, pledging, financing—

And now note this language—

and consumption of necessaries.

The bill further provides that—

all such necessaries, processes, methods, and activities are hereby declared to be affected with a public interest.

Yea, in order to afford some kind of shadow of pretense of the exercise of a constitutional power the bill falsely declares that all of these things are affected with a public interest, intending, of course, to plant the exercise of this power upon the ground that the Government has the right to control activities affected with a public interest.

And yet the most casual reading of the language will show that the things embraced by it are not affected with a public interest within the legal meaning of that term at all. They, in fact, have no relation to the public interest save in the sense that the life and happiness of every man, woman, and child in the Republic and every dollar's worth of property may be said to affect the public interest. It is an impudently false and fraudulent recital.

The bill further provides that in order to carry out these powers—

the President is authorized to enter into any voluntary arrangements or agreements, to use any agency or agencies, to accept the services of any person without compensation, to cooperate with any agency or person—

And so forth.

In a word, this somewhat obscure language is plainly intended to authorize the transfer of these great and despotic powers to individuals whose names may not be submitted to the Senate for confirmation, nor even be made known to the public at large.

Section 4 proposes to punish and to make illegal the act of any person who allows any of these necessities under his control "to deteriorate if he can prevent it," and that power is extended to the article when produced and to the production of the article. Under that section every man is made a violator of the law who may have any article whatsoever that suffers any deterioration or waste if he can prevent it.

Section 5 provides that the President may by simple announcement take away from any or all citizens the right to export, import, manufacture, store, or distribute any of said necessaries unless he or they shall first obtain a license permitting him so to do. Of course these despotic and unconstitutional powers will be exercised by Mr. Hoover or some other agent. I read the language of the act:

SEC. 5. That from time to time whenever the President shall find it essential to license the importation, exportation, manufacture, storage, or distribution of any necessaries, in order to carry into effect any of the purposes of this Act, and shall publicly so announce, no person shall, after a date fixed in the announcement, engage in or carry on any such business specified in the announcement of importation, exportation, manufacture, storage, or distribution of any necessaries as set forth in such announcement, unless he shall secure and hold a license issued pursuant to this section

Under that section by the mere issuance of an order the President can compel practically every manufacturer in the United States and every dealer and shipper to secure from Mr. Hoover or some other unnamed gentleman a license to transact his business, to manufacture his product or to import into this country or export from this country the prime necessities of life.

Mr. KENYON. Mr. President——

Mr. REED. I yield.

Mr. KENYON. I should like to ask the Senator a question, because it seems to me his statement is broader than is sustained by the act. Is it not true that that applies only to what are termed necessaries, and the bill in section 1 defines what are necessaries under the act? That would not include all the manufactures within the United States by any means. It simply includes food and fuel and articles required for their production. Those are the necessaries which the act covers.

Mr. SMITH of Georgia. The original act?

Mr. KENYON. The act I have in my hand is the Lever bill as reported from the House committee to the House.

Mr. SMITH of Georgia. As first introduced it went further and covered substantially anything that was needed to eat or to wear, or to be used in any way in connection with them.

Mr. KENYON. That is true; but the bill is now limited to the matters I have designated—foods, feeds, fuel, and articles required for their production.

Mr. REED. I had not intended to discuss the bill; I simply meant to put in a short analysis of it and resume my seat; but since the question is raised, let us see if there is any limit to the power that it is proposed to confer. The first section reads:

That, by reason of the existence of a state of war, it is essential to the national security and defense, for the successful prosecution of the war, and for the support and maintenance of the Army and Navy to assure an adequate supply and equitable distribution and to facilitate the movement of—

Now listen—

foods—

That embraces anything human beings can eat, and I think it would embrace anything animals eat—

feeds—

That, of course, covers the animals.

Now, you have embraced everything that is produced upon an American farm—every animal that walks and is fit for food. You have covered all the cattle upon the thousand hills, the sheep in the 10,000 pastures, the hogs in the million pens, the chickens in the myriads of back yards, the hay, the oats, the shorts, the middlings, the wheat, the corn, the rye, the barley, the hay, the potatoes, the flour, the bran, shorts, and middlings—all that is fit for "food or feed." You have covered all that, and you have gone below the surface of the earth and you have included coal and oil and gas. Moreover, you have covered the trees of the forest, for they are also required for fuel.

Now, notice. The language contained in section 1 is, as I understand it, enlarged by the language of section 3:

That there is hereby established a governmental control of necessaries which shall extend to and include all the processes, methods—

Listen—

activities of, and for the production, manufacture, procurement, storage, distribution, sale, marketing, pledging, financing, and consumption of necessaries.

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Idaho?

Mr. REED. I yield.

Mr. BORAH. Has the Senator referred to the words on page 1, line 8?—

of foods, feeds, fuel, and articles required for their production.

The phrase "and articles required for their production" would practically cover everything.

Mr. REED. I thank the Senator. I have not commented on those particular words, and they, of course, vastly enlarge the preceding clause. But I now say that when we take section 3 in connection with that language it is plain that it is proposed to put within the control of the President, which means Mr. Hoover or some other man, every article used in the manufacture or production of foods, feeds, or fuel, including the instrumentalities of their production. I think that would include the manufacture of steel and of iron and lead and copper and of agricultural implements. It would include, in my opinion, the cotton gin and the cotton mill. It would include the sheep and, in my opinion, it would include the wool and the processes of manufacture. It would include, beyond any question, the packing establishments of the country, big and little. It would include every butcher shop in the country. It could be made to include every railroad, for it embraces all transportation facilities. The movement from place to place is clearly covered by the term "distribution." But above that it includes the right to say what the people shall eat and how much they shall eat. Let there be no mistake; the language is plain. I quote:

There is hereby established a governmental control of necessaries, which shall include * * * the production * * * and consumption of necessaries.

That, sir, is the power of life and death. That power of life and death it is proposed to confer upon the nameless agents whom the President may hereafter select. I repeat, the power to regulate the consumption of food and fuel is the power of life and death. The emissaries and agents of the food dictator can enter every home in this land, tell the housewife how much bread she may set before her children, the quality of flour she shall use; they can tell the head of the family how much coal he shall consume and the kind of coal he shall use; they can, under these powers, dictate to the American people what they shall eat, what they shall wear, how they shall manufacture it, how they shall produce it, how they shall ship it, and whether they shall have it at all or not.

The power demanded is greater than has ever been exercised by any king or potentate of earth; it is broader than that which is exercised by the Kaiser of the Germans. It is a power such as no Cæsar ever employed over a conquered province in the bloodiest days of Rome's bloody despotism.

"Behold, I show you a mystery." There is one Hoover, who many years ago left the United States to seek his fortunes in other lands. He is a mining engineer by profession. He has very recently returned to America. He has for the past year or two been engaged in some most laudable work abroad. In nothing that I say shall I reflect upon his integrity, his intelligence, or the honesty of his intentions. But this man, who voluntarily had sought his fortune in other lands, is brought back to the United States of America; and, reading this bill and reading concurrent public history, we know that it is the purpose to place these immense powers within his hands. It is proposed to give to this man, whom the American people have heard of through the newspapers only in the last few months, the power to say to every housewife what she shall feed her babe, her children, her husband, or herself.

Mr. WALSH. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Montana?

Mr. REED. I yield.

Mr. WALSH. Mr. President, assuming that these enormous powers are to be lodged in some man, can the Senator suggest any wiser choice?

Mr. REED. I say that the man in this free Republic who, under existing circumstances, would lodge these powers in any man has no conception of a Republic. I declare that the man who would set up arbitrary authority ought to establish his abode in countries where there are no constitutions. He should seek a land in which the will of a despot is regarded as more beneficent than the mandate of a free people. So far as Mr. Hoover is concerned, I would not confer this power on him or on any human being.

Mr. WALSH. I rose to say that while I always listen with very intense interest to the discussion of these matters by the Senator from Missouri, I thought that the personal aspect of it had not very much to commend it. I say frankly to the Senator now that I agree that the other is very serious, but why discuss the question as to who is to be the food conservator?

Mr. REED. Because, sir, I want to give it a personal aspect in this sense: I want, if I can, to burn it into the consciences and brains of the people that this power is to be conferred upon a man—upon one man—upon a certain 175 or 200 pounds of flesh and blood; of a creature with body, parts, passions, and frailties—of just a man, whose peer is to be found, so far as integrity and high purpose are concerned, in every community of this great land, and I doubt not whose peer in every respect can be found in any community of considerable size in this country.

I am commenting also upon the personal aspect, because I think that a man who has lived outside the confines of the United States for a number of years, who has practically made his home in foreign countries, is not so well qualified from that standpoint to deal with questions affecting the American people as would be some one who has lived here, but in all that I have said I pass no comment upon Mr. Hoover that in any way reflects upon his integrity.

Mr. SHEPPARD. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Texas?

Mr. REED. Yes.

Mr. SHEPPARD. Perhaps it may be necessary to confer this power in order that the mother may have something on which to feed her babies.

Mr. REED. Oh, yes, Mr. President; but has that time come now?

Mr. SHEPPARD. Those who have looked into the question seem to think so. The President seems to think so and the Secretary of Agriculture seems to think so. I am in favor of

giving the President every power which is necessary successfully to conduct the war and to conserve the resources of the country.

Mr. REED. So am I. So are we all ready to give the President all the power that is necessary to conduct the war. But what have we done and what are we doing? We have voted a $7,000,000,000 war chest—the largest amount of money ever appropriated by any human tribunal. If Adam had been born 1,000 years before the world was created and had earned a salary of a million dollars per annum, and had saved it all, he could scarcely have taken up this bond issue.

I heard a gentleman who was advocating the sale of "liberty" bonds say the other day down here in one of the theaters that if you laid the bonds one on top of the other, counting 50 to the inch, they would make a pile 16 miles high. I never figured it; but that was his statement, and, being a banker, I presume he knew just about how high they would be.

We have given the President every soldier and sailor he has asked. The aggregate already called for, I think, will run very close to a million and a half troops. Another 500,000 is authorized: and I am ready to vote to-morrow for still more and more troops, until we shall have every man that in any contingency may be necessary.

Moreover, we have overturned precedents and policies of this country more than a century old and have resorted to the draft because it was asked we should resort to the draft. We have provided every ship of war that has been asked; we have provided every ounce of ammunition that has been requisitioned; we have provided every pound of shot and of shell that has been requested; we have voted to build a thousand merchant ships; we have requisitioned every vessel in the shipyards of this country, and have practically requisitioned the shipyards. We have appropriated money almost unlimited in order that we may place upon the high seas mighty argosies to bear our troops, munitions, and supplies to foreign lands. We have provided by a bill passed through the Senate that it shall be a criminal offense for a man to corner foodstuffs. We have authorized the President to seize every railroad in the United States, and given him authority to employ them for the purpose of moving any military supplies of the Government. We have done many other things I do not pause to mention. What else do gentlemen want? Do they wish to follow my enthusiastic friend from Texas [Mr. SHEPPARD], who stands here—and I am sorry he has left the Chamber, and so I will not make the remark I was going to make, but will merely say assuming to speak for the President?

What else is wanted? If there be anything relating to the military forces of this country necessary, the Senate and the House of Representatives, I am sure, will grant it. But when it is asked that there shall be put in the hands of one man, of whom this country knows but little—for I speak not of the President now, but of this agent he is to employ and who has already opened his office and assumed to begin activities without sanction of law—when it is asked to put into the hands of a man of that kind the power to seize the great resources of this land, to command the industry and energy of the nearly 40,000,000 people who dwell upon the farms of the United States, to seize almost if not quite every factory of this country, to control the foodstuffs of all the people, to compel business men to obey his demands and operate as his licensees, and to substitute his will for the Constitution of the United States—when so monstrous a proposition is advanced I refuse to give it sanction; nay, I am appalled that it is offered in any legislative tribunal of a free country.

But let me proceed. I read again from the bill:

> There is hereby established a governmental control of necessaries which shall extend to and include all the processes, methods, activities of, and for the production, manufacture, procurement, storage, distribution, sale, marketing, pledging, financing, and consumption of necessaries—

I place emphasis on the words "consumption of necessaries." Let its dreadful import escape no one—

> which shall be exercised and administered by the President for the purposes of this act, and all such necessaries, processes, methods, and activities are hereby declared to be affected with a public interest.

Mr. SMITH of Michigan. Mr. President, who is to prescribe the food formula of the people?

Mr. REED. It will be done in the name of the President, but when you ask me by whom I know of no way to reply save in that vague and indefinite term Hoover or some one with an ambition to become a Hoover.

Now, I read on, and here is the answer to the Senator's question:

> And in carrying out the purposes of this section the President is authorized to enter into any voluntary arrangements or agreements, to use any agency or agencies, to accept the services of any person without compensation, to cooperate with any agency or person, to utilize any department or agency of the Government, and to coordinate their activities so as to avoid any preventable loss or duplication of effort or funds.

Now, my dear friend, you who come here from the great and populous State of Michigan, representing a supposedly free people, three and a half million in numbers, embracing every class of life, from the humblest to the men of power and wealth and education, I answer your question out of the bill. Your housewives are to eat that which some gentleman, "working without compensation," says they can eat; your children are to wear what some unknown and unnamed gentleman, "working without compensation," shall permit them to wear. They will wear shoes in the late spring if it accords with the economic notions of this unnamed gentleman, or they will go barefooted in order to save shoe leather if he shall so dictate.

Mr. SMITH of Michigan. Those are the rules of a county poor farm.

Mr. REED. Yes. The Senator suggests "those are the rules of a county poor farm"; and, if this bill is enacted, it will do much to make the richest country of the world one great poor farm, and to transform its freemen into political paupers who have wasted the heritage of liberty bequeathed them by heroic sires.

I did not, when I took the floor, intend to discuss this bill. I meant simply to call attention to what is contained in these remarkable provisions. But since the Senator from Texas rose—and he has now returned to the Chamber—assuming to speak for the President, to tell us what the President wanted, and how valiantly the Senator wanted to stand back of the President, I thought I would pass a few observations upon the character of this bill.

Mr. SHEPPARD. Mr. President, will the Senator allow me to express the hope that he will not be successful in defeating what the President considers one of the most essential measures in the present emergency? It is a question whether he or the President is to have his opinion carried out.

Mr. REED. Mr. President, I am not like some people, who shall be nameless. When I was sent to the Senate of the United States I may have been a most unworthy representative, but I was sent here by a great free people, numbering nearly three and a half million, to represent them primarily and the country generally in this legislative body. I have no pride of opinion; I am not obsessed with any idea of my own greatness; but I am here charged with a great mission and a great responsibility. My distinguished colleague [Mr. STONE] and myself represent a domain more than one-half as large as Prussia. We must speak for its three and one-half million free citizens; we speak their voice, and, speaking their voice, I say their Constitution shall never be stricken down by my vote or their liberties subverted in a truckling effort to shine in the reflected glory of the White House.

I have exercised my own opinion after consultation with the opinions of other Senators and other men. When I get ready to abdicate the throne of my reason and to subordinate my opinions to the dictation of any other man, however great, I shall hand back to my people the authority they gave me and ask them to send here some man who has courage enough to express their opinions and stand for their rights. When the Congress of the United States shall cease to exercise the powers and perform the duties devolved upon it by the Constitution it will have betrayed its great and solemn trust. Its Members will have perjured their souls before God and man. It will have followed in the infamous footsteps of the cowardly legislators and counselors who in other days and other lands subverted the liberties of the people. Then, as now, such legislators could be seen standing in their places asserting their loyalty and proving it by exhibiting their truculent submission to the dictates of some master mind.

Mr. SMITH of Michigan. Mr. President, will the Senator, who has had the kindness to refer to my State, permit me to add one sentence to the eulogy which he has just bestowed and to say that in the registration under the conscription law the State of Michigan bears the palm as the first State in the Union for registrations in proportion to her population, which shows a loyalty to the Government and an intensity of feeling that is most commendable? But, furthermore, the people of the State are economizing in their use of foodstuffs now. They are doing it voluntarily. Everyone is addressing himself more or less to that very important question; but to have it said in the law that any single individual is to prescribe the amount of food and the character of food that our people shall eat is carrying this rule of supreme judgment just a little bit too far.

Mr. REED. Mr. President, I am very glad to yield to the Senator to hear him pronounce a very just encomium upon his own people; and yet I can not refrain from saying that what the Senator has said for his own glorious State probably can be

asserted of all the States of this glorious Union. Virtue and patriotism are not confined by the red lines of any map. Wherever the American citizen stands proudly in his home, wherever his eyes flash in recognition of the American flag you find a patriot and a man, all of them willing to do their part, all of them willing to make sacrifices, and none of them of that superior virtue which is assumed by a limited few.

I come now to section 4. Observe the language:

It is hereby made unlawful—

And I omit a portion—

to permit preventable deterioration of any necessaries in or in connection with their production, manufacture, or distribution.

Why, under that a man might be punished, might become a lawbreaker, who without the slightest intention to destroy any necessary of life simply failed to prevent its deterioration. How far we are to go with that I do not know, whether we are to go as far as the old farmer I once saw when I was a boy, who drove to the packing house with a load of fine hogs, and who, when he was offered $2.20 a hundred, got back on his wagon and cracked his whip and started to drive away. The buyer said to him, "Well, what are you going to do with them? You can't get any more for them." The old farmer replied, "I can take them home and sit up nights and eat 'em." He would have prevented waste.

But I hesitate to inject anything intended as a pleasantry into remarks regarding a subject that is absolutely tragic.

I proceed:

SEC. 5. * * * Whenever the President shall find it essential to license the importation, exportation, manufacture, storage, or distribution of any necessaries, in order to carry into effect any of the purposes of this act, and shall publicly so announce, no person shall, after a date fixed in the announcement, engage in or carry on any such business specified in the announcement of importation, exportation, manufacture, storage, or distribution of any necessaries as set forth in such announcement, unless he shall secure and hold a license issued pursuant to this section.

In a word, and put into plain, brutal English, the right of the American citizen to engage in his ordinary occupation, to buy and to sell, to trade and to traffic, to ship abroad or purchase from abroad, is made dependent upon the will of some one man.

Mr. SMITH of Georgia. Mr. President——

The PRESIDING OFFICER (Mr. POINDEXTER in the chair). Does the Senator from Missouri yield to the Senator from Georgia?

Mr. REED. I do.

Mr. SMITH of Georgia. Does the Senator mean that this bill does not give the license as a matter of right? Does it allow this man named by the President to say whether anyone shall or shall not have a license and arbitrarily to deny him the right to a license? Is it possible that that is what the bill provides?

Mr. REED. Plainly the right to license implies that there must be a discretion vested in the licensor, for otherwise there would be no use of having a license. If everybody could engage in the business, and everybody could demand a certificate, of course there would be no use in the license.

Mr. SMITH of Georgia. Why, I supposed it was just to register them, so that they could be observed.

Mr. REED. But it does not say "register"; it says "license."

Mr. SMITH of Georgia. I ought to modify that statement. I did not suppose it. I would suppose it would be urged in that way if I supposed it was language that was permissible, without irritation, to be found in a proposed statute.

Mr. McKELLAR. Mr. President, will the Senator yield to me?

Mr. REED. Certainly.

Mr. McKELLAR. If the Senator will notice the beginning of section 5, it is only after the President has made a publication to that effect; but, of course, as soon as the publication is made no importation or exportation shall be made then. It is in full force, and a man would be violating the law if such importation or exportation should be made.

Mr. REED. Why, certainly; that is immaterial. But notice further. Now, nobody can buy or sell, trade or traffic, ship or manufacture any of these necessities of life unless he shall get a license. But that is not all. Observe how we do progress, how fast the car of reform rolls on.

The President can make regulations for these gentlemen to conduct their business, and among the regulations he may include—

requirements for systems of accounts and auditing of accounts to be kept by licensees, submission of reports by them with or without oath or affirmation, and the entry and inspection by the President's duly authorized agents of the places of business of licensees.

Why, under that monstrous provision, what becomes of the section of the Constitution, or the spirit of it, against unreasonable searches and seizures? That provision was intended merely to prevent officers of the law from entering the place of business of a man and searching it for a particular article; but this confers upon these nameless agents the right to enter any man's place of business, at any time, and inspect his books and accounts. Why, as the Senator from Oklahoma [Mr. GORE] states, it was resistance to unreasonable searches and seizures that started the first flame of the Revolution.

Mr. SMITH of Georgia. The Senator means the Revolution against England?

Mr. REED. The Revolution against England.

Mr. SMITH of Georgia. To gain the freedom of our country?

Mr. REED. The Revolution against the tyranny of George III; and George III never dared assert or ask for rights such as are here demanded. When did George III of England say that no man should do business without his license, making it broad, and applying it to everybody? I believe there were licenses required in a few cases, and that was one of the prime causes which brought our fathers to rebellion. When did George III claim the right to make the business men of the oppressed Colonies keep accounts and make sworn returns to him of their business? Why, as the Senator from Oklahoma states, our fathers would not pay a stamp tax. There were men in those days who said they stood by the Government of King George, but they were not the men whom we revere as patriots, and their blood did not enrich the soil from which the flower of liberty sprang forth.

Everybody is going to be required to keep his books now according to Hoover or somebody else; and then everybody is going to swear to them in the manner and form set forth by Hoover or somebody else; and in this land of the free and home of the brave, where law doth rule and Liberty holds aloft her bright and glorious countenance, we will all form in procession and march forward to make our sworn accounts of our business as licensees graciously permitted by Hoover or somebody else to live!

Mr. President, I jump many important parts of the bill. When I come to discuss this measure in real earnest I shall refer to those sections. In section 9, observe our Government proposes to embark upon the manufacture and production of everything in the shape of necessities. I must keep to that word lest I shall offend my absent friend, the Senator from Iowa.

SEC. 9. That to carry into effect the purposes of this act the President is authorized to purchase, provide for the production or manufacture of necessaries; to store them and to provide storage facilities for them by construction, purchase, lease, or otherwise; to sell them; and to require any person having the control of any necessaries, or any storage space suitable for the storing of necessaries, to furnish the whole or any part of such necessaries or storage space to the Government in such quantities, at such times, and at such prices as shall be determined by the President to be reasonable. Upon failure of the person to comply with such requirement, the President is authorized to requisition and take possession of any such necessaries or storage space, and to pay for them at the price so determined.

Thus, it appears it is proposed that the Government, of course through some if these agents who "work without pay"—some Hoover of greater or lesser mold—can proceed to take over every storage plant in the United States and substantially every great business of the United States, and operate it as he sees fit, taking by the collar the man who created it, whose sweat and toil and brains brought it into existence, and leading him to the door, while somebody bearing a certificate from Washington shall proceed to take hold of the plant and the property of this free citizen.

Mr. SMITH of Georgia. I should like to ask the Senator how much he thinks would be produced from the soil of this country next year if the farmer or producer understood that these agents of somebody could come and take away from him whatever he produced and pay him whatever they wanted to pay him.

Mr. REED. Mr. President, I shall answer that question in a moment, for I want to conclude my remarks.

Over in Prussia, bloody Prussia, tyrant-damned Prussia, where it would seem that the lust of power has absorbed every Christian attribute of the heart, it was not so. Who reads Carlyle's History of Frederick the Great will find, I think, a chapter devoted to a discussion of the old miller. In the days of Frederick's father, likewise father of all the tyrants of Prussia, when blood was inoculated with that poisoned virus which has made the house of Hohenzollern accursed of God, the old despot wanted a piece of ground which belonged to an old miller. The miller declined to sell. The king raised his offer again and again. The miller declined; he declared it was his home and that he would retain it. At last the king's emissaries said, "But his majesty may take it." The old miller rose to his full height and said, "Not while there is law in Prussia." That mill is, I believe, preserved to-day as a revered landmark in Prussia, because it indicated that there was a place where the monarch

himself, with all his military power, could not encroach, and that was the home and private property of the citizen.

But in this day of grace, 1917, 140 years since the soldiers of the Revolution starved and froze at Valley Forge, almost within sight of the tomb of Washington, within the shadow of his monument, it is proposed to give the right not only "to take the mill" but the business of all the American people engaged in producing necessaries, to enter their private business places and compel them to keep an account according to the dictation and command of some one here in Washington, and it is proposed to make them swear to those accounts. It is proposed to do to all the business men of the country that which the father of Frederick the Great did not dare to do in Prussia to one man.

Yet gentlemen will be found accommodating enough to vote for such a measure and to sneeringly insinuate that those who do not so vote are perhaps not quite loyal.

Mr. SHEPPARD. The Senator also sneeringly insinuated that those who vote to carry out the proposition of the President are guilty of subserviency and cowardice?

Mr. REED. Oh, no.

Mr. SHEPPARD. Oh, yes; that is your language.

Mr. REED. The Senator puts himself in the position of subserviency, not me.

Mr. SHEPPARD. I deny that.

Mr. REED. The word "cowardice" has not fallen from my lips in this whole discussion.

Mr. SHEPPARD. And I deny that I put myself in that position.

Mr. REED. The Senator announced almost with the heroic air of a Christian hero entering the arena to do combat with wild beasts and declared that he proposes to do whatsoever the President wants him to do. As the Senator spoke his face was illumined as with the glory of the angels.

Mr. SHEPPARD. With not nearly so tragic an air as that assumed by the Senator from Missouri at the present moment.

Mr. REED. But within the Senator's capabilities it approximated it.

But observe we have not yet covered the entire field. It is true the bill covered all transportation. It covered the manufacture of necessaries and all the things that go into the production of necessaries. It covered the wood that grows above the soil and included the coal in the bowels of the earth. It included all the great lakes and rivers of oil that the good Lord put in the bowels of the earth. All these had been included when some particularly bright mind suddenly recalled that the metal mines had been overlooked, and so we find it in section 10:

That the President is authorized to requisition and take over, for use or operation by the Government, any factory, mine, or other plant, or any part thereof, in which any necessaries are or may be manufactured, produced, prepared, or mined.

Of course, gold is a necessity in time of war. They may take the gold mines. It is necessary to get the food, and if it be not food itself, it is an article required for the production of food. So with lead and zinc and copper and tin—all that vast store of wealth which lines the veins of the earth; they can, if the bill passes, take it all. It is true some individuals have acquired it. They discovered it; they developed it. But of what consequence is that? It is true these men have title deeds to it. It is true they have lived under a Constitution—aye, some of them may hold it in their hands—which declares that the property of a citizen shall not be taken without due process of law, and that due process of law has always been construed to give a man his day in court. As the Senator from Oklahoma [Mr. GORE] has said to me in a side remark, it is our boast that you could not take the shirt off a ragged person's back without giving him a day in court. But now it is all to be taken over by any gentleman working without a salary who presents an order signed for the property.

Then, we are to operate these things:

The President is authorized to prescribe such regulations as he may deem essential for carrying out the purposes of this section, including the operation of any such factory, mine, or plant, or part thereof; the purchase, sale, or other disposition of articles used, manufactured, produced, prepared, or mined therein; and the employment, control, and compensation of employees.

So that in addition to all these other things after the food dictator shall have taken over the factories of the United States it is proposed that he shall fix the wages of employees. Fix the wages, and how can you make the men work? Will he do it at the point of the bayonet? Will he stand every tenth man against a stone wall and shoot him to death and give the other nine an option to work or suffer his fate? How are we to accomplish this beneficent purpose among a people of freemen, among a people who have asserted that to be an American citizen was to be a king, a king of right clothed about with the majesty of constitutional prerogatives and protection so sacred that no man has yet dared trample upon them?

But, Mr. President, there is more of this bill. I call attention to section 12, which is the minimum-price section. The section confers the power upon the President, but it will, of course, be exercised by Hoover. I read:

Thereupon, the Government of the United States hereby guarantees every producer of any merchantable nonperishable agricultural products produced within the United States, for which a guaranteed price shall be fixed by notice in accordance with this section, that, upon compliance by him with the regulations prescribed by the President, he will receive for any such products produced in reliance upon this guarantee within the period, not exceeding three years, prescribed in the notice, a price not less than the guaranteed price therefor as fixed pursuant to this section.

Mr. President, of all the ills and evils and iniquities and enormous and monstrous things wrapped up within the bill, this is perhaps the least of them all. Yet I desire to invite your attention to it for a few moments. If the Government of the United States shall fix a minimum price to be paid to the farmers and producers, for that which the people eat, it follows, does it not, as day follows night, that that minimum price will be of no avail unless it shall be higher than the price which would otherwise obtain, and if it be higher than the price which would otherwise obtain, then that price must be carried on to the ultimate consumer. The tribute must be collected from the homes of every workingman and every other man in the United States, and we will have increased the price of farm products and have collected that increased price from the laboring people and all other kinds of people in the United States.

The moment you do that are you not obliged to make compensation then to the other man? Are you not obliged to allow labor a higher wage, because labor must now pay more for its food? Are you not obliged to allow the business man a higher return on his business, because all he consumes has been increased in cost? Are you not obliged to carry this beneficent scheme through to everybody to make it equitable; and if you have carried it through to everybody upon an equitable basis, who will be benefited? But, upon the other hand, who will be injured?

Now, having talked much longer than I intended, I desire to draw my remarks to a close with just this one observation. There is no more reason for us to copy the tyranny of Prussia in the matter of foodstuffs than there is to imitate her horrible example when she stood women against stone walls and shot them to death. There is no more reason to destroy our commercial and industrial liberty because Prussia has done so than there is to abandon the civilized rules of warfare and sink ships upon which women and children and helpless noncombatants are peacefully pursuing their course. Because the people of other lands should cling to despotism and die bloody deaths to perpetuate the chains their masters have riveted upon them affords no reason for us to cry out for the destruction of our constitutional rights. We are here a great and free people, the most intelligent people, I think, speaking broadly, there are upon this earth—104,000,000 men, women, and children. The heads of these families and many of the women have found their place and niche in the great productive machinery of life. There they have applied their intelligence, there they have employed their energy, there they produce the highest that is within them, and now it is proposed to substitute for their intelligence, applied locally in places where they have lived, applied to business they have created, applied to factories they have conceived, applied to machinery they have produced—it is proposed to substitute for their intelligence, for their energy, the mandate of some man or set of men living hundreds of miles away, who are utterly unacquainted with the business with which they seek to interfere.

More than that, Mr. President, it is proposed by this measure to give the right of arbitrary interference at any moment, so that no man can tell when he enters upon a venture whether he will be allowed to conclude it or whether it shall be wrested from his hands. No man in making his calculations can tell whether he will be allowed to deal with reference to the fixed conditions that surround him when he embarks upon his enterprise, or whether he will be compelled to reckon with the arbitrary mandate of a man who never saw his business, and knows nothing about the production in which he is engaged.

Every farmer who sows his field will sow it knowing that while there may be a minimum price guaranteed to him there is also the right to destroy his market by taking over all the shipping facilities and all the manufacturing facilities and all the distributing facilities necessary to the marketing of his grain; and when that is done he knows that he will be limited in all human probability to that minimum price. From that there can be no escape, in my opinion. When you tell the

farmers of this country that, I say that instead of being up with the lark and staying at his task until the nightingale shall have ceased its song, instead of toiling and moiling in wind and sun, to expand his acreage, instead of going in debt to buy new machinery and to hire additional help he is very likely to reduce his production. When you discourage the farmer you help to produce that very starvation, that very shortage of the necessities of life which we seek to avoid.

Mr. President, there is but one universal solvent for human energy. There is but one thing will start every hand to work, that will cause every muscle to grow tense, that will make every wheel whirr and every spindle turn, and that is the certainty of profit. When you undertake to take away from a free people the right to calculate and to conclude where their interest lies, when you tell them that at any moment a man possessed of arbitrary power can interfere with their profit and their business and wrest their means of livelihood from them, you stop all development, you will stop all energy, you may reduce production to a point where we will be in grave danger of starvation and of want. Such a policy will arrest development and, in my judgment, will bring upon us a panic that will paralyze this country in the very hour when every sinew ought to become strong, when every limb ought to be multiplied in its power, and when every energy of the people ought to be increased.

I protest against the bill as a mistake, an economical mistake. I protest against it as an offense against the Constitution of the United States. I proclaim it to be an invasion of our Bill of Rights. I declare that it will produce that paralysis of business and energy which will make it impossible for us to finance the armies of the world and to feed the nations who are our allies in the great struggle now engulfing mankind.

Mr. NEWLANDS. Mr. President, in view of the prolonged discussion that has arisen over the provisos in this bill, giving the carriers compensation for damages suffered by reason of the priority orders of the President, and the insistence that shippers should also be permitted to recover such damages, on behalf of the committee I wish to state that the committee withdraws the provisions in question; and I move that all after the word "appropriated," on page 4, line 17, down to the words "own order," in line 19, page 5, be stricken from the bill.

The PRESIDING OFFICER (Mr. CALDER in the chair). There is an amendment pending to the bill at this time.

Mr. NORRIS. The pending amendment is one offered by myself. I should like to have the amendment of the Senator from Nevada stated at the desk so that I may see just what the Senator proposes to strike out.

The PRESIDING OFFICER. The Secretary will state the amendment.

The SECRETARY. On page 4, line 17, after the word "appropriated," it is proposed to strike out down to and including the words "own order," on line 19, page 5, including both provisos.

Mr. NORRIS. Mr. President, the language the Senator from Nevada moves to strike out is the language which I have sought to amend by the pending amendment. If that language is to be stricken out I am willing to withdraw my amendment so that the Senator can offer the amendment he desires striking out the language. With that in view, in order to permit the Senator to make the motion now, I withdraw my amendment.

The PRESIDING OFFICER. The amendment offered by the Senator from Nebraska is withdrawn. The question is on the amendment offered by the Senator from Nevada.

Mr. POMERENE. Mr. President, do I understand that the committee favors the striking out of this provision?

Mr. NEWLANDS. I have taken the sense of the committee with reference to it. Does the Senator object to it? If so, I will withdraw the motion.

Mr. POMERENE. No; I shall not object to it; I do not want to prevent a vote on the subject, but this is the first information I have had that any such step was contemplated.

Mr. NEWLANDS. If the Senator wishes to take the matter under consideration I will withdraw the motion.

Mr. POMERENE. I will not ask the Senator to do that.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Nevada?

Mr. GRONNA. Mr. President, may we have the provision read which it is proposed to strike out?

The PRESIDING OFFICER. The Secretary will read the language proposed to be stricken out.

The SECRETARY. After the word "appropriated," in line 17, on page 4, it is proposed to strike out:

Provided, That if by reason of giving preference or priority in transportation under an order or direction authorized hereunder, or by reason of disarrangement of traffic caused by giving such preference or priority, any carrier shall suffer injury or damage, the Interstate Commerce Commission shall upon application by the carrier and upon notice to the Attorney General of the United States, and after due hearing, determine the amount thereof, which amount shall be paid by the Secretary of the Treasury out of any funds in his hands not otherwise appropriated: *Provided further*. That no application for any such damage or injury shall be presented to the commission after six months from the expiration of the crder of preference or priority. In making such determination the commission shall have due regard for the terms of any acts of land grant or contract existing between any such carrier and the United States, and for the purpose of any such inquiry and determination the Interstate Commerce Commission is hereby vested with all the powers which it now has or may be authorized by law to exercise in investigating and ascertaining the justness and reasonableness of rates or charges. Any such findings of the commission shall be subject to review on the merits by a bill in equity, filed either by the Government or by the carrier in a court of competent jurisdiction, with right of appeal as in other equity cases. The final order or decree shall be certified by the court to the Interstate Commerce Commission, which shall enter the same as its own order.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Nevada.

The amendment was agreed to.

Mr. NEWLANDS. I ask that a reprint of the bill as amended be made.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. SWANSON. I should like to inquire whether the consideration of the pending bill is to be deferred until to-morrow?

Mr. NEWLANDS. Yes.

EXECUTIVE SESSION.

Mr. SWANSON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 2 o'clock and 45 minutes p. m., Thursday, June 14, 1917) the Senate adjourned until to-morrow, Friday, June 15, 1917, at 12 o'clock meridian.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 14 (legislative day of Tuesday, June 12), 1917.

RECEIVER OF PUBLIC MONEYS.

Luke Voorhees to be receiver of public moneys at Cheyenne, Wyo.

REGISTER OF LAND OFFICE.

Ralph R. Read to be register of the land office at Buffalo, Wyo.

PROMOTIONS IN THE NAVY.

Capt. Hugh Rodman to be a rear admiral in the Navy from the 23d day of May, 1917.

The following-named commanders to be captains:

Harley H. Christy.
Noble E. Irwin.
Waldo Evans.
Thomas J. Senn.
Charles F. Preston.
Richard H. Leigh.

The following-named lieutenant commanders to be commanders:

Chauncey Shackford.
Ralph E. Pope.
Zachariah H. Madison.
Charles P. Snyder.
Joseph R. Defrees.
Willis G. Mitchell.
John J. Hyland.
Samuel W. Bryant.
Edward S. Jackson.
Sinclair Gannon.
John D. Wainwright.
George W. Steele, jr.
Stafford H. R. Doyle.
William N. Jeffers.
Harry E. Yarnell.

The following named lieutenants to be lieutenant commanders:

Theodore G. Ellyson.
Hugh Brown.
Wilhelm L. Friedell.
Burton H. Green.
Isaac F. Dortch.
John J. London.
Gordon W. Haines.
Ross S. Culp.
John W. Wilcox, jr.
Laurence N. McNair.
Edward L. McSheehy.
William Baggaley.
Benjamin Dutton, jr.

Halford R. Greenlee.
Vaughn K. Coman.
Reed M. Fawell.
Henry A. Orr.
Alexander S. Wadsworth, jr.
James S. Woods.
Lloyd W. Townsend.
John M. Smeallie.
John E. Pond.
William P. Gaddis.
Kenneth Whiting.
George B. Wright.

The following-named lieutenants (junior grade) to be lieutenants:

Theodore S. Wilkinson, jr.
William W. Smith.
David I. Hedrick.
Olaf M. Hustvedt.
Harold T. Smith.
Cumnings L. Lothrop, jr.
Preston B. Haines.
Gerard Bradford.
Mark L. Hersey, jr.
Frank T. Leighton.
Alva D. Bernhard.
Chester S. Roberts.
Benjamin V. McCandlish.
Daniel A. McElduff.
Arthur S. Dysart.
Hugh P. LeClair.
James D. Maloney.
Alan G. Kirk.
Levi B. Bye.
Granville B. Hoey.
Tracy L. McCauley.
Francis W. Scanland.
Joel W. Bunkley.
Max B. DeMott.
Ernest J. Blankenship.
John J. Saxer.
Leo L. Lindley.
Harold C. Train.
Richard M. Elliott, jr.
Lee P. Johnson.
Monroe Kelly.
Marion C. Robertson.
Edward C. Raguet.
Charles C. Davis.
George K. Stoddard.
Williams C. Wickham.
Freeland A. Daubin.
Roland M. Comfort.
Radford Moses.
Thomas E. Van Metre.
Comfort B. Platt.
Sherman S. Kennedy.
Richard W. Wuest.
Chauncey A. Lucas.
Charles H. Morrison.
Paul H. Rice.
Robert G. Coman.
Holbrook Gibson.
Charles E. Reordan.
Howard H. J. Benson.
Hugo W. Koehler.
George N. Reeves, jr.
Ralph E. Sampson.
Jaseph M. Deem.
Robert H. Bennett.
James B. Glennon.
Vance E. Chapline.
Deupree J. Friedell.
Frank A. Braisted.
George B. Keester.
John Borland.
Oscar C. Greene.
Raleigh C. Williams.
Thalbert N. Alford.
Henry G. Cooper, jr.
Eugene M. Woodson.
James S. Spore.
Wilbur J. Carver.
Charles H. Maddox.
George A. Trever.
Edgar A. Logan.
Mark C. Bowman.
Percy T. Wright.
Frank S. Carter.
Harold A. Waddington.
Percy W. Northcroft.
David H. Stuart.
Ernest L. Gunther.
Augustine W. Rieger.
James B. Rutter.
Alger H. Dresel.
Frank Slingluff, jr.
Clifford E. Van Hook.
Solomon Endel.
Robert P. Guyler, jr.
Ralph G. Haxton.
Joseph A. Murphy.
Lawrence Townsend, jr.
Lucius C. Dunn.
Charles M. Elder.
James M. Doyle.
Rush S. Fay.
Henry T. Settle.
Ewart G. Haas.
Joseph E. Austin.

The following-named ensigns to be lieutenants (junior grade):

Noel Davis.
Charles B. C. Carey.
Carleton F. Bryant.
William J. Larson.
Alfred P. H. Tawresey.
John H. Buchanan.
Herman A. Spanagel.
Joseph R. Redman.
Frank L. Lowe.
Franklin G. Percival.
Theo D. Westfall.
Theodore D. Ruddock, jr.
Andrew H. Addoms.
Albert G. Berry, jr.
James D. Black.
George B. Wilson.
William H. Porter, jr.
William K. Harrill.
Greene W. Dugger, jr.
John M. Creighton.
George F. Neiley.
Russell E. Perry.
Herbert J. Ray.
Charles E. Rosendahl.
John G. Moyer.
Robert W. Hayler.
Bert F. Clark.
Archibald N. Offley.
William A. Corn.
John B. W. Waller.
Robert L. Vaughan.
Homer L. Ingram.
Thomas J. Doyle, jr.
Alexander R. Early.
Charles F. Martin.
Vincent A. Clarke, jr.
Kemp C. Christian.
Philip W. Yeatman.
Samuel G. Moore.
William J. Hart, jr.
John L. Vaiden.
Swift Riche.
George Marvell
Benjamin H. Page.
Frank F. Cunneen.
Raymond A. Deming.
Benjamin S. Killmaster.
Raymond S. Hatch.
James E. Boak.
William A. Heard.
Charles H. Mecum.
George T. Howe.
Rudolph F. Hans.
Simson C. Stengel.
Wilder DuP. Baker.
Julius M. Moss.
Robert S. Wyman.

Lewis H. McDonald.
Horace H. Jalbert.
George S. Arvin.
Foster C. Bumpus.
William C. Burgy.
Frank P. Thomas.
Ralph O. Davis.
Sifrein F. Maury.
Martin Griffin.
William F. Roehl.
Donald F. Washburn.
Stuart D. Truesdell.
Frederick D. Powers.
Thomas C. Latimore, jr.
Robert W. Cary.
Karl R. Shears.
Lloyd J. Wiltse.
Paul W. Fletcher.
Lawrence J. K. Blades.
Henry W. Hoyt.
Robert C. Starkey.
Joseph C. Arnold.
Robert P. Luker.
Clarence J. McReavey.
Oliver O. Kessing.
Wallis Gearing.
William K. Beard.
John H. Brown, jr.
Ralph G. Pennoyer.

The following-named lieutenants (junior grade) to be lieutenants:

Claude S. Gillette.
Benjamin F. Tilley, jr.
Creed H. Boucher.

First Lieut. Elisha Theall, retired, to be a colonel on the active list of the Marine Corps.

The following-named warrant officers and clerks for assistant paymasters in the United States Marine Corps to be second lieutenants in the Marine Corps:

Leon L. Dye.
Lee W. Wright.
Reuben B. Price.
George P. Doane.
John W. Mueller.
John F. McVey.
John T. Baugh.
Harold H. Rethman.
Walter J. Green.
James E. Reich.
Carl S. Schmidt.
John F. Burnes.
Charles Ubel.
Charles C. St. Clair.
John Waller.
Harry Halladay.
Eugene L. Pelletier.
Otto Salzman.
Hary V. Shurtleff.
Fred G. Patchen.
William F. Beattie.
Francis E. Pierce.
Harry W. Gamble.
Leslie G. Melville.
Edwin P. McCaulley.
Robert F. Slingluff.
Roscoe Arnett.
Francis C. Cushing.
Charles L. Eickmann.
Thomas Quigley.
Patrick W. Guilfoyle.
Frank Z. Beckner.
Nathan E. Landon.
Eugene L. Mullahy.
Robert H. Shiel.
John J. Mahoney.
Albert J. Phillips.
Jacob Jacobowitz.
James McCoy.
Augustus B. Hale.
Walter E. McCaughtry.
William O. Corbin.
Thomas J. Curtis.
John P. McCann.
Maurice A. Willard.

HOUSE OF REPRESENTATIVES.

THURSDAY, *June 14, 1917.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father in heaven, we bless Thy holy name for the spirit that moved our fathers in Congress assembled, to the high and patriotic resolve that gave to us our national ensign, the Star-Spangled Banner, which for an hundred and forty years, in peace and in war, has floated in triumph o'er land and sea, the emblem of liberty and union.

God grant that it may continue to wave, since in liberty is opportunity, in union strength, in strength peace, in peace prosperity and achievement. And grant, we beseech Thee, that its history and triumphs may be told in song and story till all the ends of the earth shall know liberty, justice, truth, righteousness—yea, until the emblem of peace shall be perched upon every banner and the curse of war be known no more among men; that the Prince of Peace may indeed reign supreme in every heart, to the glory and honor of Thy holy name, our God and our Father. Amen.

The Journal of the proceedings of yesterday was read and approved.

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 3971. An act making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Eestablishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes.

JOSEPH S. M'COY.

Mr. PARK. Mr. Speaker, I have a privileged resolution which I send to the Clerk's desk.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

House resolution 97 (H. Rept. 79).

Resolved, That the Clerk of the House is hereby authorized and directed to pay to Joseph S. McCoy, out of the contingent fund of the House, the sum of $125, for services rendered the Ways and Means Committee from April 9 to May 12, 1917.

Mr. PARK. I will state, Mr. Speaker, that that is a unanimous report from the committee.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

AMENDING THE FEDERAL RESERVE ACT.

Mr. GLASS. Mr. Speaker, I call up for further consideration the conference report on the bill (H. R. 3673) to amend the Federal reserve act.

The SPEAKER. The Clerk will report it by title.

The Clerk read as follows:

A bill (H. R. 3673) to amend the act approved December 23, 1913, known as the Federal reserve act, as amended by the acts of August 4, 1914, August 15, 1914, March 3, 1915, and September 7, 1916.

The SPEAKER. The gentleman from Virginia is recognized.

Mr. GLASS. Mr. Speaker, it has been suggested to me by my colleague on the other side [Mr. MCFADDEN] that he needs more time, and I ask unanimous consent that the general debate be extended half an hour, 15 minutes to be controlled by my colleague and 15 minutes by me.

The SPEAKER. The gentleman from Virginia asks unanimous consent that the time for debate on this conference report be extended for 30 minutes, 15 minutes to be controlled by himself and 15 minutes by the gentleman from Pennsylvania [Mr. MCFADDEN]. Is there objection?

Mr. SMALL. Reserving the right to object, Mr Speaker, may I ask the chairman of the committee whether it is the purpose to ask for an additional extension of time more than he has asked for?

Mr. GLASS. It is not my intention now.

The SPEAKER. Is there objection?

There was no objection.

Mr. GLASS. I ask the gentleman from Pennsylvania to use part of his time.

CALL OF THE HOUSE.

Mr. ROBBINS. Mr. Speaker, this is a very important bill, and I make the point of order that there is no quorum present.

The SPEAKER. Evidently there is no quorum present.

Mr. GLASS. Mr. Speaker, I move a call of the House.

The SPEAKER. The gentleman from Virginia moves a call of the House. The question is on agreeing to that motion.

The motion was agreed to.

The SPEAKER. A call of the House is ordered. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Anthony	Esch	Kennedy, R. I.	Riordan
Austin	Estopinal	Kettner	Rogers
Bell	Fields	Key, Ohio	Rowland
Bland	Fitzgerald	Kitchin	Rucker
Bowers	Flynn	Kreider	Sanders, Ind.
Brand	Focht	LaGuardia	Saunders, Va.
Browne	Fordney	Lehlbach	Scott, Pa.
Buchanan	Foss	Littlepage	Scully
Cantrill	Fuller, Ill.	London	Sells
Capstick	Fuller, Mass.	Lunn	Shallenberger
Carew	Gallivan	McArthur	Sherley
Carlin	Gard	McCormick	Sloan
Carter, Okla.	Garland	McKinley	Snyder
Clark, Fla.	Gould	Madden	Steenerson
Cooper, Ohio.	Graham, Pa.	Maher	Stephens, Nebr.
Costello	Griest	Mann	Sterling, Ill.
Crago	Griffin	Martin, Ill.	Stevenson
Crosser	Hamill	Mays	Stiness
Dale, N. Y.	Hamilton, N. Y.	Miller, Wash.	Sullivan
Dallinger	Haskell	Moon	Talbott
Davidson	Hayes	Morin	Templeton
Davis	Hill	Mudd	Tilson
Decker	Hollingsworth	Neely	Vare
Denison	Hull, Iowa	Nelson	Ward
Dent	Humphreys	Nichols, Mich.	Wason
Denton	Igoe	Olney	Webb
Dickinson	Ireland	O'Shaunessy	Welling
Dill	Johnson, Wash.	Paige	Wilson, Ill.
Dixon	Jones, Va.	Peters	Winslow
Drukker	Kahn	Porter	Wood, Ind.
Dupré	Kearns	Powers	Woods, Iowa
Dyer	Keating	Price	
Eagan	Kelley, Mich.	Rayburn	
Edmonds	Kennedy, Iowa	Reed	

The SPEAKER. On this roll call 297 Members, a quorum, have answered to their names.

Mr. GLASS. I move that further proceedings under the call be dispensed with.

The SPEAKER. The gentleman from Virginia moves to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will unlock the doors.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. SINNOTT for five days, on account of illness in his family.

AMENDING THE FEDERAL RESERVE ACT.

Mr. GLASS. Mr. Speaker, proceeding with the debate now, I ask my colleague from Pennsylvania [Mr. MCFADDEN] to use some of his time.

Mr. MCFADDEN. I yield 15 minutes to the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. Mr. Speaker, I think the gentlemen of the House are fairly aware of what the matter is that now pends for their consideration. We all understand in a general way, at least, the Federal Reserve Bank System. Perhaps it is only in a general way that I understand it, but I understand it to be a system that is composed of all the national banks and a very few State banks which are its sole stockholders, who contribute the only capital, through a requirement that they must keep a certain reserve fund in the Federal reserve bank on which there is no interest. I believe they are entitled to 5 per cent or possibly 6 per cent interest if it is earned on the stock that they hold in the Federal reserve bank; but, in the main, I think there have been no dividends and I believe there will be no dividends. Now, it is not necessary that I should discuss the propriety of the Federal Reserve System, and perhaps it is not proper that I should do so. In any event I have not the time. Naturally the Federal reserve banks and the city national banks in the great financial centers like New York and Chicago, and including Atlanta, as they are in this condition, not receiving any interest upon their balances in the Federal reserve banks are a little bit like the fox in Esop's fable that, having its tail cut off, was in favor of the tails of all the other foxes being cut off. Naturally they are anxious to have additional members, and I state only what is an open secret. It has been the desire of the people controlling the Federal reserve bank to force every bank in the country into that system. Now, the State banks do not want to go, and I will tell you why they do not want to go.

If you will pick up the report of the Comptroller of the Currency, you will find that in 1916 there were 27,513 banks in the United States. Those banks—and that included all of them—had resources in round numbers of $32,000,000,000 plus. Now, of those banks there were 19,934, according to this report, which were other than the national banks and the 12 Federal reserve banks. Now, most of the country national banks do not want this provision, but we have a situation where banks having resources of $14,000,000,000 are undertaking to coerce banks having resources of $18,000,000,000 into the Federal Reserve System. Now, it was said some time ago, I think largely in an interview given out by the gentleman from North Carolina [Mr. KITCHIN], that they would so conduct their business as to force the banks into the Federal Reserve System. I think I have stated substantially what is desired upon the one part and not desired upon the part of the other banks that have almost two-thirds of the resources of all the banks of the United States.

Well now, the Senate adopted an amendment to the House bill in substance that member and nonmember banks of the Federal reserve bank might receive not exceeding 10 cents on each $100 or fraction thereof for collecting drafts or checks and remitting the proceeds to the payee or indorsee of the same; this covered full payment for the trouble of collecting and expense of remitting, including stationery and postage.

The House instructed its conferees to agree in substance to the Senate amendment. The House conferees instead of obeying the instruction agreed to provisions nullifying the instruction.

Now, what is the result? I do not have to argue it. If this conference report is agreed to, it will drive the greater portion, if not all, of these 19,000 banks out of their organizations under the State banking laws and will compel them, whether they desire it or not, to become members of the Federal reserve bank. Well, why? Because the Federal reserve bank controls the national banks, and those national banks must either go out of the system, their circulation is secured by the 2 per cent bonds, and so forth, and if you will stop to think a minute, you will see that they can not go out under existing conditions. There they must remain. Now, if you clear through these Federal reserve banks all the checks, all the bills of exchange that have to be sent for collection, in a country of 100,000,000 people, scattered from one ocean to the other, if you clear through the Federal reserve bank you clear for nothing. Well, that means that it puts these 19,000 banks out of business, because if they keep the accounts of their customers they must make a charge, or organize a clearing house of their own, which would be difficult if not impossible to do. Now, that is what will happen. I will not say that the action of the conferees was dishonorable. I will not say that by any manner of means. I have too high regard for the gentlemen who were the House conferees, but I say it was not fair. They violated the instruction of the House in modifying the amendment of the Senate contrary to the instruction of the House. They may attempt to explain their action, but the explanation does not justify their action; and while I do not want to give offense, the explanation is mere pettifoging and not worthy of the high character of the House conferees.

Mr. HAMILTON of Michigan. I will ask the gentleman what those banks are doing now?

Mr. CANNON. These 19,000 banks clear through State banks in the large centers. They do their business with either national banks or State banks in the commercial centers. And just let me tell the whole story. They have got to keep their accounts good, but they get 2 per cent interest from the State banks in the commercial centers or from the national banks on their daily balances. Of course, they must always keep their balance good, but that comparative pittance, which barely more than pays the expenses of maintaining it, would be gone, because if this conference report is sustained by the House they must clear through the Federal reserve banks, where they receive no interest, and they can not receive any compensation for the work they do in making collections upon paper sent for collection.

Mr. GLASS. Will the gentleman submit to an interruption?

Mr. CANNON. I can not. I have only 15 minutes. If I had a little more time, I would be glad to be interrupted. Now, I want to say—and say it now—that I live in the country. A pretty considerable little city is Danville, Ill. It has 40,000 people, 4 national banks, 2 State banks, with 20 or 30 banks scattered over the county, two or three of which are national banks, and the balance under State organizations.

We had a bankers' convention last fall at Danville attended by from five to seven hundred people. At the banquet there was a large attendance, somewhere from four to seven hundred. John Temple Graves made a speech and Col. Buckingham also. They called upon me to make a few remarks, and I did. I said "I want you men that have got country banks and you men who are from settlements where small national banks exist," and that included pretty much all of them, 96 or 97 per cent, when you get away from commercial centers, I said, "I want

every man that indorses the Federal reserve act, that desires to become a member of it, to rise up." I glanced over that audience of bankers, in the main country bankers, and I said, "No man rises, not one."

Now, what is this. Why, a round robin comes in. The Simmons Hardware Co., the Federal reserve bank's people that they can control, nearly all of it comes from the Federal reserve, and from men like my eloquent friend from Atlanta, the gentleman that calls himself the long-haired crank. Well, he is, is he not? He is a bright one, if he is, although he talks about the infernal little country bankers, and so on. They come with a round robin. We all know what a round robin is. God help the man if he has convictions as to the propriety of legislation to be scared about public sentiment that comes from a round robin! I have got them by the score. You have got them. They do not represent one-quarter, no, not one-fifth, of the banking capital or the banking interests of this country or the people of the United States.

Now, let me tell you something, and I want to talk to you Democrats a minute. It is wonderful how fast you are centralizing. Good Lord! I want to keep you and I want to keep myself so that we can get a little decentralization. In the history of this country there was a great contest under the leadership of Gen. Jackson against one central national bank. The national bank went to the wall. I will not stop here to say whether it ought to have been so or not.

The SPEAKER pro tempore (Mr. BYRNES of South Carolina). The time of the gentleman from Illinois has expired.

Mr. McFADDEN. Mr. Speaker, I ask unanimous consent that the time for general debate be extended 5 minutes, and that that time be given to the gentleman from Illinois.

The SPEAKER pro tempore. The gentleman from Pennsylvania asks unanimous consent that the time be extended five minutes, to be given to the gentleman from Illinois. Is there objection?

There was no objection.

Mr. CANNON. The legislation that has been had in the last decade commenced under the Republican Party, but you adopted the child and it has grown until it is a giant. What has happened to your little village with one preacher, sometimes two, with its banker, with its little churches, the little center for the township? They are everywhere in the State of Illinois. It was the center for what? For churches; yes. With the little newspaper, several little retailers, a little distributing center, and rents were cheap. Why, gentlemen, inside of a decade they will dwindle and dwindle, and we will all be journeying at breakneck speed to the great centers of population. Stop and think a minute, and I am not throwing stones, I am just calling your attention to the fact. Under our postal system you can take a great newspaper like the Chicago Tribune and lay it down at the door before breakfast, or before noon, in two-thirds of the State of Illinois every day for $3 a year. That would not pay one-quarter of the cost of the print paper. I am not abusing the Tribune, am not taking up any other question, but I want to say that practically of these 19,000 banks, representing eighteen thirty-seconds as against fourteen thirty-seconds of the resources of the banking interests of this country, nine-tenths of them have no representatives here. They have not been sending round robins. I have not had one. They are too busily occupied with questions touching this great struggle that we are in; but the other round robins from the great centers come galore, and I want to call upon Members of this House who represent small cities of 40,000, cities of 20,000, villages of 1,000 or less—I want to call upon you to see that you do not vote to-day to confirm this conference report and drive these 19,000 banks out of business, or drive them into the Federal reserve organization. That is all I want to say. [Applause.]

Mr. McFADDEN. Mr. Speaker, I yield 15 minutes to the gentleman from Mississippi [Mr. HARRISON].

Mr. HARRISON of Mississippi. Mr. Chairman, the country bank facilitates trade and is the most valuable aid to the wholesale merchant and manufacturer in the city. It not only expedites the settlement between the wholesale merchant and his customers in the rural sections, but the country bank furnishes information for him that will help to safeguard his business. The free and easy movement of trade without delay and congestion is due largely to the functions performed by the country bank.

I want to present to you in the few minutes I have at my disposal this question, removed from the mystifying influence that my friend from Virginia [Mr. GLASS] has placed around the subject. I know that so far as my own mind is concerned it is as clear as glass [laughter], not the mystifying, smoky kind that comes from Virginia. A merchant in a rural section buys a bill of goods from a wholesale merchant in a distant city. This merchant has his money in his home bank. He has to pay that bill, and he must do it either by transferring or remitting the money. He must either go to the express office and buy an express money order or to the post office and buy a post-office money order or get on a train and take his money to the far-away city or send his check there. Let us see how the check system works. This country bank, that seems to have few friends in some high places to-day, has created and maintained balances in certain centers of business throughout the country against which its checks and drafts can be drawn that settlements may be effected between its customer and the seller without an actual transfer of funds. The money which the country bank takes from its depositors removes it from the amount of money that it may loan to the patrons of the bank in the rural sections, and upon which it may derive 6 or 8 per cent interest. Formerly these banks could obtain 2 per cent interest upon their balances maintained and kept in the distant city solely for the purpose of meeting and paying these checks that go from the rural patrons to the far-away city wholesale dealer, but now under this law these banks are to keep all of this money in the Federal reserve banks, and without interest. Oh, no. The little country banker will not get any interest upon his money kept there as a balance in order to take care of these clearances as formerly it did, but under the law it must increase its balances there in order to take care of these clearances.

I submit to you, Is it fair, is it right, that the country bank must be compelled to take money away from its patrons, which it could loan at interest of 6 or 8 per cent, assist and encourage thrift and industry in its locality, and place it elsewhere in order to meet these checks, and then be prevented from making a reasonable charge for the services performed? The entire overhead expense of the country bank enters into the creation and maintenance of these balances. If you go to the Post Office Department you must pay for a post-office money order, not one-tenth of 1 per cent, but you must pay approximately 1 per cent for it. Is there any difference in the bank-check system than in going to the post office in my town and buying a post-office money order and sending it to the wholesale merchant in New York City or Chicago in payment of a bill? Does the Post Office Department actually transfer the funds to Chicago or to New York? No; because the money is taken out in Chicago and New York and balances are maintained at both places. It is kept there by the Post Office Department. Last year the Post Office Department made approximately $7,000,000 out of exchange charges alone upon post-office money orders. The Post Office Department handled in that way about $700,000,000. Not 1 cent of that was actually transferred, but the charges were made for the service rendered. Practically the same charge is made by the express companies. I submit this to you: Is it right, when the country bank makes such arrangement that expedites settlements and aids trade and business, incurring thereby substantial expenses, even though money is not actually transferred, that it should perform that service without pay?

Mr. HAMLIN. Mr. Speaker, will the gentleman yield?

Mr. HARRISON of Mississippi. Yes.

Mr. HAMLIN. Under the gentleman's system who would pay this exchange?

Mr. HARRISON of Mississippi. The wholesale city merchant. I can not yield further.

Mr. PHELAN. Mr. Speaker, will the gentleman yield for a question?

Mr. HARRISON of Mississippi. No. I have only 15 minutes. If the gentleman will give me some time, I will be glad to answer his question.

Mr. PHELAN. Just one question.

Mr. HARRISON of Mississippi. No. The gentleman from Missouri has asked me who paid it. Let me read to you from a circular that was gotten out the other day by the association of wholesale clothiers, jewelers, hatters, manufacturers, and every other kind of wholesale merchant, signed by W. B. Simmons, of the Simmons Hardware Co., and others. They are against the Hardwick amendment, and here are the reasons for it: These wholesale houses do not want to pay it, but they want somebody else to pay it. Here is what they say. They say that they—

share thoroughly the conviction that the bankers should have adequate compensation for all services which they render to their patrons, and that their compensation should cover not only any direct outlay involved in rendering that service, but should cover also indirect or overhead charges—and a profit besides.

And then follows this language:

However, that compensation should be charged to and paid by the patron of the bank to whom the service is rendered.

They want the little merchant who keeps a deposit in your town and in every other small town in the country to pay the exchange charge, and they want to be relieved of the payment of it, and that is the question here, whether or not you are going to stand by your people back home, your merchants and business people, who are patrons of the bank, or whether you are going to stand by the large wholesale merchants of the city?

Mr. HAMLIN. Mr. Speaker, will the gentleman yield for one question?

Mr. HARRISON of Mississippi. I can not yield any further.

Mr. HAMLIN. Does not the merchant who draws the check pay it as a matter of fact?

Mr. HARRISON of Mississippi. Absolutely he does not pay it at all.

Mr. GLASS. Mr. Speaker, will the gentleman yield?

Mr. HARRISON of Mississippi. Will the gentleman give me some more time?

Mr. GLASS. No; I shall not give the gentleman any time.

Mr. HARRISON of Mississippi. Mr. Speaker and gentlemen, of the House, the check system in this country has grown until to-day $900,000,000,000 worth of trade is done through checks. Ninety-five per cent of all of the trade of the country is done through the checking system, but there seems to be a desire by the Federal Reserve Board and certain men in this House to show favors to the big city banks as against the little country banks. I received a letter the other day from a banker in my district and he said that under an order passed by the Federal Reserve Board in respect to the liberty loan bonds that were to be sold, unless the banks sold $100,000 worth of the bonds they must remit the money to the Federal reserve banks and could not keep it as a deposit in the vaults of the bank. Why should these efforts be put forth to discourage and strangle the little banker in this country? I submit if there were ever a time to popularize the Federal Reserve System and give impetus to patriotism in this country it is now. A great many of the little banks have earned a substantial per cent of their earnings out of exchange.

You ought not to take it from them at one fell swoop. The gentleman from Virginia [Mr. GLASS] will cite you in his closing argument possibly where some banks charge too much, way up beyond what they ought to charge, but that is prevented by the Hardwick amendment. They shall not, in the future, charge over one-tenth of 1 per cent. I submit when you buy a bill of goods and send a check and you only have to pay $1 a thousand that that is not too much, that that is a legitimate charge, and the business people of the country will not oppose it and should not oppose it. This is a question, after all, between the seller and purchaser. The collection system should not be interwoven with the Federal Reserve System. It may be said that this does not affect the State banks, but let me suggest to you that that board has no jurisdiction over State banks; the Federal Reserve Board has done everything in its power to drive the State banks into the par-collection system.

Mr. MEEKER. Will the gentleman please yield?

Mr. HARRISON of Mississippi. No; I will not yield to the gentleman; I have not the time. The State banks have not come into this system, in my opinion, because they can not make this reasonable, this legitimate, charge for the services that they have rendered. You remember a year or two years ago the Federal Reserve Board was very anxious to drive the little State banks into that system, and they requested the Postmaster General to issue an order. That order stated, in substance, that in these country towns where the State banks did not collect and remit at par the post office would collect the check and make no charge thereon. A protest immediately arose in this House and over the country. The leader of the Democratic Party on this floor rose in his place here and called the attention of the country to it, and the Postmaster General withdrew the order. I am informed that in New York City the Clearing House Association passed an order that the banks in that State that did not remit at par would be compelled to remit in actual money through the express companies. That is the kind of tactics that have been employed to drive the little State banks into the system.

The State banks that have come into it for the most part have been forced into it. Now, let me submit this proposition to you: Say you have got in a small town in your district four banks, two national banks and two State banks. If you compel the national banks to clear their checks at par, take away from them this legitimte charge for exchange, and the State banks can continue to charge that exchange, is it fair, is it right to the stockholders of the small national banks? You are discriminating there, gentlemen, and the gentleman from Virginia [Mr. GLASS] knows that that is wrong. It is a species of discrimination for which you have to answer to your people when you go back home.

Mr. GLASS. Will the gentleman yield?

Mr. HARRISON of Mississippi. If the gentleman will give me some time. Oh, the gentleman has 48 minutes remaining. He can smile, but he can not dodge the issue in that way. That reminds me that here is a letter the gentleman from Virginia [Mr. GLASS] received from Mr. Harding, of the Federal Reserve Board, but first I want to recall to the minds of Members here that after we passed this proposition through the House by 246 to 117 instructing the managers to agree to the Hardwick amendment, and appointed the distinguished gentleman from Virginia and the gentleman from Massachusetts and the gentleman from New York as managers upon the part of the House, skipping over, may I say, the gentleman from Iowa, who is entitled to a place on the conferees, why I do not know, but I do know that the gentleman from Iowa was in favor of the charge by the country banks and the gentleman from New York was not in favor of the proposition. [Applause.] I know, too, in appointing conferees that the Speaker appoints those who are suggested by the chairman of the committee in charge of the matter. [Applause.]

If the gentleman did not suggest those names, I wish now he would arise in his seat and say that he did not suggest those names. The gentleman does not rise. [Applause.] Yet they go out and absolutely disregard the will of this House and bring in an amendment here that destroys the very character of the Hardwick amendment. It is a defiance to this House. But back to the letter written by Mr. Harding, governor of the Federal Reserve Board, to Mr. GLASS. It was evidently written immediately after the action of the House on May 10. The gentleman from Virginia went up to see Mr. Harding—had a conference with him. They talked about things, I do not know what—I have not heard; but here is the evidence that they had a talk. Listen to it, gentlemen. He says:

DEAR MR. GLASS—

I am surprised he did not say "My dear CARTER." [Laughter and applause.] He said:

Since you were in my office this afternoon Mr. Delano tells me that he has just had a talk over the telephone with Gov. Strong, of the Federal Reserve Bank of New York, who calls attention to the possibility, if not strong probability, of the Government having to pay bankers a million dollars exchange charges in connection with subscriptions to the liberty loan, assuming that the Hardwick amendment, which the House has instructed its conferees to agree to, becomes a law.

That is an outrage, that is an insult to the patriotic bankers of this country. [Applause.] May I say to the gentleman from Virginia [Mr. GLASS] that these bankers have come forward and have spent their money to advertise the sale of these liberty loan bonds, and if as much patriotism were shown by some other people in this country as has been manifested by the country bankers we would have to-day more patriotism in the country. [Loud applause.] This letter closes by saying:

This, I think, would give you the opportunity that you desire to handle the matter in conference,

[Applause and laughter.]

This will give you the opportunity you desire to handle this matter in conference! [Laughter.] What was his desire? I do not know, but the effect of their action is to defeat the will of this House.

Mr. Speaker, I know some banks in some sections of the country do not make this charge. But you can not apply a universal paring system any more than you can apply the same passenger rates to every section of this country, or the same price of newspapers and advertisements in every town and city throughout the country. In the East, where the population is dense, the railroads make large revenues by charging 2-cent rates, but in the West and South, where population is sparse, the railroads in many instances lose money in charging 3 cents a mile.

In this city and other large cities newspapers sell for 1 cent a copy. In New Orleans and many other cities and towns 5 cents a copy is charged. There is as much justice in compelling a uniform price for papers or a uniform 2-cent rate or no rate at all for passengers over the railroads as to compel the banks of the country to render this clearing service without charge. A bank in an old section, where the value of industries is fixed, can judge with accuracy its assets in advance, but in new and undeveloped sections, where securities are uncertain and deposits vacillating, dividends are less assured and the business more hazardous. And so I submit that any rule that will apply the same to every section of the country, where conditions along business lines are so different, will be unwise as well as unfair. The custom of charging a reasonable exchange for collecting and remitting on checks and drafts in many sections

of the country is firmly established, and to deprive the banks of it at one blow might be disastrous in many cases.

Gentlemen, there is a principle involved here. If you vote to adopt this conference report you say to the managers in the future, "Go and exercise your own judgment; ignore the will of the House; because we will reverse ourselves when you come back."

Are you going to do it? I do not believe you will. I hope that the motion that will be offered by the gentleman from Pennsylvania [Mr. McFADDEN] to recommit this proposition to the conference committee will carry. [Loud applause.]

I yield back the balance of my time.

Mr. GLASS. How much time have I remaining?

The SPEAKER. The gentleman has 43 minutes remaining.

Mr. GLASS. I yield 15 minutes to the gentleman from Massachusetts [Mr. PHELAN].

Mr. PHELAN. Mr. Speaker, while the matter which is of greater interest to the House is the Hardwick amendment, the gentleman from Arkansas [Mr. WINGO] is right when he says that section 7 is an important amendment. In my opinion it is the most important amendment we have before us to-day. Inasmuch as he has asked for some explanation of it, I am very glad to give it so far as I can. The gentleman said he would be glad to find out that he was wrong. If it will please the gentleman any I will state that he was absolutely wrong in two statements that he has made. When he states that under this section $140,000 of Federal reserve notes could be issued against $40,000 of gold, he is absolutely, unquestionably wrong. Except so far as the original Federal reserve act, passed in 1913, lets down the bars through the operation of a progressive tax, 40 per cent in gold must always be maintained. That, however, is not before us to-day. So far as the present act is concerned, it does not change by an iota the amount of reserve that must be held against Federal reserve notes issued.

Mr. WINGO. Will the gentleman yield?

Mr. PHELAN. I am sorry that I can not yield. I have only 15 minutes, and the gentleman could not yield to me when he had 28 minutes.

Mr. WINGO. I want to ask the gentleman to read the law——

Mr. PHELAN. I can not yield.

The SPEAKER pro tempore (Mr. BORLAND). The gentleman declines to yield.

Mr. PHELAN. Except as I have pointed out, there is no way in which any Federal reserve notes can be issued unless there is 40 per cent reserve of gold. That is the first statement.

The second statement in which the gentleman was wrong was the statement in which he tried to make out that in these amendments we are giving power to the Federal reserve banks to buy bankers' acceptances and use those as security against the issue of Federal reserve notes. All the talk he made with reference to that he should have made in September, 1916, because that was when we adopted that provision. He was talking about present existing law. The present amendment does not effect the security that can be put up against Federal reserve notes except in two respects. It permits gold to be held as security, and it also permits as such security 15-day notes of member banks, the direct obligations of member banks; but even these must be accompanied by collateral commercial paper of the proper kind.

To come now to the essentials of this section 7, this section does three important things.

Mr. STAFFORD. Mr. Speaker, on account of the unusual storm outside, which is attracting the attention of nearly all the Members of the House, I ask unanimous consent that there be a suspension of business for five minutes, not to be taken out of the gentleman's time.

Mr. MEEKER. Mr. Speaker, these are all country Members who are going out to look after their horses in the rain; that is all. [Laughter.]

Mr. LOBECK. Evidently it is a million-dollar rain and worth paying attention to.

The SPEAKER pro tempore. The gentleman from Wisconsin asks unanimous consent that the House take a recess for five minutes. Is there objection?

There was no objection.

Accordingly (at 12 o'clock and 35 minutes p. m.) the House took a recess until 12 o'clock and 40 minutes p. m.

The recess having expired, the House resumed its session.

Mr. PHELAN. Mr. Speaker, this amendment proposes in the main to do three things. The first is to permit the exchange of Federal reserve notes for gold; the second is to reduce the amount of commercial paper necessary to be put up as collateral against the issue of Federal reserve notes from 100 per cent to 60 per cent; and the third is to permit the gold thus acquired to be used as reserves either for the further issue of Federal reserve notes or for the further extension of credit by the Federal reserve bank. The purpose of these provisions is to strengthen the Federal reserve banks, and through them to strengthen the whole credit and financial mechanism of the entire United States. These provisions will add exceedingly to their strength. The process is going to work this way: The Federal reserve banks will issue Federal reserve notes and get gold in their place. They will take that gold and put it in what might be termed big reservoirs. When they have occasion to use it, it will be there ready for their use. There is already outstanding approximately $500,000,000 of Federal reserve bank notes. They are passing as money. Nobody makes any complaint against their use. The Federal reserve agents have in their possession approximately $500,000,000 of gold. Now, the Federal reserve banks to-day can not, except possibly by cumbersome, indirect methods, touch a dollar of that gold. It has been gathered there. It has been taken out of circulation and Federal reserve notes issued instead. But even though it is there, it is not available, as it should be, for use as a basis for the credit of the country. This amendment proposes that that $500,000,000, and any additional gold which can be stored away, shall be available——

Mr. HAMILTON of Michigan. Did I understand the gentleman to say that certificates have been issued on this gold?

Mr. PHELAN. I think I said that Federal reserve notes had been issued. To-day the only way that the Federal reserve banks increase their own gold supply is by one of two processes. One is by the contribution to the capital of banks by member banks, and the other is by deposits. There is a limit to the amount of gold which can be secured in these two ways, and a limit which in the near future may not suffice. The possession of gold in large quantity is essential to the proper operation of our credit system. Our whole credit structure is based on gold.

The more gold you can put into control of the Federal reserve banks, the greater power you give them to expand and serve the business interests of the country. The whole purpose or the great purpose of this amendment is to have this gold gathered up in advance, to be kept ready for use if that use becomes necessary. It is not obtained from contributions to capital nor from deposits. It is obtained in a simpler and easier way—by the exchange of Federal reserve notes for gold. Take the case I have stated. We have $500,000,000 of gold. Suppose something should arise in these uncertain times so that the Federal reserve banks are called upon for gold for export, suppose they need additional gold beyond that now supplied through capital and deposits as a basis of credit, there is absolutely no way in which they can get it. This amendment gives them the power to get it, and that is the main purpose of it.

But there is another purpose almost as important. To-day the reserves of the Federal reserve banks are about 60 per cent, a perfectly safe reserve. If they should get to 40 per cent the business of the Nation would become afraid, although the banks might be perfectly strong. If we allow them to use the $500,000,000 of gold already stored up as well as any additional gold they can get through this amendment as reserve it makes the banks stronger, even though they do not use the gold thus obtained. It greatly increases the amount of reserves and that of itself inspires confidence.

Our whole credit structure is built on gold, and we want, as far as we can, to use gold in this country to the best advantage. When it is around in the pockets of the people, in stores, in safes, in hotel tills, and various other places it is not being used to the best advantage. It is simply used as currency. When it can be gathered together in the control of the reserve banks it can be used as a basis for credit and will give an expansion power of approximately one and one-half times additional. This additional one and one-half times is increased in even greater proportions when availed of by member banks.

Under the amendment the banks will immediately exchange Federal reserve notes for gold, as they have been doing indirectly, but this will allow them to do it by direct process. They may accumulate three quarters of a billion or a billion dollars in gold. This vast accumulation will be held ready for any need, for any emergency.

Such need or such emergency may arise at any time. We have vastly increased our supply of gold in the United States since the outbreak of the European war by hundreds of millions of dollars. This vast influx of gold has made it easy for the banks to extend their credits. Deposits have piled up in huge amounts. Business has been flourishing. The basis of the whole credit system is gold. If credit is needed for still further extension of business, gold is at its base. We can not always keep the gold, however. Inevitably economic processes will cause some exportation. Other nations may need our finan-

cial aid during the war or after the war. We may, as the great creditor Nation of the world, find it attractive to invest abroad. The balance of trade at any time may set in against us. At all events we must be prepared to forestall the time when gold will flow out of the country. We must now prepare ourselves so that we can then meet any emergency that arises; supply any demand that may be made; withstand any shock which may come. If business has expanded through the extension of credit, we can not be caught through the lack of gold as a basis of credit in such a way that we must suddenly contract credit. We must be ready to uphold the credit system already established. We must be ready to avoid the shock of a sudden contraction of credit, with a resulting business contraction which would prove disastrous. The whole point is we must employ every reasonable method to use the gold we have to best advantage. We can use some means to help retain gold, but we can not retain it all. We can, however, use what we do retain to best advantage, and it is the proper and most advantageous use of our gold supply which is our principal responsibility.

We now have an abundance of gold. Now is the time to prepare. If later on gold is exported and need for it as the basis of credit arises, it may be extremely difficult, sometimes impossible, to get it, and get it promptly, with it scattered all over the country. It may not be possible to get it at all when needed. If, on the other hand, it has been previously accumulated in the control of the 12 Federal reserve banks, it is already available when need arises, and available immediately. This section 7 affords the means whereby it is gathered together in huge reservoirs by the provision permitting the exchange of Federal reserve notes for gold. This section 7 permits its use for credit purposes after it has been accumulated through the provision permitting it to be used as a reserve for issue of Federal reserve notes or for book credit.

Section 7 makes available great funds of gold for any necessary expansion of credit which even these extraordinarily uncertain conditions may bring about. Scarcely less important, it provides for a much greater reserve for a given amount of credit expansion.

At this time it is important to remember one other thing, that the Federal reserve banks have the privilege of loaning money and extending credits on United States bonds. We are floating to-day, or will within a few days, $2,000,000,000 of liberty-loan bonds. The Federal reserve banks as well as the member banks are going to use their credit to help float these bonds. That means that the member banks are going to invest a large amount of funds in the bonds to carry them for the people who will finally own them. The Federal reserve banks are going to do the same thing. That means that a latent, if not active, source of credit is going to be withdrawn from business. You can not have the banks of the country carrying liberty-loan bonds and the Federal reserve banks doing the same thing without at least running the danger that you are not going to be able to give the credit facilities to business which it demands. If you adopt section 7, you are going to make $500,000,000 of gold immediately available for reserves, which will more than offset any credit which might be used to take care of the two-billion bond issue. That is one reason why it is so essential to adopt the amendment immediately. The reserves of the Federal reserve banks have dropped in a few days. In March the gold reserve of Federal reserve banks against deposits and Federal reserve notes was 74.6 per cent; on June 1, 61.3 per cent; on June 8, 59.2 per cent. The reason for the present drop is that Government deposits have increased because of the liberty-loan issue. This condition is only temporary, but if they get their funds invested in liberty-loan bonds and have not some power to expand we may reach a condition which may cause a great contraction of credits in this country.

If gold is stored and made available as contemplated in section 7, we can stand the demands for credit to float liberty bonds; we can stand for the exportation of $100,000,000 or $200,000,000 of gold and still sustain our credit structure.

To-day the Federal reserve banks have of free gold $200,000,000. There is no knowing when they may be called upon to use a good portion of this. In view of the uncertain but inevitably tremendous demands to be made, we can not be certain how long this supply will last. I have pointed out the demands which will be made in connection with the distribution of liberty bonds. Other war needs may cause additional heavy demands. Why permit the all-essential gold supply of the Nation to be floating in large measure all over the country when it is so easy to accumulate in reservoirs ready for use? In order to have this gold where it can always be available for credit this amendment is essential.

The whole purpose, as I have said, is to gather the gold where it can be used. It is expedient for the Federal reserve banks to get together the gold in big reservoirs ready for use when it becomes necessary. It will not do to wait until the banks need it. It must be got together before it is necessary for them to use it.

If you adopt this amendment the gold will be placed all ready for them, ahead of time, without any expense to them, all ready there for their use, so that when they need to use it it is there for them. That is the essence of the whole thing. The purpose, as I have stated, is to give greater strength and power to meet any possible needs that may come. No one knows what demands are going to be made. We know that every European country in this war has stretched its financial credit to the utmost. We do not know what demands the future is going to make upon us with reference to the liberty loan fund or anything else. We do know that we can expect all kinds of need for credit in this country. We do know that it is vital to the Nation to maintain commerce and trade and agriculture through sufficient credit accommodation.

As long as we are doing it in a safe way, we ought to put into the hands of the Federal reserve banks every power possible to get the gold necessary for credit expansion. Get the gold there and have it ready for them to meet any emergency that may arise. My time is about expired, but if I can answer any question I will be very glad to do so.

Mr. PLATT. Mr. Speaker, I just wanted the gentleman to bring out a little more definitely that this is a gold-collecting process and does not change the reserve requirement at all.

Mr. PHELAN. I meant to state that clearly. The reserve requirements are just the same. They will be 40 per cent against the Federal reserve notes, and in that connection let me say this: The purpose of enacting this amendment relates not only to Federal reserve notes. That is the smallest part of it. It is in order to get the gold, so that the gold can be used not only for necessary expansion of Federal reserve notes, but also in order that it can be used for the extension of credit to member banks. Get it there in advance, and as long as there is commercial paper to substitute you can get the gold and use it for expansion of Federal reserve notes or, more important, book credit.

Mr. FARR. Mr. Speaker, the gentleman from Arkansas [Mr. WINGO] speaks of inflation and the gentleman of expansion. Will he please differentiate?

Mr. PHELAN. They are comparative terms. Inflation, I suppose, applies when you are taking undue chances and expansion means when you are not. As long as you keep an adequate reserve, and as long as you keep your assets in commercial paper, which is liquid, paper which is based upon production and distribution—and that is what every bit of this paper in the Federal reserve banks is based on—it does not seem to me that there is any danger of inflation at all. You ought to have opportunity for that much expansion.

The essentials of the Federal Reserve System are not interfered with. The safety of the system lies in the maintenance of an adequate gold reserve and in the investment of the bank's funds and credit in short-time liquid investments. The commercial paper in which the Federal reserve banks must deal is that kind of paper, resulting from loans the proceeds of which are used for production and distribution. So long as the funds of the Federal reserve banks are employed in production and distribution the banks are traveling the path of safety. Section 7 in no wise interferes with this fundamental principle. It simply provides the means whereby the banks may be stronger and better able to perform their all-essential functions.

The SPEAKER pro tempore. The time of the gentleman from Massachusetts has expired.

Mr. McFADDEN. Mr. Speaker, the discussion of this conference report, and in fact the whole reference to the so-called Hardwick amendment, has produced a very interesting situation.

I intend, because of this, to review very briefly the various stages of this bit of legislation, and I am prompted to do this because of the statements made day before yesterday by my colleague [Mr. GLASS], chairman of the Banking and Currency Committee of the House, when he said, in substance, that the Members of this House voted ignorantly and without knowledge when they instructed the conferees to accept the Hardwick amendment which was added to the bill in the Senate.

The history of this legislation briefly is this: When House bill 3673 first came up for discussion in the House I offered this amendment and lost on the point of order. The bill then went to the Senate, and Senator HARDWICK offered the same amendment, which was accepted. The next morning my colleague [Mr. GLASS] asked to take from the Speaker's table the Senate

bill, and asked that the House disagree to the Senate amendments and that conferees be appointed. I then moved that the managers on the part of the House be instructed to accept the Hardwick amendment. This was the first time the House had had an opportunity of passing on this amendment.

A roll call was had, and the vote to instruct the conferees stood 240 in favor and 117 against. The Speaker appointed the conferees on May 10 upon the suggestion of the chairman of the committee.

On May 11, following a letter written by Gov. Harding on May 10, after the instructions to the conferees, Senator MARTIN attempted to get a reconsideration of this amendment in the Senate, but failed.

I desire to have you note this fact, which was confirmed by the chairman of the committee yesterday in answer to my question if it was not a fact that the conferees were all opposed to the Hardwick amendment as passed by the Senate and are still opposed to it, that immediately after the decisive vote of the House instructing the conferees on May 10, the managers deliberately set about to devise some plan whereby they could defeat the instructions of the House. As proof of this I call attention again to the letter of Gov. Harding to Chairman GLASS, written on the same day that the conferees were instructed, and following an interview, the last paragraph of which reads as follows:

I would suggest, therefore, that you call the attention of Senator OWEN to this, and suggest that he ask the Senate to reconsider the Hardwick amendment, with a view of changing it—

And so forth. And then says:

This, I think, would give you the opportunity that you desire to handle the matter in conference.

Inasmuch as this was the only matter under discussion, I consider this to be sufficient proof that the violation of the instructions of this House was deliberate, and it might be construed as malicious, when you consider that only one side of this question was represented in the conference committee.

The gentleman from Mississippi [Mr. HARRISON] has pointed out, in support of this argument, and I desire to point out again to the House, that the sacred rule and practice of ranking members and priority were absolutely ignored in the selection of the conferees, and, I believe, deliberately so, because if the usual precedent had been followed the minority member of the conferees would have been one who favored this amendment. The present minority member is opposed to the Hardwick amendment.

Mr. Speaker and gentlemen of the House, it strikes me that when the House by a vote of almost two to one instructs its conferees, and a condition arises such as we are confronted with to-day, and partisan conferees are selected, that the course and action of this House should be perfectly plain and clear.

They should vote down this conference report and vote for a motion to recommit the report to conference, and the conferees should either be compelled to obey the instructions of the House or a new set of conferees should be appointed representing both sides of the question in controversy.

I would point also to the fact that there has been conducted and is being conducted to-day one of the greatest lobbies and propagandas for the purpose of defeating this piece of legislation that I believe has ever been carried on here. I would further point out to you that this lobby and propaganda has been carried on with the cooperation and assistance of the Federal Reserve Board, the Federal reserve banks, and here I will place in the RECORD a telegram as proof:

PHILADELPHIA, PA, *June 8, 1917.*

LOUIS T. MCFADDEN,
Care House of Representatives, Washington:

We are advised that the Pennsylvania Bankers' Association, in session at Bedford Springs, voted their disapproval of the Hardwick amendment to the Federal reserve act.

FEDERAL RESERVE BANK OF PHILADELPHIA.

The governors of the Federal reserve banks, in connection with the National Credit Men's Association, organization of jobbers, mail-order houses, including the large financial institutions in the big cities of the country, and that thousands of telegrams and letters have been sent to the Members of the House and many personal interviews held, all of which has taken place since the House instructed the conferees to accept the Senate amendment on May 10. These people, mark you, who are back of this propaganda are satisfied with the amendment as reported by the conferees, and are not all satisfied with it as it was originally.

That ought to be conclusive proof for anyone here that the managers on the part of the House have so changed this amendment as to completely nullify and destroy its original purpose, and should be convincing proof that this report should be returned to conference. Let it be made perfectly clear that the opposition to the original Hardwick amendment, which is the one the House voted for, and not as now reported by the conferees, is backed by the big city banks, the big jobbing and mail-order houses, and that the other side is for the country banks who are claiming the right to make a reasonable charge for actual services performed, and that these banks are owned and controlled by thousands of stockholders who are your constituents and are thus affected by this legislation. I insert as further proof the following letter, which explains itself:

CARLETON DRY GOODS CO.,
St. Louis, May 30, 1917.

Mr. F. E. WALKER,
Milan, Tenn.

DEAR SIR: Since our country has been at war, the attention of all of us has been more or less diverted from matters of ordinary business interest, and some legislation has been proposed in Congress that is decidedly unfavorable to the merchants of the country, both wholesale and retail. I now refer particularly to the Hardwick amendment to the Federal reserve act, which, if passed, will permit the banks in the Federal Reserve System to resume their former practice of charging for the collection of country checks, which works quite a hardship on the commerce of the country. This amendment may be defeated by prompt action, and we ask that you sign and send the inclosed telegram to your Senator or Congressman, or better still word a message in your own phraseology, urging them to oppose the bill. We herewith inclose the money to prepay telegram. Will you kindly advise on the inclosed card that you have sent the message and to whom it went.

Thanking you in anticipation of this action on your part for our mutual good, we are,

Very respectfully,

CARLETON DRY GOODS CO.
J. R. CURLEE, *Secretary.*

But to get down to the real merits of this matter, which have been so misrepresented and misunderstood, I beg to make the following concrete explanation of the question involved at this time.

We are confronted with a condition and not a theory.

Let us get down to the bottom of this proposition.

In the first place, the charters granted for banks, whether granted by a State or the United States, place upon the banks certain restrictions and obligations. At the same time the charters provide certain privileges and functions which the banks may enjoy and perform.

Everyone who knows anything about banks, their duties and functions, will admit that the purchase and sale of exchange and the transfer of funds to liquidate debts or settle trade balances are primary and legitimate functions of banking. In performing these functions the banks render the commercial and industrial interests a most valuable service. This service calls into play the resources of the banks and entails labor, risk, and expense. Why should the banks be required to render a valuable service without compensation?

The opponents will tell us that the Federal reserve act does not require the banks to render this service without pay, but I desire to impress upon you the fact that the law, as interpreted and applied under the rulings of the Federal Reserve Board, does require the thousands of country banks scattered throughout this land to render this service, from which the jobbers, big manufacturers, mail-order houses, wholesalers, and merchants in the large cities get the full benefit, and further requires that they do so at a heavy expense and without any compensation whatsoever. It not only puts the banks to a heavy expense, but takes away a considerable revenue they have heretofore enjoyed, and passes it to the profit accounts of the big mail-order houses, jobbers, wholesalers, manufacturers, and merchants.

In a letter dated April 13, 1917, addressed to Senator OWEN, Gov. W. P. G. Harding, of the Federal Reserve Board stated:

The board realizes that the operation of the Federal reserve check clearing system has in a number of cases deprived banks of an income from exchange on checks which they have hitherto enjoyed.

The President of one of the largest banks in the United States said in a letter to me yesterday:

We quite agree with you that the country banks are entitled to some consideration in the collection business. We have never approved of the Federal reserve bank going into the collection business at all; collection arrangements have been disturbed and reserve agencies have been upset by the Federal reserve act.

In considering this question we must not overlook the fact that three-quarters of the people of America are served by the so-called country banks. These country banks are the backbone of production, and to jeopardize their existence will stifle production, which would be a serious menace to the Nation.

The so-called country check is here, and here to stay. It is the most valuable instrument that serves the commerce of the country. It was not originated, as the opponents would have us believe, merely for the purpose of affording a means through which the country banks might levy a toll upon commerce in the way of exchange charges. It came into being to meet a situation arising from a faulty and inadequate currency system. It was designed for local use only, but the rapid development of business and the conveniences the check afforded to the farmers, merchants, and business people throughout the country soon

led to a tremendous expansion in its scope. It spread from community to county, from county to State, and finally to the length and breadth of the land.

Some fifty-odd years ago the national banks of America held deposits aggregating slightly over $400,000,000. At that time the national-bank-note circulation was about $239,000,000, or 60 per cent of the deposits held by the national banks.

The national banks now hold deposits aggregating over $13,000,000,000; the national-bank-note circulation is but slightly over $700,000,000, or less than 6 per cent of the deposits. Other specie, currency, and coin are in like proportion.

The personal or so-called country check has come in to make up a vast part of the difference. We must not be misled into the idea that the personal check is currency because it has taken care of a trouble arising from a defect in the currency system and has become popular as a means of settling balances, transferring of credits, transferring of funds, and liquidating obligations; the personal check is not currency. It is merely an order to pay or to liquidate an obligation upon certain terms. Law and custom drive it back home over the shortest route. It does not pass by delivery, as does currency, but must be properly indorsed, properly recorded, and further is subject to many legal defenses and conditions that do not apply to currency. There is the question of the solvency of the makers, and other risks that must be considered and assumed by banks in handling checks that do not attend the handling of currency.

There is a liberal profit in national-bank-note circulation. It arises from the interest upon bonds that are deposited with the Treasury Department to secure the circulation. Some of the members of the Banking and Currency Committee of the House would have you believe the country banks can afford to stand the burden of the expense of remitting for all checks at par because of the profits they derive from the deposits of the people who draw the checks. I want you to know there is not a bank in Washington, or in any city, town, or hamlet in America but what has upon its books a large number of accounts that are carried at a loss to the bank. In thousands of instances the only profit that is yielded to the country bank from the accounts of many of their small customers comes from the exchange charged by the banks when remitting for the checks these customers have sent to distant points. The banks take such accounts and nurse them along in hopes that they may later become profitable, and with the broader view of developing ideas of business among all classes of people in their respective communities.

The banks of America are now confronted with the task of collecting annually over 723,000,000 of the so-called country checks. These aggregate $30,000,000,000, and are handled at an annual expense of about $10,000,000. The exchange charged on these $30,000,000,000 worth of checks aggregated for the year prior to the inauguration of the present Federal reserve collection system $20,000,000.

The question is, Shall the country banks that have been and are the greatest factors in productive life of this Nation be called upon to surrender this revenue heretofore termed "exchange" and still be required to serve as the means of collecting all these checks at a tremendous expense, or shall the big jobbers, packing houses, manufacturers, mail-order houses, and wholesalers who get the benefits be called upon to pay it, or demand from their customers exchange that will be furnished by the local bank in the regular course and which will be available on the day it is received in the center at its face?

You say the merchant would have to pay for the exchange. Why should not he have to pay for it? It costs money to produce the exchange. Labor, risk, and expense are involved in every transaction where exchange is used, whether the exchange is issued for direct sale or given in payment for checks that have been sent to distant points.

This is a matter between the buyer and seller. They are the ones who are benefited, and as to which of the two should pay the exchange is a matter they should settle between themselves—in the same manner as they settle the proposition as to who shall pay the freight. It should not be shouldered onto a third party, but as the collection system of the Federal reserve banks now operates the whole burden is thrown upon the country banks. It is not fair or just that a system shall be maintained which requires a lot of country banks to render a valuable service at a heavy expense in order that a few large mail-order houses, manufacturers, packing houses, jobbers, wholesalers, and merchants shall enjoy increased profits.

More than 75 per cent of the banks of America, State and national, are opposed to the present collection system, because it is inefficient, inadequate, and places unwarranted burdens upon the banks. It hinders the development of the more important functions of the Federal Reserve System.

The banks have expressed the earnest desire to cooperate in evolving and developing a collection and clearing system which will give the public the best possible service at the least possible expense. They are willing that the public shall receive the full benefits from the saving that may be effected by any plan that may be operated, whether operated by the Federal reserve banks, by the clearing houses, or otherwise; but the banks are not willing that a system shall continue which does not facilitate to any appreciable degree the handling of the vast volume of checks and which saddles upon the banks unnecessary and unwarranted expense.

Let me make the position of the merchant and manufacturer clear to you. We will suppose that a small merchant at Canton, Ohio, purchases a bill of goods from a manufacturer in New York City. The bill falls due. How can the Canton, Ohio, merchant pay it? Here are the means that are open to him:

(a) He can send the cash by mail or express. If he sends it by mail, the registration fee will be 10 cents; this, coupled with the postage and insurance, will make the cost greatly in excess of what any bank would charge in the way of exchange. Should he ship the cash by express the cost would also be greater than exchange. These two agencies exist by virtue of law, and are regulated by departments of the Government.

(b) He can purchase an express-company or post-office money order. The charges for express money orders are more than three times what the banks charge for exchange. The average charge by the post offices of the United States for money orders last year was $0.10 per $1,000, while the average charge made by banks for remitting to cover the so-called country checks was 66⅔ cents per $1,000.

(c) He can make the trip personally, or send an agent to pay his bill. This is prohibitive.

(d) He can transmit it by telegraph at a great expense.

(e) He can buy exchange that is immediately convertible at its face from his local banker by paying a small fee therefor.

(f) He can, if his creditor will accept it, send his personal check. This is the least expensive and most convenient way to pay the bill. But when the creditor takes the personal check good only in Canton, Ohio, he should assume with it the burdens of expense, and so forth, that attend its liquidation. If the New York manufacturer is not satisfied, and does not want to stand the exchange costs, let him pass it back to the buyer.

Many of the merchants, manufacturers, jobbers, mail-order houses, and other concerns in the large centers who sell their wares over a widely distributed area include in their overhead expense their costs in the way of exchange; in this way the buyer has in many instances paid it, and continues to pay even where no exchange is charged by the country banks when remitting. This means an increased dividend for these big city concerns; but what about the buyer and the country bank? The country bank performs the service, but does not get the exchange; the seller collects the exchange, but is not required to pay it.

One merchant in a middle western town writes that he is against this amendment allowing a reasonable charge, and gives as his reason that he has saved $5,000 this year because the country banks were not permitted to collect pay for their services. Do you suppose that merchant has reduced the prices upon the goods he sold to the country merchants accordingly? No; not by any means.

What is there to the statement made by a certain Member of this House to the effect that the exchange charges made by country banks are "a tollgate upon the highway of commerce"?

It has been shown that checks were originated to serve a definite need; they have served that purpose, and served it well. Checks have been so useful and so convenient that they have become the means through which more than 95 per cent of the business of this country is being transacted. The check has reached this stage, even though it carried with it the charges which one of the opponents has been pleased to term "a tollgate upon the highway of commerce." Is not it a little strange that the check would become so popular if the exchange has been such a tremendous burden? There is not a country in the world where the check has reached the degree of efficiency and usefulness that it has attained in America.

The average charge made by the country banks during the year prior to the inauguration of the Federal reserve clearing system was only 66⅔ cents per $1,000. Is this small charge to be construed "a tollgate," when the Government itself makes an average charge of $9.10 per $1,000 upon post-office money orders, without having any capital invested, does not pay any taxes, and does not render many of the valuable little services that are rendered by the country banks free in their relations with jobbers, wholesalers, merchants, and others located in the big cities?

There is not a representative banker in America who would countenance the practice or defend the few small banks that make unreasonable charges. The amendment which has been offered for your approval prohibits exorbitant charges; it leaves the matter of exchange to be governed by the flow of business to and from the different sections of the country by competition and the other natural elements. If this amendment becomes a law the charge would fluctuate from par to 10 cents per $100 or fraction thereof.

The language of sections 13 and 16 of the Federal reserve act is confusing, but it is evident from the records of the discussions in the House and Senate at the time the law was passed that it was not the intent of either the House or Senate that the clearing and collection feature should be so operated as to deprive any bank from receiving compensation for its service and the expense it might incur in collecting and remitting for checks and drafts. Any law that requires any citizen to work without pay is un-American and should be corrected or eliminated.

This amendment is designed to correct an unjust provision of the law; it does not introduce any element that has not heretofore existed; banks had the right to make an exchange charge prior to the establishment of the present Federal reserve clearing system; the charges which they were privileged to make were unrestricted, yet, as stated before, the charges did not exceed 66⅔ cents per $1,000 on the average; in fact only 15 per cent of the banks charged in excess of 10 cents per $100; 17 per cent of the banks remitted without any charge; a large number remitted at 25 cents per $1,000; another large number at 50 cents per $1,000; still another at 75 cents per $1,000, and so forth, the charges being based upon the flow of business between the communities involved, competition, and the other natural elements.

The statement made that banks will charge their own customers exchange on checks drawn against their own accounts and presented over the counter is entirely erroneous and is not justified, and the proof of this is the last sentence in this amendment, which covers this situation completely:

For collection or payment of checks and drafts and remission therefor by exchange or otherwise.

This can not be construed as meaning that a bank will charge on its own customer's checks presented in the regular course over its own counters.

It has been intimated that if the pending amendment becomes law, banks might make a charge against local people who are not bank customers, but who happen to receive checks from their neighbors and present them at the local banks for payment. This suggestion can best be answered by stating that the banks have always had that privilege, yet no banker has been foolish enough to exercise it. Should any bank undertake such a practice competition would very soon force it out of business; people would refuse to take checks upon any bank that undertook to make such a charge. There is no business that depends so much upon the good will of the people and upon public opinion as does the banking business.

Some of the opponents would have you understand that through some mysterious means the Federal reserve banks have provided that all checks from all sections of the country meet at certain points and offset each other daily; that time and distance have been eliminated; and that the personal check is as good as currency and should be recognized upon practically the same basis. For instance, they would have you believe that a check on the First National Bank at Black Gulf, Mo., should have exactly the same standing in New York City as a check drawn upon the Federal reserve bank at New York. A merchant in New York City receiving a check drawn upon the Federal reserve bank of New York City can immediately deposit that check in his local bank and get the use of the funds instantly, but should the same merchant deposit a check in his local New York bank drawn upon the First National Bank of Black Gulf, Mo., does he get immediate use of the funds? He will get credit immediately and use of the funds if he is willing to pay for the use of the money for a period of five or six days, that being the time required for converting the check drawn upon the First National Bank of Black Gulf, Mo., into actual cash or available funds.

In addition to the elements of time and distance, there is the element of cost of physical handling of the checks; they must be properly indorsed, properly recorded; sent out through the mail; the returns must be received, checked up, and proper entries made. There is also the expense of postage involved.

The Federal reserve banks in handling the so-called country checks have recognized the existence of the expense of the physical handling of checks. They have fixed a charge to be made against the bank that deposits the checks with the Federal reserve bank averaging from 1¼ to 1½ cents per check.

To prove the correctness of this charge of 1¼ cents, I called a national bank in the city of Washington on the telephone and they advised me that that is the price per check they pay to the Federal reserve bank at Richmond, Va., for the collection of checks which they ask that bank to collect for them.

This charge covers only the cost of the handling within the offices of the Federal reserve bank. The Federal reserve banks are presumed to have the most modern equipment and most efficient methods. Granting that they have such equipment and methods, the charge of 1¼ to 1½ cents per check is justified because of the expense incurred within the offices of the Federal reserve bank.

Is it then fair to assume that a like expense is incurred in the physical handling of checks in the bank in which they are originally deposited, also in the bank upon which drawn, and which is required to remit to the Federal reserve bank to cover the checks. The cost in the Federal reserve bank, coupled with the cost in the bank in which deposited, and with the cost in the bank upon which drawn, would make a minimum of 4½ cents per check. Country checks average slightly over $40 each, or about 25 checks to the $1,000. Figuring the cost on the basis of the charge made by the Federal reserve banks, without any allowance for expense and for the creation of exchange, it would be $1.12½ per $1,000, but fortunately the commercial banks have been able to evolve methods whereby they can handle checks at a cost of less than 1½ cents each.

The average cost prior to the inauguration of the Federal reserve collection system was $1 per $1,000—exchange, 66⅔ cents; handling cost, 33⅓ cents. There were in operation at that time 12 country clearing houses. These were located in many of the most important centers. They were merely cooperative organizations, formed by the bankers in those centers for the purpose of reducing the collection cost to a minimum, eliminating all waste of time, stationery, and labor. These country clearing houses were, and are still, the most efficient collection agencies in this country.

I merely cite these facts to let you know that the banks were making every possible effort to render satisfactory service, and to do so with the least possible expense to their patrons. One of these country clearing houses collects items on more than 6,000 banks.

Before going further into this discussion I want to clear up a few points which have been clouded because of misrepresentations and erroneous statements.

The gentleman from New York [Mr. PLATT], during the debate the other day, gave expression to these words:

As a matter of fact, the American Bankers' Association suggested that first amendment themselves that the charges should be regulated by the Federal Reserve Board.

I desire now to contradict this statement of the gentleman from New York and say that the American Bankers' Association did not make this suggestion.

It was stated by a Member of this House that the present Federal reserve clearing system is a success, as is evidenced by the fact that more than 8,000 nonmember banks are in the clearing system and are happy and satisfied because of its operations.

A letter addressed to five representative banks in each State, whose names appear upon the par lists of the Federal reserve banks, brought 156 immediate responses, every State in the Union save one being represented. Seventy-five of the responding banks had arranged to remit direct to the Federal reserve bank; of the 75, 36 stated in strong terms that they were coerced into making the arrangement through fear that their items would be sent through the express company, post office, or some other channel detrimental to their interest; 17 others claimed their arrangements prior to the inauguration of the Federal reserve clearing system was to remit at par, and that the operations of the system had not, therefore, affected them in any way; 70 banks reported that they had no option in the matter, as their items were sent through some member bank, through the express company, or some other agency.

Deducting from the 75 banks that made arrangements to remit direct the 36 that were coerced and the 17 that previously remitted at par leaves a total of 22 banks out of 156 that actually agreed to remit at par and are satisfied with the plan.

SPECIAL REFERENDUM.

A letter written to five representative banks in each State appearing upon the par lists of the Federal reserve banks, requesting that they advise—

(a) Whether items coming through the Federal reserve bank of their respective districts are presented direct, or through a member bank, or through the express company;

(b) Whether these institutions agreed to remit to the Federal reserve bank of their respective districts at par, voluntarily, or whether they were induced to do so because of fear that checks and drafts drawn upon them would be presented through the post office, express company, or other channels, with results detrimental to their business—

Brought replies, to April 3, 1917, showing results as follows:

Number of banks responding.		Presented direct.	Presented through member bank.	Arrangements made voluntarily.	Arrangements made through coercion.	Previously remitted at par.	Not satisfied with arrangement.	No option (not consulted).

[1] 1 bank in Utah reports items being presented through the express company; 1 bank in Idaho, now remitting at par, coerced, reports items formerly presented through the express company.

Included in the above totals are the following figures, not classified in States because of the failure of officials of the banks to insert name of town and State.

Number of banks responding	21
Presented direct	5
Presented through member bank	16
Arrangements made voluntarily	2
Arrangements made through coercion	3
Previously remitted at par	1
Not satisfied with arrangement	12
No option (not consulted)	16

Arizona: 1 bank, not on the railroad, reports items received direct, and a charge of $\frac{1}{10}$ of 1 per cent is charged thereon.

Seventy-five banks out of one hundred and fifty-six have arranged to remit direct; 36 of this number state in strong terms that they were coerced into making such an arrangement; 17 others claim their arrangements previously were to remit for all items at par, and the law has had no effect upon them; 70 banks had no option or privilege to decide as to whether or not items drawn upon them would be handled by the Federal reserve banks.

Deducting from the 75 having made direct arrangement, the 36 coerced and the 17 previously remitting at par, leaves a total of 22 banks out of 156 that have actually agreed to remit at par and are satisfied with the plan.

It has further been stated that the Federal reserve clearing and collection system provides a means whereby the country bank can cover by remittance or otherwise all checks without cost, this being effected by the Federal reserve banks agreeing to pay the transportation costs of shipping currency to cover checks presented through the Federal reserve banks. Coupled with this provision there is a further provision that the banks must first exhaust all other means of paying the checks; that is, if they have checks upon banks whose names appear upon the par lists of the Federal reserve banks they must use them; at the same time they are required to pay 1½ cents to 1½ cents per check when using such checks in offsetting checks received from the Federal reserve banks; if they do not have sufficient items to offset, they are then permitted by the ruling of the Federal Reserve Board to ship money at the expense of the Federal reserve banks, but are required to include in such shipment only lawful money—Federal reserve notes or Federal reserve-bank notes. This ruling excludes national-bank notes from use in paying checks. Such notes have always been good, so far as a bank's relations with an ordinary customer are concerned, and it is to be regretted that the Federal Reserve Board recognized with greater favor a check of any unknown individual than a national-bank note.

The Federal reserve banks take the position that they have met the contention of the country banker that his customers' checks are payable at the bank's own counter. The facts are, that the country banker makes no such contention and the customers do not want their checks paid at the counter. What they do want is their indebtedness at distant points liquidated. Were the cash paid over the counter the customers would then, in the usual course of business, find it necessary to employ some agency to transfer the funds to the distant point where the debt is to be liquidated. There is no agency that will perform this service without charge; furthermore, to base a collection system upon the premise that all checks are payable in lawful money at a bank's counter is not within reason. Ninety per cent of the deposits made with banks consist of checks on other banks. It can readily be seen that if all demands were made that checks be paid in lawful money when the deposits include only 10 per cent cash, such demands could not be met.

In the Senate report No. 11, calendar No. 2, pages 6 and 7, there appear two letters, one written by the governor of the Federal Reserve Board to Senator OWEN, the other written by J. W. Butler, president of the Texas Bankers' Association, bearing date of April 10, 1917, addressed to the Federal Reserve Board. Attention is called by Gov. Harding to a statement made by Mr. Butler in this letter, from which the conclusion is drawn that a change in sentiment has come over the country banks of Texas and they are willing to forego their exchange charges. I quote for your information the following, from a telegram sent by J. W. Butler, president of the Texas Bankers' Association, to the secretary of the committee of twenty-five of the American Bankers' Association, New York City, N. Y.:

TO JEROME THRALLS,
Secretary of the Committee of Twenty-five:

Am sorry the Federal Reserve Board misunderstood my letter of the 10th urging that State banks be permitted to enjoy larger loan limitations and more nearly like the limitations provided by various State laws. Have wired Senator GRONNA thus: "I am convinced that equally important is this, the necessity of the adoption of the recommendation of the Committee of Twenty-five of the American Bankers' Association, providing for reasonable remuneration for the movement of money. In behalf of the 90 per cent of the fifteen hundred members (banks) of the Texas Bankers' Association, I would urge you to support the amendment proposed by the American Bankers' Association. If adopted the effect would be to immediately make popular membership in the Federal Reserve System; it would be a potential factor to bring in the State banks and make a majority of the national banks contented and happy."

This clearly shows that the impression left in the minds of those who have read the report above referred to is erroneous, and the Texas bankers are still as strong as ever in their opposition to the Federal reserve clearing system and in their demands that this feature of the law be corrected.

On May 10, 1917, Gov. W. P. G. Harding, of the Federal Reserve Board, addressed Hon. CARTER GLASS as follows, portions of which have been previously reported in this debate:

FEDERAL RESERVE BOARD,
OFFICE OF THE GOVERNOR,
Washington, May 10, 1917.

Hon. CARTER GLASS,
House of Representatives, Washington, D. C.

DEAR MR. GLASS: Since you were in my office this afternoon Mr. Delano tells me that he just had a talk over the telephone with Gov. Strong, of the Federal Reserve Bank of New York, who calls attention to the possibility, if not strong probability, of the Government having to pay bankers a million dollars exchange charges in connection with subscriptions to the liberty loan, assuming that the Hardwick amendment, which the House has instructed its conferees to agree to, becomes a law.

This estimate is based upon the assumption that one-half of the total issue of bonds will be placed outside of New York. Subscribers are permitted to make payment by their checks upon local banks, properly certified, and under authority given by Congress many of these banks would undoubtedly avail themselves of the opportunity to charge one-tenth of 1 per cent. Should this exchange charge apply to one-half of the subscriptions, the expense to the Government would be $1,000,000.

I would suggest, therefore, that you call the attention of Senator OWEN to this and suggest that he ask the Senate to reconsider the Hardwick amendment, with a view of changing it so as to prevent it from applying to transactions connected with Government bonds. This, I think, would give you the opportunity that you desire to handle the matter in conference.

Very truly, yours, W. P. G. HARDING, *Governor.*

The implication in this letter that the banks might charge the Government $1,000,000 in the way of exchange upon checks arising from the sale of the liberty bonds is an injustice to and is

keenly resented by the many thousands of bankers who did not wait to be drafted, but who patriotically volunteered to give their services and the services of their organizations over to aiding the Government in the flotation of the liberty loan. In doing this every bank in America has incurred heavy expense, and the officers of the banks have given their personal services to this proposition. This has been done without any thought of compensation or profit whatsoever. I challenge the opposition to prove where any member bank has ever charged the United States exchange.

The American Bankers' Association has enlisted its entire machinery and has been conducting for many days a nation-wide campaign to aid the Treasury Department, the Federal Reserve Board, and the Federal reserve banks in the effort to make the liberty loan of 1917 an emphatic success, thereby winning for America the first victory in this great war. That association has sent out from its general offices over 1,000,000 pieces of literature; it has provided every bank in America with a plan book giving directions as to how to form local organizations, as to how to get existing organizations into action, detailed information, and instructions down to and including the consummation of the sales of the bonds; it has had at its command the best advertising specialists in America; through these men has furnished the banks with suggested copy, and has sent talented speakers into all the important cities of America; it has put a supply of slides in more than 15,000 moving-picture theaters, through which there is thrown upon the screens at every performance a patriotic appeal to the people to buy liberty bonds. All this the American Bankers' Association has done at its own expense, voluntarily, and with the view of rendering a patriotic service to the Government.

It is therefore unfortunate that such a letter as the one written by Gov. Harding should have emanated from a high official in the employ of the Government.

The Georgia, Mississippi, Texas, and Wisconsin Bankers' Associations have adopted strong resolutions resenting this statement and agreeing to refund any charge made by any bank in their respective States upon any check issued in connection with the sale of the liberty bonds.

The following is quoted from a message sent under date of May 14, 1917, by the president of the Texas Bankers' Association:

> Referring to protest of Gov. Harding urging reconsideration of your amendment and his representation that the amendment would cost the Government $1,000,000 in selling first installment liberty loan bonds. This argument is great injustice and keenly resented by the banks. Every financial institution clamors for privilege to serve the Government in handling liberty loan without compensation. Please do not allow our patriotism to be assailed and go unchallenged. We confidently count upon the Senate to firmly stand for American principles and democracy as against bureaucracy. We pledge the banks of Texas, more than sixteen hundred in number, to handle settlements for bonds without charge. This association will refund to the Government any exception. An unnecessary assurance, but to emphasize our sincerity.

The Georgia and Mississippi resolutions were equally as strong.

The following is taken from telegram of J. R. Wheeler, president of the Wisconsin Bankers' Association:

> The Wisconsin Bankers' Association agrees to reimburse the Government for any exchange which Wisconsin banks might charge in the distribution and sale of liberty bonds. We do not believe there is a Wisconsin bank that would make a charge, even though it had been right, but since this is being advanced as an argument for defeating the Hardwick amendment, the Wisconsin Bankers' Association, representing practically every bank in the State, agrees to refund any such charges should they be made.

The suggestion has been made that the right to fix the charges should be in the hands of the Federal Reserve Board, and that no charge should be permitted to be made against the Federal reserve banks. Why, then, should they not have the same right to fix the rate of interest charged by banks below the legal rate fixed by law? To give the board this power would be placing the board in the position of a judicial body, as has been already stated. The functions of the board should be kept within administrative lines. The banks insist that exchange, like commodities, should be governed by supply and demand, flow of business to and from the different sections of the country, competition, and the other natural elements. The banks want the cost of production of exchange reduced to the minimum and are willing that the public shall receive the full benefits of any reduction that is made in this cost. The Federal reserve banks have not provided any means whereby exchange can be produced without expense; in fact, their operations in some instances increased the expense of producing exchange. Exchange rates can not scientifically be fixed upon an arbitrary basis; the individual bank can best determine as to what is the cost of producing the exchange which it furnishes to its patrons and which it remits to distant points.

The maximum fixed by this proposed amendment will, as stated before, prohibit exorbitant charges, and under this provision will allow exchange to fluctuate, as it should, from par to 10 cents. Any merchant who is not willing to pay the exchange can refuse the country checks and let them go back to the parties who draw them, with the suggestion that those parties go to their local banks and pay for exchange which will be available at its face on the day it reaches the center.

The suggested provision that no charge be made against the Federal reserve banks would defeat the purpose of this whole amendment. If a channel for collecting the checks at par were thrown open the banks would not then be able to collect any exchange. It is a natural law that bank checks will flow through the channel that affords the least resistance in the way of expense or which affords the best service. Any clearing or collection system that is operated by the Federal reserve banks should be operated on a self-sustaining basis and should develop and endure because of merit only; that is, because of its ability to render the greatest possible service at the least possible expense. If the Federal reserve banks will develop a system of collecting which is more efficient and more economical than is afforded by clearing houses or commercial banks the business will naturally flow into the Federal reserve banks. It costs a member bank just as much to furnish exchange to the Federal reserve bank as it does to any other bank. It should therefore be entitled to receive the same pay for furnishing the exchange to the Federal reserve bank that it would receive for furnishing it to another bank.

It is unfortunate that the Federal reserve banks have undertaken, through the use of the express company, to force nonmember banks to remit at par, without regard to the expense and labor that might be involved in making such remittances. It is not unusual for a country bank carrying in its vaults actual cash, including lawful money and Federal reserve notes, not to exceed $6,000 to receive for payment by remittance, through the mail, in a single day checks aggregating $10,000. It is customary to pay these checks by drawing upon a balance in some central city created there through direct credit arrangements, discounting of bills, shifting of credit, or the accumulation of available exchange, all of which is done at an expense to the small bank. It will be seen that the use of this club is because of the injuries and dangers that are possible to the small banks against which it is wielded. It may not be designed to injure these small institutions, but has in it the possibilities of even causing them to close their doors.

Where is there a bank that can receive deposits, day in and day out, 90 per cent of which consist of checks and like credits, and at the same time pay all demands in lawful money? It can not be done.

It has been suggested that section 16 provides that the Federal reserve banks shall receive checks on deposit at par, and under this provision the Federal reserve banks would be compelled to absorb the tremendous amount of exchange which they would be required to pay under the terms of the amendment providing for reasonable charges.

It will be remembered that the Federal Reserve Board has interpreted this section of the law to give the Federal reserve banks the right to make a charge of 1¼ cents to 1½ cents per check. This establishes clearly the principle that the Federal reserve banks have, under this construction placed on the law by the Federal Reserve Board, the right to assess against the depositing member banks the expense which the board has seen fit to term "service charge," amounting to 1¼ cents to 1½ cents per check. Following the same line of reasoning, the board might readily authorize the Federal reserve banks to assess against the members 10 cents per $100 or fraction thereof if that amount of expense be incurred.

The gold-settlement fund is one feature of the Federal reserve system that has not been criticized. The operation of this fund has been entirely satisfactory.

This proposed amendment will not affect the operations of the gold-settlement fund in any way. This fund, however, can not be safely used as a basis for collecting the ordinary run of country checks. It is a splendid means of settling the balances weekly or semiweekly, but the settlements for checks must be made daily. Checks do not offset each other; in fact, the flow of exchange and trade runs in certain directions over a period of months. During that time readjustments must be made through shipments of currency or through credit arrangements, rediscounting, or some other means which involve expense to the banks.

The system operated by the Federal reserve banks is misnamed. It is not in any sense a clearing system; it is a collection system. It contemplates the diversion of all items

through one center in each district. By reference to the tenth Federal reserve district it can readily be seen as to how unscientific a proposition this is. There are 11 reserve cities in that district; each of these cities is a commercial center of considerable importance; the products and raw materials are marketed and the supplies and finished goods are purchased principally through these 11 different centers. If the exchange and checks are all handled through one of these centers there remains the necessity of transferring the accumulated credits from the 10 other centers to the eleventh center. This can not be done without expense.

As stated before, the banks are willing to cooperate and assist in every way possible to work out a clearing and collection system that will be fair and equitable to the general public, but at the same time the banks are entitled to the consideration in the way of law that will permit them to receive treatment that is fair and equitable. Any law that requires the thousands of country banks throughout this land to create exchange at an expense, and to contribute that exchange free, to the commercial and industrial interests does not recognize the elements of fairness and equity, and it should therefore be changed.

The burdens that have been imposed through the operations of the Federal reserve clearing system have aroused antagonism and opposition not only on the part of nonmember State banks and trust companies, but has been the cause of creating an intense feeling against the system on the part of the small national bank members, which has been a hindrance to the development of the more important functions of the Federal reserve act.

The passage of this amendment will sweep aside this opposition and antagonism, and will substitute in lieu thereof a spirit of friendly cooperation, and will make it possible to bring into the system thousands of State banks and trust companies that will not otherwise join.

Cooperation is the greatest factor in modern business, and it must be recognized in the Federal Reserve System.

It is imperative that the banking system shall be unified if it is to meet in an adequate way the increased demands that will be occasioned because of the entrance of this country into the world war. When this and the other amendments to the Federal reserve act have been passed, and all the eligible banks have entered the system, we will then have a banking system that has no superior, and very few, if any, equals. [Applause.]

Mr. GLASS. Mr. Speaker, I yield three minutes to the gentleman from Ohio [Mr. LONGWORTH].

Mr. LONGWORTH. Mr. Speaker, I am glad of the opportunity afforded me through the courtesy of the gentleman from Virginia [Mr. GLASS] to explain my vote on this conference report, because the course I intend to pursue to-day is not entirely consistent with that which I pursued on the occasion when the conference report was last voted on. I am one of those who believe that consistency, if a rare one, at least is a notable political virtue. In fact, I have on this floor and elsewhere rather vigorously criticized a certain gentleman high in official power in this country for repeated acts of inconsistency, but I never have, nor do I now, believe in carrying consistency to a point which will force me to persist to the end in a course begun, possibly, under a misapprehension of its effect, when I, after consideration, have become convinced that it is unwise. I voted for the so-called Hardwick amendment upon a previous occasion, but the gentleman from Pennsylvania [Mr. MCFADDEN] himself has admitted that it was never debated and has never received up to now any real consideration in this House. At the time I voted for it I was not as familiar as I think I now am with the probable effect of its adoption. I do not know of any round robins or lobbies that have appeared here upon this matter, but I have myself had correspondence and conversations with many of my constituents, and I have had conversations with gentlemen, Members of this House and otherwise, in whose opinion upon matters of this sort I place great reliance. Because of this further consideration and discussion I have been forced to the irresistible conclusion that the passage of the so-called Hardwick amendment in its original form would result in putting a great burden upon American commerce, commerce already burdened and about to be further burdened by new war taxes which will soon be passed. I have, in short, come to the conclusion that the adoption of the Hardwick amendment at this time would be particularly unwise. I intend, therefore, to support the conference report, and I believe that this course may be followed with propriety by other gentlemen who find themselves in the same situation. [Applause.]

Mr. GLASS. Mr. Speaker, how much time have I remaining?

The SPEAKER. The gentleman has 25 minutes remaining.

Mr. SHOUSE. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. SHOUSE. To make a point of order that there is no quorum present.

The SPEAKER. The Chair will count. [After counting.] One hundred and forty-four gentlemen are present, not a quorum.

Mr. GLASS. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will lock the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

Anthony	Estopinal	Kreider	Scully
Bell	Fields	Lea, Cal.	Sells
Bland	Fitzgerald	Littlepage	Shellenberger
Brand	Flynn	Lunn	Sherley
Brodbeck	Fordney	McCormick	Sherwood
Cantrill	Foss	McKinley	Sloan
Capstick	Gallivan	Maher	Snyder
Carew	Gard	Mann	Stephens, Nebr.
Clark, Fla.	Good	Martin, Ill.	Sterling, Ill.
Claypool	Griffin	Mays	Stevenson
Cooper, Ohio	Hamill	Miller, Wash.	Stiness
Copley	Hamilton, N. Y.	Morin	Sullivan
Crago	Haskell	Mudd	Talbott
Crosser	Hayes	Neely	Tampleton
Dale, N. Y.	Heflin	Nicholls, S. C.	Thomas
Dallinger	Hill	Olney	Tilson
Dent	Hollingsworth	O'Shaunessy	Walker
Denton	Hull, Iowa	Paige	Ward
Dickinson	Ireland	Peters	Wason
Dill	Johnson, Wash.	Powers	Webb
Dixon	Jones, Va.	Price	Welling
Dominick	Kahn	Rainey	Welty
Doolittle	Keating	Rayburn	Williams
Drane	Kelley, Mich.	Reed	Winslow
Drukker	Kennedy, Iowa	Riordan	Wood, Ind.
Dyer	Kennedy, R. I.	Rogers	Zihlman
Eagan	Key, Ohio	Rowland	
Edmonds	Kitchin	Rucker	

The SPEAKER. On this roll call 319 gentlemen answered to their names, a quorum.

Mr. GLASS. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will unlock the doors.

Mr. GLASS. I believe I have 25 minutes remaining?

The SPEAKER. Yes.

Mr. GLASS. I yield five minutes to the gentleman from New York [Mr. HUSTED].

Mr. MCFADDEN. If the gentleman will yield for a moment, I understood the gentleman had only one speech.

Mr. GLASS. After this.

Mr. HUSTED. Mr. Speaker, I know I can not add anything to the clear, able, and exhaustive discussion of the Hardwick amendment which was made by the gentleman from Virginia [Mr. GLASS] on Tuesday. I would not take one moment of the time of this House except that I happen to be a director of and somewhat interested in one of these "struggling country banks" which happen to be absolutely opposed to the Hardwick amendment in its original form, and it is opposed to it on three grounds: First, that no adequate service is rendered by the banks to justify the one-tenth of 1 per cent charge on the collection of its checks; second, on the ground that it is not necessary—the country banks are making enough money without it [applause], and this is no time to impose this charge upon the commerce of the country unless it is necessary; the country banks can get along without its imposition—and, third, because it is one of those services which I believe the country bank should render without any charge in consideration of handling its customers' accounts. [Applause.]

Mr. GORDON. Will the gentleman yield?

Mr. HUSTED. I will.

Mr. GORDON. Is your country bank in the Federal Reserve System?

Mr. HUSTED. It is.

Mr. GORDON. What right has Congress to legislate in the interest of these country banks that are not in the Federal Reserve System?

Mr. HUSTED. I do not think Congress is legislating in the interest of banks that are not in the Federal Reserve System.

Mr. GORDON. As to those small country banks that we have heard paraded up and down here, are not most of them in the system, as a matter of fact?

Mr. HUSTED. The State banks are not in the system.

Mr. GORDON. How could any legislation of Congress affect them at all?

Mr. HUSTED. It does not affect them directly. It might affect them indirectly in this way: I know that if a State bank should charge for collecting checks in my town and the national

bank did not charge, the national bank would very soon drive the State bank out of business.

Mr. BATHRICK. Will the gentleman yield?

Mr. HUSTED. Yes.

Mr. BATHRICK. I would like to have the gentleman put this side of the matter before the House. We have all been talking about one-tenth of 1 per cent. But if there is less than $100 deposited, it is 10 cents a hundred, is it not, and lots of small business men will be obliged to pay 10 cents a day or $30 a year for the privilege of banking their money in that bank?

Mr. HUSTED. It would be 10 cents on the smallest checks.

Now, I am opposed on those grounds to the Hardwick amendment in its original form; but if I believed a reasonable charge was justifiable, I could find no fault with the changes made in the Hardwick amendment by the conference committee, because that amendment in its present form does permit a reasonable charge for collecting checks. [Applause.] And to say that the changes made by the conference committee absolutely deprive the country banks of the power of making a collection charge is absolutely untrue.

There is a specific declaration in this amendment in favor of a rate, and it only says that the Federal Reserve Board shall determine the reasonableness of that rate. I have enough confidence in the disinterestedness and in the ability and in the fairness of the members of the Federal Reserve Board to believe that they would consider it their duty under this legislation as it now stands to fix what in their opinion was a reasonable rate. The only thing it does is to provide that the member banks shall not make any charge for collection or any charge for payment against the Federal reserve banks. I do not think there is a Member of this House who would contend that such charge would be justifiable. [Applause.]

Mr. GLASS. Mr. Speaker——

The SPEAKER. The gentleman from Virginia [Mr. GLASS] is recognized for 20 minutes.

Mr. GORDON. May I interrupt the gentleman before he starts? [Laughter.]

Mr. GLASS. I will be pleased to be interrupted by the gentleman before I start, because after I start I shall ask not to be interrupted at all.

Mr. GORDON. I wish to direct the attention of the gentleman to the remarks of the gentleman from Pennsylvania [Mr. MCFADDEN]. The whole burden of his plea was in behalf of these small country banks that are not in the Federal Reserve System. To what extent has this Congress power, in amending the Federal reserve law, to affect at all legally the banks not in the Federal Reserve System?

Mr. GLASS. The gentleman knows possibly better than I that the Congress has not one particle of power to regulate the banks that are not in the Federal Reserve System. Nonmember banks, which are State banks, are not directly affected by this legislation. They are concerned in this legislation only by reason of the competition incident to a collection system which the Federal Reserve Board has established. That is to say, if member banks refrain from making charges for paying and collecting checks, and State banks persist in exacting this toll, business men will prefer to keep their accounts with the banks that do not charge; hence nonmember banks would like to have member banks authorized by law to make these charges.

Mr. SWITZER. Will the gentleman yield for just one question?

Mr. GLASS. I can not yield any more.

Mr. SWITZER. I would like to ask a question. Does your amendment permit, or does it allow, the Federal Reserve Board to give authority to a bank to make a charge for this collection?

Mr. GLASS. To make a "reasonable" charge; yes.

Mr. SWITZER. With the argument made here that there should not be such a charge made, why do you recognize it?

Mr. GLASS. Because the managers on the part of the House were instructed to do it. That is all the reason for it; but for that instruction the conferees would have authorized no charge at all.

Mr. SWITZER. You do not intend to allow anybody to assert that privilege?

Mr. GLASS. I hope not and believe not. That is precisely why we propose these modifications of the so-called Hardwick amendment. We do not want the banks to determine whether the charge is "reasonable," if made at all, or what the amount shall be when made. We want the Federal Reserve Board to regulate these questions strictly—to say in what circumstances it is reasonable to charge and what amount shall be charged.

Mr. Speaker, as to the ethics involved in this legislative procedure, especially with reference to the appointment of the managers on the part of the House, I want to say that the chairman of the Committee on Banking and Currency followed the usual procedure. When the conference was asked he conferred with the senior Republican member of the House committee, the gentleman from California [Mr. HAYES]. That gentleman was ill at his home in Washington, and notified me over the 'phone that he would be unable to act and readily acquiesced in a suggestion that I designate Mr. PLATT, of New York, as a Republican manager on the part of the House. As a matter of fact, I momentarily assumed that Mr. PLATT was the next ranking member of the Banking and Currency Committee.

Mr. MONDELL. Will the gentleman yield?

Mr. GLASS. I will not.

I say I momentarily supposed that Mr. PLATT, of New York, was the next ranking member, and I handed his name to the Speaker as one of the conferees. This I explained in detail to the gentleman from Mississippi [Mr. HARRISON] some days ago and went in person and apologized to my colleague, the gentleman from Iowa [Mr. WOODS], who accepted the explanation. With that statement I will leave it to the House to determine just exactly how fair and precisely how frank the gentleman from Mississippi [Mr. HARRISON] was in his statement of the incident to the House to-day. [Applause.]

I prefer not to believe, and yet I candidly suspect, that my colleague from Pennsylvania [Mr. MCFADDEN] was fully aware of the fact I have just stated, and the House may thus judge of the frankness of his criticism also. I may add that had the senior Republican member of the Committee on Banking and Currency [Mr. HAYES] been in good health he would have been one of the conferees and would have stood unyieldingly with the chairman of the committee in resisting the attempt, by a Senate "rider," to impose this tax on the commerce of the country. [Applause.] Therefore, the effort to make it seem that some advantage was sought or obtained in the designation of the House managers is manifestly a quibble, designed to shift the issue from one of fact to one of resentment.

As to the talk about "the lobby that has beset this House" and the "round robins" that have disturbed the membership, the only lobby we have had was the committee of 25 bankers which settled down in Washington soon after Congress convened, with headquarters at the Willard Hotel. This bankers' committee, dining and wining the proponents of this proposition, sought to influence the action of the House by as thoroughly organized a propaganda as was ever known in legislative annals. [Applause.] This committee was in ceaseless communication with the banks of the country and had Congress flooded with letters and telegrams.

The only word of hearing upon this proposition to delegate the power of taxation to banks by a Federal statute was secured by a transparent trick. Letter after letter and wire after wire came to the chairman of the Committee on Banking and Currency from the business men of the United States asking to be heard against this proposition. My invariable answer was that the proposition was not germane to the amendments that were being considered and that, therefore, there would be no committee hearings on the bill (H. R. 3673). But under the pretense of wanting to be heard upon the major provisions of H. R. 3673, a subcommittee of this committee of 25 bankers was presented to the Committee on Banking and Currency. These bankers spent about two minutes talking about the real provisions of this bill and nearly two hours discussing this check paying and collection charge "rider" which had been proposed by their committee. Thus, the only hearing had on the subject was obtained in the way I have indicated by this famous "committee of 25." without opportunity to the business men of the United States to be heard in rebuttal.

There has been no lobby so far as the opponents of this measure are concerned. Naturally the whole business community of the United States, except a small group of bankers, is opposed to this proposition to authorize certain banks, by law, to tax commerce. It required no lobby; it required only a sense of justice and a comprehension of the injustice that was sought to be perpetrated by this Hardwick amendment.

It is pretended that only the mail-order houses and jobbers oppose the scheme. I hold in my hand a resolution adopted by the Farmers' Educational and Cooperative Union of America, which says:

> We, the National Convention of the Farmers' Educational and Cooperative Union of America, assembled in Palatka, Fla., earnestly and strongly protest against any change in the Federal reserve act with reference to charges on collections on checks and drafts.

I have here also the resolution of the National Grange of the United States, representing more than one million farmers, which says:

> Whereas it has come to the knowledge of the National Grange that a concerted effort will be made this winter to have Congress amend the Federal reserve act so as to restore to certain banks throughout the

country the privilege of indiscriminate taxation taken from them by the system of check collection established by the Federal Reserve Board in pursuance of the act of December 23, 1913.

Therefore be it resolved by the National Grange that we protest against the proposed change of the law and that Congress be, and hereby is, earnestly petitioned by this body in behalf of the farmers of the United States to disregard this organized attempt to so alter the Federal reserve act as to enable certain banks to exact unjust tolls from the commerce and industry of the country, 90 per cent of which business is transacted by drafts and checks rather than by the use of currency.

I have here a dispatch, dated at Peach Bottom, Pa., May 19, from J. A. McSparran, one of the most intelligent and patriotic farmers in the United States, chairman of the legislative committee of the National Grange, in which he says:

BANKING AND CURRENCY COMMITTEE,
House of Representatives, Washington, D. C.

In the name of the National Grange we desire to protest against the adoption of the Hardwick amendment to the reserve act, which gives to the banks of the country the right to levy an unjust tax on the checks of the entire business community of the United States. The National Grange, representing 1,000,000 organized farmers, passed resolutions protesting against this form of extortion.

"Oh," they say, "only the jobbing houses of the United States are opposed to the Hardwick amendment." That is not the fact, as I have already indicated, Mr. Speaker. But suppose it were true. Is there any reason why the men, who have millions of dollars invested in that branch of commerce, should not have their side of a controversy heard here? True, they have not given any dinners to anybody. They have not wined or dined anybody. But have they not a right to be heard? Suppose it were true that only the jobbers of the country were opposed to this form of special taxation. Let us see if, numerically, they do not overwhelmingly overtop the banks, even if all the banks were in favor of the proposition. There were in the United States, according to the census returns of 1909, 51,048 jobbing houses. There are but 7,500 member banks of the Federal reserve system, all told. The more progressive of these are opposed to this Hardwick amendment. But if all were in favor of it, and the jobbers only opposed, there are 51,048 jobbing houses against the 7,500 banks.

But, Mr. Speaker, I have here on the table resolutions from the retail merchants' associations in every line of activity in this country, from the National Association of Retail Hardware Merchants, from the National Association of Retail Grocery Merchants, from the National Association of Retail Dry Goods Merchants, from the national associations of nearly every line of commerce in the United States, opposing this tax. The National Association of Credit Men, representing a body with an actual membership of 25,000 in every line of trade conceivable, has gone on record time and time again in opposition to this unjust species of taxation. Nearly all the manufacturing associations of the United States have presented resolutions against this proposition.

There are more jobbing houses in the single State of Illinois opposed to this proposition than there are member banks in the United States in favor of it. There are as many jobbing houses in the State of Massachusetts opposed to the Hardwick amendment as there are member banks in the entire United States in favor of it. There are three times as many jobbers and retail merchants and manufacturing establishments—not to mention farmers—in the State of Mississippi opposed to this Hardwick amendment as there are member banks in the United States in favor of it.

Take the State of Pennsylvania, the State of the gentleman who proposes this recommittal [Mr. MCFADDEN], and there are 4,783 jobbing houses—more jobbing houses in Pennsylvania opposed to this unjust tax than there are member banks in the United States in favor of it. There are in Pennsylvania 107,134 retail merchants, every one opposed to this form of taxation. The opposition to it is so overwhelming that I offered a colleague my entire year's salary as a Representative in Congress if he could produce a telegram or a letter from any living soul in favor of it unless from a banker. [Applause.]

Then they talk about an "anonymous propaganda." Perhaps I have a misconception of what an "anonymous" thing is. This circular, which is exhibited here presenting reasons why this form of delegated taxation should not be sanctioned, expressly states that the group issuing it included the official representatives of the Button Manufacturers' Association of the United States, the National Association of Clothiers, the National Association of Credit Men, the National Association of Hosiery and Underwear Manufacturers, the National Glass Distributers' Association, the National Hardware Association, the National Retail Dry Goods Association, the National Shoe Wholesalers' Association, the National Dry Goods Association, the National Wholesale Jewelers' Association, the St. Louis Chamber of Commerce, and the Southern Wholesale Grocers Association. It gives the names of the gentlemen who prepared and issued this "anonymous" circular. In addition to that, boards of trade and chambers of commerce from one end of this country to the other have passed resolutions against this rake-off. Nobody is for it except this group of bankers represented by this committee of lobbyists that took up its headquarters weeks ago at the Willard Hotel. [Applause.]

I present to the House for its discriminating judgment a tabulated statement of three classes of business concerns opposed to this legislation in contrast with the number of banks in the Federal Reserve System directly affected by this amendment. It will be noted that this statement does not take account of the millions of farmers and professional men who are in opposition, but merely enumerates three classes whose representative bodies have declared their antagonism to this check paying and collection charge scheme. It must also be considered that not one-third of these banks exact these charges from the business men of the country, and, therefore, that the fewest number of them would care to see the collection system established by the Federal Reserve Board wrecked, as inevitably it would be should this Senate "rider" prevail.

Now, Mr. Speaker, I want the House to understand how it was sharply misled upon this question. There was not a word of debate. There was not one word of explanation of this Hardwick amendment prior to the adoption of the motion to instruct the House managers. The whole event was sudden and surprising.

Mr. THOMAS. I just want to know about that wining and dining. I have not seen any of it, and I should like to get there. [Laughter.]

Mr. GLASS. I am surprised that the gentleman was not invited. He should indicate his indignation by voting against this proposition.

Mr. THOMAS. I am going to look into this proposition.

Mr. GLASS. Mr. Speaker, I must decline to yield further.

Mr. THOMAS. The gentleman has got to yield——

The SPEAKER. The gentleman from Virginia declines to yield.

Mr. THOMAS. The gentleman has got to yield. I am with him on this. [Laughter.]

Mr. GLASS. No Me[mber] to be troubled by any a word of debate or amendment. A similar thrown out on a point germane. It is a legis[lative] congruous, considered w[ith] legislation proposed her[e] industry and to help the banking business of the United States better to meet impending difficulties. Not only was there no explanation of this "rider," but, on the contrary, when the vote was being taken, gentlemen who now are very critical about the ethics of the case, affecting great concern for the proprieties, stood at the door and told Members as they came in, "Our vote is 'aye,'" as if there were some party division. More than a score of Members have come to me in person, or have told me over the telephone, that they were misled into voting for the amendment, and that they were utterly opposed to it and that their constituents were utterly opposed to it. I do not want to be unpleasant. It is too easy, under provocation, to be unpleasant and too hard to be agreeable; but I do feel some degree of resentment, in the circumstances, at the criticism of the gentleman from Mississippi [Mr. HARRISON] and my colleague of the committee from Pennsylvania [Mr. MCFADDEN] about the ethics of this case, and their talk about a lobby.

[ber of the House should permit himself] [nsideration of consistency, because not] [planation was had on this Hardwick] ['rider" was proposed in the House and] [f order as not germane; and it is not] [ive thorn in the flesh. It is utterly in-] [th respect to this great and momentous] [e for the advantage of commerce and]

Now, Mr. Speaker, a word as to the merits of this proposition. From what source does a bank, whether it is a country bank or a city bank, derive its revenue? From its capital? Why, in the rarest instances. A bank that is prosperous enough to pay a dividend merely by the use of its own capital would be a wonder. Then, how do banks manage to pay dividends? Why, by loaning out the money of their depositors at interest, and some of them at too high a rate of interest, particularly in the territory of the gentlemen who are advocating this check-paying amendment. [Applause.] They derive their profits from loaning out the deposits of their patrons; and anybody familiar with banking processes knows that banks ordinarily require their patrons to keep a certain "line" of deposits to pay for trouble and expense in handling their accounts. I have here a written statement of one of the leading bank examiners of the United States saying that both city and country banks, as a rule, insist that the borrower, who in nine cases out of ten is a depositor, shall maintain an average balance of 20 per cent. In other words, if you are a business man and want to borrow $10,000 from your bank with which to conduct your business, the bank does not actually let you have $10,000. On an average it lets you have $8,000, and requires you to leave the other $2,000 there to be loaned to some other business man at a profitable rate of interest. In this way and by other legitimate devices banks derive their revenue from interest on money loaned them by their patrons. There are few well-conducted banks, either country or city banks, that would care to have the business of any merchant who did not keep a line of deposit with it sufficient to far more than cover all costs and trouble of the account of that business house. The gentleman from New York [Mr. HUSTED], a banker himself, has stated that last year all the banks, country as well as city, made a greater profit than they had made in an average of 47 years before, and they do not need this form of graft. [Applause.]

The banks have the use of their patrons' money, and it is vastly less expensive to remit on balances than it would be to pay funds actually across the counter. Pending the dispatch and return of checks, the accounts on which they are drawn are available to the banks in the discount operations, and from these accounts the banks derive more profit than is involved in the proposed charge of one-tenth of 1 per cent on out-of-town checks. As for having to "ship funds," that is a myth largely—a figure of speech. The Federal reserve banks explicitly agree to pay all cost of shipping currency, so no charge for that can be assessed against any remitting bank.

It is idle to infer that the obligation of banks to business men is not as distinctive or as great as that of business men to banks. The accommodation is reciprocal; and, with the vast majority of banks, the deposits of their patrons are accepted with no other purpose than to pay checks at their face value. There never was any statutory sanction for anything else; but under specious and illusive pleas of compensation for "constructive interest" loss, and for the expense of "shipping currency to distant points," and for "service rendered in transferring credits," the practice of deducting charges, varying from one-tenth of 1 per cent to 1 per cent in some cases, became firmly established in some sections. It got to be not only a burden, but an abuse—in many instances a scandal—which the more progressive business communities of the country long since refused to tolerate. None of the banks of the New England group exacts these charges; few of the Eastern group make the charge; the practice in the Middle West has been greatly abated; the abuse persists in its flagrant form chiefly in parts of the South and the far West. It should be stopped everywhere; and the par collection system instituted by the Federal Reserve Board will put an end to it ultimately, if not tampered with by vicious legislative interference, such as this Hardwick amendment in its original draft proposes.

Bank notes issued under authority of the national bank act signifying the indebtedness of the bank to the holder are required by law to be received everywhere at par. Why should not a merchant's check on his deposit account, duly indorsed by a responsible person or concern, be accepted by common consent of the banks at its face value? What is there extraordinary about the suggestion to standardize checks and drafts? They constitute 92 per cent of the currency of the country in paying accounts and adjusting balances. And the banks themselves adjust their own balances through this very medium.

The talk about the "great expense" of collecting and paying out-of-town checks is in great degree rubbish. The cost is negligible, as any frank banker will tell you. It is so inconsequential that the Federal Reserve Board has been unable to get an actuary with enough skill to figure it out. The collection costs of the Federal Reserve System itself have been less than one hundred and fiftieth of 1 per cent! I have here a letter from a Tennessee banker which furnishes a very definite illustration of the difference between the old system of check collection graft and the new system of inexpensive collections. This Tennessee banker writes:

> The thought has occurred to us that you would like to know how the new collection arrangement is working with member banks. We give you the following example:
>
> At ——, North Carolina, there are three banks—two national and one State. They were evidently in a combination prior to July 15, 1916, on the question of exchange. Most of the checks of their customers had stamped on them "Not collectible through the express office," or some such wording. This is out of our territory, but we could not collect the items through any of the ordinary channels, and were forced to send them direct, only taking the checks for collection and giving our customers all the money we received.
>
> For five days in June we sent them $5,956.85, on which we paid exchange at the rate of 25 cents per hundred, or a total of $15.16. We are handing you herewith one of their remittance letters, which shows they charged us $9.96 on items aggregating $3,985.76.
>
> Taking five days in July, or since the collection arrangement was entered into by the Federal Reserve Banks, we have sent on the same town, through the Federal Reserve Bank of Atlanta, a total of $7,176.63, at a total cost of 12 cents.
>
> The time the items were in transit was greater when sent direct than when sent through the Federal Reserve Bank of Atlanta.
>
> This is not so much a saving to us as it is to our customers, and more people will be benefited by this system of collection, 10 to 1, than will be harmed by a loss of revenue to these banks who have been so outrageous in their charges.

This case is typical. It reveals the vice of the old system as clearly as it exhibits the efficiency of the new. Under the new collection system these Tennessee merchants had checks aggregating $7,176.63 quickly collected at a cost of 12 cents, while under the old system, with its roundabout routing, it cost these merchants $15.16 to collect $5,956.85—the difference between the obsolete stagecoach and the modern steam railroad facilities! But, it is contended, this transaction deprived three "struggling" country banks of the difference between about $18, which they would have received for paying the larger amount of checks under the old system, and 12 cents actual cost under the new system. Leaving out of question the moral obligation of these banks to pay their depositors' checks without deduction, the fact is that two of these struggling" banks have accumulated a surplus almost equal to their capital; they pay an annual dividend of 10 per cent and their stock sells for nearly twice its par value! This illustration could be multiplied indefinitely in an even more aggravated form. However, I would repeat and accentuate the statement that bankers of vision, with a progressive spirit, do not engage in this practice. They long ago discarded it. The thing is pursued chiefly by those who fail to comprehend the advantages of modern methods and who, in their petty acquisitiveness, refuse to adapt their business to a system pregnant with larger success and a higher spirit. The case was tersely put the other day by Mr. Perre Jay, of the New York Federal reserve bank, when he said:

> The banks which are now endeavoring to have the deduction of exchange legalized do not seem to recognize that a new country-wide system to facilitate domestic settlements by both checks and transfers has been created and is in process of development. Instead of looking ahead and endeavoring to cooperate they stand squarely across the path of progress and seek to turn back the hands of the clock. With minds focused on the barrier which the law desires to remove they do not see the situation in its proper perspective. The fail to grasp the advantages to business of economical and scientific methods of making settlements; they fail to understand that every move toward making local checks more acceptible away from home enables the local bank to keep more local money at home.

There is the crux of the matter. That is a happy phrase: "More local money at home." Country bankers—which means

all bankers outside 51 central reserve and reserve cities—in order to clear their own checks, "free of charge," as they vainly imagine, have for years shipped away the funds of their local depositors to the money centers at a 2 per cent interest rate, to be used for stock speculative purposes, instead of "keeping more local money at home," as Mr. Jay says, to loan to local merchants and industries at a reasonable yet profitable discount. There is no telling, Mr. Speaker, of how many hundreds of millions of dollars country communities have been drained nor computing the commercial distress and industrial deprivations they have endured by reason of this practice of country banks sending local funds away from home. There was little rational defense of it under the old system; there is absolutely no excuse for it since the passage of the Federal reserve act. When the required reserve of country banks was 15 per cent, the combined figures show that they actually carried 29 per cent. The average interest rate on these excess reserves carried largely for the purpose of securing the par collecting of their out-of-town checks is 2 per cent. With money worth 5 and 6 per cent, and in many localities bringing 8 and 10 per cent, the cost of 3 or 4 per cent or 6 or 8 per cent on excess reserves of 14 per cent would very much reduce the income side of the exchange accounts. The establishing of the Federal reserve banks makes it in most cases unnecessary for the banks to carry excess reserves and thereby increases their earning capacity.

Moreover, the reserve requirements of country banks were lowered by the Federal reserve act for the express purpose of covering this paltry 2 per cent, which they received for local funds transferred, and which never should have been transferred, to money centers—a fact which they seem always to ignore. A trained banker of Minnesota states the case with great perspicacity in a letter from which I quote two paragraphs:

It should be realized by all that any saving in the expense of collecting checks will be to the advantage of all the banks in the country. The Federal reserve bank, by providing a central agency in each district through which checks may be collected, has provided a method whereby checks may be collected with the least expense. This is due to the doing away with indirect routing, thus reducing the number of times checks are handled, and the saving of time in securing final payment. If the system is properly supported by the banks of the country, it will lessen the expense in remitting for checks, as the banks of New England have demonstrated through 17 years of experience that it is much cheaper to receive one remittance a day and remit in payment, than it is to receive remittance letters from a number of correspondents, as well as others, and account for them.

One strong argument that occurs to us as to why that part of the Federal reserve act relating to charges on bank checks and drafts should not be amended at the present time, is that *the majority of the banks in this country transacting 85 per cent of the banking business of the country, are not charging for remitting for their checks*, and that the collection system of the Federal reserve banks should be given a fair and impartial trial before any amendment to the law is considered, and it would not be fair to the banks of the country to amend the law at the request of the smaller number of banks which have, for selfish reasons, always been opposed to a proper and economical system of collecting checks.

That sums up the case. Nearly 16,000 banks joined the collection system instituted by the Federal Reserve Board. These constitute two-thirds of the commercial banks of the country. They do 85 per cent of the commercial banking business. They do not charge for paying or collecting checks. This Senate "rider," drafted by a bank lobbyist and through organized propaganda grafted onto a bill here designed to help banking and facilitate commerce, is merely a statutory invitation to these 16,000 banks, as well as to the small group doing only 15 per cent of the country's business, to renew this tax on commerce and industry. It is a legislative sanction of an obsolete and vicious practice which has never had the countenance of law and should not have it now.

And I warn this group of bankers which assumes responsibility for this renewed attempt to erect this tollgate across the highway of commerce that it is sowing to the wind and will reap the whirlwind. The business men of the United States are thoroughly aroused over the situation, and if this legislation should be enacted, except in the modified form proposed by this conference report, they will systematically refuse to patronize banks which persist in this vice. Moreover, let the country banks take warning. Under the law they may no longer count balances with correspondent banks as reserve; hence there no longer will be inducement to carry local funds in outside banks at 2 per cent. This will presently occur; and when it does the big banks will begin to charge for remitting funds also, should this Senate rider, unmodified, prevail. If the charge for remitting funds to cover checks becomes general and applies to central reserve and reserve city banks, as well as the country banks, it is evident that banks in general will not profit by the result. A bank in remitting to a Federal reserve bank wishes to be able to send offsetting items rather than cash, and the whole proposition of clearing checks depends upon this principle. Heretofore a charge has been made by the country bank for remitting, but no charge by the city bank, whereas under this Senate "rider" the city bank is authorized to charge as much as the country bank. If, therefore, a bank receives one-tenth of 1 per cent on all items drawn upon itself, but pays out one-tenth of 1 per cent for collecting all items it has received, the probability is that the large city banks will be the gainers.

An accomplished country banker in the State of New Jersey, a man who understands the philosophy of banking as well as the practical details, writes me that—

If the Federal Reserve System was nonexistent, the facilities and economy which it so admirably affords would justify the organization of a system for the exclusive purpose of clearing and collecting out-of-town checks, but the organization of a proper system for this purpose under present circumstances would be a needless waste of labor and capital and in consequence an unnecessary drain upon the public. This may be regarded as an answer to those who contend that the Federal Reserve System should not undertake the matter of handling out-of-town checks.

The condition of affairs was bettered at a stroke when the Federal Reserve Board undertook to collect out-of-town checks.

Mr. Speaker, there are a multitude of reasons why this check paying and collection charge should be abolished entirely and a fairer and more scientific system substituted, but the subject is technical and, therefore, difficult both to explain and understand, especially in the compass of limited time. But I very earnestly protest against this Senate rider which seeks to legalize, in the worst possible form, a banking practice that the best banking sentiment itself condemns.

The gentleman from Ohio [Mr. SWITZER] asked me awhile ago why the conference report does not omit the Senate amendment altogether, if the practice which it proposes to sanction is so indefensible. The only reason we did not discard the provision was the instruction given by the House. While we felt that the House did not act with full knowledge of the facts, and knew that scores of Members had voted under misapprehension, the conferees did not feel at liberty to "contemptuously" disregard the instructions of the House, as the gentleman from Wyoming [Mr. MONDELL] suggests we have done. In the circumstances the best we could do was to retain the phraseology of the Senate "rider" and apply an antidote, which, we feel confident, will correct its evil effects in large degree if not entirely. The gentleman from Ohio [Mr. SWITZER] also suggested that the modification of the Hardwick amendment proposed by the conference report is intended to prevent any check-collection charges being made by anybody. I frankly stated that I hope and believe the modifications proposed by the conferees will have the result of abolishing all charges beyond actual cost, which, in our view, would be the only "reasonable charge" that could be made. Inasmuch as the Federal reserve act requires Federal reserve banks to accept at par all checks and drafts of member banks, the conferees unanimously agreed that member banks should be prohibited from exacting check-collection charges from the Federal reserve banks, as there should be reciprocal arrangements as well as community of interest. This modification itself will largely tend to draw the fangs of the Senate rider and circumscribe its utter viciousness. For these and other reasons, which I have not the time to present, I urge the House to vote down the motion to recommit the bill with instructions.

Without objection, Mr. Speaker, I shall append to my remarks the circular letter which has been several times alluded to here as an "anonymous" letter, but which, as will readily be seen, has a very definite and a very respectable paternity:

ANYWHERE, SOMEWHERE, OR NOWHERE?

WASHINGTON, D. C., *May 19, 1917.*

A group of gentlemen who happened to meet in Washington and who represent widespread business interests in various lines throughout the country have prepared this statement of reasons why Congress should reject the Hardwick amendment to the Federal reserve law, or any other measure designed to accomplish the same purpose, viz, the purpose of allowing bankers to charge for paying checks drawn by their own depositors upon funds in their keeping. Payment of such checks can not be classed as a service to the party presenting them for payment. It is only the discharge of an obligation which the bank is bound to discharge on demand.

The group included official representatives of the Button Manufacturers Association, National Association of Clothiers, National Association of Credit Men, National Association of Hosiery and Underwear Manufacturers, National Glass Distributors Association, National Hardware Association of the United States, National Retail Dry Goods Association, National Shoe Wholesalers Association, National Wholesale Dry Goods Association, National Wholesale Jewelers Association, St. Louis Chamber of Commerce, and Southern Wholesale Grocers Association.

The committee appointed to prepare and issue the following statement consisted of Messrs. S. W. Campbell, C. B. Carter, W. R. Corwine, Thomas A. Fernley, E. L. Howe, J. H. McLaurin, W. D. Simmons, and W. W. Orr.

The Federal reserve law and its development, under the able administration of the Federal Reserve Board, is gradually making a country merchant's check worth 100 cents on the dollar anywhere.

The creditors of these merchants are entitled to payment by check or some other credit instrument which is worth 100 cents on the dollar somewhere.

These country bankers are asking Congress to pass a law which will make a country merchant's check worth 100 cents on the dollar nowhere.

The Hardwick amendment would make it legal for a bank to charge for paying its own checks in any manner.

THE HARDWICK AMENDMENT—REASONS FOR ITS REJECTION.

In order that we may not give any wrong impression of our attitude toward the banking business or that we are in any way disposed to look at this problem only from a one-sided or selfish point of view, let us say right in the beginning that we appreciate thoroughly the difficult situation in which the small town bankers find themselves at present as the result of recent developments, and share the apprehension that they and their friends feel for their welfare in the future if the present course of development continues and if they persist in their opposition to making changes in their methods and to adjusting themselves to present conditions in order to take advantage of additional and new ways of making money offered by the new law and which may be made to act as an offset to the loss of that part of their former revenues which has come from practices which this Hardwick amendment is designed to sanction and perpetuate, but which, for the following reasons, we believe should no longer be authorized or permitted:

Let us say also in that same connection that we share thoroughly the conviction that bankers should have adequate compensation for all services which they render to their patrons and that their compensation should cover not only any direct outlay involved in rendering that service, but should cover also indirect or overhead costs—and a profit besides. However, that compensation should be charged to and paid by the patron of the bank to whom the service is rendered, and no banker should be permitted—much less authorized—to conspire with his patron to put the burden of this expense upon a third party who has no voice in the arrangement. That would be *taxation without representation*, and, if we remember correctly, there was a popular prejudice against that principle in this country at one time—a prejudice against even the established government's taxing those under its jurisdiction without their consent. Certainly we of this generation have a right to object to our Government's conferring upon any very small percentage of the citizens of this country the right to put a tax—direct or indirect—upon the remainder.

As this is practically a Nation engaged in commerce, any plan which authorizes one small group of men to put a tax upon the commerce of the country, practically authorizes them to tax for their own benefit and profit the remaining large percentage of the people.

We appreciate the fact that the universal establishment of the par collection system in this country would put a considerable part of these small bankers in an embarrassing position, but since that is the direct result of their own action, and since they have gotten themselves into this position by juggling with facts and by attempting to get away from sound principles and fundamental laws, there does not seem to us to be any justification in allowing them to continue to abuse the rest of the business community for the purpose of their relief.

That they are responsible for the present situation is due to the fact that, beginning shortly after the close of our Civil War, but beginning more generally about 25 years ago, these bankers offered, as an inducement to persuade local merchants to carry accounts with them, to so handle their checks as to relieve them of having to pay exchange in remitting for their merchandise accounts to the various points at which they were due and payable. They evidently had two objects in mind in making this offer: (1) An increase of their deposits and the holding of all these funds all during the time checks in payment should be in circuit back to their point of origin, and (2) revenue which came to them through the deposit by these country merchants of exchange which they received direct, or from their farmer customers to whom it is paid by buyers of produce, cattle, etc., the payments usually being made in checks or drafts on New York City.

These checks and drafts the country banker accepted for collection, making a charge for that service and incidentally getting the exchange free as well.

Soon after that, however, he developed the idea that, in addition to getting this New York exchange for nothing and charging his depositor for the privilege of giving it to him, he might then draw on the credit thus established to meet his own demand obligations (his depositors' checks), and by doing so retain the further use of the money during the circuit of this second credit instrument. Then, still later he evolved the plan of making a charge for paying this demand obligation in that way, calling it in some instances a collection charge; in other instances he called it exchange.

The question naturally arises, How did he succeed in putting that over and why was he permitted to do so? That was simply because he took advantage of his position and the dependence of the country merchant upon him to influence the country merchant to adopt this course, using the argument (1) that it would relieve the merchant of paying exchange and following that up with the still more pungent and effective argument that as the country merchant expected his bank to do him a favor occasionally, he would, in turn, be expected to cooperate with the banker by making his remittances in this way. It was the price of accommodation from the banker when the merchant might have occasion to need it.

Then when the country merchant received a letter from his creditor objecting to this method of payment as not adequately covering his obligation and took it, as he usually did, to his banker to ask how to answer it, the banker coached him to stand pat and reply that if his own checks were not accepted in payment of his account, he would close the account and buy his goods somewhere else—the banker's argument to the merchant being that no firm would be fool enough to throw away a good account for a 15-cent charge and that would be all that would be involved in any one instance under discussion.

Of course, as one manufacturer or jobber after another yielded to these tactics rather than lose their accounts, the banks began to coach each other with a view to making the proposition as general as possible, because the more general they made it, the more chance they had of holding on to the position permanently since there was practically no way for the victims to get together and fight them. This, in the light of a recent statement made in the official organ of the American Bankers Association, should be kept constantly in mind as evidence that these banks have themselves never seriously contended that they were entitled to collect this charge for paying their checks or that it was right, or good business, or sound banking. They have contended for its maintenance on the principle that *might makes right*. Their arguments are very like those which the German Government has recently tendered to us in their answers to our insistence upon our rights to traverse the high seas. The German Government told us that if we did not stay away from those portions of the high seas which they proscribed, we would be responsible for the results; and if we got hurt, it would be our own fault. In like manner the American bankers, through their official organ, say:

"The seller of goods has a right to demand payment from the buyer in actual cash or exchange, that is worth 100 cents on the dollar at the point of sale, but if that merchant surrenders that right and accepts a check on the local bank in the home town of the buyer, it takes with that check the burden of its liquidation."

The similarity between this and the German sophistry speaks for itself. It is particularly interesting in view of the words which follow the above quotation from the report of the "Committee of Twenty-Five" of the American Bankers Association, which has been most industrious in lobbying this measure through Congress, viz—

"No law, rule, or regulation should permit this burden to be shouldered on to a third party, either the city or country bank. The buyer and seller are the beneficiaries and one or the other should bear the expense * * *. The letter of the Federal Reserve Board overlooks the principles involved, that is, that the purchase and sale of exchange is a legitimate function of banking."

The idea that the Federal Reserve Board does not recognize the principles involved, is interesting but not nearly so much so to us as the recognition of the principle that a "burden" of that kind should not be shouldered on to a third party, as that is exactly what this "Committee of Twenty-Five" bankers have asked Congress to authorize them to do. It should therefore only be necessary to show that to be the case, to bring about the voluntary withdrawal of the measure by those who have been, for several months, working so constantly for its adoption.

It is not that the Federal Reserve Board has failed to see the proposition in its true light; it is the "Committee of Twenty-Five" (bankers) who have failed to see that in an effort to present a plausible reason for being permitted to do a most unwarranted thing, they have overlooked the fact that the sale of merchandise is not the transaction to which this law would apply. The transaction to be effected by this law is one of those which, as they state, "is a legitimate function of banking," viz, the purchase and sale of exchange. This is evidenced by the fact that the law which they ask Congress to pass would apply without respect to the occasion for the payment in question or whether there had been anything bought or sold. The contractual relations of the buyer and seller of exchange are alone affected by this provision; and the proposition that "no law, rule, or regulation should permit or require that the burden be shouldered on to a third party," applies thoroughly.

The patron of the banker in question has occasion to make a payment in a distant point. The reason for having to make it is not a factor. Whatever arrangement is made between him and his banker with reference to the credit instrument which is used to make the payment, it does not involve the payee of that instrument, nor can the compensation for the service rendered be shouldered on to this third party—the payee.

That, however, is what is proposed by this amendment and what they rightfully, although unwittingly, show that "no law or rule should permit."

Now, instead of contending on the basis of principle or right or equity for the continuance of this practice, they fall back universally as a final argument upon the fact that so large a percentage of their revenues has come from this source that to stop them now would be a serious handicap and inroad into their earnings and they therefore ask the United States Congress not only not to disturb them in this practice if they are able to continue it on the principle that might makes right; but as soon as the business interests of the country—by a proper, consistent, and logical law—provided for the gradual adjustment of the practice and conformity to sound principles, these bankers come then to the United States Congress and ask the passage of a law to enable them to retain the right to put this tax burden upon all third parties. They have gone still further in demanding the right to place this charge burden on a third party even when no exchange is asked for or furnished, and hence no basis for a claim that any service has been rendered to anybody.

Why do these bankers insist upon putting it unjustly upon a third party? Simply because they have taught their depositors that they need never pay exchange and have no faith in their ability to recover from that position.

As the result of a most active lobby, they introduce a measure which is designed to give them a special privilege of a most absolute character, designed also to relieve them of some of the most fundamental obligations of a banker to his patrons and to the public. The amendment is carefully and painstakingly worded to relieve the banker from his responsibility for meeting his demand obligations at 100 cents on the dollar and to permit him in practice to keep for himself a small part of every dollar deposited with him by sanctioning his refusal to pay in full any proper demand therefor.

We recognize that it will be very profitable to the bankers of this country to be permitted to do this instead of being responsible for and required to pay out 100 cents for every dollar deposited with them on demand; but it is certainly not commercial banking as that has been known up to this time and it seems to us a most astounding proposition to ask the Congress of the United States to put its sanction upon any such procedure.

When a bank issues its notes in the form of currency, it expects all other banks throughout the length and breadth of the land to accept these (its demand obligations) at 100 cents on the dollar, but this same banker desires Congress to relieve him from the responsibility of accepting his own demand obligations on the same terms.

This whole proposition is therefore not only unsound and unmoral in that it is designed to permit a banker to discharge his obligations by paying less than the amount of them, but in addition to that, it is thoroughly uneconomical in the way it will work out in actual practice. Under this system, a country merchant, in order to pay his account, will mail, let us say from Selma, Ala., to his jobber in Chicago, a check on his local bank, for the exact amount of his debt. That check will go around the circuit from the Federal reserve bank in Chicago, then to the Federal reserve bank in Atlanta, and then to the banker in Selma on whom it is drawn, and when it gets to its destination, it is, according to this plan, nothing more than an order for that banker to send out in exchange for it another check for a less amount to pay the same debt.

This second check then starts on its round, all during which time the banker in question still has the use of the funds, which in reality should have been in the hands of the creditor of the country merchant.

This first circuit, therefore, of the country merchant's own check is a perfectly useless procedure, requiring a lot of handling and consequently unnecessary expense, amounting to a great many millions of dollars of needless burden upon the commerce of the country, for which

it gets absolutely nothing in return, and which would be entirely obviated by having the merchant do what, as stated in the American Bankers Association's official organ, he should do and what his creditor has a right to demand of him; viz, send, in the first place, a check which *will* pay the amount.

Just as the Federal Reserve Board is perfecting a thoroughly well developed system, which would eliminate all of this burden of useless expense, which has been gradually saddled upon the domestic commerce of the country by these bankers, and just as that board is establishing a system which these bankers acknowledge we are justly entitled to, the Congress of the United States proposes to enact a law designed to establish, permanently, the right of bankers to impose this injustice upon the remainder of the citizenship.

This is not a war measure; it is not claimed to be a war measure, but it is proposed to impose it at a time when the business of the country is being asked to shoulder the heaviest burden of taxation it has ever faced, a time when the thoroughly enthusiastic cooperation of the business interests and the ready acceptance of their unusual burdens are of particular importance. Certainly this is not a happily chosen time to add to those burdens by extending to a privileged few the right of taxation and the right to put it upon those with whom they have no business relations, giving those taxed no voice in the matter nor any alternative. Could there be anything more out of harmony with the spirit and attitude which the people of this country are asked to show toward Congress and the administration?

Mr. PHELAN. Mr. Speaker, I ask unanimous consent that the time of the gentleman be extended 10 minutes.

Mr. HARRISON of Mississippi. I object.

Mr. GLASS. Mr. Speaker, I yielded to the other side 10 minutes.

The SPEAKER. The gentleman from Massachusetts [Mr. PHELAN] asks unanimous consent that the gentleman from Virginia have 10 minutes more. Is there objection?

Mr. HARRISON of Mississippi. I object.

The SPEAKER. The gentleman from Mississippi objects, and the Clerk will report the motion to recommit presented by the gentleman from Pennsylvania [Mr. MCFADDEN].

By unanimous consent the following Members were given leave to extend their remarks in the RECORD:

Mr. GLASS, Mr. PHELAN, Mr. RUBEY, Mr. WINGO, Mr. MCFADDEN, and Mr. LANGLEY.

Mr. MCFADDEN. Mr. Speaker, I desire to offer my motion to recommit, and upon that I move the previous question.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. MCFADDEN moves to recommit the conference report to the committee of conference with instructions to the managers on the part of the House to agree in conference to that part of section 4 of the Senate amendment to H. R. 3673, which reads as follows:

"*Provided*, Such nonmember bank or trust company maintains with the Federal reserve bank of its district a balance sufficient to offset the items in transit held for its account by the Federal reserve bank: *Provided further*, That nothing in this or any other section of this act shall be construed as prohibiting a member or nonmember bank from making reasonable charges, in no case to exceed 10 cents per $100 or fraction thereof, based on the total of checks and drafts presented at any one time, for collection or payment of checks and drafts and remission therefor by exchange or otherwise."

The SPEAKER. And on that the gentleman from Pennsylvania demands the previous question.

The question was taken, and the previous question was ordered.

The SPEAKER. The question now is on the motion to recommit.

Mr. WINGO. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WINGO. If this motion is voted down, will it be in order to offer another motion to recommit?

The SPEAKER. It will not.

Mr. GLASS. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. GLASS. If this motion now being voted on is voted down, then the vote comes on agreeing to the conference report?

The SPEAKER. Yes.

Mr. GLASS. And those who are in favor of the conference report will vote against the motion to recommit?

The SPEAKER. That is hardly a parliamentary inquiry, but it seems to the Chair that that would be the logical thing to do. [Laughter.] The question is on the motion to recommit.

The question was being taken, when Mr. MCFADDEN and Mr. HARRISON of Mississippi demanded the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 159, nays 170, answered "present" 7, not voting 94, as follows:

YEAS—159.

So the motion to recommit was rejected.

The Clerk announced the following pairs:

On the vote:

Mr. GEORGE W. FAIRCHILD (for motion to recommit) with Mr. ROGERS (against).

Mr. COOPER of Ohio (for motion to recommit) with Mr. DENTON (against).

Mr. ROWLAND (for motion to recommit) with Mr. KREIDER (against).
Mr. WEBB (for motion to recommit) with Mr. CALDWELL (against).
Mr. HARRISON of Virginia (for motion to recommit) with Mr. OLNEY (against).
Mr. MCKINLEY (for motion to recommit) with Mr. WINSLOW (against).
Mr. TEMPLETON (for motion to recommit) with Mr. MORIN (against).
Mr. STEVENSON (for motion to recommit) with Mr. CARLIN (against).
Mr. SHALLENBERGER (for motion to recommit) with Mr. EAGAN (against).
Mr. DENT (for motion to recommit) with Mr. PETERS (against).
Mr. WARD (for motion to recommit) with Mr. PAIGE (against).
Mr. MARTIN of Louisiana (for motion to recommit) with Mr. ELSTON (against).
Until further notice:
Mr. STEPHENS of Nebraska with Mr. SLOAN.
Mr. CLARK of Florida with Mr. FULLER of Illinois.
Mr. TALBOTT with Mr. STINESS.
Mr. DALE of New York with Mr. HASKELL.
Mr. FLYNN with Mr. POWERS.
Mr. GALLIVAN with Mr. IRELAND.
Mr. MAHER with Mr. KENNEDY of Iowa.
Mr. DIXON with Mr. DRUKKER.
Mr. FITZGERALD with Mr. FOSS.
Mr. CANTRILL with Mr. FORDNEY.
Mr. FIELDS with Mr. DYER.
Mr. RIORDAN with Mr. MCARTHUR.
Mr. BELL with Mr. HAMILTON of New York.
Mr. HULL of Tennessee with Mr. HILL of Connecticut.
Mr. LUNN with Mr. STERLING of Illinois.
Mr. LITTLEPAGE with Mr. COOPER of West Virginia.
Mr. BRAND with Mr. ANTHONY.
Mr. DICKINSON with Mr. CAPSTICK.
Mr. CROSSER with Mr. KELLEY of Michigan.
Mr. GARNER with Mr. KAHN.
Mr. WELLING with Mr. KENNEDY of Rhode Island.
Mr. O'SHAUNESSY with Mr. SNYDER.
Mr. JONES with Mr. REED.
Mr. SULLIVAN with Mr. WOOD of Indiana.
Mr. SHERLEY with Mr. TILSON.
Mr. ESTOPINAL with Mr. HAYES.
Mr. GARD with Mr. COPLEY.
Mr. DRANE with Mr. HOLLINGSWORTH.
Mr. SCULLY with Mr. ZIHLMAN.
Mr. PRICE with Mr. WASON.
Mr. NEELY with Mr. TEMPLETON.
Mr. KEY of Ohio with Mr. NICHOLS of Michigan.
Mr. MAYS with Mr. SELLS.
Mr. GRIFFIN with Mr. HULL of Iowa.
Mr. EVANS with Mr. CRAGO.
Mr. MARTIN of Illinois with Mr. MCCORMICK.
Mr. DILL with Mr. JOHNSON of Washington (commencing Monday and ending Saturday).
Mr. KITCHIN with Mr. MANN (commencing Monday and ending this week).

Mr. ELSTON. Mr. Speaker, I voted "nay," but I find that I am paired with the gentleman from Louisiana, Mr. MARTIN, and I desire to withdraw my vote and answer "present."

The name of Mr. ELSTON was called, and he answered "Present."

Mr. CALDWELL. Mr. Speaker, I voted "nay." I find that I am paired, and I wish to be recorded "present."

The result of the vote was announced as above recorded.

The SPEAKER. The question now is on agreeing to the conference report.

Mr. WINGO. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 188, nays 130, answered "present" 8, not voting 104, as follows:

YEAS—188.

So the conference report was agreed to.
The Clerk announced the following pairs:
On this vote:
Mr. DENTON (for) with Mr. COOPER of Ohio (against).
Mr. CALDWELL (for) with Mr. WEBB (against).
Mr. OLNEY (for) with Mr. HARRISON of Virginia (against).
Mr. WINSLOW (for) with Mr. MCKINLEY (against).

Mr. MORIN (for) with Mr. TEMPLETON (against).
Mr. PETERS (for) with Mr. DENT (against).
Mr. CARLIN (for) with Mr. STEVENSON (against).
Mr. EAGAN (for) with Mr. SHALLENBERGER (against).
Mr. PAIGE (for) with Mr. WARD (against).
Mr. ELSTON (for) with Mr. MARTIN of Louisiana (against).
Mr. KREIDER (for) with Mr. ROWLAND (against).
Until further notice:
Mr. ADAMSON with Mr. DUNN.
Mr. KEY of Ohio with Mr. CRAGO.
Mr. DICKINSON with Mr. SWIFT.
Mr. LAZARO with Mr. FORDNEY.
Mr. KEATING with Mr. ROGERS.
Mr. HAMILL with Mr. SLEMP.
Mr. KEHOE with Mr. MOTT.
Mr. OLIVER of Alabama with Mr. GRIEST.
Mr. CHARLES B. SMITH with Mr. HOLLINGSWORTH.
Mr. KELLEY of Pennsylvania with Mr. KINKAID.
Mr. MCCLINTIC with Mr. PORTER.
Mr. OVERMYER with Mr. LITTLE.

Mr. ELSTON. Mr. Speaker, I voted "aye." I am paired with the gentleman from Louisiana, Mr. MARTIN, and I wish to withdraw my vote and answer "present."

The name of Mr. ELSTON was called, and he answered "Present."

Mr. OLIVER of Alabama. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman in the Hall listening when his name was called?

Mr. OLIVER of Alabama. No.

The SPEAKER. The gentleman does not bring himself within the rule.

The result of the vote was announced as above recorded.

On motion of Mr. GLASS, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

EXTENSION OF REMARKS.

Mr. CANNON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. PARKER of New Jersey. Mr. Speaker, I make the same request.

The SPEAKER. The gentleman from New Jersey [Mr. PARKER], the gentleman from Wyoming [Mr. MONDELL], the gentleman from Ohio [Mr. FESS], the gentleman from New York [Mr. PLATT], the gentleman from New York [Mr. LAGUARDIA], the gentleman from Massachusetts [Mr. CARTER], and the gentleman from Kansas [Mr. SHOUSE] ask unanimous consent to extend their remarks in the RECORD.

Mr. GLASS. Mr. Speaker, I ask unanimous consent that there may be a general extension of remarks on this bill for five calendar days.

The SPEAKER. The gentleman from Virginia asks unanimous consent that gentlemen have leave to extend their remarks for five calendar days. Is there objection? [After a pause.] The Chair hears none.

WITHDRAWAL OF PAPERS.

By unanimous consent, Mr. GRAY of New Jersey was granted leave to withdraw from the files of the House, without leaving copies, the papers in the case of H. R. 4057, Sixty-fifth Congress, no adverse report having been made thereon.

THE FLAG OF THE UNITED STATES.

The SPEAKER. Under a special order of the House the gentleman from New York [Mr. HICKS] is permitted to address the House not to exceed one hour. [Applause.]

Mr. HICKS. Mr. Speaker and gentlemen of the House, on this, the one hundred and fortieth anniversary of the ordination of the Stars and Stripes by the Continental Congress, I have thought it fitting and proper to make reference to its wondrous history. The flag held in reverence by 100,000,000 of our people is a modern standard. There are no myths or legends associated with its origin; it tells no story of crushed liberties or violated rights; it sprang neither from the sorrows of the oppressed nor the moans of the conquered. In its majestic beauty it expresses the independence of a thoughtful, courageous, conscientious people; the faith, the lofty aspirations, and the high ideals of representative democracy; the advance of a new Nation dedicated to liberty, to law, to justice, and to the cause of human rights. [Applause.]

The flag of America does more than proclaim mere power or declare a great and glorious history. Its folds wave a benediction to the yesterdays and beckon the to-morrows with hope and confidence; it heralds the noble purposes of a great people; it carries a message of hope and inspiration to all mankind. [Applause.] Its glowing splendor appeals to us to demand international justice and arbitration; it commands us to self-sacrifice and universal obligation of service which alone can maintain equality of rights and fullness of opportunity in our Republic. Its stars and its stripes voice the spirit of America calling to a Nation of indomitable courage and infinite possibilities to live the tenets of Christianity, to teach the gospel of work and usefulness, to advance education, to demand purity of thought and action in public life, and to protect the liberties of free government from the aggressions of despotic power. That is the call of the flag of the Union in the hour of crisis and turmoil, when civilization and the laws of nations and of humanity are being engulfed in the maelstrom of death and destruction. In the words of Robert G. Ingersoll—

> The flag for which the heroes fought, for which they died, is the symbol of equal rights. It means universal education—light for every mind, knowledge for every child. It means that it is the duty of every citizen to bear his share of the public burden. It means that all distinctions based on birth or blood have perished from our laws; that our Government shall stand between capital and labor, between the weak and the strong, between the individual and the corporation, between want and wealth, and give the guaranty of simple justice to each and all. That flag is the emblem of a supreme will of a Nation's power. Beneath its folds the weakest must be protected and the strongest must obey. It shields and canopies alike the loftiest mansion and the rudest hut. That flag was given to the air in the Revolution's darkest days. It represents the sufferings of the past, the glories yet to be, and, like the bow of heaven, it is the child of storm and sun.

While no authentic history prevails relating to the banners and standards used by the people of remote antiquity, it is probable that as soon as men began to form themselves into tribes and clans or unite for a common purpose some symbol was used to express the common sentiment. Among many of the ancient ruins representations of the objects used as ensigns have been discovered. Both sacred and profane history record the use of standards or banners by the armies of all nations in the distant past. From the carvings and paintings on the monuments of Egypt it is evident that the use of standards and flags was common in the Valley of the Nile thousands of years before the Christian era. It was the custom among the Egyptians for each battalion to carry a distinguishing emblem representing some sacred object or a tablet bearing a name or other device. Excavations among the ruins of the Assyrian civilization prove that these ancient peoples were also accustomed to the use of standards. The ancient Hebrews had standards for the various tribes, and the Old Testament recites that—

> The children of Israel shall pitch their tents, every man by his own camp and every man by his own standard.

The Persians at the time of Cyrus used as their standard a white flag on which was displayed a golden eagle. The Romans had many standards, and they were regarded with the greatest reverence by the people, who guarded these emblems of their sovereignty with religious veneration in the temples of the Eternal City. In primitive times each company of the army bore a pole with a bundle of hay attached. Later the figure of a horse, a bear, or a wolf or other animal was substituted. In the time of Marius a silver eagle, with spreading wings and claws grasping the thunderbolts of Jove, was the emblem of the Roman Republic. This device, so common in various forms in countries of modern Europe, was taken from the Etruscans, who were the first to adopt it as the symbol of royal power. The Roman standards changed with their conquests and each emperor displayed new emblems. Augustus adopted a globe to symbolize his rule over the world, and Constantine the cross to commemorate his vision.

The cities of Greece also used standards in their military campaign carrying on their staffs various devices and emblems. Sometimes it was a piece of armor attached to a spear, or an initial letter, or an emblem of the gods. According to Homer, Agamemnon raised a purple veil to rally his soldiers. During the Middle Ages, and especially in the crusades, banners and emblems of every description roused the mail-clad warriors in defense of the cross against the crescent. From ancient times the dragon has been a favorite emblem for standards, especially among eastern nations. It was the device on the banner of Harold at the Battle of Hastings, and was used by other English monarchs.

Ancient flags were of various shapes, some long and pointed, some square, and others ending in two or more points. The banner which the Pope sent Charlemagne was oblong with three points. The standards of Henry VIII of England were long streamers rather than flags as we know them. Time does not permit the description of all these emblems, and they have no bearing upon the flag that floats over us to-day except as an incident, showing that through all the ages and races of hu-

manity some flag has been an emblem to inspire men's hearts with confidence and hope and reverence.

The flags used by the American Colonies prior to the Revolution were naturally those of England, though there were some exceptions, for while the colonists considered themselves Englishmen the ties between them and the mother country did not prevent them from showing their independence.

The ancient standard of England, the cross of St. George, a white flag with a rectangular red cross extending its entire length and breadth, was the emblem usually carried by the English soldiery as early as the fourteenth century, and continued as the national flag until 1606, when James I by proclamation united it with the cross of St. Andrew, a blue flag with a diagonal white cross extending from corner to corner. This flag, intended to represent the union of Scotland and England, was called the "King's colors" or "Union" flag, and was to be displayed from the maintops of all British vessels. In addition, ships were to fly from their foretops flags to designate from which part of the Kingdom they came; those from south Britain—England—carrying the St. George's cross, and those haling from north Britain—Scotland—the cross of St. Andrew. It is presumed that as the *Mayflower* belonged to south Britain the flags under which our Pilgrim fathers sailed on their memorable voyage were the King's colors and the banner of St. George, The same inference can be drawn in reference to the early voyages to the southern colonies.

As the King's colors had been prescribed for ships only, the flag of St. George's cross continued to be used by English subjects on land. On the death of Charles I, in 1649, the union between Scotland and England was dissolved, and in 1651 the St. George's cross was by the Commonwealth Parliament adopted as the national standard of England, while the Union flag again came into use upon the restoration of the monarchy in 1660 under Charles II, it is probable that the St. George's cross flag, with occasional variations was the one displayed in the American Colonies until 1707, when Parliament ratified the union of Scotland and England. Under this act the Union flag of James I, the King's colors, was ordained as the banner for all subjects of the British realm "both at sea and on land." This was the famous "Meteor flag of England," a red ensign with a device of the King's colors in the canton. As Ireland was not incorporated into the British Kingdom until 1801, when the cross of St. Patrick—a red diagonal saltier on a white ground—was conjoined with the other two, the present ensign of Great Britain was never used by the American Colonies.

It may be of interest to note other flags which have flown on American soil in the early days of its discovery and settlement. The first flag to be planted upon our shores, if we exclude reference to the possibility of the Norsemen having reached our continent, was that of Spain, a banner with four quarters, two of which were red, embellished with golden castles, and two white, emblazoned with red lions. This was the standard of Spain during most of the period of her conquests. Columbus also bore a personal flag which had been presented to him by Queen Isabella, consisting of a white ensign with a green cross, having on either side the letters F–Y surmounted by golden crowns. It is stated that Cabot, by reason of his being a Venetian, upon one of his expeditions in addition to the flag of England, whose commission he bore, carried the banner of his native city. This was a scarlet ensign bordered by a broad band of blue, emblazoned by the winged lion of St. Mark holding a cross in his right paw.

The flag of France, which, owing to the splendid assistance rendered by that nation in our struggle for independence, is undoubtedly held in greater esteem by us than any other foreign flag, was at the time Jacques Cartier landed in the New World in 1534 a blue ensign emblazoned with three golden fleur-de-lis. Later a white flag was adopted by the Huguenot party, but it is probable that the Bourbon flag—the fleur-de-lis emblem—floated over the vast territory occupied by the French. Henry Hudson brought the Dutch flag to America when the *Half Moon* sailed into New York Harbor in 1609. It was a flag with three equal horizontal stripes, orange, white, and blue, with the letters "V. O. C. A.," standing for the Dutch name of the East India Co. of Amsterdam, in the middle of the white stripe. In 1621, when the Dutch West India Co. came into control of martime affairs, the letters "V. O. C. A." were replaced by the letters "G. W. C." Between 1630 and 1650 the yellow stripe was changed to red; the design of the present flag and this banner waved over the future metropolis of the world until it was supplanted by the flag of St. George's Cross. The flag of Sweden—a yellow cross on a blue field—also has a place in our history.

In the records of Massachusetts, as early as 1634, mention is made of the use of the flag of St. George's Cross. In 1643 a confederacy known as the United Colonies of New England was formed, but it was not until 1686 that a flag was adopted, being the cross of St. George with the initials "J. R." surmounted by a crown, at the insection of the two bars of the cross. This flag was modified, and in the design most generally used had a red field, with the cross of St. George in the upper corner next the mast. A tree or a globe was usually represented in the upper canton next the staff. This was the famous New England flag. Occasionally the field was blue, and this later design is the flag supposed to have been used at Bunker Hill.

Long before the smouldering embers of revolt blazed into the fires of the Revolution most of the Colonies had adopted a flag of its own. The Massachusetts flag bore a pine tree; South Carolina displayed a rattlesnake; New York had a white flag with a black beaver, symbolical of her industry and the wealth of the fur trade; and Rhode Island a white flag, with a blue anchor and the word "Hope" upon it. The growing discontent of the Colonies was productive of numerous devices for flags and banners, the larger portion inscribed with mottoes more or less defiant of British authority. In 1774, at Taunton, Mass., a "union" flag was raised, bearing the words "Liberty or Death." In New York in 1775 a "union" flag with a red field charged with the inscription "George Rex and the Liberties of America" was displayed. Other devices were employed, the most famous being the pine-tree flag, a white ensign with the motto "An Appeal to Heaven" above a green pine tree, and the rattlesnake flag, a yellow field with the significant words "Don't Tread on Me" beneath a coiled snake.

Many privateers adopted a device consisting of a mailed hand grasping a bundle of 13 arrows. The most famous flag used in the South at the beginning of the Revolution was one designed by Col. Moultrie, of South Carolina. It was a blue ensign with a white crescent in the upper corner near the staff. Usually the word "Liberty" was inscribed upon it. While doubt exists as to whether a standard was carried at Concord and Lexington, it is asserted by some authorities that Capt. Nathaniel Page, a minute man of Bedford, Mass., was flag bearer of his company at Concord, and that his banner had a maroon ground, upon which was emblazoned in silver an armored, outstretched hand, grasping a sword, with the inscription "Vince aut Morire," signifying "Conquer or Die," in a scroll of gold. Three silver disks were also described upon it. It is claimed that this banner was originally designed in England in 1660 for the three county troop of Massachusetts and became the standard of the Bedford company of militia which took part in the battle. [Applause.]

Many writers claim that it is doubtful that the patriots were marshaled under any flag at Bunker Hill. Benson J. Lossing, however, in his History of the Revolution, states that the standard raised on that fateful Saturday was the time-honored New England flag, with its field blue instead of red. In the upper quarter was St. George's cross and in the upper canton the design of a pine tree was shown. Shortly after the Battle of Bunker Hill Gen. Putnam unfurled at Cambridge a flag with a red ground, having on one side the Connecticut motto, "He who transplanted still sustains," and on the reverse side a pine tree with the motto, "An appeal to Heaven."

While the various forerunners of the American flag are inseparably associated with its history, they afford little or no clue to the origin of the Stars and Stripes. It has been conjectured that the idea of the stripes as a symbol of union may have been suggested by the flag of the Netherlands. As early as 1704 the flag used by the Honorable East India Co. of England, strangely enough, consisted of 13 red and white stripes with the cross of St. George in the canton. Another theory is that as the different grades in the ununiformed Continental Army were distinguished by stripes or ribbons, these distinguishing marks suggested the stripes in the flag. It has been frequently asserted, though without tangible evidence, that the stripes as well as the stars on his own coat of arms may have suggested the design to Washington.

The earliest instance of the use of the 13 stripes upon an American flag is found in the banner of the Philadelphia Light Horse Troop. This standard was presented to the company by Abram Markoe in 1775 and is known as the Markoe flag. It was made of yellow silk and both sides were alike. In the center was an armorial design, above which were the letters "L. H." and below the words, "For these we strive." The striking feature of this flag is the representation of 13 stripes, alternate blue and silver, placed in the upper corner next the staff. As Gen. Washington, when en route to take command of the Continental Army at Cambridge in 1775, was escorted from Philadelphia to New York by this troop, he was undoubtedly familiar with the standard it carried, and the significance of the stripes may have suggested the flag raised over his headquarters six months later.

The origin of the first flag distinctly colonial and representing a union of the Colonies is clouded in mystery. In October, 1775,

the Continental Congress, then in session in Philadelphia, sent a committee to Cambridge to confer with Washington on military matters. It has been surmised that this committee suggested the design for a flag, but there are no records to substantiate the assertion. Neither in Washington's correspondence or in the report of the committee to Congress is there any reference to a new flag. Who designed the flag which Washington raised at Cambridge on January 2, 1776, is not known, but here was displayed the stripes emblematic of the union of the Colonies. The standard consisted of 13 red and white stripes, with the "union" or "king's colors" in the canton—the familiar combination of the crosses of St. George and St. Andrew. It was a peculiar flag, half American and half British, for while the Colonies still acknowledged their allegiance to England they were determined that their rights should be respected even at the point of the sword.

It was not until the Declaration of Independence, July 4, 1776, that a complete separation was decided upon, so the Cambridge flag with its 13 stripes represented the union of the Colonies in their protest against unjust taxation, while the union of crosses acknowledged their allegiance to the mother country. This flag was variously designated as the union flag, the grand union flag, and the grand striped flag, but is now referred to as the Cambridge flag, and it seems most probable that the banner officially adopted in 1777 was copied, at least so far as the stripes are concerned, from the flag Washington unfurled the year previous.

While having no bearing on the design of the Stars and Stripes, it may be of interest to note another flag, the Eutaw flag, to which is attached a sentimental story. Col. William Washington, a kinsman of Gen. Washington, in 1780 was ordered to Charleston, S. C., and while there fell in love with a Miss Elliot. Learning one day when the colonel was paying her a visit that his troop was without a flag, Miss Elliot with her scissors cut off a portion of a large damask curtain, which she afterwards fringed and attached to a curtain pole and presented to him for a standard. This flag was carried in the Battle of the Cowpens and at Eutaw Springs and is now the property of the Washington Light Horse Infantry, of Charleston.

Another flag which has a romantic history is Pulaski's banner, now in the possession of the Maryland Historical Society. Count Pulaski, the son of a Polish nobleman, was a soldier of fortune who, at the age of 24, found himself outlawed and his estates confiscated. At the beginning of the Revolution he volunteered in the American Army and in 1778 was commissioned an officer in the cavalry force. Congress authorized him to raise what is known as Pulaski's Legion, and while recruiting his corps the Moravian Single Sisters, of Bethlehem, Pa., presented him with a banner. It is of yellow silk, with the letters "U. S." in the center and in a circle around them the words, in Latin, "Union makes valor." On the reverse side, surrounding an eye, is the motto, also in Latin, "No other governs." This banner was carried in the Battle of Savannah, when Pulaski commanded both the American and French cavalry.

The first authoritative action to establish a flag for a new sovereignty is fraught with peculiar interest, and it is a regret that we know so little as to the origin of the Stars and Stripes. While the Cambridge flag had the 13 stripes, there is no evidence that any flag bearing the union of stars had been in public use previous to the resolution of 1777, and it will probably never be known who designed or suggested this beautiful, distinctive, and emblematic feature of our banner. The records of Congress are silent upon the subject and no authentic reference to it has ever been discovered in the correspondence, papers, or diaries which have been examined. It is claimed in popular tradition that the honor of making the first flag combining the Stars and Stripes belongs to Betsy Ross, a Quakeress upholsteress who resided on Arch Street, Philadelphia. It is asserted by her descendants that Congress appointed a committee composed of Gen. Washington, Robert Morris, and George Ross, the latter an uncle of Mrs. Ross's late husband, who called upon her in May or June, 1776, and commissioned her to make a flag from an imperfectly drawn design embodying the stripes and the union of 13 six-pointed stars.

As the six-pointed stars were peculiar to the British, Mrs. Ross suggested that a star of five points would be more symmetrical and appropriate, and the committee at once adopted the new design. While this story is interesting and may be well founded, there is unfortunately no absolute evidence to support it. It rests on the traditions of the Ross family and upon affidavits made by Mrs. Ross's descendants as to their understanding of the particulars as related by Mrs. Ross herself, or by those to whom she told the story. Unfortunately the annals of Congress make no reference to the appointment of a flag committee, and yet so important a matter must have been under consideration previous to the final adoption of the flag. In Washington's correspondence and writings no mention is made of a visit to Mrs. Ross's house or when or by whom the first flag was made. Neither do any of the historians of the Revolutionary period or any contemporaneous writers throw light upon the subject. The principal argument against the story has been that the flag evidently was not used during any portion of 1776 and was not adopted until a year after Mrs. Ross made it. It is further claimed by those who discredit the story that Washington would have raised this new flag when he caused the Declaration of Independence to be read to his troops in New York on July 10, 1776, had such a flag been in existence, instead of the Cambridge flag, which was unfurled. Those who have had experience in congressional matters will not be convinced by the argument of delay in not adopting the new flag at once, and had Mrs. Ross made the flag it is not probable that Washington or any one else would have used it until Congress had approved it.

Whatever uncertainty may exist as to the true origin of the Stars and Stripes, we know that Congress on June 14, 1777, on the recommendation of a committee, the membership of which is not recorded, adopted the following resolution:

Resolved, That the flag of the 13 United States be 13 stripes, alternate red and white; that the union be 13 stars, white on a blue field, representing a new constellation.

This is the first legislative action of which there is any record for the establishment of a national flag for the sovereign United States of America declared independent July 4, 1776, and proclaiming the official birth of a new constellation as the symbol of their Union.

Thus was born the Stars and Stripes, which through all the ages shall be the emblem of liberty and justice for all mankind. [Applause.] In the words of Washington:

We take the star from heaven, the red from the mother country, separating it by white stripes, thus showing that we have separated from her, and the white stripes shall go down to posterity representing liberty.

It has been said that—

Every nation has its symbolic ensign in their banners. Our fathers chose the Stars and Stripes, the red telling of the blood shed by them for their country, the blue of the heavens and their protection, and the stars of the separate States embodied in one nationality, E pluribus unum. The stars of the new flag represent a constellation of States rising in the west. The idea was taken from the constellation Lyra, which in the hands of Orpheus signified harmony. The blue of the field was taken from the edges of the Covenanter's banner in Scotland, significant also of the league and covenant of the United Colonies against oppression, incidentally involving the virtues of vigilance, perseverance, and justice. The stars were disposed in a circle, symbolizing the perpetuity of the Union, the ring like the circling serpent of the Egyptians signifying eternity.

What eloquence do the stars breathe when their full significance is known: A new constellation, union; perpetuity; a covenant against oppression; justice, equality, subordination, courage, and purity.

I doubt if these poetic and fanciful descriptions, however, are supported by any proof other than the imagination of the writer.

While the flag was adopted June 14, 1777, it was not until September 3 following that Congress officially promulgated the design. The honor of first displaying the Stars and Stripes in battle belongs to the State of New York, when on August 3, 1777, an improvised flag was raised on the northeast bastion of old Fort Stanwix, or Schuyler as it was sometimes called, the site of the present city of Rome. Anticipating an attack by the British, a garrison of some 500 soldiers, under the command of Col. Peter Gansevoort, jr., with Lieut. Col. Marinus Willet second in command, had been placed in the fort. On August 2 the garrison was reinforced by about 200 men of the Ninth Massachusetts Regiment, led by Lieut. Col. Mellon. This detachment brought news of the recently enacted flag statute, and as the garrison was without a standard the fort was ransacked for material of which to make the new flag. According to accounts, shirts were cut up to form the white stripes, a woman's petticoat supplied the red, while the blue ground for the stars was taken from a cloak belonging to Capt. Abraham Swartwort, of Dutchess County, who was then in the fort. This account is confirmed in part by a letter from Col. Swartwort to his commanding officer, asking for an order on the paymaster to reimburse him for the loss of his cloak. The narrative of Col. Willet, however, gives a somewhat different version of the story. He says:

The white stripes were cut out of ammunition shirts furnished by the soldiers, the blue out of the camlet cloak taken from the enemy at Peekskill, while the red stripes were made of different pieces of stuff procured from one and another of the expedition.

Howsoever the flag was made, it was the Stars and Stripes that floated over the brave Americans from August 3 to August 22, when the seige was raised. John Fiske, the eminent historian, further substantiates the claim that to New York belongs the honor of having first unfurled the Stars and Stripes in battle when he says, speaking of the flag:

Hastily extemporized out of a white shirt and an old blue jacket and some strips of red cloth from the petticoat of a soldier's wife, this was the first American flag with Stars and Stripes that was ever hoisted.

Lossing in his Field Book of the Revolution also supports the claim of Fort Stanwix.

Delaware claims the distinction, maintaining that the flag was first raised in battle at Cooch's bridge, near Wilmington, on September 3, 1777. The claim is based on the presumption that the American forces had a flag at that time, and though even if they did, this skirmish took place a month after the flag on Fort Stanwix had been unfurled to the breeze. One of the local Delaware historians, Judge Conrad, defeats his own contention when he says:

On August 2, 1777, a short skirmish or sally occurred at Fort Schuyler, N. Y., in which the Americans floated a rudely devised flag, intended to represent the ideas embodied in the resolve of Congress, and that all historians agree that the flag floated on that occasion was merely an improvised one, and in no sense a complete and regular flag of the United States.

The absurdity of Mr. Conrad's theory is dismissed by Mr. Edward H. Hall, secretary of the American Scenic and Historical Preservation Society, who says:

Thus the 20 days' siege at Fort Schuyler, so courageously and successfully resisted, is dismissed by Mr. Conrad as a short skirmish or sally, and the fine distinction drawn between a heroic siege, with all its terrors of possible starvation and barbarous massacre, and a morning's skirmish at Coach's bridge between two small bodies of troops formally drawn up in line of battle. I do not know of any historian who says that the Fort Schuyler flag was not "complete," although they do agree that it was improvised.

The Stars and Stripes were carried in the Battle of the Brandywine September 11, 1777; they waved in triumph over the victorious field of Saratoga and cheered the ragged patriots of Washington's army amid their sufferings around the camp fires at Valley Forge. Beneath its folds Corwallis surrendered his sword at Yorktown, September 19, 1781. It floated over New York when the British evacuated the city November 25, 1783, and roused the patriotism of our soldiers in every battle during the later days of the Revolution, as the immortal Washington marched onward to victory and to glory.

Soon after its adoption the new flag was hoisted on the naval vessels of the United States. John Paul Jones claimed it was his good fortune to be the first to display the Stars and Stripes on a man-of-war. It has been stated that the Naval Committee of Congress presented to Jones the first official flag of the United States ever made, but there is no official record to confirm this statement. Buell, in his life of Paul Jones, states that the captain displayed the new flag on the *Ranger*, then being fitted up at Portsmouth, on the 4th of July, 1777. The *Ranger*, however, did not go to sea until November 1. With Jones in command—his commission was issued on the same day the flag was established—the *Ranger* reached Quiberon Bay, France, about December 1, 1777, and on February 14, 1778, her flag received the first salute ever paid the American flag by a foreign power. No less an authority than John Adams has erroneously stated that the first American vessel to obtain a salute for the flag was the *Andreas Doria* in the Danish West Indies in November, 1776. This ship, however, carried only a continental ensign, probably the Cambridge flag, which was never legalized or recognized by the Continental Congress, and was not the Stars and Stripes which the French commander saluted. The West Indies incident occurred eight months before the Stars and Stripes existed, for no stars were seen on any flag prior to the adoption of the flag of the United States by act of Congress in June, 1777. A question has been raised as to the exact date on which Jones raised the flag on the *Ranger*, some old reports of the incident stating that it was July 12. Commodore Barry's name has frequently been mentioned in connection with the honor of the first display, but no evidence has been adduced to substantiate the claim that Barry's flag was the first to brave the winds.

No reference to the early history of the flag upon the seas would be complete without a brief allusion to the battle between the *Bon Homme Richard* and the *Serpais* in the evening of September 23, 1779. Thackeray once told a friend that the capture of the *Serapis* by Paul Jones was one of the most extraordinary stories ever recorded in naval history. Without question, that moonlight battle was the most brilliant exploit in the annals of the sea, and the courage of John Paul Jones and his brave crew, fighting to victory from the decks of a sinking ship, forms one of the most glorious pages in our history. [Applause.]

Americans will ever pay tribute to the sublime confidence and daring of Paul Jones. Bidding defiance to all human calculations which had doomed him to defeat, with a foundering ship, half his men dead or dying, when hope and chance seemed irretrievably lost, he fought on and won immortal glory. [Applause.]

All great events seem to invite controversies, and it is so with reference to the flag borne by the *Richard*. In 1898 the Government received what was purported to be the original ensign of Jones's old ship. According to the story, which for a time had some support in the popular fancy, the *Richard*, several days before encountering the *Serapis*, captured a British vessel, the *Kitty*, which had formerly been an American ship. Among the crew was one Stafford, who volunteered for service on the *Richard*, and who, it is alleged, during the action with the *Serapis* plunged into the sea and recovered the *Richard's* flag which had been shot away. When Jones transferred his crew from his sinking ship, this sailor rescued the flag and later accompanied Jones to the *Alliance* upon his assuming command. When the *Alliance* was sold the flag was presented to Stafford in recognition of his services. Beyond the fact that a letter is purported as having been sent by Joseph Myler, Secretary pro tempore of Congress, to Joseph B. Stafford, in which it is alleged Congress presented to him the "starry" flag of the *Alliance* in recognition of his meritorious services, there is no evidence whatever that this Stafford flag was the one that waved from the ensign gaff of the *Bon Homme Richard* in the most desperate of all sea conflicts.

Another story which has gained considerable vogue is to the effect that the flag of the *Richard* had been made by two maiden ladies of Philadelphia, who presented it to Capt. Jones shortly after Congress had adopted the Stars and Stripes. It is claimed that this flag which bore 13 stripes but only 12 stars was flown from the *Ranger* and was afterwards transferred to the *Richard*. There is no foundation whatever for this legend.

Buell, in his life of Paul Jones, gives a rather fanciful account of this much-disputed flag:

The "unconquered and unstricken" flag that went down with the *Richard* was the same one which the girls of Portsmouth made from slices of their best silk gowns, and presented to Jones to hoist on the *Ranger*, July 4, 1777, and he considered it his personal property or, perhaps, the property of the girls who made it, intrusted to his keeping. On relinquishing command of the *Ranger* in 1778, he kept this flag with him and used it on the *Richard*. It was made by a quilting party according to specifications which Jones furnished. The 13 white stars were cut from the bridal dress in which Helen Seary had been wedded in May, 1777.

This was the first edition of the Stars and Stripes that Europe ever saw; the first to be saluted by the guns of a European naval power; but, far beyond that, and beyond anything, it was the first and last flag that ever went down or ever will go down flying on the ship that conquered and captured the ship that sunk her.

When Jones returned to this country in February, 1781, he found Miss Langdon, of the "quilting party," a guest of the Ross family, whose house was always his home in Philadelphia. By way of apology he explained to her that his most ardent desire had been to bring that flag home to America, with all its glories, and give it back untarnished into the fair hands that had given it to him nearly four years before. "But, Miss Mary," he said, "I couldn't bear to strip it from the poor old ship in her last agony, nor could I deny to my dead on her decks, who had given their lives to keep it flying, the glory of taking it with them."

[Applause.]

"You did exactly right, Commodore," exclaimed Miss Langdon; "that flag is just where we all wish it to be—flying at the bottom of the sea over the only ship that ever sunk in victory!"

[Applause.]

Whether or not sentiment has been woven into history in this interesting story I do not know. The records that are extant, while very complete in describing the battle are most meager in their reference to the colors. In Jones's memoirs, compiled from papers in the possession of his neice, Mrs. Taylor, there is a reference stating that few of the personal effects of the officers were saved. In the journal, prepared by Jones for the King of France, he speaks of everything going down with the ship except signal flags.

As the national flag is never used as a signal in the sense in which Jones referred to the signal flags which were saved, Buell evidently assumed that the Stars and Stripes was left flying at the peak when the *Richard* sank beneath the waves. It has been asserted that Jones referred to the loss of the flag in his report of the engagement to Congress, but unfortunately the records do not dislose this fact. The several letters written by the great commander to numerous friends, describing the battle are silent on the flag episode. Yet Mr. Buell states that Jones made a report in which he said:

No one was now left aboard the *Richard* but her dead. To them I gave the good old ship for their coffin, and in her they found a sublime sepulcher. She rolled heavily in the long swell; her gun deck awash to the port sills, settled slowly by the head, and sank peacefully in about 40 fathoms.

The ensign gaff, shot away in action, had been fished and put in place soon after firing ceased, and our torn and tattered flag was left flying when we abandoned her. As she plunged down by the head at the last, her taffrail momentarily rose in the air; so the very last vestige mortal eyes ever saw of the *Bon Homme Richard* was the defiant waving of her unconquered and unstricken flag as she went down. And, as I had given them the good old ship for their sepulcher, I now bequeathed to my immortal dead the flag they had so desperately defended for their winding sheet.

For the sake of history and in honor of the memory of the great sailor, let us hope that Buell based his eloquent and pathetic account of the sinking of the *Bon Homme Richard* upon substantial grounds.

The flag as originally adopted remained unchanged until May 1, 1795. By this time two more States, Vermont and Kentucky, had been admitted into the Union and a change in the flag was made necessary. Not foreseeing the growth of the flag in the addition of both a stripe and a star for each new State, Congress on January 13, 1794, enacted—

That from and after the 1st day of May, 1795, the flag of the United States be 15 stripes, alternate red and white; that the union be 15 stars, white in a blue field.

In the first flag the stars were evidently arranged in a circle, but this custom was soon abandoned. At Annapolis there is preserved the flag of the Third Maryland Regiment, with a union showing 12 stars in a circle, surrounding one in the center. In the flag of 15 stripes the stars were placed in three parallel rows of 5 stars each, and this flag was the national banner from 1795 to 1818, during which period occurred the War of 1812. It was this flag waving over Fort McHenry that inspired Francis Scott Key to write the Star-Spangled Banner. [Applause.]

By 1818 five additional States—Tennessee, Ohio, Louisiana, Indiana, and Mississippi—had been admitted into the Union and therefore to truly represent the Union a further change in the flag was demanded. After considerable discussion in Congress on the subject the act of April 4, 1818, was passed which provided:

First. That from and after the 4th of July next the flag of the United States be 13 horizontal stripes, alternate red and white; that the union have 20 stars, white in a blue field.

Second. That on the admission of every new State into the Union 1 star be added to the union of the flag and that such addition shall take effect on the 4th of July next succeeding such admission.

To Hon. Peter H. Wendover, a Member from New York, belongs the credit of pressing it to final passage. The return to the 13 stripes of the 1777 flag was due largely to the fact that it would not be practicable to continue adding a stripe for each new State, for a further increase in the number of stripes would have made the width of the flag disproportionate to its lengh, unless the stripes were narrowed, and this would have impaired its distinctness. Upon the suggestion of Capt. Reid, of the Navy, who had suggested the return to the 13 stripes, the stars were arranged in the form of one great star in the center of the union. This design, however, did not meet with favor, and the stars were soon thereafter arranged in rows. A newspaper of the times said:

By this regulation the 13 stripes will represent the number of States whose valor and resources originally effected American independence, and the additional stars will mark the increase of the United States since the establishment of the Constitution.

No act has since been passed by Congress altering the general design of the flag, and it is the same as originally adopted except for the increase in the number of stars in the union. In the War with Mexico the flag showed 29 stars in its union; during the Civil War, 35; during the Spanish-American War, 45 stars, and since July 4, 1912, 48 stars. Congress has never legislated upon the arrangement of the stars in the union, and in consequence there has been a lack of uniformity in the matter, although the early confusion has now, however, disappeared, and in the absence of direct legislation an agreement has been reached between the Navy and War Departments on the subject. The present arrangement of the stars is in six horizontal rows of eight stars each.

The term "Old Glory" was evidently first applied to the flag by William Driver in 1831, a skipper from Salem, Mass., who was at that time in command of the brig *Charles Doggett*. It is related that as he was about to sail for the South Seas a party of friends presented him with the flag, and when it was broken from the gaff the captain christened it "Old Glory." It is now preserved in the Essex Institute at Salem.

While we have but one flag for use on sea as well as land, by merchant ships and men-of-war alike, Congress very early in our history adopted a special flag for the Revenue-Cutter Service consisting of 16 perpendicular stripes, alternately red and white. The union is white, on which is depicted in blue the national coat of arms—the eagle surmounted by a half circle of 13 stars. The large number of stripes is accounted for by the fact that at the time the Revenue-Cutter Service was established in 1797 there were 16 States in the Union and the arrangement has never been altered.

Under the act of January 28, 1915, the Life-Saving Service and the Revenue-Cutter Service were combined under the title United States Coast Guard and this flag adopted as a distinguishing flag to be flown from the foretruck or pennant staff.

The union jack, or as it is most commonly called the "jack," consists of the union of the national flag—a blue field with 48 white stars arranged in 6 parallel rows of 8 stars each. The Navy regulations specify that "when at anchor the union jack shall be flown from the jack staff from morning colors to evening colors." The jack is used also as a signal for a pilot and to denote the session of a court-martial. "When a diplomatic official of the United States of and above the rank of chargé d'affaires pays an official visit afloat, the union jack shall be carried on a staff at the bow."

In addition to these flags, there is a flag for the President and several of the departmental heads, as well as for special divisions of the Government service.

Mr. Speaker, while it does not pertain to the origin of the flag, it is of utmost importance in maintaining the flag in its exalted position that the great war loan now being financed be fully subscribed, and I am therefore going to urge upon every Member of Congress the urgent necessity of subscribing for the liberty bonds. [Applause.]

In closing this fragmentary, and I fear somewhat imperfect, history of the flag I want to quote from the late Mr. Justice Harlan, of the Supreme Court:

To every true American the flag is the symbol of the Nation's power, the emblem of freedom in its truest, best sense. It is not extravagant to say that to all lovers of the country it signifies government resting on the consent of the governed, liberty regulated by law; the protection of the weak against the exercise of arbitrary power; and absolute safety for free institutions against foreign aggression.

Henry Ward Beecher made a most eloquent allusion to the flag when he declared:

A thoughtful mind, when it sees a nation's flag, sees not the flag only but the nation itself; and whatever may be its symbols, its insignia, he reads chiefly in the flag the government, the principles, the truth, the history, which belong to the nation that sets it forth. As at early dawn the stars stand first and then it grows light, and then as the sun advances that light breaks into banks and streaming lines of color, the glowing red and intense white striving together and ribbing the horizon with bars effulgent, so on the American flag, stars and beams of many-colored light shine out together. And wherever the flag comes and men behold it, they see in its sacred emblazonry no rampant lion and fierce eagle, but only light, and every fold significant of liberty.

Let us then twine each thread of the glorious tissue of our country's flag about our heartstrings; and looking upon our homes and catching the spirit that breathes upon us from the battle fields of our fathers, let us resolve, come weal or woe, we will, in life and in death, now and forever, stand by the Stars and Stripes. They have been unfurled from the snows of Canada to the plains of New Orleans, in the halls of the Montezumas and amid the solitude of every sea; and everywhere, as the luminous symbol of resistless and beneficent power, they have led the brave to victory and to glory. They have floated over our cradles; let it be our prayer and our struggle that they shall float over our graves.

Stars of the early dawning, set in a field of blue;
Stripes of the sunrise splendor, crimson and white of hue;
Flag of our father's fathers born on the field of strife,
Phœnix of fiery battle risen from human life;
Given for God and freedom, sacred, indeed, the trust
Left by the countless thousands returned to the silent dust.

Flag of a mighty nation waving aloft unfurled;
Kissed by the sun of heaven, caressed by the winds o' the world;
Greater than kingly power, greater than all mankind;
Conceived in the need of the hour, inspired by the Master Mind;
Over the living children, over the laureled grave,
Streaming on high in the cloudless sky, banner our fathers gave.

Flag of a new-born era, token of every right
Wrung from a tyrant power, unawed by a tyrant's might;
Facing again the menace outflung from a foreign shore,
Meeting again the challenge as met in the years before;
Under thy spangled folds thy children await to give
All that they have or are that the flag they love shall live.

—Charles G. Crellin.

[Loud applause, the Members rising.]

NEW YORK AND THE FLAG.

New York may justly be proud of the part she has so conspicuously played in the history of the flag. The great Empire State, with her mighty commerce, her great agricultural interests, her business enterprises, her financial resources, and her maritime industries unequaled by any State in the Union, salutes her sister Commonwealths and pledges her allegiance to the flag which unites all the States—each one an empire and the whole the most magnificent and forward cluster of civil peolity the world has ever seen.

In every crisis which has confronted the Nation the sons of New York have responded nobly to the call of duty and of country. Both before and since the adoption of her State constitution, on April 20, 1777, stirring scenes have been enacted on her soil. In all the Indian wars New York, the home of the famous Iroquois, bore the brunt of those deadly conflicts. During the struggle for independence our State gave freely of her men and her treasure, and her records are replete with stirring incidents in the cause of liberty and freedom.

On August 3, 1777, the Stars and Stripes were raised over Fort Stanwix, and two months later, on October 17, Burgoyne surrendered his army at the decisive battle of Saratoga. On July 16, 1779, "Mad" Anthony Wayne captured Stony Point in one of the most brilliant victories of the war, and on November 25, 1783, the British evacuated New York and the noble Hudson again flowed unvexed to the sea.

At Poughkeepsie on July 26, 1788, the Federal Constitution was adopted. From 1784 to 1790 New York was the national capital, and here, on the 30th of April, 1789, on the balcony of Federal Hall, George Washington took the oath of office as the first President of the United States. In the War of 1812, owing to her proximity to Canada, New York bore her full share of the burden of the conflict and played a conspicuous part in the triumphs of the flag. When the call came in 1861 to preserve the Union, New York responded with all her splendid courage and determination, sending to the front 448,850 soldiers, a total which, by including the 18,197 who paid commutation, was swelled to 467,047, over one-sixth of the Union Army. To show her patriotism in providing men to uphold the supremacy of the Stars and Stripes, she expended in bounties the huge sum of $86,629,000. In the Spanish War her sons charged at San Juan and fought in the jungles of the far-away Philippines, and in the war against Germany the Empire State will send her full quota to the trenches of Europe; and wherever duty calls, whenever bravery and courage is demanded, whether it be charging across the deadly field of "no man's land" or in the air or under the sea, there you will find the men from the Empire State.

New York recognizes the importance of inculcating into the minds and the hearts of her children a noble veneration for the flag of the Nation and has enacted laws to foster their love and inspire their patriotism.

Our education law provides that—

It shall be the duty of the school authorities of every public school in the several cities and school districts of the State to purchase a United States flag, flagstaff, and the necessary appliances therefor, and to display such flag upon or near the public-school building during school hours, and at such other times as such school authorities may direct.

It shall be the duty of the commissioner of education to prepare, for the use of the public schools of the State, a program providing for a salute to the flag and such other patriotic exercises as may be deemed by him to be expedient under such regulations and instructions as may best meet the varied requirements of the different grades in such schools.

It shall also be his duty to make special provision for the observance in the public schools of Lincoln's birthday, Washington's birthday, Memorial Day, and Flag Day, and such other legal holidays of like character as may be hereafter designated by law when the legislature makes an appropriation therefor.

On March 15, 1917, we enacted a law making it a misdemeanor for any person to place any sort of an advertisement, word, figure, mark, or picture of any nature upon the flag of the United States, or to "publicly mutilate, deface, defile, or defy, trample upon or cast contempt upon" the National Flag or any picture or representation of it.

The following history of the New York State flag has been compiled by Hon. James A. Holden, State historian to whom I am indebted for its publication:

Up to 1896 there had been nothing placed in the statutory civil law, so far as I have been able to discover in the time at my disposal, relating to a State flag, either as to color or design. In fact, in the Laws of 1845, chapter 98, "An act for the erection of a flagstaff on the capitol," passed April 26 of that year, this flagstaff was to be erected "on the capitol for the purpose of displaying thereon the American Flag during the daily sessions of the legislature, and on public occasions, and to procure a suitable flag for that purpose" (pp. 81–82). This would show that at that time New York had no State flag recognized as such.

However, in the "General regulations for the military forces of the State of New York" (Albany, 1858), issued by the adjutant general of the State as "General order No. 30," I find in article 34, section 717, page 129, "the State flag is made of white bunting, 12 feet fly by 10 feet hoist, bearing in the center the arms of the State of New York." The regimental colors at that time were to be of yellow silk for the artillery and of blue silk for the infantry and rifle regiments, all bearing the arms of the State of New York.

At this time the standards of the mounted regiments likewise bore the arms of the State of New York, embroidered in silk on a blue ground (p 130).

It should be borne in mind that there is a distinction made in military rules and regulations between the words "flags," "colors," and "standards," as follows: "By 'flag' is meant the emblem displayed from a flagstaff. By 'colors' are meant the National and State flags carried by foot troops. By 'standards' are meant the National and State flags carried by mounted troops."

In this connection we may note that one of the original sources from which the present coat of arms of the State of New York was derived was the flag borne by the Third New York Regiment, Col. Peter Gansevoort, jr., commanding, and was used by that regiment during the Revolutionary War. This flag is said to have been of "dark blue silk and about 7 feet square."

It is stated by the late H. A. Homes, the then State librarian, that "in 1871 the arms were painted on blue silk on regimental flags of 12 feet by 10 * * * but in 1873 upon the new flag of white bunting."

It is indicated that some time between the time of the Civil War and 1878 the State flag, at least so far as it was made a State flag by military usage, had been changed from white to blue, and then back again, inasmuch as I find that in the General Regulations for Military Forces of the State of New York for 1865, General Orders No. 23, article 34, section 717, it is prescribed that "The State flag is made of white bunting, 12 feet fly by 10 feet hoist, bearing in the center the arms of the State of New York." The regimental colors and standards were to be of blue silk for infantry and rifle regiments and for mounted regiments and of yellow silk for the artillery.

The same language is used in the General Regulations for the Military Forces of the State of New York, for 1876, article 35, section 643, viz, "The State flag is made of white bunting, 12 feet fly by 10 feet hoist, bearing in the center the arms of the State of New York." State regimental standards and colors were all of blue, however, at this time.

The first attempt to establish a legal State flag that I have as yet discovered was made in 1896. At that time by chapter 229 of the laws of that year it was prescribed that "The State flag is hereby declared to be buff, charged with the arms of the State in the colors as described in the blazon of this section."

The State flag continued to be buff in color until 1901, when, at the suggestion and through the work and research of the then State historian, Hon. Hugh Hastings, legislation was secured, and by chapter 229 of the laws of 1901 the color of the State flag was changed from buff to blue, and it has remained blue to the present time.

In 1883, by chapter 349, laws of that year, a superintendent of buildings was authorized. Among the other duties imposed upon him was that of seeing that "During the hours when the legislature is in session the State flag having the arms of the State shall be displayed from the capitol together with the flag of the United States."

The formality of displaying the State flag is also carried out whenever the board of regents of the University of the State of New York is in session, in the Education Building, the board being a coordinate branch of the State government.

On formal occasions, therefore, the State flag is always to be seen displayed from the official buildings here in Albany.

FLAG ETIQUETTE.

The flag circular issued by the War Department contains much valuable information:

WAR DEPARTMENT,
Washington.

Many inquiries concerning the proper method of displaying, hanging, and saluting the United States flag are being received in the War Department with the evident object of securing some authoritative statement relating to the subject.

In this connection it should be remarked that while it is within the province of the War Department to prescribe rules and regulations governing the matter in question for observance within the Army, yet it is beyond its province to prescribe any such rules or regulations for the guidance of civilians or to undertake to decide questions concerning the subject that are presented by civilians

There is no Federal law now in force pertaining to the manner of displaying, hanging, or saluting the United States flag or prescribing any ceremonies that should be observed in connection therewith. In fact there are but two Federal laws on the statute books that have any bearing upon this subject, one the act of Congress approved February 20, 1905 (33 Stat. L., 725), providing that a trade-mark can not be registered which consists of or comprises, inter alia, "the flag, coat of arms, or other insignia of the United States, or any simulation thereof," and the other the act of Congress approved February 8, 1917 (Public, No. 305, 64th Cong.), providing certain penalties for the desecration, mutilation, or improper use of the flag within the District of Columbia. Several States of the Union have enacted laws which have more or less bearing upon the general subject, and it seems probable that many counties and municipalities have also passed ordinances concerning the matter to govern action within their own jurisdiction.

Warning against desecration of the American flag by aliens has been issued by the Department of Justice, which has sent the following notice to Federal attorneys and marshals:

"Any alien enemy tearing down, mutilating, abusing, or desecrating the United States flag in any way will be regarded as a danger to the public peace or safety within the meaning of regulation 12 of the proclamation of the President issued April 6, 1917, and will be subject to summary arrest and punishment."

It is the practice in the Army, each day in the year, to hoist the flag briskly at sunrise, irrespective of the condition of the weather, and to lower it slowly and ceremoniously at sunset, indicating the commencement and cessation of the activities of the day, and to display it at half staff on Memorial Day (May 30) from sunrise until noon and at full staff from noon until sunset, and also on other days specially designated for that purpose by the proper authority, the flag always being first hoisted to the top of the staff before being lowered to the half-staff position.

There has been some question among civilians concerning the exact location of a flag hung at "half staff." Theoretically, the flag is always hung on a separate staff, much shorter than the staffs usually erected on buildings, and as a consequence a flag hung at half staff would be located much higher on the ordinary flag staff than under the present practice, but still the custom of placing the half-staffed flag in about the center of the flagpole, whatever its length may be, is rather generally observed throughout the country and this department sees no real objection to this custom.

Considerable discussion has arisen throughout the country concerning the proper manner of hanging and displaying the flag for decorative purposes. As already stated, there is no Federal law governing the subject, and individual opinion differs as to the procedure that should or should not be followed. It has been suggested that as far as possible the hanging of the flag should be restricted to suspending it from a flagpole, in the regular way, and not to displaying it otherwise; that for purposes of decoration only the national colors should be arranged in the form of bunting and not used in the form of the flag; that if it is nevertheless the desire to use the flag for decorative purposes it should always be hung flat whether on the inside or the outside of buildings, with the union to the north or east, so that there will be a general uniformity in the position of the union of each flag displayed; that the flag should rarely be displayed in a horizontal position or laid flat; that under no circumstances should it be hung where it can easily be contaminated or soiled, or be draped over chairs or benches to be used for seating purposes, and that no object or emblem of any kind should be placed above or upon it. This department sees no objection to flying the flag at night on civilian property provided it is not so flown for advertising purposes.

It is becoming the practice throughout the country among civilians to display the national flag on all patriotic occasions, especially on the following days:

Lincoln's Birthday February 12.
Washington's Birthday, February 22.
Mothers' Day, second Sunday in May.
Memorial Day, May 30.
Flag Day, June 14.
Independence Day, July 4.

In certain localities other special days are observed in the same manner.

It seems to be appropriate that where several flags or emblems are displayed on a pole or otherwise the United States flag should always be hoisted first and hung or displayed at the top; that in any parade the United States flag should always have the place of honor, and that the flag should never be hung or displayed with the union down, except as a signal of distress at sea.

Existing regulations governing the Army provide that when officers and enlisted men pass the national flag, not encased, they will render honors as follows: If in civilian dress and covered, they will uncover, holding the headdress opposite the left shoulder with the right hand; if uncovered, they will salute with the right-hand salute. A flag unfurled and hung in a room in which officers or enlisted men of the Army are present will be saluted by them the first time they may have occasion to pass it, but not thereafter. The hand salute is as follows:

"Raise the right hand smartly till the tip of the forefinger touches the lower part of the headdress above the right eye, thumb and fingers extended and joined, palm to left, forearm inclined to about 45°, hand and wrist straight; at the same time look toward the person saluted.

"Drop the arm smartly to the side."

No anthem, hymn, or musical air has been recognized by any Federal law as the national anthem, hymn, or air, but Army and Navy regulations provide that the musical composition familiarly known as the Star-Spangled Banner shall be designated as the national air of the United States of America. It should be stated, however, that these regulations are binding only upon the personnel of the military and naval service.

Whenever the national air is played at any place where persons belonging to the military or naval service are present, all officers and enlisted men not in formation are required to stand at attention, facing toward the music, excepting when the flag is being lowered at sunset, on which occasion they are required to face toward the flag. If in civilian dress and uncovered, they are required to stand and salute at the first note of the air, retaining the position of salute until the last note of the air is played. If in civilian dress and covered, they are required to stand and uncover at the first note of the air, holding the headdress opposite the left shoulder until the last note is played, excepting in inclement weather, when the headdress may be held slightly raised. The custom of rising and remaining standing and uncovered while the Star-Spangled Banner is being played is growing in favor among civilians.

Old or worn-out flags should not be used either for banners or for any secondary purpose. When a flag is in such a condition that it is no longer a fitting emblem for display, it should not be cast aside nor used in any way that might be viewed as disrespectful to the national colors, but should be destroyed as a whole, privately, preferably by burning or by some other method lacking in any suggestion of irreverence or disrespect due the emblem representing our country.

It should be borne in mind that the views set forth in this circular are merely suggestive, and that it is not the intention of the department to give them out as authoritative.

H. P. MCCAIN,
The Adjutant General.

APRIL 14, 1917.

The following is taken from the Navy Regulations:

The national ensign on board a ship of the Navy at anchor shall be hoisted at 8 a. m and kept flying until sunset. Whenever a ship comes to anchor or gets underway, if there is sufficient light for the ensign to be seen, it shall be hoisted, although earlier or later than the time specified. The national ensign shall be displayed on shore from 8 a. m. to sunset, at every naval station.

In order to show proper respect for the flag the following ceremony should be observed:

* * * * * * *

At "morning and evening colors" civilian spectators should stand at "attention" and uncover during the playing of the "Star-Spangled Banner." * * * The flag should never be allowed to touch the ground, and should never be raised or lowered by any mechanical appliance.

When the national colors are passing on parade, or in review, the spectator should, if walking, halt, and if sitting, arise and stand at attention and uncover.

Whenever the "Star-Spangled Banner" is being played or sung all persons within hearing should rise and stand uncovered during its rendition.

When the National and State or other flags fly together the national flag should be on the right.

When the flag is flown at half staff as a sign of mourning, it should be hoisted to full staff at the conclusion of the funeral.

The national salute is one gun for every State. The international salute is, under the law of nations, 21 guns.

* * * * * * *

When flags are used in unveiling a statue or monument they should not be allowed to fall to the ground, but should be carried aloft to wave out, forming a distinctive feature during the remainder of the ceremony.

PERSONAL SALUTES.	Guns.
The President of the United States	21
The sovereign or chief magistrate of a foreign country	21
An ex-President of the United States	21
The Vice President	19
Ambassadors	19
Members of the Cabinet	19
Governors of States, the Chief Justice, and Speaker of the House of Representatives	17

ORAL FLAG SALUTE IN SCHOOLS.

Primary department: "We give our heads and our hearts to God and our country; one country, one language, one flag."

Advanced pupils: "I pledge allegiance to my flag and to the Republic for which it stands; one Nation, indivisible, with liberty and justice for all."

SIZE OF FLAGS.

By Executive order promulgated May 29, 1916, it was ordered that national flags and union jacks for all departments of the Government, with the exception that the colors carried by troops shall be the sizes prescribed for the military service, shall conform to the following proportions:

Hoist (width) of flag	1
Fly (length) of flag	1.9
Hoist (width) of union	$\frac{7}{13}$
Fly (length) of union	.76
Width of each stripe	$\frac{1}{13}$

The size of the union jack shall be the size of the union of the national flag with which it is flown.

Mr. RANDALL. Mr. Speaker, in honor of the flag and in honor of the day which has been set apart for that purpose, I move that the House do now adjourn.

Mr. RAINEY. Mr. Speaker, I hope the gentleman will withhold that. I ask unanimous consent that when the House adjourn to-day it adjourn to meet at 10.30 a. m. to-morrow.

Mr. COX. Mr. Speaker, I will have to object to that.

The SPEAKER. The gentleman from Illinois asks unanimous consent that when the House adjourns to-day it adjourn to meet at 10.30 a. m. to-morrow.

Mr. MADDEN. Mr. Speaker, I object.

Mr. RAINEY. Mr. Speaker, I modify the request, and ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 a. m. to-morrow.

Mr. MADDEN. I object.

The SPEAKER. The gentleman from Illinois objects.

Mr. RAINEY. Mr. Speaker, I move that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow.

Mr. STAFFORD. Mr. Speaker, I raise the point of order——

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 291. An act to punish acts of interference with the foreign relations, the neutrality, and the foreign commerce of the United States, to punish espionage, and better to enforce the criminal laws of the United States, and for other purposes; and

H. R. 3971. An act making appropriations to supply urgent deficiencies in appropriations for the Military and Naval Establishments on account of war expenses for the fiscal year ending June 30, 1917, and for other purposes.

EXTENSION OF REMARKS.

Mr. GREENE of Massachusetts. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. STAFFORD. To what, Mr. Speaker?

The SPEAKER. To the gentleman from Massachusetts [Mr. GREENE] extending his remarks in the RECORD. [After a pause.] The Chair hears no objection.

The Chair will state that a motion to adjourn takes precedence over a motion to adjourn to a time certain.

Mr. HICKS. Mr. Speaker, I ask unanimous consent to extend and revise my remarks in the RECORD.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

ADJOURNMENT.

Mr. SMALL. Will the gentleman from California [Mr. RANDALL] withhold his motion?

Mr. RANDALL. I will.

Mr. MADDEN. I renew the motion, Mr. Speaker.

Mr. RANDALL. Then I insist on the motion.

The SPEAKER. The gentleman from California [Mr. RANDALL] moves that the House adjourn out of respect to the American flag.

The motion was agreed to; accordingly (at 4 o'clock and 43 minutes p. m.) the House adjourned until to-morrow, Friday, June 15, 1917, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

By Mr. FERRIS, from the Committee on the Public Lands, to which was referred the bill (H. R. 4617) to authorize absence by homestead settlers and entrymen, and for other purposes, reported the same without amendment, accompanied by a report (No. 80), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. LENROOT: A bill (H. R. 5022) to amend section 2 of the act of April 28, 1904 (chap. 1759, 33d Stats., p. 440), as amended by section 13 of the act of May 18, 1916 (chap. 126, 58th Cong., 2d sess.), relating to postal rates; to the Committee on the Post Office and Post Roads.

By Mr. HICKS: A bill (H. R. 5023) authorizing the Secretary of War to deliver to Washington Camp No. 48, Patriotic Order Sons of America, one condemned bronze or brass cannon or field-piece; to the Committee on Military Affairs.

By Mr. MILLER of Minnesota: A bill (H. R. 5024) granting the consent of Congress to the counties of Itasca and Cass, Minn., to construct a bridge across the Mississippi River in said counties; to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 5025) granting the consent of Congress to the counties of Cass and Itasca, Minn., to construct a bridge across the Mississippi River, between said counties; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER: A bill (H. R. 5026) granting an increase of pension to Edward Lewey; to the Committee on Invalid Pensions.

By Mr. ASHBROOK: A bill (H. R. 5027) granting an increase of pension to Charles C. Newman; to the Committee on Invalid Pensions.

By Mr. CLARK of Pennsylvania: A bill (H. R. 5028) for the relief of Anson Martin Hartson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 5029) granting a pension to Bridget E. Reid; to the Committee on Pensions.

By Mr. FORDNEY: A bill (H. R. 5030) granting a pension to Floyd H. Wilkins; to the Committee on Pensions.

By Mr. MONTAGUE: A bill (H. R. 5031) granting a pension to Mary E. Williams, widow of Moses Williams, late of the United States Marine Corps; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ALEXANDER: Petition of Messrs. L. M. Shanks, M. B. Hayden, E. M. Eager, C. J. Moore, G. L. Brummitt, R. E. Butterfield, Fred Shanks, N. B. Brummitt, and Earl Eaber, of Excelsior Springs, Mo., favoring the prohibition of the liquor business as a war measure; to the Committee on the Judiciary.

By Mr. BATHRICK: Petition of sundry members of the First Congregational Church of Akron, Ohio, favoring national prohibition; to the Committee on the Judiciary.

By Mr. BLACKMON: Petition of the Baraca Class of the Church Street Methodist Church, Selma, Ala., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. BURROUGHS: Petition of the faculty and students of New Hampshire College, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. DALE of New York: Petition of the New York Lumber Trade Association, of New York, favoring the passage of H. R. 4630, food administration; to the Committee on Agriculture.

Also, petition of the Crockery Board of Trade, of New York, against an increase in letter postage; to the Committee on Ways and Means.

By Mr. ESCH: Petition of members of Sheboygan Classes of the Reformed Church in the United States, relative to moral influence for soldiers in training camps and garrisons; to the Committee on Military Affairs.

Also, petition of the Wisconsin Woman's Suffrage Association, urging the creation of zones around all military camps; to the Committee on Military Affairs.

By Mr. FITZGERALD: Petition of sundry citizens of Brooklyn, N. Y., protesting against national prohibition; to the Committee on the Judiciary.

By Mr. FULLER of Illinois: Petition of L. R. Havens and 48 other citizens of De Kalb, Ill., favoring national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. KELLY of Pennsylvania: Petition of sundry citizens of Edgewood and membership of 12 churches in Philadelphia, Pa., favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. KENNEDY of Rhode Island: Resolutions of the Rhode Island State Federation of Women's Clubs, favoring the establishment of an effective zone about all military camps in which all liquor and all prostitutes shall be forbidden; to the Committee on Military Affairs.

Also, petition of Walter Scott Belcher, of Providence, R. I., favoring the daylight-saving plan; to the Committee on Interstate and Foreign Commerce.

Also, petition of Burroughs & Kenyon (Inc.), of Providence, R. I., protesting against the Pardwick amendment to the Federal reserve act; to the Committee on Banking and Currency.

Also, petition of the Rhode Island Liquor Dealers' Association, protesting against the passage of prohibition legislation; to the Committee on the Judiciary.

Also, petition of the Young Peoples' Branch of the Woman's Christian Temperance Union of Central Falls, in the State of Rhode Island, favoring national prohibition as a war measure; to the Committee on the Judiciary.

Also, petition of the Rhode Island Baptist Sunday School Convention, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. LUNN: Petition of Ray B. Williams and members of the official board of the Canajoharie (N. Y.) Methodist Episcopal Church, praying that the manufacture and sale of all spiritous and malt liquors, beer and wine included, be prohibited for and during the period of the war; to the Committee on the Judiciary.

Also, petition of Frederick Perkins and sundry citizens of St. Johnsville, N. Y., praying for national prohibition during the period of the war; to the Committee on the Judiciary.

Also, petition of Rev. G. H. C. Bain and sundry members of the Methodist Church of Fort Johnson, N. Y., praying for prohibition of the manufacture of alcoholic liquors as a measure of food conservation and for immediate prohibition of the sale of liquors for beverage purposes in order to conserve the health, wealth, labor, transport facilities, and military efficiency of the people; to the Committee on the Judiciary.

Also, petition of J. S. Parent, M. D., of Galway, N. Y., praying for national prohibition during the period of the war, at least; to the Committee on the Judiciary.

Also, petition of Robert L. Thompson and sundry citizens of Johnstown, N. Y., praying for prohibition of the manufacture of alcoholic liquors as a measure of food conservation and for immediate prohibition of the sale of liquors for beverage purposes in order to conserve the health, wealth, labor, transport facilities, and military efficiency of the people; to the Committee on the Judiciary.

By Mr. MAGEE: Petition of residents of Pompey, N. Y., favoring national prohibition; to the Committee on the Judiciary.

By Mr. MORIN: Petition of Division No. 6, of the Ancient Order of Hibernians, of Pittsburgh, Pa., reaffirming the loyalty of the Irish race, and urging the Government to insist upon England removing her forces from Ireland, and renouncing all claim to rule over an unwilling people; to the Committee on Foreign Affairs.

By Mr. NOLAN: Petition of the College of the Pacific, San Jose, and San Francisco Theological Seminary, San Anselmo, Cal., stating that the existing Federal estate tax law provides no exemption for educational, philanthropic, and religious bequests, legacies, and gifts, but may tax them up to 30 per cent, and protesting against the same; also telegram from the University of California; to the Committee on Ways and Means.

By Mr. RANDALL: Petition of 14 churches of various denominations in Philadelphia, against the use of food supplies for the manufacture of alcoholic liquors; to the Committee on the Judiciary.

Also, petition of 40 citizens of Needles, 75 of Alhambra, and the Woman's Christian Temperance Union of Los Gatos, all in the State of California, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. ROBBINS: Petitions of sundry citizens and churches of the State of Pennsylvania, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. ROWE: Petition of the Publishers' Association of New York City, protesting against the new postal regulation proposed in the so-called war-revenue bill (H. R. 4280); to the Committee on Ways and Means.

Also, petition of Charles F. Mattlage & Sons, New York City, opposing any advance in letter postage until second-class matter has been advanced to the cost of service; to the Committee on Ways and Means.

Also, petition of Thomas J. Wood, Brooklyn, N. Y., protesting against the zone system of rates for second-class mail matter; to the Committee on Ways and Means.

Also, petitions of Arthur Brockus and Thomas F. Murphy, protesting against the proposed increase of second-class postage rates; to the Committee on Ways and Means.

Also, petition of John S. Sills & Sons, New York City, opposing any advance in letter postage until second-class matter has been advanced to the cost of the service; to the Committee on Ways and Means.

By Mr. SANDERS of New York: Petition of Ralph C. Palmer and 16 other residents of Perry, N. Y., favoring national prohibition as a war measure; to the Committee on Military Affairs.

Also, petition of C. D. Malay and 11 other residents of Spencerport, N. Y., favoring national prohibition as a war measure; to the Committee on Military Affairs.

Also, petition of Moses B. King and 11 other residents of Rochester, N. Y., favoring national prohibition as a war measure; to the Committee on Military Affairs.

Also, petition of the Kendall (N. Y.) Woman's Christian Temperance Union, consisting of 50 members, favoring the prohibition of the liquor traffic as a war measure; to the Committee on Military Affairs.

Also, petition of the Orleans County (N. Y.) Woman's Christian Temperance Union, with 1,000 members, favoring the prohibition of the liquor traffic as a war measure; to the Committee on Military Affairs.

By Mr. SWITZER: Petition of 21 citizens of McArthur and Athens County Dry Federation, of Athens, Ohio, favoring national prohibition as a war measure; to the Committee on the Judiciary.

By Mr. TEMPLE: Petition of Lawrence County Sabbath School Convention, favoring national prohibition in view of present war situation; to the Committee on the Judiciary.

By Mr. TOWNER: Petition of E. J. Laird and 26 others of Weldon, Iowa, favoring prohibition as a war measure; to the Committee on the Judiciary.

By Mr. VESTAL: Memorial of the Grand Council of Indiana of the United Commercial Travelers of America at Richmond, Ind., favoring prohibition as a war measure; to the Committee on the Judiciary.

Also, memorial of the Grand Council of Indiana of the United Commercial Travelers of America, urging an advance of second-class mail rates before any advance in first-class mail rates; to the Committee on Ways and Means.

Also, memorial of the Woman's Benefit Association of the Maccabees of Alexandria, Ind., urging woman suffrage; to the Committee on the Judiciary.

By Mr. WARD: Petition of 2,500 citizens of Kingston; Floyd B. Garrison and 180 citizens of Ellenville; W. W. Proper and other citizens of Schoharie, White Lake, Mongano Valley, and Hurd, all in the State of New York, favoring prohibition as a war measure; to the Committee on the Judiciary.

SENATE.

FRIDAY, *June 15, 1917.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we call upon Thee for Thy guidance this day. In the mighty task Thou hast committed to our hands we desire not only to put into it our human strength but such force as can be measured only by the inspiration and powers that come out of the devotion of the human spirit to the name of the living God. May we be sure that every step that we take is in conformity to Thy will. May we ever keep clearly before us the vision of the Gospel of Jesus Christ for the establishment of righteousness and justice in all the earth. Guide us this day. For Christ's sake. Amen.

The Journal of the proceedings of the legislative day of Tuesday, June 12, 1917, was read and approved.

THE ITALIAN MISSION.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Chamber of Commerce of the United States of America, which will be incorporated in the RECORD.

The communication is as follows:

CHAMBER OF COMMERCE OF THE UNITED STATES OF AMERICA,
Washington, D. C., June 13, 1917.

The honorable the PRESIDENT OF
THE SENATE OF THE UNITED STATES OF AMERICA,
Washington, D. C.

SIR: The American Chamber of Commerce for Italy, which has its offices in Milan, has sent to us a cable in which it requests that we express to the Senate, through you, its appreciation for the splendid reception given to the Italian mission and for the opportunity to improve Italo-American relations.

Very truly, yours, ELLIOT H. GOODWIN,
General Secretary.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by D. K. Hempstead, its enrolling clerk, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 3673) to amend the act approved December 23, 1913, known as the Federal reserve act, as amended by the acts of August 4, 1914, August 15, 1914, March 3, 1915, and September 7, 1916.

PETITIONS AND MEMORIALS.

Mr. CALDER presented a petition of the Board of Trade of Niagara Falls, N. Y., praying for the enactment of legislation for the establishment of national farm and labor training camps throughout the country, under Government jurisdiction, which was referred to the Committee on Agriculture and Forestry.

He also presented a petition signed by 519 citizens of Jamestown, N. Y., praying for the prohibition of the liquor business as a war measure and remonstrating against a war tax on the same, which was ordered to lie on the table.

He also presented a petition of sundry citizens of Williamson, N. Y., praying for national prohibition during the period of the war, which was ordered to lie on the table.

He also presented petitions of sundry citizens of New York and New Jersey, praying for the passage of the so-called daylight-saving bill, which were ordered to lie on the table.

Mr. JOHNSON of South Dakota presented telegrams in the nature of petitions from the congregation of the Methodist Church of Geddes, from the superintendent of the South Dakota Anti-Saloon League, and from Allen & Fairbanks, of Erwin, all in the State of South Dakota, praying for national prohibition as a war measure, which were ordered to lie on the table.

Mr. ROBINSON presented a petition of the City Council of Gillham, Ark., praying that a tax be imposed on all antimony ore, which was referred to the Committee on Finance.

Mr. PAGE presented a memorial of Local Union No. 191, International Brotherhood of Stationary Firemen, of Bellows Falls, Vt., remonstrating against the prohibition of the manufacture of foodstuffs into intoxicating liquors, which was referred to the Committee on Agriculture and Forestry.

Mr. NELSON presented a memorial of Plumbers' Local Union No. 34, of St. Paul, Minn., remonstrating against the repeal of the Federal child-labor law and the seamen's law as a war measure, which was referred to the Commitee on Commerce.

He also presented a petition of sundry citizens of Minnesota, praying for national prohibition as a war measure, which was ordered to lie on the table.

Mr. McLEAN presented a petition of sundry citizens of Shelton, Conn., praying that funds for war expenses be raised by placing taxes on incomes, which was referred to the Committee on Finance.

He also presented a memorial of the Connecticut State Association of Letter Carriers, remonstrating against the granting of contributory pensions, which was referred to the Committee on Post Offices and Post Roads.

He also presented petitions of the Connecticut State Medical Society; of the congregation of the Congregational Church of Shelton; of the Woman's Christian Temperance Union of Middlesex County; and of sundry citizens of Bristol, Hartford, and Portland, all in the State of Connecticut, praying for national prohibition, which were ordered to lie on the table.

Mr. SHEPPARD presented a memorial of the City Board of Missions, of Houston, Tex., and a memorial of the Sunday School of the First Methodist Episcopal Church South of Marshall, Tex., remonstrating against the taxing of, and praying for the prohibition of, the liquor business as a war measure, which were ordered to lie on the table.

Mr. PHELAN presented a memorial of the Chamber of Commerce of San Francisco, Cal., remonstrating against the passage of the bill (S. 2356) to amend an act to regulate commerce, as amended, and for other purposes, which was ordered to lie on the table.

TRANS-PACIFIC ORIENTAL TRADE.

Mr. PHELAN. I desire to present for publication in the RECORD a statement made by the Chamber of Commerce of San Francisco, Cal., on the decline of the American merchant marine in the Pacific since 1914, the year of the war.

It is an astonishing statement. In 1914 American tonnage was 33 per cent of the total, and Japanese 56 per cent; in 1917 the American tonnage declined to 8 per cent and the Japanese

increased to 74 per cent. Action to restore our ships is imperative.

The table will show in detail the fact which I lay before the Senate. I ask that the statement be referred to the Committee on Commerce.

There being no objection, the statement was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

SAN FRANCISCO CHAMBER OF COMMERCE,
June 8, 1917.

Hon. JAMES D. PHELAN,
Washington, D. C.

MY DEAR SENATOR: We inclose detailed statement of vessels reported in the trans-Pacific trade November, 1914, and June, 1917, which is self-explanatory.

This is sent to you in connection with our efforts to have the interned German vessels at Manila turned over for operation to the only American-owned company on the coast, namely, the Pacific Mail Steamship Co.

In view of the great importance of the matter in order to provide ships for bringing in the raw materials necessary for war supplies, we urge that you personally call on the chairman of the Shipping Board, present these papers, and urge immediate and favorable action in the interest not only of San Francisco and the Pacific coast but of the entire Nation.

Unless shipping facilities are promptly provided, we greatly fear munition factories will shortly shut down for want of raw products.

Yours, very truly,

SAN FRANCISCO CHAMBER OF COMMERCE,
ROBERT NEWTON LYNCH,
Vice President and Manager.

List of steam vessels, with nationalities, not including tankers, in trans-Pacific (oriental) trade in November, 1914, and June, 1917.

A WAR GOVERNMENT.

Mr. SHERMAN. I present a communication in the nature of a memorial. It is an editorial from the Chicago Tribune of June 14, 1917. I ask that it be printed in the RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

[From the Chicago Tribune, June 14, 1917.]

FOR A WAR GOVERNMENT.

The wisdom of urging the formation of a war government by President Wilson is impressive. By discarding the party scheme, which prevents the selection of the best men in the country, the President could organize a government which would command confidence and, we think, retain it.

This is not a war government. The men who manage or who are supposed to manage the country's affairs in this most difficult and dangerous period were not chosen for their preeminent ability in the work which they now have to do.

The President may have been convinced, and may be convinced, that he selected able men of peculiar ability in the work he gave them, but he can hardly be convinced that he has the best men in the country, and he must be convinced that the country needs the best men.

With regard to Secretary Daniels, it is certain that the country has small confidence in his ability to administer Navy affairs. Daniels is an amiable man, energetic, and no doubt conscientious; but if he was not the man for the Navy before the war, what possible opinion could be held of his fitness now?

The Government ought to utilize Theodore Roosevelt. The country must be inspired and its confidence must be strengthened. Roosevelt's worst enemies will concede that he has a dynamic effect upon morale. He knows how to develop enthusiasm. He also is an executive. He knows the Navy.

We are not selecting places for the colonel; but we know that he ought to be used, and if he succeeded Daniels it would be known that the Government had but one intent, and that to win the war.

Great Britain could not conduct the war upon party lines, and did not try to do so very long. It could not conduct the war without the aid of its best men, and the process of elimination went on, regardless of party and personality, until men were fitted in where they belonged.

We shall be forced to do the same thing, we believe, and the wisdom of doing it early seems undeniable.

REPORTS OF COMMITTEES.

Mr. WADSWORTH, from the Committee on Military Affairs, to which was referred the bill (S. 979) for the promotion and retirement of Col. David L. Brainard, Quartermaster Corps, United States Army, reported it without amendment and submitted a report (No. 64) thereon.

Mr. NELSON, from the Committee on Commerce, to which was referred the bill (S. 1004) to provide for the retirement of officers and employees of the Bureau of Lighthouses and the Lighthouse Service, reported it with an amendment and submitted a report (No. 56) thereon.

He also, from the same committee, to which was referred the bill (S. 1005) to regulate the salaries of keepers of lighthouses, reported it with an amendment and submitted a report (No. 57) thereon.

PORT OF NORTHGATE, N. DAK.

Mr. McCUMBER. From the Committee on Finance I report back favorably with an amendment the bill (S. 2203) for the establishment of Northgate, in the State of North Dakota, as a port of entry and delivery for immediate transportation without appraisement of dutiable merchandise, and I submit a report (No. 54) thereon. I ask unanimous consent for the immediate consideration of the bill.

There being no objection, the bill was considered as in Committee of the Whole.

The amendment was, in line 3, after the word "first," to strike out the words "and seventh sections" and insert the word "section," so as to make the bill read:

Be it enacted, etc., That the privileges of the first section of the act approved June 10, 1880, governing the immediate transportation of dutiable merchandise without appraisement, be, and are hereby, extended to the port of Northgate, in the State of North Dakota.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

LANDS FOR MILITARY PURPOSES.

Mr. KIRBY. For the Committee on Military Affairs I report back favorably without amendment the bill (S. 2453) to authorize condemnation proceedings of lands for military purposes, and I submit a report (No. 55) thereon. I ask for the immediate consideration of the bill, as the public interest requires it.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. THOMAS. Let the bill be read.

The Secretary read the bill, as follows:

Be it enacted, etc., That hereafter the Secretary of War may cause proceedings to be instituted in the name of the United States, in any court having jurisdiction of such proceedings for the acquirement by condemnation of any land, or right pertaining thereto, needed for the site, location, construction, or prosecution of works for fortifications and coast defenses, military training camps, and other military purposes, such proceedings to be prosecuted in accordance with the laws relating to suits for the condemnation of property of the States wherein the proceedings may be instituted: *Provided*, That when the owner of such land or rights pertaining thereto shall fix a price for the same, which, in the opinion of the Secretary of War, shall be reasonable, he may purchase the same at such price without further delay: *Provided further*, That the Secretary of War is hereby authorized to accept on behalf of the United States donations of land and the rights pertaining thereto required for the above-mentioned purposes.

Mr. THOMAS. I have no objection to the bill.

Mr. KIRBY. There is no provision made under the law for acquiring by condemnation military training-camp sites, and it becomes necessary now to extend the law so that that may be done. I hope there will be no objection to the passage of the bill.

Mr. SMITH of Michigan. Let me ask the Senator from Arkansas if the bill does not go further than he suggests?

Mr. KIRBY. No. The old law provides for sites for coast-defense fortifications, and this only extends it to military training camps and other military purposes. It is an amendment to the old law.

Mr. SMITH of Michigan. Military training camps and other purposes?

Mr. KIRBY. That is the sole purpose of it. It would be a purpose of a like kind, of course.

Mr. SMITH of Michigan. Of course, the phrase "other purposes" gives a rather wide scope.

Mr. KIRBY. "Other military purposes." The bill limits it to other military purposes.

Mr. SMITH of Michigan. It leaves the whole question of acquiring training grounds to the Secretary of War.

Mr. ROBINSON. If my colleague will allow me, the purpose of the bill is to provide a general law whereby condemnation may be made of land in a State for military purposes generally. I think the language should be broad enough to comprehend other purposes than military training camps. Otherwise they will have to come back here and ask for the passage of another act whenever it becomes necessary to condemn land for additional purposes.

Mr. SMITH of Michigan. It is a very radical departure from the established policy of the Government to confer this wide discretionary power upon the Secretary of War. Of course, if it is necessary that it should be done, I shall not oppose it, but I merely wish to suggest that the scope of the bill is much more far-reaching than appears from a casual reading. They can go into any State and without any further authority upon the part of Congress may lay hold of any piece of property which incidentally or otherwise is related to the Military Establishment of the country, buy or condemn it, and come to Congress for the money. Under that authority the Secretary of War could have purchased the Jamestown Exposition site and paid $2,000,000 for it without coming to Congress until he had committed the Government irrevocably. Under that authority he can purchase any number of sites without the consent of Congress. We simply absolve ourselves deliberately from responsibility. If that is the disposition of the Senate, the sooner we understand it the better.

Mr. KIRBY. I think the Senator labors under a misapprehension. The bill proposes only to amend the law as it now stands in the two particulars I have mentioned in order to allow condemnation for military training camps and other military purposes. The old law provided that after condemnation proceedings were begun the Secretary of War might negotiate or settle if they could agree on a price. We have not changed that in any respect whatever.

The War Department has recommended a bill somewhat similar to this bill which had already been introduced. There is no statute warranting condemnation of lands for this purpose at this time. We framed this to follow the old law and permit the condemnation proceedings under the laws as they exist in each State where camps are located, thinking there would be less confusion about it. There is no objection from any quarter, as I understand it, and there is no disposition to do anything except to get some training-camp locations. Some people who have agreed to donate land and to sell land at a particular price have refused to part with it and are holding it, and the Government is powerless to condemn the land for a military training camp under the law as it exists to-day. This is a general law to relieve that condition and to provide adequate compensation for the man whose property is taken.

Mr. SMITH of Michigan. If this is to be done, I personally would as soon trust such discretionary power to the present Secretary of War as any Secretary we have ever had. I have great confidence in him, but why should Congress absolve itself from responsibility? Sometime the people will demand an accounting and we can not justify ourselves if we fail to perform our constitutional duty to the people who sent us here.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. NEWLANDS. I ask unanimous consent that we proceed to the consideration of Senate bill 2356, the unfinished business.

Mr. SMOOT. I ask that the regular order be proceeded with until the morning business is closed.

The VICE PRESIDENT. Are there further reports of committees?

REPORTS OF COMMITTEE ON COMMERCE.

Mr. FLETCHER, from the Committee on Commerce, to which was referred the bill (S. 993) to authorize aids to navigation and for other works in the Lighthouse Service, and for other purposes, reported it with amendment and submitted a report (No. 58) thereon.

He also, from the same committee, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (S. 1544) to provide for appeals from decisions of boards of local inspectors of steam vessels, and for other purposes (Rept. No. 59);

A bill (S. 1545) to amend the act of March 3, 1913, entitled "An act to regulate the officering and manning of vessels subject to the inspection laws of the United States" (Rept. No. 60);

A bill (S. 1546) to permit the use of certain refined products of petroleum as stores on steam vessels carrying passengers (Rept. No. 61);

A bill (S. 1547) to amend section 5 of the motor-boat law approved June 9, 1910 (Rept. No. 62); and

A bill (S. 1549) to require numbering and recording of undocumented vessels (Rept. No. 63).

EMPLOYMENT OF STENOGRAPHER.

Mr. THOMPSON, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution 83, submitted by Mr. WALSH on the 14th instant, reported it favorably without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Committee on Mines and Mining, or any subcommittee thereof, be, and hereby is, authorized during the Sixty-fifth Congress to send for persons, books, and papers; to administer oaths, and to employ a stenographer at a cost not exceeding $1 per printed page; to report such hearings as may be had in connection with any subject which may be pending before said committee, the expense thereof to be paid out of the contingent fund of the Senate, and that the committee, or any subcommittee thereof, may sit during the sessions or recess of the Senate.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMITH of Georgia:

A bill (S. 2455) to amend an act entitled "An act to provide for the promotion of vocational education; to provide for cooperation with the States in the promotion of such education in agriculture and the trades and industries; to provide for cooperation with the States in the preparation of teachers of vocational subjects; and to appropriate money and regulate its expenditures"; to the Committee on Education and Labor.

By Mr. WADSWORTH:

A bill (S. 2456) authorizing Brig. Gen. Theodore A. Bingham, United States Army, retired, to accept the decoration of the Legion of Honor of France; to the Committee on Foreign Relations.

By Mr. CALDER:

A bill (S. 2457) fixing the compensation of United States customs inspectors; to the Committee on Commerce.

By Mr. HARDING:

A bill (S. 2458) granting a pension to Robert Byrnes; to the Committee on Pensions.

By Mr. UNDERWOOD:

A bill (S. 2459) amending the act of June 3, 1916, entitled "An act for making further and more effectual provision for the national defense, and for other purposes"; to the Committee on Military Affairs.

By Mr. MYERS:

A bill (S. 2460) authorizing the issuance of patent to the Milk River Valley Gun Club; to the Committee on Public Lands.

By Mr. POINDEXTER:

A bill (S. 2461) appropriating the sum of $500 for the erection of a suitable monument over the grave of the Indian "Spokane Garry"; and

A bill (S. 2462) appropriating the sum of $200,000 to be paid to the individuals of the Clallam Tribe of Indians residing in the State of Washington; to the Committee on Indian Affairs.

By Mr. WARREN:

A bill (S. 2464) for the relief of the Merchants Transfer & Storage Co., of Washington, D. C.; to the Committee on Claims.

By Mr. SHEPPARD:

A joint resolution (S. J. Res. 79) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

CONSERVATION OF FOOD AND FUEL.

Mr. CHAMBERLAIN. Mr. President, I desire to introduce what is known as the conservation food bill. I claim no originality for it. It is known as the Lever bill in the House. I present it to the Senate in exactly the same form as it was reported from the committee in the House to the House of Representatives. The bill has been printed in the RECORD, and I ask that it be referred to the Committee on Agriculture and Forestry.

The bill (S. 2463) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel, was read twice by its title and referred to the Committee on Agriculture and Forestry.

Mr. CHAMBERLAIN. I ask that the report of the Committee on Agriculture of the House be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

[H. Rept. No. 75, 65th Cong., 1st sess.]

CONSERVATION OF FOOD AND FUEL.

Mr. LEVER, from the Committee on Agriculture, submitted the following report (to accompany H. R. 4961):

The Committee on Agriculture, to whom was referred the bill (H. R. 4961) to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel, having considered the same, report thereon with the recommendation that it do pass.

The bill deals with foods, feeds, fuel, and articles required for their production, which are designated as necessaries. Its purposes, broadly stated, are to stimulate production, to reduce waste, to facilitate and clear the channels of distribution, to prevent hoarding, to assure fair prices, to eliminate injurious speculation, and to prohibit evil practices on exchanges. The necessity for accomplishing these aims, as a means to the successful prosecution of the war, is generally recognized and understood.

The bill is a war emergency measure and rests primarily upon the war powers conferred on Congress by the Constitution. Its provisions are intended to operate throughout the United States irrespective of State lines.

Section 1 contains a finding by Congress that the legislation incorporated in the bill is essential by reason of the existing war emergency.

Section 2 defines the word "person" and lays down certain rules of construction applicable to the act.

Section 3 establishes a governmental control of necessaries, and declares all necessaries, and processes, methods, and activities concerning the same, to be affected with a public interest. It authorizes the President to enter into voluntary arrangements to accept services without compensation, to cooperate with any agency or person, and to utilize and coordinate the activities of departments and agencies.

Section 4 declares certain acts and practices in connection with the handling, use, and distribution of necessaries to be unlawful. It lays the legal basis for succeeding sections which provide specifically for the enforcement of the provisions of this section.

Section 5 authorizes the President to license and regulate any business of importation exportation, manufacture, storage, or distribution of necessaries, in order to prevent uneconomical manufacture and inequitable distribution and otherwise to carry out the purposes of the act. The section expressly exempts farmers, gardeners, and others with respect to products of farms, gardens, and other lands owned, leased, or cultivated by them; retailers with respect to the retail business actually conducted by them; and common carriers.

Section 6 defines hoarding and provides punishment therefor. It expressly exempts any accumulating or withholding by any farmer, gardener, or any other person of the products of any farm, garden, or other land owned, leased, or cultivated by him.

Section 7 authorizes proceedings by the Government, in any district court of the United States, to seize and condemn hoarded necessaries, and empowers the court to direct their sale in such manner as to provide the most equitable distribution thereof, the net proceeds of the sale to go to the party entitled thereto.

Section 8 provides for the punishment of any person who willfully destroys any necessaries for the purpose of enhancing the price or restricting the supply.

Section 9 authorizes the President to purchase or provide for the production or manufacture of necessaries, to store and provide storage facilities for them, and to sell them; also to requisition necessaries and storage space therefor and to fix reasonable prices to be paid for the same by the Government, such prices to be subject to review by the courts. It is expressly provided that no natural person shall be required to furnish to the Government any necessaries held by him and reasonably required for consumption by himself and dependents for a reasonable time.

Section 10 provides that whenever the President finds it impossible by license or voluntary arrangement to assure an adequate and continuous supply of necessaries, he may requisition, take over, and operate any factory, mine, or other plant, or any part thereof, in which necessaries are or may be manufactured, produced, prepared, or mined. Just compensation therefor is provided, subject to review by the courts.

Section 11 authorizes the President to prescribe regulations governing, or either wholly or partly to prohibit, operations, practices, and transactions on, or subject to the rules of, exchanges on which necessaries are dealt in, in order to prevent undue enhancement or fluctuation of prices, injurious speculation, unjust market manipulations, and unfair and misleading market quotations. He may also require records to be kept and reports to be made of all such transactions.

Section 12 authorizes the President, when he finds that an emergency exists requiring stimulation of production, to fix, from time to time, a reasonable, guaranteed price for any necessaries, in order to assure the producer a reasonable profit. The Government guarantees the receipt of the price by domestic producers who rely upon the guaranty and comply with the President's regulations. Whenever the President shall find that the importation of necessaries produced outside of the United States seriously interferes, or is likely seriously to interfere, with the practical operation of the guaranteed price plan, or materially enhances or is likely materially to enhance the liabilities of the United States under any price guaranty, there is levied a duty upon importations of such necessaries at a rate to be ascertained and proclaimed by the President, which, when added to the value of the article at the time of entry, will be sufficient to bring its price up to the guaranteed price. In no case shall such rate be less than the rate fixed by existing tariffs. In order to make the guaranty effective, the President is authorized to purchase products covered thereby, and to use or dispose of them.

Section 13 provides that when the President shall find that limitation, regulation, or prohibition of the use of foods, food materials, or feeds in the production of alcohol or of alcoholic and nonalcoholic beverages, or that reduction of the alcoholic content of any beverage, is essential in order to assure an adequate and continuous supply of food, he is authorized, from time to time, to prescribe the extent of the limitation, regulation, prohibition, or reduction so necessitated and to give notice thereof.

Section 14 authorizes the President, in carrying out the purposes of the act, to create agencies, to accept services without compensation, to cooperate with any agency or person, to utilize any department or agency of the Government, and to coordinate their activities.

Section 15 authorizes the President to extend the franking privilege for exclusively official business in carrying out the purposes of the act to any agency or person designated by him.

Section 16 authorizes the President to make regulations and issue orders to carry out the purposes of the act.

Section 17 provides for the punishment of any person who willfully interferes with any officer, employee, or agent of the United States in the execution of any duty under the act.

Section 18 appropriates $2,500,000, available immediately and until expended, for the payment of rent, the expense of printing and publications, the purchase of material and equipment, and the employment of persons and means in the city of Washington and elsewhere.

Section 19 appropriates $150,000,000, available immediately and until expended, for the expenses of carrying out the provisions of the act other than those enumerated in section 18.

Section 20 declares that if any part of the act shall be adjudged by any court to be invalid, such judgment shall not invalidate the remainder of the act.

Section 21 limits the duration of the act to the period of the war and not exceeding one year thereafter. It provides that nothing in the section shall be construed to prevent the fulfillment by the United States of any legal obligation incurred pursuant to the act which shall be in force when the act ceases to be in effect.

Appropriate penalties are provided for willful violations of sections 5, 6, 8, 11, 13, and 17.

BUILDINGS AT MILITARY CANTONMENTS.

Mr. STERLING. I submit a resolution, which I send to the desk and ask to have read.

The Secretary read the resolution (S. Res. 85), as follows:

Resolved, That the Committee on Military Affairs be, and is hereby, directed to at once make inquiry and investigation as to buildings constructed or to be constructed at the various cantonments lately designated and established on the order or approval of the Secretary of War throughout the United States for the mobilization of troops, and that such inquiry relate to the following:

(1) The kind and character of buildings constructed or to be constructed at such cantonments, including the material entering into such construction;

(2) The estimated cost of such construction at each of the various cantonments;

(3) The nature and basis of the contract or contracts entered or to be entered into by the War Department for such construction, and the guarantees for the performances thereof by the contractors, together with the basis of compensation for such contractors;

(4) The wages or compensation paid per diem or otherwise to carpenters and mechanics engaged in such construction as compared with the usual and ordinary wages for like labor or services; and

(5) The price paid for material used in such construction as compared with the average market price of like material.

And that said committee make such investigation and report thereon to the Senate at the earliest practicable date.

Mr. STERLING. I ask unanimous consent for the immediate consideration of the resolution.

The VICE PRESIDENT. Is there objection?

Mr. FLETCHER. Mr. President, it strikes me that the resolution ought to go to the Committee on Military Affairs. The committee ought to determine whether or not it can make the investigation. If it has to be made, there may have to be some special provision for covering the expenses of it, and so forth. I think the resolution ought to be referred.

Mr. STERLING. It is merely a direction to the Committee on Military Affairs, and it seems to me there ought to be the action of the Senate on the question as to whether or not to give that direction.

Mr. CHAMBERLAIN. Mr. President, the committee can report the resolution promptly, and then the Senate can take such action with reference to it as it desires. I think it best to allow the resolution to go to the committee to be first considered.

Mr. STERLING. On the statement of the Senator from Oregon, I will consent to the reference of the resolution to the Committee on Military Affairs.

The VICE PRESIDENT. The resolution will be referred to the Committee on Military Affairs and printed.

PROPOSED COMMITTEE ON AERONAUTICS.

Mr. SHEPPARD. Pursuant to the notice which I gave on yesterday, I submit the following resolution and ask that it be referred to the Committee on Rules.

The resolution (S. Res. 86) was read and referred to the Committee on Rules, as follows:

Resolved, That the standing rules of the Senate be, and they hereby are, amended as follows:

Amend Rule XXV by inserting after the paragraph reading as follows:

A committee on additional accommodations for the Library of Congress, to consist of five Senators, the following paragraph:

A committee on aeronautics, to consist of 17 Senators.

AMENDMENT OF THE FEDERAL RESERVE ACT—CONFERENCE REPORT (S. DOC. NO. 46).

Mr. OWEN. I submit the conference report on the bill H. R. 3673, known as the Federal reserve act, which I ask to have printed and lie on the table.

The conference report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 3673) to amend the act approved December 23, 1913, known as the Federal reserve act, as amended by the acts of August 4, 1914, August 15, 1914, March 3, 1915, and September 7, 1916, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment as follows: In lieu of the amendment proposed by the Senate insert the following:

"That section 3 of the act known as the Federal reserve act be amended and reenacted so as to read as follows:

"'SEC. 3. The Federal Reserve Board may permit or require any Federal reserve bank to establish branch banks within the Federal reserve district in which it is located or within the district of any Federal reserve bank which may have been suspended. Such branches, subject to such rules and regulations as the Federal Reserve Board may prescribe, shall be operated under the supervision of a board of directors to consist of not more than seven nor less than three directors, of whom a majority of one shall be appointed by the Federal reserve bank of the district, and the remaining directors by the Federal Reserve Board. Directors of branch banks shall hold office during the pleasure of the Federal Reserve Board.'

"SEC. 2. That section 4 in the paragraph relating to the appointment of class C directors and prescribing their duties be amended and reenacted so as to read as follows:

"'Class C directors shall be appointed by the Federal Reserve Board. They shall have been for at least two years residents of the district for which they are appointed, one of whom shall be designated by said board as chairman of the board of directors of the Federal reserve bank and as "Federal reserve agent." He shall be a person of tested banking experience, and in addition to his duties as chairman of the board of directors of the Federal reserve bank he shall be required to maintain, under regulations to be established by the Federal Reserve Board, a local office of said board on the premises of the Federal reserve bank. He shall make regular reports to the Federal Reserve Board and shall act as its official representative for the performance of the functions conferred upon it by this act. He shall receive an annual compensation to be fixed by the Federal Reserve Board and paid monthly by the Federal reserve bank to which he is designated. One of the directors of class C shall be appointed by the Federal Reserve Board as deputy chairman to exercise the powers of the chairman of the board when necessary. In case of the absence of the chairman and deputy chairman, the third class C director shall preside at meetings of the board.

"'Subject to the approval of the Federal Reserve Board, the Federal reserve agent shall appoint one or more assistants. Such assistants, who shall be persons of tested banking experience, shall assist the Federal reserve agent in the performance of his duties and shall also have power to act in his name and stead during his absence or disability. The Federal Reserve Board shall require such bonds of the assistant Federal reserve agents as it may deem necessary for the protection of the United States. Assistants to the Federal reserve agent shall receive an annual compensation, to be fixed and paid in the same manner as that of the Federal reserve agent.'

"SEC. 3. That section 9 be amended and reenacted so as to read as follows:

"'SEC. 9. Any bank incorporated by special law of any State, or organized under the general laws of any State or of the United States, desiring to become a member of the Federal Reserve System, may make application to the Federal Reserve

Board, under such rules and regulations as it may prescribe, for the right to subscribe to the stock of the Federal reserve bank organized within the district in which the applying bank is located. Such application shall be for the same amount of stock that the applying bank would be required to subscribe to as a national bank. The Federal Reserve Board, subject to such conditions as it may prescribe, may permit the applying bank to become a stockholder of such Federal reserve bank.

"'In acting upon such applications the Federal Reserve Board shall consider the financial condition of the applying bank, the general character of its management, and whether or not the corporate powers exercised are consistent with the purposes of this act.

"'Whenever the Federal Reserve Board shall permit the applying bank to become a stockholder in the Federal reserve bank of the district its stock subscription shall be payable on call of the Federal Reserve Board, and stock issued to it shall be held subject to the provisions of this act.

"'All banks admitted to membership under authority of this section shall be required to comply with the reserve and capital requirements of this act and to conform to those provisions of the law imposed on national banks which prohibit such banks from lending on or purchasing their own stock, which relate to the withdrawal or impairment of their capital stock, and which relate to the payment of unearned dividends. Such banks and the officers, agents, and employees thereof shall also be subject to the provisions of and to the penalties prescribed by section 5209 of the Revised Statutes, and shall be required to make reports of condition and of the payment of dividends to the Federal reserve bank of which they become a member. Not less than three of such reports shall be made annually on call of the Federal reserve bank on dates to be fixed by the Federal Reserve Board. Failure to make such reports within 10 days after the date they are called for shall subject the offending bank to a penalty of $100 a day for each day that it fails to transmit such report; such penalty to be collected by the Federal reserve bank by suit or otherwise.

"'As a condition of membership such banks shall likewise be subject to examinations made by direction of the Federal Reserve Board or of the Federal reserve bank by examiners selected or approved by the Federal Reserve Board.

"'Whenever the directors of the Federal reserve bank shall approve the examinations made by the State authorities, such examinations and the reports thereof may be accepted in lieu of examinations made by examiners selected or approved by the Federal Reserve Board: *Provided, however*, That when it deems it necessary the board may order special examinations by examiners of its own selection and shall in all cases approve the form of the report. The expenses of all examinations, other than those made by State authorities, shall be assessed against and paid by the banks examined.

"'If at any time it shall appear to the Federal Reserve Board that a member bank has failed to comply with the provisions of this section or the regulations of the Federal Reserve Board made pursuant thereto, it shall be within the power of the board after hearing to require such bank to surrender its stock in the Federal reserve bank and to forfeit all rights and privileges of membership. The Federal Reserve Board may restore membership upon due proof of compliance with the conditions imposed by this section.

"'Any State bank or trust company desiring to withdraw from membership in a Federal reserve bank may do so, after six months' written notice shall have been filed with the Federal Reserve Board, upon the surrender and cancellation of all of its holdings of capital stock in the Federal reserve bank: *Provided, however*, That no Federal reserve bank shall, except under express authority of the Federal Reserve Board, cancel within the same calendar year more than 25 per cent of its capital stock for the purpose of effecting voluntary withdrawals during that year. All such applications shall be dealt with in the order in which they are filed with the board. Whenever a member bank shall surrender its stock holdings in a Federal reserve bank, or shall be ordered to do so by the Federal Reserve Board, under authority of law, all of its rights and privileges as a member bank shall thereupon cease and determine, and after due provision has been made for any indebtedness due or to become due to the Federal reserve bank it shall be entitled to a refund of its cash paid subscription with interest at the rate of one-half of 1 per cent per month from date of last dividend, if earned, the amount refunded in no event to exceed the book value of the stock at that time, and shall likewise be entitled to repayment of deposits and of any other balance due from the Federal reserve bank.

"'No applying bank shall be admitted to membership in a Federal reserve bank unless it possesses a paid-up, unimpaired capital sufficient to entitle it to become a national banking association in the place where it is situated under the provisions of the national-bank act.

"'Banks becoming members of the Federal Reserve System under authority of this section shall be subject to the provisions of this section and to those of this act which relate specifically to member banks, but shall not be subject to examination under the provisions of the first two paragraphs of section 5240 of the Revised Statutes as amended by section 21 of this act. Subject to the provisions of this act and to the regulations of the board made pursuant thereto, any bank becoming a member of the Federal Reserve System shall retain its full charter and statutory rights as a State bank or trust company, and may continue to exercise all corporate powers granted it by the State in which it was created, and shall be entitled to all privileges of member banks: *Provided, however*, That no Federal reserve bank shall be permitted to discount for any State bank or trust company notes, drafts, or bills of exchange of any one borrower who is liable for borrowed money to such State bank or trust company in an amount greater than 10 per cent of the capital and surplus of such State bank or trust company, but the discount of bills of exchange drawn against actually existing value and the discount of commercial or business paper actually owned by the person negotiating the same shall not be considered as borrowed money within the meaning of this section. The Federal reserve bank, as a condition of the discount of notes, drafts, and bills of exchange for such State bank or trust company, shall require a certificate or guaranty to the effect that the borrower is not liable to such bank in excess of the amount provided by this section, and will not be permitted to become liable in excess of this amount while such notes, drafts, or bills of exchange are under discount with the Federal reserve bank.

"'It shall be unlawful for any officer, clerk, or agent of any bank admitted to membership under authority of this section to certify any check drawn upon such bank unless the person or company drawing the check has on deposit therewith at the time such check is certified an amount of money equal to the amount specified in such check. Any check so certified by duly authorized officers shall be a good and valid obligation against such bank, but the act of any such officer, clerk, or agent in violation of this section may subject such bank to a forfeiture of its membership in the Federal Reserve System upon hearing by the Federal Reserve Board.'

"SEC. 4. That the first paragraph of section 13 be further amended and reenacted so as to read as follows:

"'Any Federal reserve bank may receive from any of its member banks, and from the United States, deposits of current funds in lawful money, national-bank notes, Federal reserve notes, or checks, and drafts, payable upon presentation, and also, for collection, maturing notes and bills; or, solely for purposes of exchange or of collection, may receive from other Federal reserve banks deposits of current funds in lawful money, national-bank notes, or checks upon other Federal reserve banks, and checks and drafts, payable upon presentation within its district, and maturing notes and bills payable within its district; or, solely for the purposes of exchange or of collection, may receive from any nonmember bank or trust company deposits of current funds in lawful money, national-bank notes, Federal reserve notes, checks and drafts payable upon presentation, or maturing notes and bills: *Provided*, Such nonmember bank or trust company maintains with the Federal reserve bank of its district a balance sufficient to offset the items in transit held for its account by the Federal reserve bank: *Provided further*, That nothing in this or any other section of this act shall be construed as prohibiting a member or nonmember bank from making reasonable charges, to be determined and regulated by the Federal Reserve Board, but in no case to exceed 10 cents per $100 or fraction thereof, based on the total of checks and drafts presented at any one time, for collection or payment of checks and drafts and remission therefor by exchange or otherwise; but no such charges shall be made against the Federal reserve banks.'

"SEC. 5. That the fifth paragraph of section 13 be further amended and reenacted so as to read as follows:

"'Any member bank may accept drafts or bills of exchange drawn upon it having not more than six months' sight to run, exclusive of days of grace, which grow out of transactions involving the importation or exportation of goods; or which grow out of transactions involving the domestic shipment of goods provided shipping documents conveying or securing title are attached at the time of acceptance; or which are secured at the

time of acceptance by a warehouse receipt or other such document conveying or securing title covering readily marketable staples. No member bank shall accept, whether in a foreign or domestic transaction, for any one person, company, firm, or corporation to an amount equal at any time in the aggregate to more than 10 per cent of its paid-up and unimpaired capital stock and surplus, unless the bank is secured either by attached documents or by some other actual security growing out of the same transaction as the acceptance; and no bank shall accept such bills to an amount equal at any time in the aggregate to more than one-half of its paid-up and unimpaired capital stock and surplus: *Provided, however*, That the Federal Reserve Board, under such general regulations as it may prescribe, which shall apply to all banks alike regardless of the amount of capital stock and surplus, may authorize any member bank to accept such bills to an amount not exceeding at any time in the aggregate 100 per cent of its paid-up and unimpaired capital stock and surplus: *Provided further*, That the aggregate of acceptances growing out of domestic transactions shall in no event exceed 50 per cent of such capital stock and surplus.'

"SEC. 6. That section 14, subsection (e), be amended and reenacted so as to read as follows:

"'(e) To establish accounts with other Federal reserve banks for exchange purposes and, with the consent or upon the order and direction of the Federal Reserve Board and under regulations to be prescribed by said board, to open and maintain accounts in foreign countries, appoint correspondents, and establish agencies in such countries wheresoever it may be deemed best for the purpose of purchasing, selling, and collecting bills of exchange, and to buy and sell, with or without its indorsement, through such correspondents or agencies, bills of exchange (or acceptances) arising out of actual commercial transactions which have not more than 90 days to run, exclusive of days of grace, and which bear the signature of two or more responsible parties, and, with the consent of the Federal Reserve Board, to open and maintain banking accounts for such foreign correspondents or agencies. Whenever any such account has been opened or agency or correspondent has been appointed by a Federal reserve bank, with the consent of or under the order and direction of the Federal Reserve Board, any other Federal reserve bank may, with the consent and approval of the Federal Reserve Board, be permitted to carry on or conduct, through the Federal reserve bank opening such account or appointing such agency or correspondent, any transaction authorized by this section under rules and regulations to be prescribed by the board.'

"SEC. 7. That section 16, paragraphs 2, 3, 4, 5, 6, and 7, befurther amended and reenacted so as to read as follows:

"'Any Federal reserve bank may make application to the local Federal reserve agent for such amount of the Federal reserve notes hereinbefore provided for as it may require. Such application shall be accompanied with a tender to the local Federal reserve agent of collateral in amount equal to the sum of the Federal reserve notes thus applied for and issued pursuant to such application. The collateral security thus offered shall be notes, drafts, bills of exchange, or acceptances acquired under the provisions of section 13 of this act, or bills of exchange indorsed by a member bank of any Federal reserve district and purchased under the provisions of section 14 of this act, or bankers' acceptances purchased under the provisions of said section 14, or gold or gold certificates; but in no event shall such collateral security, whether gold, gold certificates, or eligible paper, be less than the amount of Federal reserve notes applied for. The Federal reserve agent shall each day notify the Federal Reserve Board of all issues and withdrawals of Federal reserve notes to and by the Federal reserve bank to which he is accredited. The said Federal Reserve Board may at any time call upon a Federal reserve bank for additional security to protect the Federal reserve notes issued to it.

"'Every Federal reserve bank shall maintain reserves in gold or lawful money of not less than 35 per cent against its deposits and reserves in gold of not less than 40 per cent against its Federal reserve notes in actual circulation: *Provided, however*, That when the Federal reserve agent holds gold or gold certificates as collateral for Federal reserve notes issued to the bank such gold or gold certificates shall be counted as part of the gold reserve which such bank is required to maintain against its Federal reserve notes in actual circulation. Notes so paid out shall bear upon their faces a distinctive letter and serial number which shall be assigned by the Federal Reserve Board to each Federal reserve bank. Whenever Federal reserve notes issued through one Federal reserve bank shall be received by another Federal reserve bank, they shall be promptly returned for credit or redemption to the Federal reserve bank through which they were originally issued or, upon direction of such Federal reserve bank, they shall be forwarded direct to the Treasurer of the United States to be retired. No Federal reserve bank shall pay out notes issued through another under penalty of a tax of 10 per cent upon the face value of notes so paid out. Notes presented for redemption at the Treasury of the United States shall be paid out of the redemption fund and returned to the Federal reserve banks through which they were originally issued, and thereupon such Federal reserve bank shall, upon demand of the Secretary of the Treasury, reimburse such redemption fund in lawful money or, if such Federal reserve notes have been redeemed by the Treasurer in gold or gold certificates, then such funds shall be reimbursed to the extent deemed necessary by the Secretary of the Treasury in gold or gold certificates, and such Federal reserve bank shall, so long as any of its Federal reserve notes remain outstanding, maintain with the Treasurer in gold an amount sufficient in the judgment of the Secretary to provide for all redemptions to be made by the Treasurer. Federal reserve notes received by the Treasurer otherwise than for redemption may be exchanged for gold out of the redemption fund hereinafter provided and returned to the reserve bank through which they were originally issued, or they may be returned to such bank for the credit of the United States. Federal reserve notes unfit for circulation shall be returned by the Federal reserve agents to the Comptroller of the Currency for cancellation and destruction.

"'The Federal Reserve Board shall require each Federal reserve bank to maintain on deposit in the Treasury of the United States a sum in gold sufficient in the judgment of the Secretary of the Treasury for the redemption of the Federal reserve notes issued to such bank, but in no event less than 5 per cent of the total amount of notes issued less the amount of gold or gold certificates held by the Federal reserve agent as collateral security; but such deposit of gold shall be counted and included as part of the 40 per cent reserve hereinbefore required. The board shall have the right, acting through the Federal reserve agent, to grant, in whole or in part, or to reject entirely the application of any Federal reserve bank for Federal reserve notes; but to the extent that such application may be granted the Federal Reserve Board shall, through its local Federal reserve agent, supply Federal reserve notes to the banks so applying, and such bank shall be charged with the amount of notes issued to it and shall pay such rate of interest as may be established by the Federal Reserve Board on only that amount of such notes which equals the total amount of its outstanding Federal reserve notes less the amount of gold or gold certificates held by the Federal reserve agent as collateral security. Federal reserve notes issued to any such bank shall, upon delivery, together with such notes of such Federal reserve bank as may be issued under section 18 of this act upon security of United States 2 per cent Government bonds, become a first and paramount lien on all the assets of such bank.

"'Any Federal reserve bank may at any time reduce its liability for outstanding Federal reserve notes by depositing with the Federal reserve agent its Federal reserve notes, gold, gold certificates, or lawful money of the United States. Federal reserve notes so deposited shall not be reissued, except upon compliance with the conditions of an original issue.

"'The Federal reserve agent shall hold such gold, gold certificates, or lawful money available exclusively for exchange for the outstanding Federal reserve notes when offered by the reserve bank of which he is a director. Upon the request of the Secretary of the Treasury the Federal Reserve Board shall require the Federal reserve agent to transmit to the Treasurer of the United States so much of the gold held by him as collateral security for Federal reserve notes as may be required for the exclusive purpose of the redemption of such Federal reserve notes, but such gold when deposited with the Treasurer shall be counted and considered as if collateral security on deposit with the Federal reserve agent.

"'Any Federal reserve bank may at its discretion withdraw collateral deposited with the local Federal reserve agent for the protection of its Federal reserve notes issued to it and shall at the same time substitute therefor other collateral of equal amount with the approval of the Federal reserve agent under regulations to be prescribed by the Federal Reserve Board. Any Federal reserve bank may retire any of its Federal reserve notes by depositing them with the Federal reserve agent or with the Treasurer of the United States, and such Federal reserve bank shall thereupon be entitled to receive back the collateral deposited with the Federal reserve agent for the security of such notes. Federal reserve banks shall not be required to maintain the reserve or the redemption fund heretofore provided for against Federal reserve notes which have been retired. Federal reserve notes so deposited shall not be reissued except upon compliance with the conditions of an original issue.

"'All Federal reserve notes and all gold, gold certificates, and lawful money issued to or deposited with any Federal reserve agent under the provisions of the Federal reserve act shall hereafter be held for such agent, under such rules and regulations as the Federal Reserve Board may prescribe, in the joint custody of himself and the Federal reserve bank to which he is accredited. Such agent and such Federal reserve bank shall be jointly liable for the safe-keeping of such Federal reserve notes, gold, gold certificates, and lawful money. Nothing herein contained, however, shall be construed to prohibit a Federal reserve agent from depositing gold or gold certificates with the Federal Reserve Board, to be held by such board subject to his order, or with the Treasurer of the United States for the purposes authorized by law.'

"SEC. 8. That section 16 be further amended by adding at the end of the section the following:

"'That the Secretary of the Treasury is hereby authorized and directed to receive deposits of gold coin or of gold certificates with the Treasurer or any Assistant Treasurer of the United States when tendered by any Federal reserve bank or Federal reserve agent for credit to its or his account with the Federal Reserve Board. The Secretary shall prescribe by regulation the form of receipt to be issued by the Treasurer or Assistant Treasurer to the Federal reserve bank or Federal reserve agent making the deposit, and a duplicate of such receipt shall be delivered to the Federal Reserve Board by the Treasurer at Washington upon proper advices from any Assistant Treasurer that such deposit has been made. Deposits so made shall be held subject to the orders of the Federal Reserve Board and shall be payable in gold coin or gold certificates on the order of the Federal Reserve Board to any Federal reserve bank or Federal reserve agent at the Treasury or at the Subtreasury of the United States nearest the place of business of such Federal reserve bank or such Federal reserve agent: *Provided, however*, That any expense incurred in shipping gold to or from the Treasury or Subtreasuries in order to make such payments, or as a result of making such payments, shall be paid by the Federal Reserve Board and assessed against the Federal reserve banks. The order used by the Federal Reserve Board in making such payments shall be signed by the governor or vice governor, or such other officers or members as the board may by regulation prescribe. The form of such order shall be approved by the Secretary of the Treasury.

"'The expenses necessarily incurred in carrying out these provisions, including the cost of the certificates or receipts issued for deposits received, and all expenses incident to the handling of such deposits shall be paid by the Federal Reserve Board and included in its assessments against the several Federal reserve banks.

"'Gold deposits standing to the credit of any Federal reserve bank with the Federal Reserve Board shall, at the option of said bank, be counted as part of the lawful reserve which it is required to maintain against outstanding Federal reserve notes, or as a part of the reserve it is required to maintain against deposits.

"'Nothing in this section shall be construed as amending section 6 of the act of March 14, 1900, as amended by the acts of March 4, 1907, March 2, 1911, and June 12, 1916, nor shall the provisions of this section be construed to apply to the deposits made or to the receipts or certificates issued under those acts.'

"SEC. 9. That section 17 be amended and reenacted so as to read as follows:

"'SEC. 17. So much of the provisions of section 5159 of the Revised Statutes of the United States, and section 4 of the act of June 20, 1874, and section 8 of the act of July 12, 1882, and of any other provisions of existing statutes as require that before any national banking association shall be authorized to commence banking business it shall transfer and deliver to the Treasurer of the United States a stated amount of United States registered bonds, and so much of those provisions or of any other provisions of existing statutes as require any national banking association now or hereafter organized to maintain a minimum deposit of such bonds with the Treasurer is hereby repealed.'

"SEC. 10. That section 19 be further amended and reenacted so as to read as follows:

"'SEC. 19. Demand deposits within the meaning of this act shall comprise all deposits payable within 30 days, and time deposits shall comprise all deposits payable after 30 days, all savings accounts and certificates of deposit which are subject to not less than 30 days' notice before payment, and all postal savings deposits.

"'Every bank, banking association, or trust company which is or which becomes a member of any Federal reserve bank shall establish and maintain reserve balances with its Federal reserve bank as follows:

"'(a) If not in a reserve or central reserve city, as now or hereafter defined, it shall hold and maintain with the Federal reserve bank of its district an actual net balance equal to not less than 7 per cent of the aggregate amount of its demand deposits and 3 per cent of its time deposits.

"'(b) If in a reserve city, as now or hereafter defined, it shall hold and maintain with the Federal reserve bank of its district an actual net balance equal to not less than 10 per cent of the aggregate amount of its demand deposits and 3 per cent of its time deposits.

"'(c) If in a central reserve city, as now or hereafter defined, it shall hold and maintain with the Federal reserve bank of its district an actual net balance equal to not less than 13 per cent of the aggregate amount of its demand deposits and 3 per cent of its time deposits.

"'No member bank shall keep on deposit with any State bank or trust company which is not a member bank a sum in excess of 10 per cent of its own paid-up capital and surplus. No member bank shall act as the medium or agent of a nonmember bank in applying for or receiving discounts from a Federal reserve bank under the provisions of this act, except by permission of the Federal Reserve Board.

"'The required balance carried by a member bank with a Federal reserve bank may, under the regulations and subject to such penalties as may be prescribed by the Federal Reserve Board, be checked against and withdrawn by such member bank for the purpose of meeting existing liabilities: *Provided, however*, That no bank shall at any time make new loans or shall pay any dividends unless and until the total balance required by law is fully restored.

"'In estimating the balances required by this act, the net difference of amounts due to and from other banks shall be taken as the basis for ascertaining the deposits against which required balances with Federal reserve banks shall be determined.

"'National banks, or banks organized under local laws, located in Alaska or in a dependency or insular possession or any part of the United States outside the continental United States may remain nonmember banks, and shall in that event maintain reserves and comply with all the conditions now provided by law regulating them; or said banks may, with the consent of the Reserve Board, become member banks of any one of the reserve districts, and shall in that event take stock, maintain reserves, and be subject to all the other provisions of this act.'

"SEC. 11. That that part of section 22 which reads as follows: 'Other than the usual salary or director's fees paid to any officer, director, or employee of a member bank and other than a reasonable fee paid by said bank to such officer, director, or employee for service rendered to such bank, no officer, director, employee, or attorney of a member bank shall be a beneficiary of or receive, directly or indirectly, any fee, commission, gift, or other consideration for or in connection with any transaction or business of the bank,' be amended and reenacted so as to read as follows:

"'Other than the usual salary or director's fee paid to any officer, director, employee, or attorney of a member bank, and other than a reasonable fee paid by said bank to such officer, director, employee, or attorney for services rendered to such bank, no officer, director, employee, or attorney of a member bank shall be a beneficiary of or receive, directly or indirectly, any fee, commission, gift, or other consideration for or in connection with any transaction or business of the bank: *Provided, however*, That nothing in this act contained shall be construed to prohibit a director, officer, employee, or attorney from receiving the same rate of interest paid to other depositors for similar deposits made with such bank: *And provided further*, That notes, drafts, bills of exchange, or other evidences of debt executed or indorsed by directors or attorneys of a member bank may be discounted with such member bank on the same terms and conditions as other notes, drafts, bills of exchange, or evidences of debt upon the affirmative vote or written assent of at least a majority of the members of the board of directors of such member bank.'"

And the Senate agree to the same.

ROBT. L. OWEN,
G. M. HITCHCOCK,
GEO. P. MCLEAN,
Managers on the part of the Senate.

CARTER GLASS,
MICHAEL F. PHELAN,
EDMUND PLATT,
Managers on the part of the House.

RIFLES, MACHINE GUNS, AND FIELD ARTILLERY.

Mr. SMOOT. Mr. President, I desire, if other morning business has been concluded, to ask the Chair to lay before the body Senate resolution 82, coming over from a previous day.

The VICE PRESIDENT. The Chair lays before the Senate the resolution referred to by the Senator from Utah, which will be stated.

The SECRETARY. A resolution (S. Res. 82), submitted by Mr. SMOOT, requesting the Secretary of War to transmit certain information to the Senate.

Mr. JONES of Washington. I suggest that the resolution be read before it is considered, Mr. President.

Mr. FLETCHER. I think the resolution ought to be read.

The VICE PRESIDENT. The Secretary will read the resolution.

The Secretary read the resolution (S. Res. 82), as follows:

Resolved, That the Secretary of War be requested, if not incompatible with the public interest, to furnish to the Senate as soon as possible the following information:

First. Has the British Enfield rifle been adopted for the American Army; and if so, are such rifles being chambered so as to fit the American type of rifle cartridge?

Second. Are machine guns for the use of the American Army using the same type of rifle cartridge as the Army rifle to be used by the American Army?

Third. Do the American cartridges for use in rifles and machine guns differ in size or otherwise so as to prevent their being used in the rifles and machine guns of the English or French? If so, what is the character of the differences and what advantage is gained thereby?

Fourth. To what extent does the field artillery of the American Army differ in caliber and character of ammunition used from that of the English and French Armies?

Fifth. Can the ammunition of the English or French Armies be used in the field artillery of the American Army?

Sixth. If the American ammunition for rifles, machine guns, and field artillery is not interchangeable for like British or French guns, what advantage is gained by having it differ from that of the English Army or the French Army?

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

The Senate, by unanimous consent, proceeded to consider the resolution.

Mr. JONES of Washington. Mr. President, I ask the Senator from Utah whether or not the information which would be received on a request of that kind would be proper at this time to be made public?

Mr. SMOOT. I can not conceive of any harm that could come to the United States from the information asked for by the resolution.

Mr. JONES of Washington. It struck me, as I heard the resolution read, that if it is agreed to there might be information made public which might be pretty valuable to the other side. I know the Senator from Utah has given the matter careful consideration.

Mr. SMOOT. I will say to the Senator from Washington that I submitted the resolution because these questions have been raised in newspapers and magazine; and I have received letters asking if such and such things are so. All I desire is to obtain an authoritative statement from the department as to these questions in order that I may answer them.

Mr. JONES of Washington. Though that be true, yet the department might have information which it would not desire to give out.

Mr. SMOOT. If there is anything called for in the resolution which is incompatible with the public interest, it will not be furnished.

Mr. JONES of Washington. Does the resolution so provide?

Mr. SMOOT. Yes; it says:

That the Secretary of War be requested, if not incompatible with the public interest—

No possible harm can come from the adoption of the resolution.

The VICE PRESIDENT. The question is on agreeing to the resolution.

The resolution was agreed to.

AMENDMENT OF INTERSTATE-COMMERCE ACT.

The VICE PRESIDENT. The morning business is closed.

Mr. NEWLANDS. Mr. President, I ask that the unfinished business be laid before the Senate.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2356) to amend the act to regulate commerce, as amended, and for other purposes.

Mr. NEWLANDS. Mr. President, the bill as amended is upon the desks of Senators, a reprint having been made. Last night I offered an amendment to the pending bill which referred to different lines from those in the reprint. I therefore renew the amendment with the proper lining.

The VICE PRESIDENT. It will be necessary to have the amendment submitted to the original bill as reported from the committee.

Mr. NEWLANDS. I do not understand the statement of the Chair.

The VICE PRESIDENT. There was a report of this bill originally by the committee. When amendments are submitted they must be submitted to the original bill as reported. There is no way for the Secretary to be shifting from one print of the bill to another.

Mr. LODGE. What is the precise request, Mr. President?

Mr. NEWLANDS. In view of the statement of the Chair, the amendment will have to be submitted to the original bill.

The VICE PRESIDENT. The Senator from Nevada is offering an amendment to what he calls "a reprint of the bill," which has no authoritative standing whatever in the Senate.

Mr. NEWLANDS. Very well.

The VICE PRESIDENT. The Senator can offer his amendment to the original bill.

Mr. NEWLANDS. Then I ask the Secretary to state the amendment that I offered last night to the original bill.

The VICE PRESIDENT. The Secretary will state the amendment proposed by the Senator from Nevada.

The SECRETARY. On page 4, line 4, after the word "expedite," insert the words "and provide for needed"; in line 5, after the word "carriers," insert the words "to permit and authorize carriers"; in lines 5 and 6, strike out the words "with two or more carriers"; and in line 6, after the word "proper," insert the words "and equitable," so that the paragraph as amended will read:

The President is hereby authorized, whenever in his judgment it becomes necessary in order to expedite and provide for needed transportation and to do justice between carriers, to permit and authorize carriers to enter into agreements looking to a proper and equitable division of earnings for a time to be specified and upon kinds of traffic to be prescribed.

Mr. NEWLANDS. I will state that the amendment was acted upon by the committee last night and was approved.

Mr. REED. I ask to have the amendment again stated.

The VICE PRESIDENT. The amendment will be again stated.

The SECRETARY. In the original print of the bill, on page 4, beginning in line 2, with the sentence "The President is hereby authorized," it is proposed to amend so as to read:

The President is hereby authorized, whenever in his judgment it becomes necessary in order to expedite and provide for needed transportation and to do justice between carriers, to permit and authorize carriers to enter into agreements looking to a proper and equitable division of earnings for a time to be specified and upon kinds of traffic to be prescribed.

Mr. REED. I can not follow it, Mr. President.

Mr. NEWLANDS. Then I will not press the amendment now.

Mr. REED. I could probably look at it in a moment. I should like to see it.

Mr. NEWLANDS. I will state, Mr. President, that the original provision in the bill was as follows:

The President is hereby authorized, whenever in his judgment it becomes necessary in order to expedite transportation and to do justice between carriers, to enter into agreements with two or more carriers looking to a proper division of earnings for a time to be specified and upon kinds of traffic to be prescribed.

That was not accurately expressed, and the committee simply amended it by adding in the original print, after the word "expedite," on page 4, line 4, the words "and provide for needed"; in line 5, after the word "carriers," by inserting the words "to permit and authorize carriers"; by striking out the words in lines 6 and 7 "with two or more carriers"; and in line 6, after the word "proper," by inserting the words "and equitable," so that the sentence as amended will read:

The President is hereby authorized, whenever in his judgment it becomes necessary in order to expedite and provide for needed transportation and to do justice between carriers, to permit and authorize carriers to enter into agreements looking to a proper and equitable division of earnings for a time to be specified and upon kinds of traffic to be prescribed.

The original provision was that the President was to enter into agreements. That was an inaccurate expression. The President is simply to authorize or permit the carriers themselves to make agreements looking to a division of earnings. The amendment was unanimously agreed upon by the committee, and I can see no possible objection to it.

Mr. REED. Mr. President, there is a very important difference between the two provisions of which I think the Senate ought to be advised. Under the section as it was reported originally by the committee the language was:

The President is hereby authorized, whenever in his judgment it becomes necessary in order to expedite transportation and to do justice between carriers, to enter into agreements with one or more carriers looking to a proper division of earnings—

And so forth. That put it in the power of the President, when he should requisition the railroads for any particular purpose or order preference to be given to any one class of freight over another, to enter into arrangements with the roads that might be regarded as equitable. The section as changed means that when the President has ordered a preference of traffic of one kind over another, thereupon the railroad presidents are authorized to get together and make such agreements as they see fit to make with reference to a division of the profits or of the earnings; in other words, the moment the President shall issue an order giving a preference in traffic, as I understand this language, the railway presidents are then authorized to do that which they have been prohibited from doing by every law we have written for many years, namely, to get together and pool their earnings and business.

Mr. CUMMINS. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Iowa?

Mr. REED. I do.

Mr. CUMMINS. The Senator from Missouri is, I think, mistaken. There is no essential difference between the provision as originally reported and the provision as it would be if amended, although the amendment probably puts it in better form. The original provision authorized the President to enter into agreements with two or more carriers. Of course, the carriers were at liberty to enter into the agreements or not, as they might see fit. The amendment simply proposes that the carriers shall make the agreement. Under the original form they would make the agreement, but the carriers under the amendment can not make the agreement for a division of earnings without the permission, the authority, of the President.

That is all that the President could do under the terms of the bill originally, because there was no obligation on the part of the United States that could be incurred; the United States had nothing to give and nothing to promise; and, even if the bill remains as it originally was, the President's part in it would be in substance an approval or granting of authority.

The Senator from Missouri is right in saying that the provision permits the railways to do a thing which is now forbidden by law, and has been forbidden for many years. If it were not so, the provision would be entirely unnecessary.

Mr. REED. Well, Mr. President, there is more in this amendment than that. I do not like to differ from my friend from Iowa. A railroad president came before the committee. That railroad president insisted that the railroads should be permitted to make these agreements among themselves, and objected to certain language contained in an amendment that was under discussion which placed it in the power of the Government to compel a division of earnings, this railway president insisting that the railways had the right to make those arrangements among themselves and control their own affairs; and there was, of course, from their standpoint, much to be said in favor of that.

As I understand the difference between the two propositions, however, it is this: Under the proposition as contained in the bill originally the President was authorized, whenever in his judgment it became necessary in order to expedite transportation and do justice between carriers, to enter into agreements with two or more carriers looking to a division of the earnings.

That made the President, or some representative of the Government, a party to this agreement. Before the agreement to divide the earnings could be made, it must be made through some representative of the Government. Accordingly, the Government would have a check upon it. It would know what was being done; and it might be that the man selected to represent the President in a matter of that kind would be a member of the Interstate Commerce Commission, conversant with the business.

That is one proposition; but the other proposition—the one that is now submitted by way of this amendment—is that the President may simply give his consent, and thereupon the railway managements themselves take up the question and settle it to suit themselves, the Government not being represented and not being in any way necessarily advised of what is going on.

Let us see how that might work. I am not here now to attack the transportation lines. They will have plenty of trouble on their hands without making any unnecessary trouble, and I want to treat them fairly, but we also want to treat ourselves fairly. Let us see how it may work out.

Under the proposition of the original bill, if it became necessary to haul great quantities of a particular kind of goods on rush orders and over a particular road, and the rates were high, the President or his representatives would call together the railway presidents and say: "There ought to be a division of rates." Thereupon he certainly would sit there to some extent as a kind of umpire to see that fair and just treatment was extended to all the railroads that might be concerned, big and little, and until he was satisfied the agreement could not be made. His consent would be essential to the agreement. Under the law as it is now proposed, however, the President having granted the permission, the railway presidents would get together to settle among themselves the question of the railway management.

The small railroads, the weak railroads, might very grievously suffer under those circumstances. The powerful railroads, represented upon this controlling board here in Washington, probably would not be worsted in the deal. So I think the language that was in this bill originally is better than the language that is put in by the committee by this amendment; and I think the language in this amendment is put in here to conform to the views of this distinguished railway president who was before the committee.

I have always believed that if we are to escape absolute public ownership we will do so by enlarging governmental control and direction, and that the law which provided that there should be no pooling of earnings was a wise and prudent law. If it is to be set aside during this war, then the act of setting it aside, together with all that follows from that act, ought to be subject to some kind of governmental check. That is not in the bill, if the language proposed is accepted, and I regret that the committee brings in that kind of report.

I hope, for that reason, that the amendment will not be accepted.

Mr. LODGE. Mr. President, I do not care to say anything specifically about the amendment now pending. That is a minor point; but I am unable to be in the Senate this afternoon owing to the meeting of the Finance Committee, and I do desire to say a few words about section 2.

It is there provided that—

> the President is authorized, whenever in his judgment such action is necessary to the public security and defense, to direct that certain kinds of traffic or particular shipments, as may be determined by him, shall have preference or priority in transportation by any common carriers by railroad or water, under such arrangements, rules, and regulations as he may prescribe. He may give these directions at and for such times as he may determine, and may modify, change, suspend, or annul them, and for any such purpose he is hereby authorized to issue orders direct, or through such person or persons as he may designate for the purpose.

It recognizes further that persons not in the employ of the United States may be designated, and receive such compensation as the President may fix.

Mr. President, there can be no doubt that in time of war very great power must be given to the Executive in regard to the matter of transportation. He must have authority to control all transportation that relates to the Army or the Navy, or the conduct of the war and the munitions necessary for it. This goes far beyond that, however. Under this bill the President can say to one great manufacturing establishment whose product is not going into the war at all, "You can not ship," and to another, whose product is equally unrelated to the war, "You shall have priority over your rival." There is nothing to prevent his putting his hand on every business in the country, without reference to whether it concerns munitions of war or has anything whatever to do with the war. The whole business of the country—not transportation alone, but the whole business of the country through transportation—is put in his hands. There is not a business in this country that under this law can not have a preference given to it or a discrimination made against it, no matter whether it is concerned with military operations or not. Now, surely there can be no such need as that under pretense of war authority. This goes far beyond anything of that kind.

I have unfortunately been unable to be in the Senate lately on account of work on the revenue bill, but I understood yesterday that some adjustment had been made to modify some of the extreme features of this bill, and while leaving in the hands of the President ample authority for everything connected with the war, to allow the other business of the country to be conducted in the ordinary way, the railroads, if it was necessary, getting authority to establish priority for any particular shipment through the Interstate Commerce Commission. I had understood that those modifications were generally satisfactory. I hear to-day that they are not satisfactory; that they have been dissipated, blown to the winds; that it must be all the authority possible or nothing.

Of late, Mr. President, among enthusiasts who in my judgment confuse the President with the country—which is just as unreasonable as confusing the Congress with the country; we are all alike the servants of the country—among those enthusiasts a very favorite method of eulogy is to put the President alongside Washington and Lincoln. I want to call attention

to a speech which Mr. Lincoln made at Pittsburgh in February, 1861, when he was standing on the edge of a war which brought this country within measurable range of destruction.

Mr. Lincoln said:

> By the Constitution the Executive may recommend measures which he may think proper, and he may veto those he thinks improper; and it is supposed that he may add to these certain indirect influences to affect the action of Congress. My political education strongly inclines me against the very free use of any of these means by the Executive to control the legislation of the country. As a rule, I think it better that Congress should originate as well as perfect its measures without external bias.

That sounds very simple in these days——

Mr. GALLINGER. And old-fashioned.

Mr. LODGE. Quite old-fashioned, as the Senator from New Hampshire suggests. With four years of desperate war on his hands, I do not recall that Mr. Lincoln asked for a press censorship. I do not recall that he came to Congress for abnormal powers. It is very true that he was severely criticized by the press which he did not attempt to muzzle. He was very severely criticized for suspending the habeas corpus act—a pure exercise of the war power—and he rested it on that doctrine. I, at least, have stumbled on no traces of his coming here to Congress personally and trying to get unreasonable powers; and yet, somehow or other, he managed to carry on a four years' war and bring it to success.

Mr. President, it is not as if the President himself were going to do these things. That is a physical impossibility. If he could give his whole time to regulating these questions of priority of transportation, undoubtedly he would do it well. I question neither his integrity nor his great ability. But we know perfectly well that that is not the way it will be done. As a matter of fact, some person will be designated whom the country has probably never heard of. He will be summoned "out of the anywhere into here," and we shall suddenly see another great man created by the touch of the Executive wand. He will exercise these great powers, and his word will be all powerful with the President.

When we give these powers, we talk about giving them to the President. We do not give them to the President. The President can not exercise them. It is utterly impossible for him to exercise them, or to attempt to exercise one tithe of them. They are done by these people whom he selects and puts in; and, as I have observed, some of the recent creations of men who are to be armed with these mighty authorities, it has occurred to me that it is extremely dangerous for Congress to abdicate its rights, to abdicate the functions conferred on it by the Constitution.

It is for that reason, Mr. President, that I hoped there would be some reasonable modification made; that all possible authority should be given that relates to the conduct of the war; but I regard it as extremely dangerous to put the whole business of the country not in the President's hands but in the hands of some man of whom we know nothing, as has been done in many instances. I hope—it may be a vain hope—that there will be some modification made.

Mr. NELSON. Mr. President, will the Senator yield to me?

Mr. LODGE. I yield.

Mr. NELSON. Would the Senator have no regulation at all on the subject?

Mr. LODGE. Why, I have tried, as far as the English language could express it, to say——

Mr. NELSON. Well, would the Senator——

Mr. LODGE. One moment; I have the floor—to say that I thought he ought to have the fullest possible power for military purposes.

Mr. NELSON. But if not in the hands of the President, where would the Senator put it?

Mr. LODGE. I would leave it where it belongs—in Congress or in the——

Mr. NELSON. How can Congress be in session and act in every one of these cases of shipping?

Mr. LODGE. Well, the way we are going on now, Congress is going to stay in session for some time.

Mr. NELSON. Suppose we do—how can we pass upon it?

Mr. LODGE. We can prevent the abuse of the powers.

Mr. NELSON. That we can do in any event.

Mr. LODGE. And we can withhold the powers from men unfit to use them.

Mr. NELSON. Mr. President, it is as utterly impossible for us to regulate these matters as it is for Congress to regulate railroad rates. We have committed that to an Interstate Commerce Commission.

Mr. LODGE. Very well, Mr. President; commit this to your Interstate Commerce Commission. That is what is proposed by the modification. We know the Interstate Commerce Commission, at least we know those who are now there. Who the next will be we do not know, but we know those who are now there. We know that at least they have been trained in the service. Why can not all the business that does not relate to the war be left to be settled by the Interstate Commerce Commission, who are trained men? They would not allow anything to be done that would interfere with the prosecution of the war.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER (Mr. FERNALD in the chair). Does the Senator from Massachusetts yield to the Senator from Ohio?

Mr. LODGE. I do.

Mr. POMERENE. The Senator has suggested that the President be given control over those things that relate to the war. Can the Senator lay down any rule whereby we can determine what will relate to the war and what will not when we come to administer it?

Mr. LODGE. Very easily——

Mr. POMERENE. If it is so easy——

Mr. LODGE. The movement of troops, the transportation of munitions, all those things relating to the efficiency of the Army and the Navy.

Mr. POMERENE. The Senator and I agree as to that proposition.

Mr. LODGE. I thought we would. Give the President absolute authority over those.

Mr. POMERENE. It may be that it is necessary to ship troops to-day, foodstuffs to-morrow, and bricks the day following, because they may be necessary for the very purpose of manufacturing the steel which is necessary in order to build our ships. I have in mind to-day a situation in Ohio where there was some complaint made by the brick manufacturers because an order had been made for the distribution of cars which interfered with their business. It was the purpose of the Shipping Board to give preference to the shipment of coal and iron and steel for Government purposes. It so happened that these brick companies were furnishing the bricks to build large additions to one of the steel mills in order to enable them to furnish the supplies of steel which the Government wanted. Surely under those circumstances the shipment of brick was just as necessary to the defense of the country as the shipment of steel itself.

Mr. LODGE. Mr. President, I am not questioning anything used for military purposes, but this does not stop there. It does not limit it to a military purpose. Under the words "military purpose" or "the service of the Army and Navy" or "munitions of war" you can cover everything that is needed. But why should all shipments be interfered with? Why should the power be given to help one corporation against another, to help one industry against another? That is what I object to. I object to carrying it to things that have nothing to do with the war. The illustration of the Senator from Ohio is for the building of ships that we need immediately for the purposes of the Government. I am not proposing to cut those away.

Mr. POMERENE and Mr. REED addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Massachusetts yield, and if so, to whom?

Mr. LODGE. I yield to the Senator from Ohio. I will yield to the Senator from Missouri in a moment.

Mr. POMERENE. I felt quite sure the Senator and I would agree in that particular, inasmuch as it was very important and very necessary that preference be given to the shipment of those bricks; but the point I seek to make is that we as a legislative body can not determine from day to day what may be war supplies and what may not be. Allow me to call the Senator's attention to the phraseology of the bill, which confers upon the President this power only when in his judgment such action is necessary to the public security and defense.

Mr. LODGE. But who gave the orders about the bricks? Who said that they were needed? The President probably never heard of it.

Mr. POMERENE. I think perhaps that is true.

Mr. LODGE. Exactly. He acted through an agency.

Mr. POMERENE. Through an agency.

Mr. LODGE. Who did it?

Mr. POMERENE. I assume the railroad committee that has been acting in this matter.

Mr. LODGE. Of the advisory council?

Mr. POMERENE. Perhaps so.

Mr. LODGE. That the advisory council established by law have been picked out, selected by this council composed of Cabinet officers. They have neither responsibility nor power, except indirectly. We do not know who is doing it. That is the point I have tried to make clear. It is not giving it to the President; that is merely nominal. It is giving it to these men whom he selects. I yield to the Senator from Missouri.

Mr. REED. Mr. President, just a preliminary word, so that my statement may be as clear as I can make it.

The language of the bill is—

That during the continuance of the war * * * the President is authorized, whenever in his judgment such action is necessary to the public security and defense, to direct that certain kinds of traffic * * * shall have preference.

The Senator states that he has been absent on committee work, and I know that is the case; we all know it. It developed during the course of the debate that the words "public security and defense" were not intended by the committee to apply to the shipment of iron and the shipment of troops, and the shipment of munitions and the shipment of supplies to be used in their manufacture or production. It was not intended to be limited to that.

Mr. LODGE. Precisely.

Mr. REED. But it was intended that there should remain included within it other things, and it appeared after further discussion that those other things would embrace everything if the President concluded that it was necessary to embrace everything in order to further the public security and defense.

We reached that situation in the debate when it was proposed then to try and have some sort of conference to work out a plan by which the President would be given full authority to control everything that does relate to the Military Establishment in the progress of the war and to perhaps find some other authority to control the other shipments.

In answer to the interrogatory of the Senator from Ohio [Mr. POMERENE], who I am sorry has just left the Chamber, I will state that this amendment was prepared, and I say that it does cover and does give to the President complete control over everything necessary to the conduct of the war, unless you take the broad view that he must control every resource of the country to conduct the war.

I call the attention of the Senator from Massachusetts to the language:

That during the continuance of the war in which the United States is now engaged the President is hereby authorized, whenever in his judgment such action is necessary to the prompt movement of the military and naval forces, equipment or supplies, including materials to be employed in and for the production of the same of the United States or any nation making war against any nation with which the United States is at war, to direct that the same shall have preference or priority in transportation over all other shipments.

That covers the bricks of the Senator from Ohio.

Mr. LODGE. Absolutely.

Mr. REED. It covers anything that is to be used in the production of war supplies. It was proposed in this conference that having conferred those powers upon the President, broad and sweeping, covering everything necessary to the conduct of the war itself, when they came to preference in other shipments that that should be referred to the Interstate Commerce Commission with power on its part to act summarily if necessary.

Mr. LODGE. That is what I understood. I am as anxious as anybody and I am as ready to go as far as anybody in giving every power, every form of revenue, bonds, to aid in the prosecution of this war. I have but one desire, to fight this war to the very utmost and to win it at the earliest possible day. I am ready to give the President every possible power for the prosecution of the war. What I dislike is this attempt to depart from the prosecution of the war and invest him with these huge powers for the control of American business and American industry even when it has not the remotest connection with the war. That hesitation and doubt arise from the fact that I know the President can not attend to these things himself; it is impossible. If he could manage all the powers that we give to him that would be one thing, but that is an utter physical impossibility, and everybody knows it. The powers are deputed to somebody, and it is there where I begin to hesitate about giving vast and unnecessary powers.

Mr. NEWLANDS and Mr. SHAFROTH addressed the Chair.

Mr. LODGE. I yield first to the Senator from Nevada.

Mr. NEWLANDS. I understand, of course, that the Senator is desirous of giving the President every necessary power, and the committee considered that question particularly and carefully.

Mr. LODGE. I yielded for a question. I want to leave the floor. I have to go back to the committee room. I yielded for a question. I can not yield for a speech.

Mr. NEWLANDS. I simply wished to make a prefatory remark. I will ask the Senator whether he would wish the President to exercise the power of determining priority of shipments in case it should appear that the French nation now engaged in war with Germany lacked wheat, while the military forces of France might have an adequate supply?

Mr. LODGE. Mr. President——

Mr. NEWLANDS. If the Senator will permit me to ask him a question——

Mr. LODGE. I was ready to answer it.

Mr. NEWLANDS. I had not asked it.

Mr. LODGE. I beg the Senator's pardon. I thought he had asked a question.

Mr. NEWLANDS. The Senator had some vision in his mind——

Mr. LODGE. My mind perhaps moved a little more quickly.

Mr. NEWLANDS. A little more quickly than my own.

Mr. LODGE. That is possible.

Mr. NEWLANDS. His apprehension outruns my expression.

Mr. LODGE. That again is possible.

Mr. NEWLANDS. I wish to ask the Senator, in a case of this kind, assuming that the military forces of France had sufficient wheat to supply them, but assuming that the population of France were on the verge of starvation and required wheat, and there were large quantities of wheat in the Dakotas, and it was essential to get that wheat to the seaboard in order to supply not the French Army but the French people, would the Senator regard that as a case in which the President should be authorized to determine a priority?

Mr. LODGE. May I reply now?

Mr. NEWLANDS. Certainly.

Mr. LODGE. I shall make the same reply that I made three minutes ago. Unquestionably that is a military purpose. Who can doubt it? But the question whether one grower of cotton shall ship his cotton to a New England cotton mill, where it is to be made into calicoes to be used in this country or whether another should have the power of shipping his to another New England cotton mill for precisely the same purpose, I do not regard as a military question at all.

Mr. NEWLANDS. I will state to the Senator that some of the Senators who are opposed to giving these powers to the President when I put that precise question to them stated that was not the case of munitions of war or of military supplies or of military necessity. So there is a difference of opinion regarding it. It seems to me that this is not the case of a war such as we had during the Civil War——

Mr. LODGE. I yielded for a question. I want to get through and leave the floor. The Senator can make his argument at great length whenever he feels inclined.

The PRESIDING OFFICER. The Senator from Massachusetts has the floor and will proceed.

Mr. LODGE. I think the necessities of war can be differentiated by the exercise of a little common sense. It does not seem to me a difficult thing to do. As to the question of giving authority, I want to reiterate, it is not a question of giving authority to the President; it is giving authority to the men whom he selects to exercise these vast authorities. I prefer to give him direct the military authority, and I give that a very broad interpretation in the question of transportation. The other authorities necessary can go to the Interstate Commerce Commission, who are familiar with the railroads, whom we know, who were not created night before last.

Mr. SHAFROTH. Mr. President——

Mr. LODGE. I yield to the Senator from Colorado.

Mr. SHAFROTH. I should like to ask the Senator whether in this power that he says is going to be exercised by persons other than the President the restraining influence of the President and the power to overthrow the very will of the men who may be exercising the power is not a safeguard which gives to the President the direction, and is it not necessary that it should be so?

Mr. LODGE. Mr. President, of course the men whom the President appoints are responsible to him. They have his ear. He will take and will be obliged to take their opinion ninety-nine times out of a hundred. He can not investigate every case that is brought up. Moreover, it is not at all clear that he would agree with popular opinion as to some of the selections already made.

Mr. SHAFROTH. Does not the Senator think that if any of the men whom the President selects should commit a gross error or a gross wrong he would immediately correct it?

Mr. LODGE. I hope so, certainly.

Mr. SHAFROTH. Does not the Senator think to vest this power in the Interstate Commerce Commission would be to crowd a body that is already worked almost to death, so that it could not expeditiously determine these matters?

Mr. LODGE. Mr. President, I understand we have just enlarged the Interstate Commerce Commission, and I think the most important things are the questions growing out of the war. That is a body of trained, experienced men, and I am not afraid to leave the extensive powers in their hands. I am not afraid to leave great powers in the hands of Gen. Goethals. I wish

he had them. It is not that I fear giving the powers, but I should like to have it given to people of whom the country knows something.

Mr. SMITH of Michigan. Will the Senator permit me?

Mr. LODGE. Yes.

Mr. SMITH of Michigan. The inquiry of the Senator from Colorado prompts me to inquire whether or not the President is not overburdened with responsibilities now?

Mr. LODGE. Yes.

Mr. SMITH of Michigan. The Senator suggests that the Interstate Commerce Commission is overburdened. The President is overburdened with responsibilities. He can work through agents, and so may the Interstate Commerce Commission work through agents.

Mr. SHAFROTH. The Interstate Commerce Commission is supposed not to operate through agents.

Mr. SMITH of Michigan. But it may.

Mr. SHAFROTH. It operates upon its own judgment.

Mr. SMITH of Michigan. Exactly.

Mr. SHAFROTH. The remedy that exists in the President is the remedy that whenever an error is made that is manifestly wrong he immediately can correct it. That being the case——

Mr. LODGE. I shall be glad to conclude. I must be elsewhere in a very short time. I desire to assure the Senate that there is nothing captious in what I am saying here about giving these great powers, which in practice pass into the hands of many men hitherto absolutely unknown to the country. I do not care one straw whether they are Democrats or Republicans. If Democrats are to be preferred, the Democratic Party is abundant in strong and able men who are known to the country.

Mr. President, I have been following with deepest anxiety this loan which is brought to a conclusion to-day. There is no denying the fact that we have had great difficulty in carrying that loan through.

My own belief was, when the loan was first put out, and I told the Secretary of the Treasury that I agreed with him, that the loan would be a great and immediate success. It has not been. I have heard some people say who have been doing their very best to sell those bonds, working night and day to do it, and that is the report that comes in, that the great trouble about the loan has been, first, the gigantic and disproportionate taxation that is proposed, and, second, the lack of confidence, not in the President, not in the Treasury, but the lack of confidence in some of the recent selections of the great unknown. That has been one thing that has held up the loan, and it will continue to hamper the movements of the Government.

I want to see those movements expedited; I want to see them promoted in every possible way. That is the point I tried to make in reference to Gen. Goethals, and it is as good an illustration as any. He has the confidence of the American people; they know him; they know what he has done; they are ready to trust him; but there are a great many men being brought here and placed in positions of enormous power on whom we are asked to confer all these authorities, but of whom the country knows nothing. That breeds distrust; it hampers the loan; and it is going to hamper you in other ways. It is that which I feel to be such a serious thing.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Minnesota?

Mr. LODGE. I yield to the Senator.

Mr. NELSON. I do not want to take up the Senator's time, but I merely desire to say that I understand that Mr. Willard, the president of the Baltimore & Ohio Railroad Co., is to be at the head of the railroad organization of the country, and that he and his colleagues will be the men with whom the President will consult. If that is the case, I do not think the Senator from Massachusetts would consider Mr. Willard as a very incompetent or unfit man.

Mr. LODGE. I should regard him as a man of the highest competency, as I know him to be; but what guaranty have we that he is to be left in control? When the Shipping Board was organized it had at its head Mr. Baker. I disagreed with some of Mr. Baker's plans in the bill, but he is a ship man, familiar with the running and conduct of ships and an authority on the subject; a man fit to be there. He, however, has disappeared.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Missouri?

Mr. LODGE. I yield.

Mr. REED. If the Senator will permit me, I call attention to the fact that it stands here conceded by the authors of this bill that it is not expected that this railroad committee will remain in control; it is not proposed that they shall direct the transportation of the country. On the contrary, it is proposed that they shall simply be here to carry out orders that are given to them. That has been conceded time and time again upon the floor in this debate, and it is plainly in the bill. So we might as well get it out of our heads now, and it will be a mistake on the part of any Senator who votes for this proposition if he does it upon the idea that four or five wise railroad presidents are going to sit here in Washington, distribute this business, declare these priorities, and work out the intricacies of this problem. They are to take their orders from somebody else who is to be hereafter appointed. Having received those orders, they will then, of course, execute them as best they can.

Mr. LODGE. Yes; probably somebody, as I have said, of whom the country has never heard.

We have these tremendous alarms brought in. The newspapers this morning have a statement of Mr. Price in regard to the impending destruction of the United States and of all the allies. That is the letter to which I referred yesterday as what was shown me the day before. I will not argue about it. It was violently alarming. What was going to save us? Why, to allow somebody to build wooden ships. What is going to save us if you turn in another direction? To confer huge powers on somebody to control the food supply of the country. Each one is going to save us; and the burst of terrific alarm always precedes a proposition to give power to save the country through building wooden ships or putting maximum and minimum prices on food or regulating railroad transportation in every possible direction—each one is necessary to salvation. The trumpets sound the alarm and then we find a bill is summoned forth to give powers to somebody who was never heard of yesterday, and who gets his appointment to-morrow.

Mr. NEWLANDS and Mr. SHAFROTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. NEWLANDS. Mr. President, I wish to say, in reply to the Senator from Massachusetts [Mr. LODGE], that it has been the earnest desire of the Interstate Commerce Committee to avoid giving unnecessary powers to anyone. The committee, however, found itself confronted by the situation that there are five nations or more engaged in war with Germany; that we are at war with Germany, and we are to conduct that war in two ways: One is by helping the allies, and the other is by active movements ourselves.

We have confronting us the most thoroughly organized military power in the world; a power unequaled in military efficiency in the history of the world. In a condition such as prevailed during our late Civil War, the war of the Nation was against a section of the Nation, which was unorganized, unequipped, and unprepared for war, a war in which both sides could vie with each other in inefficiency without affecting the result substantially for a considerable period of time; but we are now engaged in a war for which we are unprepared, and with a country that is prepared beyond all experience in history.

We look upon the history of the world, and what do we find? That in every war success depends practically upon the leadership of one man, control of all the energies of a nation by one man, and that the trusted man of the nation. These war powers, unusual under ordinary conditions, not at all belonging to democratic institutions, are absolutely necessary not only to maintain the principles of democracy but the existing life of democracy itself.

Mr. REED. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Missouri?

Mr. NEWLANDS. Yes.

Mr. REED. The Senator states that history proves that all wars are conducted and won by one man. Will the Senator kindly tell us what one man is now conducting the war on behalf of England?

Mr. NEWLANDS. It is perhaps a misfortune that there is not one.

Mr. REED. But she is putting up the greatest fight that has been waged in history.

Mr. NEWLANDS. All great wars of history—the wars conducted by Alexander the Great, the wars conducted by Julius Cæsar, the wars conducted by Napoleon Bonaparte—have been wars in which the judgment of the nation has been exercised in discerning the commanding qualities of one man and intrusting to him leadership.

Mr. REED. Mr. President, if the Senator will pardon me further, will not the Senator please tell me what one man is winning the war for France?

Mr. NEWLANDS. The war is not being won.

Mr. REED. Well, will the Senator please tell us, then, what man is winning for Germany?

Mr. NEWLANDS. The Emperor.

Mr. REED. The Emperor! I deny that. If it had not been for Hindenburg, the Emperor would have been licked long ago, and a lot of other men with him.

Mr. NEWLANDS. Hindenburg is one of the Emperor's lieutenants. The Emperor has almost unlimited power. Now, Mr. President, the one country that has been efficient in the present war has been the country that is under the direction practically of one man, whose will is law, and Germany——

Mr. REED. Is that what the Senator wants now in this country?

Mr. NEWLANDS. Understand me, I am stating what history is, and not what I want.

Now, Mr. President, what has Germany accomplished? She has seized all the adjoining territory. She is now in possession, if I recollect aright, of the whole or portions of six countries—Belgium, northern France, Serbia, Roumania, Montenegro, and part of Russia. She owes this to the high efficiency of her organization, her discipline, and her preparation; and this great Nation, without preparation, without discipline, without efficiency, is now challenging the dominant nation of the world.

With France nearly exhausted, with Russia chaotic, with England near the maximum of her preparation, the burden of this great war is to fall upon America; and concentration of power is necessary somewhere, and where shall it be placed? Where must it be placed under our Constitution? In a council of 10? In a responsible ministry? Does our form of government contemplate that? No. In our organic act the people have ordained that the President of the United States shall be the Commander in Chief of the Army and the Navy, and under our Constitution he is vested with all executive power. So the very theory of our Government as to executive power is that the power shall be vested in one man, and that a man elected every four years by the people of the United States. If we should desire some other Commander in Chief, we could not secure him; we could not give him power.

The people have acted under the Constitution, and there in the White House stands the Commander in Chief of the Army and the Navy. Yet in this condition of peril we are wasting days and weeks in arguing the old principles of government, the essential principles of democracy, as to how much power we can give the Executive with a view to saving the Republic, and how much we shall withhold!

Mr. President, I have no fear of democracy. Democracy is progressing with giant strides throughout the entire world. Just now autocracy, represented by Germany, is at war with democracy, and thus far has been everywhere triumphant on land; but we see the workings of democracy in Russia and everywhere else, and while temporarily democracy has weakened and paralyzed Russia, it will ultimately be her strength. Autocracy is dying, but the German federation must be beaten, and finally beaten, in order to secure the triumph of democracy. In that great contest are we to be quibbling over the power that we will give the Commander in Chief of the Army, upon the assumption that unless we withhold from him power democracy will be imperiled and a despot will be enthroned?

Mr. SMITH of Georgia. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Georgia?

Mr. NEWLANDS. Certainly.

Mr. SMITH of Georgia. It is not that democracy will be imperiled, but that you will hang a sword over all business and over every industry in this country, creating an uncertainty about it that will make every intelligent man quit doing anything to the extent that he can.

Mr. NEWLANDS. I am very glad to hear the Senator from Georgia take that position. I wish I could be sure that the Senator from Missouri would take that position. As I understand, the Senator from Missouri feels that democracy is imperiled; that we are about to create a despot who will hold on for all time to the power which we unwisely give him in this great conflict.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Missouri?

Mr. NEWLANDS. Certainly.

Mr. REED. The Senator can find nothing that I have said that warrants him in asserting that I made any such charge. The Senator has found me inveighing against the placing of great and arbitrary powers in the hands of some gentlemen whose names we do not even know; he has heard me argue upon the floor of the Senate against disrupting and destroying the business of the people of the United States by turning it over to a lot of men who want to assume the unconstitutional powers and prerogatives of dictators. The only time I am alarmed for democracy is when I see a man stand on the floor of the United States Senate, as the Senator has done, and hear him proclaim that the democratic governments of the earth are trembling in the balances of destruction and about to go down before the blows of a despot, and then hear him urge that, because that despot is successful with his despotic power, we ought to concentrate all of our powers of government in one man. That is the only time I tremble; and yet I know the Senator is too much of a patriot to mean what his words imply.

Mr. NEWLANDS. Mr. President, my words will stand in the record and will indicate my meaning. The Senator disclaims any fear for democracy from the grant of these extraordinary powers.

Mr. REED. Oh, no—no, no! I said I disclaimed the idea that if we gave these powers the President would set up a despotism and perpetuate himself in power.

Mr. NEWLANDS. Very well. The Senator, as I understand, disclaims the idea that the temporary grant of these powers in time of peril involves danger to democracy.

Mr. REED. No; I do not disclaim that.

Mr. NEWLANDS. The Senator does not disclaim it? Very well; then I was mistaken.

Mr. REED. Let me say it again. I disclaimed the idea that I have charged, or now charge, or insinuate, or mean, that if we grant these powers the President of the United States is going to set up a despotism and try to perpetuate himself as a despot; but I nevertheless say that you can not grant the powers that you seek to grant by this bill without infringing upon the constitutional liberties of the people, without disrupting the business of the United States, without setting up petty despots and dictators, and that that is un-American and undemocratic, and I will add the word "infamous."

Mr. NEWLANDS. Then I think, from the explanation of the Senator, that I was justified in my original statement.

Mr. REED. We will stand on the record, then.

Mr. NEWLANDS. I had hoped that the Senator from Missouri had taken the position of the Senator from Georgia [Mr. SMITH], that this bill would merely disturb the business activities of the country, and I was about to address myself to that, but I find that I did not misapprehend his remarks of yesterday and the day before regarding "the man on horseback." He does apprehend that the grant of these powers will weaken democracy, while I say that the grant of these powers will save democracy.

Mr. POINDEXTER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Washington?

Mr. NEWLANDS. Certainly.

Mr. POINDEXTER. There is nothing in the powers conferred on the President in this bill that is any more obnoxious than the powers that are exercised almost every day by unknown private business men in the railroad corporations. Whether they have the right under the law or not, as a matter of practice and as a matter of fact they favor one shipper and disfavor another, prefer one line of shipments and postpone another. I am not any more apprehensive of giving that power to a public official than I am of leaving it in the hands of private railroad companies.

Mr. NEWLANDS. Mr. President, let us get out of our minds, then, the idea that we are going to drift into a despotism.

Mr. SMITH of Georgia. Mr. President——

Mr. NEWLANDS. The Senator from Georgia disclaims it, and the Senator from Missouri half disclaims it.

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Georgia?

Mr. NEWLANDS. I should like to go on. If the Senator wishes to ask me a question, however, I will yield.

Mr. SMITH of Georgia. I was going to ask the Senator a question, but I will not.

Mr. NEWLANDS. As I say, the Senator from Missouri half disclaims it, and I do not intend to address myself to that point any further. If we have got to temporarily Prussianize America in order to beat Prussia, I am willing to do it.

Mr. REED. I thought so.

Mr. NEWLANDS. Though there is nothing in the powers granted in any of these bills that reaches that limit.

I shall have no fear for democracy. We are engaged in a struggle to save democracy, to save the rights of the people, to save the liberties of the masses, to save individualized government, to save the rights of races and peoples to determine their own form of government, and above all we are for the power of the people, as expressed in a law-making body. If we are successful, there will not be a nation in the world that will not have a parliament of the people making its own laws and providing for their execution.

Now, Mr. President, as to the danger to business: The Senator from Washington very wisely remarked that somebody must determine the order of transportation; somebody must determine the order in which trains shall run; somebody must determine the manner in which trains shall be made up; somebody must determine the kinds of traffic that shall go on each one of of these trains. That power is being exercised now by the officials of our railroads, and this is a mere question of order.

Mr. BORAH. Mr. President——

Mr. NEWLANDS. The question is whether, in the matter of order, in the supreme moment——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Idaho?

Mr. NEWLANDS. I do.

Mr. BORAH. I do not desire to interrupt the Senator's argument, but I wanted to ask a question with reference to the status of this bill. We adjourned a couple of days ago in order to permit Senators to come to an agreement. May I ask the Senator if any progress has been made with reference to adjusting these differences?

Mr. NEWLANDS. No. I was going to reach that in a moment, if the Senator will permit me. I will explain that.

The question, then, is one of order. The order must be determined by somebody; and at this time it is of the highest importance that preference should be given not only to ordinary munitions of war and supplies of war, but to the materials that enter into those munitions, into supplies that not only go to great military forces but that go to peoples and nations the feeding of whom is absolutely essential to the success of the war in which we are engaged. You can not limit the sphere of activities into which the United States may be called upon to enter so as to insist upon the order in which things shall move which are essential not only to the armies but to the nations themselves engaged in the war. If somebody is to determine that order, why should not the President of the United States, knowing the military status and necessities and acting for the entire people, determine it, with a view to the successful prosecution of the war in which they are engaged and under the general rule prescribed in this bill of providing for the national security and defense?

Mr. President, this bill has dragged along now for a week. That has been the only question in it of any importance. The question was raised as to whether damages secured to the railroads by reason of these preferential orders should be also secured to the shippers, and we solved that question by withdrawing that entire provision from the bill.

Mr. REED. When was it withdrawn?

Mr. NEWLANDS. Last night.

Mr. REED. After Congress adjourned?

Mr. NEWLANDS. No; it was done on the floor. So this is the only question, and for practically a week, when the Nation is in peril, we have been arguing the question, first, as to whether somebody should be given the power to determine the order of the shipments in which the security and the safety of the Nation are involved, and, second, as to whether that power should be given to the Commander in Chief of the Army and Navy, selected by the people of the United States, or whether it should be given to a quasi judicial body, organized to deliberate, not to act, at a time when promptitude of action may be of the highest moment.

Mr. President, an endeavor was made yesterday to reconcile these differences. Prominent Senators in opposition to the bill were invited by several members of the Interstate Commerce Committee to a conference, and the result was the shaping of a provision which, as I understood it, was the utmost concession that the Senators opposed to this bill were willing to make. The proceedings were purely tentative. I had no power. these members of the committee had no power, either from the Senate or from the Committee on Interstate Commerce, to bind. It was tentative. I withheld my approval from that provision, though it was acquiesced in by some, until I could consult the friends of the bill. I did consult the friends of the bill, and I found that if we accepted that provision we would have as hard a contest with reference to the passage of the bill as if we let the bill remain as it is. As I believed in granting these powers to the President, and was willing to make a concession only in order to pass the bill speedily and effectively, realizing that the conclusion of the debate would come no sooner by reason of the change, I came to the conclusion that it would be unwise to recommend it; and that was the conclusion of the Interstate Commerce Committee, assembled last evening for the purpose of considering this matter.

Mr. President, what are the objections urged during this deliberation? The objection made to the limitation sought by the opponents of the bill was that it would restrict the President to a narrow field of operations. The friends of the bill realized that a scarcity of food in New York might be as fatal in this war as a scarcity of food at the battle front in Europe; and for that reason it might be most important, if during a congestion of traffic caused by a strike or other bad conditions there was a scarcity of food in any part of the country, for the President to take hold of the matter and determine priority in shipments for the purpose of relieving purely a domestic condition of distress. Would you deny him that power? Does not the successful prosecution of this war depend not only upon coordinating all the industries of the country and bringing them to our relief upon the battle field but upon sustaining the energies of the country in every enterprise that enters into the war, and also, above all things, upon preserving order and contentment and satisfaction at home?

Mr. SMITH of Michigan. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Michigan?

Mr. NEWLANDS. Certainly.

Mr. SMITH of Michigan. I should like to ask the Senator from Nevada if he believes that such powers as he seeks to bestow could and would be exercised fairly with reference to all sections of the country? Under the conditions which the Senator from Nevada has just described, the seaboard is, of course, paramount. Does he believe that all sections of the country would be fairly and equitably treated? Does he not believe that our commercial and industrial and agricultural necessities are vital; we can not furnish the money with which to equip our armies and defend our country unless we have some way of earning it? We have got to get it from the soil or we have got to get it from the factory.

I want to say to the Senator from Nevada that the city of Detroit, of which I am so proud, depends for its prosperity upon a just and fair equalization of the transportation facilities of the country. Transportation facilities are vital to our existence. We can furnish men and money, but our right to labor must not be abridged. Detroit was allotted $33,000,000 to raise for the liberty loan; and Detroit to-night, in my opinion, will report nearly $50,000,000 for the liberty loan. It comes out of our prosperous industries, and it is a great deal to say that any one man shall have the right to declare whether or not our industries and our business are of paramount importance. They are important to the prosperity of the country, and the country can not defend itself if it is not prosperous.

Mr. NEWLANDS. Mr. President, I think the President can be acquitted of any malign purpose to afflict the industries of any section of the country.

Mr. SMITH of Michigan. I do not know what the Senator meant by that.

Mr. NEWLANDS. I can assure the Senator——

Mr. SMITH of Michigan. I do not know whether the Senator meant to infer that I said he would be actuated by any malign purpose. I did not say any such thing, and what I said was not open to the remotest construction of the kind, because I have confidence in the President of the United States. But he is being seriously burdened in this crisis. Responsibilities and duties are being lodged on him which it would take many men to perform. If he can give attention to them in their detail, I shall be very glad; if not, then let the Senate, which represents the States, delegate this transportation task to some responsible officer of the Government who has both time and experience for the task. No novice or patronage monger can do this work. It is a task for a giant, and the President ought not to be burdened with such a duty.

Mr. NEWLANDS. Mr. President, I assume that the President can be relied upon simply to exercise these powers for the national security and defense, as the law provides, and I do not think it can be assumed for a moment that this power is to be exercised in such a way as to paralyze the industries of the country or of any section.

As I remarked a few moments ago, it is simply a question of order as to whether or not these shipments, essential to the prosecution of the war and to the maintenance of the people fighting Germany, not only the combatant portion but the noncombatant portion, shall be left simply to chance, to the determination of inferior officials of railways and subject to a law which compels equality of service and forbids priority and preference of service or shall be intrusted to the Commander in Chief of the Army and Navy of the United States.

So I decline to go into the field of conjecture to paint pictures of distress arising from paralyzing industries here and there. I assume that the man who has behind him a vote of the majority of the people of the United States is a man of some judgment and discretion, and that this power will be exercised under the standard imposed by the bill with judgment and

discretion and with a view to promoting not paralyzing or destroying the industries of the United States. I assume that he will be as intent upon preserving the vital powers of the United States as he is upon preserving the vital powers of our allies and that he will act with discretion and judgment.

I was addressing myself to the suggestion which was made that we should give to the President the power of directing priority as to munitions of war and the things that enter into the supplies of war and beyond that the determination of priorities should be intrusted to the Interstate Commerce Commission.

The objection to that is that the power is one and it ought to be in one person or body, and it would be unwise to divide the power, to give one part with limitations to the President when it might be absolutely necessary for him to go beyond the limits prescribed and to give another part to the Interstate Commerce Commission acting with the deliberation with which that commission usually acts and with which it ought to act.

Now, Mr. President, how is the President to act? We all admit that he is responsible for the executive administration of the United States, and that he can not do all the things that are necessary to be done in government; that there must be subordinate officials and boards acting under him, and we therefore give him the power to give these directions regarding priorities through either existing officials designated for the purpose, or, if he sees fit, to go outside and create officials for the purpose. It gives him the power to compensate such new officials, and if he goes outside those persons so designated do not remain outside the Government; they become a part of the executive department of the Government. They are not irresponsible people; they are responsible people whose appointment is provided for by law.

Under this act the President can not only select a single individual, but he can select several and turn them into a board, or he can, if he chooses, designate the Interstate Commerce Commission as the medium through which this power shall be exercised, or he can take an individual of that commission, skilled and experienced as they all are, and assign him to the task.

Much has been said about the existing organization, much of it by way of undeserved criticism, carping, and cavil. The President is represented as a man who is reaching out for power. If he is reaching out for individual power, why was the Council of National Defense organized upon his recommendation, a council consisting of six Cabinet officials? If he wished one-man power and proposed to act without counsel or advice or without getting in touch with the great mass of the people, why did he ask for this Council of National Defense, and then why did he suggest that in addition to that the great body of the people should be represented in cooperation with the Council of National Defense by an advisory commission and membership in the various committees of nearly a thousand men, almost all of whom are prominent in the industries and the activity and the enterprises of the country. That indicates that he wishes to go to every source of every industry in the country and secure cooperation in the exercise of powers intrusted to him, thus seeking their advice seeking their cooperation, and appealing to their patriotic instincts to serve without reward and without regard to their individual interests.

I believe that the men on those various committees are responding to the appeal which was made to them. We are not conscious of the activities that are being employed by those men or the time which is being given up by them in the various sections of the advisory commission in considering the various problems relating to the industries and activities with which they are connected that relate to the security and defense of the Republic.

There could not, in my judgment, in any democracy be established a form of administration that would be so thoroughly considerate of the vast mass of democracy and indicate so thoroughly a desire to consult with the people as the source of all power as this form of administration which has been recommended by the President and adopted by Congress. That machinery is our machinery, and why should we hold it up to ridicule and contumely whenever the occasion presents itself?

How it is acting with reference to this very matter. At first there were sneers with reference to the participation of railway officials in these things. Of course, it was assumed that railway officials would always act selfishly and in the interest of the corporations which they represented. Now, it seems to be universally concluded that the one man who is at the head of the advisory commission, Daniel Willard, of the Baltimore & Ohio, is one of the best men in the country, and all now on both sides express confidence in him. He is a man who has risen to the highest position in the railway world from the very lowest position in it—that of a trackman on a railroad. He is thoroughly experienced in everything that belongs to transportation, and is patriotically giving his entire time to this work and disassociating himself practically from the work of the corporation with which he is connected, giving advice in which he is careful to divorce himself from the special interests which he has represented. He has appeared before our committee, and before our subcommittee, and I wish to say that there is no man in this country connected with large enterprises who has more thoroughly won my respect and my confidence than Mr. Daniel Willard.

Now, you say that he will probably be the man through whom this power will be exercised. I do not know whether he will or not, but if he is he will be a good man.

Some suggestion is made that instead of authorizing the President to appoint these intermediate officials through whom he is to communicate his directions to the railroads he ought to seize upon the executive committees of the railroads themselves for that purpose. I can imagine what a storm of criticism would have arisen if we had put into this bill a provision to the effect that this power of direction should be exercised by a committee of railway officials. We would not then have had, as we now have, the despot and the man on horseback, but we would have had the octopus. The octopus would have been described to us with its tentacles reaching out to all the enterprises and energies of the country and grasping even the President himself in its embrace.

Now, as to the character of this executive railway committee, the bill provides that the committee shall not give orders but it shall obey. It is a committee of five officials—high-minded, honorable men, men not connected at all with the scandals of railway management, selected by all the railroads of the country and empowered to act for them. Would there be any more workable conception than this idea of bringing all the railroads of the country, with 250,000 miles of track, under the control of one executive committee and putting that committee at Washington, and placing it under the direction of the President, so far as the national security and defense are concerned in priority of shipment?

Those who criticize the bill say no, we should not make that committee the body to receive and obey the President's orders; we should create an original body for giving orders, and it should have the power to determine the order in which the shipments should be made. There is not the slightest doubt that the President in all these matters will ask the advice of the executive committee as to the best method of carrying out the powers conferred upon him, but the power is his; it belongs to him as the Commander in Chief of the Army and Navy; and whilst he may consult them in an advisory capacity, they stand there as instrumentalities of the railroads to obey his orders issued in the interest of the national security and defense.

Now, Mr. President, let us dismiss these pictures of the despot, the man on horseback, and the octopus. Let us determine that talk shall no longer be despot in the Senate of the United States. Let us rival in efficiency the executive branch of the Government under the leadership of Mr. Wilson. Let us parallel that efficiency, efficiency that is being displayed by the National Council of Defense and the advisory commission, by prompt and speedy action here. Let us give the Commander in Chief the powers that are essential to the successful conduct of this war, and let us adjourn and let the Commander in Chief conduct the war instead of compelling him to turn his eye away from scenes of contention abroad to scenes of contention at home and scenes of contention here.

Mr. President, I hope we will have action upon this bill to-day.

Mr. SMITH of Georgia. Mr. President, we have heard a very remarkable speech from the Senator from Nevada [Mr. NEWLANDS]. It has seemed at times he thought the President as Commander in Chief of the Army and Navy of the United States was also the controller of the property of every enterprise in the United States, of every farm in the United States, and the right of every citizen in the United States to live or to enjoy the privileges of activities of any kind. That is so unreasonable that it hardly needs reply.

What power as Commander in Chief that the President required to carry on the war has been withheld from him one moment? None.

The Senator talked about occupying time resisting legislation. I suggest to him a criticism of time used to defend indefensible and unneeded legislation.

The President is Commander in Chief of the Army and Navy. What has that to do with discriminating between two of my constituents in Georgia as to whether fruit shall be hauled

from the State or as to the kind of fruit that is to be hauled? Yet that power is given in this bill. I resent it because I wish my constituents to have the privilege of conducting their business as they have been taught to conduct it for years gone by. I resent it because it is not needed to conduct the war, and nobody has shown the slightest reason why this power should be given in order to conduct the war.

Mr. KING. Will the Senator yield?

The PRESIDING OFFICER (Mr. KENYON in the chair). Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMITH of Georgia. I do.

Mr. KING. Does the Senator from Georgia feel that a fair and reasonable interpretation of the bill which has just been discussed by the Senator from Georgia would justify or warrant the President of the United States, or any agency created by the bill to discriminate between the two constituents of the Senator from Georiga? Does not the Senator think that if this agency or the President should show any priority so as to help one constituent in his private business at the expense of another it would be in direct contravention of the terms of the bill and subject the President of the United States to criticism if not to impeachment because of the infraction of a positive statute which limits his powers?

Mr. SMITH of Georgia. I will answer the Senator that it would not subject him to impeachment. He will have practically nothing to do with it. It would be within the power of the agencies which he creates.

We have had called to our attention discrimination by subcommittees of the advisory board. If they consisted of a legally established and formally named board of men with legal responsibilities they would not do it, but organized as they are in the indefinite way in which they are selected, without statutory responsibility and unapproachable except as they study to a considerable extent their own business——

Mr. KING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield further to the Senator from Utah?

Mr. SMITH of Georgia. Yes; I yield.

Mr. KING. As I understand the last statement of the Senator from Georgia, those controlling the operation of the railroads—and by that I suppose the Senator refers to the railroad commission that have been acting under the Council of National Defense—have shown discriminations in matters, as I understand him, affecting the private enterprise and business transportation of some of his constituents. If that be true, if they have shown discriminations are they not subject or are not the railroads subject to the pains and penalties that the railroads would have been subjected to at any time before the breaking out of this war?

Mr. SMITH of Georgia. The Senator has misconstrued my language. I did not refer to the board of railroad managers and I did not refer to discriminations in transportation. If there have been discriminations in transportation, of course as the law now stands the parties against whom the discrimination was made would have legal redress, but after the passage of this bill if discriminations take place they will have no redress.

I was referring to the difficulty of handling your affairs when placed in the charge of men really without office, of an indefinite character without official responsibility named by statute or as an incident to the office which they fill, and yet with unlimited power.

I was referring to the fact that under this bill the President could put anybody he saw fit in charge of priority of shipment with the power to determine to whom shipments should be given and to whom they should not; that these men not holding public office would not have attached to them the responsibility that would attach if we named the office and required them to be appointed by the President and confirmed by the Senate and if we defined the duties of their offices; with no obligation to make their names public for months they might exercise the power and be publicly unknown.

The President could not, if he had nothing else to do, perform the duties covered by this bill. If it was simply to give him the right to requisition the railroads for transportation for military supplies or those things required to produce munitions and military supplies or even also food supplies for the Army and for the armies of Europe, I would not object to the bill. The issue we make upon the bill, Senators, is that it does not stop there at all. It extends to every line of private business. It gives an unlimited and unrestricted right of discrimination.

I understand the language is used "when he deems it necessary for the national security and defense," but that does not mean that the particular shipment is for that purpose. It does not mean anything of that kind, and it would not be so construed. If you create a separate board and require them to apply such a rule to each discrimination, it will occupy a different position.

Mr. CUMMINS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Georgia yield to the Senator from Iowa?

Mr. SMITH of Georgia. I do.

Mr. CUMMINS. Does the Senator desire to repeal the act of 1906, in which the President was given the power to declare a preference or priority for all things connected with the Army and the Navy and for war materials?

Mr. SMITH of Georgia. Not at all. I recognize the necessity for that provision.

Mr. CUMMINS. That the Senator wants reserved to the President. This is what bothers me, and I put it now to the Senator from Georgia for such answer as he may think it deserves: The words "war material" used in the act of 1906 are very elastic and, of course, susceptible of a very broad interpretation. Suppose we should give the right of preference or priority to either the Interstate Commerce Commission or to some other board in shipments other than those which involve war material, would we not have this situation: The President orders certain priorities; the Interstate Commerce Commission or another board orders other priorities. How are we to reconcile the exercise of these two powers when we start out with the assumption that the facilities of the railway companies are inadequate to move all the traffic of the country? Would we not very soon find ourselves in inextricable confusion?

Mr. SMITH of Georgia. I do not think so. I think it would be very easy to provide that in the exercise of the powers heretofore given to the President they should take precedence, and that whenever he made a requisition for military purposes it should take precedence over all other orders, and that the railroads that received the orders should promptly enforce them.

This bill provides for a committee representing the railroads, to be stationed in Washington City. It provides that they shall obey the orders issued by these representatives of the President with reference to priorities, and, following those orders, disregarding ordinary rules of priority of shipments, the railroad companies should be free from any liability to the shipper. It would be perfectly easy to say that they should obey, first, the orders from the President with reference to the movement of supplies of a military nature and, second, that they could exercise additional priorities where the Interstate Commerce Commission regarded it essential as an incident to the condition of the business of the country, or with some language of limitation.

Mr. CUMMINS. Just one more question along that line. These orders could not be given with the idea that they are to be obeyed in a moment. Railway companies must arrange their affairs in order to give priority to anything anywhere. Suppose that the independent board or the Interstate Commerce Commission should direct a railway company to assemble its facilities in Minneapolis in order to transport flour to a certain part of the country and the railway company should proceed to carry out the order; that then the President, or some one authorized by him, should reach the conclusion that these same facilities which had been ordered to be assembled at Minneapolis were needed in Chicago for the purpose of transporting war material from Chicago to another point in the country, does not the Senator see that in that conflict we should render the whole transportation system inefficient and unworkable?

Mr. SMITH of Georgia. No; I do not think so. The railroads themselves are planning continuously the distribution of their cars to meet the demands of their shippers. They plan the distribution of their cars to meet the pressure upon transportation by the commerce in different parts of the country. Whenever the President issues an order at all he interferes with the organization; he interferes with that system of locating shipments and locating the cars for the purpose of meeting the pressure of transportation.

Really, the object of this bill is to free railroad companies from liability to shippers for making the preferences. That is the truth about it; that is the greatest object of the bill.

Mr. CUMMINS. That may be the object of some persons, but it is not mine. My object in supporting the bill is this: The act of 1906 is confined to war material. I believe that it is necessary, in view of the inadequacy of railway facilities, to extend the power to require priorities in things that are not, strictly speaking, war material. The railroad companies are under no obligation to give those other things preference or priority; indeed, it would be against the law as it now exists to give them preference or priority.

If we are to successfully carry on the system, which we are apparently about to organize, there must be legalized prefer-

ence or priority. Who shall direct it? Who shall order it? We have before us a bill, or we shall have presently—I do not say that I am in favor of it; I think there are some things in it that can not command my approval—a bill which has been reported to the House of Representatives, and which is now before our Agricultural Committee. It must be assumed that the powers that are sought there are to be exercised in view of and in connection with our war with Germany. No one would ever dream of providing such things if it were not for the exigencies, emergencies, and perils of this war. The things that are there systematized are not war material; and it would be utterly impossible to carry out the idea, whether or not it goes one-half the way suggested in the bill, unless the war power in our country is permitted to establish priorities or preferences in shipments of food, fuel, and the like.

I should be glad to see this power either in one person or in one body. I do not believe it is capable of division without the most lamentable confusion and inefficiency.

Mr. SMITH of Georgia. I wish to ask the Senator if he thinks it is possible for the President to perform it?

Mr. CUMMINS. No more than it is for the President to order a major general in a fight. The President does not say where the cannon on a battle front shall be placed; he does not say when this regiment shall advance and when it shall retire, and yet every order that is given by every officer of the Army is the order of the President.

Mr. SMITH of Georgia. But the organization of the Army is prescribed by statute. Congress provides for its organization, and we provide for no organization in this matter.

Mr. CUMMINS. I am not discussing that phase of it. I am discussing the question of indivisibility of power. I say this power can not be successfully distributed between two independent bodies, and it would be fatal to the practical operation of the project if it were divided.

If the Senate desires that the President shall act through a Cabinet officer, or through a board to be appointed by him, and confirmed by the Senate, I shall have no objection to that, and I never have had any objection to it. Still the action of that board would be the action of the President; the authority would be the authority of the President; and the only advantage which that system would have over the one proposed in the bill would be that the public would know who constituted the representatives of the President, and the Senate would have an opportunity to pass upon the qualifications of the persons whom the President might select and order to administer the power that we give to him. Still we would hold the President responsible for the exercise of the power.

The Senator from Georgia said a few moments ago that there was no one to whom to look for responsibility. I can not think of the subject in that way. If this bill passes in the form in which it is now before the Senate, or if there should be a confirmation of his representatives by the Senate, it would still be the President who is responsible to the people of this country, and they will hold him responsible for the faithful and intelligent exercise of this power.

Mr. SMITH of Georgia. Mr. President, they may hold him responsible; I am indifferent to their holding him responsible; I want service for the people, and the President can not render it. He will be of absolutely no use to them in the details of the performance of the duties.

I am not particular about the President being held responsible or his being praised or criticized. I am vastly more interested in the people of this country than I am in the President. I am more interested in my constituents than I am in the President. I care more for their welfare; I care more for the efficient service that is to be rendered to them than I do for the President's reputation. I care very little for high officers, except as they are to serve the people. What I am seeking to say is that under the plan of this bill there will be nobody to serve them with responsibility. There will be nobody to exercise this vast power whom they can reach or have a hearing before. They can not present their case to the President; he will not pass on it. They can not complain of unjust discriminations to him; he will know nothing about it. We, their representatives, will have permitted, if we allow this bill to pass as it is, the transfer of all of their rights as to transportation; we will have permitted the transfer of the privilege of creating priorities, in disregard of their rights as now established by law, under a bill which says they shall have no claim against the transportation companies or against anybody else on account of the withdrawal of their present rights. We will have taken from them their present rights, and permitted them to be changed, to be withdrawn, without even giving them a tribunal to pass upon the question; without even naming any responsible men who could hear them if they objected to what was being done.

I would vastly rather provide that this board of railway officers should carry the responsibility; I would rather in this bill say that the committee of railroad presidents should have this privilege, and put the responsibility upon them before the whole country for what is to be done than to leave the authority to men unknown.

Mr. WALSH. Mr. President, I should like to ask the Senator from Georgia a question with respect to that. Just exactly what responsibility would the Senator like to put upon these gentlemen? As I understand the bill, it contemplates that, by reason of considerations bearing upon the public security, upon the wise and effective prosecution of the war, it may be necessary to give priority to one class of goods over another. Now, how does this board know anything about the secrets of the military campaign, so as to enable them to determine whether the security of the country requires that one particular kind of freight should be given priority over another?

Mr. SMITH of Georgia. Why, Mr. President, this bill does not limit the ordering of priorities to the secrets of the war. If the Senator will put the limitations contained in his language in the bill, I will have much less objection to it.

Mr. WALSH. Mr. President, let me get down to a specific case. Let us take such an ordinary product as oats. They need oats over in Europe; they need them in France to feed the horses. We have some cavalry over there; the French have their cavalry, and oats are needed to feed the horses. The live stock of France likewise is in need of oats in order that they may be maintained; they need oats for feed. Well, we have some oats out in Montana. We produce a fine quality and a great abundance of oats. It is desired to get oats from Montana to send to France, and it is at that season of the year when practically all of the railroad service is utilized for the purpose of transporting beef to Chicago. But the oats are needed; they are needed imperatively. Now, who is going to say whether the shipment of cattle should give place to the shipment of oats? This railroad committee? It is a matter as to whether oats are so imperatively needed in France as that priority ought to be given to their shipment. How does the railroad committee know anything about that? That information all comes to the President. It comes to the President through the Army and the Navy in France and from the representatives of the President in France. The President, reaching the conclusion that the priority ought to be given, could easily send a direction to the railroad committee, "I want these oats sent forward and expedited as rapidly as possible." Let me inquire now of the Senator, How is that railroad committee constituted so as to be able to say whether oats should have a priority over cattle?

Mr. SMITH of Georgia. Mr. President, the Senator has not been in the room during all the time to-day, or he would have understood that those of us who oppose this bill as it is now drawn have distinctly declared our willingness to concede to the President the right to designate for priority of shipment any supplies needed for military purposes, the transportation of soldiers, the transportation of foodstuffs, and the transportation of supplies needed for plants engaged in making munitions and engaged in making ships.

Mr. WALSH. Mr. President, I have put to the Senator this condition, however: The oats are needed in France, not only as a military supply to feed the cattle and horses, but also necessary for the purpose of keeping up the economic conditions in France. At the same time, when we are going to send oats there for the military force, we want to complete the cargo with oats that will go upon the general market in France. I ask the Senator now, where he would lodge the determination of the question whether those oats should be given priority of shipment?

Mr. SMITH of Georgia. I would not give the President unrestricted power to control, except for military purposes or as to military supplies. I really doubt very much whether anybody ought to have such power. Now, this is the proposition that we have offered:

That during the continuance of the war in which the United States is now engaged the President is hereby authorized, whenever in his judgment such action is necessary to the prompt movement of the military and naval forces, equipment, and supplies, including the materials to be employed in and for the production of the same, of the United States or any nation making war against any nation with which the United States is at war, to direct that the same shall have preference or priority in transportation over all shipments by any common carrier by railroad or by water, under such rules and regulations as he may prescribe.

I think, Mr. President and Senators, that that is as broad language as ought to be asked. That certainly covers everything along the line that the Commander-in-Chief would be concerned with.

Mr. NELSON. Mr. President, if it is not disagreeable to the Senator, will he yield to me for a moment?

Mr. SMITH of Georgia. I yield to the Senator.

Mr. NELSON. I desire to suggest that I think the amendment of the Senator from Georgia is too narrow. I hope we can agree on something like this, which I suggest to the Senator:

That during the continuance of the war in which the United States is now engaged the President is authorized, if he finds it necessary for the successful prosecution of the war, to direct that such traffic or such shipments of commodities as may be essential to the prosecution of the war, shall have preference or priority in transportation by any common carrier by railroad or water, under such rules and regulations as he may prescribe.

That makes it broad enough to cover everything connected with the prosecution of the war. With all due respect to the Senator from Georgia, I think the enumeration in the amendment suggested by him is too narrow. I would broaden it so as to cover everything pertaining to the successful prosecution of the war. Therefore, I shall offer an amendment such as I have read, and I hope that we can agree on it, for I concede that we need such legislation in the emergency which now confronts us.

The Senator knows how in "piping times of peace" the cars on our railroads have been stalled on the Atlantic seaboard and used as warehouses, thus preventing the transportation of goods from the interior to the seaboard. When it comes to a time of war, we do not want anything of that kind to happen. In order that we may be successful in the prosecution of the war, we must lodge the power somewhere, and I can not conceive of any one in whom that power could so well be lodged as the President, who is Commander in Chief of the Army and the Navy.

If the Senator will bear with me a moment further, there is no executive officer in whom such power could be lodged against whom the same criticism would not be made, namely, that too much authority was being conferred upon him. The men who framed the Constitution of the United States could have risen in the convention and made as plausible arguments as the Senator from Georgia and the Senator from Missouri have made against that paragraph of the Constitution making the President the Commander in Chief of the Army and the Navy. They might have said, as has been said here, "that is lodging in the President a most dangerous power; Congress ought to have something to say about that; and we should never give the President the unlimited power to be Commander in Chief of the Army and the Navy."

Mr. SMITH of Georgia. Mr. President, I shall read with a great deal of pleasure the suggestion of the Senator from Minnesota. It may be that it points the way for an adjustment of this question. It certainly does not go nearly so far as the provision of the bill as drawn. The provision of the bill as drawn has no stopping place. I ask the consideration of the Senator from Minnesota to that fact. It gives unlimited power of interference in transportation. Where only those things are to be given priority which are essential to the conduct of the war, the priorities will be limited, very limited; they will not touch the great bulk of the transportation of the United States; but as the bill is drawn the priorities may reach practically everything.

Mr. CUMMINS. Mr. President, I have authority to speak only for myself, but I think the language of the Senator from Minnesota [Mr. NELSON] is a little broader than the language in the bill. He makes the test "the successful prosecution of the war." The bill makes the test "the public security and defense." I believe they are substantially equivalent expressions; and, while I do not pretend to speak for any other member of the committee, so far as I am concerned, if we can agree upon the substitution of the words "successful prosecution of the war," I would be very glad to accept such an amendment.

Mr. SMITH of Georgia. I would not agree to any language which carries to an unknown board the privilege of unrestricted discrimination as to shipments. I think, whatever the power is, as the President can not execute it himself, it is desirable to name a board of transportation priorities. The first draft that was gotten up was shaped along the line of the creation of a priority board—a board of transportation priorities; an organized body of men—through whom the President could act, but charged by Congress with a responsibility—men who would be held responsible for their acts, men upon whom shippers could call, and before whom they could protest interference with shipments. There is nothing of the kind in this bill. This bill will permit the President to name men, to change them, and move them around, like the advisory committee of the Council of National Defense. It will leave us with no known place where this power is being exercised.

I insist, Senators, that it is the duty of the Senate to legislate for the people; and, while they may desire to confer a power upon the President, they ought to confer it in a way where they have themselves determined something about the administration of the power.

The Senator from Nevada [Mr. NEWLANDS] spoke of the great national necessity. From the tenor of his argument I was almost led to forget that France and Great Britain have 16,000,000 more population than has Germany; that France, Great Britain, Canada, Australia, and Italy have 10,000,000 more population than Germany and Austria combined; that they are crumbling the Germans now and driving them back on the west; that France and England have had nobody but Germany to fight in the west, and they have had, as I have said, 16,000,000 more population than Germany with which to fight; that Germany and the German people have been compelled to dig from the ground the food for themselves and their children and to make their ammunition; that they are scarce of copper for ammunition and without cotton to make clothes or powder, while France and England have been furnished ample food from the United States, ample copper, ample cotton, and all the necessaries with which to conduct a war.

To be sure, they were not as ready at first, but they are better prepared now. Now they have the better guns and the better ammunition; and it is gratifying to me, every two or three days, to see how the English crumple up the German line and drive them back. At first, England and France had a hard time; they were not the equal of the Germans in their military supplies, but to-day they are the superiors.

I can not feel that such a dire danger hangs over us and threatens us as does the Senator from Nevada. With England and France, 16,000,000 people stronger than Germany, getting all the foodstuffs and all the ammunition they need from the United States, and a good deal of money besides, and with Germany hemmed in and cut off from supplies, I do not think the English and the French are in any danger on the western side of Europe, even if Russia does not keep on in the fight. They have a large majority over the Germans in population, and they have every advantage in ammunition and supplies, and they are showing that they know how to use them. I have not a question that, man for man, an Englishman or a Frenchman, equally equipped, can whip a German. The only reason they did not do it at first was that the Germans had the better ammunition and the guns; they had so much better artillery and so much greater supplies and ammunition; but now, that condition has utterly changed. Why, only two or three days ago the English blew up a whole line of Germans with mines, and this morning we hear of the German line moving back 2 miles. We might fight the submarine and continue to put food and ammunition in England and France. I am confident they can win the fight.

I have not the dread of the German that the Senator from Nevada has. The German is a fine, stolid character in industry; but there never were any men, when you finally got them at it, who fought better than the English, unless it was the French, except the people of our own country. I do not believe there ever were such soldiers as the two lines that faced each other when the blue and the gray met in Virginia. I am tired of being frightened by Germans, or hearing talk about Germans when I am not frightened. I am tired of that nightmare being brought out to scare the children and the women. Actually there are some good women in this country who are looking for 10,000,000 Germans to come over, land any day, and march to Washington to-morrow morning. Why, they could not land. If they had all the vessels in the world they could not bring over more than 500,000 at a time; and if we will keep enough officers in the United States to train these boys we are calling out, by this time next year we will have a million and a half of splendid citizens from every State of the Union, magnificently trained. Why, if they should bring a million Germans at a time they could not land when we get a million and a half of our men prepared to meet them.

I hate to see the effort to play upon the credulity of the public by this talk about Germany coming over here to fight us. I believe in preparedness, too, and I have some vision on the subject. In August, 1914, I urged a large appropriation for the Navy. I was ready then, when the industries of the country were almost stopped, when men were out of work, and every kind of material was cheap, to vote a billion dollars, put it in our navy yards, and prepare at once for the possibilities of the future. But we could not make any progress. The man who thought it possible that we might become involved in war was considered then to be suffering from some disturbed mental condition. I am not much more disturbed now than I was then. I am sorry we did not do this work when things were cheap, and save a great deal of money; but we did not. Now, I am not willing for the women and children to be disturbed by the threat

of a German invasion—not just at this time—and I am not willing to see the people of the United States have all normal conditions upset by any such hysteria.

Mr. President, our people have built up their industries and their activities with individual self-reliance. They have been wlling to take their chances to sell the products of the farm at what the market would bring them. Our manufacturers have built up their great enterprises relying upon the privilege of shipment according to established rules and sales in the market at the prices which demand and supply fixed. If we set ourselves to the task of uprooting all the principles upon which our business has been established, we will break it down. Instead of strengthening the Commander in Chief, we will break him down.

Why, during the Civil War Mr. Lincoln asked for no such powers; and we were all right on the same soil then, without any ocean separating us. He never took charge of the food supply in order to fix maximum and minimum prices. He did not ask Congress to give him the right, as Commander in Chief of the Army, to commandeer all the products of the country. If he had, he would have paralyzed it. It is not so much the fear of despotic power in the long run against which I protest, because our people are not going to stand it from anybody. It is the immediate injury to the prosperity of the country which I fear. It is the immediate blow that legislation like this will inflict upon our whole country against which I protest.

If the growers of melons and fruits and vegetables in Florida and Georgia have no rights of shipment, why should they produce them? If some invisible board created by the President here in Washington is to have the power of discrimination and when they telegraph their Senators their Senators reply, "We can not find them; they are here, but hidden," they will quit growing fruits and melons and vegetables. If the lumber interests are to be suppressed in the same way, or are in danger of it, if they are subject to the arbitrary whim of an undiscoverable board, they will quit producing lumber. If the factories of the country have no longer an assurance of transportation, you will discourage them.

Oh, this is the mere starting of the wedge of industrial destruction that this reckless legislation would bring upon the country. You interfere now with transportation; next you give the right to control the product of the soil and the product of the mill; and you permit it to be requisitioned, not for Government use—not at all—but because somebody representing the President does not like the price at which things are selling.

Why, Mr. President, if that kind of legislation prevails, and we substitute for our present system of business, with individual liberty and individual rights, such a plan, in 12 months' time you will paralyze the industries of the country. I said to the Senator that it was not democratic rights that were concerning me. What I meant was that I had no fear that any man could live politically in this country long enough to be a permanent menace who would support legislation of that kind, and I have not; but you will injure us right now. These bills could be amended harmoniously by a provision that the President shall fix the compensation of all labor and the hours of work and put in the penitentiary anybody who declines to obey him.

Mr. President, the Nation is not in such peril. There is not any occasion for that kind of fear. I am very fond of the chairman of the committee who has reported this bill, and ordinarily he is one of the sanest of thoughtful business men. I do not know how they got him to support this measure; it is so unlike him.

Now, what we ask is this—and I still hope it will be given without a vote. We ask, first, that these powers be limited to military supplies, including therein foodstuffs of all kinds intended for those at war with Germany. That is what we think ought to be done. If that is not enough, then, going one step further, give some kind of tribunal to pass upon the other interferences with powers of transportation. Give us some visible agents to do it. We are willing to give the President all the power he has any use for and more. We would like to know who is going to be the President in exercising the power, because we know Mr. Wilson can not be.

Mr. NEWLANDS. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Nevada?

Mr. SMITH of Georgia. Yes.

Mr. NEWLANDS. May I ask the Senator whether the person or persons whom the President designates as the person or persons through whom he will issue these directions will be invisible?

Mr. SMITH of Georgia. I fear so.

Mr. NEWLANDS. Does the Senator suppose that such a designation will be made secretly; that public announcement will not be made of the person or persons designated, and that such person or persons will not have an established place of business where persons complaining of the orders made can be heard?

Mr. SMITH of Georgia. I do not know.

Mr. NEWLANDS. Another thing; in case the President of the United States should designate existing officials, no compensation is to be made; but if he designates persons who are now outside of the public service, I will ask the Senator whether they will not become public officials, paid by the public, and whether they will be the invisible specters to which he alludes?

Mr. SMITH of Georgia. Well, they will be quite invisible. The view of them will be dim and indistinct.

Mr. President, we have these subcommittees of all sorts and kinds connected with this advisory board. I would not say that they were completely invisible, but they are very unsatisfactory. It is very difficult for men having something to furnish to the Government to approach one of these advisory committees, if they have all been selected from some other class of men who have the same thing to furnish to the Government. It is very embarrassing for the outsider, and they are difficult of location.

Now, Mr. President, if we mean to have somebody act for the President, why shall not we say it? Are we afraid to legislate? We are supposed to come directly from the people, and to represent them. Do we have to hide behind the President? It is conceded that there must be men to take charge of this work. Why is it that the committee does not name them, if they are to be designated?

Mr. NEWLANDS. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Nevada?

Mr. SMITH of Georgia. I do.

Mr. NEWLANDS. If the Senator will permit me, I will say to him why the committee has not designated any particular form of organization through which the President shall give his directions. The reason is this: We believe that experience will be the best guide to the President in the selection of those persons; that he may find the persons first designated inadequate for the work, or he may conclude that he would like a board of three instead of a single individual; or he may conclude that the best form of organization would be to select a single great transportation expert.

I will state that early in the history of the Panama Canal Congress sought to fix the form of organization that the Panama Canal Commission should take, and the legislation of Congress constituted an embarrassment to the Executive in securing an efficient administration under that act. I can not recall definitely what the process was, but gradually it took the form of centering the power in Gen. Goethals. They first tried a divided power, a board, and finding that that did not work they finally substantially centered the power in Gen. Goethals.

Now, Congress will probably be adjourned.

Mr. SMITH of Georgia. I do not think so.

Mr. NEWLANDS. We did not wish to put the President in a strait-jacket with reference to an exercise of the most important power, and fix to-day exactly the form of organization through which he should give his directions; and I think that is wise action.

Mr. SMITH of Georgia. Mr. President, the Senator did not want to put the President in a strait-jacket. I do not want to put the men interested in transportation throughout the country in a strait-jacket. The Senator has not shown any necessity for any of this legislation, not the slightest; and yet he says that the President might want one, might want two, might want three men, and then might want to change the form of the organization. That is just what I have been arguing—that we have an indefinite, uncertain, invisible agency, and one that can not be reached.

I think, if we give such powers, it is as little as we can do to have some voice, some expression, in advance about how they are to be exercised. It is as little as we owe the people at large to determine the character of the agency that is to perform these duties. They are very vast. They are as great—they are far-reaching while they last in their effect upon the people of the United States—as the powers of the Interstate Commerce Commission; even greater. You take away from every producer in the country his right of transportation—a right established by law—and you leave him without redress; and you are willing to do this through the President, who can not exercise the power, without even saying that there shall be a board named in advance by the President on the subject of transportation and confirmed by the Senate. You will not even give the producer and the shipper that much safeguard against oppression.

Mr. HARDWICK. Mr. President——

The VICE PRESIDENT. Does the Senator from Georgia yield to his colleague?

Mr. HARDWICK. I make the point that there is no quorum present.

The VICE PRESIDENT. Does the Senator yield to his colleague for the purpose of suggesting the absence of a quorum?

Mr. SMITH of Georgia. I yield.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gronna	McKellar	Shafroth
Bankhead	Hardwick	McLean	Sheppard
Borah	Hitchcock	McNary	Smith, Ariz.
Brady	Hollis	Martin	Smith, Ga.
Brandegee	Husting	New	Smith, Mich.
Broussard	James	Newlands	Smoot
Chamberlain	Johnson, S. Dak.	Norris	Swanson
Culberson	Jones, N. Mex.	Owen	Thomas
Cummins	Kellogg	Page	Thompson
Curtis	Kendrick	Poindexter	Trammell
Fernald	Kenyon	Pomerene	Vardaman
Fletcher	King	Ransdell	Wadsworth
Gallinger	Kirby	Reed	Warren
Gerry	Lewis	Robinson	Williams

Mr. HUSTING. I desire to announce the unavoidable absence of the senior Senator from California [Mr. PHELAN] and the senior Senator from Maryland [Mr. SMITH] on official business.

Mr. REED. I wish to announce that my colleague [Mr. STONE] is unavoidably detained from the Senate.

Mr. McKELLAR. I desire to announce the absence of the senior Senator from Tennessee [Mr. SHIELDS] on account of illness.

Mr. SMITH of Michigan. I wish the RECORD to show that my colleague [Mr. TOWNSEND] is detained from the Senate on account of illness in his family.

Mr. CURTIS. I desire to announce the absence of the Senator from Maryland [Mr. FRANCE] on account of illness. I also desire to announce the absence of the Senator from Washington [Mr. JONES] and the Senator from California [Mr. JOHNSON] on business of the Senate. I ask that this announcement may stand for the day.

Mr. HITCHCOCK. I desire to state that the Senator from Delaware [Mr. SAULSBURY] is absent on official business of the Senate.

Mr. LEWIS. I desire to announce that the junior Senator from Kentucky [Mr. BECKHAM] is detained from the Senate on public business.

The VICE PRESIDENT. Fifty-six Senators have answered to the roll call. There is a quorum present.

Mr. SMITH of Georgia. Mr. President, I will close in less than five minutes. My objection to the bill is, first, that it confers nominally upon the President, really upon some agency that he must create, the unrestricted power to fix priority of shipments in all kinds of goods, both those of a military character needed to conduct the war and those not in any way connected with the war. I insist, first, that it ought to be limited to things that pertain to military affairs or to foodstuffs to be used by the armies of the United States or by the armies of the countries that are at war with Germany. I am willing to make that just as broad as anybody will want it; I urge a stopping place without carrying the right of discrimination into private affairs of life disconnected with the war.

Second, if the Senate insist that this power of creating priority of shipments should extend all along the line, then I urge that there should be a definite board created through whom the President may administer this responsibility. The Senator from Nevada has just said that he objects to a definite board because the President might want to name first one man and then another man and then two or three men. I urge that the shippers are entitled to stability in the performance of the duties that will be given, and if this bill is passed with the broad power it now covers at least we should provide that the Interstate Commerce Commission, or a board of three men to be known as the transportation priority board, should give shippers a hearing that the careless disregard of the rights of individuals might be avoided.

I do not desire to take any more of the time of the Senate at present. I must really go to a meeting of the Committee on Finance.

Mr. SHAFROTH. Mr. President, I am in favor of the passage of this bill, and I wish to state a few reasons why I will support it. The discussion has been very interfesting to me. Great powers are given to the President in the bill, and all the remarks which have been made concerning extension of power and the danger of usurpation would be eminently proper if applied to times of peace. There is not a man on the floor of the Senate who would be willing to vote for the bill if it were a general law applicable to all times. There is, however, a clause in the bill that it shall be in force only during the existing war, and that makes an entire change with respect to the dangers that have been set forth as being so imminent by the passage of such a measure.

Mr. President, we know and all history has taught us that democracies can not prosecute or defend wars successfully as long as they have divided powers. The liberties of the people are so safeguarded by limitation of authority that democracies can not operate with expedition. It is on account of the fact that we have so many commissions, that we have so many officials whose jurisdiction conflict with each other. That is the reason why democracies can not wage war. It takes autocracies to win wars. Consequently when a republic stands by all the laws that are made for the benefit of the individual and for the safety of the people in times of peace, it cripples its ability to execute its purposes and designs to win the victory. In order to win the war it is necessary to centralize the power, to waive those laws which are so necessary for our happiness in times of peace.

Mr. President, the safeguard in the bill against any usurpation lies in the fact that this power is limited absolutely to the duration of the war. That limitation is contained in the very law that grants the power, and automatically the power ceases when the war ends. Therefore it can not be used as a means for the usurpation of our rights and liberties.

It is suggested that we should have a tribunal to determine what freight should have priority in shipment, and some have said that the Interstate Commerce Commission should be the tribunal. In peaceful times that would be wise. The Interstate Commerce Commission is a commission that is supposed to deliberate upon questions, not to act quickly. The very object of having hearings before that commission, the very purpose of letting it examine into various other questions that should determine as to the entering of an order, makes it so that quick action is impossible. I doubt, as the Senator from Nevada has said, whether it would be wise to give to that tribunal any power whatever except that of a deliberative character.

That being the case, Mr. President, I can not believe that we ought to take powers that are essential to effective execution and transfer them to a deliberative body. No one would think of giving to a judge or to a court composed of a number of judges such powers. Their very existence, as well as their duties contemplate deliberation and sound judgment. Large bodies, of course, will only act after discussion, and necessarily delays must follow. By that means they arrive at a more correct opinion; but when we engage in a war things must be done quickly, a decision must be made immediately, or else often a battle will be lost, a favorable opportunity passed.

Mr. President, the Interstate Commerce Commission is now overworked. Its docket is so crowded that bills have been urged in this body providing for an increase of its membership; and if we impose upon it the burden of determining quickly and rapidly the question of transportation of these various products, it seems to me we are going to impose upon it a burden by which it can do nothing else than attend to the immediate necessities which are provided in the bill. So it seems to me, so far as the Interstate Commerce Commission is concerned, that the proposition should be abandoned. Any other commission will make a divided authority.

But Senators say that they agree that the transportation of everything that is necessary for the prosecution of the war shall be determined by the President, but that the commission shall determine as to those products that are not essentially war munitions or things that are absolutely necessary to the prosecution of the war. The difficulty about that is the line of demarcation. That line of demarcation will always be the subject of dispute and is disputed right on the floor of this body. The Senator from Nevada cited one illustration in which he said that some of the members of the Interstate Commerce Committee contended the material to be transported was a war necessity and others said it was not. If we have a commission, it will contend for its jurisdiction, and the result will be that there will always be disputes as to what are the things that are essential to the conduct of the war.

We know there are various materials essential to the manufacture of munition supplies that are scattered in this country. Copper is away out in Montana and Arizona, and it has to be brought to the factory down at Bethlehem, Pa., or at other places. It may be necessary that it should be shipped even ahead of passenger traffic. There should be somebody to determine that. It should not be an independent tribunal that

might consider that that is as essential to the prosecution of the war as something else which the Commander in Chief is demanding. The man who is going to get the credit or the blame for the war is the man in whom this power should be vested.

We know that the shipment of coal becomes sometimes a very important commodity to be brought to certain points. It may be necessary that some railroad that is doing a great and remunerative traffic in passengers or in the transportation of high-class freight must carry coal instead of passengers or that higher priced freight. The result will be that a hardship may be worked. That has to be worked if it is necessary to gain the advantages in bringing that coal to the proper place where it can be made most expeditious in the conduct of the war.

Any number of illustrations would show the necessity of some person having control of the shipment of freight, and when you put it in a body composed of more men you have disputes, you have controversies, you have divided opinions, and it is bound to result in having less expedition. But when you put it in the hands of the President, although he has somebody else to examine into it, he has the corrective power if any wrong is being done. He has a right to say "No; there is no necessity for that," and I have no doubt if arbitrary and unreasonable power should be exercised by any board he would say that that shall not be done, but that the ordinary traffic shall prevail.

Mr. President, in view of the situation and the fact that this power to control shipments over railroads is limited to the duration of the war, there is no danger of the power extending to times of peace, and on account of the fact that the centralization of power in times of war becomes necessary in order to either conduct an army or a campaign, it seems to me that we ought to support this bill and not have a commission to divide this authority, but that the power should be placed in the Commander in Chief of the Army and Navy of the United States.

Mr. HUSTING. Mr. President, I have listened to the debate with a good deal of interest, and I have heard arguments here upon this floor which can and should be answered. This I am going to try to do. In discussing this matter, it seems to me as though we were really losing sight of the main question. It is stated here that the question is "Where should we lodge the power to control shipments of commodities in this emergency?" That is not the question to my mind. Such control is now in the hands of the railroads themselves. The question, therefore, is, "Are we going to leave it where it is in private hands or are we going to give control to ourselves; that is to say, the Government?" The power is lodged now in the hands of private citizens, in the officials of companies engaged in the transportation business. As it is the control of shipments is in the railroads. It is a control divided into many hands and interests, each of which is intent in serving its own interests.

So the question really comes down to whether it is better for the country to control the movement of the things necessary for the prosecution of the war by placing such control in the hands of the Commander in Chief of the armed forces of the United States or to leave it in the hands of those agencies which have a direct personal interest in their own business and who will consider themselves in duty bound to operate the business primarily to subserve their own interests. In other words, the question is, when we are at war, whether we want to intrust the Commander in Chief with the facilities to move troops, supplies, munitions, and everything necessary to successfully conduct the war or whether we are going to leave it to a thousand private commanders in chief of private industries or private transportation companies for each to act as its own not the public's interests dictate. That is the question. The question is whether you are going to leave it where it is or put it in the hands of the President.

It has been said here if the President would handle this matter himself personally they would all trust him and would be willing to permit him personally to handle the transportation business of the country. The arguments made here on this bill, when sifted down, do not bear out the assertion. There has been too much protest here, it seems to me, in the Senate of the confidence Senators repose in the President of the United States as the Commander in Chief of our armed forces. There has been too much talk about Mr. Wilson being trustworthy, being reliable, and that Senators would gladly give him the power if he would personally exercise it and not delegate it to subordinates. There has been too much talk along the line "Brutus is an honorable man," followed up by attacks on the honorable man, the good man, the trustworthy man, or at least on the recommendations he makes, and ending in a supreme effort to tie his hands and preventing the man in whom they profess to have so much confidence from exercising the power that he needs and must have if their confidence is to be vindicated.

It is said that if he could handle these matters they would be willing to trust them to him. The President of the United States, as has been said here, is the Commander in Chief of the armed forces of the United States. We have passed a law to conscript the men of this country who are going to place themselves under the command of the Commander in Chief of the Army. Is every man in this Army going to be under the direct supervision and under the eye of the President of the United States? Has not the President got to act through the Secretary of War whom he has appointed? Has he not got to act through the instrumentalities of the generals whom he has appointed, the colonels, the captains, and lieutenants, and so forth? Yes; of course he has. Not only that, but they are going to transport these armies across the sea to France, and there they are going to be under the eye of a man selected by the President of the United States to command that army over there, 3,000 miles away from the Commander in Chief.

The lives of these young men are in the hands of the subordinates of the President of the United States. Their life or their death may depend upon the discretion and the ability of the general in command, who is a subordinate of the President. That is nothing; Senators are willing to do that. There is no trouble at all about that part of the business. We put a fleet under the command of an admiral who is subordinate to the President of the United States and selected by him. Our fleet sails on the ocean and the lives of the men carried in our ships are dependent upon the very bravery, discretion, and ability of the admiral. We have not had anything to say about that matter, though. He is an invisible instrument of the Government, and that is all right. Senators do not complain about trusting the lives of our soldiers to the President of the United States, even when he does—as he of necessity must—place them and their lives—yes, and the country's safety and welfare—in the hands of subordinates. Senators do not complain about taking a young man out of employment, reducing his salary, if he is getting a salary, say, of $2,500 or $3,000 a year, and setting him to work for $360, a soldier's pay, and placing him under the charge of a subordinate and sending him over to France to fight our battles, and thus conscript his earning capacity about 1,000 per cent and requiring him to give his life if need be.

The Commander in Chief may be intrusted with the lives of American citizens and American soldiers, which he may place in the hands of subordinates, but we can not trust our dollars and our business to him. As the Secretary of the Treasury has said, Are we going to be more tender with our dollars than with our sons? Are we going to be more tender with our cents than with our soldiers? It is not necessary to do that. We give the President power to appoint his Cabinet. These Cabinet officers in turn appoint their assistant secretaries, their bureau chiefs, and these bureau chiefs appoint subordinates.

The President of the United States, as President in peace time, has control over vast power that must be intrusted to subordinates. Otherwise it could not be done. We know that the President can not attend to the details of government, so he appoints subordinates to attend to these. But we hold the President responsible for their acts, because their acts are his acts and are made under his authority and by his direction. But here in time of war, in time of an exigency of this kind, they are willing to trust the President of the United States with transportation matters, but they do not want to trust it to his subordinates. They are willing to trust everything in the world to the President except these particular things we are handling now, unless he does it personally. They might just as well go right out and say they have no confidence in the President of the United States. Why protest otherwise? If you have not confidence in a man that he will appoint the right officers to administer these affairs, then do you not in that same breath say you have not any confidence in the judgment of the man himself? Why not hit him direct instead of hitting his appointees over his shoulders? You can not shoot constantly at men appointed by the President without some of the bullets finding lodgment in the person of the President. Or, if you indeed have confidence in the President why not have confidence enough to believe that whether he performs acts in person or by his duly authorized subordinates he will see in either case that the thing is well done and that your confidence is not misplaced.

If you have not confidence in the President's appointees, I repeat, you have not confidence in the President—not that the President is infallible—but when the President makes an appointment which is a mistake, and he discovers it to be a mistake, and he soon will—his critics will see to that—he will rectify that mistake.

It is not just the same question in appointments, whether you give this power direct to a board or give it direct to the President, and he appoints a board or person to attend to the details. Why? Because the President is the man who is Commander in Chief and has the power to name the men under him. While everything goes well and no complaint is made, there is no necessity for his passing upon anything; but with the President in supreme command, when abuses obtain in the administration of affairs, when men make mistakes or show their incompetency, and it is brought to his attention, then, as Commander in Chief, he rectifies that mistake. He will see to it that the work is well done, because it is his work, whether done by himself or his subordinates. So if you have confidence in the President of the United States, you know that if this power is intrusted in his hands the matter will be administered with him as the responsible head, not merely as a figurehead, but as a man there to do the right thing if perchance the wrong thing is about to be done by his subordinates. So the question gets right down to this: Have you confidence in the President of the United States, the Commander in Chief of the Army and the armed forces of the United States? If you have, are you going to let him fight this war, or are you going to hamstring him and tie his hands and tie his feet at every opportunity that presents itself, and thus obstruct and hinder, if not destroy, his usefulness and efficiency?

This country has placed the responsibilty in the hands of the President of the United States; he is Commander in Chief of our forces. These powers, it will be conceded, have got to be placed somewhere. They can not be placed in any other hands than in the hands of the Commander in Chief; you can not put them in auxiliary or subsidiary bodies. The President can not get into a wrangling over it or go into an executive session every time he wants to make an order and bring about efficiency, because in such a case you would have talk instead of action; you would have the same discussions there which we have in the Senate every time something comes up which is to be done that ought to be done, and that ought to be done quickly.

In a war like this in which we are now embarking, with the history of two and a half years war before us, I do not think there is any question in any Senator's mind that we are up against a very serious proposition; that we shall need all the strength and all the power that we possess to successfully conduct this war. I want to see that back of the punch that we put into our armed forces the whole body politic puts itself into such a swing that we can deliver the knock-out blow.

It has been said here that this is hysteria. Prudence is not hysteria, and we would be imprudent, indeed, to close our eyes to the character, the ability, and the efficiency of the powers that are opposing us in this war. When we let our minds wander back over the last two and a half eventful years and now see embattled Europe struggling with all its might to keep back the Hohenzollern power we need not be afraid that we can exaggerate our peril. Nothing more menacing than mad Prussianism has ever lifted its horrid head above the horizon of time. When one power can hold at bay upon foreign soil the legions of England, France, Russia, Roumania, Portugal, Serbia, and other countries, and can make the ocean unsafe for travel, and at the same time can defy the neutral powers of the world with impunity, we can not be charged with hysteria when we take up stock of our power and our resources with a purpose of overcoming this menace. We can not go too far in getting ready for it.

It is said we need not be afraid of Germany because she can not land sufficient troops here. Why, our sovereignty is going to reach over across the sea into France; our men are there fighting for this country. Are we going to say it does not make very much difference to us what happens to them so long as it does not happen to us here; that we are not afraid here because we are here, and we do not care what happens to them there, because they are there? Is that the logic upon which we are going to base our warfare? Every time one of our battleships sails across the sea and engages in a contest with the enemy, shall we say we do not fear anything over here, because they can not shoot over here and they can not land here upon our coast?

One thing is just as sure as sure can be. If Germany wins this war, she can only do it by first destroying men of this country. If, notwithstanding the aid that we are going to give the older belligerents in this fight, they should suffer defeat, we shall indeed have the menace of autocracy put upon us here. It is said we do not want Kaiserism in the United States. I want to say to the Senate that we will get it whether we want it or not—and there will not be any debate about it—if this war is lost. If England, France, Russia, Italy, and the other belligerents are finally obliged to bend their knees to Germany, that will be the time when the menace to this country will become a direct one; that will be the time when Germany's eyes will be turned to this country.

Does anybody suppose that the only way that Germany can attack us is to land her troops upon our soil? If Germany keeps the circle that she has put out, which is an invisible line out into the ocean, in the event that she should win this war, and should then tell us that we can not trade with Europe, I ask, What then? We would be confronted with the alternativ of giving up our rights to sail the seas or we would have to go and land our troops over in Germany and fight her there and upon the seas; or, perchance, if she did not do that, why should she not land her troops down in South America in open violation of the Monroe doctrine and make us go down there and fight, instead of fighting on our own soil; or, for that matter, why not land her troops in Cuba and make us either give up Cuba or fight? There are a good many ways that Germany could make us fight her without landing her troops here. If she wins this war, she will be in a position to and will choose her own battle ground and make us fight her there or make us quit and take our orders from her. This would mean that she would enforce her will and her ways upon us if we did not fight.

But what is the use of talking about that? We are in this war; we are one of the belligerents, and we have got to win this war. The question is, Whether this is a fight for the United States and our allies to a finish, with us the winners, or whether we are going to fight Germany alone after she gets through with the other allies?

We can not dally or deceive ourselves into any other belief than that the measures that the President of the United States has asked Congress to pass, or which he has recommended to Congress as the thing that he vitally needs if we are going to win this war means that unless he is given these instruments of warfare, these facilities for equipping and supplying our troops, we can not be efficient; we can not win.

Just one more word on that phase of the question. The logic of some Senators seems to be that when we give the President all the men he needs and all the ships he needs the needs of the Government as well as our duty are at an end. Is it possible that we do not understand that when we send our armies and navies over to Europe we have got to continue to send the stuff across to enable them to fight and to subsist? What are armies and navies unless they are provided with all they need? Have not these men got to be fed? Have they not got to be clothed? Have they not got to have guns, rifles, powder, shot, and shell with which to fight? Who is going to do it? Is "George" going to do it?

Have we not been told here that we have got to maintain and to sustain our own armies over there with our own supplies? Well, of course we have. How are we going to do it? It is said we will do it in some way; there is no need of being afraid; let us not get into hysteria. Somehow, some way, at some time we shall get the stuff over there. Who is going to see to that? Why, anybody—everybody is going to see to it. Let the presidents of the railroads see about it; let the brakemen, let the conductors, let anybody see about it. Let any or all irresponsible men who owe no duty or shoulder no responsibility attend to that. Everybody's business, of course, is nobody's business. But the President, the Commander in Chief, the man who carries all of the responsibility, to whom we look to see us through, shall he be given the power to do it—perish the thought! That is autocracy. That is unconstitutional.

Now, I am not reflecting on the patriotism of the railroad presidents or of the men who are in control of the roads, but I want to say that a railroad president who does not look out for the interests of his own road first will not hold his job very long. He may be as patriotic as any man, but he can not use the property of others to demonstrate his patriotism.

His duty is to make money for his stockholders, and however much he might be induced to do the right thing his position would not permit him in case the thing came in conflict with the interests of his concern. Moreover, there are many railroad presidents and officials and their interests are divergent. They could not long agree to act in concert without the bias of self-interest intervening to throw order into discord.

It would, of course, be different if the President appointed them as public officials and they were free to act in their public capacity. Then their oaths would bind them to serve the Government and the people of the United States and not their own personal roads; in other words, they would be free and it would be their duty to act for the interests of the Government; but when they are in their own private business it is the most natural thing in the world for them to look after that interest first. It must be clear then that the present system will not do. And so it does seem that we have got to place control elsewhere to do the work well.

Does any Senator for a moment think that the men who are to be sent across the sea—a half million or a million or a million and a half men—should not have somebody in authority here that is going to take care of them and labor for and provide for them? If not, then we would better keep our men here; we had better withdraw our declaration of war and admit that we will not fight until the Germans come over here and camp on our soil; but if we are going to fight this war, as we have got to fight it or surrender, then we have got to take every weapon, every power, every resource into our own hands which is necessary to carry this war to a successful conclusion.

Every time anything of this kind is suggested, the specter of the Constitution—our own Constitution—comes to the aid of our enemies. I do not say that in a disparaging way of anyone who invokes the Constitution, but I say it is working in that way. Our Constitution comes up to prevent us from defending our own lives and our country. I want to ask whether this is a war with the people of the United States on one side and the Kaiser and our Constitution always on the other? Is our Constitution our friend or our enemy? I take it for granted that our Constitution, which was born of the country itself, was so conceived as to enable us to defend the life of the body that gave it birth. We have a right to defend ourselves; and, as was well said this afternoon by one of the Senators—I forget just by whom—the fact that the writers of our Constitution provided that the President should be Commander in Chief carries with it the power and the right for him to do anything and everything which is necessary to defend our national and independent existence. The Constitution was designed to be a life-giving thing, not a poison or an instrument of death to the country, and to the principles and ideals which it embodies. We can not go any further, so far as the delegation of power is concerned, than when we give the President the power of life and death over our citizens. When he can send them into the trenches and into the teeth of the enemy and the jaws of death, is there any greater or more important power that can be delegated to him that outweighs this power or that should cause more hesitation in the giving.

The Constitution can not be construed in any other way than that in time of war these powers may be lodged in the hands of the Commander in Chief. As has been said here over and over again, if this bill embodied a new policy in this country, a policy to the effect that hereafter in times of peace the President shall be a food dictator, that he shall do all the things that now have to be done, of course no Senator would vote for it. But we are not at peace. It can not be repeated too often that we are at war, the most extraordinary war in all history. Precedents of all kinds have got to go by the board. It becomes necessary for us to do everything that is needful to give the Commander in Chief the power and the right to use the might of this land to the last ounce of our strength. To do anything else would be hysteria; to do anything else would be imprudent, would be folly. Not to do it would be worse than a crime—it would be an inexcusable, unjustifiable, unforgivable blunder. Does the Senate want to assume the responsibility for it? I do not.

While nations are organized to the last button, to the last farthing, and are contemplating our destruction, shall we stand here and argue over and over again the question of whether we shall defend ourselves? Mr. President, that question was settled when the Congress declared that a state of war existed and when under the Constitution the powers and might of this Government went into the hands of the Commander in Chief. Now, he comes here and says, "I must have this power, if you want me to assume the responsibility. I tell you what we need to win this war; I must have the power, if necessary—and I will not use it unless it is necessary—to control and regulate the shipment of those things which I think are necessary to make us successful in the prosecution of the war."

How can there be any chance for an argument about that, when it is as plain as day that, unless he is given that right, the movement of equipment and supplies will be beyond his control and he will be impotent to do the essential thing at the essential time? So when we talk here about the tremendous power that we are giving the President we are arguing that it be left in the hands of men who owe no responsibility to this Government except in a very remote way. When we say we are alarmed about the power that we are going to place in the hands of the President we say that we are not alarmed to have this right lodged in the hands of private individuals who are in business for what there is in it and who owe no responsibility to their Government, except in a very remote way and only as an individual owes a duty to his country.

That does not apply only to this bill. We would be deaf really to what is going on and too blind to see what the movement is about if we have not learned that an organized effort is going to be made to withhold almost any or all additional power from the President. A fine prospect indeed! Go ahead, Mr. President; organize an army of a million and a half soldiers, send them over to Europe, and when you get them over there let them shift for themselves and take their chances with what may ooze over there from this country, so far as conflicting and confusing and intricate private interests may be willing to serve them! Is that the idea of American efficiency? German efficiency is different. Things move when they say "move." It is said here that we do not want that sort of government over here.

I repeat, that if we do not arouse ourselves in this country to fight this war as it should be fought, we will have it over here; but the difference will be that instead of having a slight restriction here temporarily, we may have the real thing here permanently, and our consent will not be asked either. The Kaiser will not ask us whether we like it or not; he will ram it down our throats if he has his way and we let him have his way. So it is a question sometimes whether we can not afford in the interest of self-defense, self-protection, and self-preservation, to trust the President of the United States with a few of our rights, in order that our important rights may be perpetuated indefinitely rather than to withhold them from the President and lose all of them permanently. In other words, are we going to stay here and haggle and haggle about what we are going to give the President of the United States for perhaps three months or six months or perhaps for a year, but only for the purposes of this war, or are we going to lie supinely upon our backs and let those who are fighting for us shift for themselves on the plea that we ought not to be afraid and ought not to be hysterical and should only concern ourselves when we have finally had our nose put to the grindstone and have to fight for our own personal existence?

What is true of transportation is true of the food situation in the United States. There, again, it is asked, "Are we going to establish a dictator here? Are we going to let some expatriate come over here and run our business?" Men are being abused here who have come to help their country and whose only desire is to give unselfish service to their native land. The greatest offense they have ever committed is to come back here and volunteer their services. Mr. Hoover's name has been mentioned here. While I have not been delegated to hold a brief for Mr. Hoover, yet I want to say that I have been an admirer of his because of the high reputation which he enjoys throughout the civilized world for the work he has done in Belgium. This gentleman is charged with being an expatriate, yet when the call came from his country—and he did not seek the service—he surrendered a $100,000 position to come here and work for his country. Mr. Hoover's record is his best armor and defense against the attacks made against him. All of civilized Europe honors him. Poor bleeding Belgium acclaims him as its friend and benefactor. The world applauds him for his marvelous efficiency. Verily a prophet is not without honor save in his own country! And when he came here upon the call of the President to perform the work than whom none is better fitted, and coming in a spirit of service, his fellow countrymen heap ungenerous and ill-natured abuse upon his head for only standing ready to do what his Commander in Chief commands him to do. But he is no expatriate. He is a real and typical American. But if he were an expatriate, I wish to Heaven that we had a million such as he, because we are going to need them before we are through with this conflict.

However, Mr. President, I do not wish to talk personalities. That is not the thing that should control discussion of this kind.

The question is purely and simply whether, in the situation in which we find ourselves, we are going to put in the hands of the President of the United States the power to mobilize and utilize our resources for us. That is all, and the question again will be whether we are going to give the President authority to do the things he wants to do and which he needs to do if we desire to win this war? I say again that I hope when the food-control bill comes up the Kaiser and the Constitution will not again be lined up against the United States and that again we will find ourselves hindered instead of helped by that immortal instrument designed by its authors to be the protection and shield of the Union and not the ally of its enemies.

The President of the United States, I reiterate, being the Commander in Chief of the Army and the Navy, bears upon his shoulders the responsibility for a successful war. He comes here and says, "I must have these powers." It is said by Senators that they have the greatest confidence in the President of the United States. Well, if so, give him those powers. That is the best way to demonstrate their confidence in him.

We surely can not prove confidence by refusing to put it to the test.

It has been said here that the liberty-loan bonds did not go because of a want of confidence, not in the President, but because of a want of confidence in some of the men whom he has appointed to office—some of the unknown men, the invisible men, as some of the Senators have been pleased to term them.

I wish to say to those Senators that we used to hear some talk of invisible Government, but I am proud to say that we have heard little or nothing of it since Woodrow Wilson has been President. There is no danger of any invisible government so long as President Wilson is in the White House. We know that there was an invisible government, or, at least, charges were made to that effect, before his administration.

But it is said, in connection with the liberty loan, that confidence has been lacking. The Secretary of the Treasury was attacked here not long ago, and it was said that the course pursued by him in connection with the sale of liberty bonds was unseemly. Why, bless him, he did the thing that made the loan a success. This body did nothing to aid him; Congress did not do so. On the contrary effort was made, apparently, to discourage it. Unseemly what? When it lagged because cordial support was lacking, and when many were expecting—some, perhaps, even hoping—to see it end in failure, Secretary McAdoo, one of the strongest men who ever graced the Treasury portfolio, when he saw what he was up against, went direct to the people, and the people heard him, believed him, backed him, and the result is the verdict given him. Unseemly to do what was necessary and succeed or to lie down in a seemly manner and fail? The people do not think so, let me assure the Senator. If there has been any lack of confidence at all, it is because of the attacks that have been made upon the President of the United States in this Chamber and in the other Chamber over and over again, and the obstacles placed in his path. Take the CONGRESSIONAL RECORD for the last 8 or 10 weeks and read it and there you will find the answer to the question why confidence is not there.

Constructive criticism, it has been said, is a good thing. Yes; constructive criticism is a good thing, but destructive criticism is a bad thing. Destructive criticism is what is responsible for the want of confidence, if any there be, all along the line. But let me say that the want of confidence is not in the President. There is a want of confidence in Congress because Congress does not stand back of the Government and do the things that are necessary to give it strength and vigor.

It has been said here that the President has gotten everything that he wanted. That is true; but he had to fight for everything that he got. He was always met with obstacles—the same arguments, the same dire predictions of disaster, the same fear of usurpation of power, the same Constitution. Now, we can not inspire confidence in the people by criticizing everything that the President wants Congress to do and criticizing everything that it is proposed to do. We can not inspire the people to have confidence in our success when we are everlastingly predicting disaster. We can not inspire faith when we are constantly impeaching our own integrity of purpose. We can not abuse and hammer our Government and expect enthusiasm to bubble like a spring. We can not arouse the people to the great spirit of achievement when we are constantly criticizing everything that is to make for that achievement.

Does anybody believe for a minute that he can inspire confidence in a friend by assailing him all the time, defaming him all the time, and exuding insinuations against him all the time? You can not boost your friends in that way; you can not boost the country in that way; you can not boost Congress in that way; you can not boost the President of the United States in that way. At a time like this when unity and harmony are so essential, so indispensable, why can we not bury our differences and unite together? Our Government is not our enemy. Our interests are identical. We have all the enemies we can handle, and we need all the harmony and unity we can muster. Yet we spend our time in fighting amongst ourselves instead of preparing and unifying ourselves and our people against the common enemy. But you can go through the RECORD here for months, and you will find one series of attacks after another, not intended, I am sure, but tending in their effect to undermine the confidence of the people in their own Government and in their own administration. You can not keep that up indefinitely without making a breach in the wall.

It does seem to me, Mr. President, that the time for that sort of thing is over. We ought to quit it. It is all right to have constructive criticism of bills; but why this eternal attack, these continual attacks on the things that have got to be done if we are to win? No need to argue this. We all know it to be true.

Perhaps it would be wrong to take that position if we had found that the President had made one mistake after another in this war; but there is not a word of criticism of what has been done. Almost every act of the President has justified itself. Contrary in some respects to judgment of some, his judgment has been vindicated. He has proven a reliable chief. He is the Commander in Chief of the Army. He is the only one we have. We elected him last November. The people of the United States, almost regardless of party, elected him President of the United States, and so he is our Commander in Chief of the Army. He is going to be Commander in Chief of this country for the next three years and more, and we ought to be good enough soldiers to follow his lead and follow his judgment when he has so many times demonstrated that his judgment is better, in fact, than the collective judgment of many of us here.

The President of the United States will never go down in history as Woodrow Wilson, the impulsive, or Woodrow Wilson, the sudden, or "the man on horseback," or anything of that kind. No! He will go down in history as one of the most conservative, able, efficient, patriotic, and wise Presidents of the Republic. I say he is the Commander in Chief of the United States. He will be such for three years more, at least, and over three years. For weal or for woe, this matter is in his hands. The responsibility is placed upon him as Commander in Chief.

He says he needs these things to fight a successful war. His judgment has been unimpeached and unimpeachable so far as he has gone along in this war. Such being the case, why do we not give him what he asks, and what he must have, and what he demands? Why should we think that our transportation facilities are in better hands when they remain, as I said, in the hands of those who are running the railroads as a private business? Why is the matter of food safer in the hands of the speculators and manipulators of food of whom we have heard so much in the last two months?

We have heard some talk here about hanging these food speculators, about hanging these men who forgot themselves so far as to wring the last bit of money and the last pound of flesh out of a suffering public. We have heard that, and what is the proposition now? Why, we would sooner leave it to them, as it is to-day, than leave it in the hands of the President of the United States. Instead of hanging the speculator, we now hold him up as a man whom it is safer to leave the matter with and entrust with the power than the President. In other words, it is safer to leave things as they are now, in the hands of the speculators and the manipulators and the avaricious men who have driven up the cost of living almost to an intolerable height, than to place it in the hands of the President of the United States to use in our defense!

That is the situation we are up against. There is no constructive proposition here—no. There is only destructive criticism and destructive propositions. The Senators do not come in here and tell us what they propose to do or in whose hands they propose to put these things. They merely say: "For Heaven's sake, do not give this power to the President. Any man, anything, is better than that. The food speculator or the food manipulator is better than he is." That is the effect, if not the words, of the argument. When living is so high that the toiler can hardly make ends meet; when, if things are left to drift upward as they have in the past two years; when we know that if we do not act that men and their families will go hungry and ragged; I say when we know all these things shall we cross our arms now—when we are at war—and say let men starve and go ragged and freeze rather than put into the hands of our Commander in Chief the means to insure tranquillity at home and victory abroad?

Something has been said here about a division of responsibility. Some say: "Give the President the powers which relate to munitions of war and war supplies, and leave the other powers to the Interstate Commerce Commission." What would be the result if that were done? Why, we have talked here for days and days defining what munitions of war are. The term is a varying one. What may be munitions of war to-day may not be munitions of war to-morrow, and vice versa. Do you want the President to go down and visit the Interstate Commerce Commission and haggle with them as to how far his responsibility goes and how far theirs? Can you expedite the dispatch of troops can you fight a war in that way? I say, Mr. President, that you can not do it.

In this bill, concretely, we come right down to this: Are we going to give the President of the United States this power to use in the interest of the country and the interest of the Army

of the United States and the armies of our allies, or are we going to leave it to men who will run this thing to suit themselves? There is no middle ground about it. We have either got to give it to the President or leave it where it is. If you give it to a halfway committee you are leaving it where it is, because then it simply means no action, it means inaction, impotency. It means tying up the President. It does not mean any relief whatever.

The Senate can take its choice of the two propositions. Either pass this bill or let the thing go as it is going now; do not interfere with the railroads or the transportation concerns at all; let them do just as they see fit and trust to their collective patriotism and judgment to do the right thing. But if you want to do that better make them the commanders in chief of your Army also, so that the responsibility may be theirs also. I do not know how many railroad presidents there are in the country, but every time you want to get a few trainloads of soldiers by, let them have a convention somewhere and discuss which road is going to carry the soldiers, who is going to get the pay for it, what the price is going to be, and whether they will let them through after all—whether something else is not better than that. Those are the two alternatives—control by the United States in the interest and for the benefit of the Army and the people or control by and for and of the railroads.

The railroad presidents themselves see, in the services that some of these distinguished gentlemen are rendering the Government gratis now, the necessity of coordinating these things. They are wise men. They know their own shortcomings and their own frailties. They know their duties to their own stockholders, and they know that they can not do justice to them unless they put the matter in the hands of the Government, when they will have to say: "The Government comes first, because we are serving under the Government." They will become good soldiers and run the matter then in the interest of the Government, and not for the benefit of their private pockets.

Mr. President, I just want to say in conclusion that we can not too soon get these bills into the proper shape, pass upon the proper amendments if any are needed, and pass the bills, so that the President may get these things in his hands and know that he is going to have the power that he needs. Let us not exhaust his power here in trying to persuade Congress to help him, instead of fighting the enemy and devoting his time and attention to the enemy. Let us not compel him to waste his time here in trying to get Congress to give him the power that he is entitled to have without asking. Instead of enabling him to devote his time and attention to matters against our enemies, we are engaged here in fighting ourselves and holding ourselves back from doing the things that it is necessary and essential to do.

The crop-moving time will soon come, when the railroads will be congested, when these powers will be of the utmost importance and the most pressing necessity. The harvest is coming on, and crop moving will soon start. Let us not recommit the follies of the allies and the mistakes that the allies have made by getting into everything just a little bit too late. Let us get there just a little bit too early for the other fellows—for the enemy. Let us not dillydally along and then finally do what we will have to do anyway—but too late; for there is not any question that the people of this country will demand that the President receive the support that he is entitled to have as Commander in Chief; that their Commander in Chief is entitled to have; that Abraham Lincoln had when he wanted it.

Without fear of contradiction, I venture to say that Abraham Lincoln got every help that he wanted to have. I know that President McKinley got everything he asked for, regardless of politics. It was spontaneously given to him. There was not any wrangling about it, either. It was turned into his hands for the mere asking, and no war can be fought successfully without that authority. If they were not given all the powers asked for by the President here, it was because they did not ask for them; and if they did not ask for them, they did not need them, and if they needed them, Congress would have given these to them. No Congress yet has refused to give the President what he needed in any war in which we have been engaged, and this Congress dare not do so now. The people will not let you do so long.

It is said of Grant that one of the things that contributed to his unparalleled success was his insistence that he personally, as commander of the Army, should have absolute control of its movements without interference or hindrance by Congress or even by the Cabinet. It is said that the other commanders, able as they were, were unable to win because there was a debate over their movements every time before they were given the orders to move. Congress can not handle that matter. If Congress had stayed here and debated for two weeks whether Dewey should sail out of Hongkong to Manila Bay, he never would have sailed there at all, and certainly he never would have destroyed the Spanish fleet. If we are going to stay here and argue what the movements of our fleets and our armies shall be, if Congress is going to decide just how much food and what kind of food is going to be sent to our soldiers and what kind of supplies we want to give them, our soldiers will not get any in the first place, or if they do, they will get there too late to be of any use in the war.

In war it is absolutely necessary for the period of the war to put the punch in the hands of the President, and to put the country back of that punch if we are going to deliver a knockout blow. So I say that I, for one, during and for the purposes of this war, with the presumption always in favor of doing that which is necessary to strengthen the arm of the Government and to strengthen the arm of the President, am going to vote for every measure giving him the aid and the strength needed to defeat our enemies. If we do that, we need not be afraid of kaiserism or autocracy, because when this war shall have ended successfully to us we shall resolve back, as we resolved back after the Civil War and attended to our business in the usual way. We can then take up these economic questions. We can go back to our old quarrels, our old differences. We can discuss with the other side of the Chamber the various policies of government then. We can have all the party fights we want; but until that time let us fight the enemy and not amongst ourselves. But I say again, it can not be said too often, and over and over again, that if we lose this war—and we may lose it if we do not exercise all the strength and power we have—another autocracy will be imposed upon us; not of our own making, not of our own choosing, but, perforce, imposed on us; and I do not want to see that happen, because I do not want to live in a country dominated by a German autocracy. I do not want to live in a world dominated by Germany's autocracy. I want to live in this country, during this war and after this war, under the flag that sustains and upholds the President as Commander in Chief of the Army; that sustains and upholds the Government of the United States; that stands for the liberties and happiness of our people and for democracy the world over; a flag that floats over a people who are ready to die to preserve their ideals, their institutions, and their independence.

When we talk about our business here, I say that the supreme and most important business of the country to-day is to win this war. This business of winning this war is our paramount and supreme business. All of our ordinary affairs and business of life must yield at least in part to the exigencies of the paramount and supreme business of winning this war. To preserve this country we must win this war, and that is why every business must be concentrated on work coordinated to this end. This is the country I want to live in. I do not want to live after the war is over under a government that imposes its will, its strait-jacket upon the people of the United States as it is now attempting to do upon the world, as it has almost done in countries to the extent of nearly double its own size.

Do you want examples? Let your eyes go across the ocean, and see whether we are inviting that kind of treatment for ourselves over here.

It is the part of wisdom, it is the part of prudence, it is the part of statesmanship as I see it in my own way for this Congress, as expeditiously as possible, to do anything and everything to strengthen the arm of the President and our Army and our Navy in fighting this war, to get under way the mobilization of every resource that we have of men, money, and materials, so that this war may end speedily and successfully for us. This is the only way we ought to act and can act with prudence and wisdom.

I shall vote for the pending measure therefore, and for such other measures as may appear necessary to marshal our resources, might and power to the last degree and put them in the hands of the President and thus enable him to deal the blow to our enemies that spells victory.

The PRESIDING OFFICER (Mr. BRADY in the chair). The question is on the amendment of the Senator from Nevada.

Mr. REED. Mr. President, I ask to have the amendment stated.

The PRESIDING OFFICER. The Secretary will state the amendment.

The SECRETARY. On page 4, line 2, it is proposed to strike out, after the word "court," the following words:

The President is hereby authorized, whenever in his judgment it becomes necessary in order to expedite transportation and to do justice between carriers, to enter into agreements with two or more carriers looking to a proper division of earnings for a time to be specified and upon kinds of traffic to be prescribed.

And to insert in lieu thereof the following words:

The President is hereby authorized, whenever in his judgment it becomes necessary in order to expedite and provide for needed transportation and to do justice between carriers, to permit and authorize carriers to enter into agreements looking to a proper and equitable division of earnings for a time to be specified and upon kinds of traffic to be prescribed.

Mr. REED. Mr. President, I hope that the Senators here will permit me just about two minutes to say what the effect of this amendment is. It looks innocent enough; but, as the bill stood, the only way in which there could be any pooling of earnings was for the President to direct an agreement to be made with reference to the pooling. He was a party to that pooling agreement. The new language changes that so that if the President gives permission for a pooling, then the matter of the pooling is left entirely to the railroad presidents or managers.

In the first instance, the Government is in some form represented in every pooling arrangement. In the second instance, the Government is not represented; and I think the Government ought to be represented in any agreement relating to the pooling of earnings by railroads.

Mr. HARDWICK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Georgia?

Mr. REED. I do.

Mr. HARDWICK. I want to ask the Senator from Missouri this question: If this equalizing process between the railroads, because some of them may get freight which is very remunerative under this new arrangement and some of them may get freight that is not remunerative, is to be carried out at all, why should not the railroads be forced to make these agreements whether they want to or not? In other words, why should it be left to the option of the big railroads, who may get the best of it, to do right by the little ones, who may get the worst of it? Why should they be required to do that only if they want to?

That is what bothers me about this thing. It is a heap more important than the other matter, I think.

Mr. REED. That is involved absolutely in the question I am raising.

Mr. HARDWICK. Yes; I think it is; but even if the language were left as it was originally in the bill reported by the committee it would still be subject to the criticism I have just suggested to the Senator.

Mr. REED. Oh, yes.

Mr. President, there are very few Members of the Senate here. It is nearly 5 o'clock, and I think we ought to adjourn until to-morrow. I do not want to raise the question of a quorum, but an important matter of this kind ought not to be settled by just a few Members of the Senate.

Mr. NEWLANDS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Nevada?

Mr. REED. Yes.

Mr. NEWLANDS. I should like to ask the Senator whether it would not be possible for us to fix some time to-morrow for a vote upon this bill?

Mr. REED. Mr. President, the time will come to vote on this bill in due and natural course, when Senators have gotten through discussing it. Nobody is trying to filibuster against this bill. The time has been taken up in honest debate. I would be perfectly willing to vote on this amendment now if the Members of the Senate had been in attendance and had heard the discussion; but I undertake to say that not one-third of the Members of the Senate know what this amendment is. They have not been present. That is the reason why I say it ought to go to the morning when the Senate Chamber will be filled again, and a very brief statement on it is all that I desire to have made before the Senate votes. Indeed, I should be perfectly willing, as far as this amendment is concerned, to agree to a limited debate on it of 10 minutes on a side. I should be willing to do that, as far as I am concerned; but when you ask to have a time fixed for voting on the bill, that is another question. There may be many things brought in before the debate is over.

Mr. NEWLANDS. Would it be possible, then, to limit the time for speeches?

Mr. REED. The Senator asked me those questions in private, and I told him no, not with my consent. I suppose he wants to make a record——

Mr. NEWLANDS. I do.

Mr. REED. And therefore the Senator is asking me again, within 5 or 10 minutes after he asked me in private. He is quite welcome to that.

Mr. NEWLANDS. Mr. President, I want to move that the time for speeches be limited, but I will not do so now. I now move that the Senate take a recess until 11 o'clock to-morrow morning.

Mr. REED. Why not make it 12?

Mr. SMITH of Georgia. Mr. President, I do not think we have a quorum, and I am afraid we can not get one to-night.

Mr. SMOOT. Mr. President, before the Senator from Georgia suggests the absence of a quorum I should like to call the attention of the Senator from Nevada to the fact that before a vote is taken upon this matter I think a great many of the Senators would like to hear at least a brief discussion of it. The Senator knows that there are committees that are compelled to meet every day in the week. To-morrow the Finance Committee is not going to meet, and I suppose the members of the committee would like to be here when there is some little discussion of the bill. Why not take a recess until 12 o'clock to-morrow? Then, if there is any question as to forcing a vote upon it, if the Senator feels that way hereafter, we will at least have a chance to be here, and the Senator then can take any position that he desires.

Mr. CUMMINS. Mr. President, I have no objection at all to the suggestion made by the Senator from Utah; but I should like to say this, in order that there may be real debate upon the proposed amendment to-morrow morning:

Since the Senator from Missouri left the subject immediately after the morning hour had expired, not a word has been said to-day upon this amendment. Since the analysis of the amendment by the Senator from Missouri, with a remark that I made in connection with his presentation of the matter, not a word has been said about it this afternoon in any part of the discussion. The Senate has discussed an entirely different question.

I only hope that to-morrow, before the amendment is voted upon, those who discuss the bill will devote themselves to this amendment, leaving the other question to come up, as it will come up, immediately upon other amendments that will be offered.

RECESS.

Mr. NEWLANDS. I ask unanimous consent that a recess be taken at this time until 12 o'clock to-morrow.

The PRESIDING OFFICER. The Senator from Nevada asks unanimous consent that a recess be taken until 12 o'clock to-morrow. Is there objection?

There being no objection, the Senate (at 5 o'clock p. m.) took a recess until to-morrow, Saturday, June 16, 1917, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

FRIDAY, *June 15, 1917.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Infinite and Eternal Spirit, Father of all souls, above all, through all, and in us all, humbly and reverently do we bow in Thy presence and acknowledge with love and gratitude all that has come down to us out of the past to uplift, ennoble, and purify mankind; and we most fervently pray that if there be any virtue and any praise we may not only cherish them in our hearts but strive earnestly as individuals and as a nation to live "whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report"; that Thy kingdom may come and Thy will be done in earth as in heaven. In the spirit of the Lord Jesus Christ. Amen.

THE JOURNAL.

The Journal of the proceedings of yesterday was read.

The SPEAKER. The Journal ought to say that adjournment was had out of respect for Flag Day.

Mr. HICKS. Mr. Speaker, may I correct a title in the Journal? The official title of the flag is "the flag of the United States" and not "the American flag."

The SPEAKER. That is the way it ought to be. The Clerk will correct it. Without objection, the Journal as corrected will stand approved.

There was no objection.

EXTENSION OF REMARKS.

Mr. EVANS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing the speech delivered by the President yesterday on "The Flag."

The SPEAKER. The gentleman from Montana asks unanimous consent to extend his remarks in the RECORD by printing the President's speech on Flag Day. Is there objection?

There was no objection.

Mr. MONTAGUE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a message from the Baptist Union of Great Britain and Ireland to the Baptists of the United States of America in relation to the pending war.

The SPEAKER. The gentleman from Virginia asks unanimous consent to extend his remarks in the RECORD by printing a communication from the Baptists of Great Britain and Ireland to the Baptists of the United States touching this war. Is there objection?

There was no objection.

Mr. FESS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an oration by my colleague, Hon. DICK T. MORGAN, of Oklahoma, on the occasion of the graduation exercises at Merom College, Indiana.

The SPEAKER. Is there objection?

There was no objection.

Mr. CURRIE of Michigan. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of Army registration by inserting an editorial appearing in the Midland Sun.

The SPEAKER. The gentleman from Michigan asks unanimous consent to extend his remarks in the RECORD by inserting an editorial as indicated. Is there objection?

There was no objection.

Mr. RUSSELL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a speech made by my colleague, Mr. BORLAND, yesterday at the Elks, on Flag Day.

The SPEAKER. The gentleman from Missouri asks unanimous consent to extend his remarks by inserting the speech delivered by his colleague, Mr. BORLAND. Is there objection?

There was no objection.

RIVERS AND HARBORS.

Mr. SMALL. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill.

The motion was agreed to.

The SPEAKER. The gentleman from Mississippi [Mr. HARRISON] will please take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill, with Mr. HARRISON of Mississippi in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 4285, the river and harbor bill. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 4285) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. SMALL. Mr. Chairman——

Mr. PARKER of New Jersey. Mr. Chairman, has the first section been read?

The CHAIRMAN. It has been read. The Chair will have to recognize the chairman of the committee [Mr. SMALL] first.

Mr. SMALL. Mr. Chairman, I offer a committee amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the committee amendment offered by the gentleman from North Carolina.

The Clerk read as follows:

Committee amendment: At the top of page 2 insert the following paragraph——

Mr. PARKER of New Jersey. Mr. Chairman, my amendment is to come before that. My amendment is to the first paragraph—not a new paragraph.

The CHAIRMAN. The gentleman's amendment will be read first.

Mr. SMALL. I think this amendment which I have offered will be in order, for this simply adopts a project for Portland Harbor.

Mr. PARKER of New Jersey. This is not on a special subject. It is a general amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from New Jersey.

The Clerk read as follows:

Amendment offered by Mr. PARKER of New Jersey: Page 1, line 9, at the end of the first paragraph, after the words "works hereinafter named," insert:

"*Provided*, That during the continuance of the present war no money shall be so expended except for necessary repair and preservation of the existing public works, or for construction and completion of works of immediate military necessity to be determined by the President."

Mr. PARKER of New Jersey. Mr. Chairman, we have had a great deal of talk here——

Mr. CURRY of California. Mr. Chairman, I reserve a point of order against the amendment.

The CHAIRMAN. The gentleman from California reserves a point of order against the amendment.

Mr. PARKER of New Jersey. Mr. Chairman, when the point is made I will speak to it. I am speaking now to the amendment. I do not see how any point of order can be made to a restriction on the expenditure of money. The reason I offer this amendment is that I think the vast majority of this House is in doubt as to the meaning of the letter of the Secretary of War which talks of and includes the continuance of certain projects already authorized. Take, for instance, the Mississippi River and the Ohio River, and a number of projects to be completed by successive installments in a long course of years before they will become of any real advantage in any way for transportation or otherwise.

This House is determined that the energies and powers of the United States, whether they be of money or whether they be of workmen, skilled mechanics, or of sailors on dredging boats, or of the boats themselves, or whether they be of still more importance, the services of the engineers and the Engineer Corps, the House is determined that these energies shall not be diverted from the work of this war in order to dig ditches and channels.

I know of one case where a military attaché, thoroughly acquainted with the work of the army in France, full of the modern warfare, ready to instruct and train others in it, on his return only a few months ago was ordered to Milwaukee to dig a harbor there.

I know how I felt about that, and the emergency finally prevented that detail, but there are in the Engineer Corps nearly 300 of the best graduates of West Point. Those who pass with the highest honors are taken for the engineers, and they are the men who are trusted to plan trenches and defenses, to plan forts, and to make arrangements wherever works become necessary for siege or defense as war is carried on now. Such officers are needed on the other side and such officers are needed here.

Mr. HULBERT. Will the gentleman yield?

Mr. PARKER of New Jersey. Yes.

Mr. HULBERT. Does the gentleman know that this House has already passed a bill authorizing the calling back into the service of retired engineers, and that it is the purpose of the War Department to put the retired officers in charge of this work who would not be fitted for the work that the gentleman refers to?

Mr. PARKER of New Jersey. The gentleman speaks of their not being fitted for the work referred to—retired officers are fitted for the planning of forts, the planning of trenches, and the planning of defenses. The engineer officer's work is not so severe in the field. They are fitted also to instruct our soldiers in modern warfare. We are short of officers. We are denuding the Regular Army of officers for instruction of the reserve officers, and we are going to denude them still more for the instruction of the troops that will be called out.

There is nothing we need so much as skill and brains, and at this time Congress should order that not a single one of these officers, except for immediate military necessity, should be detailed to this work. I do not know whether Hell Gate or any other particular project is an immediate military necessity, but I think Congress means to say that there shall be no implied authority granted by this bill to detail officers or use our energies during this war for anything except immediate military necessity or the absolutely necessary preservation of existing work. That is my amendment, and I submit it to the good judgment of this House. [Applause.]

Mr. CURRY of California. Mr. Chairman, I make the point of order.

The CHAIRMAN. The point of order is overruled.

Mr. SWITZER. Mr. Chairman, the War Department has invested in a plant for the improvement of rivers and harbors something like fifteen to twenty million dollars—invested in dredges and machinery, and so forth, and probably 10,000 men employed for work therein. A great deal of this plant will be out of commission, will be rusting on the banks of the river, and you will have to have caretakers, and no good can come of it whatever for the people.

Take, for instance, the Ohio River. The gentleman says he is not in favor of any appropriation except that which goes to these harbors or streams that are to be strictly used for the movement of troops or war vessels. I want to say to the gentlemen of this House that the mobilization of the food supply of this country is just as important to bring the war to a successful close as the movement of troops. Take the 7,000,000 tons along the Ohio River and the twelve or fourteen million tons of the Monongahela River, and it will require 100,000 cars to

move this tonnage. There are thousands and thousands of trains that you could use for coal trains hauling the coal to the Northwest and the Atlantic seaboard for the use of war vessels and to go across the oceans. You would have these cars hauling the low-grade tonnage of the Ohio River. Would not that interfere with the carriage of this coal? Would not that interfere with the projects with reference to the carriage of lumber? Take the phosphate rock that is so important for the farmers of this country. Here is an appropriation of three or four thousand dollars for Tampa, Fla., for the movement of this phosphate rock. It can be taken out of the earth, shipped from Tampa cheaper than from any other point in the United States. I think about 90 per cent of the phosphate rock mined in Florida goes through Tampa and Hillsboro Harbors.

Now, gentlemen, these things are necessary. This mobilization of food is just as necessary as the mobilization of men. As I pointed out here the other day, do you want to break down this water transporation service round about Pittsburgh, in the Pittsburgh-Wheeling iron district? Why, gentlemen, you have spent on this project in the Ohio River something like $30,000,000. Thirty million dollars more will complete it. How long is this war going to continue? We have established an armor-plate plant on the Kanawha River at Charleston, W. Va. That stream is canalized, but recollect that the Ohio River from Pittsburgh down to the mouth of the Kanawha is not yet completely canalized, though one or two more dams will complete it, and one more dam will complete the canalization from the mouth of the Kanawha River to the Ashland-Ironton district. Where do you propose to obtain the pig iron you are going to use in the two factories which, I believe, have been established at Charleston, W. Va.?

Will they not want to obtain that iron from the Ashland-Ironton district in Ohio or from the Pittsburgh district? By water the Pittsburgh district is something like 300 miles away, and the Ashland-Ironton district is about 130 miles away. I say it would be a mistake to stop the work upon such an important improvement as this. And, besides, gentlemen, in 1910, when you passed that act, you said this work should be done in 12 years. It can not be done in that time now. You are appropriating $7,500,000 this year to build railroads in Alaska. You have appropriated $6,000,000 for the lower Mississippi, and why do you want to discriminate against the Ohio River?

The CHAIRMAN. The time of the gentleman has expired.

Mr. FREAR. Mr. Chairman, I desire to support the amendment, although I will say I expect to vote against the bill, whether the amendment is accepted or not. It seems to me the amendment is along the right line, but it is not sufficiently definite, in my judgment, to meet the situation presented.

I rise more particularly to address myself to the remarks of the gentleman who has just spoken in regard to the Ohio River [Mr. SWITZER], in which he mentioned the necessity of using trains to carry the food products of the country. The other day I placed in the RECORD some official statistics taken from the Engineer's report relating to the Ohio and Mississippi and Missouri Rivers. They will be found in the RECORD of June 12. I did that because the average Member is too busy to examine the reports; but I want you to know where your money is going and how it has been wasted during all these years. Waste is the only word that can be applied to it. We can talk in generalizations as much as we want to, but what amount of money that has been put into rivers? Sixty million dollars has gone into the Ohio River.

Mr. SWITZER rose.

Mr. FREAR. I can not be interrupted at this moment. The gentleman and I can discuss this question later. A minute ago it was suggested to me that I was opposed to rivers and harbors. That is not true. On the other hand, I will say that the gentleman has not voted for a single amendment to perfect a river and harbor bill during the last four years, and has voted for every bill. These are matters that each Member must decide for himself.

Turning to page 3820 of the report of the Army engineers, it shows that in 1915 the Ohio River commerce amounted to 4,814,000 tons.

Mr. SWITZER. Will the gentleman allow me to correct a misstatement?

Mr. FREAR. The gentleman can correct me in his own time. Of that amount of 4,814,000 tons reported commerce, gravel reached 1,181,000 tons; sand, 1,184,000 tons; and waste, 28,000 tons; or one-half of all that tremendous tonnage of over 4,000,000 tons was sand and gravel, just as it has been in past years, all of it hauled less than 26 miles on a stream 1,000 miles in length. There is some open-river tonnage, of course. There has been, and it has been hauled for 40 years, and there was more tonnage on the Ohio River 40 years ago by far than there is to-day after $60,000,000 expenditure by the Government.

As I understand, the amendment of the gentleman from New Jersey proposes that only necessary expenditures for maintenance be placed on the river at this time. It seems to me that, so far as it goes, that is a good provision to put into this bill, although it does not go far enough. I concede that it will stop the $5,000,000 contained in this bill for the Ohio River, all excepting that which is necessary for canalization purposes. But, gentlemen, over $3,000,000 balance to-day exists to the credit of the Ohio River project, or did exist on the 1st day of March last, uncontracted for; and the Army engineers at that time knew that there was going to be opposition to this bill because of the action taken on that side of the aisle in their caucus, an action noted throughout the country at the time.

Now, Mr. Chairman, I am not going to discuss the Ohio River at length at this time. Any one of these projects would take 15 or 20 minutes or more to place carefully before the House. I have placed in the RECORD the statistics upon this river, as I have on the Mississippi River and on the Missouri, and I invite any Member who wants to find out where the money of the Government has gone to make an examination of the record and ascertain what kind of an investment we have made year after year without increasing the tonnage on these rivers. At the present time 95 per cent of all the balance of the commerce on the Ohio River is coal, and coal went down the Ohio River 30 years ago just as it goes to-day. That is the best proposition according to tonnage we have for the Government, I am frank to say. Col. Townsend made a report, which is placed in the RECORD, urging that 58 of these projects be stopped and remain in statu quo, to use his term.

Mr. SWITZER. Not the Ohio River.

Mr. FREAR. Not the Ohio River, which he advises he tried out, and one other stream.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. I ask unanimous consent that the gentleman's time be extended five minutes.

Mr. SMALL. Mr. Chairman, reserving the right to object, which I do not intend to do, I desire to ask if we can not have some understanding as to the length of debate?

Mr. PARKER of New Jersey. Mr. Chairman, I should think that gentlemen who wish to speak upon the general amendment—I do not wish to speak so much upon the special projects as on this, which is that the President, as Commander in Chief, shall, during the time of the war, determine what projects are of a military character—ought to have opportunity to speak.

Mr. SMALL. Does the gentleman desire further time?

Mr. PARKER of New Jersey. I desire to speak, and the gentleman from Wisconsin [Mr. STAFFORD] desires to speak, and Mr. GILLETT and Mr. LENROOT desire to speak.

Mr. GILLETT. Mr. Chairman, I think the gentleman will recognize that this is one of the most vital and important amendments touching the whole bill which could come up, and it does not seem to me that it is fair to try to cut off debate upon the bill. There is no disposition, as far as I know, to debate simply for the sake of debate, or to delay, but simply to genuinely discuss this proposition. I do not think it would be fair to try to eliminate debate upon it.

Mr. SMALL. Mr. Chairman, any suggestion of the gentleman from Massachusetts always impresses me. It is not my intention to cut off debate, but I desire to ascertain how much time will be required. The gentleman knows that when we go along indefinitely sometimes unnecessary time is consumed.

Mr. MADDEN. Mr. Chairman, I would like to ask the gentleman if it would not be a good idea to ask for about three hours upon a side on this amendment.

Mr. MOORE of Pennsylvania. Mr. Chairman, I should think the statement of the gentleman from Massachusetts would be satisfactory that there is no disposition to delay.

Mr. CLARK of Missouri. Mr. Chairman, reserving the right to object, I would like to say a word. I am not going to object to this extension of time, but I do think that we should speed up and that this bill ought to be finished to-morrow. [Applause.] There is not a man on earth, not even the gentleman from Wisconsin [Mr. FREAR], who can say a new thing about river and harbor improvements. It has all been said. There are important bills waiting here, and some of them vitally affect the conduct of the war. We ought to get through with this bill to-morrow night. Debate ought to be shortened up as much as possible. The gentleman from Massachusetts [Mr. GILLETT] says that this is an important matter. I am not going to dispute with him about that, but after that is disposed of, this miscellaneous and promiscuous talk, delivering the same speeches that have been delivered here to my certain knowledge a hundred times ought to end. [Applause.]

Mr. SMALL. Mr. Chairman, I withdraw the objection.

Mr. HUMPHREYS. Mr. Chairman, reserving the right to object, I would like to make this suggestion to the gentleman

from North Carolina [Mr. SMALL]. If we are to debate this particular amendment, it occurs to me that debate ought to be confined to the amendment. The various items of this bill are going to be discussed and debated when they are reached in the bill, and the fact that they are discussed now is not going to shorten debate when we reach the item, because whatever is said now is going to be repeated when the item is reached, and it occurs to me that the gentleman from North Carolina would do well if he could confine this debate to the amendment offered by the gentleman from New Jersey.

Mr. PARKER of New Jersey. I agree with the gentleman.

Mr. SMALL. If we could confine the debate as the gentleman from Mississippi suggests, to the amendment itself, it would be well; and I think gentlemen should endeavor to conclude their remarks within five minutes, for I think that can well be done. In that event we can get along.

Mr. STAFFORD. The gentleman is aware that there are many gentlemen who wished to participate in general debate who could not be heard.

Mr. SMALL. Oh, that was not my information.

Mr. MEEKER. If the gentleman will remember, there was an adjournment here at 4 o'clock one afternoon because there was no one to speak for the opposition. They had run out of wind works.

Mr. STAFFORD. Oh, I beg the gentleman's pardon, but that is not the fact. There were persons who were willing to go ahead, but they could not go ahead because there was no quorum present. [Laughter.]

Mr. MADDEN. Mr. Chairman, I would like to ask the gentleman from North Carolina if he will yield to a question?

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

Mr. MADDEN. Mr. Chairman, reserving the right to object—I do not know what the request is.

The CHAIRMAN. The gentleman's request is to proceed for five minutes more.

Mr. MADDEN. I reserve the right to object, so that I may ask the gentleman from North Carolina a question. I wish to say to him that I think since we are giving the President of the United States power to regulate everything, there can be no more important action taken by the House to-day than to adopt the substitute offered by the gentleman from New Jersey [Mr. PARKER] giving the President power to say what, in his judgment, is a war measure in connection with this bill. Does not the gentleman from North Carolina therefore think it would be a good idea to adopt the suggestion made by the gentleman from New Jersey and let us pass the bill right away, in the form of that resolution?

Mr. SMALL. I certainly do not.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin [Mr. FREAR], that he may proceed for five minutes more? [After a pause.] The Chair hears none.

Mr. FREAR. Let me say, Mr. Chairman, that the reason I rose to discuss this amendment was because the particular item was reached that ought to be considered in the bill. No one objected to a discussion along that line. I objected to having a statement appear in the RECORD undisputed about the necessity for the Ohio River project. That is a matter for determination, and that is all I care to say about that. The gentleman from Missouri, the distinguished Speaker of this House, whom we all highly respect, says that we ought not to make speeches on the floor that he has heard a hundred times. I care not if he has heard them a thousand times. I conceive it to be my duty to discuss the bill. I am prepared to show at the proper time that the Missouri River has had $15,000,000 put upon the lower part of it, and that only approximately 30,000 tons of actual commerce was carried on that river in 1915, substantially, outside of sand and gravel last year; and I may reiterate other facts during the discussion of this bill. I do not desire to take the time of the House unnecessarily. I do believe a bill of $27,000,000 should be discussed when one-third of the committee is opposed to the bill. I have placed in the RECORD official reports showing that of $1,000,000 annually expended on the Missouri River approximately 90 per cent is going into revetment and dike work for land reclamation projects. This you will find on page 3821 of the RECORD of June 12, taken from official reports.

I do not desire to take any undue time of the committee. I did not expect to speak upon this amendment of the gentleman from New Jersey.

Does the gentleman from Ohio [Mr. SWITZER] now wish to make an inquiry?

Mr. SWITZER. Why does the gentleman quote from the statistics of the annual tonnage on the Ohio River within the State of Pennsylvania and undertake to make this House believe that that is all the tonnage of the Ohio River?

Mr. FREAR. That is a fair question. Let me answer.

Mr. SWITZER. And does not the gentleman know that the tonnage of the Ohio River is seven and one-third millions of tons annually—in the year 1915, at any rate—and the ferriage was two millions of tons on that river?

Mr. FREAR. The engineers quoted the ferriage on the river. This is a 1,000-mile river. All the tonnage that is shown in that statement had an average haul of 26 miles, although it is a 1,000-mile river. Of course, commerce is carried 26 miles on the average at this point, some more and some less, but what I am trying to show is that the average tonnage is small, that the Government is getting practically no return for the enormous investments we have made upon the Ohio, upon the Missouri, upon the Mississippi, aye, upon the Cumberland, Tennessee, and many other rivers. And I call as witness the testimony of the gentleman who is now at the head of the Mississippi River Commission, Col. Townsend, who says that we should stop all the work except on the Ohio River, which he believes we should try for an experiment. He says—to use his words—"To ascertain whether or not these streams will be utilized." That is the expression he used. Why not follow his advice at this time?

Now, Mr. Chairman, I do not desire to take any undue time of the House.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. FREAR. I will.

Mr. MOORE of Pennsylvania. I would like to know whether it is a custom, ordinarily, to occupy a house before the roof is on?

Mr. FREAR. If that is all, I would like to answer the gentleman. We have not made a single success of these inland waterways, based upon commercial reports of the Army engineers, to my knowledge, unless you take a deep-river way like the Delaware River, on any of the inland waterways, and I do not know any one of them that is given as a success.

Mr. MOORE of Pennsylvania. There is the Monongahela.

Mr. FREAR. That is a stream that brought coal down before, and continues to bring it down now.

The CHAIRMAN. The gentleman from California [Mr. OSBORNE] is recognized.

Mr. HOWARD. Mr. Chairman——

The CHAIRMAN. Does the gentleman from California yield to the gentleman from Georgia.

Mr. HOWARD. I should like to move to strike out the last word.

The CHAIRMAN. The Chair has recognized the gentleman from California.

Mr. OSBORNE. Mr. Chairman, I am opposed to this amendment. In the five minutes at my disposal I will have insufficient time to cover the subject, and I will simply outline what I would like to say and ask leave to extend my remarks in the RECORD.

First. I deny with the utmost emphasis that there is any basis in fact for the statement contained in the minority report that "an indefinite amount is provided in this bill for Los Angeles and Richmond, Cal., both of which last-named harbors show very decided appearance of reclamation schemes."

Second. I will show by reference to the volume of hearings on this bill before the Committee on Rivers and Harbors that, while I was present almost continuously during the hearings, no member of the minority ever raised these questions or indicated in the most remote way that he believed the amount to be indefinite or that there was any appearance of reclamation schemes connected wieh the Los Angeles Harbor.

Third. I desire to protest again the illiberal spirit which is shown by the minority of the committee throughout their report, and particularly with reference to Los Angeles Harbor and the Pacific coast generally. I call the attention of the committee, and particularly that of the Republican leaders on the floor of the House, to the growing illiberality which is shown toward the Pacific coast as the western boundary line of our country. Particularly during the past three administrations—two Republican and one Democratic—the Pacific coast has been illiberally treated. No serious effort has been made at coast defense; its shores, from Alaska to the Mexican line, have but few and scattered lighthouses; the naval force on the Pacific is represented by a few small and inferior warships, the entire Pacific Coast Fleet being unequal in effectiveness to a single battleship; our harbors are neglected and not only not developed to meet the new commerce which the citizens of the Pacific coast are striving for in the Orient and in Central and South America, but they are actually allowed to deteriorate by a niggardly policy such as is demonstrated on this floor in connection with this very bill.

After the Eastern and Middle Western States had been settled and built up under the liberal policies of the Republican Party

in its homestead and mining laws and those States had received the full benefit of those liberal policies, a general change has been adopted toward the Rocky Mountain and Pacific States of treating the homesteaders, the prospectors, and the vigorous developers of the public domain as men under suspicion and public enemies.

As a consistent and lifelong Republican, who has voted for every Republican nominee for President from Gen. Grant to Justice Hughes, I am bound to say that, in my opinion, this narrow and niggardly policy has had its effect upon the public mind in the Western and Pacific Coast States, which found expression in the general elections of 1916.

The CHAIRMAN. The gentleman's time has expired.

Mr. OSBORNE. Mr. Chairman, may I have five minutes more?

The CHAIRMAN. The gentleman from California asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. PARKER of New Jersey. Mr. Chairman, I do not desire to object, but I do wish that the debate on this amendment could be confined to the amendment. It is an important military need.

The CHAIRMAN. The gentleman from California will proceed.

Mr. OSBORNE. It will be remembered that the Republican nominee for President in 1916 in his great western tour made a speech at Minneapolis, Minn., during the campaign, in which he took an adverse position upon river and harbor legislation similar to that which is voiced in this minority report and upon this floor. Immediately afterwards he proceeded on that ill-fated mission to the Pacific Coast States, to whose just demands for harbors for national purposes he had just expressed his complete dissent, and which was then fresh upon the minds of their people. I ask my Republican colleagues, and particularly the distinguished gentlemen who comprise the advisory committee of our party in this House, if they are so enamored of the results in California and Washington of a reversal by its party nominee of a time-honored principle of the Republican Party of liberal public improvements that they consider it worthy of their efforts in perpetuation?

Mr. MOORE of Pennsylvania. Will the gentleman yield?

The CHAIRMAN. Does the gentleman from California yield to the gentleman from Pennsylvania?

Mr. OSBORNE. No; I do not.

While the Democratic Party has in these respects not much improved upon the Republican policies, we still find the Republican leaders on this floor, with the notable exception of the gentleman from Pennsylvania [Mr. MOORE] and a few others, on the narrow side of the questions involved in this bill.

I seriously ask my Republican colleagues of this House if it is their policy to have a Republican Party limited to New England and a few States along the Great Lakes, abandoning the South, the great West, and the Pacific coast? Are we to have an inland, fresh-water line of statesmanship as the basic principle of the Republican Party?

Mr. Chairman, during the general debate on the rivers and harbors bill on June 11, the following colloquy took place between the gentleman from Pennsylvania [Mr. ROSE] and the gentleman from Ohio [Mr. SWITZER]:

Mr. ROSE. I would like to know the answer of the gentleman to the part of the minority report wherein they make this statement:

"An indefinite amount for Los Angeles and Richmond, Cal., both of which last-named harbors show very decided appearances of reclamation schemes."

Mr. SWITZER. The gentleman who wrote the report is a little vague. He does not mean we have made an indefinite cash appropriation. He means the ultimate appropriation; that the estimate for the ultimate completion is indefinite. You can say that about everything.

Mr. ROSE. Will the gentleman say it is true or not true?

Mr. SWITZER. It is not true that we have appropriated an indefinite amount

Mr. ROSE. For reclamation schemes?

Mr. SWITZER. There certainly can not be any sort of a reclamation scheme found by anybody at Los Angeles. There is some contention that it will aid in the reclamation of a little land at Richmond, but recollect Richmond is the terminus of the Santa Fe Railroad, one of the great transcontinental railways.

Mr. CURRY of California. Will the gentleman yield?

Mr. SWITZER. I will.

Mr. CURRY of California. I have been trying to get time from both sides of the House to talk on the Richmond Inner Harbor project ever since this general debate started. I have not been able to get the time, and I shall talk about the proposition under the five-minute rule. There is not a single, solitary square foot of reclamation connected with the Richmond Inner Harbor. The reclamation there is the same as in any harbor where there is tideland. The city has done the reclamation itself, and the reclamation is completed, and the money to be appropriated by the Government is $428,000 for the dredging of a channel, and the city of Richmond is to appropriate $428,000, an equal amount, and that is for the physical dredging of a channel 3½ miles long, 600 feet wide, and 24 feet deep and a turning basin 1,800 feet. It is on San Francisco Bay and surrounded by hills. The city of Richmond itself owns the water front. There is not a private interest connected with it. The land is all owned by the city of Richmond, two blocks back from the water front and clear out to low-tide water. The initial appropriation carried in this bill is $100,000.

Mr. SWITZER. Mr. Chairman, I want to say to the gentleman that I personally inspected the Richmond project, and I believe that it is a meritorious one.

My able colleague from California [Mr. CURRY] is well qualified to speak for Richmond Harbor, and I will devote my attention to the unjustified and insinuating reference to Los Angeles Harbor.

I will state at once that there is not the slightest foundation in fact for the two assertions contained in the report.

There is no "indefinite amount" provided in the bill for Los Angeles Harbor.

There is no "very decided appearance of reclamation schemes" embraced in the bill in connection with Los Angeles Harbor, and there is none in fact.

The amount carried in the bill for Los Angeles Harbor is $75,000, of which $25,000 is for maintenance and $50,000 for straightening and widening the entrance to the inner harbor, as recommended by the Board of Engineers, in House Document No. 896, Sixty-third Congress, second session, the estimated total cost of which is $626,000—not an indefinite amount.

There are two other references to Los Angeles Harbor in the bill:

First. Providing a preliminary survey in the west basin, which would be done by the employees of the district engineer, probably with no additional expense to the Government.

Second. Authorizing a modification of silt diversion discharge into the ocean, for the protection of Los Angeles and Long Beach Harbors, provided in the act of Congress of July 27, 1916, with a provision that "such modification shall not increase the total cost of the work."

This, Mr. Chairman, embraces every reference to Los Angeles Harbor contained in the pending bill. The total sum appropriated is $75,000, and there is nothing indefinite about it, and there are no "reclamation schemes" involved, either present or remote. On the contrary, there are no lands within miles of Los Angeles Harbor that are within the possibility of being reclaimed, or any that can be purchased for less than hundreds of dollars per acre. The county of Los Angeles a few months ago voted bonds to the extent of $4,450,000 to control the flood waters of Los Angeles and San Gabriel Rivers that now periodically discharge silt into Los Angeles and Long Beach Harbors, and the county has authorized the expenditure of $1,080,000 for the purchase of right of way for the diversion into the ocean at a cost of hundreds of dollars per acre.

I hold in my hand, Mr. Chairman, a copy of the volume which contains the hearings held on this bill before it was presented to the House. It is a volume of 160 pages, and quite complete. I was present throughout the hearings, almost continuously. I will ask you, Mr. Chairman, and members of the committee to look over this report and verify what I now tell you, that not one of the gentlemen who signed this minority report ever raised a question on Los Angeles Harbor. Not a single objection, or even a request for an explanation upon any point, was presented to me at any time during the hearings, or at any other time.

You may imagine my surprise, Mr. Chairman, when, upon looking over this minority report for the first time, I read this reference to Los Angeles Harbor. I find it difficult to find language to truthfully characterize the statements and at the same time to preserve the dignified forms of expression that are properly enjoined by the rules of this House. I come to the House as a new Member, representing one of the most public-spirited communities in the United States. The history of California is unique among the States of the Union in its vivid character and vast accomplishments. It has added between two and three billions of dollars to the gold supply of the world. The rebuilding of San Francisco after its destruction by earthquake and fire in 1906 was one of the wonders of all time. The transformation of Los Angeles from a semi-Mexican pueblo of less than 15,000 people to one of the most beautiful cities of America, with a population of 600,000 people, has occurred under my own eyes within a third of a century. What the public-spirited people of the Pacific coast have done in the past 40 years to strengthen the Nation is something which you people here in Congress ought to know in order that you should deal justly and sympathetically with them in public affairs.

The history of my own city of Los Angeles would interest you like a romance. When I first lived there there was not a yard of paved street in the pueblo. Now we have hundreds of miles of paved streets of cement and asphalt, equal, if not superior, to those of Washington. We have a hundred thousand beautiful homes, not crowded together into solid blocks, but each with its ample grounds in lawns, shrubs, trees, and flowers. We have the most extensive and the most solid, convenient, and comfortable city and suburban transportation lines of any community in America.

Some years ago, warned by the large influx of citizens from all parts of the country, and desiring to guard against a shortage of water, we went into the main Sierras, 250 miles distant, and brought a river of pure mountain water from the base of Mount Whitney to Los Angeles, by an aqueduct as solid in its construction of concrete and in its source of water vastly more extensive than the world-famed aqueducts of ancient Rome. The Los Angeles aqueduct, more than twice as long as the recently constructed Ashokan aqueduct of New York City, runs through hills, valleys, and mountains, and includes 52 miles of solid tunnel work through the mountains, these tunnels being lined with concrete. The aqueduct is lined and covered with concrete throughout the 250 miles, excepting through the depressions, where the water is carried in enormous steel spyhons. The aqueduct carries a power system of which 37,000 horsepower is completed, which will be increased to 120,000 horsepower. This has been done by the city of Los Angeles at a cost of between $30,000,000 and $40,000,000.

We are stretching our arms across the seas, to China, Japan, and Australia, and down the Pacific coast to Mexico, Central America, and South America, to build up foreign commerce for ourselves and for the American Nation. We have sent delegations of our successful business men to those countries for that purpose. We have stretched our own city boundaries more than 20 miles to cover our harbor front, in order that we might protect the rights of the people in the harbor, and have the legal right to expend our own money in developing the harbor. We have spent on the harbor dollar for dollar with the National Government, and we are doing so to-day. We have achieved splendid results, and aside from all other business Los Angeles Harbor handles the greatest amount of lumber of any harbor in the world.

I say these things, Mr. Chairman, not in any vainglorious spirit, or to boast of my own city, but to show you the kind of a community which I have the honor to represent, and to ask you if you really think that such a community as I have described would be likely to conspire to rob the Nation on an appropriation of $75,000 or any other amount. Would you expect Los Angeles, with the honorable record that it has, to try to "put over a reclamation scheme," which, as the term is used in the minority report, would seem to mean some sort of crooked real estate scheme?

Gentlemen of the minority, who generally reside far from the invigorating influence of the salt breezes of the ocean, and in old and settled if not stagnant communities, can hardly conceive or comprehend the spirit of the great and growing communities of the Pacific Coast States of California, Oregon, and Washington. To us who have seen them grow from infancy to youth and lusty young manhood, and who may have had somewhat to do with that expansion, their just honor and deserved fame is dear to us, second only to that of our own families. We have a peculiar pride in our own creation, if it is good. That is the feeling of all our people. Our people are generous and hospitable to strangers to a degree that is unknown east of the Rocky Mountains. In all Pacific coast cities, and notably in Los Angeles, our people, and particularly our chambers of commerce, entertain in one way or another as many distinguished men from the older parts of the country as they find among them. It is a pleasure to them to do it. As President of the Los Angeles Chamber of Commerce I have had the honor to entertain for that body some Members of this and of former Congresses. With the intense municipal and State pride that I have described, you can conceive the impression that would be created by a report of this kind, so unjustified and unrelated to the truth, being published as a congressional document. It would be something like the feeling toward one who had been a guest of your house and home and an intimate of your family, who would go forth and spread damaging reports as to the acts or character of its members.

I can not refrain from comment on some of the alleged witticisms that have characterized this debate, particularly the one with reference to the "water hyacinth." To those whose observations have by necessity or otherwise been limited anything that is unfamiliar to them, or which to their unaccustomed ears sounds queer, like a foreign language, is "funny." But that by no means makes it funny. What the foreigner says, or the unfamiliar topic of conversation, really may be very serious. It is thus with the water hyacinth of the Southern States. It is really so profuse and powerful a vegetable growth that it may fairly be termed malignant. It rapidly and seriously obstructs navigation in the narrow rivers and bayous, and has to be cut out. It is not a joke at all, and there is nothing convincingly humorous or funny about it. The indulgence in this line of humor indicates a rather narrow and provincial limitation.

I now again repeat my appeal to the Representatives of the interior States to take a broad and national view of the question of caring for the harbors of the country, and especially those of the Pacific coast, as a measure of national defense and safety. On the Pacific coast we are on the border line of our national continental territory. Do not permit yourselves to take the dormant and selfish attitude that your districts, being far from either ocean, will not suffer materially in the event of a foreign invasion. Take the position that every inch of American territory, from the Atlantic to the Pacific, is as much a part of your country as your own front yard at home, and that you will give it the full benefit of your service and protection as a Member of Congress, and preach the same doctrine to the people of your district. [Applause.]

The CHAIRMAN. The gentleman from Maryland [Mr. LINTHICUM] is recognized.

Mr. LINTHICUM. Mr. Chairman, I am opposed to this amendment. It seems to me there are certain gentlemen of the House who seem to think that because we have entered upon this war we ought to stop all internal improvements. I think that if we want to carry on this war successfully we ought to do those things in this country which will be an incentive to more labor and more commerce. In the city of Baltimore we are pushing ahead. We are not stopping because of the war. We are subscribing to the liberty loan, we are furnishing and training men for the Army and the Navy, and we are going ahead on our internal improvements in both the city and the State. I do not believe that because we have entered upon a world-wide war that we should devote all our energies to destruction and none to creative processes. I believe that the harbors and channels of this country are important, just as important in time of war as in peace. Some say, "Let us stop." You can not stop all the harbor improvements. You can not stop all the river improvements. If you do, they fill up and the money that has been expended is generally lost. I think for this Government at this time to hesitate upon the expenditure of $26,000,000 to open up the harbors and channels of this country while spending $7,900,000,000 for war purposes is certainly very unwise.

Mr. REAVIS. Will the gentleman yield?

Mr. LINTHICUM. No; I can not yield.

I say that what we want to do is not to discontinue creative processes, but work for the upbuilding and the greater improvement of the country. The European war does not stop the work on internal improvements in other countries. They are going ahead with that work, just as they are going ahead with the prosecution of the war. The war will no doubt continue for several years. Shall we let our harbors silt up and our industries lag and our manufacturers discontinue because we can not get our products to the other side and sell them, or shall we go into this matter vigorously for commerce and business and carry on this war with the usual vigor of the American people, so that the Stars and Stripes shall float over the battle fields of Europe, with abundance of business and abundance of money being made by the people at home to carry on that war?

I realize that many of the expenditures of Congress are subject to protest because of the failure of an equitable distribution of benefit thereunder; but if there is one bill which ought to be safe from attack on that score it is this annual appropriation for the improvement of our rivers and harbors. An appropriation for the erection of a public building here or there is, in most instances, but local in its effect and appreciation. With this bill, however, it is different. The opening, improvement, and enlargement of every river and harbor places at the disposal of commerce another source of trade, and thereby even those who may live at remote distance therefrom are benefited by the increased trade conditions made possible by the appropriation expended.

A number of gentlemen from inland States apparently fail to realize that the seaboard cities of the land are its gateways to the people of the world. They appear to quite overlook the fact that through these gateways flows annually that vast volume of commerce which we carry on with the other countries of the earth. If these gentlemen will pause for a moment to consider the importance of these gateways, with their ever-increasing traffic, I feel sure that objections which they may entertain relative to their improvement will be subordinated to the desire to do that which is essential to the greatest good to the vast majority of our people, for the welfare of the great majority of our people is vitally involved and directly affected by legislation for the improvement of our rivers and harbors.

I am confident that our people appreciate the value of improved waterways, and feel that money wisely expended in the improvement of our rivers and harbors can not be put to

better use. Meritorious cases should be taken care of, regardless of the heavy expenses incurred by virtue of the war in which we are engaged, and cities like Baltimore, from whose port the great export and import business is conducted, should be provided for at the earliest possible moment. The country will not commend us for economy solely because we confine our expenditures to old projects, and without reference to the present or prospective demands of commerce or naval necessity. The country will not applaud our good judgment when it ascertains that we have neglected great harbors that are of material benefit to the entire Nation. As was well said by Senator Burton to Maj. Denny, my predecessor, when on a visit to Baltimore to inspect our harbor in connection with the proposed ship channel through the Patapsco River and the Chesapeake Bay to the ocean:

I am not so particularly interested in the city of Baltimore. I know it is a great city and has splendid people, but my particular interest in this project is that great western section which produces so much for exportation and depends upon the harbors of the Atlantic coast for ports from which to ship its products. I know that when this channel is constructed it will be another gateway to the West and an outlet from the West to the countries of the world.

At this time, however, I am mainly interested in the item in the present rivers and harbors bill providing for the maintenance of Patapsco River and Channel to Baltimore, including channel of approach at York Spit, Chesapeake Bay; for improvement in accordance with the report submitted by the Army engineers, for the reason that it is a military necessity that our channel be further improved and maintained.

The Navy Department is anxious to load its colliers at Curtis Bay, a part of the Baltimore Harbor, but the channel to this port being only 30 feet deep prevents them loading to their full capacity, because when the colliers are loaded to their full capacity—19,000 tons of coal—they draw 30 feet of water. This state of affairs naturally makes it expensive to partially load the colliers at the piers where every facility is to be had and complete their loading in the main channel, which is 35 feet deep, or at some other port.

A letter from Hon. Franklin D. Roosevelt, Acting Secretary of the Navy, says:

NAVY DEPARTMENT,
Washington, June 8, 1917.

CHAIRMAN COMMITTEE ON RIVERS AND HARBORS,
House of Representatives.

MY DEAR MR. CHAIRMAN: I am informed that the bill reported by your committee on the 9th day of May last embodies an appropriation of $250,000 for the construction work of the channel to Baltimore, including that of Curtis Bay, which is considered in the Engineer's Report as part of the general harbor improvements.

On January 11, 1915, I wrote you setting forth the necessity and advantage to the Navy of the appropriation which was then contemplated of $123,400 for the widening and deepening to 35 feet at mean low tide the channel into Curtis Bay, Baltimore Harbor. The bill which has now been reported, I note, embraces both the Curtis Bay Channel and the improvement of the Baltimore Channel into Spring Gardens, by a depth of 35 feet in place of the present narrow, crooked, and shallow channel leading into that portion of the harbor. This is very wise, in view of the fact that the Western Maryland Railroad is now in position to load coal at its piers in Spring Gardens, giving us another much-needed facility for obtaining fuel for the Navy.

The whole matter is of vital military necessity to the service. The Navy has had contracts for some years for the loading of coal at Curtis Bay, and the fact that this coal comes from one of our largest suppliers and is of the highest grade makes the Curtis Bay Harbor an asset of great military value to the naval service. The supply of coal is highly essential at this time. Now that we are at war, we must take into consideration that there may be a coal famine or that strikes may take place elsewhere when the coal supply at Baltimore Harbor would become invaluable.

At the present time it is impossible to load the colliers to their full capacity at this port owing to the inadequate depth of the channel, both into Curtis Bay and Spring Gardens; in fact, the *Neptune* was grounded in the Curtis Bay Channel in 1912. The colliers are now being constructed larger and require such a depth of water that in order to obtain coal from these sections it is necessary to load partially at the piers and complete loading in the channel or at some other port.

The improvement of this channel, according to the bill, is of great value not only to the Navy but also to the commerce of the city of Baltimore and the State of Maryland. I respectfully urge that you give the Baltimore appropriation every assistance to its final approval by the House.

It is needless for me to mention the $104,000 necessary for the maintenance of the channel approaches at York Spit, Chesapeake Bay, and through the Patapsco River to Baltimore. We all recognize the absolute necessity of maintaining the waterways which we have already constructed.

Sincerely, yours,
FRANKLIN D. ROOSEVELT,
Assistant Secretary of the Navy.

With the exception of Norfolk there is no harbor along the Atlantic coast so important to the Government as a source of fuel supply. This work is meritorious and should be started at once. What is the use of building the enormous Navy which we have provided for when you will not appropriate sufficient money to construct a deeper channel to Curtis Bay to coal that Navy, especially when the advantages of this point as a coaling station have been so ably set forth by our Assistant Secretary of the Navy.

In addition to this, Mr. Roosevelt has told me that it is dangerous to load coal to the full capacity of the colliers at Philadelphia, as they are likely to be grounded in the Delaware River. It will cost many hundreds of thousands of dollars to dredge the Delaware River for these colliers and require considerable time, whereas for the sum mentioned in the Engineers' Report Curtis Bay and Spring Gardens can be deepened to 35 feet, which will accommodate the largest of them without difficulty.

Since the time the main ship channel was completed to Locust Point and channels extended from that into Spring Gardens and Curtis Bay, great industries have sprung up further along the river in Spring Gardens, notably the Western Maryland Railroad, which has by its arteries and connection with other roads become a transcontinental railroad, and likewise reaches the coal fields of Maryland and Pennsylvania. It has constructed huge coal piers in Spring Gardens and every facility necessary for the Navy and the shipment of grain and other products from the West to the four corners of the world. This serves to impress the need of the extension of this channel and the widening and deepending to 400 feet and 35 feet, respectively, to accommodate the great industries which have sprung up along the present channel. There is no question but that this improvement is absolutely essential at this time.

This bill has passed the House several times, the Committee on Rivers and Harbors of the House realizes the need for this improvement, and the Navy has been crying for coal from this section. The delay is no doubt occasioning great loss not alone to the commercial interests of Baltimore, but to the Government itself because of its inability to load these colliers to their full capacity.

When the Curtis Bay Channel is deepened it will open up a strong competitor in Baltimore for the immense coal trade of the United States Government, which is now practically confined to Norfolk and Newport News. As it is, when the Government desires to coal the colliers to their full capacity, they are limited to the latter ports. If the channel to Baltimore is deepened as provided in this bill, the Baltimore & Ohio and Western Maryland Railroad coal piers will open up strong competition. With the large number of vessels now under construction and to be constructed, together with the enormous amount of coal that will be consumed by our Navy in the prosecution of the war we are now waging and in supplying our allies with fuel, it can easily be seen that better facilities must be afforded our warships and the colliers must be given additional ports at which they can load to their full capacity.

Under ordinary circumstances the Government requires and purchases for its naval vessels on the Atlantic coast about 700,000 tons of coal per year. This year I am told that the estimates for the Atlantic seaboard is 1,200,000, an increase of 500,000 tons over the usual estimates. The freight rates for the coal fields reached by the Baltimore & Ohio Railroad leading to Curtis Bay is $1.23 per ton. The lowest rate which can be had to the Norfolk and Newport News Harbors from the nearest coal fields, together with the fact that the best coal that can be secured for the Navy is the Georges Creek coal, the coal hauled via Baltimore, we have a difference of 17 cents per ton, and on 1,200,000 tons of coal it amounts to $204,000. Therefore, if you will add what will be saved by competition to the amount saved in freight rates, I venture to say that the money saved by the department will amply repay us for the expenditure. Then, too, the Government will be in touch with more coal fields and more railroads to haul it in times of necessity.

The Baltimore & Ohio Railroad, as also the Western Maryland, have expended huge sums of money for increased facilities and additional trackage to bring coal to our port. The present coal piers at Curtis Bay have a tried capacity of about 275,000 tons of coal, 6,000 cars a month, approximately 3,330,000 per year, and the Baltimore & Ohio Railroad, which owns the large coal pier, is building another which will double the capacity. I say this to show how Baltimore is hampered by her lack of a deep channel and to illustrate another one of the many reasons why Curtis Bay Channel and the Spring Gardens Channel should be widened and deepened. The effect of the improvement will be wonderful when the large ocean-going naval colliers who would use this port if greater depth were available will be able to do so.

I quote from the report of the Army engineers in further support of my claim, from which it will be seen that the Army engineers believe that Baltimore will ere long become an industrial harbor second to New York alone:

The terminal facilities at the port, while not exactly inadequate for present traffic, are being constantly enlarged, and unless the work is promptly undertaken by the United States there is grave danger that the growth of the harbor will be restricted and the commerce of a large section of country hampered, for the influence of a port like Baltimore reaches to the center of the United States and affects the price of all

commodities. It is believed that it is not a fair criterion to judge the future commerce of Baltimore Harbor by the past; for, owing to various influences and causes which have existed, but are now being pushed aside or removed, and the awakening which has occurred to the city's great natural advantages as a port, and the extensive terminal improvements now in progress or in plan by every one of the railway systems of the port, there is reason to confidently expect that the harbor will soon see a movement of freight through it greater and much larger than has ever yet taken place, and which will give the city the place to which it is naturally entitled but not heretofore tried to attain. There is no reason why Baltimore, with proper utilization of its advantages, should not be at lowest the third port of the country in point of tonnage, and the Government should promptly begin the work of providing channels of proper dimensions and suitable anchorage areas to serve the terminals already planned and others that there is every reason to believe will before long be constructed. As an industrial harbor it promises soon to be second only to New York.

The project for Curtis Bay has already been recommended to Congress, and no further statement of commercial statistics would seem necessary. It might be added, though, that the Baltimore & Ohio Railroad is constructing additional terminal facilities for coal, estimated to cost $1,500,000; that the Davison Chemical Co., on Curtis Creek, is expanding and is planning a pier about 400 feet long to accommodate ocean vessels; that the Curtis Bay Chemical Co., on the north shore of the bay, has nearly completed a very extensive plant; and that, according to report, the Pennsylvania Railroad is considering establishing terminals somewhere on this water front. The harbor lines in the bay were extended in 1915 so as to permit larger docks. It is believed with the improvement as indicated that large commercial development will follow.

As to the Southwest Harbor, the existing channel, 27 feet deep, is very crooked and narrow, and is often complained of. The Western Maryland Railway has a large terminal, covering the land east of Light Street and south of McComas Street, and is developing rapidly its terminal facilities, with grain elevators, larger docks, etc. The harbor line was extended in 1915 so as to permit piers of greater length, and accommodation is sought for the largest ocean steamers; that is to say, a depth of 35 feet. To the eastward of this point the city of Baltimore is preparing to acquire property and to develop, after which this front will be under the control of the city. A depth of 35 feet and a width of 400 feet to Ferry Bar is considered essential on account of the length of the channel and the extent of the development, past and prospective. The necessity of dredging by private parties from the channel to the various docks will give to the private owners or the city their full share of the expense of the improvement.

It can be seen by the Army Engineer's Report that the city of Baltimore has done everything in its power to cooperate with the Government and has extended aid on every possible occasion. A number of our private firms, notably the Westport Brick Co., which has dug its own channel from the main channel near the new Hanover Bridge to its wharf, a distance of about four-fifths of a mile, and the Western Maryland Railroad has enlarged its terminal facilities by the construction of the additional large coal piers and a grain elevator, and which has dug its own channel 32 feet deep from the Government channel of 27 feet depth, to its piers, have certainly done their part.

The city of Baltimore has spent many millions of dollars since the great fire of 1904 in building docks and piers for the accommodation of the vessels entering that port, but in the work so far done it has merely "scratched the surface." There are miles of water front adjacent to and opposite the city along the Patapsco River, all of which can be and will be improved by docks and piers which will have abundant railroad facilities. With the utilization of this water front we will be enabled to expand our shipping indefinitely and accommodate any number of vessels coming into our port.

We have also spent a great deal of money in the inner harbor and have dredged a channel 35 feet deep to the docks and piers. Our railroad companies have spent vast sums of money in the enlargement of their terminal facilities and in the procuring of deep water to their wharves. Baltimore has done her part, and we wish to impress upon Congress that it is unfair for it to be compelled to do more. Baltimore being one of the great seaports and one of the few cities of the world having a 35-foot channel is entitled to serious consideration from the National Government in the widening and deepening of its channel so that it may not be hampered in the great commercial enterprises in which its people are engaged. Give us what we are entitled to; we ask no more; and certainly before long we will reach our coveted goal as an industrial harbor second alone to New York.

Baltimore is the strategic point of the Atlantic coast. It enables commercial and industrial enterprises to defy competition from other seaboard cities. Figure it out from a map. It is the shortest route to southern Europe and Africa. It is closer than any other big Atlantic seaport to Cuba, Jamaica, and South American cities on the east coast. It is 470 miles closer than San Francisco to the city of Valparaiso, Chile, the chief seaport on the west coast of South America. As a distributing center, it is closer to the South and the great Middle West than any other Atlantic seaport. It has 19 steamship lines engaged in trans-Atlantic and other foreign trade, 8 local steamship companies operating 68 vessels in Chesapeake Bay and coastwise trade. It has 6 miles of municipal wharfage front; 32 miles of private wharfage, of which 10 miles are occupied by railroad piers and docks, 1.3 miles by steamship companies, 2 miles by wharf and dock companies, and 19 miles by industrial concerns.

By reason of its geographical location the city, from the very first days of the "iron horse" became a railroad center. It has also always been one of the important seaports of the country. That Baltimore lived and flourished may be attributed to its natural maritime advantages. It early became a distributing point for merchandise that came over all seas and from all lands. It sent and still sends back ships burdened with products of every section of this country. Long before steam became the propelling force of commerce Baltimore's supremacy was assured. The Baltimore clipper was famous; it was sailing every sea and was seen in every port.

The city has a largely developed trade in every respect, particularly through the South. Being of the South, this seems natural, but Baltimore is not dependent upon sentiment alone. As a metropolis of the South, Baltimore is the natural source of supply of this section, and its trade throughout this vast country is large and ever increasing. Nor is Baltimore's sphere of commercial influence confined to the great region south of the Mason-Dixon Line. Its merchants are invading the North. They have captured a good percentage of trade of Pennsylvania and New York State, and are successfully operating in the Ohio Valley.

The following statistics for the year 1915, the latest I have been able to obtain, show the volume of business transacted through our port:

COMMERCIAL STATISTICS.

The number of vessels documented in the district of Maryland, which includes Baltimore, Crisfield, Annapolis, Washington, D. C., and Alexandria, Va., is 2,014, with a gross tonnage of 278,504. In addition it is estimated that there are operated within the district of Maryland over 5,000 small motor boats.

Vessels built in 1915.

Classes.	Number.	Tons.	Value.
Sailing	5	1,468	$56,500
Steam	8	39,644	4,148,000
Gasoline	16	357	74,100
Barges	10	1,792	105,000
Total	39	43,261	4,383,600

All of the above were built at the port of Baltimore, Md., with the exception of four sail, 150 tons, value $16,500, and eight gasoline, 191 tons, value $46,100, which were built at Crisfield, Md.

The only new line of transportation established during the year was the Furness-Johnson Manchester Liners Joint Service (Ltd.) between Baltimore and Manchester, England.

The sailings of the North German Lloyd to Bremen, Germany; the Hamburg-American Line to Hamburg, Germany; and the Red Star Line to Antwerp, Belgium, have been suspended, due to the European war.

BALTIMORE AS A PIONEER.

Peter Cooper made the first railroad coach run from Baltimore to Ellicott City August 28, 1830.

The first railroad was organized in 1827.

The first patent for a locomotive was granted in 1828.

The first ribbon of American silk was made.

The first steam engine for traction purposes was operated.

The first steam vessel to cross the Atlantic set sail.

The first steam vessel entirely of iron was constructed.

The first telegraph line was operated.

The first iron building was erected.

The first revolving cylinder press was made.

The first armor plate was made.

The first electric car was operated.

The first electric locomotive was used by a railroad.

The first dental college was established.

The first linotype machine was made.

The first carbureted hydrogen gas for illuminating was made.

The first merchants' exchange was erected.

The first monument to Washington was erected.

The *Dewey*, the largest floating dry dock in the world, was built.

Baltimore is the Monumental City, with 21 notable memorials.

Baltimore is the birthplace of "The Star-Spangled Banner"—the national anthem.

Baltimore is the first in the canning and preserving industry.

Baltimore is the first in the manufacture of cotton duck.

Baltimore is the first in manufacture of straw hats.

Baltimore ranks first in medical science and education in America.

The Johns Hopkins is the one real university in America.

Baltimore is first in the oyster industry.

Baltimore is the largest banana market in the world.

Baltimore stands first in the bonding business.

Baltimore is first in manufacture of fertilizers.

Baltimore ships more bituminous coal than any other American port.

In conclusion, Mr. Chairman, let me say that Baltimore has forged ahead as never before in her history. Vast enterprises have been established along her water fronts, and in the section of Curtis Bay alone more than $25,000,000 have been invested. Wherever there is a water front large factories have arisen and great business is now being conducted. There is no question but that the extension of the present channel farther up the river into Spring Gardens and the widening and deepening of the channel into Curtis Bay will be a still further incentive for more business, more work for the laborers, and greater prosperity for our city and the country.

Nor have other matters been neglected. Baltimore has expended millions of dollars upon the construction of the most elaborate and improved sewerage system in the world. It has laid miles upon miles of smooth streets. Its filtration plant, at the cost of several millions, has been completed and in operation for some time. In fact, everything tending to make an old city the most modern in the country has been done or is being done by those in control of our municipal affairs.

All we want is that the Government give us an opportunity to still further expand and we will show by our resources and business enterprise that our people, each and every one, appreciate what has been done in their interest, and will cooperate in money and in energy with the National Government to the end that greater facilities and greater accommodations may be given to this one of the great gateway cities of the land.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. LINTHICUM. I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. COOPER of Wisconsin. Mr. Chairman, this bill is being very severely criticized, but the criticisms are no more vigorous than were those leveled at the bill of 1916. That bill of 1916 was denounced in every way possible for those who deal in denunciation to bring their vocabulary to bear upon it. It was called needless, useless, corrupt.

Now, that was in the year—the presidential year—of 1916. It went to the President in July. The President was a candidate for renomination. Presumably he wanted to be very careful as to the measures which he might approve at so late a time in that, to him, most important year. So when Congress passed and sent him that bill, which had been said to contain many fraudulent schemes and so much "pork," he asked the Secretary of War to examine it, item by item, and report to him his conclusions. The Secretary of War kept the bill for 10 days, the limit of time allowed by the Constitution to the President to consider a bill, and then the Secretary of War wrote this letter:

JULY 24, 1916.

MY DEAR MR. PRESIDENT: I return to you herewith the river and harbor bill, which I have gone over with great care and upon which I hand you a report made by the Chief of Engineers with certain attached memoranda. The net result of this examination is to show that in this bill, carrying $42,886,085, $611,200, or about 1½ per cent, is, in the judgment of the Engineer Department of the War Department, regarded as economically indefensible, although in the case of some of these expenditures the improvements are probably not primarily for navigation purposes.

I concur in the view expressed by Gen. Black that the direct loss to the United States as a result of suspension of work, were this bill not to receive your approval, would be greater than the amount appropriated for improvements of a doubtful value; that is to say, upon all the great river and harbor projects of the country, if work were suspended, there would be loss due to the breaking up of existing organizations, the care of idle plants, etc., which would be very serious. Should this bill receive your approval, the department would have so much work on its hands that it would probably be obliged to delay some portion of it, and, of course, in selecting that to be delayed, the work of doubtful economic importance would be postponed, so that the entire $611,200 marked as questionable would probably not be expended in any event.

Respectfully submitted.

NEWTON D. BAKER.

It thus appears that the Secretary, after he had been over that viciously abused bill item by item with the Chief of Engineers, both officers being commanded by the President to make a thorough, honest investigation of its provisions, reported that of that bill of $42,000,000 only 1½ per cent was not economically defensible. And therefore the Secretary and Chief of Engineers recommended the bill to the President. He signed it, and it became law; and we know now that it was a law in the public interest.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. COOPER of Wisconsin. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. COOPER of Wisconsin. Now, nobody contends that the pending measure is worse than was the bill of 1916, which the President signed. It is much less in the aggregate amount which it carries.

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. COOPER of Wisconsin. Yes.

Mr. MEEKER. I wish while the gentleman is on his feet he would say to this House what he said to me in regard to the repeated charge that the bill which passed here was defeated in the Senate. Will you get the facts straight, so that we can have them?

Mr. COOPER of Wisconsin. I do not know that I can give the facts straight as to that measure.

Mr. SMALL. Mr. Chairman, will the gentleman yield?

Mr. COOPER of Wisconsin. Yes.

Mr. SMALL. The river and harbor bill was not defeated in the Senate at the last session of Congress any more than the sundry civil bill or the Army bill or the deficiency bill was defeated in the Senate. All of those bills failed simply because they were not taken up for consideration by the Senate, as alleged, for lack of time.

Mr. COOPER of Wisconsin. Yes. I now direct the attention of the House to what the Chief of Engineers said about the bill of 1916, many of the projects in which were so savagely denounced on this floor:

JULY 24, 1916.

From: The Chief of Engineers, United States Army.
To: The Secretary of War.
Subject: Report on pending river and harbor bill.

1. In compliance with your verbal instructions, the following report on the pending river and harbor bill is submitted.

2. For the past 8 or 10 years Congress has, in general, followed the policy of adopting no new projects except such as were favorably recommended by the Chief of Engineers. The recommendations of the Chief of Engineers are in each case based upon a careful examination and survey to determine the nature and cost of the improvement to be undertaken and a full study of the probable benefits to be derived. The study is such as would be made by a careful business firm to determine whether it would undertake a new business venture.

The study is made by the district engineer and reviewed by the division engineer and the Board of Engineers for Rivers and Harbors before being acted on by the Chief of Engineers.

And I stop right here to refer to what Senator Burton said in a speech which, I think, ought to be quoted before this debate ends—Senator Burton, who has been characterized as the greatest river and harbor expert by the gentleman from Wisconsin [Mr. FREAR] now attacking this bill, as he has all other river and harbor bills. Senator Burton has repeatedly said on this floor and in the Senate and in the report of the Waterway Commission, of which report he is the reputed author, that of all bodies to whom the general subject of the worth of proposed river and harbor improvements could be submitted, no other would be so impartial and none more competent than a board of the Engineers of the United States Army.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COOPER of Wisconsin. I shall not occupy time again on this bill, and I ask for five minutes more.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. MONDELL. Will the gentleman yield?

Mr. COOPER of Wisconsin. I can not yield now. I have but five minutes. The Senator said that the Board of Engineers were less susceptible to political and personal pressure than would be a commission of civilians appointed by the President.

The Chief of Engineers goes on to say—

Prior to the time mentioned above—

That time being 8 or 10 years before—

Congress adopted many projects which had not been subjected to such a careful study and which were not recommended by the Chief of Engineers.

He says:

As a rule it is certain of these projects which have been subject to recent attacks. To determine whether the attacks were justified, a proviso was inserted in the river and harbor act approved March 4, 1915, directing a reexamination of all existing river and harbor improvements to determine which, if any, of them should be modified or abandoned. The results to date of this reexamination are set forth in brief in memorandum No. 1 herewith.

He says that owing to lack of time the reports on these recommendations could not, with few exceptions, be made available for the consideration of Congress in connection with the then pending bill. He continues:

4. An examination of the bill shows that it contains certain items which were not included in the annual estimates of the Engineer Department, or which were included for a less amount than the bill provides. Memorandum No. 2, inclosed, cites these items in detail, and shows that, without exception, the added items and the increased amounts were introduced into the bill on recommendation of the Chief of Engineers based upon facts that came to light after the annual estimates had been submitted. There are also many items for which a less amount is provided than called for by the annual estimates. No discussion of them is deemed necessary.

5. Memorandum No. 3, inclosed, gives a list of all the items in the bill which may be classed as of doubtful value to the interests of navigation when subjected to the tests usually applied by the department. A final analysis shows that, of the total, $42,886,085, carried by the bill, $611,200 (about 1½ per cent) is not economically defensible in the judgment of the Engineer Department for navigable purposes, however meritorious it may be for other purposes.

He closes with a statement to which I direct especial attention:

6. To conclude, the items in the bill which can be justly condemned are few and the amount provided for them is small, as compared to the loss to the commercial interests of the country that would result from the failure to enact a river and harbor bill. Moreover, the direct loss to the United States as a result of suspension of work and care of idle plant pertaining to improvements of unquestioned merit would, as shown by the experience of 1914, in less than three months amount to more than is provided for the doubtful items.

7. It is recommended, therefore, that the bill be approved by the President.

W. M. BLACK,
Chief of Engineers, United States Army.

Thus we see that this report also shows the injustice of the abuse heaped upon the bill of 1916.

I have read repeatedly, as you have, that it would not have been possible for Germany to continue the war as she has continued it had it not been for her magnificent system of internal waterways. Her rivers and streams, almost her brooks, are canalized everywhere, and persons who in peaceful times have traveled through that country can not have forgotten how crowded those waterways were with barges carrying coal, stone, lumber, iron ore, fertilizer, and practically all the other heavy freight of that nation.

Mr. LENROOT. Will the gentleman yield?

Mr. COOPER of Wisconsin. I can not. I have agreed not to talk longer than five minutes, and I have remaining only a little time. France has just completed, at the expense of millions of dollars, during the progress of the great war, a canal which now runs from Marseille on the sea up to the River Rhone and to the Saone. That, we have read, is to be connected on up so that barges may go up to Paris from the Mediterranean. France does not look upon that as a useless expenditure. I can not conceive of anything that would be of more benefit to the commercial interests and thus to all the people of the United States and to the railroads of the country than would be, if possible, the thorough completion to-morrow of the proposed improvements of the rivers and streams of this country. It would promptly result in an enormous development of the commerce of the Nation and benefit transportation companies, including the railroads, in the greatest degree. [Applause.]

There may be some items in this bill that ought to be eliminated. That is very true. There will be in all bills. I hope that these will be stricken out. But some of the arguments that are made on this floor mean that the men who make them are for some reason opposed not especially to those items but to all river and harbor improvement. Their speeches mean that, and only that. Not the Mississippi, they say; that is a failure. Not the Ohio; that is a failure. Not the Missouri, they say; that is a failure. What, then, shall be improved? Not one of these great streams has ever been improved except in part. Commerce has never had opportunity to develop on them. What do you suppose Germany would do with the Mississippi if she possessed that magnificent river? What would France do with it? Look what they have done with streams of vastly less capacity. They have improved them for purposes of navigation to the last inch. France, less than half the size of Texas, has spent more than $600,000,000 on her rivers and harbors. Go to Germany and France and see everywhere through the country barges carrying freight to the factories, which get their heavy raw materials on these waterways, and see the railroads carrying away the finished products. [Applause.]

The CHAIRMAN. The time of the gentleman has again expired.

Mr. HOWARD. Mr. Chairman, I want to devote five minutes to this bill, first and paramount for the reason that I would like to know from some source what is in this bill that, in view of the conditions confronting this country, we as legislators representing the great American people ought to provide for as pure emergency provisions and nothing more; emergencies for the reason that if we fail to appropriate for them the Government in some degree would be the loser; emergencies that if we do appropriate for them they will bring to a more efficient condition the rivers or harbors that are necessary to meet the emergency.

I am going to support the amendment of the gentleman from New Jersey [Mr. PARKER], although I see the State of Georgia has $953,250 in this bill, all of which may be very beneficial and in one or two instances emergencies.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. HOWARD. I can not yield because I have only five minutes, and I do not want to ask for any more time. As I say, Georgia is interested to the extent of about $1,000,000 in this bill and no doubt I would favor those projects, because probably I would be biased in my opinion about the importance of my particular project if it was in my district. But are there not enough others here who are unbiased and unprejudiced, who can coolly and deliberately leave this to some disinterested tribunal that has the judgment to decide it; that has got honesty enough to decide it in the interest of the taxpayers of this country at this particular time? Now, should we be appropriating money here to improve rivers and harbors or to improve streams that a "highland" terrapin would die of thirst in simply because we have got a war on and these things are brought in here as emergencies? I recognize in this bill some old propositions that have been knocked out time and time again. Now, we want to do a little thinking. I want to do a little thinking for myself, and I do not propose to let another body

at the other end of this Capitol do it for me; and I want to do a little voting for my constituents in this body that is primarily responsible for legislation originating here. How are we going to segregate these absolutely foolish, preposterous, and wasteful appropriations from those that are absolutely needed?

It is becoming a disgusting spectacle to see bills drawn for rivers and harbors appropriations with a view of obtaining a majority of the votes of this House rather than from the real necessities of commerce.

Have you gentlemen forgotten that a few days ago we passed a bill for raising revenue to carry on this war that taxes every conceivable business interest in this country; not the normal or ordinary tax, but a most tremendous and burdensome tax? Now, already set by a special order next Monday, we have a bill coming in here for the control of every item of human food that goes to sustain our people in time of war, because it is said the time has arrived for our people to practice the utmost frugality in our homes to conserve the food resources of our Nation.

Mr. SMALL. Will the gentleman yield?

Mr. HOWARD. Yes.

Mr. SMALL. Has the gentleman read the majority report on the bill?

Mr. HOWARD. No, sir; I have not, and I will tell the gentleman why.

Mr. SMALL. I did not ask the gentleman why.

Mr. HOWARD. I would like to give him my reason.

Mr. SMALL. Has the gentleman done me the honor to read some remarks that I made on the bill?

Mr. HOWARD. No; I always listen to what the distinguished gentleman says, but I never read anything that he says, for it always sounds better than it reads. [Laughter.]

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. HOWARD. Mr. Chairman, I ask for two minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. SEARS. Will the gentleman yield?

Mr. HOWARD. Well, I did want to say something myself. [Laughter.]

Mr. SEARS. Did the gentleman vote for the last bill or against it?

Mr. HOWARD. Well, I have forgotten. I have done so many foolish things that I might have voted for it.

Mr. DUPRÉ. May I correct the gentleman?

Mr. HOWARD. Well, if I did vote against it, I used better judgment than I thought I did. Now I know how alert the industrious, the active, Congressman is. I have been here long enough to know how every man feels about his own projects, and I want to do what is right and best for the country at such a time. For instance, take the Hell Gate, New York, proposition. I have read some remarks about that. New York is one of the greatest harbors in the world, if not the greatest. Should the Hell Gate proposition suffer, should we fail to appropriate for it, when our naval officers and the Secretary of the Navy and the Secretary of War and other men are urging us to pass upon it favorably, because there is so much indiscreet and indiscriminate waste of money in this bill? Should we on that account put this burden on the American people that ought not to be put upon them?

Mr. DIES. Will the gentleman yield?

Mr. HOWARD. Yes.

Mr. DIES. Does the gentleman know of a single item in this bill that has not been approved of by the Secretary of War and the administration in the interest of war?

Mr. HOWARD. Oh, well, I know all about some of the creeks. I have fished in some of them, and if the Secretary of War recommended these projects as war emergency propositions, all I have to say is that some Member of this House has perpetrated a great joke upon him. He is at least a most credulous man. [Laughter and applause.]

Mr. TREADWAY. Mr. Chairman, I intend to vote for the amendment of the gentleman from New Jersey [Mr. PARKER]. It is not phrased in as strong language as I think it should be, but nevertheless if it meets with the approval of the majority of the Members of the House I, for one, will be glad to support it. I want particularly to address myself in the few minutes that I have to the remarks of the gentleman from California [Mr. OSBORNE]. I am very sorry that his enthusiasm for his particular section evidently has somewhat run away with his discretion. He has made a speech here which evidently he intends to elaborate in the RECORD, rather attacking the Republican Party in connection with the river and harbor legislation. I myself think that that is not exactly what he intended to do, because if there has been one claim made stronger than another about river and harbor legislation it was that it was nonpartisan. We have been informed, of course, that it was nonsectional, and therefore we should not select the Pacific coast for particular favors beyond the reach of any other section, so that I think the gentleman's enthusiasm for his location does, as I say, rather carry him further than he intended to go in tying up any direct political relation between this bill and the Republican Party and its vote last fall.

Mr. RANDALL. Will the gentleman yield?

Mr. TREADWAY. I prefer not to yield in the few minutes that I have. The gentleman takes exception to certain statements made in the minority report. I have conversed with him and with other gentlemen from California in reference to that statement. I am inclined to think that the sentence to which he refers as applied to Los Angeles is somewhat of a confusion and was not intended by the writer of that portion of the minority report to refer to the project carried in this bill. I am very glad indeed, as one of the signers of the minority report, to make this statement. I think it is due to the gentleman from California that I should make it.

Now, in reference to the other California item in the same line, referring to Richmond, I had the pleasure two years ago of visiting Richmond Harbor, and I can assure the House that it offers great opportunities and possibilities of development.

Mr. BATHRICK. Will the gentleman yield?

Mr. TREADWAY. I will yield to the gentleman.

Mr. BATHRICK. I want to ask the gentleman this—my question does not pertain to the amendment and the gentleman is not talking about the amendment. I do not want to make the point of order against the gentleman's speech, but the time is going——

Mr. TREADWAY. Let the gentleman make the point of order.

Mr. BATHRICK. I do not care to.

Mr. TREADWAY. Then why did the gentleman interrupt me?

Mr. BATHRICK. Well, Mr. Chairman, I will make the point of order that the gentleman is not talking to the amendment. I did not want to do it.

Mr. TREADWAY. I am answering the argument made by the gentleman from California [Mr. OSBORNE].

Mr. STAFFORD. Mr. Chairman, I think the gentleman was in order.

The CHAIRMAN. The gentleman from Massachusetts will proceed in order.

Mr. STAFFORD. I think he is in order.

Mr. TREADWAY. Mr. Chairman, when I was interrupted by the gentleman from Ohio without any apparent reason I was referring to the harbor at Richmond. I had made the explanation of the language in the minority report in reference to Los Angeles. Now, if it will meet with the approval of the gentleman from Ohio who interrupted me, I would like to continue sufficiently to make reference to Richmond Harbor. But if he thinks it is not in order, and desires to continue to raise the point of order, well and good.

Mr. BATHRICK. Go ahead; I am not raising the point.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. TREADWAY. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

Mr. SMALL. Mr. Chairman, I think the gentleman ought to have the two minutes.

Mr. TREADWAY. The gentleman from Ohio, I think, took up about two minutes of my time with his interruptions.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent to proceed for two minutes? Is there objection?

There was no objection.

Mr. TREADWAY. Mr. Chairman, Richmond is opposite or near San Francisco, and, as you all know, is a very important harbor upon the Pacific coast. It seems to me that if there is an overflow of commerce or harbor needs from San Francisco, it is right and proper that Richmond should be improved. The reference to any possible reclamation scheme, as referring to Richmond, in the minority report, comes about from the fact that certain real-estate interests in that neighborhood have been particularly anxious to boom the immediate vicinity where the improvement was expected to be made. I do not say, nor do I think, that the effort to secure an improvement in the harbor of Richmond was agitated or particularly pushed by the real-estate interests, but nevertheless there was a certain amount of correctness in the statement that a reclamation and a real-estate scheme might be considered as possible there.

The other gentleman from California [Mr. CURRY] in whose district this proposition is, certainly does not so consider it, and I am very glad, so far as I am concerned, to accept his judgment. Therefore, so far as the statement in the minority report

is concerned, so far as I had anything to do with signing it, I am glad at this time to have the opportunity of withdrawing any reference to either Richmond or to Los Angeles Harbor projects as they appear in the bill.

Mr. AUSTIN. Mr. Chairman, I am opposed to the amendment offered by the gentleman from New Jersey [Mr. PARKER]. We are constantly passing legislation here turning over our duties to the President of the United States, and when we cease doing that we are creating numerous commissions and unloading upon these commissions duties and responsibilities which belong to us as Members of Congress. The gentleman from Georgia [Mr. HOWARD] says we can depend upon the impartiality and honesty and the integrity and the efficiency of the President of the United States in handling this matter. Can we not depend upon our own honesty and our own efficiency and our own integrity and our own patriotism? [Applause.] If we can not, then we ought to frankly say so to our constituents and retire and give others an opportunity to make good.

Mr. PARKER of New Jersey. Mr. Chairman, will the gentleman yield?

Mr. AUSTIN. If I can get a little more time.

Mr. PARKER of New Jersey. Is not military necessity left by the Constitution to the President of the United States?

Mr. AUSTIN. Yes; but the duty of providing for improving the rivers and harbors of the country is an obligation and responsibility devolving upon Congress. We passed during the last and this session of Congress 12 or 14 of the general supply bills. We have provided for every Government activity except the rivers and harbors.

Mr. SMALL. Mr. Chairman, will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. SMALL. Does the gentleman from New Jersey, or anyone else, contend that transportation is not a military necessity, that the operation of the railroads is not necessary, and, therefore, that increased facilities for waterway transportation is not a military necessity?

Mr. AUSTIN. Mr. Chairman, I think we have unloaded enough upon the President of the United States. We ought to take up our burden and our share of the responsibilities and discharge them fully and faithfully under our oath and obligation. Here is a great country—the greatest in all the world—with a population of over 110,000,000 people, reaching from ocean to ocean and from the Lakes to the Gulf and to insular possessions in the Atlantic and Pacific Oceans, and we are asked to pause, stop short, suspend one of the greatest and most important activities of the Government. The improvement of all of our harbors upon the Atlantic and the Pacific coasts and upon the Gulf and on the Lakes, in Alaska, Porto Rico, the Hawaiian Islands, and the interior waterways of the country is absolutely to be stopped and paralyzed. Would we cease to construct railroads because we are engaged in a war? We have not stopped the construction of railroads in Alaska; manufacturing plants, roads, and bridges; we have not stopped the construction of reservoirs or reclamation work in the Western States.

Mr. SMALL. Nor the protection of the lower Mississippi River?

Mr. AUSTIN. Nor flood control; and we have not stopped appropriations to carry forward the construction and completion of public buildings throughout the United States. If we are going forward with every Government activity in every field of endeavor, what reason is there based on common sense, on intelligence, and patriotism which says we must stop Government activities in improving the harbors of every great city on the Atlantic and the Pacific and the Gulf and the Lakes?

Mr. BURNETT. Mr. Chairman, will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. BURNETT. Is it not a fact that the chairman of the Public Buildings Committee, the Senator from Virginia, has absolutely held up appropriations for public buildings on the Senate side and afterwards helped Virginia get the Jamestown graft?

Mr. AUSTIN. Mr. Chairman, we passed the sundry civil appropriation bill, which carried millions of dollars for the continuation of work upon public buildings, and so forth, in the United States.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. AUSTIN. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. AUSTIN. What greater subject can appeal to the American Congress for consideration and action than the improvement of transportation facilities?

Mr. HULBERT. Mr. Chairman, will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. HULBERT. Does the gentleman believe it can be successfully contended that the present river and harbor facilities are sufficient for present purposes?

Mr. AUSTIN. Mr. Chairman, I think not. Now, what Congress ought to do in this great hemisphere of ours—the richest and most powerful country in the world—is to pass an annual river and harbor appropriation bill carrying $50,000,000 and finish in our day and generation the completion of meritorious waterway propositions in the various States of the Union.

There is a great national river and harbor congress which meets in Washington every year, composed of the flower of our business men, who have no selfish purposes or aims to serve, who come at their own expense to the number of 3,000 from every business organization and important city of this country, and submit to Congress the vital and far-reaching importance of legislation upon this subject. Are we worthy of the trust and confidence of the American people if we sit here and are paralyzed in the discharge of a great responsibility? Why, my colleagues, let us measure up to the hour. Let us, in our representative capacity, prove to the American people that we recognize, duly appreciate, and will faithfully serve our country; that we recognize the importance of considering promptly, courageously, and patriotically all of these great propositions involving the growth, the development, prosperity, and happiness of all the American people.

Mr. LENROOT. Will the gentleman yield for just one question?

Mr. AUSTIN. Yes.

Mr. LENROOT. I would like to ask the gentleman if he is willing to vote for taxes to defray these expenditures?

Mr. AUSTIN. The gentleman from Wisconsin is an obstructionist when it comes to the development of rivers and harbors. He finds an excuse to get in the way of a great program affecting the industrial development of our country. Get above the "Wisconsin idea," my dear friend. [Applause.] Take on a national spirit and national position if you want to do something great and important for this great country of ours.

Now, there is my distinguished friend from Illinois [Mr. MADDEN], who is leading the fight against this bill, a gentleman of long training and experience in public life, well equipped and fitted not only for a seat here but for a promotion to the other end of the Capitol, from the great State of Illinois. [Applause.] The development and improvement of the lake front in Chicago did a wonderful thing for the great growth and development of that imperial city which he so well represents in part. What it has done for Chicago it is capable of doing and will do for other communities and other cities in the United States.

Now, I wish to appeal to my Republican friends in this House. The Republican Party has always stood for development, for the improvement of business, for the growth of our country. When it was intrusted with power for 50 years it was always great enough, big enough, and patriotic enough to pass river and harbor bills. To its many wonderful achievements look at the great waterway improvements carried on under the Republican administrations of the past. Let us do our part here to put this bill through. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. COOPER of Wisconsin. Mr. Chairman, I ask leave to extend and print in full these letters to which I made reference.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to include in the RECORD certain letters to which he refers. Is there objection? [After a pause.] The Chair hears none.

Mr. SMALL. Will the gentleman from Pennsylvania [Mr. MOORE] yield for a moment for the purpose of asking if we can not conclude the debate?

Mr. MOORE of Pennsylvania. I am ready to do it now.

Mr. SMALL. I do not mean now. But this discussion has proceeded for an hour, I think, and perhaps more, and many gentlemen have spoken——

Mr. PARKER of New Jersey. It is true that this discussion has gone on for an hour, but mighty little of it has been devoted to the question brought up by this amendment.

Mr. SMALL. Mr. Chairman, I ask unanimous consent that debate on this amendment close in 20 minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that debate on this amendment close in 20 minutes. Is there objection?

Mr. COX. Mr. Chairman, reserving the right to object——

Mr. GILLETT. Reserving the right to object, I think the gentleman will concede that so far the time has been largely occupied by those on his side of the question. There are some of us here who have been waiting the opportunity to discuss the

exact amendment before us and have not had an opportunity to do so. I do not think it is fair now to say that we shall be cut off by limiting the debate to 20 minutes, which will be only 10 minutes on a side. Your side has occupied as much as 20 minutes more than this side.

Mr. SMALL. Mr. Chairman, possibly some of the gentlemen who wish time desire to discuss items. They can do that later in the bill.

Mr. GILLETT. I simply wish to discuss this amendment.

The CHAIRMAN. What is the request of the gentleman from North Carolina [Mr. SMALL]?

Mr. SMALL. I ask unanimous consent that general debate close in 45 minutes.

Mr. COX. Reserving the right to object——

Mr. MOORE of Pennsylvania. Mr. Chairman, reserving the right to object, and I expect to object unless the gentleman will listen to me, I do not propose that the gentleman shall get unanimous consent to agree that everybody in favor of this amendment shall speak to the prejudice of those who oppose it. There must be a fair and equal division of time.

Mr. GALLAGHER. They have had 20 or 25 minutes on the other side.

Mr. MOORE of Pennsylvania. All those who have asked for time are going to support the amendment and are in opposition to the bill.

Mr. SMALL. We wish to be fair. I withdraw the request temporarily, but I may make a point of order if gentlemen do not confine themselves to the amendment. Some of us may have to object to gentlemen asking more than five minutes.

Mr. MADDEN. I think we ought to confine this debate to the amendment.

Mr. MOORE of Pennsylvania. Mr. Chairman, I hope to confine my remarks to the amendment that has been offered by the gentleman from New Jersey [Mr. PARKER]. He proposes what has become more or less popular recently, that Congress shall abdicate its powers and turn over its discretion, and its common sense, and the business for which it was elected, to a commission. On general principles I am opposed to that proposition, but that is exactly what the gentleman from New Jersey proposes. He has so much confidence in the President's ability to deal with the matter of the Suwanee River that he wants this whole matter turned over to the President, who, of course, will delegate his power to somebody down along the line. We should not agree that that shall be done.

I believe, with the President and with the Secretary of War, that this is a war measure, and is as important a war measure, relatively, as any other discussed by this body. I take occasion now to differ with some of my Republican friends as to their attitude on this bill. In my judgment opposition to it will not make political capital in any State in this Union. Republicans are as much interested in this bill as Democrats are interested in it. As much, if not more, of the total appropriations go to the northern States as to the southern, and it can not be contended that this bill will bring special favor to any one who opposes it.

The gentleman from Georgia [Mr. HOWARD] has made one of those clever, but rather surprising speeches of his in favor of the Parker amendment. He wants the President or some commission under the President, to have an exercise of power that Congress ought to reserve to itself. He is willing that the lump-sum incubus that has been thrust upon the House of Representatives on several occasions by another body, shall again be a barnacle on our congressional river and harbor ship. I am not in favor of so abdicating the power of the House, as I am not in favor of abdicating it generally.

The gentleman from Georgia wants to know wherein this is a war measure. Well, if he has been conferring—and I take it from some of his speeches that he has—with the Council of National Defense he will understand that there is a great mobilization scheme at work in this country now, under the direction of the President and by authority of Congress, and that we are proposing to group all of the raw materials and all of the finished products for purposes of war. We are proposing to seize the railroads and use them for war purposes. We are proposing to seize the raw materials and appoint food dictators in order to direct the distribution of our products. But if the gentleman knows what the Council of National Defense knows, he knows that the railroads are less competent to carry the business of the country to-day than they were in 1907, when James J. Hill said it would take $5,500,000,000 of new capital to put the railroads of the country then in a condition to do the business of this country.

There has been no material increase of railroad mileage since, but now, when they can be of greater service, it is proposed to shut up the waterways; to treat them as if they were a grab or pork-barrel proposition from which, perchance, we should run because some metropolitan newspapers comment adversely upon a river and harbor bill. The Council of National Defense has constituted an advisory committee on waterways to recommend relief for the railroads, and that committee is now scouring the country for information, and to secure barges and inland carriers to relieve the railroads of their present congestion, a movement that is essential to get the supplies from the inland country to the coast line for purposes of war.

I believe we should have an annual river and harbor bill. I do not believe Congress should permit waste to exist, and it must exist and will exist if we shut off appropriations for the maintenance of streams. You can no more keep a stream in order by stopping appropriations and neglecting it than you can keep in order your office in the House Office Building, over yonder, by neglecting to have the charwoman come in to sweep out the dirt and carry away the waste paper. You must spend money to keep your mill in order, just as the Government must spend money to keep in order its manifold activities, and just as every railroad must necessarily spend money to keep its equipment in shape.

The trouble is that somebody seems to have organized a raid on Congress just now in the interest of one kind of transportation. Somebody wants to stop the progress that has been made in attaining cheap transportation by water. But, gentlemen, we can not afford to do that. I would not be able to retain my self-respect if I were to stand here and assent to a proposition that the Delaware River should be set back. It is too important to the Nation just now to be set back. I assume other gentlemen feel the same way about their streams.

Now, if it were a southern stream we were discussing, some sluggish stream with overhanging boughs and obstructed channel, that could be of service in carrying food to the market, why should so much stress be laid upon it? Would it not be better to help that stream, open up the territory, and let the products get to market rather than let them go to waste? Have you been down in the South and observed the little streams leading into the larger streams, and the larger streams leading into the ports where the great ships are moored, ready to receive their freight? If so, you have seen the little sloop coming along with a one-man crop, the crop that could not obtain railroad transportation, the crop for which no other carriage could be secured. That is the small producer, the poor man coming to market, because perchance the Government had expended a few thousand dollars in making navigable those means of approach by which men who have no railroad facilities can get to market. I do not believe with the gentleman from Georgia that this is the time to stop the river and harbor improvements of this country. They are needed for war as much as for peace.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. COX. Mr. Chairman and gentlemen, I have announced on the floor time and time again that I stand ready to support President Wilson in any war-emergency legislation that he wants in order successfully to carry this war to a complete and speedy termination. I have heard a great many complaints, and, among others, the gentleman from Pennsylvania [Mr. MOORE], who has just spoken on this question, has criticized the President for trying to get the necessary power to fight this war. Why, the trouble in Russia to-day is that they have no government, no power, no centralized place where they can put power to fight this war. Our country can not win this war unless we centralize power in the hands of the President of the United States. Besides, under the Constitution it is his duty to fight and maintain this war. He is the Commander in Chief of the Army and the Navy.

Mr. CALDWELL. Mr. Chairman, will the gentleman yield?

Mr. COX. I can not yield now. This river and harbor bill is sought to be maintained by its friends as being a war measure. I have read it from lid to lid. I have read the report of the majority of the committee and the views of the minority members of the committee, and out of this vast appropriation of $26,000,000 I am unable to pick out more than a very small proportion that in the remotest degree can be regarded as war measures. To the men who are willing to give President Wilson the power to fight this war I say that the Parker amendment is the only thing in this bill that will ever give him the power to do it. [Applause.] Therefore I am for it with all my soul. This amendment contains two distinct propositions. First, it provides that no money shall be expended except for the maintenance of projects already in process of construction, and, second, that no new improvement shall be entered upon unless the President determines it to be a matter of military necessity. You have given the President authority over food control. You

are going to give him greater power over food control when the bill passes this House next week. Why are you doing it? You are doing it as a military necessity, to enable him to fight this war. This is the only amendment that is in the remotest degree connected with this bill which puts it up to the President of the United States. Are you willing to trust him? Are you willing to say to President Wilson, on whose shoulders rest the responsibility of fighting this war to victory or defeat, that he can pick out Hell Gate or some point in Massachusetts or on the Atlantic seaboard, and, if he thinks it necessary, then he may spend the money on them? I am willing to trust him. I am willing to trust the President of the United States to say that this is a war measure pure and simple, and to turn this money over to him and let him spend it. Of all times, in my opinion, when a general river and harbor bill should not come in, that time is now. I am not so much concerned about the amount of money expended here, but we need badly the technically trained, highly educated men in this country for other purposes than the dredging of Raccoon Creek in New Jersey or picking the water hyacinths out of rivers in Florida.

France is calling for our highly trained engineers to-day. Already a regiment of about 1,000 engineers has gone to France. We have got to rebuild the railroads of France, not only for the French armies, but Gen. Joffre plainly told us that we had to build our own railroad lines there with our own steel and equip them with our own locomotive engines. We have got to rehabilitate the railroads of Russia. We have got to rebuild the railroads from Port Arthur to Petrograd and from Petrograd to the firing line in the trenches, and there is where we need our highly trained, technical men, instead of fooling around here dredging some little river, creek, or harbor. Col. Newcomer has been quoted here, a great man, no doubt, educated at a cost to our Nation of not a penny less than $50,000. I imagine that Col. Newcomer and all men occupying similar positions are smarting under the collar at being held down to a little river or harbor work instead of being allowed to serve their country in the work for which they were educated. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. COX. I would like two minutes more.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent that his time be extended two minutes. Is there objection?

There was no objection.

Mr. COX. Is this river and harbor bill a war measure? There are 71 new surveys in here——

Mr. MADDEN. Seventy-five.

Mr. COX. Seventy-five. How is that going to be a war measure? Here are a number of little creeks that are to be surveyed. There is an appropriation of $200,000 carried in this bill for that purpose, and then as much more as Congress may see fit thereafter to appropriate to carry forward those projects. Is that a war-necessity measure?

This bill is put forward first as a military necessity and then it is supported as an economic necessity; but this Parker amendment brings us to the issue squarely confronting us. It puts it squarely up to the President of the United States, for him and for him alone to determine when and where a project shall be improved as a military necessity. I propounded the question a moment ago, and I repeat again, Are you willing to trust him? I am. [Applause.]

The CHAIRMAN. The time of the gentleman has again expired.

Mr. GILLETT. Mr. Chairman, I sympathize with the desire of the gentleman from North Carolina [Mr. SMALL] to hasten the consideration of this bill, and not to have the same arguments reiterated, and I feel almost like apologizing for taking any time, because the gentleman who has preceded me [Mr. Cox] has pretty much stated my view. I will take just a moment. I favor heartily this amendment. I can not see how the gentleman from North Carolina, in view of the attitude he has taken, can oppose it. It simply provides that the President shall decide what portion of this bill is necessary for war measures, and then leaves it to his decision to have those projects carried forward.

Mr. SMALL. Will the gentleman pardon an interruption?

Mr. GILLETT. Certainly.

Mr. SMALL. The gentleman asked a question.

Mr. GILLETT. I do not know what I did, but I yield to the gentleman.

Mr. SMALL. The gentleman asks why the chairman of the committee is opposed to this amendment.

Mr. GILLETT. I said I could not see why he was.

Mr. SMALL. May I answer why I am opposed to it?

Mr. GILLETT. Certainly.

Mr. SMALL. He says that it ought to be left to the President to determine what appropriation or authorization in this line shall be expended or executed. If it were left to the President, in accordance with the amendment of the gentleman from New Jersey [Mr. PARKER], the President would consult the Secretary of War, and through him the Chief of Engineers. The President has already formulated a plan imposing certain limitations upon this bill, and in obedience to the request of the President the Secretary of War and the Chief of Engineers have made recommendations, and there is no item in this bill which the Secretary of War and the Chief of Engineers have not already recommended.

Mr. GILLETT. Then I will ask the question, Why do you object to it?

Mr. SMALL. I will answer that, too. I say that the amendment of the gentleman from New Jersey would be mere surplusage because I prefer that this Congress should act on the recommendations of the Secretary of War and the Chief of Engineers, that this House shall specifically provide the appropriations rather than leaving it to the will of the Secretary of War and the Chief of Engineers. I think it is unnecessary to surrender the functions of Congress.

Mr. GILLETT. Mr. Chairman, if the gentleman is perfectly sincere in his statement that it would amount to the same thing, then, of course, I can not see why he should have any objection to it, except a mere formal and perfunctory one. It makes me suspect that they really fear that under the Parker amendment many of their schemes would not be carried out, and while the President may have generally indorsed this bill if the responsibility were placed on him they fear he would eliminate many of the items. It seems to me that it is inconsistent for that side of the House, considering the program they have marked out for this session, to oppose such an amendment. They have told us that the only legislation to come before this session was war legislation. The gentleman from North Carolina [Mr. SMALL], in bringing in this bill, advocated it as a war measure. Now, when the proposition is brought in limiting this to specifically war legislation he objects. I understood a gentleman arguing on his side of the question to state that the War Department said that there was only 1 per cent in this bill economically indefensible. Now, if there is 1 per cent economically indefensible, there must be a good deal more than that indefensible purely as a war emergency.

Mr. SMALL. The gentleman from Massachusetts misunderstood the gentleman from Wisconsin. He was referring to a prior bill.

Mr. GILLETT. I may have misunderstood him. I do not believe from my study of the bill that every item in here is defensible, and still less do I believe that it is defensible for purely war purposes.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. GILLETT. I ask for one minute more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GILLETT. Mr. Chairman, I want to say that I agree with a part of what the gentleman from Pennsylvania [Mr. MOORE] has said. I do not like to put any more upon the President's shoulders. I probably have a different feeling toward him than does the gentleman from North Carolina. I trust him less, and I do not believe his decision on these questions would be governed by any partial feeling toward projects that I might be interested in. But this provision leaving the determination to the President was intended to relieve this proposition of criticism and appease that side of the House. I do not like to give the power to the President; I do not like him to decide for us; but I object to this bill as it is, and its scope would be limited and its viciousness lessened if any tribunal could cut from it everything not related to the war, and I am even willing to trust that to the President. [Applause.]

Mr. DEMPSEY. Mr. Chairman, I have no greater respect for any Member of the House than I have for the gentleman from Massachusetts who has just preceded me. I may add to that by saying that I have no greater respect for any man in or out of the House, or any man in the country, than for the learned and able gentleman who has just preceded me, but I want to call the attention of the House to how our views change. I want to direct the attention of the House to how we look at things differently within a few days.

I listened with the greatest interest the other day to the remarks of the gentleman from Massachusetts in which he described the never-ending struggle between the executive and the legislative branches of the Government. I want to read what he said on that occasion as a commentary on the position which he takes here. He said on that occasion this:

I recognize the head of the department may often feel, and he may sometimes be justified in feeling, that if he were given a lump sum that he could expend where he pleased, and give the advanced salaries that he pleased, that he could get better results from his administration than being restricted as he is by the limitations which Congress puts upon him.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. DEMPSEY. Yes.

Mr. MOORE of Pennsylvania. Was this the gentleman from Massachusetts [Mr. GILLETT], a member of the Committee on Appropriations?

Mr. DEMPSEY. Yes; it was when a bill was before the House that came from the Committee on Appropriations.

Mr. MOORE of Pennsylvania. And the gentleman was opposing the presidential control?

Mr. GILLETT. Will the gentleman permit me to make this suggestion. There is no inconsistency because here this amendment does not give to the President any power outside of this bill. His powers are limited by the bill. He can cut down this bill, and that is all the power that this amendment gives him.

Mr. DEMPSEY. I think this amendment and what the gentleman advocates is in direct conflict with his advocacy the other day.

Now I want to read what he said the other day, and you all know what he said here to-day. All we can do is to judge by the two occasions—by what he said to-day and what he said before. I propose to read what he said before, and then I propose to comment and compare that with what he said to-day. He said:

I presume very often that would be true. I think every member of any appropriating committee often feels as he sits in the committee and hears the recommendations of the departments and knows that he can not really probe to the root of the matter, and that it is very much a matter of guessing and trusting to the recommendations of the department—as I say, I think every member of any appropriating committee often feels his helplessness and feels that there is a just argument on the other side. But, on the other hand, we all must remember that the responsibility of Congress and the restrictions of Congress on the power of expenditure have been recognized as one of the fundamental necessities of a free government.

[Applause.]

The control of the purse in England for centuries has been the real contest between the Parliament and the King, and it has been the success of Parliament in preserving its control which has established free government there. And I suspect that in every constitutional nation representatives of the people can not afford to abandon and yield to the Executive the control of the purse. And I thought it might be, if not interesting, at least useful, to the House, especially to the new Members, for me in a few moments to briefly review what Congress has done in the last 10 years along this line and just what restrictions we have put upon the Executive.

[Applause.]

I will only go back 10 years and refer to a few of the important pieces of legislation which this House has enacted which have limited the Executive in control of appropriations. And I think every student of our National Government in the last few years will admit that in every field except this one the Executive has been gaining power, and has been gaining it at the expense of the Legislature. It may be progress, but there is only one line that I know of where Congress has increased its power, and that is in this line of control over the expenditures. And it has done this because there has been a constant reaching out of the Executive to increase its power over appropriations, and Congress, seeing and feeling in each case some specific grievance, has enacted legislation to curb that specific act.

[Applause.]

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. DEMPSEY. I ask for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. DEMPSEY. Now, the proposition here is precisely the proposition as I take it as a lawyer, as I take it as an ordinary observer, as I take it as a Member of this House; it is precisely the proposition against which the gentleman from Massachusetts animadverted the other day. I believe that you do increase the serious danger in each instance when you place a lump sum in the unguided, unrestricted, ungoverned control of the Executive, and that is precisely what this amendment proposes, nothing more and nothing less. We can not trust ourselves, we can not go through the bill and judge and scan the items in the light of the advice of the executive department or the advice of the engineers. We can not trust our judgment with all that. We must, on the other hand, hand over a lump sum to the Executive because we can not trust ourselves and because we can trust him. Why, gentlemen, Congress can not afford, as the learned gentleman from Massachusetts [Mr. GILLETT] pointed out, to abrogate its functions in that way; it can not afford, after a long fight covering many years—and he reviewed 10 years of such legislation—after winning in this one domain, and losing, as he well pointed out in every other field, now, three or four days afterwards, when a different committee, not the Committee on Appropriations, comes before the House, to make an abrogation and abdication of its functions. [Applause.]

Mr. BARKLEY. Mr. Chairman, will the gentleman yield?

Mr. DEMPSEY. Yes.

Mr. BARKLEY. Will not the President, if this amendment be adopted, be compelled to accept the very same advice about these matters that we are compelled to accept now in passing upon them?

Mr. DEMPSEY. I do not know.

Mr. BARKLEY. And is he any better qualified, with the multiplicity of duties he has, to devote his time to the picking out of different harbors and rivers that ought to be improved than we are, with that same advice at our disposal?

Mr. DEMPSEY. Mr. Chairman, I assume that he would follow, if he is permitted to follow, the same advice which he has followed in recommending to the Secretary of War the passage of this bill; but I am not a good enough lawyer, nor do I believe there is one among my colleagues here who is a good enough lawyer, to tell precisely what this does mean; nor do I believe that anyone will know until it is construed by a court, not alone of original jurisdiction, but one having ultimate appellate jurisdiction. I thank the committee.

Mr. MADDEN. Mr. Chairman, will the gentleman yield to me for a question?

Mr. DEMPSEY. I have finished.

Mr. CALDWELL. Mr. Chairman, I am opposed to this amendment, and I am opposed to it because I do not believe that we have any right to saddle off our responsibilities upon the President. We have passed legislation here that will arm 2,000,000 men, and we expect to send them, and many hundreds of thousands more, to do battle in Europe. It has been demonstrated that 2,000,000 soldiers require 27,000,000 workers at home. Every man in America, before this war is over, must be doing his share. There is no time when a man should begin to do his share in this war better than now.

The President of the United States has honestly come to us and asked for power where he wanted it, and where he has conceived he needed it, but where he has not wanted it, where he has not seen that he has needed the power, he has left us to do our share, and I believe it is our duty to do our share now. Therefore, Mr. Chairman, I propose to vote against this amendment, and I hope that this additional burden will not be placed upon the Commander in Chief of our Army, who already has upon his shoulders a greater burden than was ever borne by a human since the beginning of time. [Applause.]

Mr. GILLETT. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GILLETT. Mr. Chairman, I should not intrude upon the committee again, but we are all of us a little sensitive about charges of inconsistency, and the remarks of my friend from New York [Mr. DEMPSEY] I think should be answered immediately. I am glad that he approves of what I said the other day, and I hold those opinions to-day just as strongly as I did then. I think a little inspection will show that it is not at all inconsistent with what I said to-day. We do not give the President by this amendment any lump sums to expend. We do not give him any increased power of expenditure. This amendment simply says that after Congress has appropriated specifically, as it does in this bill, and has provided just what moneys can be expended and where, then the President may decrease these expenditures by deciding some of them are not of immediate military necessity.

Mr. CALDWELL. Mr. Chairman, will the gentleman yield?

Mr. GILLETT. Yes.

Mr. CALDWELL. The men who will have the administration of carrying out this work are Army officers.

Mr. GILLETT. Of course they are.

Mr. CALDWELL. And the President is Commander in Chief of the Army.

Mr. GILLETT. Yes.

Mr. CALDWELL. Then can he not stop any work that is undertaken by those men?

Mr. GILLETT. I suppose the proposition means that he would leave it to the military men to decide.

Mr. CALDWELL. Without this legislation can he not stop it when he sees that it interferes with military operations?

Mr. GILLETT. Oh, he can; but nobody pretends that any of it interferes with military operations, only some of it has nothing to do with military operations. With the good will existing between the legislative and the executive branches, it is probable that he would allow whatever the Legislature provided. This simply provides a limitation upon the appropriations which we make. It specifies them and then allows the President to expend what is needed as a military necessity. And I believe with that specific

responsibility on him, under the advice of the engineer officers, he would forbid work on many of these items.

Mr. MADDEN. Mr. Chairman, I am decidedly in favor of granting the President the power to say which of the items in this bill, when it is enacted into law, shall be considered of sufficient importance to be classed as a war-emergency measure. That does not give the President any additional power. It simply limits the possibility of extravagant expenditure of public money. The gentleman from North Carolina [Mr. SMALL] a short time ago, when asked why he would not be willing to grant this power to the President of the United States, if I understood him correctly, said that he would prefer to have Congress exercise its functions and make the appropriations and designate the improvements that are to be made. I do not use his language and do not pretend to, but I try to state the sense of what he said.

Now, if that statement of his means what it says, I am at a loss to understand why the committee of which he is the distinguished chairman came into the House with the recommendation that a great many items in the bill be grouped and the power be delegated to the Secretary of War to say upon which item the money should be expended. If his statement to the effect that Congress ought to exercise its right has any force, then his recommendation as chairman of the committee to the effect that the Secretary of War shall exercise his right as to which item in a certain group shall be carried forward and money expended upon it is inconsistent with the position he takes upon the floor. If there ever was a time when the Congress of the United States should extend power to somebody that will prevent extravagant expenditure of money, now is the time. If there ever was a time when we ought to lighten the burden of taxation upon the American people, now is the time. And if there ever was a time when we ought to utilize the engineering force of the Army toward the successful conduct of the war, instead of having their time taken up on backwoods creeks that have no relation whatever either to navigation or to war, now is the time. If there ever was a time when the Congress of the United States ought to give some evidence of its interest in the welfare of the American people, this is the time. If there ever was a time when we should go on record to prove our patriotism and our desire for victory to the flag in the cause upon which we have entered and in connection with which we have already obligated the people of America to the expenditure of $12,000,000,000 and to which cause we have called 2,000,000 men, this is the time. If there ever was a time when we ought without any question to cease logrolling and enacting pork-barrel legislation, this is the time and here is the place. And we ought, by all means, to adopt the amendment offered by the gentleman from New Jersey [Mr. PARKER], which will give the power to the President of the United States to limit the amount of expenditure to those projects which can be proved beyond a doubt to be emergency war measures. [Applause.]

The CHAIRMAN. The gentleman from South Carolina [Mr. BYRNES] is recognized.

Mr. BYRNES of South Carolina. Mr. Chairman, I desire to say only a few words. I am going to support this amendment of the gentleman from New Jersey [Mr. PARKER]. I do not see how any man on this side of the House can afford to vote against it. We went into a Democratic caucus. It was sought to add to the program for this special session of Congress, called to consider only war measures, a river and harbor bill which in form would be substantially the same as the bill passed at the last session of Congress. That was the language of the amendment to the program offered by the gentleman from North Carolina. The majority of the Democrats in that caucus defeated that amendment, yet we find this bill brought into this House later on, in violation of the action of the caucus. It is argued it is not a violation, because it is not exactly the same bill, but no man can successfully contend that it is not "substantially" the same as the bill that was passed by the House at the last session of the Congress.

But another argument is urged in its behalf. It is urged now that it should be passed because the Secretary of War has written a letter laying down certain principles which should be applied in framing this bill.

Mr. SEARS. Will the gentleman yield for a question?

Mr. BYRNES of South Carolina. No; I have but five minutes.

Mr. SEARS. Did you vote for the bill the last time?

Mr. BYRNES of South Carolina. I have voted against every river and harbor bill for the last four years, but never before have I raised my voice in protest. But you have exceeded the speed limit, and I now wish to protest against it, in time of war. [Applause.] I not only protest against it, but the people of America will protest against it, and they will be justified, inasmuch as the gentleman and every other man on this side of the House recently voted to tax them $1,800,000,000, and they now see that after levying these extraordinary taxes you are going to spend $26,900,000 fixing up creeks and rivers all over the country.

I want to say something to the chairman of this committee, for whom I have great respect. In reply to a question asked of him by some gentleman in this House as to why he was opposed to this amendment, he stated he believed it was mere surplusage. He urges you to vote for this bill for one reason only, and that is that the Secretary of War has sent a letter down here indorsing the passage of a bill in accordance with the principles set forth by him, namely, for military or naval purposes. Well, the amendment of the gentleman from New Jersey [Mr. PARKER] does nothing but limit the expenditure to such projects as shall be approved by the President for military and naval purposes. If it is only surplusage, why not adopt it and pass the bill? Why not trust the President, if you believe the items are meritorious? I will tell you why the chairman of this committee would not agree to that. It was for this reason: As it stands now there is a division of responsibility. The Secretary of War set forth certain principles which should govern the framing of the bill, and the Secretary will say, "I did not authorize the various items in this bill. I laid down principles, and if the bill was not framed in accordance with those principles it is the fault of Congress and not of the department." And Congress, on the other side, says, "This bill is brought to the House and is put through solely because the Secretary of War said that he was in favor of a bill that would provide for military and naval purposes." Between the two, between the Congress and the Secretary of War, items will get into this bill, and inevitably will get into the bill, which should not be included in it. There are meritorious projects which can well be postponed during the period of the war, while the engineers are needed at the front, and the money is needed to support them there.

Mr. SMALL. What authority has the gentleman for stating that the Secretary of War does not approve every item in this bill?

Mr. BYRNES of South Carolina. I never said that. The gentleman certainly did not understand me. I said the Secretary of War wrote a letter which you put in the RECORD, setting forth the principles upon which this bill should be framed.

Mr. SMALL. And stating he approved the bill as reported to the House.

Mr. BYRNES of South Carolina. If he did, did he investigate every one of these items?

Mr. SMALL. Either he or the Chief of Engineers did.

Mr. BYRNES of South Carolina. Do you know that the Secretary of War did?

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. BYRNES of South Carolina. Mr. Chairman, I ask that my time be extended five minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent to continue for five minutes.

Mr. SMALL. Mr. Chairman, I must begin to object to extensions of time.

Mr. BURNETT. Let the gentleman have time to answer your question.

Mr. BYRNES of South Carolina. The gentleman interrupted me and took some of my time.

Mr. SMALL. Can the gentleman get along with less than five minutes?

Mr. MADDEN. The gentleman from South Carolina does not speak frequently, but he speaks well when he does speak.

Mr. BYRNES of South Carolina. Well, I will not press my request.

Mr. SMALL. I withdraw the objection, Mr. Chairman.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] is recognized.

Mr. STAFFORD. Mr. Chairman, as stated by the gentleman from South Carolina [Mr. BYRNES], who has just preceded me, this bill is substantially the river and harbor bill of the last session of Congress that failed of passage because of its being blocked in the Senate. That bill provided for 81 new projects, which, according to the report of the majority on this bill, would require $47,000,000 to complete. This bill, it is true, provides for only 34 new projects, but the report shows that those projects will require $44,000,000 to complete, or a difference of only $3,000,000 between the cost of the projects which are carried in this bill and those which were carried in last year's bill.

But since then something has happened which causes the country—and which should cause every Representative here, represent-

ing the people—to hesitate in favoring extravagant appropriations for the development of unnecessary waterways. Seventy-five surveys are provided for in this bill, which will require the attention of thousands of Government officials who will be needed later elsewhere, if we are to cope with the great task before us in coordinating all the resources of this country. If this bill were but to drop $27,000.000 into some creeks and rivers or harbors in this country, there would not be so much objection to it from my standpoint as there is when you are going to utilize the services of these thousands of men in the survey of creeks and rivers that will not add anything to the commerce of the country.

The pending amendment provides for the maintenance and repair of all necessary projects, and then authorizes the President to spend the money carried in this bill for new projects where he deems a military necessity exists. The committee acknowledges that there are items upon items in the bill that can not be justified on the ground of military necessity. They would utilize the personnel of the Government in developing projects which can not add to the tonnage of the country. What is more necessary than aught else is that the present available rivers and harbors carrying the traffic of the country should have the means of conveyance rather than that we should expend money on waterways which will not add any increase to the tonnage of the country.

Why, it would be far better to have the country spend this $27,000,000 in building barges and ships that will add to the tonnage rather than spend the money and extend its expenditure over three or four years, as admitted by the gentlemen who are advocates of this bill, in needless improvements that will not add to the present tonnage.

Mr. HULBERT. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. I can not yield in five minutes. Take the case of the gentleman from New York [Mr. HULBERT], who advocates the improvement of the Hudson River, with less than the normal tonnage coming into New York Harbor, he claims there is need for an additional channel there when the normal tonnage is lessened by reason of the war——

Mr. HULBERT. It is nothing of the kind.

Mr. STAFFORD. There can be no pressing commercial necessity for an additional channel under these war conditions.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired. The gentleman from Illinois [Mr. MCKENZIE] is recognized.

Mr. SMALL. Mr. Chairman, can we not now agree as to the conclusion of the debate on this amendment? There are four gentlemen besides the chairman of the committee who desire to speak.

Mr. PARKER of New Jersey. I ask leave for two minutes to speak in reply.

Mr. SMALL. I ask unanimous consent that the debate on this proposition conclude in 25 minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that the debate on the pending amendment close in 25 minutes. Is there objection?

Mr. GALLAGHER. Reserving the right to object, Mr. Chairman, does that give the required time?

Mr. SMALL. That includes the gentleman from Illinois [Mr. MCKENZIE], and the other gentleman from Illinois [Mr. GALLAGHER], and the gentleman from New Jersey [Mr. PARKER], and the gentleman from Michigan [Mr. HAMILTON]. Mr. Chairman, I ask that the debate on this amendment close in 30 minutes.

Mr. FESS. Reserving the right to object, the gentleman from Ohio wants time, too.

Mr. SMALL. The gentleman from Mississippi [Mr. HUMPHREYS] is another who has asked for time.

Mr. PARKER of New Jersey. Let us say that the debate close at 3 o'clock.

Mr. SMALL. I will ask unanimous consent, Mr. Chairman, that all debate close at 3 o'clock.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that the debate on this amendment and all amendments thereto close at 3 o'clock. Is there objection?

Mr. FESS. Reserving the right to object, I would like to know if I am included in that?

Mr. SMALL. You are.

Mr. GALLAGHER. Am I included?

Mr SMALL. Yes.

Mr. REAVIS. Reserving the right to object, Mr. Chairman, I did not hear the request of the gentleman from Ohio. Is it part of the gentleman's request that those who sought recognition shall be recognized?

Mr. SMALL. Yes. That was my purpose.

Mr. REAVIS. Is that the understanding of the Chair, that those to whom time was allotted will be recognized in those 40 minutes?

The CHAIRMAN. That is the understanding of the Chair if the time will go around.

Mr. MADDEN. I suggest to the gentleman from North Carolina that it would be more agreeable to say 40 minutes than to say that the debate shall close at 3 o'clock.

The CHAIRMAN. It is substantially the same thing.

Mr. MADDEN. There may be some interruptions and that would make it necessary to extend the time.

The CHAIRMAN. Is there objection to the request?

There was no objection.

The CHAIRMAN. The gentleman from Illinois [Mr. MCKENZIE] is recognized.

Mr. MCKENZIE. Mr. Chairman and gentlemen of the committee, I have no doubt that there are a great many meritorious projects in this bill. I am sure there are projects for the improvement of some of the great harbors of our country which are meritorious, but I regret exceedingly that the chairman of the committee has felt that it was necessary to bring the matter up at this special session of Congress. To my mind the American people will resent, as one gentleman has said, the attempt at this time to pass legislation of this character.

Now, if there are certain projects in this bill—and I assume that there are—that would be useful so far as the military or naval welfare of our country is concerned, the President of the United States could come to Congress and ask us to enact legislation taking care of those particular projects. But when we undertake to say that the making of surveys of 75 little projects scattered over this country which we have not, during the 300 years of settlement of this country, discovered to be navigable, it is to my mind absurd, and it makes a laughing-stock out of the bill to dub it a "war measure."

Another thing, so far as I am personally concerned, I expect to vote against the bill, and instead of the amendment of the gentleman from New Jersey [Mr. PARKER] an amendment ought to be offered to strike out the enacting clause of the bill and say to the people of the country that we are not going to pass legislation of this character at the session that was called simply to take care of war measures.

But to those of you who are not willing to vote for the amendment offered by the gentleman from New Jersey [Mr. PARKER] I want to say that the President of the United States has the power now to defeat every project in this bill, and in my judgment he will do it. He can call in every engineer who is now engaged in river and harbor work and put them all where they belong, at the task of helping to train the armies of the United States and doing something to carry on this war rather than be spending their time, as one gentleman said here, surveying some little backwoods creek. And if the President of the United States is the man I think he is he will see to it that no Army engineer will be spending the long summer months of 1917 beneath the shade of some sheltering tree on the banks of one of these little streams of our country, but he will be called to the front, where he belongs, to do something for his country in this time of war; and I hope that the amendment of the gentleman from New Jersey [Mr. PARKER] will be adopted, to show that at least the Congress of the United States is willing to leave this war matter in the hands of the President, where it properly belongs and where he now has the power over every Army officer engaged in river and harbor work. What he ought to do is to call them in and set them to work in the pressing business of our country in the conduct of this war.

Mr. COX. Judging the future by the past, does not the gentleman think that if this bill passes, carrying $26,000,000 as it does, by the time it gets through the Senate and gets back here it will carry at least $40,000,000?

Mr. MCKENZIE. Yes; and as far as the war is concerned the war will be over and peace will be reigning in our country before some of these appropriations will be used on the projects in this bill. [Applause.]

Mr. JAMES. Mr. Chairman, if the advocates of this bill are sincere in calling it a war measure, and if they are sincere in the statement that the Secretary of War and the President are back of the bill, they will have no objection to the amendment of the gentleman from New Jersey [Mr. PARKER]. [Applause.] The people of the United States are not as much interested in "pork" as they are in the price of the necessaries of life, and I am sorry that the advocates of this bill would not grant permission the other day for the food-control bill to be taken up to-day, because the food-control bill is the measure that we should be discussing now instead of this river and harbor bill.

The apologists for this bill call it a war measure. If raiding the Treasury of the United States is a war measure, then this is certainly a war measure. It has no further excuse for being called a war measure. It is new to me that spending money on streams that can hardly float a rowboat can be called a war measure.

The cry used to be "We want pork!" Last year the call to arms was, "Necessary for the national defense!" Now the war cry is, "It is a war measure!" Next year it will be—well, trust the advocates of this kind of legislation to think of a suitable battle cry.

This is no more a war measure than a bill to erect a statue to James Buchanan is a war measure, or a bill to make a new committee on equal suffrage is a war measure, or a bill to appoint a committee to investigate the moral conditions among the Hottentots is a war measure.

The proponents of this bill in the majority report state, in part, as follows:

The river and harbor section of the War Department maintains in the aggregate a large force of assistant engineers and employees in the several districts, many of whom would have to be discharged, and the personnel of the force disorganized.

I would respectfully recommend that those of them that are still able to fight be sent to France to serve their country in the trenches, and those that are too fat to fight let them seek other employment.

The advocates attempt to bolster up their bill with the statement that this bill is advocated by the Secretary of War. But the gentleman from Illinois [Mr. GALLAGHER], a member of the committee, kills their argument. He states, in part, as follows:

This measure is put forth here as a war measure, and that is the reason that it is brought here to-day for your consideration. I want to say at the outset that this is not a war measure. It is practically the same river and harbor bill that was before this House at the last session of Congress, and you will recollect that that bill received 132 votes in this House against its passage. I am going to show that it is not a war measure. And, to start with, I want to inform the House that, at the request of certain members of the committee when it was determined that this bill was to be forced upon this House, I went to the Secretary of War and asked for an interview. When I got to the Secretary's office I was told that the Secretary was very busy, but that I could talk to his private secretary. I told his private secretary that there were members of the River and Harbor Committee who had decided views regarding the passage of a river and harbor bill at this time, and as the bill was proposed as a war measure some of us would like to talk with the Secretary of War before he made any recommendations, because we believed we could inform him to some extent as to what the bill ought to be, and that possibly he might change his mind with reference to some of the items in the bill. His private secretary told me he would call the attention of the Secretary of War to our proposition, but I heard nothing more about it from him, and, so far as I know, none of the members of the minority have had any conversation with the Secretary of War with reference to the bill.

Then the gentleman from Illinois [Mr. GALLAGHER] goes on and states:

The next step was when the committee was called to order, when I made a motion in the committee that the Secretary of War and the Chief of Engineers be invited to come before the committee. We wanted to hear from them the necessity for a river and harbor bill as a war measure at this time, and other matters, so far as river and harbor improvements were concerned. The Rivers and Harbors Committee adopted that motion, but at the very next meeting we were told that the Secretary of War was too busy and that he could not attend any meeting [note the word "any"] of the Rivers and Harbors Committee. Neither did the Chief of Engineers come.

Now, listen to this:

But the same methods that are always employed in the manufacture of a rivers and harbors bill were employed in making up this bill.

It is also very clearly shown by the letter from the Secretary of War to the gentleman from Oklahoma [Mr. FERRIS] and the reading of the letter from the Secretary of War to the gentleman from North Carolina [Mr. SMALL] that the Secretary has not even read the bill, to say nothing about carefully examining the bill. In the debate on Monday the gentleman from Ohio [Mr. SWITZER], a member of the committee, admitted in response to a question from his colleague [Mr. FESS] that he did not consider this bill a "war" measure.

We have been called here on serious business, and it is our duty to pass as quickly as possible all bills necessary to win this war, and also to pass as quickly as possible all bills making the conditions under which we are to live for the next two or three years as easy as possible on our people. The food-control bill, the biggest bill now before us, has been reported out of committee, and every day wasted on this miscalled "war" measure means just so much delay in the important food-control bill. People are more interested in having the price of food lowered and laws providing for the punishment of "food pirates" and "fuel pirates" than they are in removing snags, overhanging trees, sunken logs, and water hyacinth.

President Lincoln called a special session—a "War Congress"—in 1861, which met on July 8 and adjourned on August 6.

That Congress spent more time working than they did in talking. In less than a month the Thirty-seventh Congress had passed, among other bills, and gone home, the following bills:

1. To refund and remit duty on arms imported by the States.
2. To provide for payment of the militia and Volunteers.
3. To provide for the collection of duties on imports, etc.
4. To provide for the appointment of assistant paymasters.
5. To authorize a national loan.
6. To make additional appropriations for the Army.
7. To make additional appropriations for the Navy.
8. To authorize the employment of Volunteers.
9. To make additional expenses for sundry civil expenses.
10. To provide for the forwarding of soldiers' letters.
11. To provide for the temporary increase of the Navy.
12. Another bill regarding the better establishment of the Army.
13. Another act regarding refunding duties on arms imported by the States.
14. To provide for the better organization of the Marine Corps.
15. An act relative to the Revenue Marine, etc.
16. To provide for indemnifying States for expenses incurred by them in defense of the United States.
17. To provide for calling out the militia.
18. To make additional expenses for the legislative, executive, judicial, etc.
19. An act to increase the Military Establishment of the United States.
20. To provide for furnishing arms to the Home Guards, etc.
21. To provide for the purchase of arms for the troops.
22. To provide for the increase of the Medical Corps.
23. An act regarding imports.
24. To provide for additional marshals and district attorneys.
25. Another act regarding the better establishment of the Army.
26. To prohibit the sale of liquor in the District of Columbia to soldiers in uniform.
27. Another act regarding revenue.
28. Another act regarding the Military Establishment.
29. An act against piracy.
30. Another act regarding increase of the Navy.
31. Another act providing for appropriations for the naval service.
32. To provide for fortifications, etc.

The Thirty-seventh Congress also passed many minor bills in this session of less than a month and had adjourned. They wasted no work on a bill like this rivers and harbors bill, which should not be brought up until the winter session.

The "pork barrel" known to Congress, which in the aggregate carries a large sum of money and distributed among congressional districts on the principle, apparently, of the "if you tickle me, I'll tickle you." As one of the Philadelphia papers put it last session:

In most sessions there are two pork barrels. One contains juicy hunks of appropriation pork for rivers and harbors. The other contains—in most cases—pap for nice little Congressmen who have influence to demand and receive all sorts of public buildings in all sorts of towns of their districts. The abuses which have crept into these two pork barrels have been extremely serious. Mud flats have been dug out for the benefit of catboats. Expensive buildings have been erected out of all proportion to practical requirements.

I do not remember at this time which particular paper made these editorial comments, but I think it was the paper for which the gentleman from Philadelphia [Mr. MOORE] writes some articles occasionally.

Congress will eventually have to adopt a better policy than the "mutual-tickle" policy that we now have, and we might as well begin now. We will have to "blacklist" the foolish projects—to put it mildly—that have been eating up millions and millions of money simply because Members of Congress think that they are judged and rewarded according to the "hunks of pork" they can land for their districts.

Ports that have and rivers that have, and can be improved to produce, substantial commerce should receive all the help that they need. But these ports and these rivers will not get the support they deserve until waterless rivers receive no more money and "trout streams are given back to the trout."

It is not necessary to "bring back the bacon" in order to satisfy the people of your district that you are looking after their interests. People are not such fools as many people think they are.

Senator KENYON expressed the right kind of sentiment when he said a year ago:

Your motto is "Let the people squeal." Mr. President, if the price of holding my seat in this body is to vote for bills of this kind, the seat may go. If getting appropriations for my State is getting the essential thing for my people, then my usefulness to them in this body is ended.

Some day a Congress will be here that will not consider those the greatest statesmen that can get the most out of the National Treasury. Some day a Congress will think along National lines and not along State and district lines. And that day is coming just as certain as to-morrow's sun.

We are beaten perhaps in this preliminary skirmish, but this is not the end of the fight. We appeal our case from a Congress drunk with extravagance to a people sober, meditative, and very discriminating.

Let us examine a few of the items in this "war" measure.

ALTAMAHA, OCONEE, AND OCMULGEE RIVERS.

These rivers, with the high-sounding names, are old friends. The following quotations from pages 6417–6418 of the CONGRESSIONAL RECORD of April 6, 1916, illustrates pretty well how out of place the rivers—so-called by charity—would be in a real war measure:

Mr. TREADWAY. I congratulate the gentleman on his facility in pronouncing these names, which he has evidently acquired by long practice. I can not swing my tongue around them. But I want to refer to the report of the hearings before the committee. The chairman of the committee [Mr. Sparkman] the other day offered some criticisms or references to my speaking about shallow rivers. This is one of them. The witness appearing before the committee was Mr. Walter De Four. He stated:

"The shallow water made it necessary for us to get together all the information that it was possible to get and then, in addition to all the information we could get from the outside, to apply a little ingenuity of our own and develop a boat about which Mr. Long will tell you later on—a boat with which we are able to navigate the river. We can now navigate this river, which is something we were never able to do before, notwithstanding the fact that the people of Macon had spent more than $100,000 in the building of boats."

The gentleman from Minnesota [Mr. SMITH], who sits by me, suggests that they could navigate the boat a great deal better if they put wheels under it, because then they would not need any water at all for the keel and the rudder.

Then Mr. De Four goes on to say:

"That boat is now in actual operation."

Think of it, gentlemen, a wonderful advance. They are asking Congress to appropriate money for these high-sounding names, and there is actually a boat in operation on the river, by the testimony of a gentleman who appeared before the committee.

Then he goes on to say:

"When we appeared here in 1914 we promised to build a boat and put it in operation on the river if given the necessary appropriation. We did not give up, but we have built the boat." [Applause.]

A wonderful event! Further description of the boat:

"In building this boat and operating it since July 20 last, we have learned more about navigation than we knew when we undertook to build that boat." [Laughter.]

They learned considerable about navigation.

"As the result of that, we now have in process of construction a boat that is built on even higher scientific principles and more advanced theories than the former one. With the information about this boat which Mr. Long will be able to give you later on, you can go back home to your people and assist them greatly in the navigation of the waters throughout their territory. I would like to impress upon the members of the committee that what we have done is the best that we could do under the conditions. We were forced to do something, and usually a man can do something when he is forced to do it."

This is the kind of an item by which this bill secures the reputation of being "pork." [Laughter.]

Mr. HUMPHREY of Washington. Mr. Chairman, I did not intend to take part in the discussion of this particular item, but inasmuch as the gentleman from South Carolina objected to the continuation of the description of this boat by the gentleman from Massachusetts I think the committee ought to have the benefit of it. We are asked to appropriate $53,000 a year to keep this boat running.

I want to read a little further description of this boat, given by one gentleman who appeared before the committee. He said:

"There is not a piece of wood in this boat as big as your lead pencil, except what went into the screens to keep the mosquitoes from biting the crew and what went into the construction of the ice box." [Laughter.]

Here is another thing about this wonderful boat for which they want $53,000 a year to run:

"We were just as careful about the installation of the power in this boat as we were about the boat itself, because we realized that that is the heart of the boat. If we made a mistake in the installation of the parts, the whole structure would be a failure. We investigated every engine made in this country, and I regret to say that we had to select a European article to put in that boat because of its superiority. We selected a Bollinger engine, manufactured at Stockholm, which required 28 cents an hour to run.

"We put an electric plant on this boat. We can blow a horn, or rather a whistle, by electricity, and do various other things. [Laughter.]

"We have a number of conveniences, and so on. Our boat carries 83 tons on a 30-inch draft, 160 tons on 48 inches. We can load that boat down as low as 54 inches. When those photographs get back to me I will go into detail, because there are some points that are very important. It requires a crew of 10 men on this boat to run it night and day. We do run it night and day. By the way, it is the first boat that was ever installed on that system of rivers that runs night and day. It is the first boat that ever made the trip between Hawkinsville and Macon in less than 40 hours' running time.

"We have solved the problem of navigating water less than 4 feet in depth without a shadow of doubt." [Applause and laughter.]

On page 168 of the report of the majority of the committee we find the following comparative statement regarding the commerce on the Altamaha and the Oconee, and on page 169 we have figures regarding the Ocmulgee:

ALTAMAHA.

	Short tons.	Value.
1914	103,306	$1,896,363
1915	76,763	967,205

OCONEE.

1913	10,440	$574,125
1914	38,242	[1] 1,509,975
1915	41,923	484,091

OCMULGEE.

1913	28,474	$1,388,260
1914	28,063	1,484,645
1915	33,645	1,127,558

[1] Marked difference in value of commerce for 1914 and 1915 is on account of classified freight reported as general merchandise in 1914 and an overestimate of the value of the same.

The committee majority report further states:

Amount expended on all projects from Aug. 14, 1876, to June 30, 1916:

New work	$809,398.34
Maintenance	221,917.21
Total	1,031,315.55

Project started 40 years ago, and commerce on every one of the misnamed rivers was less in value in 1915 than it was in 1913. And yet this is a "war" measure.

ARKANSAS RIVER.

Of this river it was said a year ago, "which Army engineers have, within the past year, recommended for abandonment." The bill carried $35,000, instead of the $200,000 recommended a year ago.

THE BIG SANDY.

Why does the Big Sandy not have a place in this war measure, or is it covered up under an assumed name in this bill? It certainly is just as much entitled to a place in this war measure as some of the other items in it. From what the gentleman from Wisconsin [Mr. FREAR] said on January 13, 1916, on page 1137 of the CONGRESSIONAL RECORD, it certainly ought to have its share. The gentleman from Wisconsin then said, in part:

"Big Sandy costs $11 per ton-mile.

"Actual commerce costs the Government $350 per ton.

"Big Sandy 'commerce' in 1913 reached 172,403 short tons, but 172,126 tons, or over 99¾ per cent, consisted of logs, ties, and lumber that floats. Just 277 tons of miscellaneous commerce floated 33 miles in 1913. Counting interest on $1,717,811 now invested, with depreciation included, at 4 per cent, and a reported annual maintenance of $31,998, the cost to the Government for floating 277 tons of actual commerce 33 miles in 1913 was $100,678."

Engineers quote tables on page 2817, but the following table can be easily understood by those who pay the bills:

Total actual commerce, 1913	tons	277
Average distance floated	miles	33
Actual 1913 cost to Government on investment		$100,678
Actual cost to Government per ton		350
Actual cost to Government per ton-mile		11

The Big Sandy was exploited by Army engineers and local interest in order to provide transportation for coal and other "undeveloped resources." It is the same specious argument, supported by the same engineers' estimates, which to-day are given for the Muscle Shoals, the Coosa, Black Warrior, Kentucky, Cumberland, Tennessee, and scores of other worthless canalization projects. The Big Sandy was sure to float millions of tons of coal every year; that was the promise. After 35 years and $1,717,811 spent in development only 12 tons of coal were floated in 1913, and that coal was for Government purposes. This is a worse record than is shown by the Hennepin Canal, to which reference will be made. Have I made good the statement that the 10 condemned projects named in the 1915 bill are not the worst that Army engineers recommend?

How engineers have reveled in Treasury millions and how Congress has been duped by men who have furnished a "waterway" that is now floating commerce at a cost to the Government of $11 per ton-mile!

BRAZOS RIVER.

The last bill carried $390,000 for our old friend, the Brazos River. "Only 1,080 tons of commerce was floated in 1913."

When another bill was up—it was not called a "war" measure then, however (although a rose by any other name would smell as sweet)—the Detroit News made the following comment: "The river and harbor bill will cost the Nation about $39,000,000, and special taxes are being suggested; but citizens of Michigan can find joy in the news that the Brazos River, in Texas, is to be made navigable for shallow-draft mud turtles for at least three months a year."

When the previous bill was up, about a year ago, the gentleman from Texas [Mr. CALLAWAY] (p. 6495, CONGRESSIONAL RECORD, Apr. 7, 1916) made the following comments on the Brazos, Trinity, and Red Rivers:

Mr. CALLAWAY. Mr. Chairman, I am acquainted with the Brazos River. I and mine have been acquainted with it as long as Mr. Guyler, and we know it nearly as well. Our friends from Texas, if they do not get appropriations for the Brazos, Trinity, and Red Rivers, would not vote for the intercoastal canal. [Laughter.]

Let us look at the Brazos. As I said when I was talking about the Trinity, I am not partial to the Brazos. It is as good as many other projects in the bill. It is as good as the Trinity, and they look alike. They are both infinitely better than the intercoastal canal.

From the mouth of the Brazos to old Washington we have spent $425,462.15. From old Washington to Waco, the present head of navigation—from old Washington to Waco we have spent up to the present time $1,350,654.74.

Mr. TREADWAY. Will the gentleman yield?

Mr. CALLAWAY. Yes.

Mr. TREADWAY. Has the gentleman any explanation of what we have got for the amount we have expended?

Mr. CALLAWAY. You had a Congressman here for 18 years. [Laughter.] My colleague [Mr. HENRY] could say, like the gentleman from Missouri [Mr. BORLAND] of the Mississippi River, that he knows it is navigable because he has navigated it time and time again to Congress. [Laughter.] Now, we have expended up to the present time on these sections $1,776,116.89, and we are asked to appropriate $215,000 additional on that proposition, making $1,900,000, in round numbers, that we have spent on the Brazos River up to the present time. Let us see what they say about the commerce. The Engineer's Report says:

"No freight is now carried on this section of the river. There can be no commercial effect of the improvement until it is completed."

Mr. Chairman, it is estimated that it will cost about $10,000,000. They have been at work on it for 15 years. They have spent up to the present time about $2,000,000. In 15 years if they have spent $2,000,000, and no traffic can go up the river until it is completed, and if we work in the future as we have in the past we will spend $10,000,000 in five times 15 years, or 75 years, from the time it was begun, or 60 years yet.

About the same proposition applies to the Trinity. It is estimated to cost $10,000,000, and, according to the way they are working at it, it will take 41 years yet to complete it.

Children of the men who are getting the appropriation for the river may see this project completed. A large part of the time there is no water in the river to furnish navigation even if they had locks and dams.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. CALLAWAY. Yes.

Mr. MADDEN. Does the gentleman wish the House to understand that there is no water in either the Trinity or the Brazos?

Mr. CALLAWAY. Oh, there is some water. You can find water at times. [Laughter.] Here is an interesting letter concerning the Brazos put into the RECORD April 7, 1916, by the gentleman from Wisconsin [Mr. FREAR]. The writer, Mr. Guyler, is president of a bank, as well as vice president of other banks, and connected with other business interests:

WALLIS, TEX., *January 26, 1916.*

Hon. JAMES A. FREAR,
Washington, D. C.

DEAR SIR: Noticing in the press your attitude respecting appropriations toward improvement of various streams and more particularly those applying to the Brazos and Trinity Rivers of Texas, I felt constrained to write you expressing my complete approval of your course. I am a native Texan, born and raised within 2 miles of the Brazos River; am 50 years old. My father and myself have owned land bordering on the Brazos for 58 years. I now own one tract which borders river for about 3 miles. I beg your pardon for mentioning these items. It is done to evidence my familiarity with the subject. The Brazos is an alluvial-banked stream; easily caves in banks. The work the Government has done and is doing is so utterly useless that it is contemptible and farcical, and apart from the absolute, complete, total, utter waste of such appropriations; engineers have made regulations which are costing the people along the banks of said streams large sums of money.

I will mention two. If I should put in a ferry, I have to raise my cable 60 feet above low water; 40 feet ordinarily would do. This additional height necessitates longer cables and stronger and more costly posts for elevating. The same applies to bridges. It has cost the people of Fort Bend County at least $40,000 excess to erect four bridges across the river, and this same expense will apply to every bridge and ferry from the mouth to Waco. The reason given for this is to allow height sufficient to clear steamboats. Now, I have lived on Brazos for 50 years and my father since 1858, and never in all that time has there ever been a steamboat either up or down, except the Government snag boat and possibly one or two small gasoline boats sent out by Waco boosters to prove the navigability of the stream. I am not a civil engineer, but I believe it would be cheaper to dig a canal from the Gulf to Waco than attempt to deepen the Brazos; and if an honest, capable engineer would investigate, without being wined and feted by those interested, it would be overwhelmingly defeated. Our politicians seemed to be governed by those who make the loudest noise, and the common people have no horns or bands or champions.

I wish you every success. No patriotic American can continue to support such heartless graft. We educate our children that it is proper and commendable to steal from the Government. You are welcome to use my name.

Yours, respectfully, R. W. GUYLER.

Now, Mr. Chairman, I would suggest to the people of Texas that here is an honest man, a man who shows statesmanship, for his home country, and will be a good candidate, in view of the vacancy which may occur, as I am informed, in that district. [Applause.]

COLD SPRING ISLET.

When I looked through the index of the majority report I thought that our old friend the Cold Spring Islet was not in this "war" measure, but finally found it, being "grouped" with some other items.

When the bill was up a year ago my colleague [Mr. MCLAUGHLIN of Michigan] made the following remarks regarding Cold Spring Islet—he was then quoting the words of Col. Lockwood, of the Corps of Engineers: "The project of improvement if carried to completion will be of material benefit to the city of Cape May as a pleasure resort by filling the adjacent swamp lands, obliterating mosquito-breeding beds, and furnishing opportunity for expansion for building sites."

My colleague further states: "We find also in the report made by Capt. Flagler, of the Corps of Engineers, the following statement concerning this project. The report says that it 'would also permit a resumption of the yacht races that were at one time sailed on Cape May and formed the most attractive event of the season. The Cape May cup, an international trophy, is now sailed for at New York. Together with the projects in real estate improvement at Cape May, the establishment of a secure harbor would, I am sure, largely increase the present patronage of summer visitors at this locality.'"

CONGAREE RIVER.

Now, just a few words regarding the Congaree. According to the report of the Army engineers for 1916, there was only one boat—an old stern wheel at that—on this "war" river in 1916. As there were three in 1914, two in 1915, one in 1916, the chances are that even the poor lone "one" has gone to the scrap heap by now, 1917.

According to page 154 of the majority report, the "commerce" declined from 6,077 tons in 1914 to 4,324 tons in 1915; also, according to report, same page, there has been spent $626,117.97 by the Government on work and maintenance.

GUADALUPE RIVER TO VICTORIA, TEX.

This item seems to have as much place in this war measure as some others.

The commerce on this river was 109,823 tons in 1913 and only 63,110 tons in 1915. Value of commerce was $64,701 in 1913 and only $36,040 in 1915.

Report of the majority of the committee, page 299, says in part: "Snags and overhanging trees have been removed, but each freshet brings in additional obstructions." The Texas Legislature ought to pass a law forbidding rain in the vicinity of the Guadalupe.

The report further states: "Sand and gravel are the principal items moved over this waterway." Eliminating the amount dredged by the Government, I wonder how much "commerce" would remain.

In talking about this and some other Texas projects, Senator Burton said two years ago: "I think they are so rank that they smell to heaven, some of them; I really think I could prove to any dispassionate audience that such is the case." Two hundred and seventy-six thousand nine hundred and seventy dollars and fifty-eight cents has already been spent on this "project," and it is crying for more.

MISSISSIPPI RIVER FROM THE MOUTH OF THE OHIO TO THE MOUTH OF THE MISSOURI.

This war measure seems to carry $350,000 more for the above. It was stated by Senator Burton at one time that this project has received more money than Germany had spent on the entire Rhine. While the Rhine has more than 40,000,000 tons of commerce annually, this 200 miles of the Mississippi has not more than one-half of 1 per cent of that amount.

In the Sixty-third Congress Senator Burton stated that it would cost more than $17,250,000 to complete this "improvement."

MISSOURI RIVER.

This bill carries an appropriation of over a million dollars for the Missouri River. I understand that it will cost a million dollars a year to maintain. From the debate on this item a year ago I doubt whether we will ever receive any substantial returns from the money expended.

NORFOLK-BEAUFORT.

It appropriates $100,000 more for the "never-to-be-forgotten and indefensible Norfolk-Beaufort farce."

NORTHEAST RIVER, N. C.

On page 141 of the majority report on this war measure we find commerce for the calendar year 1914 was 128,518 tons, and for 1915 it was 68,116 tons. "War is hell," all right.

OHIO RIVER.

The bill also carries $5,000,000 for the Ohio River, although the commerce of the Ohio is less than 2 per cent of the commerce at New York Harbor.

In the Sixty-third Congress Senator Burton stated that it would cost $51,057,000 to complete this project.

OKLAWAHA RIVER, FLA.

This war measure also contains proposed appropriations for the Oklawaha River, about which the gentleman from Wisconsin, in his minority report in the last Congress, said, in part: "In this time of financial stringency with the Government, what words can sufficiently condemn the new Oklawaha project with $27,000 annual maintenance, counting interest, to serve 1,760 tons of 1915 'commerce,' or the $47,000 Kissimmee Creek new project, both of which were stricken from the 1914 bill by the Senate committee after they had passed the House that year?"

If the river had no place in a bill last year when we had no such large war expenses, it has even less excuse for being in a bill this year. Commerce in 1915 was not half as large as it was in 1913.

OUACHITA RIVER.

The Ouachita River is another project that received favorable mention in this bill.

The gentleman from Wisconsin [Mr FREAR], in his speach of 1916, January 13, describes this river as follows: "Curiously, no mention is made of present commerce in volume 1 of his reports, so volume 2, page 2362, was examined to ascertain present conditions. There it is learned that the industrious snag boat *Joseph E. Ransdell*, flagship of the fleet, hauled 6,436 different pieces of commerce during the year, in the shape of snags, stumps, and leaning trees taken from the river, United States derrick boat *No. 2* was a close second, with 5,071 more snags, stumps, deadheads, and leaning trees, while over on page 2372 we learn that a 'party of laborers,' in circus tents, collected in 3,333 more snags, stumps, deadheads, and so forth, from the river. To be exact, 14,840 snags, deadheads, leaning trees, and so forth, were rescued from the Ouachita in 1913, and of these Chief Kingman's deforesting of Arkansas reached 6,984 trees."

The tale of the lonesome pine will soon reach Arkansas, although its once popular Arkansas traveler has nothing on the flagship *Joseph E. Ransdell* or other members of the perambulating Ouachita snag fleet, including the circus-tent laborers.

PASCAGOULA HARBOR, MISS.

The committee recommends that the above harbor be awarded $113,000 in this "war" measure. Although $1,318,129.58 has been spent on this harbor in work and maintenance, the commerce seems to be on the decline. According to the report of the committee in its apology for this bill, it says on page 223:

"Commercial statistics.—The total commerce for Pascagoula Harbor during the past three years is given below:

Comparative statement.

Calendar year.	Short tons.	Value.
1913	1,020,938	$7,064,738
1914	604,560	4,557,481
1915	102,851	910,570

The committee gives us no information for the reason for this decline in commerce, to show that Pascagoula is a "live" town, it does give information that "a small municipal wharf has been built at Pascagoula, Miss., by the town of Pascagoula, at a cost of $300." Long live Pascagoula.

RACCOON CREEK, N. J.

Raccoon Creek, according to page 71 of the report of the majority of the committee, had commerce of $1,158,170 in 1913 and only $844,290 in 1915. Work according to the report is 95 per cent completed, so commerce ought to be increasing instead of decreasing.

RED RIVER.

It further carries $55,000 for the Red River, of which it was said in the debate on the last bill, by the gentleman from Wisconsin [Mr. FREAR]—

"On which the actual commerce costs the Government $80 to $100 per ton," and also, "that outside of logs and timber, that floated down, just 5 tons," was the actual commerce of the river.

I note on page 271 of the report of the committee the following comparative statement:

Fiscal year ending June 30—	Short tons.	Value.
1914	26,166	$310,333
1915	47,351	2,939,073
1916	27,325	1,895,867

I presume the drop of over 20,000 tons and over $1,000,000 in value of commerce for 1915 to 1916 is one good reason why the committee says this bill is a "war measure."

The following letter also explains itself:

KIOMATIA PLANTERS' CO.,
Kiomatia, Tex., June 13, 1914.

Hon. Mr. FREAR, M. C.,
Washington, D. C.

DEAR SIR: In the June 6th edition of the Saturday Evening Post the first article in the editorials is one with reference to yourself and your proposed investigation of the waste of the public money on rivers and harbors.

Allow me to congratulate you on the step you have taken and wish you great success in your much-needed probe.

As a Red River planter, one who has spent 20 years on Red River, allow me to say (and it is the consensus of opinion of all my neighbors) that the improvement (?) of Red River this high up by snagboats is not only a farce, but actually detrimental to navigation—were such a thing possible—and to the land on the banks of the river. It is even a joke among the crews of the snagboats themselves. I will not go into figures and dates as to the number of boats navigating Red River, amount of money spent on it, etc., as you have all these at hand. But as for the good it does I can speak. There has not been a boat (except a snagboat) on the river here in six years, and the last one was a booster boat that went to Shreveport to prove that Red River was navigable this high up, and it went down on the biggest rise we have had since 1843. The crews of these snagboats quit at 4 p. m.

I wish you to know that this plantation has actually suffered from the work of the Government snagboats.

These snagboats are all right in their places, but this Simple Simon business is the limit.

I understand the work on the Trinity is even more foolish and wasteful of money.

If this matter is of interest to you, I will gladly get up some more facts for you. At any rate, I would be pleased to have you keep me posted as to the headway you are making in this line.

GEORGE T. WRIGHT.

SCUPPERNONG RIVER, N. C.

Let us see about another item of this great "war measure." On page 132 of the committee report it states that the commerce on the Scuppernong for year ending June 30, 1913, was 27,224 short tons, and for year ending June 30, 1915, it was only 9,448 tons. Committee states reasons as follows: "The decrease in tonnage below that of last year is due to the closing down of a sawmill." If closing down one sawmill would take away two-thirds of the tons of commerce of the river, what would the closing down of another sawmill do? And yet we are informed by the committee that this is a war measure.

TENNESSEE RIVER.

It carries $401,000 now instead of $944,000 in the last bill. At that time it was stated and not disproved that so far as actual commerce was concerned "apart from floatable timber on that river reaches only 200,000 tons, of which 7,800 tons was coal hauled 16 miles."

TRINITY RIVER.

The last bill carried $300,000 for the "notorious Trinity River," although it was claimed by many that it had no commerce and needed artesian wells to furnish moisture. Due to the above facts, I presume, and the further fact that "a Government engineer at one time suggested that artesian wells should be dug to supply water for this stream, and that the ardent advocate of the appropriation should have offered as a possible explanation of this idea at the committee hearing that if the water was flowing underground it might be well to get it above the surface by boring into it," this bill only carried $3,500.

It may be that as a "war" measure some other committee may recommend that we spend several hundred thousand dollars in making it a military road.

This is the river that the gentleman from Texas, Mr. Callaway, spoke of, on page 5659, CONGRESSIONAL RECORD, April 7, 1916, when he said in part:

"Now I say, not because I am partial to my State, but because I wanted to take this thing in a way that anybody could understand that I was not partial in taking it; I was taking it because of the inherent rot in the thing. I first called attention to the projects in my own State, and they rear up on their hind legs and fan themselves with their ears when I say anything about their river. But for the delectation of the House I want to read the engineer's report on one of these rivers for last year.

"The item of work performed is as follows:

"On the Trinity. I said at the outset that the Trinity is as good as the general projects in this bill, and I am not partial to the Trinity—

"Number of miles worked over, 18; snags destroyed, 28—

"That is doing work, is it not? [Laughter.] Stumps destroyed, 4; shore snags cut, 758; trees girdled, 204; quarter boat *No. 1* started at the dam of White Rock Shoals and worked over 11½ miles. Snags destroyed, 68; stumps destroyed, 14; side jams removed, 5; leaning trees cut, 6." [Laughter.]

There was expended during the fiscal year for maintenance of the open-river navigation on the Trinity River the sum of $11,536.68. The total amount expended on these improvements that year was $192,228.58.

Mr. MADDEN. Will the gentleman state whether there was any navigation there?

Mr. CALLAWAY. Why, no; there will never be any navigation there. [Laughter.] But it is not different from the other streams in this project. The report further says:

"The high water of December, 1914, caused a considerable caving of the bank and bed behind and below the north abutment, and a special allotment of $10,000 was received for repairing this damage."

In conclusion, let us devote all the time necessary to "war" bills, all bills necessary to carry this war to a successful and an early issue, and all bills necessary for our people to have all the necessaries of life, and those as cheaply as possible, but let us waste no time in legislation of this kind. [Applause.]

Mr. HUMPHREYS. Mr. Chairman, I would like to ask the gentleman from Illinois [Mr. MADDEN] a question, if he will allow me.

Mr. MADDEN. Certainly.

Mr. HUMPHREYS. If this amendment should be agreed to, would the gentleman then be willing to support the bill?

Mr. MADDEN. Surely. Yes; I am in favor of the bill if the Parker amendment is adopted.

Mr. HUMPHREYS. I will ask the gentleman from Wisconsin [Mr. LENROOT] if that is his view of it?

Mr. LENROOT. If this amendment is adopted, I shall vote for the bill.

Mr. HUMPHREYS. I wonder if there is any other gentleman who has been fighting the bill who will object to it if this amendment is adopted?

Mr. PARKER of New Jersey. This amendment covers only one section.

Mr. MADDEN. With the right, of course, to object to individual items.

Mr. LENROOT. With the right, of course, to perfect the bill by amendment; but I shall vote for the bill on final passage if this amendment is adopted.

Mr. HUMPHREYS. I just want to see if there is some way in which we can get together. I do not want to make any speech.

Mr. PARKER of New Jersey. This amendment could not cover surveys.

Mr. HUMPHREYS. I understand this amendment does not cover surveys. If this amendment should be adopted, my own idea is that surveys would go out. Now, with this amendment adopted, I wonder if there will still be a persistent and determined fight on the bill, or if it will mean that we can pass the bill?

Mr. MADDEN. If the gentleman from Mississippi [Mr. HUMPHREYS] will yield, I would suggest that there may be some items in the bill that ought not to be in it. For instance, I think there are some items in the bill subject to a point of order.

Mr. HUMPHREYS. Undoubtedly there may be.

Mr. MADDEN. And those items ought not to remain in the bill.

Mr. HUMPHREYS. Undoubtedly they ought not.

Mr. MADDEN. But when the bill is finally perfected, if the amendment offered by the gentleman from New Jersey [Mr. PARKER] is adopted, I shall be glad to vote for the bill.

Mr. HUMPHREYS. Let me ask the gentleman this question: Of course what is subject to a point of order goes out, but with a proviso in the bill that the President must first approve them under the terms of this amendment, why should the gentleman object to the other items in the bill?

Mr. MADDEN. For example, if a man was able to prove that a certain item was twice as large as it ought to be, the gentleman would not object to having the item cut in two, would he?

Mr. HUMPHREYS. No; but that opens up the whole bill for discussion again. These items have been passed upon by the committee. And now we propose to leave it to the President, and I want to know, if we are willing to do that, can we pass this bill?

Mr. MADDEN. Does the gentleman mean pass it in the exact form in which it now is or in its final form? In its final form, after we have perfected it, I shall be glad to vote for it with the Parker amendment in the bill.

Mr. HUMPHREYS. I was in hopes we could get some sort of an agreement.

Mr. MADDEN. Does the gentleman mean that we shall vote for the bill blindly?

Mr. HUMPHREYS. No; not blindly. The gentleman has read this bill most carefully, or else he would not have denounced it as he has. He did not denounce it blindly, did he?

Mr. MADDEN. I only denounced the policy.

Mr. HUMPHREYS. The gentleman has investigated only the policy, he has not investigated the items that he has been criticizing. In other words, he has been striking blindly at the bill.

Mr. MADDEN. No; I do not think the gentleman wants to say that.

Mr. HUMPHREYS. We have heard all that many times, and with all due respect to the gentleman I want to know whether there is any chance to get together and pass this bill or if we are to fight on and continue to-day and to-morrow and attempt to put it off until next week. If the proponents of this amendment really mean what they say, why can not we get together, agree to the amendment, and pass the bill?

Mr. McKENZIE. The surveys would go out on a point of order.

Mr. HUMPHREYS. I take it that they would go out if the amendment is agreed to. Now, I am not making this proposition by the authority of anybody; it is on my own hook, so to speak.

Mr. FESS. Will the gentleman yield?

Mr. HUMPHREYS. Yes.

Mr. FESS. As the bill stands I intend to vote against it, but if this amendment is carried I intend to vote for it, reserving the right, as the items are considered, if we can reduce certain items, to make an effort to do it. But if the amendment is carried I will vote for the bill.

Mr. HUMPHREYS. Does the gentleman intend to help any sort of filibuster to prevent voting on the bill; that is, if certain items are not agreed to or certain amendments that he wants?

Mr. FESS. I do not.

Mr. LENROOT. Will the gentleman allow me to say that if this amendment or some such one is passed, I feel very certain that this bill can be passed by to-morrow night. It would eliminate most of the objections.

Mr. HUMPHREYS. And the gentleman would help pass the bill?

Mr. LENROOT. Yes; although I would not want to cut off any legitimate discussion.

Mr. HUMPHREYS. But the gentleman would help put it through, and even if he felt that he did not get his way, he would support the bill?

Mr. LENROOT. Yes.

Mr. HUMPHREYS. How about the other gentleman from Wisconsin?

Mr. FREAR. Mr. Chairman, I never allow another gentleman to put a statement into my mouth. I think this time is profitably taken, and I believe that we are of the same disposition. I want to say to the gentleman that I did not expect to move to strike out a single item contained in the bill, and I do not intend to delay the action upon it, although I have done so in the past. I desire very much to have something similar to this proposition placed in the bill. I have a motion to recommit, which is stronger than the amendment of the gentleman from New Jersey, and I would gladly support the bill if that were placed in it. It goes further than the amendment of the gentleman from New Jersey. I can not see how any gentleman on the other side of the House would object to the proposal to recommit.

Mr. COOPER of Wisconsin. Will the gentleman from Mississippi permit a suggestion?

Mr. HUMPHREYS. Yes.

Mr. COOPER of Wisconsin. Before stating it I want to read the amendment as proposed by the gentleman from New Jersey:

Provided, That during the continuance of the present war no money shall be so expended except for necessary repairs and preservation of existing public works, or for the construction and completion of works of immediate military necessity, to be determined by the President.

Do not gentlemen think that if anything of this kind is to pass it ought to read this way:

For the construction and completion of work of immediate military or commercial necessities, to be determined by the President.

Mr. PARKER of New Jersey. The word "military" covers every war necessity.

Mr. HUMPHREYS. My opinion is that the word "military" covers a multitude of sins.

Mr. COOPER of Wisconsin. Does the gentleman from Mississippi understand that a military necessity would include preparations for a war 3,000 miles away involving the improvement of a river out in the middle of the continent?

Mr. HUMPHREYS. Yes; I think that well might be, and I will tell the gentleman why.

Mr. COOPER of Wisconsin. I have heard of the latitude of construction, but that is the widest latitude I ever heard of. [Laughter.]

Mr. HUMPHREYS. I am a latitudinarian when it comes to construction. [Laughter.] Here is the reason why I think that might well be held by the President. Not counting the big rivers like the East River, the Delaware, the St. John, the Passes of the Mississippi, the Ohio River and rivers connecting the Great Lakes, eliminating those and taking all the other little rivers throughout the country, they carried last year 135,000,000 tons actual floating commerce. That would take, as I calculate it, 135,000 loaded freight trains. Now, with the tremendous necessity that confronts us for transportation facilities, and which necessities will grow as the days pass by, I can well see that the President might conclude that this, that, or the other river, although it might be in the interior, was performing such a useful function in the transportation of various products of the country needed in the war as to be a military necessity. That we propose to leave to him. So I can see no reason why the President should not conclude that any river in the country, it matters not where it rose or where it emptied, might come within the limits prescribed by this amendment of a military necessity. Now, if we can agree and all get together on that proposition and pass this bill it would be much better than to proceed with what—without attributing motives to anybody—what appears to be a determination to prevent a vote on this bill at all.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREYS. Yes.

Mr. LENROOT. I entirely agree with the gentleman's construction, but let me give the gentleman an illustration of what could not be a military necessity within that definition. For instance, let us take the construction of a dam, which could not be completed for several years—long after this war would be over.

Mr. COOPER of Wisconsin. When is the war going to end?

Mr. HUMPHREYS. The question would naturally arise then, "When is the war going to end?" There being few prophets here, and perhaps still fewer sons of prophets, we would find difficulty in finding a man who would give the answer, so that it would be left to the President of the United States.

Mr. FESS. Mr. Chairman, the suggestion made by our colleague from Mississippi [Mr. HUMPHREYS] is a good one, it seems to me, because it relieves the individual membership of the committee from the charge that they are voting against the bill simply because they are opposing river and harbor legislation. Having voted against the river and harbor bills for the last two sessions, I fear that I would fall in that class. That is not true. I believe in waterway transportation wherever it can be made a profitable project. I have always believed in it, but there seems to be something in the character of legislation in this omnibus method that leads to compromises, and I do not like to be compelled to vote for a measure that contains numerous items which I do not approve in order to vote for measures which I do approve. This omnibus legislation does that sort of thing. I would have to vote for needless items I do not approve in order to get a measure containing items that I do approve. In other words, I do not like the log-rolling method or the "scratch my back, and I will scratch yours" method. That is why I have opposed these bills for the last two sessions. Now, in the midst of war, if the administration authoritatively would say to this committee that this bill or these items in the bill are of present military necessity I would even surrender my own individual judgment and vote for the measure, if recommended on that basis; but as an individual member of the committee I do not want to take the statement, generally made that we are bringing it in as a war measure, when really we know that much of it is not a war measure. I now state that if this amendment be adopted I should want to have the privilege of voting against the individual items of the measure as they would come up, or at least to amend them; but whether the items were modified or not I would not oppose the whole bill when it comes to a final vote. I shall vote for the measure when this committee limits the expenditures to military necessity. In case the committee refuses to accept this limitation I shall be compelled to vote against the bill when it comes up for a final vote.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. FESS. Yes.

Mr. COX. This amendment puts it squarely up to the President of the United States to determine when a military necessity exists.

Mr. FESS. Yes; it certainly does.

Mr. COX. Then, does not the gentleman feel, knowing the membership of this House as he does, that practically unanimously every Member of the House really wants to support the President in this war?

Mr. FESS. Yes; I think so; and I believe if we can agree on something of that sort, this legislation would go through at once without any compromising statements.

Mr. COX. And let the President himself determine?

Mr. FESS. And put the responsibility where it belongs. If there be a military necessity, there is not a man in the House who, when so convinced, would not vote for the measure, but we do not want Members to say that it is a military necessity when we can not find any authority from any proper sort that it is.

Mr. COX. There has been nothing in the bill up to this hour showing its military necessity.

Mr. FESS. That is true. Not a word thus far to place this legislation in that class.

Mr. HUDDLESTON. And this discretion vested in the President will terminate with the war?

Mr. FESS. Yes.

Mr. HUDDLESTON. Hence, if there are iniquitous provisions and propositions in the bill, we are approving them and putting them on foot, although temporarily we stay them during the pendency of the war. Take, for instance, the proposition of this Delaware & Chesapeake Canal; that does not smell good to some of us.

Mr. COX. But that is going out on a point of order.

Mr. FESS. But suppose the administration should say that it is a military necessity? I would be inclined in that event to vote for the measure, even though I might question it.

Mr. Chairman, we were called into special session because of the imminence of war. We at once, under the leadership of the President, entered upon necessary legislation. The Democratic Party, in control of the Government and responsible for legislation, by caucus action limited all legislation to war measures. This program has been respected in the main until this legislation came to this House. The proponents have attempted to classify this measure as a war measure. Every man knows that it is not such a measure. This amendment proposes to give the President authority to eliminate such items as are not for military purposes or to assist in the prosecution of the war. If the proponents are sincere, they will accept this amendment. If they reject it, there can be but one interpretation, that it is not a war measure, but simply an effort to include under the excitement of war all sorts of projects which, if standing alone, would have no chance whatever to pass this House. My vote on this measure depends upon our action on this pending amendment.

Mr. LENROOT. Mr. Chairman——

The CHAIRMAN. The gentleman from Wisconsin.

Mr. SMALL. Does the gentleman from Wisconsin desire recognition?

Mr. LENROOT. Not if the gentleman is going to accept the amendment.

Mr. SMALL. Of course, the gentleman will not accept it.

Mr. LENROOT. Mr. Chairman, the supporters of this measure, especially the chairman of the committee, say that this is a war measure. If this pending amendment is adopted, it will make it such, but it is very apparent that most of the supporters of the measure are not willing to have it tested by their own standard. They say this measure has been approved by the President of the United States and the Secretary of War as a war measure. If that is so, why are they not willing to let it go back to the President and let him approve items specifically as items of necessary maintenance, or for the carrying on of the war. Their very opposition to this amendment casts a most serious reflection upon their good faith in attempting to make this House believe that this measure as it stands is a war measure. As a matter of fact, Mr. Chairman, there are items in this bill now that the Chief of Engineers has never attempted to defend as a war measure, nor anyone connected with the War Department, as shown by the hearings. I can not take the time now, but in three of the largest projects in this bill, amounting to $7,000,000, namely, the Missouri River, the upper Mississippi River, and the Ohio River, Col. Newcomer, the only representative of the department appearing before the committee, said that the reason the War Department had not eliminted them was because they had supposed that Congress had pledged itself to complete the improvements within a certain number of years. There is not a line of testimony that shows that that $7,000,000 of expense is necessary as a case of military necessity. Gentlemen speak of the upper Mississippi River involving an appropriation of $1,200,000, and other gentlemen speak of the necessity of further improving the river, citing us to the River Rhine in Germany. On the 8th day of last month Gen. Black, in a speech made in St. Louis, placed in the RECORD the day before yesterday, said that the Mississippi River to-day, without another dollar's worth of improvement, is better improved than the River Rhine is in Germany. Yet what commerce is there upon it?

Mr. Chairman, you upon that side of the aisle, who by your caucus have resolved to confine yourselves to war measures at this session, are in duty bound, if you believe in the judgment of your caucus, to vote for this amendment, which will make it a war measure, and will not work any injury to any existing river and harbor. The chairman of the committee says the President has approved this. If that is so, the amendment can do no harm. The most distinguished advocate of the bill on this side of the aisle, the gentleman from Pennsylvania [Mr. MOORE], says that if this amendment is adopted we will ruin the rivers and harbors of this country. Ah, Mr. Chairman, I think the gentlemen know full well that if the President of the United States passes upon each individual item upon the recommendation of the Secretary of War, as he will, he knows that the $28,000,000 of this bill will be reduced many millions of dollars. And that is why they are afraid to leave it to their own President, the President of the United States. [Applause.]

The CHAIRMAN. The time of the gentleman has expired. The gentleman from Maine [Mr. HERSEY] is recognized.

Mr. HERSEY. Mr. Chairman, I wish in the five minutes allotted me to place myself right. I am a new Member of this Congress. I have witnessed for the first time, of course, the making of a river and harbor bill. At the present time I stand in favor of this amendment, for two reasons. There is a project in it for my State—the deepening of Portland Harbor—which I consider one containing the most merit of any in this bill. [Applause.] And yet if this bill comes up to a vote as reported from the committee, even with the Portland Harbor appropriation in it, I must vote against it. [Applause.] I can not retain my self-respect, I can not longer remain a Member of this Congress and vote for the bill. Why, the other day, in the discussion of this bill under the general debate, one gentleman rose here on the floor—an old Member of Congress—and objected to certain appropriations to be made in the bill because, he said, they were wasteful and extravagant, and he objected to them on that ground. A Member who supported one of the largest appropriations in this bill sprang to his feet and said to him, in substance, "Did you not vote for a pork-barrel bill in such and such a Congress?" "Yes." "You are a great reformer! Sit down." And he sat down. If I vote for this bill as it comes from the committee in 1917, when the next bill comes up in 1918, the annual pork barrel, I will be silenced. It depraves and debauches this Congress to pass the ordinary annual pork-barrel bill in the way you have been doing it here. It debauches the conscience of the people at home. Down in my State I am flooded with telegrams, day and night, asking me to support this bill, no matter how bad it is, in order that Portland Harbor may get what it ought to have.

From my place on the floor of this House I look through the open door into the press room, and I see there a large picture of the President, and underneath it are the words, "Stand by the President." I have seen that picture every day that I have been in this Congress. I have stood by him to the present, and I want to stand by him now. April 16 last he said in his memorable address to his fellow countrymen, "This is a time for America to correct her unpardonable fault of wastefulness and extravagance." I am willing to put it up to the President. I want to stand by his admonition to correct wastefulness and extravagance. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

The gentleman from Illinois [Mr. GALLAGHER] is recognized.

Mr. GALLAGHER. Mr. Chairman, there has been a reference made here to the amount of opposition apparently against this bill. Now, is it any wonder that there is opposition, and general opposition, to this bill, inasmuch as the bill is brought here under pretenses that are not facts? The men who are promoting the passage of this bill pretend it is a war measure, when every thinking man in this House knows it is not a war measure.

Reference was made also to the fact that this House passed a bill the other day to bring from retirement certain engineers of the Army. It is in evidence that the engineers now in charge of this work are demanded in other sections and in other ways. And so it might be said of the men that are brought in from retirement. The fact that this is proposed as a war measure can hardly be justified, and such an amendment as the amendment of the gentleman from New Jersey [Mr. PARKER] gives the President the right to say whether this is a war measure or not. Why, the people who brought in this bill here say it is a war measure because it has the indorsement of the Secretary of War. Well, if it has the indorsement of the Secretary of War, there is no reason why they should object to the amendment offered by the gentleman from New Jersey, because it puts it squarely up to the President to say whether this is a war measure or not.

A bill was passed here the other day for the purchase of the Jamestown site. It had the indorsement of the Secretary of the Navy. The House would not pass or favor the passage of that bill until it was put up to the President to say whether it was a necessity or not and that the price was right. That bill carried but a small amount of money in comparison with the bill that we now have under consideration. Why, to hear the people who are in favor of this bill talk, it would lead us to believe that the rivers are going to cease to flow if this bill does not pass; that all the boats were going to disappear from the rivers; and that in face of the fact that it has been established here that there is $32,000,000 in the hands of the engineers now for the purpose of prosecuting this work; and that they can not possibly spend more money than that this year. Next year a bill will be brought in here for river and harbor improvements, and that

is the time to debate this question as to whether it is necessary to make river and harbor improvements or not. Members should understand, when they realize the condition of the finances of this country, when everybody is being taxed to death to get the money necessary to carry on this war, that the proposed appropriation of $26,000,000 in this bill is absolutely unnecessary at this time.

The CHAIRMAN. The time of the gentleman has expired.

The gentleman from Nebraska [Mr. REAVIS] is recognized.

Mr. REAVIS. Mr. Chairman and members of the committee, I have always been very greatly in favor of legislation with reference to those rivers and those harbors that are a material factor in the commerce of America. I have always regretted that river and harbor bills are presented here year after year carrying items whose legitimacy nobody will defend—so obnoxious are they that I could not support a bill which carries them.

I should be glad indeed to vote for the present bill if the amendment of the gentleman from New Jersey [Mr. PARKER] becomes a part of that measure. I realize that according to the letter of the Secretary of War, this bill has been indorsed by this administration as presenting projects necessary to the national defense. But, gentlemen, there is a vast difference between recommending somebody else to do something and the doing of that something yourself. There is a vast difference between signing a petition for proposed action and performing that action yourself. My judgment is—and if it were not so I would not vote for this bill even with this amendment—that when the responsibility of acting upon these projects is put upon the President of the United States, he will by the very force of that responsibility cut out of this bill those projects that are not necessary to the national defense. When the responsibility is placed upon him, acting under that responsibility, there are many items in this bill which in my judgment will not meet his approval, notwithstanding the recommendation of the Secretary of War.

Gentlemen of the committee, I grow a little apprehensive at times as to just what is going to happen to this Nation in the next few years. We are the richest people on earth, and we are very fond of boasting of that fact. But there is a limit to American resources. We have taken over a war wherein most of the powers allied with us are practically bankrupt. If the time should ever come when America should exhaust her resources, and such condition is not impossible, we would have no allies to go to for the purpose of borrowing money. This is the time for economy, though the proponents of this bill do not seem to realize it. We will have in this House next week a food bill, putting into the hands of the President the greatest power that was ever placed in the hands of a ruler during all recorded time. What is the purpose of it? It is to prevent extortion. It is to permit the poor of this Nation to buy their food products at a living price. Where are you to get the millions that you are going to spend on such projects as the Congaree River? Where are you going to get the $26,000,000, a portion of which is to be expended on that stream in Georgia which the gentleman from Georgia [Mr. HOWARD] said he could jump across? You are going to get it by a tax on sugar, on coffee, on tea, on cocoa—by a tax on the necessities of the very poor of the Nation. You have no right to expend money so derived upon some of the projects that are in this bill, even though the Secretary of War says it is a part of military preparedness. [Applause.]

The CHAIRMAN. The time of the gentleman from Nebraska has expired. All time has expired.

Mr. SMALL. Mr. Chairman, the gentleman from Massachusetts [Mr. TREADWAY] desired to ask unanimous consent for a few minutes.

Mr. TREADWAY. I desire to offer a substitute for the amendment of the gentleman from New Jersey [Mr. PARKER].

The CHAIRMAN. There are five minutes remaining, according to the agreement. Those five minutes are reserved by the gentleman from North Carolina [Mr. SMALL].

Mr. SMALL. That is true, but I ask unanimous consent that the time be extended five minutes to be utilized by the gentleman from Massachusetts.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

The CHAIRMAN. The Clerk will read the amendment offered by the gentleman from Massachusetts [Mr. TREADWAY].

The Clerk read as follows:

Moved by Mr. TREADWAY, as a substitute for the amendment offered by Mr. PARKER of New Jersey: After the word "named," line 9, on page 1, insert the following: "*Provided*, That no money shall be expended for the items of maintenance in this act until and unless the items are certified to by the President of the United States as necessary, in his judgment, for the commercial needs of the country or for the successful prosecution of the present war: *And provided further*, That no money shall be expended for the items of new projects, surveys, or for continuing improvements until and unless the items are certified to by the President of the United States as necessary, in his judgment, for the successful prosecution of the present war."

Mr. TREADWAY. Mr. Chairman, this substitute is offered by the gentlemen who have signed the minority report as an indication of their desire to pass a river and harbor bill based on the statement as presented to the committee that it was a war measure.

We are willing—I for one am willing; of course I can not bind anybody else—and shall be glad, if this substitute is adopted, to vote for the river and harbor bill, and I think those who are opposed to the bill in general terms will be glad to vote to pass the bill if this substitute is included.

Mr. FESS. Mr. Chairman, will the gentleman yield for a question?

Mr. TREADWAY. Yes.

Mr. FESS. What is the significance of the word "commercial"?

Mr. TREADWAY. The first provision cares for the maintenance of existing projects. We have in course of operation a large number of projects having a maintenance item in the present bill. Now, if in the judgment of the President it is necessary from a commercial viewpoint to continue that maintenance, we are willing that the present projects should be kept to their present commercial value and the depths now available be maintained——

Mr. FESS. Then the word is limited to maintenance?

Mr. TREADWAY. To maintenance only. The gentleman will observe that it does not appear in the second provision.

Mr. HAMILTON of Michigan. Mr. Chairman, will the gentleman yield?

Mr. TREADWAY. Yes.

Mr. HAMILTON of Michigan. What is the essential difference between the gentleman's amendment and the amendment of the gentleman from New Jersey?

Mr. TREADWAY. The amendment of the gentleman from New Jersey does not include that feature directly bearing on maintenance. It does not include a reference to surveys and has a little different phraseology when it says, "the immediate military necessity to be determined by the President," whereas we say "the successful prosecution of the war."

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. TREADWAY. Yes.

Mr. COOPER of Wisconsin. What has the substitute amendment to say on the subject of continuing improvements?

Mr. TREADWAY. What has it to say?

Mr. COOPER of Wisconsin. Yes; improvements that are now under way?

Mr. TREADWAY. It says that "no money shall be expended for the items of new projects, surveys, or continuing improvements until and unless certified to by the President as necessary" for successfully carrying on the war.

Mr. HUMPHREYS. Mr. Chairman, will the gentleman yield?

Mr. TREADWAY. Yes.

Mr. HUMPHREYS. You left out the word "preservation" there. Had you a particular reason for that? The other says "maintenance and preservation of the existing work."

Mr. TREADWAY. Maintenance is always used in bills as presented by the committee. So far as I am concerned, I am willing to include the word "preservation."

Mr. HUMPHREYS. I wondered if you had something particular in your mind.

Mr. TREADWAY. Would it be agreeable to the gentleman from Mississippi to include the word "preservation"?

Mr. HUMPHREYS. I am not particular.

Mr. SEARS. Mr. Chairman, will the gentleman yield?

Mr. TREADWAY. Yes.

Mr. SEARS. Does the gentleman believe that all necessary works should stop because of the war and that all our money should be expended abroad?

Mr. TREADWAY. All the money is to be expended in this country. We can not spend any money abroad on works of this nature.

Mr. SEARS. Do you believe that all improvements, however necessary they may be, should stop?

Mr. TREADWAY. The whole matter is left to the President, I will say to the gentleman from Florida.

The CHAIRMAN. The gentleman from North Carolina [Mr. SMALL] is recognized.

Mr. SMALL. Mr. Chairman, we have had a debate here of two hours and one-half or more upon an amendment offered by the gentleman from New Jersey [Mr. PARKER] to follow the

enacting clause of this bill, which proposes to limit all the expenditures in the bill to necessary maintenance items and to such further improvements of projects already adopted, or of new projects as are of "immediate military necessity." The gentleman from Massachusetts [Mr. TREADWAY] thinks he has improved it by a substitute providing for necessary maintenance based upon commercial and military needs, and such appropriations for improvement as are necessary in the carrying on of the war.

Mr. Chairman, if gentlemen believe in a river and harbor bill in a period of war, under proper limitations, the bill reported by the committee is the proper bill to support. Not all but most of the gentlemen who have advocated this amendment have, when speaking upon this bill in general debate, indicated their opposition to any bill whatever at this session of Congress. I am appealing for support to the friends of a river and harbor bill who believe that even in a period of war we ought not to abandon our rivers and harbors. [Applause.]

Mr. Chairman, what is necessary in the successful prosecution of this war? This war has impressed upon us more than any war in past history the necessity of mobilizing all the resources of the Nation—its industries, agricultural, manufacturing, and mining, every industry which produces things that are necessary for the support of the Army and of the people, and which will enable us to extend aid to our allies. What else is necessary besides industrial production? Every intelligent student of economics knows that transportation is vital, and that it accompanies production as a corollary without which production will be of no avail. We have realized that already in this war. The Council of National Defense created a committee on railway transportation, composed of experts in transportation, primarily in railway traffic. They have mobilized the railways of the country until to-day they are operated substantially as one system. The Council of National Defense, recognizing that waterways are also an important and essential instrumentality of transportation, have just within the last two weeks appointed a committee on waterway transportation, composed of eminent students of transportation primarily connected with waterways. I have the names of the gentlemen who compose that committee, if I had the time to read them.

This bill treats of an essential instrumentality of transportation—waterways. Will you build up your railways and neglect your waterways? No less than the chairman of the advisory commission, Mr. Daniel Willard, upon a recent occasion—I think in the organization of the committee on waterway transportation—used these words:

> The railroads of the United States, operated as one system, are carrying more freight than ever before in the history of the country; but when they have carried traffic up to 100 per cent of their capacity there still remains 20, 25, perhaps 30 per cent of traffic which it is impossible for them to carry at all.

I have quoted from a circular communication prepared by the Secretary of Commerce, sent to me, and I presume sent to every Member of Congress, on yesterday, in which the Secretary of Commerce emphasizes the supreme necessity of continuing the improvement of our rivers and harbors and of promoting traffic upon them.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SMALL. May I ask unanimous consent for two minutes more?

Mr. GALLAGHER. Will two minutes be enough?

Mr. SMALL. Yes; plenty of time.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that his time be extended two minutes. Is there objection?

There was no objection.

Mr. SMALL. The Secretary of Commerce prepared this for the press, as I said, as emphasizing the supreme necessity of improving our waterways and of promoting waterway transportation upon them. This bill is along that line. Its disposition is with the membership of this House. The majority of your Committee on Rivers and Harbors have endeavored to divorce themselves from sectionalism, from partisanship, from selfishness, and have endeavored to devote the best that was in them to the preparation of this bill.

Believing that such a course would meet with the approval of the House, they consulted the President and the Secretary of War, and your committee at its first meeting resolved that it would include in this bill no item without the recommendation of the Secretary. The President and the Secretary of War formulated the lines upon which this bill should be drafted. They gave directions to the Chief of Engineers to make recommendations coming within those limitations. Then those recommendations were again submitted to the Secretary of War and approved, and then submitted to your Committee on Rivers and Harbors.

This amendment is not necessary. The country is protected and the Treasury is protected.

Mr. DUPRÉ. This amendment is a Trojan horse, is it not?

Mr. SMALL. It seems to be so. The Treasury is protected. The bill promotes an essential instrumentality which we need in the prosecution of this war. And while I am loath to question the motives of gentlemen, the suggestion of my friend from Louisiana [Mr. DUPRÉ] may be appropriate. No friend of waterways, no Member who believes that your committee have endeavored to present a bill limited to the necessities of the country, in the preservation of our rivers and harbors and in the promotion of waterway transportation, ought to hesitate about voting against this amendment and then helping us to pass this bill. [Applause.]

Mr. HULBERT. Mr. Chairman, is it in order to offer an amendment to perfect the substitute offered by the gentleman from Massachusetts [Mr. TREADWAY]?

The CHAIRMAN. It is in order to offer an amendment to the amendment offered by the gentleman from New Jersey [Mr. PARKER] or an amendment to the substitute.

Mr. HULBERT. I send such an amendment to the desk and ask that it be reported.

The CHAIRMAN. Does the gentleman offer an amendment to the substitute?

Mr. HULBERT. Yes.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

> Amendment offered by Mr. HULBERT to the Treadway substitute: Before the words "prosecution of the war" insert "preparation for and."

Mr. LONGWORTH. I ask unanimous consent that the Treadway amendment be again reported.

Mr. BURNETT. And I would like to have the Parker amendment reported.

The CHAIRMAN. Without objection, these amendments will be reported again.

Mr. LENROOT. I should like to ask what the unanimous-consent agreement was with reference to the closing of debate, whether it was limited to the amendment then pending or to any amendments thereto?

The CHAIRMAN. The unanimous-consent request, as the Chair understood, was for 40 minutes on the amendment of the gentleman from New Jersey [Mr. PARKER]. That was extended five minutes to apply to the amendment of the gentleman from Massachusetts [Mr. TREADWAY].

Mr. LENROOT. This amendment is open to debate under the unanimous consent?

The CHAIRMAN. This amendment is open to amendment under the unanimous consent.

Mr. SMALL. I thought that I made the request that debate should close on the amendment and all amendments thereto.

The CHAIRMAN. The Chair did not so understand the gentleman.

Mr. LENROOT. Mr. Chairman, I desire two minutes to say that if the amendment of the gentleman from New York [Mr. HULBERT] is adopted, the entire amendment might as well be defeated, because "preparation for" mean the commencement or the construction of any project the completion of which might take 10 years, and if this is to be a war measure and confined to the prosecution of the war, this amendment that is now proposed ought not to be adopted, and if adopted I want to frankly say that I shall vote against the bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. HULBERT] to the substitute offered by the gentleman from Massachusetts.

The question was taken, and the amendment to the substitute was rejected.

Mr. BURNETT. Mr. Chairman, may we have read now the amendment offered by the gentleman from New Jersey [Mr. PARKER] and the Treadway substitute?

The CHAIRMAN. The Clerk will read the amendment and substitute.

The Clerk read as follows:

> Amendment offered by Mr. PARKER of New Jersey: Page 1, line 9, end of the paragraph, after the words "works hereinafter named," insert:
>
> "*Provided*, That during the continuance of the present war no money shall be so expended except for necessary repair and preservation of existing public works or for construction and completion of works of immediate military necessity, to be determined by the President."
>
> Substitute offered by Mr. TREADWAY for the amendment offered by Mr. PARKER of New Jersey: After the word "named," in line 9, on page 1, insert the following:
>
> "*Provided*, That no money shall be expended for the items of maintenance in this act until and unless the items are certified to by the President of the United States as necessary, in his judgment, for the commercial needs of the country or for the successful prosecution of the present war: *And provided further*, That no money shall be ex-

pended for the items of new projects, surveys, or for continuing improvements until and unless the items are certified to by the President of the United States as necessary, in his judgment, for the successful prosecution of the present war."

Mr. DUPRÉ. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. DUPRÉ. If the Treadway substitute should be adopted over the Parker amendment, then the Treadway amendment would come up for adoption.

The CHAIRMAN. That is true. The question then would come on the amendment as amended. The first question is on the substitute offered by the gentleman from Massachusetts [Mr. TREADWAY].

Mr. COOPER of Wisconsin. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. COOPER of Wisconsin. Is a motion to strike out the last word now in order?

The CHAIRMAN. It is.

Mr. COOPER of Wisconsin. Mr. Chairman, I wish to say a word, in order to direct the attention of the committee to the fact that the amendment proposed by the gentleman from New Jersey [Mr. PARKER] omits all mention of the continuation of improvements. The gentleman from Massachusetts [Mr. TREADWAY] was careful to include that in his substitute amendment, and therefore I think it is a much better proposition for the committee to adopt than is the amendment proposed by the gentleman from New Jersey. The continuance of improvements is a matter of the utmost consequence to many important rivers and harbors. The gentleman from New Jersey has offered an amendment which simply provides for the maintenance of certain projects, without any provision whatever for continuing improvements. Therefore, I think the Treadway amendment is much better than is the original, to which it is offered as a substitute.

Mr. SMALL. Mr. Chairman, I move that all debate on the pending amendment and all amendments thereto be now closed.

The motion was agreed to.

The CHAIRMAN. The question now is on the substitute offered by the gentleman from Massachusetts [Mr. TREADWAY].

The question was taken; and on a division (demanded by Mr. TREADWAY) there were—ayes 72, noes 104.

Mr. TREADWAY. Mr. Chairman, I demand tellers.

Tellers were ordered; and the Chair appointed as tellers the gentleman from Massachusetts [Mr. TREADWAY] and the gentleman from Missouri [Mr. BOOHER].

The committee again divided; and the tellers reported that there were—ayes 69, noes 111.

So the Treadway substitute was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from New Jersey, Mr. PARKER.

The question was taken; and on a division (demanded by Mr. PARKER of New Jersey) there were—ayes 68, noes 95.

Mr. PARKER of New Jersey. I demand tellers, Mr. Chairman.

Tellers were ordered; and the Chair appointed as tellers the gentleman from New Jersey [Mr. PARKER] and the gentleman from Missouri [Mr. BOOHER].

The committee again divided; and the tellers reported that there were—ayes 66, noes 99.

So the amendment offered by Mr. PARKER of New Jersey was rejected.

Mr. SMALL. Mr. Chairman, I offer the following committee amendment.

The Clerk read as follows:

Committee amendment by Mr. SMALL: At the top of page 2 insert the following paragraph:

"Portland Harbor, Me.: For completing improvements in accordance with the report submitted in House Document No. 71, Sixty-fifth Congress, first session, and subject to the conditions set forth in said document, $300,000."

Mr. SMALL. Mr. Chairman, let me make a brief explanation. This is a very important new project for the improvement of Portland Harbor, Me. It was not included in the bill when reported, because at that time the Secretary of War and Chief of Engineers did not have sufficient evidence or the evidence which was in process of being procured at the time was not ready when the bill was reported.

The gentleman from Massachusetts, Mr. TREADWAY, Senator HALE of Maine, Mr. WHITE of Maine, and others of the Maine delegation had the matter up with the British ambassador on the question of whether Canada desired this improvement to be made. I will read and include in my remarks a letter from Gen. W. M. Black, Chief of Engineers, United States Army, to the chairman of the Committee on Rivers and Harbors; also a letter from United States Senator FREDERICK HALE to Gen. Black; also a letter from the British ambassador to Senator HALE:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, May 14, 1917.

Hon. JOHN H. SMALL,
Chairman Committee on Rivers and Harbors,
House of Representatives.

MY DEAR MR. SMALL: I am inclosing herewith a copy of a letter received from Senator HALE, with which he submits a letter from the British ambassador, copy also inclosed, stating that the Governor General of Canada informs the British ambassador that the Canadian Government would be glad to make use of the facilities recommended by the Engineer Department in the way of additional improvement at Portland Harbor; that these facilities will be of great service during the time when navigation on the St. Lawrence is closed; and that they would be of great importance for the successful prosecution of the war. In view of this statement it is recommended that the pending river and harbor bill be amended, if practicable, so as to include a provision adopting the project for the improvement of Portland Harbor, Me., in accordance with the report submitted in House Document No. 71, Sixty-fifth Congress, first session. A proposed form of amendment is inclosed herewith.

Very sincerely,

W. M. BLACK,
Brigadier General, Chief of Engineers.

—

UNITED STATES SENATE,
Washington, D. C., May 14, 1917.

Brig. Gen. WILLIAM M. BLACK,
Chief of Engineers, Washington, D. C.

DEAR SIR: I am sending herewith a copy of a letter which I have received from the British ambassador stating that the Canadian authorities would be glad to make use of the improved facilities in the harbor at Portland, Me., recommended by the Board of Engineers, and also that they would be of great importance for the successful prosecution of the war.

Very truly, yours,

FREDERICK HALE.

—

BRITISH EMBASSY,
Washington, May 14, 1917.

DEAR MR. SENATOR: I have informed the Canadian Government of the provision in the House river and harbor bill relative to improved facilities for Portland Harbor. The Governor General informs me that the Canadian Government would be glad to make use of the facilities recommended by the Board of Engineers of the War Department during the continuance of the war, and that these facilities will be of great service during the time of navigation in the St. Lawrence being closed. They would be of great importance for the successful prosecution of the war.

Yours, sincerely,

CECIL SPRING-RICE.

The Hon. FREDERICK HALE.

The Grand Trunk Railway, which is a Canadian Railway, has fine terminals in Portland.

During certain months of the winter Canadian harbors are closed, and it is desired to use to a large extent Portland Harbor, which is an open harbor, during the prosecution of the war for the transshipment of food and other supplies.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Yes.

Mr. STAFFORD. It is well known that the Chicago & Grand Trunk Railroad is principally owned by British capital, and that so far as improvements are concerned in that part of their system in the United States, they have been rather niggardly in expending money. For instance, in the city of Detroit they enter a large field of manufacturing districts, and yet have done nothing about meeting pressing conditions arising out of the war. We are making this improvement at the request of the Governor General of Canada for the benefit of the Grand Trunk Railway system of Canada and Great Britain. I wish to know whether the committee is considering any proposal to compel them to give better facilities to the American manufacturers located along their lines, because it is well known that they are not giving the needed service to meet the pressing conditions arising out of the war with Europe.

Mr. SMALL. The gentleman is mistaken about its being intended for the benefit of the Grand Trunk Railway.

Mr. STAFFORD. The gentleman just stated so.

Mr. SMALL. I just stated that the Grand Trunk Railway had terminals at Portland.

Mr. STAFFORD. It is generally known by everyone that the Grand Trunk Railway will be the principal beneficiary of the $300,000 that we are proposing to expend.

Mr. SMALL. It does not make any difference by whom the railroad is owned. It is an instrumentality of transportation that we desire to use.

Mr. STAFFORD. I am calling attention to the fact that these British bondholders and stockholders are not spending any money toward the improvement of their railroad in this country to meet the pressing conditions of business arising out of the war, and the merchants in our country are suffering by reason of their niggardly policy, and yet the Government is expending large sums of money for their benefit.

Mr. SMALL. I will say further that this provides for local cooperation to the extent of deepening the berth space for deep-

draft vessels, affording a depth of not less than 35 feet at low water at spring tide. That is a condition of local cooperation which will be quite extensive.

Mr. SLAYDEN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The time of the gentleman from North Carolina has expired, and the Chair recognizes the gentleman from Wisconsin [Mr. FREAR].

Mr. GALLAGHER. Will the gentleman from Wisconsin yield while I ask the chairman a question?

Mr. FREAR. Yes.

Mr. GALLAGHER. I just wanted to ask the chairman of the committee if all of the important terminals in Portland Harbor are not controlled by the Grand Trunk Railroad?

Mr. SMALL. I am not advised as to that, and I think that is entirely beyond the question. The railroads there, regardless of who owns them, are important for bringing materials from Canada and for transshipment there.

Mr. SLAYDEN. Mr. Chairman, will the gentleman yield?

Mr. SMALL. Yes.

Mr. SLAYDEN. I want to ask the gentleman if our primary and maximum interest in the matter is not that it will facilitate the successful prosecution of the war by supplying people whom we will be called upon to supply with food more rapidly and more regularly?

Mr. SMALL. The gentleman is absolutely correct.

Mr. SLAYDEN. It is the successful prosecution of the war. If that was not the case there would be no such item in the bill.

Mr. SMALL. The gentleman is entirely correct.

Mr. FREAR. Mr. Chairman, I desire to speak for a moment upon this proposition, because I may be able to throw a little light upon the query of the gentleman from Illinois [Mr. GALLAGHER] a few moments ago in regard to the terminals. The argument made in favor of this proposition is that the Grand Trunk Railway and terminals in the city of Portland, Me., entitles it to have the Government of the United States carry on this improvement of several hundred thousand dollars. I quote from volume 3, page 15, of the report of the Commissioner of Corporations, of September 26, 1910:

> At Portland, Me., the water front is private. About one-half of it is owned by the railroads.

At that time there was not a public wharf in the city of Portland. I remember I raised this point once before. I do not know what the facts are at the present time, but that is the statement of the official report of the Government.

Mr. SWITZER. Does the gentleman think that, the railroad wharfage being private, there would be any disposition on the part of the railroads or the private interests to prevent the movement of soldiers and goods across those wharves?

Mr. FREAR. Oh, that is argumentative; that does not reach the point. I have stated that there is not a public wharf in the city of Portland, Me., according to the report of the Commissioner of Corporations, and we are asked to put this $400,000 in there as an improvement. The Engineer's Report says, on page 57:

> A commodious anchorage of 30 feet deep at mean low tide exists at Portland.

There are a great many steamers that come in there at the present draft. I wish to quote now from the testimony of the Army engineer, Col. Newcomer, who appeared before our committee in reference to this harbor, to show that the draft of this harbor to-day answers the purposes, so far as the engineer's report is concerned. I quote from Col. Newcomer, on page 151 of the hearings:

> About Portland Harbor, in that case he [Gen. Black] does not see any reason why it should be included in this bill; but thought if the Canadian Government should ask that it be included as a military measure he would be very glad to recommend it simply on their opinion that it was needed. The main use that is expected for this increase in depth is the shipment of grain that is diverted from Montreal and other Canadian ports during the winter weather, when they are stopped by ice. They have made, of course, in Canada, very great expenditures for the purpose of accommodating this grain traffic wholly within their boundaries, so we do not understand that they favor the diversion of that traffic to Portland. But, in view of the existing conditions it is possible that they may consider it a matter of military value in the shipping of grain to Europe to have this done at this time, so we are awaiting the result of the conference with the officials of the Canadian Government. I understand the matter is being taken up to-day with the British ambassador, and we will get their views next week, so that there is no definite proposition yet for his conclusion. I might state in that connection as bearing upon the present urgency that there is a 9-foot tide at Portland, and the project depth is 30 feet, so there is no question of any boats being able to get in and out on the tide, and if the additional depth is provided at the dock so that a boat can lie at the dock and load during the low tide it is a question of simply waiting a few hours to get out on the tide. The lack of depth at the dock is one difficulty there. A boat drawing 34 feet simply could not load there. They are now deepening the space at the dock to 33 feet at low water.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. FREAR. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

Mr. SMALL. Can the gentleman not get along with less time than that?

Mr. FREAR. Yes; two minutes.

The CHAIRMAN. Is there objection to the gentleman proceeding for two minutes?

There was no objection.

Mr. FREAR. That is the statement of Col. Newcomer, that 30 feet exists there, with a 9-foot tide. That is sufficient to float any boat. The only thing he suggests is that it needs dredging at the wharves. I presume that may be true, but here are wharves that are owned by the railroad companies and controlled exclusively by private parties according to the official Government reports.

I am not going to move to strike this out. I simply want to present to the House this emergency proposition, so that all would know what kind of measures you propose to offer by amendment at this time. If these railroads own the wharves, they should dredge up to the wharves. The channels are kept open by the Government sufficiently to allow the largest boats in existence to go up those channels to near the wharves. Now, Mr. Chairman, I am not going to oppose or move to strike out either this proposition or others that come before us. I wish to make a statement of the conditions that surround Portland at this time, and suggest this in addition, that if it be necessary for the Grand Trunk to send its shipments to a deeper harbor, a few miles farther is Boston. They run clear across the State of Maine and go to Portland, and ask us to dredge out the channel for the Grand Trunk Railway wharves.

The CHAIRMAN. All debate on this amendment is exhausted.

Mr. HERSEY. Mr. Chairman, I move to strike out the last word.

Mr. LENROOT. Would the gentleman yield for a question? Are there big lines established in this harbor?

Mr. HERSEY. There are lots of them.

Mr. LENROOT. And are these inside or outside?

Mr. HERSEY. The dredging is done in the harbor—one section only of the harbor. The city of Portland has spent millions of dollars out of its own treasury on this harbor. The Government in the past has spent much money on this harbor. It is one of the most magnificent harbors in the Union. In times of war and times of peace Casco Bay is protected against war vessels and against storms and is the most beautiful harbor in the United States; and it is the greatest harbor in the Nation for commercial purposes at the present time, and in this present war emergency it becomes the most material harbor to be developed for war emergency, if there is such a thing.

Portland Harbor, in Casco Bay, is not controlled by the Grand Trunk Railroad nor any other railroad. It is under the charge of the municipality of the city of Portland. It is true the Grand Trunk has its terminals there, as well as the Canadian Pacific, the Maine Central, the Boston & Maine; and all the great railroad centers of the East are in Portland. It is further true that in the winter season, which comes very early in northern Maine, it closes the St. Lawrence, it closes the traffic everywhere, except by rail and except through the port of Portland. To-day, in a time of war, all the traffic from the great Canadas, supplying the mother country with food in time of war, and everything else which is necessary in time of war, must pass through Portland. And out of Portland Harbor and Casco Bay ships must sail to Liverpool. There is no other place. It becomes a very important port. And this project is to lower obstructions in Casco Bay 5 feet, so that trans-Atlantic ships can come to the wharves and there load food, soldiers, ammunition, and materials for Europe from those wharves, which can not be loaded on those vessels unless the harbor is lowered. It is the immediate necessity at this time. As I said a few moments ago, it is the most material project in all this bill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. TREADWAY. Mr. Chairman——

The CHAIRMAN. The gentleman from Massachusetts is recognized.

Mr. TREADWAY. Mr. Chairman, I am heartily in favor of including the Portland item in the bill, as recommended by the committee. The statement of the gentleman from Maine [Mr. HERSEY], who has just taken his seat, is amply proven by anyone who has either visited Portland or has examined into the conditions under which this item is recommended by the committee. The harbors of our neighbor on the north, Canada, are closed very early and remain closed both throughout the winter season and late into the spring. It is absolutely necessary in moving both the war supplies and the men and material for our allies, from Canada, that every facility possible should

be given in the nearest port, and the nearest port that can be used is Portland.

Mr. STAFFORD. Will the gentleman yield?

Mr. TREADWAY. I will.

Mr. STAFFORD. Will the gentleman inform the committee what this appropriation is for? As to whether it is for deepening the channel or making available the wharfage owned by the railroads?

Mr. HERSEY. Will the gentleman from Massachusetts yield to me to explain that?

Mr. TREADWAY. I will.

Mr. HERSEY. In the recent report of Maj. Gen. Pope, two months ago, on this project, he says, in giving his reasons for doing this work:

For the above reasons it is my opinion that Portland Harbor, Me., is worthy of improvement to the extent of dredging the channel shown on the map to a depth of 35 feet at mean low tide and the removal of ledges Nos. 2 and 3 in the main ship channel to a depth of 40 feet at mean low tide, all at a cost of $300,000.

Mr. STAFFORD. It is only for channel work, and deepening to 35 to 40 feet, respectively?

Mr. HERSEY. Five feet more.

Mr. TREADWAY. It is a long channel, and there are numerous rocks projecting into it. I should call it a rather dangerous harbor to go into with deep-draft vessels at the present time. And while I am opposed to the passage of the bill, there are very few items in it more meritorious, so far as the basis on which we suppose this bill comes before us—namely, war measures—than Portland Harbor.

Mr. GALLAGHER. Will the gentleman yield?

Mr. TREADWAY. I will.

Mr. GALLAGHER. Is it not a fact that railroad traffic could be diverted through central Vermont to New London, Conn.?

Mr. TREADWAY. So far as that is concerned, I would like to see it come through Boston.

Mr. GALLAGHER. You have got direct railroad communication?

Mr. TREADWAY. I acknowledge the criticism of the gentleman as applied to Portland, but nevertheless Portland is the nearest harbor to Canada of any along the New England coast.

Mr. WHITE of Maine. Mr. Chairman, may I make one suggestion in that connection. Portland Harbor not only is the outlet of the Grand Trunk Railway system of Canada, but it serves as an outlet for the entire Maine Central system and for the Bangor & Aroostook system. This improvement is of benefit to these interests, but of greater consequence it is to the advantage of all citizens and the entire industrial life of Maine.

Through this port go the lumber, the potatoes of the great agricultural district of Aroostook, and all the other products of our State. I know very little about the details of this proposition. I feel free to say that no citizen of Portland and no commercial interest of that city called this matter to my attention until this bill came before the House, and no one furnished any information in connection with it, but I have since been subjected to criticism by the press and by people of Portland because of my alleged opposition to this bill. I feel that their attitude is unwarranted, and I resent it. Nevertheless I am not able to lose sight of the fact that this is a meritorious project, and I hope the amendment will have the approval of the House. [Applause.]

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. TREADWAY. Mr. Chairman, I ask for one minute more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. TREADWAY. Mr. Chairman, there is just one more statement that I would like to make, and that is this: This project has been asked for by our allies. I know of no way in a small matter in which we can show our friendly disposition toward our allies than by the adoption of the Portland project. [Applause.]

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Pennsylvania moves to strike out the last two words.

Mr. MOORE of Pennsylvania. Mr. Chairman, I am in favor of this amendment. I believe it ought to go in the bill as a war necessity. I am glad to have the gentlemen from Maine speak in favor of this proposition within the confines of their State. If gentlemen coming from various sections of the country were as familiar with other local projects as the Maine Members are with the Portland project there would be less opposition to the river and harbor bill. No one disputes the accuracy and the truth of the statements of the gentlemen from Maine with respect to the merits and the necessity of their harbor, but how many Members are there now in the House who seem inclined to dispute with other Members with respect to projects about which they know absolutely nothing and concerning which they have not taken the pains to find out? Are Members to vote projects up or down merely because of public report, such newspaper reports as have been referred to by the gentleman from Maine [Mr. WHITE], reports that describe in glaring headlines "The Pork Bill of Congress"? If we continue to do that we may defeat many projects of equal merit with that presented by the gentlemen from Maine.

I am for this Portland Harbor proposition, because I believe the country needs it. But the gentleman from Massachusetts [Mr. TREADWAY] has injected a thought here that I do not want to see escape without comment. He says he approves this improvement at Portland Harbor, although his minority report was against all kinds of river and harbor improvements, because our allies asked it.

Mr. TREADWAY. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. TREADWAY. Does not the gentleman intend to be fair in his statement?

Mr. MOORE of Pennsylvania. Of course I do.

Mr. TREADWAY. The minority report says very positively that we are in favor of any appropriation for river and harbor work that has to do with preparedness or the successful conduct of the war, and that is the ground on which we favor Portland.

Mr. MOORE of Pennsylvania. But the gentleman and his six colleagues who signed that minority report so framed it that the entire newspaper world understood that they were opposed to this bill because it was a "pork-barrel" bill, and the gentleman can not come in now because our allies have asked him to make an appropriation out of the American Treasury to improve an American port, and then condemn every other project in the bill because he wants to serve our allies. I am in favor of giving our allies help. Every bill that we have passed in this war Congress seems to have been intended to give our allies help. But I am an American, and I am not going to forget here and now that I am appropriating the money of American taxpayers, and that American citizens in American ports and on American rivers have as much right to have facilities for the carriage of their commerce as have our allies. [Applause.]

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired. The gentleman from Wisconsin [Mr. LENROOT] is recognized.

Mr. SMALL. Mr. Chairman, before the gentleman begins, I wish to move that all debate on the pending amendment and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from North Carolina moves that all debate on the pending amendment and all amendments thereto close in five minutes. The question is on agreeing to that motion.

The motion was agreed to.

The CHAIRMAN. The gentleman from Wisconsin is recognized.

Mr. LENROOT. Mr. Chairman, in the speech just made by the gentleman from Pennsylvania [Mr. MOORE] he has implied that because a Member from a State in which an improvement is situated knows more about it than anybody else, if that Member is in favor of that improvement it should be accepted as a matter of course.

Now, I want to say in reply to the gentleman that if every other item of this bill could be justified as both of the gentlemen from Maine have justified this item, there would be no criticism of river and harbor bills. [Applause.] The trouble is—and it will reach the gentleman from Pennsylvania, perhaps, a little later—when they come to other matters they can not justify them as the gentlemen from Maine have justified this proposition.

Mr. MOORE of Pennsylvania. Will the gentleman from Wisconsin yield?

Mr. LENROOT. Certainly.

Mr. MOORE of Pennsylvania. The gentleman from Pennsylvania will justify the items in which he is interested at the proper time; but I would ask the gentleman from Wisconsin if he does not now propose to vote for a $300,000 appropriation for Portland Harbor largely because the Members from Maine have indorsed it?

Mr. LENROOT. No. I take the statement of fact from the gentleman from Maine and from the report, and on that statement of fact I come to the conclusion that the item is justified. I will take the statements of facts made by the gentleman from

Pennsylvania, but I will not necessarily accept his conclusion upon the facts. There is the distinction.

Mr. MOORE of Pennsylvania. Would the gentleman accept the statement of fact from the gentleman from Wisconsin with regard to the necessity of an appropriation to improve the harbor at Duluth, which is not in this bill?

Mr. LENROOT. Not with regard to the necessity, no; but I will accept the statement of gentlemen as to the facts existing in the harbor of Duluth, and then I will form my own judgment as to the necessity.

Mr. MOORE of Pennsylvania. Would the gentleman believe his own statement with regard to the harbor of Duluth? As a Member of this House, I would, he being a colleague of mine. [Laughter.]

Mr. LENROOT. I certainly appreciate the compliment paid me by the gentleman, but he would take more from me than I think he ought to take if he would blindly follow my conclusion, and with the highest respect that I have for the gentleman from Pennsylvania I can not in return accept his conclusions in all cases upon his own projects.

Mr. MOORE of Pennsylvania. Then the gentleman must always be right, and the gentleman from Pennsylvania must always be wrong.

Mr. LENROOT. No; the gentleman ought to form his own judgment upon any matter that the gentleman from Wisconsin is interested in and not accept the conclusions of the gentleman from Wisconsin, and I have the same liberty with reference to the projects of the gentleman from Pennsylvania.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

The Clerk read as follows:

Boston Harbor, Mass.: The unexpended balances of appropriations heretofore made and authorized for this improvement are hereby made available for improvement in accordance with the report submitted in House Document No. 931, Sixty-third Congress, second session.

Gloucester, Beverly, Salem, Lynn, Plymouth, and Provincetown Harbors, Mystic, Malden, Weymouth Fore and Weymouth Back Rivers, and Dorchester Bay and Neponset River, Mass.: For maintenance, $24,000.

Mr. SMALL. Mr. Chairman, I offer a committee amendment.

The CHAIRMAN. The gentleman from North Carolina offers an amendment, which the Clerk will report.

Mr. LENROOT. Mr. Chairman, my attention was diverted, and I ask unanimous consent to return to the Boston item. It is a new project, and I think we ought to have a word of explanation upon it.

Mr. SMALL. Let us complete this amendment first. Then we will return after that.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin for unanimous consent to return to the Boston item?

There was no objection.

Mr. SMALL. May we dispose of this committee amendment first?

Mr. LENROOT. Yes.

The CHAIRMAN. The gentleman from North Carolina offers a committee amendment, which the Clerk will report.

The Clerk read as follows:

Committee amendment:

On page 2, after line 10, insert a new paragraph, as follows:

"Providence River and Harbor, Pawtucket River, Newport Harbor, harbors of refuge at Point Judith and Block Island, entrance to Point Judith Pond, and Great Salt Pond, Block Island, R. I.: The unexpended balance of appropriation heretofore made for improvement of Providence River and Harbor in accordance with reports submitted in House Document No. 919, Sixtieth Congress, first session, are hereby made available for improvement of said river and harbor in accordance with reports submitted in House Document No. 1369, Sixty-second Congress, third session."

Mr. STAFFORD. Will the gentleman yield?

Mr. SMALL. I will make this brief statement: The item carries no appropriation for maintenance. These items are simply grouped there in order for better administration of some available funds on hand with regard to maintenance. There is adopted a new project, however, for Providence Harbor, and the unexpended funds of the old project which has been completed are simply made available for the new project. That is the purpose of it. It carries no additional appropriation.

Mr. STAFFORD. Will the gentleman yield?

Mr. SMALL. Certainly.

Mr. STAFFORD. Can the gentleman inform us how much money was turned back into the Treasury from the Providence Harbor project by reason of the completion of the original project?

Mr. SMALL. It is estimated that on July 1 there will be on hand $80,000. That is not separated as to maintenance and improvement. How much of that is a balance for maintenance and how much from the old project which has been completed, I am unable to say. But that is all there is which is made available for the new project.

Mr. STAFFORD. What is the limit of cost that is contemplated for the building of this new project?

Mr. SMALL. The exact amount is $927,800.

Mr. STAFFORD. It is not a small project?

Mr. SMALL. No.

Mr. STAFFORD. From the phraseology of the amendment the committee and the country would never get any knowledge as to our launching on a project that virtually commits us to $1,000,000.

Mr. SMALL. I will say to the gentleman that there is in Providence Harbor a depth of 25 feet. That is not a sufficient depth for the most economical class of shipping that uses that harbor.

Mr. STAFFORD. This bill carries throughout the utilization of appropriations that have been made for projects in the localities to which the items in this bill refer. I should like to make this inquiry—as to whether the total amount of $26,000,000 in this bill includes the amount of appropriations made available through this bill for these respective improvements?

Mr. SMALL. It does not include the available balances.

Mr. STAFFORD. So that the total amount that can be utilized for work during the next fiscal year on these respective items does not exceed that total.

Mr. SMALL. Yes; on Providence Harbor.

Mr. STAFFORD. Oh, no. I am speaking of all the items in the bill.

Mr. SMALL. I understood the gentleman to be referring to Providence Harbor.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. I ask unanimous consent that the gentleman's time be extended, because my question has not been answered.

Mr. SMALL. I think three minutes will be sufficient.

The CHAIRMAN. Unanimous consent is asked that the gentleman's time be extended three minutes. Is there objection?

There was no objection.

Mr. STAFFORD. This matter has not been brought out heretofore in general debate, and I had it in mind when an item was reached to make an inquiry as to the amount of these sums of unexpended balances made available for use in this bill.

Mr. SMALL. If I understand the gentleman's inquiry, it is whether the available balances are included in the total of appropriations carried in this bill, say $26,893,000.

Mr. STAFFORD. No; I am trying to ascertain whether this amount, as stated, $26,900,000, is merely the face value as stated in the amounts herein enumerated, or whether it includes the amounts made available, which are utilized in this bill.

Mr. SMALL. It does not include the various balances made available in the bill.

Mr. STAFFORD. Then $26,900,000 is the total amount that may be expended on these respective items during the next fiscal year?

Mr. SMALL. Reference has been made several times during the consideration of this bill to the available balances to the credit of various works of improvement. These balances are independent of the appropriations carried in this bill. Those appropriations are for works of improvement other than those for which the balances may be applied. In my remarks when presenting this bill on June 8, appearing in the CONGRESSIONAL RECORD, page 3363, I quoted a letter from the Chief of Engineers explaining that "these balances all contemplate different work from that proposed with the funds carried in the bill."

The CHAIRMAN (Mr. GARNER). The question is on the amendment offered by the gentleman from North Carolina.

The question was taken, and the amendment was agreed to.

Mr. SMALL. Mr. Chairman, it is very desirable that we proceed as far as possible with this bill this afternoon, and I propose to ask the committee to remain in session, say, until 7 or 8 o'clock, in order that we may make as much progress as we can.

Mr. LENROOT. Mr. Chairman, I ask unanimous consent to return to the item in relation to Boston Harbor.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to return to the Boston Harbor item. Is there objection?

There was no objection.

Mr. LENROOT. Mr. Chairman, I do not desire to occupy any time on this, but it is a new project. I assume that it is one of those recommended by the board as purely for military purposes. I think the gentleman from Massachusetts or the chairman of the committee ought to explain to the House just what the proposition is, and I yield for that purpose.

Mr. TREADWAY. Mr. Chairman, the inquiry of the gentleman from Wisconsin relative to the Boston Harbor is a very pertinent one, I think. In the bill that passed the House at the last session of Congress there was an item adopting the improvement of the Boston Harbor project and appropriating $400,000 as a part of the $1,250,000 that it will require to make Boston a harbor of 40 feet in depth. When the preparation of this bill was started this year, as has already been said, a little different method was pursued than previously. In other words, since I have been a member of the River and Harbor Committee the clerk has prepared and presented to the members of the committee a book similar to the one I hold in my hand, but there has been no book of any kind furnished at this session. At this time a print was placed before us at our first meeting. There was some inquiry made, and possibly there may be some reference made later in debate to that matter, from Col. Newcomer.
